#### **ENGL 40413. Religious Themes in Twentieth-Century British and American Literature**

(3-0-3) Huk

*Prerequisite:* (ENGL 30101) OR (ENGL 30301 OR ENGL 404M) OR (ENGL 30302 OR ENGL 406M) OR (ENGL 30303 OR ENGL 414M) OR (ENGL 30304 OR ENGL 481M) OR (ENGL 30305 OR ENGL 489M) OR (ENGL 30306 OR ENGL 405M) OR (ENGL 30307 OR ENGL 435M) OR (ENGL 30308 OR ENGL 493M) OR (ENGL 30309 OR ENGL 402M) OR (ENGL 30310 OR ENGL 416M) OR (ENGL 30311 OR ENGL 470M) OR (ENGL 30312 OR ENGL 407M) OR (ENGL 30313 OR ENGL 421M) OR (ENGL 30314) OR (ENGL 30315 OR ENGL 423M) OR (ENGL 30316 OR ENGL 461M) OR (ENGL 30317 OR ENGL 463M) OR (ENGL 30318 OR ENGL 491M) OR (ENGL 30319 OR ENGL 465M) OR (ENGL 30320 OR ENGL 415M) OR (ENGL 30321) OR (ENGL 30325) OR ENGL 440M OR ENGL 490M OR ENGL 492M

A close study of religious imagery and themes in the works of selected 20th-century modern and postmodern poets.

#### **ENGL 40414. The Irish Short Story**

(3-0-3)

This course studies the Irish short story as a literary genre that reflects the changing political and cultural forces at play in Ireland. We begin the course by surveying various critical theories that can be applied to the genre before reading and discussing a wide selection of short stories. The course considers Irish writing in the broader sense—literature written in either Irish or English. Among the authors included are Patrick Pearse, Pádraic Ó Conaire, Séamus Mac Grianna, James Joyce, Liam O'Flaherty, Elizabeth Bowen, Frank O'Connor, Sean O'Faolain, Éilís Ní Dhuibhne, Angeal Bourke, Seán Mac Mathúna, Micheál Ó Conghaile, Eithne Strong, Pádraic Breathnach, Alan Titley, Mary Lavin, William Trevor, Gerry Adams, and Bernard MacLaverty.

#### **ENGL 40415. The Avant-Garde: From Dada to Punk and Beyond**

(3-0-3)

Considering various genres and mediums (poetry, art, cinema, music, drama, and performance) from a range of geographic locations, an investigation of the avant-garde movement of the late 19th and early 20th centuries.

#### **ENGL 40419. Gender, Sexuality, and Literacy Experiment in Post-War British and Irish Poetry**

(3-0-3)

An analysis of British and Irish poetry written after World War II.

#### **ENGL 40422. Modernism and Magazines**

(3-0-3)

*Prerequisite:* (ENGL 30101) OR (ENGL 30301 OR ENGL 404M) OR (ENGL 30302 OR ENGL 406M) OR (ENGL 30303 OR ENGL 414M) OR (ENGL 30304 OR ENGL 481M) OR (ENGL 30305 OR ENGL 489M) OR (ENGL 30306 OR ENGL 405M) OR (ENGL 30307 OR ENGL 435M) OR (ENGL 30308 OR ENGL 493M) OR (ENGL 30309 OR ENGL 402M) OR (ENGL 30310 OR ENGL 416M) OR (ENGL 30311 OR ENGL 470M) OR (ENGL 30312 OR ENGL 407M) OR (ENGL 30313 OR ENGL 421M) OR (ENGL 30314) OR (ENGL 30315 OR ENGL 423M) OR (ENGL 30316) OR (ENGL 30317) OR (ENGL 30318) OR (ENGL 30319) OR (ENGL 30320) OR (ENGL 30321) OR (ENGL 30325)

Attention to the circulation of ideas about literary modernism and modernity in a range of publications: little magazines, "slicks", feminist periodicals, women's magazines, and alternative/oppositional journals.

#### **ENGL 40426. Modern and Contemporary British Drama**

(3-0-3) Bruns

*Prerequisite:* (ENGL 30101) OR (ENGL 30301 OR ENGL 404M) OR (ENGL 30302 OR ENGL 406M) OR (ENGL 30303 OR ENGL 414M) OR (ENGL 30304 OR ENGL 481M) OR (ENGL 30305 OR ENGL 489M) OR (ENGL 30306 OR ENGL 405M) OR (ENGL 30307 OR ENGL 435M) OR (ENGL 30308 OR ENGL 493M) OR (ENGL 30309 OR ENGL 402M) OR (ENGL 30310 OR ENGL 416M) OR (ENGL 30311 OR ENGL 470M) OR (ENGL 30312 OR ENGL 407M) OR (ENGL 30313 OR ENGL 421M) OR (ENGL 30314) OR (ENGL 30315 OR ENGL 423M) OR (ENGL 30316 OR ENGL 461M) OR (ENGL 30317 OR ENGL 463M) OR (ENGL 30318 OR ENGL

491M) OR (ENGL 30319 OR ENGL 465M) OR (ENGL 30320 OR ENGL 415M) OR (ENGL 30321) OR (ENGL 30325) OR ENGL 440M OR ENGL 490M OR ENGL 492M

Close readings of dramatic literatures written by British playwrights over the span of the 20th century, with particular emphasis on the various aesthetic and experimental forms used by the playwrights.

### **ENGL 40501. Contemporary Irish Drama**

(3-0-3)

*Prerequisite:* (ENGL 30101) OR (ENGL 30301 OR ENGL 404M) OR (ENGL 30302 OR ENGL 406M) OR (ENGL 30303 OR ENGL 414M) OR (ENGL 30304 OR ENGL 481M) OR (ENGL 30305 OR ENGL 489M) OR (ENGL 30306 OR ENGL 405M) OR (ENGL 30307 OR ENGL 435M) OR (ENGL 30308 OR ENGL 493M) OR (ENGL 30309 OR ENGL 402M) OR (ENGL 30310 OR ENGL 416M) OR (ENGL 30311 OR ENGL 470M) OR (ENGL 30312 OR ENGL 407M) OR (ENGL 30313 OR ENGL 421M) OR (ENGL 30314) OR (ENGL 30315 OR ENGL 423M) OR (ENGL 30316 OR ENGL 461M) OR (ENGL 30317 OR ENGL 463M) OR (ENGL 30318 OR ENGL 491M) OR (ENGL 30319 OR ENGL 465M) OR (ENGL 30320 OR ENGL 415M) OR (ENGL 30321) OR (ENGL 30325) OR ENGL 440M OR ENGL 490M OR ENGL 492M

A close analysis of the dramatic literature produced by Irish playwrights during the latter half of the 20th century.

### **ENGL 40502. Ideology, Poetry, and Politics in Jacobite Ireland**

(3-0-3)

The political poetry of the period 1541 to 1688 will be discussed and analyzed against the historical background. The primary focus will be the mentality of the native intelligentsia as it is reflected in the poetry and as it responded to the momentous changes of the period. The origins and rise of the cult of the Stuarts will be examined and the historiography of the period will be assessed.

### **ENGL 40503. Anglo-Irish Identities 1600–1800**

(3-0-3)

An exploration of the complex and contested cultural, political, and ideological identities of the Anglo-Irish.

### **ENGL 40504. Gothic Images in Modern Literature**

(3-0-3)

An exploration of the ways in which such themes as doubling, haunting, terror, and sexual anxiety, themes that inhere in the Gothic novel, operate in modernist fiction.

### **ENGL 40505. Studies in Six Irish Writers**

(3-0-3)

W.B. Yeats, Elizabeth Brown, Bram Stoker, J.M. Synge, Seamus Heaney, and Medbh McGuckian.

### **ENGL 40506. Modern Irish Drama**

(3-0-3)

A study both the drama produced by the playwrights of the Irish literary renaissance—W.B. Yeats, J.M. Synge, Lady Gregory, and Sean O'Casey—and the political struggle for Irish independence that was taking place at the same time.

### **ENGL 40507. Identities in Early Modern Literature**

(3-0-3) O'Buachalla

*Prerequisite:* (ENGL 30101) OR (ENGL 30301 OR ENGL 404M) OR (ENGL 30302 OR ENGL 406M) OR (ENGL 30303 OR ENGL 414M) OR (ENGL 30304 OR ENGL 481M) OR (ENGL 30305 OR ENGL 489M) OR (ENGL 30306 OR ENGL 405M) OR (ENGL 30307 OR ENGL 435M) OR (ENGL 30308 OR ENGL 493M) OR (ENGL 30309 OR ENGL 402M) OR (ENGL 30310 OR ENGL 416M) OR (ENGL 30311 OR ENGL 470M) OR (ENGL 30312 OR ENGL 407M) OR (ENGL 30313 OR ENGL 421M) OR (ENGL 30314) OR (ENGL 30315 OR ENGL 423M) OR (ENGL 30316 OR ENGL 461M) OR (ENGL 30317 OR ENGL 463M) OR (ENGL 30318 OR ENGL 491M) OR (ENGL 30319 OR ENGL 465M) OR (ENGL 30320 OR ENGL

415M) OR (ENGL 30321) OR (ENGL 30325) OR ENGL 440M OR ENGL 490M OR ENGL 492M

The topic to be covered in this course is the formation of individual and collective identity through language, literature and history in this period. In addition to the works of the great early-modern poets (16th–18th centuries) like Tadhg Dall Ó hUiginn, Dáibhí Ó Bruadair, and Aogán Ó Rathaille, we will focus on such important prose works as *Foras Feasa ar Éirinn*, the foundation history of the "new" Irish nation of the 17th century. Important secondary works here will include those of Anthony D. Smith and Adrian Hastings on pre-modern forms of nationalism, as well as Stephen Greenblatt on identity formation in 16th-century England and Paul Friedrich on linguistic relativism and the poetic in language.

### **ENGL 40508. Heroic Literature in Modern Adaptation**

(3-0-3)

*Prerequisite:* (ENGL 30101) OR (ENGL 30301 OR ENGL 404M) OR (ENGL 30302 OR ENGL 406M) OR (ENGL 30303 OR ENGL 414M) OR (ENGL 30304 OR ENGL 481M) OR (ENGL 30305 OR ENGL 489M) OR (ENGL 30306 OR ENGL 405M) OR (ENGL 30307 OR ENGL 435M) OR (ENGL 30308 OR ENGL 493M) OR (ENGL 30309 OR ENGL 402M) OR (ENGL 30310 OR ENGL 416M) OR (ENGL 30311 OR ENGL 470M) OR (ENGL 30312 OR ENGL 407M) OR (ENGL 30313 OR ENGL 421M) OR (ENGL 30314) OR (ENGL 30315 OR ENGL 423M) OR (ENGL 30316 OR ENGL 461M) OR (ENGL 30317 OR ENGL 463M) OR (ENGL 30318 OR ENGL 491M) OR (ENGL 30319 OR ENGL 465M) OR (ENGL 30320 OR ENGL 415M) OR (ENGL 30321) OR (ENGL 30325) OR ENGL 440M OR ENGL 490M OR ENGL 492M

Beginning with a study of the ethos of Irish/Celtic heroic literature in its historic and cultural context, this course examines the ideological, aesthetic, and personal uses to which that material has been put by Irish writers of the past two centuries (19th and 20th centuries) writing in English and Irish. Among the authors to be studied are Seamus Heaney, Flann O'Brien/Myles na Gopaleen, Nuala Ní Dhomhnaill, and Eugene Watters/Eoghan ÓTuairisc. Particular attention will be paid to shifting concepts of "authenticity" and the degree to which various creative artists have retained, reinterpreted, or reinvented what they perceived to be the essence of their originals. This course will interest English majors, modernists, and medievalists.

### **ENGL 40509. Modern Irish Drama**

(3-0-3)

In this course, we will study both the drama produced by the playwrights of the Irish literary renaissance—Yeats, Synge, Lady Gregory, and O'Casey—and the political struggle for Irish independence that was taking place at the same time.

### **ENGL 40510. New Writing from Britain and Ireland: Contemporary Fiction**

(5-0-3)

This course will introduce students to the contemporary fiction of Ireland, England, Scotland, and Wales, as well as some of the best recent black British fiction. Some of the authors whose work we will read are Pat McCabe, Neil Jordan, John Banville, Zadie Smith, Monica Ali, Andrea Levi, Irvine Welsh, James Kelman, and Pat Barker. These writers will be read in the context of "the break-up of Britain" and a concomitant sense of the changes in British and Irish identity in the past 20 years or so.

### **ENGL 40511. Film, Literature, and Irish Culture**

(3-0-3)

*Corequisite:* ENGL 41005

An examination of the dominant images of Ireland in film and literature, and a review of development in a wider cultural and historical context.

### **ENGL 40512. Versions of the Gothic**

(3-0-3)

A survey of Gothic fiction in England and Ireland from the mid-18th century to the Victorian Age.

**ENGL 40513. Culture and Politics in Northern Ireland**

(3-0-3) Smyth

*Prerequisite:* (ENGL 30101) OR (ENGL 30301 OR ENGL 404M) OR (ENGL 30302 OR ENGL 406M) OR (ENGL 30303 OR ENGL 414M) OR (ENGL 30304 OR ENGL 481M) OR (ENGL 30305 OR ENGL 489M) OR (ENGL 30306 OR ENGL 405M) OR (ENGL 30307 OR ENGL 435M) OR (ENGL 30308 OR ENGL 493M) OR (ENGL 30309 OR ENGL 402M) OR (ENGL 30310 OR ENGL 416M) OR (ENGL 30311 OR ENGL 470M) OR (ENGL 30312 OR ENGL 407M) OR (ENGL 30313 OR ENGL 421M) OR (ENGL 30314) OR (ENGL 30315 OR ENGL 423M) OR (ENGL 30316 OR ENGL 461M) OR (ENGL 30317 OR ENGL 463M) OR (ENGL 30318 OR ENGL 491M) OR (ENGL 30319 OR ENGL 465M) OR (ENGL 30320 OR ENGL 415M) OR (ENGL 30321) OR (ENGL 30325) OR ENGL 440M OR ENGL 490M OR ENGL 492M

Using a broad range of texts—drama, fiction, poetry, film, painting, and documentary material—an examination of the politics of culture, and the cultures of politics, in the North of Ireland during the 20th century.

**ENGL 40515. Contemporary British and Irish Fiction**

(3-0-3)

A survey of major contemporary novelists and short story writers from Britain and Ireland, including black Irish, Scottish, and Northern and Southern Irish writers as well as English writers who fit into none of these categories.

**ENGL 40516. The Irish in Their Own Words**

(3-0-3)

The purpose of this course is to introduce students to the richness and variety of literature produced in the Irish language during the medieval and early modern periods (we will cover primarily the period between approximately 800 and 1700 AD). The emphasis in the first half of the semester will be on studying the mainly prose saga literature of the medieval period in its various literary, cultural, and historical contexts. This will involve both a close reading of the texts themselves in English translation and an examination of the material in the light of recent scholarship in this area. The second half will investigate the literature of the early modern period, in this case largely the poetry. This period is one of cumulative crisis for the Irish and their linguistic and cultural well-being. Students read closely a selection of texts representative of various facets of this crisis and of Irish responses to them in their own language rather than in the English language of their colonizers. All the translations are accompanied by facing original text so that students gain some working knowledge of the Irish language that will assist them in evaluating the translations that they are reading and in appreciating the sensuous beauty of much of this poetry. The material provides interesting contrasts and comparisons for those who have already studied some Anglo-Irish literature and it should also be of interest to students of modern Irish history.

**ENGL 40520. Reading *Ulysses***

(3-0-3)

*Prerequisite:* (ENGL 30101) OR (ENGL 30301 OR ENGL 404M) OR (ENGL 30302 OR ENGL 406M) OR (ENGL 30303 OR ENGL 414M) OR (ENGL 30304 OR ENGL 481M) OR (ENGL 30305 OR ENGL 489M) OR (ENGL 30306 OR ENGL 405M) OR (ENGL 30307 OR ENGL 435M) OR (ENGL 30308 OR ENGL 493M) OR (ENGL 30309 OR ENGL 402M) OR (ENGL 30310 OR ENGL 416M) OR (ENGL 30311 OR ENGL 470M) OR (ENGL 30312 OR ENGL 407M) OR (ENGL 30313 OR ENGL 421M) OR (ENGL 30314) OR (ENGL 30315 OR ENGL 423M) OR (ENGL 30316 OR ENGL 461M) OR (ENGL 30317 OR ENGL 463M) OR (ENGL 30318 OR ENGL 491M) OR (ENGL 30319 OR ENGL 465M) OR (ENGL 30320 OR ENGL 415M) OR (ENGL 30321) OR (ENGL 30325) OR ENGL 440M OR ENGL 490M OR ENGL 492M

A close analysis of James Joyce's *Ulysses*

**ENGL 40521. Late Modernist and Postmodernist Poetry**

(3-0-3)

*Prerequisite:* (ENGL 30101) OR (ENGL 30301 OR ENGL 404M) OR (ENGL 30302 OR ENGL 406M) OR (ENGL 30303 OR ENGL 414M) OR (ENGL 30304 OR ENGL 481M) OR (ENGL 30305 OR ENGL 489M) OR (ENGL

30306 OR ENGL 405M) OR (ENGL 30307 OR ENGL 435M) OR (ENGL 30308 OR ENGL 493M) OR (ENGL 30309 OR ENGL 402M) OR (ENGL 30310 OR ENGL 416M) OR (ENGL 30311 OR ENGL 470M) OR (ENGL 30312 OR ENGL 407M) OR (ENGL 30313 OR ENGL 421M) OR (ENGL 30314) OR (ENGL 30315 OR ENGL 423M) OR (ENGL 30316 OR ENGL 461M) OR (ENGL 30317 OR ENGL 463M) OR (ENGL 30318 OR ENGL 491M) OR (ENGL 30319 OR ENGL 465M) OR (ENGL 30320 OR ENGL 415M) OR (ENGL 30321) OR (ENGL 30325) OR ENGL 440M OR ENGL 490M OR ENGL 492M

The distinction between late modernist and postmodernist has an ethical bearing, marked respectively by resistance to corruption and celebration of hybridity, although these strains may be mixed and politically intricate. This course considers the theories, assumptions, and practice associated with work either riding or riven by such ethical and political tension, notably by Barbara Guest, John Wieners, Susan Howe, Marjorie Welish, J.H. Prynne, Barry MacSweeney, Denise Riley, and Lisa Robertson.

**ENGL 40525. Gender, Genre, and the Short Story**

(3-0-3)

This courses discusses how representations of gender were explored in a survey of 19th- and 20th-century short stories from England, Ireland, France, Russia, and the southern United States.

**ENGL 40535. Poetic Modernisms**

(3-0-3)

*Prerequisite:* (ENGL 30101) OR (ENGL 30301 OR ENGL 404M) OR (ENGL 30302 OR ENGL 406M) OR (ENGL 30303 OR ENGL 414M) OR (ENGL 30304 OR ENGL 481M) OR (ENGL 30305 OR ENGL 489M) OR (ENGL 30306 OR ENGL 405M) OR (ENGL 30307 OR ENGL 435M) OR (ENGL 30308 OR ENGL 493M) OR (ENGL 30309 OR ENGL 402M) OR (ENGL 30310 OR ENGL 416M) OR (ENGL 30311 OR ENGL 470M) OR (ENGL 30312 OR ENGL 407M) OR (ENGL 30313 OR ENGL 421M) OR (ENGL 30314) OR (ENGL 30315 OR ENGL 423M) OR (ENGL 30316 OR ENGL 461M) OR (ENGL 30317 OR ENGL 463M) OR (ENGL 30318 OR ENGL 491M) OR (ENGL 30319 OR ENGL 465M) OR (ENGL 30320 OR ENGL 415M) OR (ENGL 30321) OR (ENGL 30325) OR ENGL 440M OR ENGL 490M OR ENGL 492M

A survey of British and American modernist poets, with a particular emphasis on the aesthetic innovations made on poetry as a result of their works.

**ENGL 40601. Voices of American Renaissance**

(3-0-3)

A focus on the trope of "voice" as it shaped the literatures of the American renaissance period through an exploration of works by Emerson, Thoreau, Poe, Dickinson, Whitman, Douglass, Melville, Stowe, Hawthorne, and a number of lesser known authors and oral performers.

**ENGL 40602. Tragedy: Shakespeare and Melville**

(3-0-3)

Staud

*Prerequisite:* (ENGL 30101) OR (ENGL 30301 OR ENGL 404M) OR (ENGL 30302 OR ENGL 406M) OR (ENGL 30303 OR ENGL 414M) OR (ENGL 30304 OR ENGL 481M) OR (ENGL 30305 OR ENGL 489M) OR (ENGL 30306 OR ENGL 405M) OR (ENGL 30307 OR ENGL 435M) OR (ENGL 30308 OR ENGL 493M) OR (ENGL 30309 OR ENGL 402M) OR (ENGL 30310 OR ENGL 416M) OR (ENGL 30311 OR ENGL 470M) OR (ENGL 30312 OR ENGL 407M) OR (ENGL 30313 OR ENGL 421M) OR (ENGL 30314) OR (ENGL 30315 OR ENGL 423M) OR (ENGL 30316 OR ENGL 461M) OR (ENGL 30317 OR ENGL 463M) OR (ENGL 30318 OR ENGL 491M) OR (ENGL 30319 OR ENGL 465M) OR (ENGL 30320 OR ENGL 415M) OR (ENGL 30321) OR (ENGL 30325) OR ENGL 440M OR ENGL 490M OR ENGL 492M

Using concepts of tragedy as a linking principle, this course reads several Shakespearean plays and then *Moby-Dick*, noting Shakespeare's influence on the American novelist.

**ENGL 40603. Realism and Naturalism in American Literature**

(3-0-3)

An examination of American literature between the Civil War and World War I in relation to the literary movements known as realism and naturalism.

**ENGL 40604. Nature in American Literature**

(3-0-3)

Using concepts of tragedy as a linking principle, this course reads several Shakespearean plays and then *Moby-Dick*, noting Shakespeare's influence on the American novelist.

**ENGL 40605. The American Scene**

(3-0-3)

"To make much so much money that you won't, that you don't mind, don't mind anything—that is absolutely, I think, the main American formula." Henry James, *The American Scene*, 1907. "Greed, for lack of a better word, is good, is right, it works...and it will save that malfunctioning corporation called the USA," Gordon Gecko, *Wall Street*, 1987. After a 20-year absence, Henry James returned to America to examine the country of his birth. His tour brought him to the above quoted and dismaying conclusion. This course tries to contextualize and understand James' remark by placing it within a broader atmosphere of late 19th- and early 20th-century American culture. We'll look at works that predate, are contemporary with, and follow James' American tour. We'll look at works of literature and biography, of politics and philosophy, and of theology and economics. Throughout, we will keep circling around and back to James' notion of "The Main American Formula" and asking not only what exactly he meant, but how other major thinkers of the age understood or conceived of an "American formula," and how that "formula" could be measured at the level of the individual, the corporation, the country, and, with Conrad's *Nostramo*, the world. Readings will include works of the following authors: Joseph Conrad, Theodore Dreissner, Henry Ford, Henry James, Theodore Roosevelt, Thorstein Veblen, and Edith Wharton. In addition, we will view several movies whose focus is directly related to the course's central questions.

**ENGL 40606. Mark Twain**

(3-0-3)

A study of Twain's life and writings in light of the history of ideas and the literary, political, philosophical, and religious currents of 19th-century America.

**ENGL 40607. Early American Literature**

(3-0-3)

*Prerequisite:* (ENGL 30101) OR (ENGL 30301 OR ENGL 404M) OR (ENGL 30302 OR ENGL 406M) OR (ENGL 30303 OR ENGL 414M) OR (ENGL 30304 OR ENGL 481M) OR (ENGL 30305 OR ENGL 489M) OR (ENGL 30306 OR ENGL 405M) OR (ENGL 30307 OR ENGL 435M) OR (ENGL 30308 OR ENGL 493M) OR (ENGL 30309 OR ENGL 402M) OR (ENGL 30310 OR ENGL 416M) OR (ENGL 30311 OR ENGL 470M) OR (ENGL 30312 OR ENGL 407M) OR (ENGL 30313 OR ENGL 421M) OR (ENGL 30314) OR (ENGL 30315 OR ENGL 423M) OR (ENGL 30316) OR (ENGL 30317) OR (ENGL 30318) OR (ENGL 30319) OR (ENGL 30320) OR (ENGL 30321) OR (ENGL 30325)

Close readings of selected 17th- and 18th-century American literature.

**ENGL 40612. Literature and Democracy in the Nineteenth-Century United States**

(3-0-3) Gustafson

*Prerequisite:* (ENGL 30101) OR (ENGL 30301 OR ENGL 404M) OR (ENGL 30302 OR ENGL 406M) OR (ENGL 30303 OR ENGL 414M) OR (ENGL 30304 OR ENGL 481M) OR (ENGL 30305 OR ENGL 489M) OR (ENGL 30306 OR ENGL 405M) OR (ENGL 30307 OR ENGL 435M) OR (ENGL 30308 OR ENGL 493M) OR (ENGL 30309 OR ENGL 402M) OR (ENGL 30310 OR ENGL 416M) OR (ENGL 30311 OR ENGL 470M) OR (ENGL 30312 OR ENGL 407M) OR (ENGL 30313 OR ENGL 421M) OR (ENGL 30314) OR (ENGL 30315 OR ENGL 423M) OR (ENGL 30316 OR ENGL 461M) OR (ENGL 30317 OR ENGL 463M) OR (ENGL 30318 OR ENGL 491M) OR (ENGL 30319 OR ENGL 465M) OR (ENGL 30320 OR ENGL

415M) OR (ENGL 30321) OR (ENGL 30325) OR ENGL 440M OR ENGL 490M OR ENGL 492M

A survey of 19th-century American literature, emphasizing the efforts of American writers to identify and define "democracy" and the "democratic citizen."

**ENGL 40615. Writing Whiteness**

(3-0-3)

*Prerequisite:* (ENGL 30101) OR (ENGL 30301 OR ENGL 404M) OR (ENGL 30302 OR ENGL 406M) OR (ENGL 30303 OR ENGL 414M) OR (ENGL 30304 OR ENGL 481M) OR (ENGL 30305 OR ENGL 489M) OR (ENGL 30306 OR ENGL 405M) OR (ENGL 30307 OR ENGL 435M) OR (ENGL 30308 OR ENGL 493M) OR (ENGL 30309 OR ENGL 402M) OR (ENGL 30310 OR ENGL 416M) OR (ENGL 30311 OR ENGL 470M) OR (ENGL 30312 OR ENGL 407M) OR (ENGL 30313 OR ENGL 421M) OR (ENGL 30314) OR (ENGL 30315 OR ENGL 423M) OR (ENGL 30316 OR ENGL 461M) OR (ENGL 30317 OR ENGL 463M) OR (ENGL 30318 OR ENGL 491M) OR (ENGL 30319 OR ENGL 465M) OR (ENGL 30320 OR ENGL 415M) OR (ENGL 30321) OR (ENGL 30325) OR ENGL 440M OR ENGL 490M OR ENGL 492M

Selected topics in 19th-century American literature.

**ENGL 40701. The American Novel**

(3-0-3) Werge

A consideration of the forms and preoccupations of selected 19th- and 20th-century American novels, with special attention to their major ideas and moral concerns.

**ENGL 40702. American Film**

(3-0-3)

Krier

Presentations and discussions of the several genres of film produced in America since the early 1900s.

**ENGL 40703. Poetry and Pragmatism**

(3-0-3)

An exploration of the complex relationships between poetry, philosophy, and science at the end of the 19th century and the beginning of the 20th century through American poets as evinced in the works of Emily Dickinson, Robert Frost, and Wallace Stevens.

**ENGL 40705. Kerouac and the Beats**

(3-0-3)

This seminar will re-examine Kerouac and his prose in relation to beat subculture and the larger context of post-World War II American society. Although the work of other beat writers, such as William S. Burroughs, Allen Ginsberg, and Gary Snyder will be considered, the primary focus will be on Kerouac. Moreover, the seminar will question the cultural codification of Kerouac as "King of the Beats" and advance the notion that he was a prose artist on a spiritual quest. Or, as Ginsberg aptly put it—an "American lonely prose trumpeter of drunken Buddha sacred heart."

**ENGL 40706. Lost Generation**

(3-0-3)

This course studies the writings of authors, mostly Americans, who achieved prominence in the 1920s: Hemingway, Fitzgerald, H.D., Stein, Cummings, Hughes, and others.

**ENGL 40707. Experimental Writing by Contemporary Women Poets**

(3-0-3)

Close readings of selected contemporary "experimental" women poets.

**ENGL 40708. Poetry and Performance**

(3-0-3)

An investigation of the meeting-ground of poetry, conceptual art, new music, and performance art.

**ENGL 40709. The American Novel between the Two World Wars**  
(3-0-3)

This course pays particular attention to the different social contexts from which narratives emerged in order to see how novels participated in the contemporary cultural and political debates. Each of these works probes some defining notion of American identity, asking who or what constitutes "America." We will also attend to that question by discussing each narrative's formal characteristics and how they meet the author's aims.

**ENGL 40710. Some Strains in Twentieth-Century American Fiction**  
(3-0-3)

This course studies the interconnections among six of our best fiction writers of the last century, tracing the dynamic aesthetic and moral development of American fiction from Fitzgerald through Hemingway, Faulkner, Hurston, and Walker to Morrison.

**ENGL 40711. Women's Autobiography**

(3-0-3)

A close analysis of women's life narratives and poetry, based on the following questions: How do women's narratives affirm or challenge cultural norms? How do concepts such as "high" and "low" art impact the reading of women's autobiographical literature? And can lines be drawn between fiction and nonfiction when studying autobiography?

**ENGL 40712. American Fiction**

(3-0-3)

A close examination of major, mid-20th-century American novelists.

**ENGL 40713. And Now: Literature as Contemporary Art**

(3-0-3)

A close reading and analysis of all writers who made presentations during the spring 2004 "And Now: Literature as Contemporary Art" conference at Notre Dame.

**ENGL 40714. City in American Literature**

(3-0-3)

An exploration of the connections between literary representations of the city and social identity in a variety of American literary texts from the 1890s to the present.

**ENGL 40715. American Religious Imagination**

(3-0-3)

Beginning with Ralph Waldo Emerson and ending with Harold Bloom, how Christianity has been refigured in America.

**ENGL 40716. Crossing Color Lines**

(3-0-3)

An exploration of the conflicted and contradictory ways in which racial and ethnic identities have been constructed and mediated in American culture.

**ENGL 40717. American War Literature**

(3-0-3)

Beginning with Mary Rowlandson's captivity narrative and ending with Tim O'Brien's *The Things They Carried*, an exploration of the aesthetic, historical, and theoretical functions and values of war writing in the United States.

**ENGL 40718. Historical Novels of the Black Diaspora**

(5-0-3)

This course provides an introduction to contemporary literature of the black diaspora through the genre of the historical novel. We will evaluate strategies of narration, the significance of differing representations of single events, and the relationship between literature and history. Literary analysis will be supplemented by an examination of the historical and political issues central to the novels.

**ENGL 40719. Hemingway and Walker: A Comparative Study**

(3-0-3)

*Prerequisite:* (ENGL 30101) OR (ENGL 30301 OR ENGL 404M) OR (ENGL 30302 OR ENGL 406M) OR (ENGL 30303 OR ENGL 414M) OR (ENGL 30304 OR ENGL 481M) OR (ENGL 30305 OR ENGL 489M) OR (ENGL 30306 OR ENGL 405M) OR (ENGL 30307 OR ENGL 435M) OR (ENGL 30308 OR ENGL 493M) OR (ENGL 30309 OR ENGL 402M) OR (ENGL 30310 OR ENGL 416M) OR (ENGL 30311 OR ENGL 470M) OR (ENGL 30312 OR ENGL 407M) OR (ENGL 30313 OR ENGL 421M) OR (ENGL 30314) OR (ENGL 30315 OR ENGL 423M) OR (ENGL 30316 OR ENGL 461M) OR (ENGL 30317 OR ENGL 463M) OR (ENGL 30318 OR ENGL 491M) OR (ENGL 30319 OR ENGL 465M) OR (ENGL 30320 OR ENGL 415M) OR (ENGL 30321) OR (ENGL 30325) OR ENGL 440M OR ENGL 490M OR ENGL 492M

A comparative study of the fiction of Ernest Hemingway and Alice Walker, with particular emphasis on gender, class, and historical issues explored in each author's works.

**ENGL 40720. Manhattan 1950-65**

(3-0-3)

An examination of the vibrant Manhattan art community in the 1950s and 1960s, with a particular emphasis on the intersections of poets and painters.

**ENGL 40721. Some Strains in Twentieth-Century American Fiction**

(3-0-3)

Beginning with F. Scott Fitzgerald's "Jazz Age" and ending with Toni Morrison's *Jazz*, a study of thematic commonalities and dissonances in selected 20th-century American novels.

**ENGL 40722. Latino/a Literature and Visual Culture**

(3-0-3) Delgadillo

*Prerequisite:* OR (ENGL 30301 OR ENGL 404M) OR (ENGL 30302 OR ENGL 406M) OR (ENGL 30303 OR ENGL 414M) OR (ENGL 30304 OR ENGL 481M) OR (ENGL 30305 OR ENGL 489M) OR (ENGL 30306 OR ENGL 405M) OR (ENGL 30307 OR ENGL 435M) OR (ENGL 30308 OR ENGL 493M) OR (ENGL 30309 OR ENGL 402M) OR (ENGL 30310 OR ENGL 416M) OR (ENGL 30311 OR ENGL 470M) OR (ENGL 30312 OR ENGL 407M) OR (ENGL 30313 OR ENGL 421M) OR (ENGL 30314) OR (ENGL 30315 OR ENGL 423M) OR (ENGL 30316 OR ENGL 461M) OR (ENGL 30317 OR ENGL 463M) OR (ENGL 30318 OR ENGL 491M) OR (ENGL 30319 OR ENGL 465M) OR (ENGL 30320 OR ENGL 415M) OR (ENGL 30321) OR (ENGL 30325) OR ENGL 440M OR ENGL 490M OR ENGL 492M (ENGL 30101)

In this course, students will study traditional, folkloric, biographic, and religious texts alongside contemporary Latino/a visual and literary texts that offer new versions of old tales. In thinking about how texts exist in relation to other texts, students will consider the "newness" and "Latino/a-ness" of Latino/a literature as well as its emergence amidst the social, cultural, artistic, and political shifts in the latter half of the 20th century.

**ENGL 40723. Globalization and Migrating Women Workers in Contemporary Latino/a Literature**

(3-0-3)

Representations of women, particularly as "workers," in 20th- and 21st-century Latino/a literature and popular culture.

**ENGL 40724. American Visions**

(3-0-3)

*Prerequisite:* (ENGL 30101) OR (ENGL 30301 OR ENGL 404M) OR (ENGL 30302 OR ENGL 406M) OR (ENGL 30303 OR ENGL 414M) OR (ENGL 30304 OR ENGL 481M) OR (ENGL 30305 OR ENGL 489M) OR (ENGL 30306 OR ENGL 405M) OR (ENGL 30307 OR ENGL 435M) OR (ENGL 30308 OR ENGL 493M) OR (ENGL 30309 OR ENGL 402M) OR (ENGL 30310 OR ENGL 416M) OR (ENGL 30311 OR ENGL 470M) OR (ENGL 30312 OR ENGL 407M) OR (ENGL 30313 OR ENGL 421M) OR (ENGL 30314) OR (ENGL 30315 OR ENGL 423M) OR (ENGL 30316 OR ENGL 461M) OR (ENGL 30317 OR ENGL 463M) OR (ENGL 30318 OR ENGL

491M) OR (ENGL 30319 OR ENGL 465M) OR (ENGL 30320 OR ENGL 415M) OR (ENGL 30321) OR (ENGL 30325) OR ENGL 440M OR ENGL 490M OR ENGL 492M

A survey of literatures written by English- and Spanish-speaking peoples from the late-16th Century to the mid-19th Century.

### **ENGL 40725. Class, Labor, and Narrative**

(3-0-3) Sayers

*Prerequisite:* (ENGL 30101) OR (ENGL 30301 OR ENGL 404M) OR (ENGL 30302 OR ENGL 406M) OR (ENGL 30303 OR ENGL 414M) OR (ENGL 30304 OR ENGL 481M) OR (ENGL 30305 OR ENGL 489M) OR (ENGL 30306 OR ENGL 405M) OR (ENGL 30307 OR ENGL 435M) OR (ENGL 30308 OR ENGL 493M) OR (ENGL 30309 OR ENGL 402M) OR (ENGL 30310 OR ENGL 416M) OR (ENGL 30311 OR ENGL 470M) OR (ENGL 30312 OR ENGL 407M) OR (ENGL 30313 OR ENGL 421M) OR (ENGL 30314) OR (ENGL 30315 OR ENGL 423M) OR (ENGL 30316 OR ENGL 461M) OR (ENGL 30317 OR ENGL 463M) OR (ENGL 30318 OR ENGL 491M) OR (ENGL 30319 OR ENGL 465M) OR (ENGL 30320 OR ENGL 415M) OR (ENGL 30321) OR (ENGL 30325) OR ENGL 440M OR ENGL 490M OR ENGL 492M

This course explores the works of selected American writers addressing class and labor.

### **ENGL 40726. American Literature and Visual Culture**

(3-0-3)

From early national fiction and portraiture to American modernist poetry and painting, an exploration of the relationships between American literature and the visual arts.

### **ENGL 40728. "Our America": Exploring the Hyphen in African-American Literature**

(3-0-3)

*Prerequisite:* (ENGL 30101) OR (ENGL 30301 OR ENGL 404M) OR (ENGL 30302 OR ENGL 406M) OR (ENGL 30303 OR ENGL 414M) OR (ENGL 30304 OR ENGL 481M) OR (ENGL 30305 OR ENGL 489M) OR (ENGL 30306 OR ENGL 405M) OR (ENGL 30307 OR ENGL 435M) OR (ENGL 30308 OR ENGL 493M) OR (ENGL 30309 OR ENGL 402M) OR (ENGL 30310 OR ENGL 416M) OR (ENGL 30311 OR ENGL 470M) OR (ENGL 30312 OR ENGL 407M) OR (ENGL 30313 OR ENGL 421M) OR (ENGL 30314) OR (ENGL 30315 OR ENGL 423M) OR (ENGL 30316) OR (ENGL 30317) OR (ENGL 30318) OR (ENGL 30319) OR (ENGL 30320) OR (ENGL 30321) OR (ENGL 30325)

Close readings of various 20th-century African-American literatures, with foci on how "black subjectivity" is created; the relationship between literature, history, and cultural mythology; the dialectic of freedom and slavery in American rhetoric; the American obsession with race; and the sexual ideology and competing representations of domesticity.

### **ENGL 40729. American Literature: Narratives of Love and Desire**

(3-0-3)

*Prerequisite:* (ENGL 30101) OR (ENGL 30301 OR ENGL 404M) OR (ENGL 30302 OR ENGL 406M) OR (ENGL 30303 OR ENGL 414M) OR (ENGL 30304 OR ENGL 481M) OR (ENGL 30305 OR ENGL 489M) OR (ENGL 30306 OR ENGL 405M) OR (ENGL 30307 OR ENGL 435M) OR (ENGL 30308 OR ENGL 493M) OR (ENGL 30309 OR ENGL 402M) OR (ENGL 30310 OR ENGL 416M) OR (ENGL 30311 OR ENGL 470M) OR (ENGL 30312 OR ENGL 407M) OR (ENGL 30313 OR ENGL 421M) OR (ENGL 30314) OR (ENGL 30315 OR ENGL 423M) OR (ENGL 30316 OR ENGL 461M) OR (ENGL 30317 OR ENGL 463M) OR (ENGL 30318 OR ENGL 491M) OR (ENGL 30319 OR ENGL 465M) OR (ENGL 30320 OR ENGL 415M) OR (ENGL 30321) OR (ENGL 30325) OR ENGL 440M OR ENGL 490M OR ENGL 492M

How the themes of "love" and "desire" are explored in selected American novels, and movie adaptations of those novels, written in the 20th century.

### **ENGL 40730. Great American Novels**

(3-0-3)

*Prerequisite:* (ENGL 30101) OR (ENGL 30301 OR ENGL 404M) OR (ENGL 30302 OR ENGL 406M) OR (ENGL 30303 OR ENGL 414M) OR (ENGL 30304 OR ENGL 481M) OR (ENGL 30305 OR ENGL 489M) OR (ENGL 30306 OR ENGL 405M) OR (ENGL 30307 OR ENGL 435M) OR (ENGL 30308 OR ENGL 493M) OR (ENGL 30309 OR ENGL 402M) OR (ENGL 30310 OR ENGL 416M) OR (ENGL 30311 OR ENGL 470M) OR (ENGL 30312 OR ENGL 407M) OR (ENGL 30313 OR ENGL 421M) OR (ENGL 30314) OR (ENGL 30315 OR ENGL 423M) OR (ENGL 30316) OR (ENGL 30317) OR (ENGL 30318) OR (ENGL 30319) OR (ENGL 30320) OR (ENGL 30321) OR (ENGL 30325)

Close readings of selected classic American novels.

### **ENGL 40731. American Novel**

(3-0-3) Staud

*Prerequisite:* (ENGL 30101) OR (ENGL 30301 OR ENGL 404M) OR (ENGL 30302 OR ENGL 406M) OR (ENGL 30303 OR ENGL 414M) OR (ENGL 30304 OR ENGL 481M) OR (ENGL 30305 OR ENGL 489M) OR (ENGL 30306 OR ENGL 405M) OR (ENGL 30307 OR ENGL 435M) OR (ENGL 30308 OR ENGL 493M) OR (ENGL 30309 OR ENGL 402M) OR (ENGL 30310 OR ENGL 416M) OR (ENGL 30311 OR ENGL 470M) OR (ENGL 30312 OR ENGL 407M) OR (ENGL 30313 OR ENGL 421M) OR (ENGL 30314) OR (ENGL 30315 OR ENGL 423M) OR (ENGL 30316 OR ENGL 461M) OR (ENGL 30317 OR ENGL 463M) OR (ENGL 30318 OR ENGL 491M) OR (ENGL 30319 OR ENGL 465M) OR (ENGL 30320 OR ENGL 415M) OR (ENGL 30321) OR (ENGL 30325) OR ENGL 440M OR ENGL 490M OR ENGL 492M

A survey of selected 19th- and 20th- century American novels.

### **ENGL 40732. The Stranger in American Literature**

(3-0-3) Ulin

Fictional representations of "strangers" and "outsiders" in American literature from the 18th to 21st centuries.

### **ENGL 40735. Witnessing the Sixties in America**

(3-0-3)

Beginning with a review of post World War II authors, a close analysis of both fiction and nonfiction written in America in the 1960s, with a particular emphasis on the Vietnam experience and the development of the counterculture.

### **ENGL 40740. Literature and Consumer Culture**

(3-0-3)

This course traces the social changes that accompanied America's movement from early retailing to a full-blown consumer culture. Beginning with representations from the later part of the 19th century, particularly of the development of Chicago as a mail-order capital of the world and moving into the present through an examination of television shopping networks, this course will use material from a variety of perspectives and disciplines to examine what became a wholesale transformation of American life. In attempting to trace the trajectory of change from a country often identified by its rural isolation to a country of relentless publicity, from the farm to Paris Hilton, (who returned to *The Simple Life*), we will look at a series of linkages each of which played a specific and contributory role in the cultural shift toward a fully saturated consumerism. For instance, the early mail-order catalogue empires of Aaron Montgomery Ward and Richard Warren Sears depended on the capacity of the railroad and postal service to transport their goods from shopping catalogues to country kitchens, goods that went beyond kitchen utensils, clothes, ornaments, and shoes to include assembly-ready homes. South Bend has several Sears and Roebuck homes and part of our class time will be spent in looking at these houses in the context of the course themes. All of our discussion will take place against the backdrop of a larger question about the democratization of desire, about whether American culture became more or less democratic after the introduction of the mail-order catalogue. Thus, the linkage between the catalogue, the Home Shopping Network, and the notion that freedom to desire goods is a measure of democratic freedom. Of course, the possibilities for manipulation and control are also limitless.

**ENGL 40741. The Sacred and the Divine in Latino/a Literature**

(3-0-3)

*Prerequisite:* (ENGL 30101) OR (ENGL 30301 OR ENGL 404M) OR (ENGL 30302 OR ENGL 406M) OR (ENGL 30303 OR ENGL 414M) OR (ENGL 30304 OR ENGL 481M) OR (ENGL 30305 OR ENGL 489M) OR (ENGL 30306 OR ENGL 405M) OR (ENGL 30307 OR ENGL 435M) OR (ENGL 30308 OR ENGL 493M) OR (ENGL 30309 OR ENGL 402M) OR (ENGL 30310 OR ENGL 416M) OR (ENGL 30311 OR ENGL 470M) OR (ENGL 30312 OR ENGL 407M) OR (ENGL 30313 OR ENGL 421M) OR (ENGL 30314) OR (ENGL 30315 OR ENGL 423M) OR (ENGL 30316) OR (ENGL 30317) OR (ENGL 30318) OR (ENGL 30319) OR (ENGL 30320) OR (ENGL 30321) OR (ENGL 30325)

An examination of faith, religion, the sacred, and the divine in selected Latino/a writings.

**ENGL 40743. Literature of the 1990s**

(3-0-3) Benedict

*Prerequisite:* (ENGL 30101) OR (ENGL 30301 OR ENGL 404M) OR (ENGL 30302 OR ENGL 406M) OR (ENGL 30303 OR ENGL 414M) OR (ENGL 30304 OR ENGL 481M) OR (ENGL 30305 OR ENGL 489M) OR (ENGL 30306 OR ENGL 405M) OR (ENGL 30307 OR ENGL 435M) OR (ENGL 30308 OR ENGL 493M) OR (ENGL 30309 OR ENGL 402M) OR (ENGL 30310 OR ENGL 416M) OR (ENGL 30311 OR ENGL 470M) OR (ENGL 30312 OR ENGL 407M) OR (ENGL 30313 OR ENGL 421M) OR (ENGL 30314) OR (ENGL 30315 OR ENGL 423M) OR (ENGL 30316) OR (ENGL 30317) OR (ENGL 30318) OR (ENGL 30319) OR (ENGL 30320) OR (ENGL 30321) OR (ENGL 30325)

An examination of selected novels written during the 1990s.

**ENGL 40745. Perspectives on Nature and Environment in America**

(3-0-3)

Throughout American history, those who took a hand to alter nature—or raised one to preserve it—have rarely been concerned exclusively with the continent's ecosystems. Rather, they saw themselves as advancing lofty ideals, such as progress or freedom. After a general introduction to American environmental history, this course examines how 19th- and 20th-century American explorers, activists, and writers have understood our alterations to landscape and river, and what the stakes are for modern environmentalists who seek to preserve what wilderness remains.

**ENGL 40751. Literatures of Immigration: The Latino/a Transnational Experience**

(3-0-3) Rodriguez

Close reading of recent literature that explores the immigration between Mexico, Latin America, and the United States.

**ENGL 40754. American Poetry after 1945**

(3-0-3)

A survey of American poets and poetry after World War II.

**ENGL 40755. Grand Collage: California Poetry, Arts and Culture at Mid-Century**

(3-0-3)

An exploration of the ways that poetry took a leading role among the arts in California, creating a California culture that through the beats and the hippies became a national and international phenomenon.

**ENGL 40801. "Our America": Exploring the Hyphen Between African and American in African-American**

(3-0-3)

Close readings of various 20th-century African-American literatures, with foci on how "black subjectivity" is created; the relationship between literature, history, and cultural mythology; the dialectic of freedom and slavery in American rhetoric; the American obsession with race; and the sexual ideology and competing representations of domesticity.

**ENGL 40802. African-American Women Writers**

(3-0-3)

An exploration of the works of several African-American women writers, including Alice Walker, Toni Morrison, Audre Lorde, and June Jordan; specifically, the relation these writers have to the larger American culture, and what they have to say about our collective vision and future.

**ENGL 40803. Women of Color**

(3-0-3)

A critical examination of the literature and scholarly writings about literature from "women of color" across disparate cultural backgrounds.

**ENGL 40806. Growing Up Latino: Narrative and Literature**

(3-0-3)

An exploration of the narratives/stories written by Latino/a writers and what these works say about personal as well as cultural identities.

**ENGL 40807. African-American Literature**

(3-0-3) Wilson

*Prerequisite:* (ENGL 30101) OR (ENGL 30301 OR ENGL 404M) OR (ENGL 30302 OR ENGL 406M) OR (ENGL 30303 OR ENGL 414M) OR (ENGL 30304 OR ENGL 481M) OR (ENGL 30305 OR ENGL 489M) OR (ENGL 30306 OR ENGL 405M) OR (ENGL 30307 OR ENGL 435M) OR (ENGL 30308 OR ENGL 493M) OR (ENGL 30309 OR ENGL 402M) OR (ENGL 30310 OR ENGL 416M) OR (ENGL 30311 OR ENGL 470M) OR (ENGL 30312 OR ENGL 407M) OR (ENGL 30313 OR ENGL 421M) OR (ENGL 30314) OR (ENGL 30315 OR ENGL 423M) OR (ENGL 30316 OR ENGL 461M) OR (ENGL 30317 OR ENGL 463M) OR (ENGL 30318 OR ENGL 491M) OR (ENGL 30319 OR ENGL 465M) OR (ENGL 30320 OR ENGL 415M) OR (ENGL 30321) OR (ENGL 30325) OR ENGL 440M OR ENGL 490M OR ENGL 492M

A historical and thematic account of the rise and achievement of African-American authors over several centuries.

**ENGL 40808. Latino/a Poetry**

(3-0-3)

A study of prominent contemporary Latino/a poets whose work has enriched and diversified the canon of American poetry in the last 20 years.

**ENGL 40809. Constituting Americans**

(3-0-3)

An exploration of life writings and issues of self-representation in the African-American expressive cultural tradition from 1850 to 1905.

**ENGL 40810. Caribbean Voices**

(3-0-3)

An introduction to the literature of Anglophone Caribbean.

**ENGL 40811. Native-American Literature**

(3-0-3)

This course serves as an introductory exploration of the literatures written by Native American authors—oral literatures, transitional literatures (a combination of oral and written expression), and contemporary poetry and prose.

**ENGL 40812. African-American Poetry and Poetics**

(3-0-3)

An examination of poetry and poetics by black Americans from the beginnings to the present.

**ENGL 40815. African-American Poetry**

(3-0-3)

Close readings of selected contemporary African-American poets.

**ENGL 40820. Writing Harlem: Race, Renaissance, and the Modern**

(5-0-3)

A study of the historical, cultural, and political circumstances that led to the flowering of African-American literature in Harlem in the 1920s and 1930s.

**ENGL 40825. Latino Literature and Visual Culture**

(3-0-3)

Understanding US Latino/a literature, art, and film through its many allusions to and representations of traditional icons and historic figures as well as legends, myths, popular figures, and action heroes/heroines of the Americas (including those with origins in Native American, Latino/a, African, Asian, and European cultures).

**ENGL 40830. Passing and Fictions of Race**

(3-0-3)

A critical examination of how "fictions" in the artistic sense (novels, stories, and movies) have both fostered and challenged "fictions" in the ideological sense, that is, the lies and mystifications about race that pervade American cultural life.

**ENGL 40850. The Fictions of Nonfiction and Fiction**

(3-0-3)

An advanced course in fiction and nonfiction prose.

**ENGL 40851. Advanced Poetry Writing**

(3-0-3)

*Prerequisite:* (ENGL 20031 OR ENGL 302G) OR (ENGL 20032 OR ENGL 302H) OR (ENGL 20033 OR ENGL 302C) OR (ENGL 20034 OR ENGL 302I) OR (ENGL 20035 OR ENGL 302F) OR (ENGL 20036 OR ENGL 302J) OR (ENGL 20037 OR ENGL 302K) OR (ENGL 20038 OR ENGL 302N) OR (ENGL 20039) OR (ENGL 30012 OR ENGL 30852 OR ENGL 402B)

An advanced poetry-writing workshop.

**ENGL 40853. Advanced Fiction Writing**

(3-0-3) Sherwood

*Prerequisite:* (ENGL 20001 OR ENGL 201) OR (ENGL 20011 OR ENGL 301) OR (ENGL 20012 OR ENGL 301G) OR (ENGL 20013 OR ENGL 301R) OR (ENGL 20014 OR ENGL 301A) OR (ENGL 20015 OR ENGL 301Q) OR (ENGL 20016 OR ENGL 301V) OR (ENGL 20017 OR ENGL 301D) OR (ENGL 20018 OR ENGL 301C) OR (ENGL 20019 OR ENGL 301K) OR (ENGL 20020) OR (ENGL 20021) OR (ENGL 30011 OR ENGL 30850 OR ENGL 401B)

A seminar in the students' own writing of prose fiction; for students with previous experience or coursework in writing.

**ENGL 40858. Introduction to African-American Literature**

(3-0-3)

A broad introduction to the major writings of African Americans.

**ENGL 40870. Advanced Poetry Writing**

(3-0-3) Menes

*Prerequisite:* (ENGL 20002 OR ENGL 202 OR ENGL 202F) OR (ENGL 20031 OR ENGL 302G) OR (ENGL 20032 OR ENGL 302H) OR (ENGL 20033 OR ENGL 302C) OR (ENGL 20034 OR ENGL 302I) OR (ENGL 20035 OR ENGL 302F) OR (ENGL 20036 OR ENGL 302J) OR (ENGL 20037 OR ENGL 302K) OR (ENGL 20038 OR ENGL 302N) OR (ENGL 20039 OR ENGL 302G) OR (ENGL 30012 OR ENGL 30852 OR ENGL 402B)

An advanced poetry-writing workshop.

**ENGL 40901. Feminist Theory**

(3-0-3)

An exploration of the main literary and artistic movements of the historical European avant-garde: Cubism, Vorticism, Italian and Russian Futurism, Dada, and Surrealism.

**ENGL 40902. Joyce: Introduction to Critical Theory**

(3-0-3)

An exploration of the challenges to structuralism represented by post-structuralism (Derrida), new historicism (Foucault), psychoanalysis (Freud, Lacan, Kristeva), discourses of race and gender (W.E.B. DuBois, Audre Lorde, Luce Irigaray, Hortense Spillers, and Judith Butler) and post-colonialism (Said) through the

reading of James Joyce's *A Portrait of the Artist as a Young Man* from these various critical perspectives.

**ENGL 40903. Deconstruction and Exegesis**

(3-0-3)

The aim of this course will be to compare and contrast what one might loosely term ancient (medieval, early modern) and post-modern approaches to the reading of texts, following the twin approaches of theoretical exposition and practical application, neither of which can be sustained without the intervention of the other. It will be necessary to rely on concrete examples of the ancient and contemporary methods. The examples in the first half of the semester will be Augustine's *On Christian Teaching and Literal Interpretation of Genesis* and Derrida's *Of Grammatology, Writing and Difference, and Dissemination*. This double reading will put us in a position to take as our examples Augustine's *Confessions* and Derrida's *Circonfession* in the second half of the semester. Certain questions—which can sometimes but not always be answered in the conventional sense—will persist during our readings. These will include: What is philosophy? What is literature? What is the relation between philosophy and exegesis? What is the relation between literature and exegesis? What is the relation between philosophy and literature? Language requirement: Latin and/or French desirable, but not necessary. Written requirement: one final essay (20 pages) either on one of the texts or authors studied in the course, or applying the methodologies discussed to another philosophical or literary text of your choice.

**ENGL 40905. Critical Theory: Hemingway and Walker**

(3-0-3) Brogan

A study of six different critical approaches to interpreting literary texts through the subsequently different (or overlapping?) ways of evaluating four works of literature: two by Ernest Hemingway and two by Alice Walker.

**ENGL 40906. Gender and Culture**

(3-0-3)

An introduction to literary theories of gender and culture in film, literature, and other media.

**ENGL 40947. Love, Death and Exile in Arabic Literature**

(3-0-3) Guo

This course explores literary and artistic presentation of the themes "love, death, and exile" in Arabic literature and popular culture, from the pre-Islamic era to the present day. Through close readings of Arabic poetry, essays, short stories, and novels (in English translation), and analyzing a number of Arabic movies (with English subtitles), we discuss the following issues: themes and genres of classical Arabic love poetry; gender, eroticism, and sexuality in Arabic literary discourse; alienation, fatalism, and the motif of *al-hanin ila al-watan* (nostalgia for one's homeland) in modern Arabic poetry and fiction.

**ENGL 40948. Myths of the Greeks and Romans**

(3-0-3)

This advanced course investigates the mythologies of Greece and Rome and traces their transmission to and influence on modern literature and art. Special attention is given to the wide range of media in which ancient stories about gods and heroes were expressed and communicated, and to the process by which these marvelous stories survived in later literature and the visual arts, inspiring writers and artists to adapt them to their own purposes. Current theories at the forefront of scholarship in the humanities are explored for their value in interpreting myths.

**ENGL 40949. Roman Literature and Culture**

(3-0-3)

This course surveys the leading works of ancient Roman literature and examines the cultural contexts in which they were written, received, and transmitted. Students read poetry and prose from many genres, and sample works from six hundred years of literary versatility that combined enormous originality with a literary tradition inherited from the Greeks. Among the authors introduced are Plautus, Lucretius, Catullus, Cicero, Horace, Livy, Lucan, Tacitus, Apuleius, Ammianus, and Augustine. Special attention is paid the formal structures of Roman literary works, the cultural issues they raise, and the lasting value of Latin

literature to the modern age. The course prepares students for more advanced study in classical literature and culture. Offered annually.

### ENGL 40950. Men and Women in Modern Japanese Literature

(3-0-3) Shamoon

*Prerequisite:* (ENGL 30101) OR (ENGL 30301 OR ENGL 404M) OR (ENGL 30302 OR ENGL 406M) OR (ENGL 30303 OR ENGL 414M) OR (ENGL 30304 OR ENGL 481M) OR (ENGL 30305 OR ENGL 489M) OR (ENGL 30306 OR ENGL 405M) OR (ENGL 30307 OR ENGL 435M) OR (ENGL 30308 OR ENGL 493M) OR (ENGL 30309 OR ENGL 402M) OR (ENGL 30310 OR ENGL 416M) OR (ENGL 30311 OR ENGL 470M) OR (ENGL 30312 OR ENGL 407M) OR (ENGL 30313 OR ENGL 421M) OR (ENGL 30314) OR (ENGL 30315 OR ENGL 423M) OR (ENGL 30316 OR ENGL 461M) OR (ENGL 30317 OR ENGL 463M) OR (ENGL 30318 OR ENGL 491M) OR (ENGL 30319 OR ENGL 465M) OR (ENGL 30320 OR ENGL 415M) OR (ENGL 30321) OR (ENGL 30325) OR ENGL 440M OR ENGL 490M OR ENGL 492M

In 20th-century Japan, as old roles such as samurai and geisha waned, both men and women had to redefine the characteristics and meaning of masculinity and femininity. This course will look at constructions of gender in modern Japanese literature by both female and male authors. As we discuss both normative and deviant depictions of male and female roles, some topics we will address include men and women at work and at war, marriage and family life, homosociality, and homosexuality. Students will also gain familiarity with some of the major authors, genres, and literary movements of modern Japanese literature. Texts will include *Kokoro* by Natsume Soseki, *Confessions of a Mask* by Mishima Yukio, *Diary of a Vagabond* by Hayashi Fumiko, and short stories by Higuchi Ichiyo, Kono Taeko, and Oe Kenzaburo. This course is taught in English, and no knowledge of the Japanese language is required.

### ENGL 40951. The City in Literature and Cinema: New York, St. Petersburg, Moscow

(3-0-3) Walker

*Prerequisite:* (ENGL 30101) OR (ENGL 30301 OR ENGL 404M) OR (ENGL 30302 OR ENGL 406M) OR (ENGL 30303 OR ENGL 414M) OR (ENGL 30304 OR ENGL 481M) OR (ENGL 30305 OR ENGL 489M) OR (ENGL 30306 OR ENGL 405M) OR (ENGL 30307 OR ENGL 435M) OR (ENGL 30308 OR ENGL 493M) OR (ENGL 30309 OR ENGL 402M) OR (ENGL 30310 OR ENGL 416M) OR (ENGL 30311 OR ENGL 470M) OR (ENGL 30312 OR ENGL 407M) OR (ENGL 30313 OR ENGL 421M) OR (ENGL 30314) OR (ENGL 30315 OR ENGL 423M) OR (ENGL 30316 OR ENGL 461M) OR (ENGL 30317 OR ENGL 463M) OR (ENGL 30318 OR ENGL 491M) OR (ENGL 30319 OR ENGL 465M) OR (ENGL 30320 OR ENGL 415M) OR (ENGL 30321) OR (ENGL 30325) OR ENGL 440M OR ENGL 490M OR ENGL 492M

This course will examine the cultural history of three Russian and American metropolises: New York, St. Petersburg, and Moscow. Using a wide variety of sources, including literature, film, and graphic art, we will consider these urban centers not as geographical entities, but as continually evolving symbolic systems that generate meaning about and insight into Russian and American culture. By comparing and contrasting these three cities and their cultural heritage, we will also learn much about where American and Russian cultures diverge and come together. Works to be examined include two recognized literary masterpieces, Fitzgerald's *The Great Gatsby* and Bulgakov's *The Master and Margarita*, and films by Martin Scorsese, Woody Allen, and the award-winning Russian director, Alekssei Balabanov. Taught in English.

### ENGL 40952. Classical Greek Tragedy

(3-0-3) Turkeltaub

*Prerequisite:* (ENGL 30101) OR (ENGL 30301 OR ENGL 404M) OR (ENGL 30302 OR ENGL 406M) OR (ENGL 30303 OR ENGL 414M) OR (ENGL 30304 OR ENGL 481M) OR (ENGL 30305 OR ENGL 489M) OR (ENGL 30306 OR ENGL 405M) OR (ENGL 30307 OR ENGL 435M) OR (ENGL 30308 OR ENGL 493M) OR (ENGL 30309 OR ENGL 402M) OR (ENGL 30310 OR ENGL 416M) OR (ENGL 30311 OR ENGL 470M) OR (ENGL 30312 OR ENGL 407M) OR (ENGL 30313 OR ENGL 421M) OR (ENGL

30314) OR (ENGL 30315 OR ENGL 423M) OR (ENGL 30316 OR ENGL 461M) OR (ENGL 30317 OR ENGL 463M) OR (ENGL 30318 OR ENGL 491M) OR (ENGL 30319 OR ENGL 465M) OR (ENGL 30320 OR ENGL 415M) OR (ENGL 30321) OR (ENGL 30325) OR ENGL 440M OR ENGL 490M OR ENGL 492M

This advanced course in literature provides detailed study of the theory and practice of classical Greek tragedy. The structures and sensibilities that inform tragedy are assessed, with special attention to plays written by the three great tragedians, Aeschylus, Sophocles, and Euripides. The Greeks' own responses to tragedy, as represented by Aristophanes, Plato, and Aristotle, are also discussed. The form and function of Greek tragic plays, their place in classical culture, and their distinctive approach to issues of human life are key topics of the course.

### ENGL 40953. The Roman World of Apuleius

(3-0-3) Bradley

*Prerequisite:* (ENGL 30101) OR (ENGL 30301 OR ENGL 404M) OR (ENGL 30302 OR ENGL 406M) OR (ENGL 30303 OR ENGL 414M) OR (ENGL 30304 OR ENGL 481M) OR (ENGL 30305 OR ENGL 489M) OR (ENGL 30306 OR ENGL 405M) OR (ENGL 30307 OR ENGL 435M) OR (ENGL 30308 OR ENGL 493M) OR (ENGL 30309 OR ENGL 402M) OR (ENGL 30310 OR ENGL 416M) OR (ENGL 30311 OR ENGL 470M) OR (ENGL 30312 OR ENGL 407M) OR (ENGL 30313 OR ENGL 421M) OR (ENGL 30314) OR (ENGL 30315 OR ENGL 423M) OR (ENGL 30316 OR ENGL 461M) OR (ENGL 30317 OR ENGL 463M) OR (ENGL 30318 OR ENGL 491M) OR (ENGL 30319 OR ENGL 465M) OR (ENGL 30320 OR ENGL 415M) OR (ENGL 30321) OR (ENGL 30325) OR ENGL 440M OR ENGL 490M OR ENGL 492M

An advanced course in Roman history and literature that investigates the Latin author Apuleius in his socio-cultural context. The course begins with the Romano-African setting into which Apuleius was born, recreates the educational travels to Carthage, Athens, and Rome that occupied his early life, and focuses especially on his trial for magic in Sabratha in Tripolitania before following him back to Carthage where he spent the remainder of his life. Notice will be taken of all Apuleius' writings, but special attention will be paid to the "Apology," a version of the speech of defense made at his trial, and to the socio-cultural significance of his work of imaginative fiction, the *Metamorphoses*. The course is open to students with or without Latin.

### ENGL 40954. Twentieth-Century Chinese Literature

(3-0-3)

In this course we will read English translations of works in 20th-century Chinese literature, especially short stories and plays written from the May 4th Movement in 1919 to the beginning of the Reform in the early eighties. We will discuss the literary expressions of China's weal and woe in modern times and of the Chinese people's frustrations and aspirations when their country was experiencing unprecedented social changes. No prior knowledge of the Chinese language or Chinese culture is required for taking the course.

### ENGL 40955. Heroism and Eroticism in Chinese Fiction

(3-0-3)

In this course we will read works in Chinese fiction from the late imperial periods. We will discuss the aesthetic features of such works and their cultural underpinnings, especially the infusion of Confucian, Taoist, and Buddhist meanings. Particularly, we will focus on heroism and eroticism as two major themes in Chinese fiction and their specific expressions in each work. We will consider the transition from heroism to eroticism as a shift of narrative paradigm, which coincided with a general trend of "domestication" in traditional Chinese fiction. Through the readings and discussions, the students are expected to become familiar with pre-modern Chinese narrative tradition and acquainted with some aspects of Chinese culture. All the readings are in English translation, and no prior knowledge of China or the Chinese language is required.

### ENGL 40956. Greek Literature and Culture

(3-0-3)

This course surveys the leading works of ancient Greek literature and examines the cultural contexts in which they were written, received, and transmitted. Students

read poetry and prose from many genres, and sample works from a thousand years of extraordinary literary creativity. Among the authors introduced are Homer, Sappho, Aeschylus, Herodotus, Aristophanes, Plato, Theocritus, Plutarch, Lucian, and Longus. Special attention is paid to the formal structures of Greek literary works, the cultural issues they raise, and the lasting value of Greek literature to the modern age. The course prepares students for more advanced work in classical literature and culture. Offered annually.

**ENGL 41001. Film Melodrama Lab**

(3-3-0)

During the lab times, certain films will be viewed for further discussion in class.

**ENGL 41002. Honors Shakespeare Lab**

(0-0-0)

*Corequisite:* ENGL 40252

The lab will not be used every week, but will be available for screenings of Shakespeare films.

**ENGL 41005. Lab: Irish Film and Culture**

(3-1-0)

*Corequisite:* ENGL 40511

Corequisite for ENGL 40511.

**ENGL 43102. Seminar: Religion and Literature**

(3-0-3)

A consideration of the forms, ideas, and preoccupations of the religious imagination in literature and of the historical relationships between religious faith and traditions and particular literary works. The conflicts and tensions between modern gnosticism, in literature and ideology, and the sacramental imagination will constitute a recurring point of focus. We will also lend special attention to the vision and imagery of the journey and wayfarer and the conflicts and affinities between private and communal expressions of faith.

**ENGL 43103. Seminar: Imperialism and Its Interlocutors**

(3-0-3)

By canvassing the Age of Empire, this seminar examines articulations of imperialism in the late Victorian and early modernist British imagination and contemporaneous or subsequent responses of resistance to it. "Imperial" writers may include Cary, Conrad, Forster, Rider Haggard, and Kipling; "interlocutors" may include Achebe, Naipaul, Kincaid, and Rhys.

**ENGL 43201. Seminar: The "Pearl" Poet**

(3-0-3)

Close readings of the Arthurian romance of "Gawain," "Patience" (the whimsical, pre-Pinnocchio-and-Gepetto paraphrase of the story of Jonah and the whale), "Cleanness" (a series of homiletic reflections of great power, beauty, grim wit, and compassionate insight centered on varying conceptions of "purity"), and "Pearl" (the elegiac dream-vision that begins with the mourning father who has lost a young daughter, then moves with amazing grace from the garden where he grieves into a richly envisioned earthly paradise where he is astonished to re-encounter his lost "Pearl," who then leads him to the vision of a New Jerusalem whose post-apocalyptic landscape is populated exclusively by throngs of beautiful maidens).

**ENGL 43202. Seminar: Milton and His Contemporaries**

(3-0-3)

A close analysis of differing, and divergent, ways of seeing and representing reality in 17th-century Dutch painting and English poetry.

**ENGL 43203. Seminar: Shakespeare and His Contemporaries**

(3-0-3)

This seminar places Shakespeare's plays within the vibrant world of Tudor-Stuart drama.

**ENGL 43204. Seminar: Medieval Romance**

(3-0-3)

An intensive analysis of medieval romance literature, both in England and on the Continent, beginning with the work of Chretien de Troyes and including

Chaucer's *Troilus and Criseyde* and Malory's Arthurian legends, focusing on the role of women in romance narratives, the relationship of the romance to history, modifications of and developments in the Arthurian tradition over time, and the place of the other (the foreign, the monstrous, the magical) in the romance.

**ENGL 43205. Seminar: American Women Writers**

(3-0-3)

This course will focus on the work of women writers after World War II and up to the end of this past century, with the idea of gaining an understanding of the range of women writers in this country during this period.

**ENGL 43206. Seminar: Medieval Dream before Freud**

(3-0-3)

Close readings of selected works from the medieval textual tradition in English where dreams hold a central place in the inscription of meaning.

**ENGL 43207. Seminar: Everybody's Shakespeare**

(3-0-3)

A close analysis of Shakespeare's plays (including tragedies, comedies, and romances), as well as a number of contemporary "re-visions" of those works by authors of varying cultural, ethnic, or gender backgrounds.

**ENGL 43208. Seminar: Enlightenment Drama**

(3-0-3)

A close study of drama, tragic, and comic, after Shakespeare.

**ENGL 43209. Seminar: *The Canterbury Tales***

(3-0-3)

In this course, we will read *The Canterbury Tales* from start to finish, focusing on questions of genre, poetic voice and authority, the relationship of history to literature, the development of character, and the emergence of vernacular poetry in English.

**ENGL 43210. Seminar: Shakespeare's Religions**

(3-0-3)

A critical analysis of religious influences and iconography in selected Shakespeare plays.

**ENGL 43211. Seminar: Ideas of Justice**

(3-0-3)

An examination of various ideas of justice in early modern culture, from the trials of Socrates and Jesus to Shakespeare and Milton.

**ENGL 43212. Seminar: Mystic Voices**

(3-0-3) Zieman

*Prerequisite:* (ENGL 30101) OR (ENGL 30301 OR ENGL 404M) OR (ENGL 30302 OR ENGL 406M) OR (ENGL 30303 OR ENGL 414M) OR (ENGL 30304 OR ENGL 481M) OR (ENGL 30305 OR ENGL 489M) OR (ENGL 30306 OR ENGL 405M) OR (ENGL 30307 OR ENGL 435M) OR (ENGL 30308 OR ENGL 493M) OR (ENGL 30309 OR ENGL 402M) OR (ENGL 30310 OR ENGL 416M) OR (ENGL 30311 OR ENGL 470M) OR (ENGL 30312 OR ENGL 407M) OR (ENGL 30313 OR ENGL 421M) OR (ENGL 30314) OR (ENGL 30315 OR ENGL 423M) OR (ENGL 30316 OR ENGL 461M) OR (ENGL 30317 OR ENGL 463M) OR (ENGL 30318 OR ENGL 491M) OR (ENGL 30319 OR ENGL 465M) OR (ENGL 30320 OR ENGL 415M) OR (ENGL 30321) OR (ENGL 30325) OR ENGL 440M OR ENGL 490M OR ENGL 492M

The divine "vision" was a special form of religious experience in medieval Europe. In this class, we will read both primary texts and some modern critical theory to consider texts reporting visionary experience as problems of representation. How could experiences of such intensity be represented in writing? How were they to be interpreted? Who had the authority to do so? Why were visions so much more common to women than men?

**ENGL 43215. Seminar: Love and Society in Renaissance Poetry**

(3-0-3)

How depictions of "love" in selected Renaissance poetry reflected notions of "love" in the larger Renaissance society.

**ENGL 43220. Seminar: The Medieval Saint**

(3-0-3) Hall

A close reading of the prose and poetry of selected medieval saints, with particular emphases on expressions of faith and the literary forms used to express that faith.

**ENGL 43222. Seminar: Old English and Middle English**

(3-0-3)

Close readings of selected Old English and Middle English prose.

**ENGL 43223. Seminar: Shakespeare's Major Tragedies**

(3-0-3)

A close reading of William Shakespeare's major tragedies, including historical and biographical aspects of the works.

**ENGL 43301. Seminar: Virtue, Sex, and the Good Life: Eighteenth-Century Novels**

(3-0-3)

The 18th-century novel deals with the questions of social, political, sexual, and economic identities and choices in a time of great change, and this course examines several novels representative of the time period.

**ENGL 43302. Seminar: Jane Austen and Her World**

(3-0-3)

Research in the novels of Jane Austen.

**ENGL 43303. Seminar: Victorian Fiction**

(3-0-3)

A close reading of five late-Victorian novels—Trollope's *The Eustace Diamonds*, James' *Portrait of a Lady*, Hardy's *Tess of the D'Urbervilles*, Eliot's *Daniel Deronda*, and Collins' *Armada*—that organize themselves around the thoughts and deeds of "bad girls."

**ENGL 43304. Seminar: Nineteenth-Century British Novel**

(3-0-3)

The British novel, 1830–60, as a popular medium through which writers explored serious concerns: E. Bronte, Gaskell, Dickens, and Collins.

**ENGL 43305. Seminar: Victorian Radicals**

(3-0-3)

"Fringe" characters in, and elements of, British Victorian literature, with a particular emphasis on a modern world being increasingly defined in economic terms.

**ENGL 43306. Seminar: Romanticism and Human Rights**

(3-0-3)

How the romantic movement in literature presaged and influenced civic rights on the micro and macro scales.

**ENGL 43310. Seminar: Nature Poetry**

(3-0-3)

A seminar focusing on the great body of poetry in English of the last two centuries in which "nature" takes center stage, rather than functioning as scenery, with a particular emphasis on the relationship between humankind, nature, and ecology.

**ENGL 43315. Seminar: Poetry and Knowledge**

(3-0-3) Sitter

Readings in poetry and poetics, with a particular emphasis on cognitive, educational, and truth claims for poetry from the Renaissance to the present.

**ENGL 43325. Seminar: Romanticism and Human Rights**

(3-0-3) Thomas

*Prerequisite:* (ENGL 30101) OR (ENGL 30301 OR ENGL 404M) OR (ENGL 30302 OR ENGL 406M) OR (ENGL 30303 OR ENGL 414M) OR (ENGL 30304 OR ENGL 481M) OR (ENGL 30305 OR ENGL 489M) OR (ENGL 30306 OR ENGL 405M) OR (ENGL 30307 OR ENGL 435M) OR (ENGL

30308 OR ENGL 493M) OR (ENGL 30309 OR ENGL 402M) OR (ENGL 30310 OR ENGL 416M) OR (ENGL 30311 OR ENGL 470M) OR (ENGL 30312 OR ENGL 407M) OR (ENGL 30313 OR ENGL 421M) OR (ENGL 30314) OR (ENGL 30315 OR ENGL 423M) OR (ENGL 30316 OR ENGL 461M) OR (ENGL 30317 OR ENGL 463M) OR (ENGL 30318 OR ENGL 491M) OR (ENGL 30319 OR ENGL 465M) OR (ENGL 30320 OR ENGL 415M) OR (ENGL 30321) OR (ENGL 30325) OR ENGL 440M OR ENGL 490M OR ENGL 492M

The intersection between the growing interest in national and global civil rights and literature in romantic-era Great Britain.

**ENGL 43401. Seminar: Modernism and Modernity**

(3-0-3)

By engaging a wide variety of modern writers ranging from D.H. Lawrence, T.S. Eliot, Larsen, Fauser, Barnes, Rhys, Woolf, Langston Hughes, and West, to Lewis, Joyce, and Beckett, the changing contours of literary modernism in the larger context of the philosophical, social, and political cultures of modernity.

**ENGL 43402. Seminar: "God" in Postmodern British Poetry**

(3-0-3) Huk

A multifaceted analysis of modes of "belief" in postmodern British poetry, with a particular emphasis on how the operations of ancient Hebraic and Christian texts come back into practice for these writers, and why those earlier frameworks for conceptualizing language and "saying God," or failing to say it, seem newly hospitable in the face of deconstructive postmodern theories about "the word."

**ENGL 43403. Seminar: Gender and Modernism**

(3-0-3)

An intensive study of "feminine" or "women's" modernism: modernist aesthetics read in relation to questions of race and gender; the formation of literary modernism's often tense relation to mass culture; the development of political and literary avant-garde cultures (with specific emphasis on those marked by gender and race such as the suffrage movement and the Harlem Renaissance); the development of modern discourses of sexuality; the intimate and complex relationship between modernism and race; and the special attention given to women's experiences of modernity, especially in relation to those aspects of culture typically excluded from definitions of the modern (shopping, maternity, consuming popular, sentimental fictions, etc.).

**ENGL 43409. Seminar: Woolf and Bloomsbury**

(3-0-3)

An analysis of the novels, essays, art, and political writings of some of the members of the Bloomsbury Group—including Woolf, E.M. Forster, Roger Fry, and Leonard Woolf—in order to explore the complex moments of cross-fertilization, critique, and revision that define their encounters, along with notions of a "feminine" or "women's" modernism.

**ENGL 43410. Seminar: Feminism, Print, and Spectacle in the Twentieth Century**

(3-0-3)

How feminist cultures of the 20th century have engaged print culture and visual culture in imaginative ways to carve a space for discussions of women's issues.

**ENGL 43411. Seminar: Twentieth-Century British Women Writers**

(3-0-3)

Modern and postmodern fiction (and some nonfiction prose) by British women. Authors may include Woolf, Butts, Rhys, Cunard, Richardson, Carrington, West, Mansfield, Carter, and Winterson.

**ENGL 43501. Seminar: James Joyce**

(3-0-3)

Close readings and discussion of Joyce's *Dubliners*, *A Portrait of the Artist as a Young Man*, and *Ulysses*.

**ENGL 43502. Seminar: Contemporary Irish Literature**

(3-0-3)

Irish drama, fiction, and poetry of the second half of the 20th century.

**ENGL 43503. Seminar: Anglo-Irish Identities 1600–1800**

(3-0-3)

Focusing on the 200-year historical period that was crucial in the formation of "Ireland," this course explores the complex and contested cultural, political, and ideological identities of a group we have come to call the Anglo-Irish, including Swift, Berkeley, Edgeworth, and Goldsmith.

**ENGL 43504. Seminar: Modern Irish Fiction**

(3-0-3)

A close examination of the works of major Irish writers of fiction after the Second World War—Flann O'Brien, Frank O'Connor, Mary Lavin, Patrick Kavanagh, Edna O'Brien, Michael MacLaverty, Sam Hanna Bell, and Brian Moore.

**ENGL 43505. Seminar: Gender Troubles—Contemporary Irish Fiction**

(3-0-3)

How relations between men and women in contemporary Irish literature reflect the past and present, and suggest a future, of those relations.

**ENGL 43601. Seminar: Landscape in American Literature**

(3-0-3)

A thematic reading of "landscape" in American Literature from the Puritans to Toni Morrison.

**ENGL 43602. Seminar: Gender and Emotion in American Literature**

(3-0-3)

An examination of the changing representations of men's and women's emotions in literature and other cultural forms, with a focus on 19th-century American literature.

**ENGL 43701. Seminar: Southern Fiction**

(3-0-3)

Close readings of Southern fiction from 1900 to 1960, including Chopin, Glasgow, Toomer, Faulkner, Wright, Ellison, Hurston, Warren, Welty, and O'Connor.

**ENGL 43702. Seminar: Suffragettes and Literature**

(3-0-3)

A close study devoted to tracing and defining the feminist literary cultures of the 20th century through, first, reading the writings created during the "First Wave" of feminist activism that defined women's militant and nonmilitant struggle for the vote at the beginning of the last century, followed by exploration of the feminist writing and thought that followed the suffrage movement and paved the way for discussions of Women's Liberation in the "Second Wave."

**ENGL 43703. Seminar: Writing Harlem's America**

(3-0-3)

*Prerequisite:* (ENGL 30101) OR (ENGL 30301 OR ENGL 404M) OR (ENGL 30302 OR ENGL 406M) OR (ENGL 30303 OR ENGL 414M) OR (ENGL 30304 OR ENGL 481M) OR (ENGL 30305 OR ENGL 489M) OR (ENGL 30306 OR ENGL 405M) OR (ENGL 30307 OR ENGL 435M) OR (ENGL 30308 OR ENGL 493M) OR (ENGL 30309 OR ENGL 402M) OR (ENGL 30310 OR ENGL 416M) OR (ENGL 30311 OR ENGL 470M) OR (ENGL 30312 OR ENGL 407M) OR (ENGL 30313 OR ENGL 421M) OR (ENGL 30314) OR (ENGL 30315 OR ENGL 423M) OR (ENGL 30316 OR ENGL 461M) OR (ENGL 30317 OR ENGL 463M) OR (ENGL 30318 OR ENGL 491M) OR (ENGL 30319 OR ENGL 465M) OR (ENGL 30320 OR ENGL 415M) OR (ENGL 30321) OR (ENGL 30325) OR ENGL 440M OR ENGL 490M OR ENGL 492M

This course will serve as an introduction to writers of the Harlem Renaissance, with an emphasis on how Black Writers viewed "the Black Experience" in both within the Black Community and the larger American culture.

**ENGL 43704. Seminar: American Visions**

(3-0-3) Rodriguez

An intra-hemispherical study of literatures of the "Americas" from the mid-16th to the 18th centuries.

**ENGL 43705. Seminar: Realism and Naturalism**

(3-0-3) Hendler

A close examination of American literature written between 1800 and 1900.

**ENGL 43730. Seminar: American Film**

(3-0-3) Krier

*Prerequisite:* (ENGL 30101) OR (ENGL 30301 OR ENGL 404M) OR (ENGL 30302 OR ENGL 406M) OR (ENGL 30303 OR ENGL 414M) OR (ENGL 30304 OR ENGL 481M) OR (ENGL 30305 OR ENGL 489M) OR (ENGL 30306 OR ENGL 405M) OR (ENGL 30307 OR ENGL 435M) OR (ENGL 30308 OR ENGL 493M) OR (ENGL 30309 OR ENGL 402M) OR (ENGL 30310 OR ENGL 416M) OR (ENGL 30311 OR ENGL 470M) OR (ENGL 30312 OR ENGL 407M) OR (ENGL 30313 OR ENGL 421M) OR (ENGL 30314) OR (ENGL 30315 OR ENGL 423M) OR (ENGL 30316 OR ENGL 461M) OR (ENGL 30317 OR ENGL 463M) OR (ENGL 30318 OR ENGL 491M) OR (ENGL 30319 OR ENGL 465M) OR (ENGL 30320 OR ENGL 415M) OR (ENGL 30321) OR (ENGL 30325) OR ENGL 440M OR ENGL 490M OR ENGL 492M

Presentations and discussions of the several genres of film produced in America since the early 1900s.

**ENGL 43801. Seminar: Women of Color**

(3-0-3)

An examination of the literatures of "women of color," encompassing the linguistic, national, ethnic, and cultural experiences and connections among women of color in cultural diasporas around the world, and how these women use their work to (re)map the "margin," recreating it as a place of connection and conversation, rather than exclusion and otherness.

**ENGL 43802. Seminar: Black Cultural Studies**

(3-0-3)

This interdisciplinary course considers the conflicted ways in which "racial" identities and differences have been constructed throughout US culture.

**ENGL 43803. Seminar: American War Literature**

(3-0-3)

Beginning with Mary Rowlandson's captivity narrative and ending with Tim O'Brien's *The Things They Carried*, an exploration of the aesthetic, historical, and theoretical functions and values of war writing in the United States.

**ENGL 43804. Seminar: Memory in Latino/a Literature**

(3-0-3)

This course will focus on several prominent contemporary Latino and Latina poets—among them, Gary Soto, Lorna Dee Cervantes, Victor Hernandez Cruz, Martin Espada—whose work has enriched and diversified the canon of American poetry.

**ENGL 43805. Seminar: Twentieth-Century Black Women Writers**

(3-0-3)

A close examination of major 20th-century African-American women writers.

**ENGL 43806. Seminar: Caribbean Voices**

(3-0-3)

An introduction to the literature of the Anglophone Caribbean.

**ENGL 43810. Seminar: Latino Literature**

(3-0-3)

A close examination of the historic, cultural, and artistic foundations of selected Latino writers.

**ENGL 47999. Special Studies**

(V-0-V)

Independent study under the direction of a faculty member.

**ENGL 52998. Honors Thesis**

(V-0-V)

Arranged by department honors advisor. Credits for research and writing honors thesis.

**ENGL 52999. Honors Thesis**

(3-0-3)

Arranged by department honors program advisor. Credits for research and writing honors thesis.

**University Writing Program****FYC 11050. First-Year Composition Summer Studio**

(0-6-0)

*Corequisite:* FYC 13150

Students in the First-Year Composition Summer Program also enroll in the Summer Studio FYC 11050, which meets in a computer lab on campus. In the studio, students practice academic writing conventions, draft and revise assignments, and conference with a writing specialist. This course is a corequisite of FYC 13150. (Zero credits)

**FYC 13090. Introduction to Academic Writing and Research**

(3-0-3)

The aim of First-Year Composition 13090 is to give students a thorough overview of the conventions of academic writing and research. During the course of the term, students will write three kinds of papers: (1) a "framed" argument that integrates an interpretation of different readings; (2) a "researched" argument based on both assigned readings and library sources; and (3) rhetorical analyses that entail focusing on how writers use language to fulfill their goals. These papers help students come to terms with the conventions of academic writing and argument, preparing them for the kind of writing assignments they will encounter in FYC 13100 and other writing-intensive courses. Unlike in FYC 13100, however, students in FYC 13090 write papers that are relatively brief, allowing extra time and opportunity to practice and cultivate their revision skills.

**FYC 13100. First-Year Composition**

(3-0-3)

First-Year Composition is designed to help students learn how to identify an issue amid conflicting points of view and craft an argument based on various sources of information. The course stresses the identification and analysis of potential counter-arguments and aims to develop skills for writing a research proposal, for conducting original research, and for using print and electronic resources from the library.

**FYC 13150. First-Year Composition Summer Seminar**

(3-0-3) Mick

Identical in its aims as First-Year Composition courses offered during the traditional school year, students in FYC 13150 learn how to identify an issue amid conflicting points of view. The course stresses argument and aims to develop skills for writing researched essays that incorporate academic and popular sources. (Three credits)

**FYC 13200. Community-Based First-Year Composition**

(3-1-4)

In cooperation with the Center for Social Concerns, these sections of composition place students in learning situations in the wider community where they are in contact with people who are dealing with the specific content issue of their section. Because the necessary time commitment for these sections is greater, students are awarded an extra credit hour for their enrollment (four instead of three). We welcome students with commitment to social justice and community service to enroll.

**FYC 13300. Multimedia First-Year Composition**

(3-0-3) Mick

Because researching and composing arguments is increasingly linked to technological tools, multimedia sections of First-Year Composition teach students how to make the most of a wide array of resources. From standard tools such as Microsoft Word, to more powerful websites and software, students in multimedia sections use composition technology to its fullest while exploring the unique opportunities and challenges of composing in the 21st century. While students do not need any prior technological skills, they should be ready to learn many of these skills over the course of the semester. Students will be required to bring a wireless laptop to class and to keep their laptops functioning properly throughout the semester.

**FYC 13400. Advanced First-Year Composition**

(3-0-3)

Advanced First-Year Composition is a writing workshop designed as an elective for students who have advanced placement credit for First-Year Composition but who seek opportunities to enhance their academic writing skills. Space is limited.

**FYC 13500. Advanced First-Year Multimedia Composition**  
(3-0-3)

Advanced First-Year Multimedia Composition is a writing workshop designed as elective for students who have advanced placement credit for First-Year Composition but who seek opportunities to enhance their academic writing skills and the related technological skills outlined in the course description for FYC 13200. Space is limited.

## Film, Television and Theatre

**FTT 10101. Basics of Film and Television**

(3-0-3)

*Corequisite:* FTT 11101, FTT 12101

This course introduces students to the study of film and television, with particular emphasis on narrative. Students will learn to analyze audio-visual form, including editing, framing, *mise-en-scène*, and sound. Students will consider topics in film and television studies such as authorship, genre, stardom, and feminism. Focusing on classical Hollywood and American TV, the course will also introduce students to international and/or alternative cinemas and television styles. Evening screenings are required. Serves as prerequisite to most upper-level courses in film and television.

**FTT 10401. Introduction to the Fine Arts**

(1-0-1)

This one-credit, interdisciplinary seminar is designed to introduce first-year students to some of the University's finest art treasures. Students will have an opportunity to enjoy the arts at Notre Dame from a vantage point of academic preparation, direct personal observation and experience, and the insights of those who work in the arts. The following is a sample of the topics to be explored in the course: the Mesoamerican and the Rembrandt collections in the Snite Museum of Art, the work of the Actors From The London Stage and the Notre Dame Film, Television, and Theatre Department, the art of Ivan Mestrovic as found on campus, the Dante collection in the Rare Book Room, and a selection of on-campus classical and jazz concerts. Preparation to enjoy these and other topics will be built on pertinent readings, class discussions, and short written assignments, as well as tours, guest-led discussions, and attendance at exhibits, plays, films, and concerts. First-year students ONLY.

**FTT 10701. Introduction to Theatre**

(3-0-3)

A study of theatre viewed from three perspectives: historical, literary, and contemporary production practices. Through lectures, readings, and discussion, students will study this art form and understand its relevance to their own life as well as to other art forms. A basic understanding of the history of theatre and the recognition of the duties and responsibilities of the personnel involved in producing live theatre performances will allow students to become more objective in their own theatre experiences.

**FTT 10900. Script Analysis and Dramaturgy**

(3-0-3) Arons

In this course, students will learn (1) how to read and interpret a playscript for production (script analysis); and (2) how to read and understand a dramatic text in terms of its historical and literary contexts (dramaturgical analysis). First-year students only.

**FTT 11101. Basics/Film and Television Lab**

(0-0-0)

*Corequisite:* FTT 10101, FTT 12101

During the lab times, certain films will be viewed for further discussion in class.

**FTT 11182. Fine Arts University Seminar**

(0-0-0)

*Corequisite:* FTT 13182

Certain films will be viewed for further discussion in class.

**FTT 12101. Basics of Film and Television Tutorial**

(0-0-0)

A tutorial in conjunction with Basics of Film and Television.

**FTT 13182. Fine Arts University Seminar**

(3-0-3)

This writing-intensive course will be devoted to a variety of different topics in film, television, new media, and theatre depending on the individual instructor's interests.

**FTT 20009. Broadway Theatre Experience**

(1-0-1) Donnelly

This short course offers students the opportunity to experience theatre at its finest. The course will include three days and two nights in New York City, where we will see four professional productions: three Broadway shows (a musical, a comedy, a drama) and one off-Broadway show. The trip will include a talkback with professional theatre artists as well as a backstage tour of a current Broadway show. The course has a lab fee, which includes round-trip bus and air transportation from Notre Dame to the Hotel Edison in Manhattan, two nights at the hotel, best seats available for the four shows, and the theatre talkback and backstage tour. Prior to the tour, the class will meet to discuss the shows that will be seen, to become familiar with theatre conventions, and to understand the structure and development of professional theatre in America. The course will include the keeping of a journal by each student and will culminate with a paper discussing aspects of the plays that were seen. No prerequisite. By application only. Required field trips.

**FTT 20101. Basics of Film and Television**

(3-0-3)

*Corequisite:* FTT 12101, FTT 21101

This course introduces students to the study of film and television, with particular emphasis on narrative. Students will learn to analyze audio-visual form, including editing, framing, *mise-en-scène*, and sound. Students will consider topics in film and television studies such as authorship, genre, stardom, and feminism. Focusing on classical Hollywood and American TV, the course will also introduce students to international and/or alternative cinemas and television styles. Evening screenings are required. Serves as prerequisite to most upper-level courses in film and television.

**FTT 20240. Forming and Nurturing the Creative Habit**

(3-0-3) Burd

FANTCH is a life skills seminar. It is about you—who you are now and how you can change your work habits so that you have the discipline, energy, awareness, resources, enthusiasm, and ideas required to produce high-quality creative work, whatever your field—the arts, science, engineering, business, architecture. The “text” is choreographer Twyla Tharp’s *The Creative Habit: Learn It and Use It For Life*. We also use other books and articles that examine the “creative DNA” of notable artists and achievers in diverse fields. In our seminar-journey you will explore who you really are: what field and work turn you on, what your work-life dreams/goals are, and how you can achieve them. You’ll learn how to discipline yourself, stimulate your imagination, reinforce your unique creative traits, build a bank of information and ideas, brainstorm effectively, tap into serendipity, protect the “spine” of your ideas and beliefs, strengthen the skills required for your work, get out of ruts, get into the zone, grow through failure, and improve your creative output throughout your life. You’ll work on your own, in collaboration with classmates, and with notable creative guests. We will challenge and support each other through our class discussions and assignments. The assignments emphasize communication skills, particularly writing that is clear, concise, cogent, and engaging. The assignments include exercising your creative powers in any other medium or media you choose, including producing a “journey work” that represents who you are as the result of forming and nurturing your own creative habit. Before registering, you are urged to get and read the syllabus and/or to talk with the seminar facilitator, Andy Burd. E-mail: andyburd@aol.com. To learn about Adjunct Assistant Professional Specialist Burd, visit andyburd.com.

**FTT 20260. *La telenovela*: History-Culture-Production**

(3-0-3) Barry

*Prerequisite:* (ROSP 20202 OR ROSP 201 OR ROSP 202E)

In this course, you will explore the genre of the *telenovela* (a major social, cultural, political, and economic force in Latin America and, more recently, in the United States) by reading about the genre (in Spanish) and watching two condensed *telenovelas* (also in Spanish). You will demonstrate your understanding of the *telenovela* and its importance in Hispanic culture through writing and discussion and through application of these ideas as you write, produce, direct, act in, record, and edit a mini-*telenovela* as a class. During this process, you will learn and apply basic production (videography) and post-production (computer-based video and audio editing) techniques.

**FTT 20280. Culture, Media, and Entertainment in China Today**

(3-0-3)

This course is designed to provide students with an introduction to aspects of contemporary Chinese culture, media, and entertainment. The class focuses on the development of China’s media and entertainment industries, including the online industry, the music industry, advertising, television, and the film industry. Students will learn to critically analyze authentic cultural products, study their cultural and literary dimensions, and discuss how culture affects the political and economic aspects of these industries. This class aims to be interdisciplinary, and is designed to accommodate students from a large range of academic interests, including business, marketing, political science, economics, communication, media studies, music, sociology, literature, film, cultural studies, and Asian studies. No prior knowledge of China or the Chinese language is required. Fulfills international requirement.

**FTT 20480. Introduction to New Media**

(3-0-3)

The Internet, interactive computer technologies, and unprecedented ways of performing and expressing ideas make an awareness of new media (broadly defined) necessary. This course examines the history, application, and social impact of these new systems.

**FTT 20700. Introduction to Theatre**

(3-0-3)

A summer study of theatre viewed from three perspectives: historical, literary, and contemporary production practices. Through lectures, readings, and discussions, students will study this art form and understand its relevance to their own life as well as to other art forms. A basic understanding of the history of theatre and the recognition of the duties and responsibilities of the personnel involved in producing live theatre performances will allow students to become more objective in their own theatre experiences.

**FTT 20701. Introduction to Theatre**

(3-0-3)

A study of theatre viewed from three perspectives: historical, literary, and contemporary production practices. Through lectures, readings, and discussion, students will study this art form and understand its relevance to their own life as well as to other art forms. A basic understanding of the history of theatre and the recognition of the duties and responsibilities of the personnel involved in producing live theatre performances will allow students to become more objective in their own theatre experiences.

**FTT 20702. Stage Management**

(3-0-3)

This course will explore the duties and functions of the stage manager in both the preproduction and production phases of the mounting of a show. Students will learn how to produce a promptbook and to track and block a show. They will also learn performance etiquette and documentation of a production.

**FTT 20703. Theatrical Production**

(5-0-3)

An introductory study of theatre viewed from three perspectives: historical, literary, and contemporary production practices. Students will gain a basic understanding of live theatre performances with the goal of becoming more objective about their own theatre experiences.

**FTT 20704. Theatre, History, and Society**

(3-0-3) Pilkinton

This course treats theatre as a culture industry and employs the case-study approach to examine deeply selected periods and sites in theatre history to understand the theatrical event and how it was marketed and to whom, and what cultural attitudes prevailed. Each case study will emphasize theatre as a site of cultural debate and political and social change while considering the larger question of the role of representation in human society through time.

**FTT 20705. Performance Analysis**

(3-0-3)

Performance Analysis moves beyond analysis of scripts to teach a student how to "read" a performance. How do we understand an artist's choices in a given performance? Can we determine who is responsible for every choice in a production? Attention will be given to the role of each individual theatre artist and how the collaborative process evolves. This course will introduce theories of representation and interpretation and will involve analysis of both performances and text. This is part of the new theatre core concentration curriculum.

**FTT 20900. Script Analysis and Dramaturgy**

(3-0-3) Arons

In this course, students will learn (1) how to read and interpret a playscript for production (script analysis); and (2) how to read and understand a dramatic text in terms of its historical and literary contexts (dramaturgical analysis).

**FTT 21001. Acting: Process**

(3-0-3)

The purpose of this class is self-discovery and growth as an actor. You will be introduced to basic principles and techniques for preparation and performance, as well as a context for developing a working methodology for personal creative growth as an actor, the creation of a role, realization of a scene, and an introduction to the production process. You are expected, therefore, to know and apply these principles and processes. Scene work is prepared and rehearsed with a partner(s) outside of class for presentation in class. Written textual analysis (including detailed character study) is required for all scene work. A critical journal will reflect on assigned readings, responses to the work, and continuing assessment of personal growth.

**FTT 21007. Writing for Screen and Stage I**

(3-0-3)

This class focuses on the basics of dramatic writing: story, dialogue, character, and style. Students will develop three short scenes as stage plays or as screenplays. The last section will be devoted to developing one of these for public reading. This class is a prerequisite for Writing for Screen and Stage II, FTT 31007, which will be offered during the spring semester.

**FTT 21101. Basics/Film and Television Lab**

(0-0-0)

*Corequisite:* FTT 12101, FTT 20101

During the lab times, certain films will be viewed for further discussion in class.

**FTT 30004. Makeup for the Stage**

(3-0-3) Donnelly

The theory and practice of makeup design, including basic techniques, corrective, old age, and special character makeup. Requirements: attendance at class and makeup demonstrations, practical makeup design projects, midterm exam, and final exam project. Students will provide their own supplies. Due to the practical nature of the class, all male students need to be clean-shaven.

**FTT 30005. History of Costume**

(3-0-3) Donnelly

This course is an overview of the history of costume and fashion from the Egyptian cultures through the 20th century. The course will look at the ever-changing trends in clothing and provide an understanding of the cultural and historical effects of those changes. The class will investigate how fabric, style, color, and the psychology of clothing reflects personal choice, cultural impressions, and historical perspectives.

**FTT 30008. Love, Death, Revenge: Japanese Drama**

(3-0-3)

An introduction to Japanese classical theater (Noh, Kyogen, Bunraku, and Kabuki) through readings and videotapes of selected plays.

**FTT 30009. Contemporary Plays**

(3-0-3)

This course will familiarize you with major plays and playwrights of the past 20 years. You will examine the style, structure, and societal context of each play. Specific focus will be given to the demands each play requires of the artistic staff. Emphasis will also be placed on your ability to evaluate and articulate thoughts about theatrical concepts and performances. Contemporary Plays fulfills the dramatic literature requirement for the theatre major.

**FTT 30101. History of Film I**

(3-0-3)

*Prerequisite:* (FTT 10101 OR FTT 104) OR (FTT 20101 OR FTT 204)*Corequisite:* FTT 31101

This course traces the major developments within the history of US and international cinema from its beginnings to 1946. It will look at films from the major cinematic movements and genres and from major filmmakers. These films and filmmakers will be considered in terms of the social, economic, technological, and aesthetic forces that have shaped them.

**FTT 30102. History of Film II**

(3-0-3)

*Prerequisite:* (FTT 30101 OR FTT 310)*Corequisite:* FTT 31102

This course traces the major developments in world cinema from the post-WWII era to the present. The course will examine the shifting social, economic, technological, and aesthetic conditions of this period, especially the demise of the Hollywood studio system, the rise of new technologies and auxiliary marketing outlets, and the globalization of cinema. The course will not be limited to Hollywood filmmaking, but will also look at various international movements, including Italian neorealism, the French new wave, and recent Asian cinemas.

**FTT 30103. Teen Culture**

(3-0-3)

*Prerequisites:* (FTT 10101 OR FTT 104 OR FTT 20101 OR FTT 204) AND (FTT 30101 OR FTT 310 OR FTT 30102 OR FTT 311 OR FTT 30460 OR FTT 301)*Corequisite:* FTT 31103

Adolescence has long been recognized as a period of life marked by physical and psychological changes, but it was only in the 20th century that people experiencing these changes became known as "teenagers." This class examines the history and significance of teen culture and the films and television programs that have represented teen experiences.

**FTT 30230. Australian Cinema**

(3-0-3)

*Corequisite:* FTT 31230

This course presents a survey of Australian cinema from the silent era to the present with special attention to the new Australian cinema of the 1970s. Students will examine these films in their social and political context. Throughout, we will consider how Australian films fashion an Australian identity. We will discuss Australia's complex relationship to European and American culture, representations of Aboriginal culture, women in the Australian cinema, the representation of the outback vs. the city, tourism and the film industry, the role of film festivals, and more.

**FTT 30231. Comedy, Italian Style!**

(3-0-3)

An exploration of comic traditions in Italy: the popular film genre known as "comedy Italian style" is analyzed in its historical development in the 1950s and '60s, together with Italian film comedies from the silent period through the present. Roberto Benigni's new film version of *Piencchio*, for example, to be released in the United States in December of 2002, extends a long line of comic genius. The commedia *dell'arte*, Goldoni's comedy of manners, and the political farce of Nobel Prize winner Dario Fo provide further examples of a comic tradition that continues to be a vital force of aesthetic pleasure and political comment. Requirements include attendance at mandatory film screenings, participation in class discussions, a number of short papers, and midterm and final exams. The class will be conducted in English.

**FTT 30232. National Cinema: Irish Cinema/Culture**

(3-0-3)

*Corequisite:* FTT 31232

Every industrialized country, and many non-industrialized ones, have developed distinctive national cinemas. Often these productions are a dynamic mix of Hollywood influences, assertive local cultures, and government control. This course examines the films of one or more countries to reveal their distinctive styles, stories, and visual and narrative techniques. (The nationality varies each year.) The idea of “nation” as a critical concept is also addressed. May be repeated. Fulfills the film international area requirement.

**FTT 30233. New Iranian Cinema**

(3-0-3)

*Corequisite:* FTT 31233

This seminar course will take up a selection of the best of the new wave of Iranian cinema (films by Kiarostami, *Close-up*, *Taste of Cherry*, and *Life Goes On*, *Through the Olive Trees*; Mahkmalbaf: *Gabbeh*, *The Cyclist*; Samira Mahkmalbaf, *The Apple*; Panahi, *The Circle*; Naderi, *The Runner*; and others) and debate its sources and its paradoxical arrival on the international film scene. We will consider the role of censorship, limited budgets, Islamic proscriptions, national history and aspirations, issues of gender and, in particular, the persistent influence of a 2,500-year old, popular Persian poetic tradition in the inspiration and refinement of this unexpected and celebrated cultural phenomenon.

**FTT 30234. New Directions in Russian Cinema**

(3-0-3)

Freed from the constraints of Soviet-era censorship, since 1990 Russian filmmakers have exploited the unique qualities of the film medium in order to create compelling portraits of a society in transition. The films we will watch cover a broad spectrum: reassessing Russia's rich pre-Revolutionary cultural heritage, as well as traumatic periods in Soviet history (World War II, the Stalinist era); grappling with formerly taboo social issues (gender roles, anti-Semitism, alcoholism); taking an unflinching look at new social problems resulting from the breakdown of the Soviet system (the rise of neo-fascism, the war in Chechnya, organized crime); and meditating on Russia's current political and cultural dilemmas (the place of non-Russian ethnicities within Russia, Russians' love-hate relationship with the West). From this complex cinematic patchwork emerges a picture of a new, raw Russia, as yet confused and turbulent, but full of vitality and promise for the future. Short readings will supplement the film component of the course.

**FTT 30235. Italian National Cinema**

(3-0-3)

*Corequisite:* LLRO 41545

Conducted in English, this course examines the concept and reality of “national cinema” in the Italian case. A history of one of the world's most renowned national cinemas focusing on the construction of national identity in film.

**FTT 30236. Introduction to Japanese Popular Culture**

(3-0-3)

*Corequisite:* FTT 31236

This course will examine postwar Japanese popular culture using the theories and methods of cultural studies, media studies, and gender studies. We will explore some of the primary sites of postwar popular culture across media, as well as emphasize the theoretical distinctions between those media. Rather than following a chronological order, the course will be grouped into sections by media, including novels, film, television, *manga*, and *anime*. As we discuss issues specific to each of these media and across genres, however, our discussion will be framed by some key questions: What was the role of popular culture in defining a national identity in the postwar? What role did foreign influences, most importantly, American pop culture play? How have popular culture texts spoken to and defined specific audiences (for instance, teenagers, women, non-Japanese)? This course is taught in English, and no knowledge of the Japanese language is required.

**FTT 30237. Nazi Past in Postwar German Film**

(3-0-3)

How have German films since 1945 been trying to deal with the Nazi past? How do Germans picture their memories of the Third Reich? How do they define themselves within and against their country's history? And how do they live with their remembrances now? Primarily, this class aims at issues in the realm of ethics (perpetrators, victims, and passive accomplices; stereotypes; courage and cowardice; personal and national guilt; revisionism, coming-to-terms, and productive memory; and responsibility and the [im]possibility of reconciliation). Some central questions about German history during the Third Reich and the postwar era will be dealt with. The course will also develop basic categories of film analysis and ask questions about the special capacity of film to help a nation work through its past. Films subtitled, dubbed, or English language. Readings, lectures, and discussions in English.

**FTT 30238. Short Story in East Asia and Beyond**

(3-0-3)

This course introduces students to short stories by 20th-century writers in China, Taiwan, Korea, Japan, and the East Asian diasporas. The goals of the course are to examine the intertwined modern histories of East Asian nation-states, investigate the short story as a literary genre, and explore critical concepts of literary and cultural identity studies. The stories will be read in conjunction with critical essays on nation, gender, and the short story, with particular attention to the narrative strategies of the authors. Reading the stories both in terms of the cultural and ideological contexts in which they were written and as material artifacts available to us in English today helps to problematize the meanings of “Chinese,” “Japanese,” or “Korean” in East Asia and beyond. Ultimately, this course will provide students with the conceptual framework and vocabulary to interrogate gender, race, and nationality as socially constructed categories. All readings are in English; no prior knowledge of Asia is presumed.

**FTT 30240. Japanese Film and Fiction**

(3-0-3)

*Prerequisite:* (FTT 10101 OR FTT 104) OR (FTT 20101 OR FTT 204)

For Japan, an island nation whose feudal state followed a policy of isolation for over 150 years (1600–1868), the transition to modernity has been an abrupt and complicated process. Modernization has involved a transformation at every level of Japanese society, ranging from the political and economic realms, to the scientific, cultural, and educational. This course focuses on how some of Japan's most creative authors and film directors have responded to debates relating to the strategies and sacrifices involved in enacting sweeping social changes, and to developing a modern, educated citizenry that would include not only elite males, but women, the poor, and ethnic or other minorities. Students will be introduced to the concepts of authorial empathy and tension between realism and fabrication in fiction writing and filmic expressions; and to ways in which gender, nationality, and other affiliations have been constructed in the Japanese cultural imagery.

**FTT 30241. New Chinese Cinema**

(3-0-3) Noble

This class explores “underground” films produced in Mainland China since the 1980s. Many films that were produced illegally or banned in China have garnered awards in prestigious international film festivals—Cannes, Berlin, Venice, Toronto, Tribeca (and the list runs on). How and in what ways were the films subversive? What is the role of China as a nation and state in the production of film today and in the past? How do these films play to the international film festival circuit and international market? Is commercialization realizing less government control of film and other media in China? The class will view both feature films and documentaries, including those unavailable in the US (but all with English subtitles). No prior knowledge of Chinese language, culture, or history is required.

**FTT 30242. African Cinema: Black Gazes/White Camera**

(3-0-3)

*Corequisite:* ROFR 31555

A course exploring the image of black Africa through the lens of white cinematographers. Fulfills the FTT international requirement.

**FTT 30243. Black Power at the Movies: African American Cinema in the Twentieth Century**

(3-0-3) Sieving

*Prerequisite:* (FTT 10101 OR FTT 104) OR (FTT 20101 OR FTT 20102 OR FTT 204)*Corequisite:* FTT 31243

This course provides a corrective to the misconception that American film history is solely the history of the mainstream. Specifically, it examines the cultural and industrial factors affecting the production of movies made for (or of special interest to) black American audiences, from the early silent era up through the 1990s. We will explore a variety of trends, movements, and approaches within African American film history. This designation covers a large number of films with a range of production backgrounds: from black-cast musicals of the studio system era (e.g., *Cabin in the Sky*), to the work of the Los Angeles School of completely independent African American filmmakers (e.g., *Daughters of the Dust*); from the “race movies” produced for black-only movie theaters in the 1920s, ’30s, and ’40s (e.g., the films of Oscar Micheaux) to the so-called “blaxploitation” cycle of the 1970s (e.g., the films of Pam Grier). We will pay particular attention to the influence of social factors on African American cinema. Specifically, we will ask how the “Black Power” idea—loosely defined as the notion, adopted by assimilationists and nationalists alike, that people of African descent should free themselves from the trappings of colonialism and white supremacy and take control of their own destinies—was negotiated and reflected in the products of 20th-century American cinema.

**FTT 30244. Cruel Stories of Youth: Children and Teens in Japanese Film Lab**

(3-0-3) Shamooin

From the wide-eyed children of *anime* to the crazy street fashions of Harajuku, images of kids and teens in Japanese popular culture are now distributed and consumed around the world. How, then, are those young audiences depicted and addressed within Japanese popular culture? What aspects of childhood or teen identity are repeated across generations? In order to answer these questions, we will look at Japanese films, including animation, from across the 20th century, that represent children and teens from a variety of perspectives, from the celebration of innocence to the threat of juvenile delinquency. In addition to analyzing representations of children and teens, students will also gain familiarity with Japanese film history and genres, and develop the critical vocabulary of film analysis. Films will include *I Was Born But*, *Crazed Fruit*, *A Cruel Story of Youth*, *Battle Royale*, *All About Lily Chou Chou*, *Nobody Knows*, *Grave of the Fireflies*, and *Akira*. All films will be subtitled. There will also be secondary readings in cultural studies and film studies, relating to the films we watch in class. Assignments will include an oral presentation, several short writing assignments, a film viewing journal, and a longer paper.

**FTT 30245. On Stage and Screen: French Theater and Film from 1900 to 1967**

(3-0-3) Toumayan

This course will examine the parallel and related evolutions of theater and film from the beginning of the 20th century to the eve of May 1968. We will study the principal playwrights and filmmakers, works, and movements, as well as the manner in which these works both expressed and influenced the dominant ideological trends and aesthetic movements of the first two-thirds of the century. Texts by Anouilh, Artaud, Beckett, Camus, Claudel, Cocteau, Giraudoux, Ionesco, and Sartre. Films (or excerpts of films) by Carne, Cocteau, Godard, Marker, Resnais, and Renoir. Requirements: one oral presentation, two papers, final examination.

**FTT 30406. The Art and Practice of Screenwriting**

(3-0-3) Godmilow

*Prerequisite:* (FTT 10101 OR FTT 104) OR (FTT 20101 OR FTT 20102 OR FTT 204)*Corequisite:* FTT 31406

Filmmaking is always, at first, thinking and writing. This is a workshop for current and would-be screenwriters, to develop original ideas for the screen, and to practice those techniques whereby those ideas can be translated into cinema on the

page. Coursework will involve many short writing exercises and finally a script for a 20-minute film. There will also be a required lab screening.

**FTT 30410. Introduction to Film and Video Production**

(3-3-3) Mandell

*Prerequisite:* (FTT 10101 OR FTT 104) OR (FTT 20101 OR FTT 204) OR FTT 20102*Corequisite:* FTT 31410

An introductory course in the fundamentals of shooting, editing, and writing for film and video productions. This is a hands-on production course emphasizing aesthetics, creativity, and technical expertise. The course requires significant amounts of shooting and editing outside class. Students produce short video projects using digital video and Super 8mm film cameras and edit digitally on computer workstations. The principles of three-camera studio production are also covered.

**FTT 30411. Art and Science of Filmmaking**

(3-0-3)

*Prerequisite:* (FTT 10101 OR FTT 104) OR (FTT 20101 OR FTT 204)

This course is a behind-the-scenes look at the artists and craft people who work together to create both theatrical films and television programs. We will explore the many roles people play and the techniques used to make movies: specifically the director, producer, and cinematographer’s relationship on a set. This study will combine history, technology, and the politics of both big-budget shows and independent cinema. This is a course about film production without all of the hands-on experience, which will provide a basis for those thinking about doing production as well as expand the expertise for those who have taken production courses. We will, however, conduct various in-class film tests. There will be screenings, a midterm, and final paper (10 pages) regarding a chosen researched topic about filmmaking. Materials fee required.

**FTT 30412. Digital 3-D**

(3-0-3) Carvalho

This course introduces students to Alias Wavefront software, a powerful conceptual tool for modeling and animating complex objects. In this digital exploration, computer technology will be used to generate, modify, and present design ideas.

**FTT 30430. History of Documentary Film**

(3-0-3)

*Prerequisite:* (FTT 10101 OR FTT 104) OR (FTT 20101 OR FTT 204)*Corequisite:* FTT 31430

This course will track the history of nonfiction film and television, examining various structures and formats, including expository, narrative, experimental, formalist, docudrama, and “reality TV.” It will also examine the uses of “actuality” footage in films that make no pretense to objectivity. At the center of the course will be a deconstruction of the notion of “film truth.” Students will develop skills in the critical analysis of documentary and examine the standards by which we evaluate them.

**FTT 30436. Topics: Film and Popular Music**

(3-2-3)

*Corequisite:* FTT 31436

This course examines the relationship between popular music and film through an examination of film scores, the genre of the musical, musical performance, the use of prerecorded pop songs in films, rockumentaries, music video, and pop biopics. We’ll see films using popular music of all kinds: Tin Pan Alley, ’50s rock ‘n roll, jazz, disco, country, French pop, and more. We’ll consider the role of the star—ranging from Astaire to Travolta, Dylan to Madonna—and films by directors such as Scorsese and Welles. Looking at films from the 1930s to the present, we’ll consider the narrative function and meaning of music, industrial practices, changing social values, how songs get Academy Awards, how soundtracks circulate, and how film relates to various other musical media, such as radio and MTV. Throughout, we will pay special attention to how pop music affects film’s ideologies of gender, race, and sexuality. Students do not need a background in music. Films will include *The Band Wagon*, *American Graffiti*, *A Man and a Woman*, *Saturday Night Fever*, *Touch of Evil*, *Truth or Dare*, *The Umbrellas of Cherbourg*, *Round Midnight*, and *Nashville*.

**FTT 30450. Television Criticism and Aesthetics**

(3-0-3) Becker

*Prerequisite:* (FTT 10101 OR FTT 104) OR (FTT 20101 OR FTT 20102 OR FTT 204)*Corequisite:* FTT 31450

This course builds upon the concepts that students are introduced to in Basics of Film and Television and offers more advanced study of television criticism and aesthetics. We will seek, first of all, to understand television as a unique, meaning-producing medium, dissecting television's narrative and non-narrative structures and its distinctive visual and aural aesthetic. Second, we will confront the critical methodologies that have been applied to the medium under the rubric of academic television studies: semiotics, genre study, ideological analysis, cultural studies, and so on. Thus, our goals will be to understand how television makes meaning and to explore how media scholars approach television in meaningful ways. The course will be a combination of lecture and discussion, and the assignments will include a midterm and final, as well as a handful of short papers and reading responses.

**FTT 30460. Principles of Television and Multimedia Production**

(3-0-3)

This course provides a fundamental understanding of video and multimedia program production, from initial concept to final broadcast. The point of view is from the perspective of the executive producer, who oversees all business and creative aspects of television programs. All media that incorporates video, including broadcast television, CD-ROM, DVD, and the Internet, will be covered. Topics include proposal development and budget; understanding the target audience; audience exposure, attention, perception, and retention; production elements; locations; the script; sponsor relations; credibility and ethics; motivational television; and on-camera interview techniques.

**FTT 30461. History of Television**

(3-0-3)

*Corequisite:* FTT 31461

This course analyzes the history of television, spanning from its roots in radio broadcasting to the latest developments in digital television. In assessing the many changes across this span, the course will cover such topics as why the American television industry developed as a commercial medium in contrast to most other national television industries; how television programming has both reflected and influenced cultural ideologies through the decades; and how historical patterns of television consumption have shifted due to new technologies and social changes. Through studying the historical development of television programs and assessing the industrial, technological, and cultural systems out of which they emerged, the course will piece together the catalysts responsible for shaping this highly influential medium.

**FTT 30462. Broadcast Journalism**

(3-0-3) Sieber

Four major topics are covered: (1) writing for broadcast with emphasis on developing the student's understanding of grammar and style in the construction of effective news stories; (2) newsroom structure: understanding who does what in today's broadcast newsroom and how economics affects the flow of information; (3) journalism ethics: analysis of personal values, ethical principles, and journalistic duties that influence newsroom decisions; and (4) legal considerations in news gathering, with special attention paid to libel laws and invasion of privacy.

**FTT 30463. Broadcasting and Cable**

(3-0-3) Heisler

This course examines the history and current practices of the broadcast and cable television industry and looks at its effect on American culture and society. Topics of discussion include important issues in the industry, government regulation, news, sports, and entertainment programming strategies and practices, ratings, and advertising. The course also offers an introduction to basic television production through eight production sessions at WNDU-TV.

**FTT 30465. Sports and Television**

(3-0-3) Heisler

Sports have played an integral role in the television industry since the medium's early days. This course will highlight the history of sports on television and focus on the nuts and bolts of how television sports programming works today. The course will also examine the impact of televised sports on our culture as well as the ethical issues raised by the media's coverage of sports.

**FTT 30466. Film and Digital Culture**

(3-0-3)

*Prerequisite:* (FTT 10101 OR FTT 104) OR (FTT 20101 OR FTT 204)*Corequisite:* FTT 31466

This class examines the many and varied ways in which new digital technologies are changing traditional methods of film production, distribution, exhibition, and reception. Some of the topics we will explore include the impact of digital cameras and editing on film production; new narrative structures that result from the temporal and spatial manipulations of digital technology; new media in animation; the legal issues raised by digital technologies and the industry's efforts to combat piracy; new forms of audience engagement through fan websites; and the implications of DVD extras and the future of digital video in the home.

**FTT 30491. Debate**

(V-0-V) Ohmer

This course will focus on research of current events and the efficacy of proposed resolutions toward the alleviation or reduction of societal harms. It will also involve discussion of debate theory and technique. Permission required.

**FTT 30800. Scenic Painting**

(3-0-3)

An introduction to the tools and techniques used in painted and textured scenery for the stage and screen. Students will learn and apply the variety of methods used in creating a wide range of painted effects; from the basic wood treatments to the advanced marbling and faux finishes. Outside-of-class painting time will be required.

**FTT 30801. Scene Design and Techniques for the Stage**

(3-0-3) Phillips

This is a beginner's course in basic scenic design techniques and hand drafting for the stage. This course will take the student through the process of design from how to read a script, research, presentation, rendering, basic drafting, and if time allows, model building. No previous experience necessary.

**FTT 30802. Lighting Design and Methodology**

(3-0-3)

This course serves as an introduction to the theories and practice of lighting design for the stage. Students will explore the design process, as well as study the practical considerations of the execution of a design. Specific topics covered will include electricity, light, theatrical equipment and its development, communication of the design, and the role of the designer within the artistic infrastructure.

**FTT 30803. Costume Design and Methodology**

(3-0-3) Donnelly

This course teaches the principles of costume design for the stage and the techniques of constructing costumes. The course will explore the use of costumes to express character traits by analyzing play scripts. The course will include an introduction of the basic skills needed to construct costumes.

**FTT 31001. Acting: Character**

(3-0-3)

*Prerequisite:* (FTT 21001 OR FTT 221)

The second course in the acting progression, this course expands on basic methodology and incorporates physical techniques for building a character. Students explore psychological gestures, Laban effort shapes, and improvisation as they develop a personal approach to creating a role.

**FTT 31002. Voice and Movement**

(3-0-3)

A course designed to help the advanced acting student focus on kinesthetic awareness. The actor will identify and work to remove physical and vocal tensions that cause habituated movement and impede natural sound production. Through movement and vocal exercises created for actors, students will experience what "prepared readiness" for the stage consists of, and how to meet the demands of a live performance.

**FTT 31003. Acting Role /Contemporary**  
(3-0-3)

Advanced exploration of technique and methodology, focusing on problem solving in approaching roles from the literature of the contemporary theatre.

**FTT 31005. Acting: Role/Classical**  
(3-0-3)

*Prerequisite:* (FTT 21001 OR FTT 221)

This course looks at Shakespeare's texts from the actor's perspective. Various techniques for unlocking meaning and emotional content will be introduced. Students will use the *First Folio* for textual analysis and explore the fine arts in Elizabethan England to discover the physical world of Shakespeare's characters. The course culminates in a series of vignettes allowing each student to create several different classical roles.

**FTT 31006. Directing: Process**  
(3-0-3)

This course familiarizes students with the creative components of basic play direction, including skills such as play selection, script analysis, casting, blocking, rehearsal techniques, and collaboration with designers. Students will read plays from various historical periods, participate in class directing exercises, learn from guest speakers (including professional actors, designers, and directors) and observe seasoned directors in rehearsal. This course will culminate in each student auditioning, casting, and directing a short play, documented in a production promptbook.

**FTT 31007. Writing for Screen and Stage II**  
(3-0-3)

Advanced class for students interested in completing a major writing project for reading/staging at the end of the semester. Writing for Screen and Stage I is not a prerequisite, but Writing for Screen and Stage II is by application only.

**FTT 31010. Performance Art: History, Theory, and Practice**  
(3-0-3)

Performance art is anti-art. Performance art is art that contradicts tradition, that aims to shock. This class will equip the student with an overview of its offenses. Class content may include Dada's early 20th-century assaults on the audience; absurdist experimental performance works by Yoko Ono, Lygia Clark, John Cage, and Nam June Paik from the 1960s; performance art addressing racism by Adrian Piper and William Pope L. from the 1980s; and current performance works by Internet artists and others. Discussions will focus on the aesthetics and politics of marginality. In other words, why shock? Why experiment? Is there any market for such work today? We will also look at critical and theoretical texts about performance, modernism, and the avant-garde and consider their relation to the works themselves. These may include manifestos by performers and artists; debates about the autonomy of art; poststructuralist writings on art and aesthetics; and theories of performativity.

**FTT 31011. Theatre Production Workshop**  
(V-0-V)

A workshop course in the process of theatre production in which students assume a major non-performance production responsibility including, but not limited to stage manager, assistant stage manager, prop master, costumer, technical director, or assistant director. This course can be repeated for up to four hours credit.

**FTT 31012. Approaches to Acting for Stage and Screen**  
(3-0-3)

An active and participatory overview of several techniques that actors and directors can employ for the best results in any given situation, whether it be on the stage or

in front of the camera. Discover what process will work for you and/or your actors! Methods explored in the course will include Stanislavski, Grotowski, Meisner, viewpoints, and Suzuki.

**FTT 31013. Performance, Culture, and Creativity**  
(3-0-3)

Performance, Culture, and Creativity seeks to integrate cultural experiences with the intellectual practice of examination and discovery. The focal point of the course requires students to identify the cultural and universal semiotics in stage plays and then to create performances based on their research. Theatre becomes the framework you will use to make sense of disparate realities. We will look at theatre as both an artistic endeavor, and more specifically, as subjective experiences that occur for each individual in drastically different ways, dependent upon that person's cultural background and current environment. This course is intended for the student who has recently returned from studying abroad, but all students are welcome.

**FTT 31014. Acting for the Camera**  
(3-0-3)

*Prerequisite:* (FTT 21001) OR (FTT 30410)

This is an upper-level acting class designed for both acting and film/video students. The course will focus on techniques for effective on-camera performance. Students will learn the mechanics of working on a set, in addition to methods for applying traditional acting training to film, television/industrial, and commercial work.

**FTT 31101. History of Film I Lab**  
(0-0-0)

*Corequisite:* FTT 30101, FTT 12101

During the lab times, certain films will be viewed for further discussion in class.

**FTT 31102. History of Film II Lab**  
(0-0-0)

*Corequisite:* FTT 30102

During the lab times, certain films will be viewed for further discussion in class.

**FTT 31103. Teen Culture Lab**  
(0-0-0)

*Corequisite:* FTT 30103

Certain films will be viewed for further discussion in class.

**FTT 31231. Comedy, Italian Style Lab**  
(0-0-0)

Certain films will be viewed for further discussion in class.

**FTT 31232. National Cinema: Irish Cinema/Culture Lab**  
(0-0-0)

During the lab times, certain films will be viewed for further discussion in class.

**FTT 31233. New Iranian Cinema Lab**  
(0-0-0)

*Corequisite:* FTT 30233

Lab for FTT 30233.

**FTT 31236. Introduction to Japanese Popular Culture Lab**  
(0-0-0)

*Corequisite:* FTT 30236

Films will be viewed for further discussion in class.

**FTT 31243. Black Power at the Movies: African American Cinema in the Twentieth Century Lab**  
(0-0-0)

*Corequisite:* FTT 30243

Certain films will be viewed for further discussion in class.

**FTT 31244. Cruel Stories of Youth: Children and Teens in Japanese Film Lab**

(0-0-0)

Certain films will be viewed for further discussion in class.

**FTT 31406. The Art and Practice of Screenwriting Lab**

(0-0-0)

*Corequisite:* FTT 30406

Certain films will be viewed for further discussion in class.

**FTT 31410. Introduction to Film and Video Lab**

(3-3-3)

*Prerequisite:* (FTT 10101) OR (FTT 20101)*Corequisite:* FTT 30410

A lab course in the fundamentals of writing, shooting, editing, and lighting for narrative film and video productions. This is a hands-on production course emphasizing aesthetics, creativity, and technical expertise. Expect significant amounts of shooting and editing outside of class, as well as helping classmates on their shoots. Materials fee required.

**FTT 31430. History/Film Documentary Lab**

(0-0-0)

*Prerequisite:* (FTT 10101 OR FTT 104) OR (FTT 20101 OR FTT 204)*Corequisite:* FTT 30430

During the lab times, certain films will be viewed for further discussion in class.

**FTT 31436. Topics: Film and Popular Music Lab**

(0-0-0)

*Corequisite:* FTT 30436

During the lab times, certain films will be viewed for further discussion in class.

**FTT 31437. Topics: Film and Popular Music Lab**

(0-0-0)

*Corequisite:* FTT 30437

Certain films will be viewed for further discussion in class.

**FTT 31450. Television Criticism and Aesthetics Lab**

(0-0-0)

*Corequisite:* FTT 30450

Screenings will be viewed for further discussion in class.

**FTT 31461. History of Television Lab**

(0-0-0)

*Corequisite:* FTT 30461

During the lab times, certain television shows will be viewed for further discussion in class.

**FTT 31466. Film and Digital Culture Lab**

(3-0-0)

*Corequisite:* FTT 30466

Certain films will be viewed for further discussion in class.

**FTT 40000. CAD for the Stage**

(3-0-3) Cole

The study of the use of the computer to design scenery and lighting for the stage. The course will begin at a rudimentary level of understanding of computer-aided design and progress to 2-D and then 3-D design techniques. A basic understanding of the Macintosh computer system is necessary, and significant computer work is required outside class.

**FTT 40001. Shakespeare in Performance**

(3-0-3)

This course will explore Shakespeare's plays in performance across a wide range of history and forms. It will include explorations of the physical spaces and institutional organization of the theatres for which Shakespeare wrote and the effects of the actors and staging methods on his plays. It will look at the history of Shakespeare in performance from then until now, including Shakespeare adapted,

Shakespeare restored, and Shakespeare reinvented. It will examine contemporary productions on stage, film, and audio. It will involve visits to productions and workshopping scenes ourselves.

**FTT 40002. Directing: Process**

(3-0-3)

Advanced independent projects in directing. Students considering this course should consult with the instructor for departmental guidelines.

**FTT 40003. Advanced Scenic Production**

(3-0-3)

Advanced coursework in the tools, materials, and processes used in the creation of theatrical scenery. Topics may include (but are not limited to) scenic welding, advanced rigging techniques, electronic controls, pneumatics, hydraulics, structural design for the stage, CAD, and other state-of-the-art technologies.

**FTT 40010. Visual Communication for the Stage**

(3-0-3)

*Prerequisite:* (FTT 10701 OR FTT 105) OR (FTT 20701 OR FTT 205)

Do I draw? Should I paint it? What about perspective? Model making? How can I make the director see what it's supposed to look like up there? These are some of the questions facing every person who wants to "visually communicate" for the stage. In this course, we'll be looking at the various ways and methods of how one communicates for the stage. We'll explore the various forms, rendering, model making, perspective, etc. for theatre design.

**FTT 40011. Italian Theatre Workshop**

(2-0-2)

A full-immersion language experience for the study, practice, production, and performance of authentic Italian texts. Includes analytical and writing components.

**FTT 40012. The Theatre of Tom Stoppard**

(3-0-3)

This course will provide students with insights into the theatre of Tom Stoppard and his plays between 1973 and 2001. We will read the plays *Travesties*, *Arcadia* and the trilogy *Coast of Utopia*. Students will discuss the historical, philosophical and scientific background for these plays and develop their own ideas for contemporary productions.

**FTT 40013. Romanticism and the Public Theatre**

(3-0-3)

One of the conventional stereotypes about British romanticism involves its alleged failure to produce significant public drama. With rapidly sensational special effects and animal entertainments taking center stage in cavernously huge theaters, while unperformable "closet dramas" preoccupied many of the period's leading writers, it has seemed that unstaged lyrical drama like Shelley's *Prometheus Unbound* emerged as romanticism's sole aesthetic success in dramatic form. Yet Beddoe's vision of a "haunted ruin" was triumphantly contradicted by Blackwood's championship of a teeming "dramatic genius" representative of the age's theatrical fecundity. Recent historicist scholarship, alert to the problematics of staging meaningful drama in the Romantic era, has also begun to recover the prolific richness of the period's stage life, while demonstrating the political importance, especially for women dramatists and actors, of the public theater. Our class springs from these new developments with the aim of joining the burgeoning critical effort to relocate the drama and the social life of the theater within the centers of Romantic era culture. Focal points of this enterprise will include the material history of stage performance, audience reactions, and state censorship; the flourishing of a new golden age of theatrical criticism; the relationship between so-called "closet drama" and stage plays; and the politics of gender, empire, and revolution as manifested in the public theater. Readings will address canonical figures like Wordsworth, Coleridge, Shelley, and Byron, but we will also engage with a number of lesser-known dramatists, many of them women, who achieved prominence in their time: Joanna Baillie, Elizabeth Inchbald, Charles Maturin, Ann Yearsley, Hannah More, Hannah Cowley, Felicia Hemans, and Mary Russell Mitford. Readings will further include selected theatrical criticism of Hazlitt, Coleridge, Lamb, and Hunt. We will also attend to the aesthetic structure and political significance of wildly popular pantomimes

and melodramas, with such outlandish titles as *Harlequin and Humpo*, *Timour the Tartar*, and *Jocko the Brazilian Monkey*. Students will produce a shorter essay and a longer research paper while staging Romantic era entertainments of their own. Enthusiasm for acting encouraged, but no acting experience required.

### FTT 40101. Film and Television Theory

(3-0-3)

*Prerequisite:* (FTT 30101 OR FTT 310) OR (FTT 10101 OR FTT 104) OR (FTT 20101 OR FTT 204)

*Corequisite:* FTT 41101

This course offers an introduction to the philosophical, aesthetic, cultural, and historical issues that inform current scholarship and production in film and television. The focus of the course may vary from semester to semester.

### FTT 40231. Italian Cinema: Realities of History

(3-0-3)

*Corequisite:* ROIT 41508

This course explores the construction and development of the Italian cinematic realist tradition from the silent era to the early 1970s, although its primary focus is on the period 1934–66, which stretches from the appearance of Blasetti's openly fascist "historical" reconstruction, *La Vecchia Guardia*, to Pasolini's "eccentric" exercise in Left-wing commitment, *Uccellacci E Uccellini*, with its mix of expressionist and hyper-realist techniques. At the center of this period are found some of Italy's most highly regarded films made by directors such as Vittorio De Sica, Roberto Rossellini, and Luchino Visconti, who belonged to the neorealist movement (1945–53). These filmmakers rejected escapist cinema and tried to make films that examined the contemporary experiences of ordinary Italians. As well as analyzing the films in themselves, the course examines the formal and ideological continuities and differences between neorealist films and their silent and fascist predecessors. In a similar way, it analyzes neorealism's impact on later filmmakers such as Federico Fellini, Pietro Germi, Pier Paolo Pasolini, illo Pontecorvo, Dino Risi, and Francesco Rosi, who attempted to develop new versions of cinematic realism. Finally, the course aims to locate the films in their historical and cultural contexts and to address theoretical issues arising from the concept of "realism." Taught in English. Fulfills FTT international requirements.

### FTT 40233. Italian National Cinema

(3-0-3) Welle

Examining the interaction of history and film history, this course frames the question of "national cinema" in the Italian case. Providing an overview of one of the most renowned and beloved "national" cinemas, topics to be treated include (1) "making Italians" and the beginnings of Italian cinema; (2) the golden age of Italian silent film; (3) the transition to sound; (4) Hollywood and the Italian film industry under fascism; (5) neorealism and the post-WWII period; (6) politics and popular film genres of the 1950s and 60s; (7) comedy Italian style and changing gender roles; (8) Fellini, Pasolini, Visconti, Antonioni: auteurs and the international success of Italian film in the '60s and '70s; (9) women directors of the '80s and '90s; and (10) representations of recent Italian history in contemporary cinema: terrorism and the "years of lead." Attention will also be given to the history of governmental film policies and attempts to produce a putatively "Italian national cinema," the construction of national identity in film, the interaction of writers and cinema, and an examination of the ways in which images of the "nation" are understood and received by audiences both at home and abroad. Requirements include attendance at mandatory film screenings, preparation of readings and participation in class discussions, two short interpretive papers, an oral presentation, a midterm and a final exam. The class will be conducted in English.

### FTT 40234. Film and the Latin American Imagination

(3-0-3)

*Corequisite:* ROSP 41555

This course considers the issue of Latin American identity through films from various national traditions, including Cuba, Chile, Mexico, and Brazil. Class discussions consider how shared cultural elements are represented in Latin American film and how these representations challenge assumptions about identity politics.

### FTT 40238. Film, Literature, and Irish Culture

(3-0-3)

*Corequisite:* FTT 41238

An examination of the dominant images of Ireland in film and literature, and a review of development in a wider cultural and historical context.

### FTT 40239. Brazilian Cinema and Popular Music

(3-0-3)

This course offers social, cultural, and historical perspectives on Brazil through film and popular music. Topics include the reception of *Cinema Novo* and post-*Cinema Novo* films, bossa nova, samba and Tropicalia (a movement with key manifestations in literature, cinema and popular music), and the circumstances surrounding its creation, the repressive military regime that governed Brazil from 1964 to 1985.

### FTT 40241. Hong Kong Action Cinema in a Global Context

(3-0-3)

*Prerequisites:* (FTT 10101 OR FTT 104 OR FTT 20101 OR FTT 204) AND (FTT 30101 OR FTT 310) AND (FTT 30102 OR FTT 311)

*Corequisite:* FTT 41241

This course addresses the global significance of the gong fu vague [kung fu new wave] that hit world cinema in the early 1970s and its ripple effects up to the present. As the signature genre of the Hong Kong film industry, it does not stand in global isolation but is rather a product of careful market research in developing a distinctive genre that could have global popularity outside of its traditional regionalized domestic market (HK and Southeast Asia) and its overseas ethnic Chinese enclaves in numerous Chinatowns across the world. Some of the key issues we will cover include: How does a small, non-national population sustain a commercially viable film industry? How can a film industry create a version of action cinema that supersedes Hollywood's dominance in the genre? Is this purely a "Chinese" phenomenon, or one that is inherently dependent on non-Chinese participation? Do these films have ideological, aesthetic and economic significance within a larger framework, or must they be critically dismissed outright? What does it mean that "everybody was kung fu fighting" and continuing to do so? Taught in English.

No knowledge of Mandarin or Cantonese is required. Whenever possible, we will view the films in their original language with English subtitles. A few films will be dubbed in English. Fulfills FTT international requirements.

### FTT 40242. Contemporary Korean Cinema

(3-0-3) Magnan-Park

*Prerequisite:* (FTT 30102 OR FTT 311)

*Corequisite:* FTT 41242

This course provides a historical, cultural, and aesthetic appraisal of South Korean cinema as it evolved from a Korean-centric film industry to a globally engaged film industry as evidenced by the current *hallyu* (Korea fever) phenomenon. Aspects of cultural continuity as well as cultural transformations and the forces that are involved in this dynamic cultural arena will be addressed. Some of the films under analysis will include Obaltan, *Aimless Bullet*, *Sopyonje*, *Peppermint Candy*, *Shiri*, *Bungee Jumping of Their Own*, *My Sassy Girl*, and *JSA*. No knowledge of Korean is required. Fulfills FTT international film requirement

### FTT 40410. Intermediate Film Production

(3-3-3) Donaruma

*Prerequisite:* (FTT 30410 OR FTT 361) OR (FTT 30405 OR FTT 361)

*Corequisite:* FTT 41410

This film production course will focus on 16mm black-and-white silent narrative filmmaking. We will explore the technical use and aesthetic application of the film camera and related equipment as well as the development of the short film narrative script. Students will shoot a short film lighting and composition exercise, an in-class film test, and ultimately produce, shoot, and edit one 4–6 minute, 16mm B/W film in teams of two. The projects will be edited digitally, but there will be NO effects, fades, dissolves, titles, or sound. The filmmaking process requires a lot of fieldwork on locations and transporting heavy equipment. In addition to the projects, there will be a midterm and a few papers required.

### FTT 40411. Advanced Digital Video Production

(4-0-4)

Mandell

*Prerequisite:* (FTT 30410 OR FTT 361)

A course for the advanced production student interested in the techniques and technology of the broadcast video industry, utilizing the following post-production software: Avid Media Composer, Adobe After Effects, Lightwave 3-D, and Digidesign Pro Tools. Students produce projects using BetacamSP and DV video equipment while learning the basics of nonlinear editing, digital audio sweetening, 2-D compositing, and 3-D animation techniques.

**FTT 40412. Advanced Film/Video Production: Script Development**  
(3-0-3) Godmilow

*Prerequisite:* (FTT 40410 OR FTT 448A)

*Corequisite:* FTT 40413

This production workshop encourages the development of short scripts (including casting, preproduction, and storyboarding) for fiction, nonfiction, or formal film projects by pairs of students. It stresses writing skills with an emphasis on the development of innovations that expand the existing traditions of and boundaries between fiction and nonfiction practices.

**FTT 40413. Advanced Film Production Lab**

(3-0-3) Godmilow

*Prerequisite:* (FTT 40410 OR FTT 448A)

*Corequisite:* FTT 40412

This lab course stresses advanced production and editing skills on short scripted projects developed in FTT 40412, produced collaboratively by pairs of students, utilizing 16mm color film technology. Film and projects are mixed and on-lined on digital video. Lab fee required.

**FTT 40430. Postmodern Narrative**

(3-0-3) Collins

*Prerequisite:* FTT 30101

In this course, we will begin by focusing on the emergence of post-modernism in the '60s and then trace its evolution through the '90s. Initially, our primary concern will be the conflicted conceptualization of the term; i.e., just what did postmodern mean in terms of a narrative practice and in terms of a "cultural condition"? Once we have established some operating definitions and become familiar with some of the narratives that were first called postmodern (Pynchon's *Crying of Lot 49*, Scott's *Blade Runner*, etc.), we will begin to discuss the novels and films that became synonymous with postmodern textuality in the eighties (Rushdie's *Midnight's Children*, Barnes's *A History of the World in 10-1/2 Chapters*, Winterson's *Sexing the Cherry*, Auster's *Moon Palace*, etc.). In the last third of the course, we will turn to more recent narratives that expand our understanding of the term, particularly in regard to the increasingly complicated relationships between literary, film, and television cultures (Ondaatje's *The English Patient*, Tarantino's *Pulp Fiction*, Wallace's *The Girl With Curious Hair*, Amis's *The Information*). In addition to these titles, there will be a substantial course packet that will include relevant theoretical material.

**FTT 40431. Sex and Gender in Cinema**

(3-0-3)

*Prerequisite:* (FTT 10101 OR FTT 104) OR (FTT 20101 OR FTT 204)

*Corequisite:* FTT 41431

This course analyzes representations of and theories about sex and gender in cinema. Students will read major texts in feminist theory, queer theory, and masculinity studies in order to become familiar with important concepts and debates within the field. Topics covered will include "the male gaze," spectatorship, performance and stardom, camp, "reading against the grain," consumption, gender and genre, race and gender, masquerade, authorship, and masculinity "in crisis." Students will view classical Hollywood films, silent films, and avant-garde films and videos.

**FTT 40432. Topics: Sound Design**

(3-0-3)

*Prerequisite:* (FTT 10101 OR FTT 104) OR (FTT 20101 OR FTT 204)

*Corequisite:* FTT 41432

"Sound design" did not enter the lexicon of Hollywood production until the 1970s. Nevertheless, the concept is useful for tracing the history of the relation of sound and images in cinema from its earliest days. The range of this course will cover the function of musical accompaniment in the "silent" film, focus on the 1926-31 transition period, and end with an examination of the development of new acoustic technologies and concepts such as Dolby and THX. The course is appropriate for students who are interested in film sound and music as historical and critical subjects, and for those who plan to use sound in producing films and videos.

**FTT 40433. Cinema Ideologies**

(3-0-3) Godmilow

*Prerequisite:* (FTT 10101 OR FTT 104) OR (FTT 20101 OR FTT 204)

*Corequisite:* FTT 41433

Cinema, both in fiction and nonfiction forms, is one of the major contributing forces to the construction of ourselves and our perception of "others" in terms of class, gender, race, and sexual preference. This course will dissect these constructions in films like *Hoop Dreams*, *Schindler's List*, *Philadelphia*, *The Killing Fields*, and *Dancing With Wolves* through a close-reading practice.

**FTT 40437. Advanced Topics in Media Theory, History, and Research**

(3-0-3)

*Prerequisite:* (FTT 30101 OR FTT 310)

An advanced investigation of selected topics concerning media or cultural studies.

**FTT 40439. Cultures of Fear/Horror Film**

(3-0-3)

This course will examine the construction and application of central themes in the scope of international horror cinema and how they reveal salient aspects of cultural similarities and differences including gender, sexuality, violence, and socio-political climates.

**FTT 40442. The Horror Film: Theories and Histories**

(3-0-3)

*Prerequisite:* (FTT 10101 OR FTT 104 OR FTT 20101 OR FTT 204)

*Corequisite:* FTT 41442

This seminar examines one of the most enduring and popular movie genres: the horror film. We will consider the genre from a historical perspective, tracking how it has evolved over time and across movements (examples: silent-era German expressionism, Hollywood's classic monster movies of the 1930s, the nuclear anxiety pictures of the '50s, the slasher films of the '80s, and contemporary Japanese horror cinema). In addition to the social, political, and industrial factors that have influenced horror's development, we will also examine several influential (and competing) theories that attempt to explain horror's seemingly paradoxical appeal.

**FTT 40443. Walt Disney in Film and Culture**

(3-0-3) Ohmer

*Prerequisites:* (FTT 10101 OR FTT 20101) AND (FTT 30101 OR FTT 30102 OR FTT 30461)

*Corequisite:* FTT 41443

The name Disney has achieved nearly mythic status in US and international film and culture. For many, the name evokes treasured childhood memories of watching *The Lion King* or *The Little Mermaid* or of discovering Mickey Mouse and Donald Duck for the first time. Among film scholars, Disney cartoons stand as some of the finest examples of carefully crafted, naturalistic, character-centered animation. For business majors and professionals, the Walt Disney Company has come to symbolize a modern, competitive corporation that seeks to leverage its stories and characters across a variety of media platforms in a global marketplace. While many love Disney films, and see Walt Disney as an American icon, his popularity and "American-ness" have sparked controversy in other countries and in various historical periods. This class examines Walt Disney, Disney films, and the Disney Company from a variety of perspectives that will help us understand both Disney's enduring popularity and the kinds of suspicions its worked has raised. Our readings will draw from biographies of Walt Disney; histories of the Disney studio and of the animation industry in general; critical analyses of the films; and

cultural studies of Disney merchandising, theme parks, and theatrical productions. Screenings will include the classic films of the studio era, such as *Snow White and the Seven Dwarfs*, *Pinocchio*, *Dumbo*, *Cinderella*, and *Peter Pan*, as well as more recent works such as *Mary Poppins*, *Aladdin*, and *Beauty and the Beast*.

**FTT 40490. Media Ethics**  
(3-0-3)

This course will examine the journalistic and ethical challenges that newsroom managers face, as well as the issues that reporters in the field must tackle on a daily basis. Roughly half of the course will deal with case studies of ethical dilemmas and the other half will involve students in making choices for the front of the mythical newspaper. Although there will be readings from books on the topics, students will be expected to read *The New York Times*, *The South Bend Tribune*, and *The Observer* on a regular basis, especially on the class days when the front-page decisions will be made. The stories in those newspapers will provide the basis for those decisions. We will also consider how television deals with news on local and network levels.

**FTT 40492. Media Stardom and Celebrity Culture**  
(3-0-3) Becker

*Corequisite:* FTT 41492

Much of America's contemporary popular culture, movies, TV, music, even sports, revolve around stars, and yet few of us understand the implications of, or even the reasons for, our society's fascination with fame and celebrity. This course interrogates the cultural phenomenon of stardom from a variety of historical and theoretical perspectives. Across the semester, we will explore how stardom developed as a concept across the 20th century, learn how to "read" star images, look at the development of the Hollywood star system, consider what the popularity of certain film stars might tell us about the issues of social identity, examine stardom as a global phenomenon, and question why celebrity is such an obsession today. Overall, our goal will be to develop tools for investigating the cultural significance of stardom and to use those tools to uncover what stardom and celebrity reveal about both our society and ourselves.

**FTT 40493. Media Industries: History, Structure, Current Issues**  
(3-0-3)

*Prerequisites:* (FTT 10101 OR FTT 104 OR FTT 20101 OR FTT 204) AND (FTT 30101 OR FTT 310 OR FTT 30102 OR FTT 311 OR FTT 30461 OR FTT 301)

*Corequisite:* FTT 41493

This class is designed for students planning to seek jobs in film and television companies and for those wanting a better understanding of how the media industry has taken the shape it has today. We will explore the histories of particular companies and broader changes in the structure of the media industry as a whole in the last century. Some of the topics to be considered include the impact on projects and performers of multimedia conglomerates such as GE/NBC/Universal and Disney/ABC/ESPN; the effects of recent mergers between Disney and Pixar and the WB and UPN; the increasing globalization of media companies such as News Corp./Fox; and the trend towards media convergence, as evidenced by AOL Time Warner and Sony. Readings and discussions will familiarize students with concepts from historiography and political economy.

**FTT 40494. Gender and Space**  
(3-0-3) Wojcik

This course will explore a range of materials—films, novels, theoretical texts, architectural plans, histories, philosophical texts—to survey their various gendered meanings attached to space in the 20th century. We will examine spaces both public and private (the department store, the cinema, the street, the apartment, the country home, etc.) as traversed and inhabited by a variety of 20th-century figures (the *flâneur*, the New Woman, the shop girl, the sapphist, the suffragist, the single girl, etc.).

**FTT 40600. Shakespeare and Film**  
(3-0-3) Holland

*Corequisite:* FTT 41600

Advanced study in the areas of theatre history, dramatic literature, criticism, and theory. Topics are taught in a seminar format. May be repeated for credit.

**FTT 40630. Topics: Film/History/Controversy**  
(3-0-3)

*Prerequisite:* (FTT 10101 OR FTT 104) OR (FTT 20101 OR FTT 204)

*Corequisite:* FTT 41432

From the earliest days of feature films, filmmakers have drawn on historical topics to tell enticing stories. At the same time, historical films have always drawn controversy from those who wish to correct the version of events portrayed. What is it about filmmaking that encourages such dramatization of historical events, and why do films often cause controversy when historical fiction novels rarely do? Does historical accuracy matter in film, and why? In this class, we will examine a number of films with historical subjects with the aim of understanding how films "make" history and why these films have such an effect on public debate. We will also be studying a number of the films of director Oliver Stone, who has repeatedly drawn criticism for his historical films, and entered into debates with academic historians. This will be a seminar-style class dependent on discussion and debate. Students should ensure they are able to attend the class screenings, as library video copies of films may be insufficient for proper study.

**FTT 40702. Audition Seminar**  
(3-0-3) Scott

*Corequisite:* FTT 41702

Preparation for advanced study of acting. A course of study for the semester is developed between the student and a faculty advisor or advisors (selected on the basis of goals established at the beginning of the course). Students who will be taking this course should consult with the instructor during the spring preregistration period in order to preliminarily discuss future goals.

**FTT 40900. History of Theatre Before 1700**  
(3-0-3)

A rigorous survey of the development of theatre as an art form from the recorded beginnings in fifth-century B.C. Athens to the end of the 17th century, including the physical theatre, dramatic literature, production practices, cultural contexts, and theoretical foundations.

**FTT 40901. History of Theatre since 1700**  
(3-0-3)

A rigorous survey of the development of theatre as an art form from the recorded beginnings in fifth-century BC Athens to the end of the 17th century, including the physical theatre, dramatic literature, production practices, cultural contexts, and theoretical foundations.

**FTT 40902. Dramatic Literature before 1900**  
(3-0-3)

An advanced survey of theatrical literature and criticism before the beginning of the 20th century. Students will read one to two plays per week along with selected secondary critical literature.

**FTT 40905. Modern and Contemporary British Drama**  
(3-0-3) Bruns

A course devoted to the major British and Irish playwrights of the second half of the 20th century.

**FTT 40906. Contemporary Irish Drama**  
(3-0-3)

A close analysis of the dramatic literature produced by Irish playwrights during the latter half of the 20th century.

**FTT 41000. French Theatre Production**  
(2-0-2)

Students transform into actors of the Illustre Theatre de l'Universite de Notre Dame du Lac in a creative collaboration that has come to be known as the French play. We rehearse during the fall semester, and perform the play in late January.

Students from all levels are encouraged to audition; theatrical experience is not expected.

**FTT 41001. Advanced Scene Study**

(3-0-3)

This course will be an in-depth look at the acting process through a workshop study of monologues and scenes from the masters of modern theatre. The course begins with the plays of Chekhov and works through the 20th century to contemporary times.

**FTT 41002. Advanced Acting Techniques**

(3-0-3)

*Prerequisite:* (FTT 21001 OR FTT 221) OR (FTT 31001 OR FTT 322)

A course intended for the serious acting student, this advanced course uses method techniques in scene study and monologue work to hone the skills acquired in Character and Advanced Scene Study. Students will be responsible for finding, rehearsing, and performing texts from several genres. Class work will focus on impulse and response, creating realistic characters, and partner work. Rehearsals outside of class are mandatory.

**FTT 41003. Advanced Film/Video Script Development**

(3-0-3)

This class will introduce students to “Viewpoints,” the movement-based acting training system developed by Anne Bogart. Viewpoints training helps to raise an actor’s awareness of his or her body as a tool in creating theatrical meaning through its relationship to, and use of, space, architecture, rhythm, tempo, gesture, shape, and kinesthetic response. During the semester we will do a series of exercises in which actors will create their own non-script based theatre by exploiting the expression inherent in movement and relationship. Viewpoints training is a stimulating, exciting, and innovative method for expanding the actor’s range and ability. Students must wear clothing and shoes that allow for a full range of movement.

**FTT 41004. Advanced Theatre Production Workshop**

(3-0-3)

A workshop course in the process of theatre production, in which students learn to do a dramaturgical analysis of a play for production as well as assume a major production responsibility including, but not limited to, that of performer, stage manager, assistant stage manager, prop master, costumer, technical director, and assistant director.

**FTT 41005. Acting Shakespeare**

(0-3-3)

*Prerequisites:* FTT 21001 AND (FTT 31001 OR FTT 31002 OR FTT 31012 OR FTT 31013 OR FTT 41001 OR FTT 41002)

This course looks at Shakespeare’s texts from the actor’s perspective. Various techniques for unlocking meaning and emotional content will be introduced. Students will learn to analyze and perform the text through scene work and monologues. The class structure allows each student to create several different roles that will be performed at the end of the semester.

**FTT 41008. Theatre and Social Activism**

(3-0-3)

In this course, we will explore the potential of theatre as social activism and as a vehicle for social change. The course will involve two modes of study (1) investigation of a variety of techniques and approaches to creating activist, “grassroots” theatre (e.g., looking at work by artist/activists like Augusto Boal (“Theatre of the Oppressed”), Bread and Puppet Theatre, ACT/UP, etc.); and (2) creation of original theatre pieces addressing social concerns in the local community (for example, students might focus on creating theatre centered on local environmental issues, the living wage campaign, the Michiana Peace Coalition, etc). The class will culminate in public performances of our own “activist theatre,” with the aim of making an impact and effecting change through the performing arts.

**FTT 41101. Film and Television Theory Lab**

(0-0-0)

*Corequisite:* FTT 40101

During the lab times, certain films will be viewed for further discussion in class.

**FTT 41238. Irish Film and Culture Lab**

(0-0-0)

*Corequisite:* FTT 40238

Certain films will be viewed for further discussion in class.

**FTT 41241. Hong Kong Action Cinema in a Global Context Lab**

(0-0-0)

*Corequisite:* FTT 40241

Certain films will be viewed for further discussion in class.

**FTT 41242. Contemporary Korean Cinema Lab**

(0-0-0)

*Corequisite:* FTT 40242

Certain films will be viewed for further discussion in class.

**FTT 41410. Intermediate Film Production Lab**

(0-3-3)

*Corequisite:* FTT 40410

This film production course will focus on 16mm black-and-white silent narrative filmmaking. We will explore the technical use and aesthetic application of the film camera and related equipment as well as the development of the short film narrative script. Students will shoot a short film lighting and composition exercise, an in-class film test, and ultimately produce, shoot, and edit one 4–6 minute, 16mm B/W film in teams of two. The projects will be edited entirely on film. The filmmaking process requires a lot of fieldwork on locations and transporting heavy equipment. In addition to the projects there will be a midterm and a few papers required.

**FTT 41431. Sex and Gender in Cinema Lab**

(0-0-0)

*Corequisite:* FTT 40431

During the lab times, certain films will be viewed for further discussion in class.

**FTT 41432. Topics: Sound Design Lab**

(0-0-0)

*Corequisite:* FTT 40630

During the lab times, certain films will be viewed for further discussion in class.

**FTT 41433. Cinema Ideologies Lab**

(0-0-0)

*Corequisite:* FTT 40433

During the lab times, certain films will be viewed for further discussion in class.

**FTT 41442. The Horror Film: Theories and Histories Lab**

(0-0-0)

*Corequisite:* FTT 40442

Certain films will be viewed for further discussion in class.

**FTT 41443. Disney in Film and Culture Lab**

(0-0-0)

*Corequisite:* FTT 40443

Certain films will be viewed for further discussion in class.

**FTT 41492. Media Stardom and Celebrity Culture Lab**

(0-0-0)

*Corequisite:* FTT 40492

Certain presentations will be viewed for further discussion in class.

**FTT 41493. Media Industries: History, Structure, Current Issues Lab**

(0-0-0)

*Corequisite:* FTT 40493

Presentations will be viewed for further discussion in class.

**FTT 41600. Shakespeare and Film Lab**

(0-0-0)

During the lab times, certain films will be viewed for further discussion in class.

**FTT 41601. Issues in Film and Media Lab**

(0-0-0)

*Corequisite:* FTT 43601

Lab attendance at screenings is required.

**FTT 41602. Honors Seminar: Hitchcock Lab**

(0-0-0)

*Corequisite:* FTT 43602

Certain films will be viewed for further discussion in class.

**FTT 41603. Honors Seminar: Shakespeare Lab**

(0-0-0)

*Corequisite:* FTT 43603

The lab will not be used every week, but will be available for screenings of Shakespeare films.

**FTT 41702. Audition Seminar Lab**

(0-0-0)

*Corequisite:* FTT 40702

Preparation for advanced study of acting. A course of study for the semester is developed between the student and a faculty advisor or advisors (selected on the basis of goals established at the beginning of the course). Students who will be taking this course should consult with the instructor during the spring preregistration period in order to preliminarily discuss future goals.

**FTT 43601. Issues in Film and Media**

(3-0-3) Collins

*Prerequisite:* (FTT 30101 OR FTT 310) OR (FTT 30102 OR FTT 311)

*Corequisite:* FTT 41601

The purpose of this capstone course is to provide students concentrating in film and media with a senior seminar in which they may participate in some of the current critical debates in advanced film, television, and new media studies through class discussion and in individual projects. The topics vary each semester, but might include the role of government control of and social influence on the media, the effects of new global markets, concerns about representing race and gender, and new critical and aesthetic approaches. The course will be formatted as the kind of seminar that one might encounter in a graduate program, with students sitting around a table giving oral presentations based on readings and screenings. The class will meet in one 150-minute session, with a short, midsession break. There will be guest faculty visiting the class. Each student will write a 15- to 20-page term paper that will be developed over the semester in close consultation with the instructor. Lab attendance at screenings is required.

**FTT 43602. Honors Seminar: Hitchcock**

(3-0-3) Wojcik

*Corequisite:* FTT 41602

This course aims to teach honors students research methods, project development, and advanced writing techniques through an examination of Alfred Hitchcock. Students will see numerous Hitchcock films and TV shows, and read and research extensively in the literature on Hitchcock. Students will consider different approaches to Hitchcock, including auteurist, generic, feminist, psychoanalytic, and queer methodologies. Students will also consider the work of Hitchcock collaborators, including James Stewart, Cary Grant, and Bernard Hermann. By invitation only.

**FTT 43603. Honors Seminar: Shakespeare**

(3-0-3) Holland

*Corequisite:* FTT 41603

This course aims to teach honors students research methods, project development and advanced writing techniques through an examination of Shakespeare, primarily, though not necessarily exclusively, in relation to performance. Students will research performances past, visit theatre productions/see films present, imagine

performances future. They will read and research extensively in the materials of Shakespeare performance and its critical literature. Students will consider different approaches to Shakespeare performance, including bibliographical, historical, nationalist, generic, feminist, and queer methodologies. Students will also consider the forms of representation of performance in Shakespeare editing and the work of selected actors, directors and designers. The lab will not be used every week, but will be available for screenings of Shakespeare films.

**FTT 45001. Theatre Internship**

(V-0-V)

Placement of advanced students with professional or community theatre organizations. Students may take no more than two 45001 internships for a total of no more than six credit hours.

**FTT 45501. Media Internship**

(V-0-V)

Students who successfully complete at least two of the following courses, FTT 30410, FTT 30462, or FTT 30463, may be eligible for an internship at a television station or network, radio station, video production company, film production company or similar media outlet. Interns must work 10–15 hours per week and compile 150 work hours by the end of the semester (120 hours for the summer session) to obtain three credits. Interns will complete a project, midsemester progress report, and a final evaluation paper.

**FTT 46600. Thesis/Undergraduate Research**

(V-0-V)

Research for the advanced student. Taken S/U only.

**FTT 47001. Practicum**

(V-0-V)

Individual practical projects for the advanced student. May be repeated up to six hours of credit. Taken S/U only.

**FTT 47600. Special Studies: Film Society**

(V-0-V)

This is a film screening-and-discussion group that meets once a week in the Browning Cinema to watch an independent, foreign, or classic film. Students may take the course for either zero credit or one credit. Those taking it for one credit will have a minimum attendance and writing requirement. The meeting times and requirements may vary from semester to semester. Contact the sponsoring professor for more information.

**FTT 47601. Special Studies**

(V-0-V)

Research for the advanced student.

**FTT 47603. Special Studies**

(V-0-V)

Research for the advanced student. This is a summer course. By permission of the sponsoring professor. This is a summer course.

**FTT 50300. Directed Readings: Postmodern Narrative/Film**

(3-0-3)

In this course, we will begin by focusing on the emergence of post-modernism in the '60s and then trace its evolution through the '90s. Initially, our primary concern will be the conflicted conceptualization of the term; i.e., just what did postmodern mean in terms of a narrative practice and in terms of a "cultural condition"? Once we have established some operating definitions and become familiar with some of the narratives that were first called postmodern (Pynchon's *Crying of Lot 49*, Scott's *Blade Runner*, etc.), we will begin to discuss the novels and films that became synonymous with postmodern textuality in the '80s (Rushdie's *Midnight's Children*, Barnes's *A History of the World in 10-1/2 Chapters*, Winterson's *Sexing the Cherry*, Auster's *Moon Palace*, etc.). In the last third of the course, we will turn to more recent narratives that expand our understanding of the term, particularly in regard to the increasingly complicated relationships between literary, film, and television cultures (Ondaatje's *The English Patient*, Tarantino's *Pulp*

*Fiction*, Wallace's *The Girl With Curious Hair*, Amis's *The Information*). In addition to these titles, there will be a substantial course packet that will include relevant theoretical material. By permission of professor only

#### **FTT 50404. Introduction to Film and Video Production**

(4-0-4)

An introductory course in the fundamentals of shooting, editing, and writing for film and video productions. This is a hands-on production course emphasizing aesthetics, creativity, and technical expertise. The course requires significant amounts of shooting and editing outside class. Students produce short video projects using digital video and Super 8mm film cameras and edit digitally on computer workstations. The principles of three-camera studio production are also covered.

#### **FTT 50530. Contemporary Hollywood**

(3-0-3) Collins

This course concentrates on the most important developments in American cinema and culture since the 1960s. Beginning with the collapse of the classic studio system at the end of the 1950s, this course explores the profound changes that the film industry has undergone over the decades, and investigates the major aesthetic developments that occurred in film and other media during the same period—pop art, metafiction, and postmodernism.

#### **FTT 50591. Entertainment and Arts Law**

(3-0-3) Wilson

Those in various positions in the arts and entertainment communities encounter a wide range of legal issues. Students will be introduced to the basic concepts of contract, copyright, and First Amendment issues. In addition, students will examine the concepts of rights of publicity and privacy, story ideas, receipt of credit, and trademarks. Students are also exposed to the inner workings of the film, television, theatre, music, and publishing industries. It is assumed the students have no prior experience in the study of law. (Summers only.)

#### **FTT 56602. Thesis Direction**

(V-0-V)

Permission required.

#### **FTT 57601. Special Studies**

(V-0-V)

Special projects for the advanced student.

## **Department of Gender Studies**

### **GSC 10001. Introduction to Gender Studies**

(3-0-3) Guthrie

This course is intended to give students a familiarity with the development, context, and major issues of gender studies. Our sex has been described as the first and most formative aspect of our identity—from the moment we are born, we are categorized as either a girl or a boy. But while sex is determined (not always clearly) by our biological characteristics, the lived experience “gender” is influenced by many more factors. The complexity of what “gender” is and how it affects us is what we will study in class. What does it mean to be a “girl” or a “boy”? How does one experience differ from the other? What about individuals who do not feel comfortable in their sex category? Gender is a complex and contested aspect of human life at which cultural norms, individual experience, nature, nurture, biology, desire and power all intersect. In class, we will identify and analyze our own assumptions about what gender means while moving toward a thorough knowledge of how “gender” has been understood, performed, and deployed in history. We will be examining literature, political theory, film, visual art, critical theory, and history to understand why “gender studies” is a useful field of knowledge, and what gender means to ourselves and to those around us.

### **GSC 10002. Introduction to Feminist and Gender Theory**

(2.5-0-3) Duttonhaver

Intended as a broad survey of feminist and gender theory, this course is designed not only for gender Studies concentrators, but also for anyone who is interested in exploring the ways in which the categories of gender and sex influence and shape nearly every facet of human existence. Theorizing about gender lends itself naturally to practical application in everyday life and to an interdisciplinary approach that both employs and calls into question methods, perspectives, and critical tools from a variety of fields in the humanities, social sciences, and natural sciences. In this course, you will examine topics ranging from *Buffy the Vampire Slayer* to feminist epistemology, from gender's intersections with race and sexuality to gender's intersections with religion and politics, and from the “Mommy Wars” and “lifestyle feminism” to pivotal debates about essentialism and constructivism. By the end of the class, you should have assembled a methodological “tool kit” that will enable you to apply a critical, “gendered” perspective in venues, both inside and outside academic life.

### **GSC 20001. Introduction to Gender Studies**

(3-0-3) Guthrie

This course is intended to give students a familiarity with the development, context, and major issues of gender studies. Our sex has been described as the first and most formative aspect of our identity—from the moment we are born, we are categorized as either a girl or a boy. But while sex is determined (not always clearly) by our biological characteristics, the lived experience “gender” is influenced by many more factors. The complexity of what gender is and how it affects us is what we will study in class. What does it mean to be a “girl” or a “boy”? How does one experience differ from the other? We will be examining literature, political theory, film, visual art, critical theory and history to understand why “Gender Studies” is a useful field of knowledge, and what gender means to ourselves and to those around us.

### **GSC 20002. Introduction to Feminist and Gender Theory**

(2.5-0-3) Duttonhaver

Intended as a broad survey of feminist and gender theory, this course is designed not only for gender studies concentrators, but also for anyone who is interested in exploring the ways in which the categories of gender and sex influence and shape nearly every facet of human existence. Theorizing about gender lends itself naturally to practical application in everyday life and to an interdisciplinary approach that both employs and calls into question methods, perspectives, and critical tools from a variety of fields in the humanities, social sciences, and natural

sciences. In this course, you will examine topics ranging from *Buffy the Vampire Slayer* to feminist epistemology, from gender's intersections with race and sexuality to gender's intersections with religion and politics, and from the "Mommy Wars" and "lifestyle feminism" to pivotal debates about essentialism and constructivism. By the end of the class, you should have assembled a methodological "tool kit" that will enable you to apply a critical, 'gendered' perspective in venues both inside and outside academic life.

### **GSC 20100. Gendering Christianity**

(3-0-3)

*Corequisite:* GSC 27999

This course is an introduction to feminist approaches to spiritual and philosophical traditions in the Christian West. Beginning from the pastoral and practical issues raised by gender assignments in the context of religious experience, it addresses major topics of theological thinking (such as sin, salvation, images of God, and Christology) relating historical development and contemporary feminist re-readings. The approach is both critical (i.e., analytical) and constructive; the primary focus is on Christian and post-Christian theological and literary texts, but some attention is given to other religious perspectives.

### **GSC 20102. Theories of Sexual Difference**

(3-0-3)

*Corequisite:* GSC 27999

An examination of the following questions: What kinds of differences separate men and women? Are these differences natural, or are they socially produced; and are these differences beneficial to us, or are they limiting? What does equality mean for people characterized by such differences?

### **GSC 20103. Twentieth-Century American Feminist Fiction**

(3-0-3)

Close readings of major 20th-century novels, written by both men and women, which may be accurately described as "feminist."

### **GSC 20104. Gender and the Nineteenth-Century British Novel**

(3-0-3)

*Corequisite:* GSC 27999

How gender and gender relations in 19th-century Britain are explored and revealed in selected novels of the period.

### **GSC 20106. Gender, Sexuality in Pop Media**

(3-0-3) Banga

*Corequisite:* GSC 27999

This course focuses on predetermined gendered roles and sexuality in our culture as represented in popular media. Special emphasis will be placed on film, as we look at, among other things, issues of sexuality and homosexuality on the silver screen. We will also look closely at music, the emergence of a female presence, music videos, and hip-hop culture.

### **GSC 20175. Some Other Mess: The Role of Black Outsiders in the African Diaspora**

(3-0-3) Page

*Corequisite:* GSC 27999

They go by many names: bohos, artists, radicals, intellectuals, TRAs, mixies, and punks. They are members of the African Diaspora who defy the stereotypical construction of Black people that the media and a history of marginalization by the "mainstream" culture have created. People who look like them and with whom they share the same politicized racial identity often ostracize them. Are these individuals dangerous outsiders, who by eschewing the communal traditions that led to the securing of civil rights for a united African American population are imperiling black identity with a quest for individual freedom? Or, are they renegades whose explorations outside of accepted constructions of black identity challenge entrenched ideas of race, class, sexuality, and gender, not only for African Americans, but for everyone living in a postmodern, multicultural world? Are they part of a long and illustrious history of identity exploration by African Americans who helped to shape and change American culture? These are some of the questions we will explore in this course. It is an investigation into the lives,

work, and legacies of members of the African diaspora who are clearly into "some other mess," that is, those who insist on doing their own thing in a world that still takes issue with individual freedom of expression for some marginalized peoples. The assertion of the right to individual expression raises questions that are at the heart of the American ideal of integration and the African American construct of community. By critically engaging the works of artists like Jean-Michel Basquiat, writings by generations of cultural critics, the stories of adoptees and multiracial African Americans, the music of progressive musicians, scholarship by black feminists of both genders, and the media representations of African Americans in the postwar United States, we will begin to understand the role of people of African descent in America as outsiders, both communally and individually.

### **GSC 20176. Gender, Race, Class, Sexuality**

(3-0-3)

Owing to its reputation as the most "transcendent" and "autonomous" of all the arts, music has long been deemed "exempt" from the kinds of ideological critique applied to other modes of cultural production. In recent years, however, critics have begun to challenge the notion of autonomy in music and have attempted to demonstrate the inevitably ideological nature of all music, whether texted or not. This course adopts a cultural studies approach, focused on issues of gender, race, class, and sexuality, to the study of a wide range of both classical and popular musics, from pastourelles of the Middle Ages to music videos of Madonna, with special attention to Mozart's *Don Giovanni* and Bizet's *Carmen*. Students will learn how to listen and recognize common, signifying practices adopted by composers and musicians—e.g., specific uses of melody, rhythm, meter, tempi, harmonic scales and chord progressions, dynamics, and instrumentation—and to explore critical modes of interpreting those particular musical choices within specific ideological frameworks. Intended for non-majors; no formal prerequisites. Recommended University elective.

### **GSC 20177. American Men, American Women**

(3-0-3) Ardizzone

*Corequisite:* GSC 27999

What does it mean to be male or female in America? How different are our ideas about gender from those of other cultures? This course will focus on the 20th century and look at the origins and development of masculine and feminine roles in the United States. How much have they changed over time, and what aspects have been retained? We will explore the ways that cultural images, political changes, and economic needs have shaped the definition of acceptable behavior and life choices based on gender. Topics will range from Victorian ideals through the Jazz Age and war literature to movie Westerns, '50s television families, and '60s youth culture; and into recent shifts with women's rights, extreme sports, and talk shows.

### **GSC 20179. Tropical Heat Waves: Contemporary Latino/a and Caribbean Literature**

(3-0-3)

A review of selected contemporary Latino/a and Caribbean novels.

### **GSC 20221. Gender Roles and Violence in Society**

(3-0-3) Sobolewski

*Corequisite:* GSC 27999

This sociology course will examine gender roles and violence in society.

### **GSC 20222. Social Theory and New Feminism**

(3-0-3)

The course will be devoted to analyzing and juxtaposing some early European social thinkers with the writings and postulates of the so-called new Catholic feminism. We will examine some chosen texts of Ferdinand Toennies, Georg Simmel, and Edith Stein, where they analyzed the questions of the particular role of women in society and culture, and we will delve into the roots of the Catholic new feminism inspired by John Paul II. (Provided such is the choice of the students, we can also look into this writings from times before he became Pope to analyze his ideas about the relations of the sexes). Moreover, some contemporary Polish new feminist figures and their thought (e.g., Elzbieta Adamiak), together with the writings of Janne H. Matlary, from Norway, will be introduced and examined. Finally, the American new feminists' texts will be introduced. The

course will create an opportunity to analyze the European thought in the context of the American experience that students bring to the class.

**GSC 20254. Gender by the Gaslight: The Detective in Film and Fiction**

(2.5-0-3) Molitor

*Corequisite:* GSC 27999

From sensational Victorian stories to contemporary police procedurals, from Sherlock Holmes to Nancy Drew—the detective remains a cultural icon. This course investigates the gender dynamics at the heart of crime puzzles and the masterminds who solve them. Students will write two short essays and one term paper.

**GSC 20260. American Catholic Experience**

(3-0-3)

*Corequisite:* HIST 22612

A survey of the history of Roman Catholicism in the United States from colonial times to the present, with emphasis on the 20th-century experience. The first half of the course covers the Catholic missions and settlements in the New World, Republican-era Catholicism's experiment with democracy, and the immigrant church from 1820 to 1950. The second half of the course focuses on the preparations for, and impact of, the Second Vatican Council (1962–65). Assigned reading includes a packet of articles and primary sources about the liturgical renewal, Catholic action, social justice movements, and other preconciliar developments.

**GSC 20262. Empire and “The Woman Question”**

(3-0-3)

A review of 19th-century British women's literature, with an emphasis on the growth of women's travel writing and other ways that empire and issues of women's rights intersect.

**GSC 20425. Islamic Societies of the Middle East and North Africa: Religion, History, and Culture**

(3-0-3)

This course is an introductory survey of the Islamic societies of the Middle East and North Africa, from their origins to the present day. It will deal with the history and expansion of Islam, both as a world religion and civilization, from its birth in the Arabian Peninsula in the seventh century to its subsequent spread to other parts of western Asia and North Africa. Issues of religious and social ethics, political governance, gender, social relations, and cultural practices will be explored in relation to a number of Muslim societies in the region, such as in Egypt, Morocco, and Iran. The course foregrounds the diversity and complexities present in a critical area of what we call the Islamic world today.

**GSC 20426. Introduction to Cultural Studies**

(3-0-3)

An introduction to cultural studies using a variety of media: literature, film, and music.

**GSC 20427. Moral Problems**

(2.5-0-3) Sterba

*Corequisite:* GSC 27999

In this course, we will critically evaluate alternative solutions to a number of contemporary moral problems. We will begin with the problems of the distribution of income and wealth and our obligations to distant peoples and future generations. We will then turn to the problem of sexual equality and to a particular challenge to feminism, which maintains that men, themselves, suffer from a “second sexism” that benefits women. Finally, we will take up the problem of affirmative action and examine the legal and moral issues raised by affirmative action as it again makes its way to a decision before US Supreme Court.

**GSC 20449. Women in the Americas**

(2.5-0-3) Delgadillo

*Corequisite:* GSC 27999

This introductory course focuses on texts by women of color in the Americas whose writing and filmmaking calls attention to the intersections among gender,

race, nation, class, and sexuality. We will read fiction, poetry, oral histories, and personal essays, and view films that address situations of intercultural contact, exchange, exploitation, and transformation, as well as the legacies of conquest, colonialism, and slavery. We will look at both what these women have to say about feminisms, religion and spirituality, gender roles, globalization, leadership, and cultural change, and how they say it. A number of our readings are by or about women either involved in movements for social change or caught in a historic moment of change. In this course, students will explore the traditions and innovations of each of the many genres we explore. Our reading will include work by Sor Juana Ines de la Cruz, Patricia Preciado Martin, Rosa Parks, Rigoberta Menchu, Hisaye Yamamoto, Rita Dove, Demetria Martinez, Jamaica Kincaid, and Maxine Hong Kingston. Requirements include three short papers, work on a collaborative group project, participation in class discussion and debate, and one exam.

**GSC 20466. Marriage and the Family**

(3-0-3) Thomas

*Corequisite:* GSC 27999

Changing family patterns, sex roles, sexuality, premarital relationships, marriage and divorce, parenthood, childhood, and family interaction are some of the topics. Singles, dual-career families, alternative marriage forms, and the future of marriage and family are also taken up.

**GSC 27999. Gender Studies Gateway Course**

(0-0-0)

This course is used as a corequisite for administrative purposes so that students in the gender studies program will be able to web-register for other GSC courses.

**GSC 30113. Women and American Catholicism**

(3-0-3)

This course is a survey of the history of American Catholic women from the colonial period to the present. Through a combination of lectures, reading, and discussion, we will explore the following themes and topics: the role of religious belief and practice in shaping Catholics' understanding of gender differences; the experience of women in religious communities and in family life; women's involvement in education and social reform; ethnic and racial diversity among Catholic women; devotional life; the development of feminist theology, and the emergence of the “new feminism” as articulated by Pope John Paul II. We will seek to understand how Catholic women, both lay and religious, contributed to the development of Church and nation, and examine how encounters with the broader American society have shaped Catholic women's relationship to the institutional church over the last three centuries.

**GSC 30118. Nineteenth-Century European Painting**

(3-0-3)

This survey of 19th-century painting treats the major figures of the period within the context of the social, political, and intellectual ferment that shaped the culture—primarily, the numerous political revolutions and the rise of industrial capitalism and the middle class in France, England, and Germany. Among the artistic movements discussed are neoclassicism, romanticism, realism, pre-Raphaelitism, impressionism, and symbolism. Some of the major themes addressed are the relationships between tradition and innovation, between the artist and public, and between gender and representation, as well as the multiple meanings of “modern” and “modernism.” The class will visit the Snite Museum of Art on occasion to discuss special exhibitions related to topics in the course.

**GSC 30183. Men, Women, and Work in American History**

(3-0-3)

*Corequisite:* GSC 27999

Why do Wal-Mart's current advertising campaigns idealize the “stay-at-home mom”? Conversely, why does Congress require that mothers on welfare be sent out to work? This course will introduce students to a broad view of American social history that foregrounds the gendered aspects of work and asks students to examine the meaning of work in American history from the colonial period to the 21st century. This broad historical perspective is especially crucial to the examination of the construction of current beliefs about work in the United States, since changing gender ideologies dictated the work experiences of large race- and class-defined

segments of the population. On one level, this approach allows for the recovery of women and girls' contributions to the formal and informal economies, including their work activities within the household. Male work practices will be similarly illuminated through a gender-studies approach. Hence, an overarching purpose of the course will be to explore the fluidity and instability of those conceptions of work that were applied alternately to masculine as opposed to feminine occupations, just as they were alternately applied to white versus non-white, free versus enslaved, and public versus domestic activities.

### **GSC 30201. The Anthropology of Gender**

(3-0-3)

This course introduces students to the main issues and debates characterizing the anthropology of gender, and explores how anthropologists have attempted to understand changing roles, sexual asymmetry, and stratification.

### **GSC 30222. Anthropology of Human Sexuality**

(3-0-3)

This course seeks to examine human sexuality in an anthropological context. We will review sexuality in an evolutionary perspective via a comparison of nonhuman primate sexual behavior and the theoretical constructs surrounding adaptive explanations for human sexuality. The physiology of sex and the development of the reproductive tract will also be covered. The remainder of the course will consist of the evaluation of data sets regarding aspects of human sexual practice, sexual preference, mate choice, gendered sexuality, and related issues of human sexuality.

### **GSC 30224. Today's Gender Roles**

(3-0-3) Aldous

*Corequisite:* GSC 27999

Current changes in male and female roles and the reasons for these changes are examined. Existing gender differences, various explanations for them, and proposals for change are discussed and evaluated.

### **GSC 30227. Feminist Political Thought**

(3-0-3)

*Corequisite:* POLS 32668

This course will examine different ideas, approaches, and issues within feminist political thought. The first part of the course will compare different theoretical perspectives, from liberalism to Marxism, that have been employed by contemporary feminists. The course will pay particular attention to the meanings ascribed to "woman" and her roles in society. The second part of the course will examine how women have been represented throughout Western political thought, and the values ascribed to them by political theorists. Finally, in the last part of the course, we will turn to an examination of several contemporary political issues particularly relevant to feminist thought.

### **GSC 30228. Women in Social Theory**

(3-0-3)

This learning community pedagogy course is designed to look at the offerings women have made, though marginalized, in the related fields of social theory, philosophy, and theology. Each theorist is very different, reinforcing the point that I made above, -that there is no essentialized "women's" view of the social world. Each has come from a different culture and historic context. We will be reading the work of Harriet Martineau (1802–76), Hannah Arendt, (1906–75), Simone Weil (1909–43), Simone de Beauvoir, (1908–86), and Gillian Rose (1947–95), among others. In a quick observation of the lives of these women, one is to find an interesting correspondence between them. Many of these women were not only social thinkers, but also activists. A philosophy of praxis (or action) is what binds sociology to itself: "the philosophy of praxis," Gramsci once proclaimed, "is precisely the concrete historicization of philosophy and its identification with history." Given that living the vocation of a sociologist is not only developing theoretical expertise, but it is also tied to giving voice, advocacy, and concern about and work in the world at it is given, I have required a social service component part of the classroom experience. I require you to invest at least 10 working hours (with at least three visitations) at a local volunteer organization. I would like you to reflect upon your experiences in light of the readings, taking ethnographic notes in a journal of the experience. We will be sharing these experiences with the rest of

the class. I will then ask you to write some reflections on doing ethnography while reading these theorists. One must always blend theory with praxis. Remember, as Marx said in the theses against Feuerbach: "The task of philosophy is not to interpret the world but to change it!"

### **GSC 30255. Men and Women in Modern Japanese Literature**

(3-0-3) Shamoon

*Corequisite:* GSC 27999

In 20th-century Japan, as old roles such as samurai and geisha waned, both men and women had to redefine the characteristics and meaning of masculinity and femininity. This course will look at constructions of gender in modern Japanese literature by both female and male authors. As we discuss both normative and deviant depictions of male and female roles, some topics we will address include men and women at work and at war, marriage and family life, and homosociality and homosexuality. Students will also gain familiarity with some of the major authors, genres, and literary movements of modern Japanese literature.

### **GSC 30269. Labor Economics (Men and Women in Labor)**

(3-0-3)

*Corequisite:* GSC 27999

A survey course covering the economics of employment and unemployment; wages and income distribution; poverty, education, and discrimination; unions and labor and industrial relations systems; and comparative labor systems.

### **GSC 30270. Sex and Gender in Greco-Roman Antiquity**

(3-0-3) Mazurek

*Corequisite:* GSC 27999

This course examines the differing roles and stereotypes, forms of behavior, and values associated with women and men in Greco-Roman antiquity. Special attention is given to the preoccupations of the Greeks and Romans with the categories of "female" and "male" and to the dynamics of relations and relationships between women and men. The course both deepens knowledge of Greco-Roman society and provides and provides an informed background for contemporary gender debates.

### **GSC 30278. British Art**

(3-0-3)

This course is a general survey of the development of British painting from 1560 to 1900. In this context, the relationship between English 17th-century and early 18th-century and American colonial painting are considered, alongside a discussion of uniquely British traditions.

### **GSC 30289. Jacksonian US: Politics/Society/Culture**

(3-0-3) Graff

This course explores the early 19th-century history of the United States, from the close of the War of 1812 to the coming of the Civil War (1815–50). Although the era and course take their name from President Andrew Jackson, we will cover much more than national politics and affairs of state. We will explore the birth of mass political parties, conflicts between nationalism and sectionalism, early industrialization and the rise of class conflict, the development of slavery and antislavery, changing gender roles and the rise of feminism, evangelical religion and reform, and Native American resistance and removal. The course will emphasize active participation by students through regular discussion and frequent writing assignments.

### **GSC 30293. United States Labor History**

(3-0-3)

This course will examine the history of paid and unpaid labor in the United States from colonial times to the near present. We will seek to understand how working people both shaped—and were shaped by—the American Revolution, the debates over slavery and free labor culminating in the Civil War and Reconstruction, the rise of big business, the creation of a national welfare state, the Cold War-era repression of the Left, and continuing debates over the meanings of work, citizenship, and democracy. Throughout the course, we will devote considerable time to the organizations workers created to advance their own interests, namely the labor movement. We will also pay special attention to the complicated yet

crucial connections between work and racial and gender identities. Specific topics may include slavery, farm labor, women's domestic work, trade unions, questions of industrial democracy, the role of radicalism, and the challenges confronting workers in the current era of corporate globalization and anti-sweatshop activism.

### GSC 30305. Colonial America

(3-0-3)

This course considers the history of New World exploration and settlement by Europeans from the 15th century to the 18th century. It examines the process of colonization in a wide variety of cultural and geographic settings. It explores the perspectives of Indians, Europeans, and slaves with a particular emphasis on the consequences of interracial contacts. We will discuss the goals and perceptions of different groups and individuals as keys to understanding the violent conflict that became a central part of the American experience. Lectures, class discussions, readings, and films will address gender, racial, class, and geographic variables in the peopling (and de-peopling) of English North America.

### GSC 30306. Morality and Social Change in United States History

(3-0-3)

How do we explain sweeping moral changes in society? Why did so many people support legal slavery for so long, and what motivated others to turn against it? What is the relationship between social change and moral theory? The purpose of this class is to examine the moral frameworks that Americans have used to understand—and to change—their society. We will focus on hotly debated issues in American history, looking at the way that Americans thought about issues such as slavery, animal cruelty, sex, family roles, labor, economics, war and citizenship, and civil rights. We will look at both sides of debates to understand the values and beliefs that shaped traditions of social change and resistance to that change.

### GSC 30307. Sport in American History

(3-0-3)

Sport, a major part of American entertainment and culture today, has roots that extend back to the colonial period. This course will provide an introduction to the development of American sport, from the horse racing and games of chance in the colonial period through to the rise of contemporary sport as a highly commercialized entertainment spectacle. Using a variety of primary and secondary sources, we will explore the ways that American sport has influenced and been influenced by economics, politics, popular culture, and society, including issues of race, gender, and class. Given Notre Dame's tradition in athletics, we will explore the University's involvement in this historical process.

### GSC 30308. The Holocaust

(3-0-3)

*Corequisite:* HIST 32408

In this lecture/discussion class, we will study the Nazi German program of mass killings that has come to be known as the Holocaust. We will explore the ideas, decisions, and actions that culminated in the murder of an estimated hundred thousand people deemed handicapped, half a million Roma (Gypsies), and six million European Jews. The role of historical prejudices, the impact of National Socialist ideology and leadership, and the crucial factor of the war, itself, will all be considered. We will address the experiences of those targeted for annihilation, as well as the actions of perpetrators and the role of others: bystanders, witnesses, and rescuers. At the same time, we will examine how attacks on other groups—for example, homosexuals, Polish intellectuals, Soviet prisoners of war, Jehovah's Witnesses, and Afro-Germans—fit into the overall Nazi scheme for a "new world order." The legacy of the Holocaust after 1945 will be discussed, as well. Course requirements include short papers in response to weekly readings, a comparative book review, and a cumulative final exam.

### GSC 30309. Labor in America since 1945

(3-0-3)

This course explores the relationship between workers and the labor movement to American politics and culture since 1945. The United States emerged from World War II as the strongest global power, and its citizens subsequently enjoyed a long postwar economic boom that created what we might call the first truly middle-class society in world history. At the heart of that new society was the

American labor movement, those unions like the United Auto Workers and the United Steel Workers who ensured that at least some of the postwar profits made it into the wallets of workers and their families. Today, however, unions represent only 8 percent of workers in the private sector. What accounts for the decline of organized labor since the 1950s? What has the decline of the labor movement meant for workers, specifically, and the American economy and politics, more broadly? How and why have popular perceptions of unions changed over time? What has been the relationship of organized labor to the civil rights movement, feminism, and modern conservatism? What is "globalization," and what has been its impact on American workers and their unions? Through an exploration of historical scholarship, memoirs, polemical writings, and Hollywood films, this course will try to answer these questions. Students interested in politics, economic development, international relations, social justice, human rights, peace studies, or mass culture are particularly welcome.

### GSC 30425. Love, Death, and Exile in Arabic Literature

(3-0-3) Guo

*Corequisite:* GSC 27999

This course explores the literary and artistic presentation of the themes of love, death, and exile in medieval and modern Arabic literature and popular culture. Through close readings of Arabic poetry, essays, short stories, and novels (with English subtitles), we discuss the following issues: topics and genres of love and poetry, gender, eroticism, and sexuality in literary discourse; and the traditional motif of *al-hanin ilal al-watan* ("yearning for the homeland") in modern poetry and fiction.

### GSC 30426. Japan's Imperial House

(2.5-0-3) Thomas

*Corequisite:* GSC 27999

Japan boasts the longest, unbroken imperial line extant today, but what does this continuity really mean? This course looks at Japan's emperors and empresses from antiquity to the present, raising questions about the nature of power, the idea of good government, gender, divinity, war responsibility, and the liberty of the family now called upon to symbolize a purportedly democratic nation. Although most of the course will focus on modern emperors, it begins with Japan's earliest political structures in order to ask such questions as: Was the Imperial House an indigenous idea, or was it an imitation of Chinese ideas of power? Why were there so many powerful women leaders in ancient Japan, and why did Japan stop having empresses on the throne? What is the relationship between the imperial house and the various religions of Japan? The course will then consider the medieval and Tokugawa periods asking why powerful samurai failed to overthrow the militarily impotent emperors. Finally, the course will turn to the modern period, beginning in the middle of the 19th century with the elevation of the Meiji Emperor to unprecedented prominence. Why was the ancient imperial house used to modernize Japan? Even though the sex of emperors has been male for centuries, why were ancient emperors female, and why is the imperial gender (and Japan as a whole) in the modern period often regarded as female? Was Hirohito guilty of fomenting war? What is the function of the Imperial House today? This course sweeps through myth and 1,500 years of Japanese history, tracing the permutations, continuities, and discontinuities of the imperial line.

### GSC 30427. The Japanese Empire and Literature

(3-0-3)

Japan emerged on the global stage as an imperialist power with the defeat of China in 1895 (over Korea) and the defeat of Russia in 1905 (again, over Korea). By the end of the First World War, the "Japanese Empire" included Taiwan, Korea, the south Pacific islands called Nan-yü, and the southern half of Sakhalin, not to mention the late-19th-century acquisitions of Okinawa and Hokkaido. Hardly a static referent from 1895 until its dismantling upon defeat in 1945, the "Japanese Empire" must have meant something terribly different, depending on whether you were a Japanese national or colonial subject; a man or a woman; in the military or a man of letters; a domestic worker or colonial settler; businessman or maid. Even within the Japanese archipelago—indeed, even at the height of government censorship on cultural production in the early to mid '40s—the meaning of the "Japanese Empire" was a site of cultural contestation. This class looks at the literary and artistic production—fiction, memoirs, poetry, film, visual arts and drama—of

the 50-year rise and fall of the Japanese Empire. A current of this class deals with the inter-Asian, Bolshevik-inspired organizations that looked to Japanese radicals, with no little irony, for solidarity in the fight against Japanese imperialism.

### **GSC 30430. Islam and Modernity**

(3-0-3)

Islam and its compatibility with modernity is a much-debated issue in the contemporary period. The course will engage this timely topic and discuss the most important “hot-button” issues involved in these debates: political Islam, democracy, pluralism, rights of women, and secularism. The historical contexts that provide the backdrop for the range of responses to the phenomenon of modernity and its attendant issues will also receive attention. What internal resources exist within Islamic thought that are being drawn upon by modernists to make a strong case for an essential compatibility between Islam and democracy, for example? Is democracy (or Islam, for that matter) a monolithic concept? Students will be expected to actively take part in discussions centered on such questions, the assigned readings, and class lectures. Prior exposure to at least one class on Islam or the Middle East is strongly recommended.

### **GSC 30448. Sex, Freedom, and Economy in Contemporary China**

(2.5-0-3) Jensen

Today China is undergoing a revolution (a word used so frequently as to be meaningless, but very meaningful in this case, as we will learn) in society, politics, economy, and thought perhaps as significant as that which brought the Chinese Communist Party to national power in 1949. The objective of this course, constructed through film and news media investigation, along with readings on social status, identity, sexuality, work, home, youth culture, gender, business, education, sports, and ecology, is to come to an understanding of the multiple domestic forces that have made China a global power. Furthermore, the course will familiarize the student with the very complex ramifications of the passionate national quest for international recognition as it affects every aspect of present-day life while exploring the mercurial manner in which the economic transformation of China has been represented in the media. In this last respect, it represents an experiment in cultural studies in that its avowed subject, contemporary China, is studied in dialogue with the United States—the two nations most exemplifying the promise and terror of modernization. No knowledge of Chinese or previous knowledge of China is required.

### **GSC 30449. Chinese Ways of Thought**

(2.5-0-3) Jensen

This lecture and discussion course on the religion, philosophy, and intellectual history of China that introduces the student to the world view and life experience of Chinese as they have been drawn from local traditions, as well as worship and sacrifice to heroes, and the cult of the dead. Through a close reading of primary texts in translation, it also surveys China's grand philosophical legacy of Daoism, Buddhism, “Confucianism” and “Neo-Confucianism,” and the later religious accommodation of Christianity and Islam.

### **GSC 30464. Race, Ethnicity, and American Politics**

(2.5-0-3) Tillery

*Corequisite:* GSC 27999

This course introduces students to the dynamics of the social and historical construction of race and ethnicity in American political life. The course explores the following core questions: What are race and ethnicity? What are the best ways to think about the impact of race and ethnicity on American citizens? What is the history of racial and ethnic formation in American political life? How do race and ethnicity link up with other identities animating political actions like gender and class? What roles do American political institutions—the Congress, presidency, judiciary, state and local governments, etc.—play in constructing and maintaining these identity categories? Can these institutions ever be used to overcome the points of division in American society?

### **GSC 30469. Fundamentals of Human Evolution**

(3-0-3)

*Corequisite:* GSC 27999

This course deals with human evolution in both biological and cultural terms. Topics covered will include primate behavior, the mechanisms of evolution, the fossil record, and the characteristics of prehistoric cultures.

### **GSC 30501. Hemingway and Walker**

(3-0-3) Brogan

*Corequisite:* GSC 27999

A comparative study of the fiction of Ernest Hemingway and Alice Walker, with particular emphasis on gender, class, and historical issues explored in each author's works.

### **GSC 30502. American Film**

(3-0-3) Krier

*Corequisite:* GSC 27999

How the themes of “love” and “desire” are explored in selected American novels, and movie adaptations of those novels, written in the 20th century.

### **GSC 30503. Knighthood and Chivalry in Medieval Europe 750–1625**

(3-0-3) Boulton

*Corequisite:* GSC 27999

This course introduces students to the history of knighthood (the status of noble heavy cavalryman) and chivalry (the distinctive ethos and code of the knightly class) from their emergence in Western Europe between 950 and 1180 through their apogee between 1180 and 1380 to their slow decline between 1380 and 1625 (and their revival in the 19th century). It will deal first with the knight as warrior, vassal, and monk (in the religious orders of knighthood), then with the knight as nobleman and landowner, and finally with the knight as courtier and civil servant in the emerging state. It will next proceed to an examination of knightly games, festivals, and iconography, and conclude with a look at the survival and revival of chivalry in the post-Gothic period.

### **GSC 30504. Crime, Heredity, and Insanity in US History**

(2.5-0-3) Przybyszewski

The 19th century witnessed a transformation in the understanding of the origins of criminal behavior in the United States. For many, a religious emphasis on humankind as sinful gave way to a belief in its inherent goodness. But if humans were naturally good, how could their evil actions be explained? Drawing on studies done here and abroad, American doctors, preachers, and lawyers debated whether environment, heredity, or free will determined the actions of the criminal. By the early 20th century, lawyers and doctors had largely succeeded in medicalizing criminality. Psychiatrists treated criminals as patients; judges invoked hereditary eugenics in sentencing criminals. Science, not sin, had apparently become the preferred mode of explanation for the origins of crime. But was this a better explanation than what had come before? Discussion is the primary form of instruction.

### **GSC 30505. Mary Through the Ages**

(2.5-0-3) Roy

A study of the Blessed Virgin Mary, Mother of God, as her figure and role in the history of salvation emerge in Scripture and the tradition of the Church. An examination of the Church's understanding of Mary as expressed in sacred and historical text, theological reflection, liturgical expression, iconographic representation, magisterial pronouncement, and the life of devotion. The course will also consider the relationship of Mariology to other branches of theology, such as protology, Christology, soteriology, ecclesiology, and eschatology, as well as the impact of the cultus of the Virgin Mary on Western art, music, and literature.

### **GSC 30506. Theology of Marriage**

(2.5-0-3) Odozor

*Corequisite:* GSC 27999

This course seeks to introduce participants to the principal elements in the Catholic tradition on marriage by examining the sources of this tradition in sacred Scripture, the work of ancient Christian writers, the official teachings of the Church, and recent theological reflection. The method employed in the course is thus historical, scriptural, and thematic. The readings selected for this course are intended to expose students to contemporary discussion in moral theology apropos

of these issues, and provide them with the necessary theological tools to critically evaluate a wide variety of ethical positions dealing with marriage in the Catholic tradition.

### **GSC 30507. Love and the Christian Tradition**

(2.5-0-3) Helmer

*Corequisite:* GSC 27999

This intermediate theology course explores the rich and diverse history of love in the Christian tradition. It begins with an examination of the biblical terms for love and traces their theological development through the varied writings of Augustine, Julian of Norwich, Abelard and Heloise, Aquinas, Luther, Edwards, Kierkegaard, Reinhold Niebuhr, Martin Luther King Jr., and others up to the present. Through the lens of love, we will carefully attend to specific, pivotal moments that mark Christianity's historical and contemporary engagements with its own resources, external intellectual currents, and an array of moral, social, and cultural demands. The course generally follows the outline sketched by Bernard Brady's *Christian Love*, and further primary readings will augment Brady's text.

### **GSC 30540. The US Civil War Era, 1848–77**

(2.5-0-3)

Through intensive reading and writing, students will explore the social and cultural history of America's costliest war. We will focus on various topics as they relate to the war: antebellum origins, religion, gender, Lincoln's reasons for waging war, dead bodies, freedmen's families, black soldiers, and the uses of war memory. This will not be a guns-and-generals-smell-the-smoke course, although knowledge of military matters can be helpful. We will ask and try to answer who really "won" and "lost" the war.

### **GSC 30550. The Holocaust**

(3-0-3)

*Corequisite:* HIST 32408

In this lecture/discussion class, we will study the Nazi German program of mass killings that has come to be known as the Holocaust. We will explore the ideas, decisions, and actions that culminated in the murder of an estimated hundred thousand people deemed handicapped, half a million Roma (Gypsies), and six million European Jews. The role of historical prejudices, the impact of National Socialist ideology and leadership, and the crucial factor of the war, itself, will all be considered. We will address the experiences of those targeted for annihilation as well as the actions of perpetrators and the role of others: bystanders, witnesses, and rescuers. At the same time we will examine how attacks on other groups—for example, homosexuals, Polish intellectuals, Soviet prisoners of war, Jehovah's Witnesses, and Afro-Germans—fit into the overall Nazi scheme for a "new world order." The legacy of the Holocaust after 1945 will be discussed, as well. Course requirements include short papers in response to weekly readings, a comparative book review, and a cumulative final exam.

### **GSC 30551. Prophets and Protesters in African History**

(2.5-0-3)

This dialogue-intensive seminar focuses on men and women who led political, religious, and social movements in Africa in the 19th and 20th centuries. The Islamic Murride brotherhood in Senegal, the Women's Wars of Nigeria, and the Mau Mau uprising in colonial Kenya will introduce students to important episodes in African history and to the intellectual debates of the field. Students are expected to read a variety of texts, participate vigorously in class discussion, make oral presentations, and complete written assignments.

### **GSC 30552. Caribbean Women Writers**

(3-0-3) Palko

*Corequisite:* GSC 27999

A sampling of novels written by Caribbean writers, with a particular emphasis on such themes as colonization, madness, childhood, and memory.

### **GSC 30553. The Victorian National Romance**

(3-0-3) Maurer

*Corequisite:* GSC 27999

By examining texts from the different nations within the British Isles—Scotland, Ireland, and England—we will explore the complex question of how national boundaries are drawn, how a sense of membership in a nation is created, and what that might have to do with falling in love, getting married, and staying married.

### **GSC 30554. Colonial Latin America**

(2.5-0-3)

*Corequisite:* GSC 27999HIST 32901

When Columbus stepped ashore in the Caribbean in 1492, he set in motion a process that led to the creation of wealthy Spanish and Portuguese empires in the Americas, the genocide of countless numbers of indigenous men and women, the enslavement of millions of African men and women, and the eventual formation of a variety of independent states competing in the world economy. In this semester-long survey, we will examine topics in this history that will allow us to consider how history is produced, as well as what happened in the past, from various perspectives from elite colonial administrators and merchants to indigenous peasants and formerly enslaved men and women. Most weeks' assigned readings include primary texts—sources written by participants in these events—and written assignments and discussion sections will concentrate on the use of these sources.

### **GSC 30555. Chronicles of the Conquest of Latin America**

(2.5-0-3)

*Corequisite:* GSC 27999

This seminar examines key aspects of the conquest of Latin America through readings of chronicles and other texts written by Spaniards and Amerindians in the 15th through 17th centuries. We will focus on the ways in which Spaniards and Amerindians theorized and explained their experiences, and their representations of themselves and their "others." In particular, we will pay attention to the beginnings of modern notions of race and ethnicity through discussions of barbarians, wildmen, and cannibals, among other "types" important to the colonial encounter. Students will help lead class discussions, and will write a series of essays that critically engage with the historical texts.

### **GSC 30556. The US Civil War Era, 1848–77**

(2.5-0-3) DeGruccio

*Corequisite:* GSC 27999

Through intensive reading and writing, students will explore the social and cultural history of America's costliest war. We will focus on various topics as they relate to the war: antebellum origins, religion, gender, Lincoln's reasons for waging war, dead bodies, freedmen's families, black soldiers, and the uses of war memory. This will not be a guns-and-generals-smell-the-smoke course, although knowledge of military matters can be helpful. We will ask and try to answer who really "won" and "lost" the war.

### **GSC 30557. What's Love Got To Do With It? Marriage and Family in American History from Revolution to Present**

(2.5-0-3) DeGruccio

*Corequisite:* GSC 27999

From the heated trenches of America's "culture wars," few things are as polarizing as marriage and the family. At the extremes, some hearken back to less troubled days when one man and one woman made enduring commitments to each other; others imagine a narrative of progress with women throwing off the shackles of patriarchy, as both men and women forged new kinds of relationships informed by individual needs. Through intensive reading and writing, students will grapple with these conflicting narratives of decline and triumph. We will explore Native American families, polygamy, free-love communities, Cold War homemakers, the black family, and gay marriage. In all of these, we will flesh out the ways in which defining "the family" has always been entangled with citizenship, national politics, and religious intolerance.

### **GSC 30600. Modern Political Thought**

(3-0-3) Botting

*Corequisite:* GSC 27999

In this course, students will study the focal ideas and arguments that helped shape the development of Western modernity—and its notions of freedom, equality,

citizenship, rights, democracy, nationality, justice, and cosmopolitanism—through close readings of classic texts of European and American political thought. Hobbes's *Leviathan*, Locke's *Second Treatise of Government*, Rousseau's *First Discourse*, *Second Discourse*, and *Social Contract*, plus several historical and political essays by Kant will offer students the opportunity to understand the evolution of the vastly influential "social contract" tradition and the variants of democracy that have sprung from it. In addition, we will read contemporary works of political theory by John Rawls, Anthony Appiah, and Martha Nussbaum that both build on and move beyond the early modern social contract tradition in order to engage pressing issues of global justice that are inflected by race, ethnicity, nationality, class, sex, and gender. Students will participate in an on-campus conference on "Cosmopolitanism: Gender, Race, Class, and the Quest for Global Justice," which will feature Appiah and Nussbaum as keynote speakers.

### **GSC 30601. Feminist Political Thought**

(2.5-0-3) Abbey

*Corequisite:* GSC 27999

In many countries, feminism has had a powerful impact on the conduct of practical politics. The purpose of this course is to consider the ways in which feminist thought has influenced political theory. We open our study by plunging into a controversial contemporary debate: What is the relationship between feminism and multiculturalism? Then, returning to some of the earliest feminist critiques of modern politics by Mary Wollstonecraft, John Stuart Mill, and Harriet Taylor, we examine a range of feminist approaches to politics, asking what unifies them, and where and why they diverge from one another. One of the guiding questions of this course will be the extent to which feminist approaches pose a fundamental challenge to traditional political theory: Can feminist theories of politics just "add women and stir"? Or do feminist approaches compel us to new or different methodologies, conceptual tools, and even definitions of politics? We also ask how meaningful it is to speak of feminism in the singular: Given the immense variety displayed by feminist thinking, should we talk about feminisms?

### **GSC 30602. Advanced Human Ethology**

(3-0-3) McKenna

*Prerequisite:* (ANTH 20105 OR ANTH 205 OR ANTH 305)

*Corequisite:* GSC 27999

This class is intended for students who completed Human Ethology, a prerequisite for enrollment. It provides the opportunity to discuss the material and topics presented in the lecture course and will culminate with each student choosing a research topic and presenting it in the form of PowerPoint to the class. A second requirement in addition to weekly readings, discussion, and/or reviews of many articles read previously, will be the completion of a significant observational study of some aspect of human behavior covered by class material. The topics to be investigated include, but are not limited to, the evolutionary and cultural perspectives on human aggression, sleep, laughter, grief, sex differences in behavior, institutional sports, play, parenting, infant care practices, or communication (especially non-verbal). The class fulfills a methods requirement for the anthropology major.

### **GSC 30603. Cultural Difference and Social Change**

(3-0-3) Tsitsopoulou

In the class, students will conduct research to better understand the sites that they visited during their overseas projects, orienting them in relation to broader global, regional, and national patterns. Course readings will cover such topics as world systems theory, globalization, development, NGOs, various understandings of "human rights," applied anthropology, activism, and the relation between cultural relativism and service. Students will develop three collaborative websites during the semester (although each student will receive individual grades for his work). These collective projects will present the student's own research interests based on their overseas experience, and will focus on the site where he worked, a problem observed in cross-cultural perspective, and an analysis of strategies for redressing this sort of problem. The overall goal of the course will be for students to gain an understanding of how social science analysis might help to understand and confront problems in cross-cultural contexts.

### **GSC 30604. Global Issues and the United Nations**

(2.5-0-3) Smith

*Prerequisite:* GSC 27999

This course introduces students to the operations of the United Nations and its potential for contributing to a more peaceful, equitable, and sustainable world. We take up the world's most pressing issues such as peace and security, nuclear disarmament, poverty, economic and gender inequalities, and environmental degradation — to explore how the world's governments have attempted to address global problems. Has the UN been an effective place for managing these issues? How might it be improved? What unique roles do civil society groups, or nongovernmental organizations (NGOs), play in the pursuit of the United Nations' mission and goals? To help us consider these questions, we will meet via videoconference with United Nations ambassadors, UN officials, and representatives from civil society groups. Students will have opportunities to ask questions of distinguished guest speakers, who will be joining us from the United Nations headquarters in New York. In addition to gaining an understanding of contemporary global issues, students will learn about the practical, day-to-day operations of this important world body. They will also have a chance to offer their own proposals for improving the ability of the world community to address major problems.

### **GSC 30605. Race and Ethnicity in American Politics**

(2.5-0-3) Pinderhughes

*Corequisite:* GSC 27999

This course introduces students to the dynamics of the social and historical construction of race and ethnicity in American political life. The course explores the following core questions: What are race and ethnicity? What are the best ways to think about the impact of race and ethnicity on American citizens? What is the history of racial and ethnic formation in American political life? How do race and ethnicity link up with other identities animating political actions such as gender and class? What roles do American political institutions the Congress, presidency, judiciary, state and local governments, etc. play in constructing and maintaining these identity categories? Can these institutions ever be used to overcome the points of division in American society?

### **GSC 30606. Latino Politics**

(2.5-0-3) Barboza

This course will examine the history and diversity of Latinos in the United States and how Latinos relate to the US political system. We will review the extent to which Latinos are incorporated into the political landscape and the degree to which they are adequately represented in the United States government. The course will emphasize the multiple pathways of Latino political assimilation and the ways in which Latinos become involved in politics, including electoral and nonelectoral participation and partisanship acquisition.

### **GSC 30650. The Anthropology of Childhood and Education**

(3-0-3) Blum

*Corequisite:* GSC 27999

Concepts of human growth vary extraordinarily across time and space. When children become full-fledged persons, when they can reason, when or whether they should be independent from their parents, and how all this happens are variable and illuminating. Education—either formal or informal—reflects and also constitutes a society's view of childhood. This course provides a (selective) cross-cultural survey of childhood and education, looking at stages from pregnancy and infancy to late adolescence. Students will devise and conduct projects of their own.

### **GSC 33652. Senior Seminar: Transnational Social Movements**

(2.5-0-3) Reydams

Writing seminars are devoted to a specialized topic and give students a chance to take a writing-intensive course in a seminar setting, with an emphasis on research skills and discussion.

### **GSC 40103. Cinema Ideologies**

(3-0-3) Godmilow

*Corequisite:* GSC 27999, GSC 41103

Cinema, both in fiction and nonfiction forms, is one of the major contributing forces to the construction of ourselves and our perception of “others,” in terms of class, gender, and race. This course proposes to study and dissect these constructions in films like *Malcolm X*, *Schindler’s List*, *Philadelphia*, *The Killing Fields*, and *Striptease* through a close-reading practice.

### GSC 40113. Sex and Gender in Cinema

(3-0-3)

*Corequisite:* GSC 41113

This course analyzes representations of and theories about sex and gender in cinema. Students will read major texts in feminist theory, queer theory, and masculinity studies in order to become familiar with important concepts and debates within the field. Topics covered will include “the male gaze,” spectatorship, performance and stardom, camp, “reading against the grain,” consumption, gender and genre, race and gender, masquerade, authorship, and masculinity “in crisis.” Students will view classical Hollywood films, silent films, and avant-garde films and videos. Evening screenings required.

### GSC 40119. Twentieth-Century British Women Writers

(3-0-3)

Modern and postmodern fiction (and some nonfiction prose) by British women. Authors may include Woolf, Butts, Rhys, Cunard, Richardson, Carrington, West, Mansfield, Carter, and Winterson.

### GSC 40127. Mary Wollstonecraft and her Legacies

(3-0-3)

This course will begin by examining the political thought of Mary Wollstonecraft (1759–97) through a close study of her corpus of original writings, including her early educational writings, her two great treatises of political theory, *A Vindication of the Rights of Men* and *A Vindication of the Rights of Woman*, and her later literary writings. Next, the course will investigate the contested question of Wollstonecraft’s political, philosophical, literary, and popular legacies. Through the study of the works of major 19th-century writers who read, critically engaged, and in many cases appropriated Wollstonecraft’s radical ideas on women’s rights, marriage and family, theology, and educational, economic, and political reform, we will challenge the thesis that her husband William Godwin’s scandalous 1798 biography of her life diminished her influence in the century after her death. Finally, we will look at how Wollstonecraft has been received in the past hundred years and engage the puzzling question of why the most visionary and influential theorist of women’s rights in the modern tradition has not yet secured a steady place in the Western canon.

### GSC 40128. Images of Women in American Cinema

(3-0-3)

*Corequisite:* GSC 27999

In viewing any film, we must ask ourselves what the filmmakers want us to think. To answer that question for a specific genre, we will be studying portrayals of 20th-century women in film and how these images have evolved in reaction to, and as a backlash against, the modern feminist movement.

### GSC 40129. Family Development

(3-0-3)

This course is directed to the sociology, psychology, counseling, preprofessional, nursing, social work, and other majors who will necessarily be working with or seeking to understand families in the course of their occupations. The course covers change in families from the time when couples marry until their dissolution due to divorce or death of one of the spouses. Parent-child relations beginning when children are born until parents’ death, changes in sibling relations as persons age, as well as the development of the marital union will be examined. The family cycles of childless and one-parent families will also be included. Students have the opportunity to apply the course material on family careers to their own families within the context of marriage, occupational, and educational plans. They do a case history of a family in order to gain experience in using the family development approach.

### GSC 40130. Renaissance Woman

(3-0-3)

This course is designed as an introduction to the study of women and literature of the Renaissance period in Europe. It will treat the subject of the “Renaissance woman” in three ways. First, there will be a brief historical overview of the condition of women of different social classes during this period, focusing on topics such as their education, the role of marriage, and the convent as an alternative to married life. Secondly, it will survey how women were viewed in the literature written by men in various European countries. Here, we shall read excerpts from Dante and the courtly love tradition, Petrarch and the Petrarchists, Shakespeare, and Rabelais, among others. We shall also consider the portrayal of women in artistic works of this time, comparing this to their literary representation. Next, we shall study the literature created by women during the Renaissance in Europe. During this part of the course, we shall consider some of the problems generated by women’s writing, using Virginia Woolf’s *A Room of One’s Own* as a point of departure for our discussions. At the end of the course, we will resume our study of the image of woman in the Renaissance by reading a modern play set at that time (Peter Whelan’s *The Herbal Bed* on the trial of Shakespeare’s daughter) that treats some of the issues facing women at that time. All foreign texts will be read in English translation.

### GSC 40131. Gender, Genre, and the Short Story

(3-0-3)

This course discusses how representations of gender were explored in a survey of 19th- and 20th-century short stories from England, Ireland, France, Russia, and the Southern United States.

### GSC 40132. Gender, Selfhood, and Suffering

(3-0-3) Duttenhaver

*Corequisite:* GSC 27999

Suffering is one of the most pervasive realities of human experience, and it can be argued that women often suffer in ways that are unique to and informed by their gender and sex. Designed for students of gender studies and theology, this course examines the intersection of gender, suffering, and selfhood with an emphasis on the ways in which suffering has played a role in religious traditions—and in the Christian tradition in particular—in problematizing or promoting the self-understanding and self-formation of women. We will engage authors both “inside” and “outside” the Christian tradition, and while the primary focus will be on contemporary debates and interpretations of the class themes, some attention will be given to earlier periods in history. The challenge of the course will be to learn to assess critically and understand constructively the various means by which the gender- and religion-inflected experiences of asceticism, ritual sacrifice, pain, self-denial, etc. have influenced the selfhood of women.

### GSC 40133. Virgins and Vixens of Enlightenment England

(2.5-0-3) Cahill

*Corequisite:* GSC 27999

The course will look at various “virgins” and “vixens” of Enlightenment England (the “long” 18th century of 1660–1800) as a means of studying how “woman” was constructed, and why she was represented in certain ways during an important period of British history. Literary representations of women argued for certain views of how the individual, society, and the nation should be and interrelate, thus narratives by and about women tell stories with historical, social, and political implications. In class, we will look at some of the constructions of women and “woman” that real women had to navigate in order to function in society and in private; for instance, by what methods can integrity and individual dignity survive when chastity is commodified, marriage is an economic transaction, and financial and professional independence for women is almost impossible? Our aim will be to study and critically evaluate the binary opposition between “virgins” and “vixens” so that the complexity of the terrain women had to engage—intellectual, spiritual, social, political, and personal—will be addressed alongside the wider ramifications of how women were represented by writers such as Mary Astell, Alexander Pope, Jonathan Swift, Samuel Richardson, Samuel Johnson, and Mary Wollstonecraft.

**GSC 40178. Race, Gender, and Women of Color**

(3-0-3)

*Corequisite:* GSC 27999

This seminar analyzes dominant American beliefs about the significance of race and gender primarily through the focusing lens of the experiences of women of color in the US. How did intersecting ideologies of race and gender attempt to define and limit the lives of women of color as well as other Americans? How did intersecting ideologies of race and gender attempt to define and limit the lives of women of color as well as other Americans? How have women of color responded to and reinterpreted white American ideas about their identity to develop their own self-defenses and ideologies?

**GSC 40183. US Sex/Sexuality/Gender Since 1880**

(3-0-3) Bederman

*Corequisite:* GSC 27999

Sexuality, like other areas of social life, has a history. Yet historians have only written about the history of sex for the last 40 years or so. This course will both introduce students to a variety of current themes in the history of sexuality and invite them to consider how they themselves might research and write that history. The class will survey recent topics in the history of sexuality from first colonial settlement to the end of the Victorian era. Issues we may consider include different religions' attitudes toward sexuality (the Puritans were not anti-sex!); how different cultures' views of sex shaped relations between colonists and Indians; why sex was an important factor in establishing laws about slavery in Virginia; birth control and abortion practices; changing patterns of courtship; men who loved men and women who loved women; and why the average number of children in American families fell by 50 percent between 1790 and 1890.

**GSC 40186. Gender and Culture**

(3-0-3)

An introduction to literary theories of gender and culture in film, literature, and other media.

**GSC 40187. Experimental Writing by Contemporary Women Poets**

(3-0-3)

Close readings of selected contemporary "experimental" women poets.

**GSC 40188. A Gendered Voice: The Poetry of nuala Ni Dhomhnaill**

(3-0-3)

This course will focus on the interstices of gender and cultural identity in the work of Nuala Ni Dhomhnaill. Her poetry will be situated within a theoretical framework that draws, inter alia, on recent feminist scholarship. It will address theories of the feminine as well as the specificities of Irish-language literary and oral discourses and their impact on Ni Dhomhnaill's poetic practice. The course will also address the implications of translation. While texts will be read in English, there will be an opportunity for close textual comparisons with the original Irish-language poems.

**GSC 40221. Gender and Violence**

(3-0-3)

This upper-level anthropology course focuses on the problematic intersection between gender and violence. The question of male aggression and female pacifism is explored, with attention to female fighters and male practitioners of nonviolence. Women in circumstances of war, trauma, and healing are studied for the insight such study may provide for peace building initiatives. Gender in the military, gender and violence ritual cross-culturally, and rape as a sociopolitical phenomenon are among the other topics considered. Primary source readings complement intensive class discussion; substantial writing and speaking buttress academic skills.

**GSC 40223. Sociology of Masculinity**

(3-0-3)

This seminar explores the social construction of masculinity and its many forms, both traditional and emerging, through readings, movies, discussions, and writing assignments. Members of the seminar will seek a better understanding of shifting roles, identities, and social structures that influence the way both males and

females develop the meaning of masculinity. Topics include socialization, role conflicts, gender violence, sexuality, the impact of fathering, and men's movements. The masculinities in the United States and around the world. It is intended to complement the study of gender in other disciplines, but some familiarity with basic concepts in sociology is strongly recommended.

**GSC 40225. Engendering Archaeology**

(3-0-3)

This course will consider the historical and theoretical foundations of creating an engendered past, the methodological and practical aspects of "doing" engendered archaeology, and the intersection between political feminism, archaeological knowledge production, and the politics of an engendered archaeology.

**GSC 40251. Fashioning Identities in Colonial America**

(3-0-3) White

*Corequisite:* GSC 27999

This course will focus on dress and material/visual culture in colonial North America. It will introduce methodology, and offer an overview of key themes in the history of dress and consumerism within the framework of gender studies. In our focus on the colonial period (especially in the 18th century), we will analyze the economics of dress (the production, marketing, and acquisition of cloth and clothing) and will assess the importance of fashion and commerce and politics. We will evaluate the role of dress in the construction of colonial identities, and we will examine the ways that dress operated as a visual locus for racial, class and ethnic encounters.

**GSC 40275. Topics in Modern Art**

(3-0-3) Pyne

*Corequisite:* GSC 27999

Topics course on special areas of modern art.

**GSC 40279. The Victorian National Romance**

(3-0-3)

By examining texts from the different nations within the British Isles—Scotland, Ireland, and England—we will explore the complex question of how national boundaries are drawn, how a sense of membership in a nation is created, and what that might have to do with falling in love, getting married, and staying married.

**GSC 40294. Venetian and Northern Italian Renaissance Art**

(3-0-3) Coleman

*Corequisite:* GSC 27999

This course focuses on significant artistic developments of the 16th century in Venice with brief excursions to Lombardy and Piedmont. Giorgione, Titian, and Palladio, the formulators of the High Renaissance style in Venice, and subsequent artists such as Tintoretto and Veronese are examined. An investigation of the art produced in important provincial and urban centers such as Brescia, Cremona, Milan, Parma, Varallo, and Vercelli also provides insight into the traditions of the local schools and their patronage.

**GSC 40301. American Film**

(3-0-3)

Presentations and discussions of the several genres of film produced in America since the early 1900s.

**GSC 40309. Strains in Twentieth-Century American Fiction**

(3-0-3)

Beginning with F. Scott Fitzgerald's "Jazz Age" and ending with Toni Morrison's *Jazz*, a study of thematic commonalities and dissonances in selected 20th-century American novels.

**GSC 40310. Global Romanticisms**

(3-0-3)

An exploration of the intersections between the local, the national, and the global in well-known and lesser-known works of British Romantic era literature, including fiction, drama, poetry, journalism, travel writing, abolitionist writing, political prose, and women writers.

**GSC 40311. History from Below: Colonialism, Nationalism, and Subalterns**

(3-0-3)

This course introduces advanced undergraduates and graduate students to methods of doing and writing history that intervene within dominant historical narratives and frameworks by redefining historians' relationships with sources and the questions asked of them. The Subaltern Studies collective that emerged from South Asia in the 1980s and 1990s is now recognized as one of the more important historical interventions in recent years. Subaltern Studies—historiographic writing has questioned dominant nationalist narratives by arguing that they represent only the history of elites. The objective of the course is to draw attention to differing understandings of colonialism and nationalism by laying out the perspectives of “subalterns”—untouchables, tribals, peasants, workers, women, and other marginalized groups. In addition, “subaltern” perspective would also be extended to studying themes such as democracy, politics, modernity, development, cities, environment, films, and television in South Asia. The interventions by the Subaltern Studies collective will be situated in relationship to developments in European historiography, with special attention to the unique departures of this new school. Debates within and critiques of the collective's approach will also be examined. A background in South Asian history or culture is not a prerequisite.

**GSC 40315. Victorian City**

(3-0-3)

How notions of “the city” were depicted in 19th-century British literature.

**GSC 40318. History and Theory of Literary Criticism**

(3-0-3)

*Corequisite:* GSC 27999

The evolution of modern literary criticism.

**GSC 40368. Doing Things with Words**

(3-0-3)

This course looks at some of the ways humans do things with words. Topics include religious language; silence; politeness and sincerity; truth, deception, lying, and cheating; linguistic variety, identity, and stereotypes; moral evaluations made of language; and language used for power and solidarity.

**GSC 40370. Anthropology of War and Peace**

(3-0-3)

This class will explore the human capacity for war and peace, from tribal conflicts through guerilla warfare to conventional and nuclear war. It will also study societies without war and populations with innovative ideas about peace.

**GSC 40375. Celebrity, Scandal, Obscurity: The Nineteenth-Century Poet**

(3-0-3)

How 19th-century British Victorian poets courted, simultaneously, celebrity, scandal, and obscurity.

**GSC 40376. The Very Long Victorian Novel**

(3-0-3)

A close reading of selected 19th-century British novels.

**GSC 40377. Post-War British and Irish Poetry**

(3-0-3)

An analysis of British and Irish poetry written after World War II.

**GSC 40378. Media Stardom and Celebrity Culture**

(3-0-3) Becker

*Corequisite:* GSC 27999

Much of America's contemporary popular culture, movies, TV, music, even sports revolves around stars, and yet few of us understand the implications of, or even the reasons for, our society's fascination with fame and celebrity. This course interrogates the cultural phenomenon of stardom from a variety of historical and theoretical perspectives. Across the semester, we will explore how stardom developed as a concept across the 20th century, learn how to “read” star images, look at the development of the Hollywood star system, consider what the popularity of

certain film stars might tell us about the issues of social identity, examine stardom as a global phenomenon, and question why celebrity is such an obsession today. Overall, our goal will be to develop tools for investigating the cultural significance of stardom and to use those tools to uncover what stardom and celebrity reveal about both our society and ourselves.

**GSC 40425. Class, Labor, and Narrative**

(3-0-3)

How selected American writers addressed class and labor.

**GSC 40427. Our America: Exploring the Hyphen Between African and American**

(3-0-3)

*Corequisite:* GSC 27999

Close readings of various 20th-century African American literatures, with foci on how “black subjectivity” is created; the relationship between literature, history, and cultural mythology; the dialectic of freedom and slavery in American rhetoric; the American obsession with race; and the sexual ideology and competing representations of domesticity.

**GSC 40428. Women's Narrative in the Southern Cone**

(2.5-0-3) Olivera-Williams

*Corequisite:* GSC 27999

This course designed as a seminar for upper-level Spanish students aims to critically analyze some of the most important narrative texts by 20th-century Argentine, Chilean, and Uruguayan women authors. Some of the writers to be studied include Somers, Geel, Guido, Peri-Rossi, Mercado, Eltit, and Valenzuela. Our readings of the selected works will be informed by the social and political circumstances of their time, which will enable us to understand the emergence of feminine subjectivities and their fictional representations. Concepts of gender, sex, and sexuality will be central to our discussions. Thus, theoretical and critical texts on feminism will also be included. Course participants will be required to actively participate in class, and prepare weekly readings, two reaction papers, a class presentation on one or more of the authors studied, and a final paper.

**GSC 40429. Asian American Writing Sexuality**

(2.5-0-3) Valenzuela

*Corequisite:* GSC 27999

This course will introduce students to major works of Asian American literature while exploring issues of sexuality and gender in this body of literature. We will focus on race/ethnicity, authenticity, and representation as contested sites in Asian American literature, and how these contested sites produce inter/intracultural tensions about the Asian body as it is viewed from within Asian American literature and from without. Primary texts will include novels, short fiction, poetry, film, drama, the graphic novel, and critical essays.

**GSC 40477. Gender and Health**

(3-0-3) Smith

*Corequisite:* GSC 27999

This course looks at the intersection of gender, health policy, and health care organization around the world. Some of the issues to be discussed include medicalization of the female body; critical medical anthropology; the politics of reproduction; social production of illness and healing; politics, poverty, and health; and national and international health and development policies.

**GSC 40478. Cultures of Fear: Horror Film**

(2.5-1.25-3) Snively

*Corequisite:* GSC 27999

Horror and fear play seminal roles in the construction of cultural mythos and practice. In the modern and postmodern eras, the horror film and a culture of fear have come to prominence as core elements of cinematic expression. In this course, we will examine the construction and application of central themes in the scope of international horror cinema and how they reveal salient aspects of cultural similarities and differences, including gender, sexuality, violence, and socio-political climates. Students will contextualize the films via texts drawing from anthropology, film studies, basic film production, and culture theory. Coursework

will include research papers and the production of a short video piece representing the students' interpretations of "What is scary?"

### **GSC 40549. Self, Family, Nation: Insular and US Hispanic Caribbean Women Authors**

(2.5-0-3) Moreno

*Corequisite:* GSC 27999

This course focuses on the literature of Hispanic Caribbean women authors in the islands and in the US. By contrasting the works of recent and more established authors from Puerto Rico, Cuba, the Dominican Republic, and their counterparts in the US, we'll explore the construction of gender and sexuality from a Caribbean feminist perspective. Some of the texts that this course will examine include: *In the Time of the Butterflies* by Julia Alvarez, *Papi* by Rita Indiana, *When I was Puerto Rican* by Esmeralda Santiago, *Maldito amor* by Rosario Ferré, and *Dreaming in Cuban* by Cristina García.

### **GSC 41103. Cinema Ideologies Lab**

(0-1-0)

*Corequisite:* GSC 40103

Required lab that accompanies Cinema Ideologies.

### **GSC 41113. Sex and Gender in Cinema Lab**

(0-3-0)

*Corequisite:* GSC 40113

During the lab times, certain films will be viewed for further discussion in class.

### **GSC 41251. Theatre and Social Activism**

(3-0-3)

*Corequisite:* GSC 27999

In this course, we will explore the potential of theatre as social activism and as a vehicle for social change. The course will involve two modes of study: (1) investigation of a variety of techniques and approaches to creating activist, "grassroots" theatre (e.g., looking at work by artist/activists like Augusto Boal ("Theatre of the Oppressed"), Bread and Puppet Theatre, ACT/UP, etc.); and (2) creation of original theatre pieces addressing social concerns in the local community (for example, students might focus on creating theatre centered on local environmental issues, the living wage campaign, the Michiana Peace Coalition, etc.). The class will culminate in public performances of our own "activist theatre," with the aim of making an impact and effecting change through the performing arts.

### **GSC 41378. Media Stardom and Celebrity Culture Lab**

(0-1-0)

*Corequisite:* GSC 27999

Certain presentations will be viewed for further discussion in class.

### **GSC 43101. Philosophy in a Different Voice: Feminist Perspectives on Knowledge**

(3-0-3)

Traditional epistemology and philosophy of science analyze the prospects and conditions of knowledge in a very abstract, general way—as though our individual characteristics (gender, race, etc.) and the sociopolitical situation in which we find ourselves have no bearing on such knowledge. In contrast, this course will consider such issues as the epistemic resources and liabilities of particular social locations, the ideological role of epistemic norms, and the relation between social values and objectivity.

### **GSC 43102. The Ethics of Gender**

(3-0-3)

*Corequisite:* GSC 27999

We observe gender differences between men and women, but these differences vary over time and place, depending on the customs and practices of different societies and depending on the choices individuals make. To the degree that gender differences are a product of social and individual choice, we can raise the question, as we will in this course, of what, if any, gender differences, we should have in society. This question is of particular ethical significance in light of our commitment to the equality of men and women.

### **GSC 43103. Seminar: Feminism, Print, and Spectacle in the Twentieth Century**

(3-0-3)

*Corequisite:* GSC 27999

How feminist cultures of the 20th century have engaged print culture and visual culture in imaginative ways to carve a space for discussions of women's issues.

### **GSC 43201. Families and Their Interrelations with Gender and Work**

(3-0-3) Aldous

*Corequisite:* GSC 27999

A consideration of the part gender plays in family processes like the couple formation through cohabitation and/or marriage, having and rearing children, division of labor, and the post-children era.

### **GSC 43251. Contemporary Political Philosophy**

(3-0-3)

*Corequisite:* GSC 27999

In this course, we will critically evaluate the major political ideals of our time: namely, libertarian justice, welfare liberal justice, socialist justice, and feminist justice, with a particular focus on how feminist justice presents an important challenge to the other ideals that needs to be met. We will further consider how these political ideals apply to a range of practical problems on the assumption that addressing practical problems can sometimes lead us to revise the political theories we hold.

### **GSC 43451. Sociology of Divorce and Remarriage**

(3-0-3)

*Corequisite:* GSC 27999

This course describes the adversity and reorganization of family life through marital discord, divorce, nonmarital births, single parenthood, and remarriage, with a particular focus on how these processes affect children. Through weekly lectures, readings, and discussions, students will become familiar with current research and policy related to these topics.

### **GSC 43452. Theorizing Popular Culture**

(3-0-3)

*Corequisite:* GSC 27999

The first third of the course will introduce a variety of theoretical perspectives, presented as a historical overview of popular culture studies, both in the United States and Britain. The theories to be considered are similar to those of SOC 34151, although somewhat more time and effort will be spent with theories associated with postmodernism, because.... Next students will use a specifically postmodern, deconstructive approach as they examine the meaning systems and messages present in the animated films produced by Disney since 1989, e.g., *The Little Mermaid*, *Aladdin*, *The Lion King*, *The Hunchback of Notre Dame*, and *Mulan*. Students will prepare an analytical paper in which they apply a theory from the course to another of the movie in the Disney oeuvre. Finally, the course will address the social history of rock 'n' roll, as noted above. In this section, however, we shall also explore the comparisons of meanings and values, whether in common or in conflict, of both Disney films and rock 'n' roll music. To complete this section, students will write a research paper in which they examine some aspect of the American rock revolution. This course is not open to students who have taken SOC 3415, as the content will overlap substantially.

### **GSC 43453. Social Movements in Global Perspectives**

(2.5-0-3) Smith

*Corequisite:* GSC 27999

This seminar explores how increasing global integration affects political participation and the prospects for democracy. We will briefly review the broader research literature on the sociology of social movements within nations as a first step in our consideration of the relationships between globalization and social movements. Seminar discussions will explore how transnational movements compare with those operating at local and national levels. Readings will reflect a range of cases and analytical perspectives. We will explore relationships between movements and political institutions, the factors affecting the abilities of relatively powerless

groups to mobilize resources and build coalitions, and the ideological and cultural dimensions of transnational mobilization. Considerable attention will be placed on the contemporary global justice movement as we explore these questions, and methodological issues relevant to this field of study will be addressed throughout the course.

### **GSC 45001. Gender Studies Senior Internship**

(5-0-3)

In collaboration with the gender studies internship advisor, students choose an organization or business in the South Bend area for which they serve as an unpaid intern. In addition to performing at least 10 hours of internship service for their chosen organization or business, students write a research paper that analyzes the roles of gender, sexuality, and/or intersectionality at the internship site and in the broader profession to which it belongs. This course may be taken in either the fall or spring semester of the senior year. It fulfills the senior capstone project requirement for gender studies supplementary majors, or can be taken as an elective in either the gender studies supplementary major or the gender studies minor.

### **GSC 47000. Special Studies**

(7-0-3)

Special studies are available with gender studies-affiliated faculty.

### **GSC 48001. Senior Thesis**

(3-0-3)

In collaboration with the gender studies academic advisor, students choose a gender studies faculty member who will guide them through the semester-long composition of a senior thesis. The senior thesis is an original and professional piece of scholarly writing based on the student's interdisciplinary research in their primary and supplementary majors. The gender studies senior thesis may build upon, but cannot replicate, the work done for a senior thesis or paper in another major or course. This course fulfills the senior capstone project requirement for gender Studies supplementary majors. It can only be taken in the fall semester of the senior year. In the spring semester of the junior year, interested students should speak to the gender studies academic advisor about planning their thesis topic and research and securing a faculty advisor.

### **GSC 50100. Women and Christian Origins**

(3-0-3)

*Corequisite:* GSC 27999

The course is a survey of the New Testament and other literature from its context from a feminist perspective. It will delineate patterns of gender in the theology and structure of these works, attempt to retrieve the participation of women in the movements behind them, and consider the impact of the texts and their contexts in gender relations, sexual politics, and arrangements of race and class in the 21st century. Participation, three short or one short and one longer paper.

### **GSC 51104. Gender and Space Lab**

(2.5-2-0)

*Corequisite:* GSC 53104

This course will explore a range of materials—films, novels, theoretical texts, architectural plans, histories, and philosophical texts—to survey their various gendered meanings attached to space in the 20th century. We will examine spaces both public and private (the department store, the cinema, the street, the apartment, the country home, etc.) as traversed and inhabited by a variety of 20th-century figures (the flaneur, the New Woman, the shop girl, the sapphist, the suffragist, the single girl, etc.).

### **GSC 53100. Philosophy in a Different Voice: Feminist Perspectives on Knowledge**

(3-0-3)

Traditional epistemology and philosophy of science analyze the prospects and conditions of knowledge in a very abstract, general way—as though our individual characteristics (gender, race, etc.) and the sociopolitical situation in which we find ourselves have no bearing on such knowledge. In contrast, this course will consider such issues as the epistemic resources and liabilities of particular social locations,

the ideological role of epistemic norms, and the relation between social values and objectivity.

### **GSC 53101. US Women's Gender History**

(3-0-3)

This colloquium is intended to serve as an introduction to the field of US women's and gender history. It will provide a basic background to some of the major current methodological approaches and topical interests in the field, as well as acquainting the student with the way approaches to women's history have developed and changed over the past 35 years. Although the course will be organized chronologically, from colonial times through the 20th century, the main focus will be historiographical. We will not attempt to "cover" all the important areas of US women's history. Students who wish to master this field, however, will emerge from the class with the requisite analytical tools to begin that task.

### **GSC 53102. Feminist Theatre Performance**

(3-0-3)

*Corequisite:* GSC 27999

In this course we'll investigate the history and practice of feminist theatre. The seminar will focus not only on feminist playwrights (such as Caryl Churchill, Sarah Daniels, and Pam Gems in England, and Maria Irene Fornes, Paula Vogel, Claire Chafee, and Eve Ensler in the US), but also on feminist theories of the theater and on theoretical and critical responses to the plays we read (i.e., Elin Diamond, Sue-Ellen Case, Peggy Phelan, etc.). The course will pay particular attention to feminist theatre by women of color (i.e., Adrienne Kennedy, Ntozake Shange, Suzan-Lori Parks, Cherrie Moraga, Coco Fusco, and Diana Son) and to intersections between feminist theatre and queer theatre (the Five Lesbian Brothers, Tony Kushner, Charles Ludlam, and Kate Bornstein). We will, at all times, keep our texts in context and look closely at the processes and practices that distinguish "feminist" theater (as a stage product, and not merely a playtext) from "nonfeminist" theater. We'll also devote significant attention to feminist performance artists such as Holly Hughes, Karen Finley, Robbie McCauley, and Laurie Anderson. The course will include several translated texts; PhD in literature students will be required to read texts in the original language if they have proficiency in that language. In addition, they will be encouraged to pursue a final project that incorporates research in one of their language proficiencies (for example, a student proficient in French will be directed to research French feminist theatres). The seminar will require students to offer presentation of original research, and to write an article-length paper on a topic of their choice.

### **GSC 53103. Contemporary Political Philosophy**

(3-0-3)

*Corequisite:* GSC 27999

In this course, we will critically evaluate the major political ideals of our time: namely, libertarian justice, welfare liberal justice, socialist justice, and feminist justice, with a particular focus on how feminist justice presents an important challenge to the other ideals that needs to be met. We will further consider how these political ideals apply to a range of practical problems on the assumption that addressing practical problems can sometimes lead us to revise the political theories we hold.

### **GSC 53104. Gender and Space**

(2.5-0-3) Wojcik

This course will explore a range of materials—films, novels, theoretical texts architectural plans, histories, and philosophical texts—to survey the various gendered meanings attached to space in the 20th century. We will examine spaces both public and private (the department store, the cinema, the street, the apartment, the country home, etc.) as traversed and inhabited by a variety of 20th-century figures (the flaneur, the New Woman, the shop girl, the sapphist, the suffragist, the single girl, etc.).

### **GSC 53500. Science and Social Values**

(3-0-3) Kourany

Should science be value-free, or should it be shaped by the needs and ideals of the society that supports it? If the former, how can scientists shaped by society contrib-

ute to it, and what claim to the resources of the society can scientists legitimately make? If the latter, how can scientists still claim to be objective?

### **GSC 53651. Global Sociology**

(3-0-3) Smith

The course is designed as a broad overview of sociological analysis that extends beyond traditionally accepted national and local boundaries. It provides a perspective on the discipline as one that seeks to understand human society as a nested collection of interdependent societies. In particular, the course draws from world systems theory and institutional approaches—as well as from related disciplines such as anthropology—to consider how the “development project” of the 20th century evolved over time. The impacts of global economic integration on cultural and institutional change, gender relations, inequality, and on changing identities and forms of collective action (including social movements) are phenomena we explore in the course. The course is designed for students who simply want to learn how the World Bank, IMF, and United Nations are impacting the experiences of people around the world, as well as for those who expect to do further research in the field.

## **Hesburgh Program in Public Service**

### **HESB 20000. Introduction to American Government**

(3-0-3) Radcliff, Wolbrecht

This course provides students with an overview of the American political system. Topics include the presidency, Congress, the Supreme Court, bureaucracy, separation of powers, federalism, political parties, interest groups, the public policy process, voting, public opinion, and participation. This course cannot be taken if you have already taken POLS 10100.

### **HESB 20001. American Politics**

(3-0-3) Campbell, Griffin.

*Corequisite:* POLS 22100

This course provides students with an overview of the American political system. Topics include the presidency, Congress, the Supreme Court, bureaucracy, separation of powers, federalism, political parties, interest groups, the public policy process, voting, public opinion, and participation.

### **HESB 20002. Principles of Microeconomics**

(3-0-3) Ruccio

An introduction to economics, with particular attention to the pricing mechanism, competitive and monopolistic markets, government regulation of the economy, labor-management relations and programs, income determination and public policy, trade and the international economy.

### **HESB 20010. Introduction to Public Policy**

(3-0-3) De Ridder

The Hesburgh Program in Public Service prepares students for an active and informed life in public service, and HESB 20010 is the gateway course to the Hesburgh interdisciplinary minor. This course explores the character and substance of public policy making in the United States. We shall consider why and how government responds to some issues (and not others). We shall examine how public problems are conceptualized in the public arena and focus our attention to the elements of the policy process and its operation, and students will develop some knowledge of substantive areas of public policy. Finally, we will turn our attention to leadership to link a conception of effective and ethical public service with our analytic understanding of the policy process. The course will conclude with students participating in policy hearings based on their research on substantive public policy controversies.

### **HESB 20011. Introduction to Public Policy**

(3-0-3) Ayala

The objective of this course is to introduce students to the process of public policy formation in American politics. The course will be divided into three parts. The first section will encompass a brief review of some of the more important mechanisms of American politics that affect the legislative process (political participation, interest groups, congressional elections, etc.). We will then engage in a general review of how such factors have affected the direction and tone of federal public policy over the past 30 years. The final two sections of the course will be devoted to detailed analysis of two public policy areas of particular interest to younger voters: education reform and drug laws. Building on the earlier readings and the analytical tools developed, we will examine the current debates and prospects for reform in these policy areas, with an eye toward understanding the political realities of public policy formation.

### **HESB 20210. US Latino Spirituality**

(3-0-3) Elizondo

US Latino spirituality is one of the youngest spiritualities among the great spiritual traditions of humanity. The course will explore the indigenous, African, and European origins of US Latino spirituality through the devotions, practices, feasts, and rituals of the people.

### **HESB 20211. Rich, Poor, and War**

(3-0-3) Whitmore

This course examines the interrelationships between economic injustice and violence. It begins by investigating the gap between rich and poor both in the US

and worldwide. We also look at the history of Christian thought on wealth and poverty. We then address the ways in which economic disparity intersects with the problem of violence in both domestic (violence against women) and political realms (war and revolution). Next, we canvass Christian thought on the use of violence. This raises the question of whether Christianity, itself, contributes more to violence or to peace. Finally, we pose the question of whether forgiveness for violence is advisable or feasible.

### **HESB 20213. Catholic Social Thought: Globalization and Human Rights**

(3-0-3)

The Roman Catholic Church has long been a champion of universal human rights. Today, the Church and all who promote and defend the causes of justice within and between nations, must ask what it means to promote the dignity of all peoples in a global age. Is it possible to work for a global common good in a world of such pronounced religious, cultural, economic, and political differences? This course will test the hope and the challenge of the Catholic social tradition's confidence in human rights by engaging current international debates over access to health care, the use of military force, international economics, and ecological responsibility. Students will be introduced to the core documents and principles of Catholic social thought, will learn the basic theological and philosophical concepts that underlie the defense of human rights, and will acquire the background to critically participate in current debates over the viability of human rights language. Lecture/Discussion format; three shorter papers; final exam.

### **HESB 20214. Ethics of Energy Conservation**

(3-0-3)

This is a joint theology and engineering course exploring the ethics of energy conservation by using the method of community-based learning. Students will begin by using the university campus as a "trial laboratory" for measuring energy efficiency and thinking creatively about possible energy conservation measures. We will then ask them to conduct a limited energy efficiency and conservation study for selected non-profit organizations in the South Bend community. This course will fulfill a number of civic learning goals, including: the cultivation of theological and scientific competence in environmental ethics; the identification of leadership skills necessary to address the concrete concerns facing nonprofit organizations as they strive to meet pressing human needs in an environmentally sound manner; and, formation of consciences sensitive to the social responsibility of caring for the environment.

### **HESB 20215. Medical Ethics**

(3-0-3) Mertensotto

A discussion of ethical problems in the medical profession in light of natural law and Christian moral principles.

### **HESB 20216. Corporate Conscience**

(3-0-3)

The development of a corporate conscience involves discernment and judgment by individuals and by the various small and large groups of which individuals are a part. This course will examine how Christian moral thought, especially as it is expressed in Catholic moral theology, impacts the business decisions of individuals and the possibility of applying Christian moral principles in a business environment. The course will alternate between the study of basic values, norms, and principles in Catholic theology, and the values, norms, and principles internal to the business practices of accountancy, finance, marketing, corporate management and governance, and the accumulation and deployment of business information. The goal of the course will be to learn strategies for dealing with situations that ask us to reconcile apparently conflicting goals, potentially diverging professional, social, and religious commitments, and to envision how business practices might contribute to advancing the common good. Requirements include a midterm and a final exam and the preparation and presentation of a case.

### **HESB 20217. Catholic Social Teaching**

(3-0-3)

War and peace, the arms trade and immigration, human rights and religious freedom, problems of social justice and the competing claims of capitalism and

socialism, the status of labor unions and class warfare, the role of the state in relation to society and the challenge of the developing world, these are all topics which, for more than a century now, have been discussed in the writings of popes and debated in church councils. Through a mix of lectures and seminars students will become familiar with the major texts, including some by the US bishops, will learn to interpret them in the context of the period in which they were written, and will be asked to consider what they have to say to us today. Students In this course will be assessed by two essays and a final examination, and marks will also be assigned for participation in class discussion.

### **HESB 20445. Social Inequality and American Education**

(3-0-3)

Many have claimed that the American educational system is the "great equalizer among men." In other words, the educational system gives everyone a chance to prosper in American society regardless of each person's social origins. In this course, we explore the validity of this claim. Do schools help make American society more equal by reducing the importance of class, race, and gender as sources of inequality, or do schools simply reinforce existing inequalities and reproduce pre-existing social relations? Topics covered include unequal resources among schools, sorting practices of students within schools, parents' roles in determining student outcomes, the role of schooling in determining labor market outcomes for individuals, and the use of educational programs as a remedy for poverty.

### **HESB 30010. Public Policy and Bureaucracy**

(3-0-3)

This course explores the process, substance, and efficacy of public policymaking and policy implementation in the United States. We begin by asking: Why do some problems become public issues while others do not? Attention is given to how government identifies problems and formulates policies meant to address them. Then we ask, once formulated, how policies are implemented. The course will examine government's "menu" of options for policy implementation. Student research papers will focus on the evolution over time of a specific policy, examining how that policy's implementation affected its impact. Requirements for the course include a midterm exam, a research paper, and a final exam. During the semester, students will be required to prepare several shorter papers as progress reports on their research papers. Students taking this course already should have taken POLS 10100 or 20100, Introduction to American Government. It also will be helpful to have had an introduction to economics course.

### **HESB 30100. Methods of Sociological Research**

(3-0-3)

Limited to sociology majors. Begins with discussion of scientific method, conceptualization of research problems, and measurement. The course then explores the dominant modes of social science research: field work and participant observation, survey and interviewing, experimental designs, and evaluation research.

### **HESB 30101. Statistics for Social Research**

(3-0-3) Hill

This course is designed to show students how to interpret and critically evaluate statistics commonly used to describe, predict, and evaluate in the social sciences, as well as many areas of the business and/or medical world. The focus is on a conceptual understanding of what the statistic does, means, and what assumptions are made from it. Hands-on experience in using data analysis is part of the course.

### **HESB 30102. Intermediate Micro Theory**

(3-0-3)

An examination of the language and analytical tools of microeconomics, emphasizing the functional relationship between the factor and product markets and resource allocation.

### **HESB 30103. Quantitative Political Analysis**

(3-0-3)

Students in this course will learn to understand the most common statistical techniques used in political science and acquire the skills necessary to use these techniques and interpret their results. A mastery of these techniques is essential for understanding research on public opinion and voting behavior, electoral studies,

and comparative research on the causes of democracy. For each topic, students will read works to orient them to key issues and debates. They will learn the reasoning behind the statistical analysis in these readings and create their own spreadsheet programs to execute such analyses. They will then download and clean datasets actually used in the published research, replicate selected analyses from these readings using a statistical package, and write short papers evaluating the inferences defended in the published research.

#### **HESB 30104. Statistics for Economics**

(3-0-3) Lee

The course is devised to present statistics and statistical inference appropriately for economics students. There are two goals for the course: first, to prepare the student to read elementary quantitative analysis studies; and second, to prepare the student to undertake elementary quantitative analyses.

#### **HESB 30106. How to do Political Research**

(3-0-3) Coppedge

This is a course primarily intended for juniors or seniors who are writing, or are planning to write, a senior essay, although it is open to all majors. It helps students acquire the practical skills that are essential for completing a substantial empirical research project: posing a research question, finding out what is already known, staking out an original argument, identifying counterarguments, deciding what kind of evidence is required to figure out who is right, clarifying concepts and boundary conditions, gathering the evidence, analyzing the evidence, and interpreting the analysis. The course encourages students to consider a variety of approaches and helps them decide whether to use quantitative methods, qualitative methods, or both. Students will do independent research to compile a bibliography, gather and analyze evidence, and write an outline, but will not write a paper. Instead, they will present and defend their findings orally and visually. All students are expected to participate vigorously in evaluations of their peers' research.

#### **HESB 30205. Comparative Cultural Studies**

(3-0-3)

The purpose of this seminar is to introduce students to comparative dimensions of American studies. International perspectives will be explored and approaches that compare American culture with another national culture will be encouraged. Intra-national comparative topics will also be welcome (example: Asian American studies). Concepts, methods, and materials related to comparative studies will be examined. Students will work on selecting appropriate comparative topics, organizing information and ideas, developing themes, and designing an interdisciplinary framework for their projects.

#### **HESB 30208. Religion and Women's Rights**

(3-0-3)

This course focuses on religious aspects of the women's rights movement and women's movements within religious communities. Focusing primarily on the Protestant, Catholic, and Jewish traditions, we will examine how women have understood the relationship between their religious beliefs and their interest in expanding women's roles. From this beginning, we will explore several historical and contemporary examples of the influence of religion on the women's rights movement and, by the 20th century, the influence of the women's movement in American religion.

#### **HESB 30212. War, Law, and Ethics**

(3-0-3)

This course is designed to explore the ethical and legal considerations related to war and the use of force. Beginning with a historical overview of Christian thinking on war and peace, we will develop an account of various ethical positions on the use of force, including views rooted in the just war tradition and in pacifism. We will also consider the ethical implications of contemporary issues related to the use of force, e.g., sanctions, war crimes, humanitarian intervention, and terrorism. In collaboration with the Center for Social Concerns and La Casa de Amistad, students will have the opportunity to engage in service-learning by working with students from Washington High School to collect stories from local war veterans as part of the Library of Congress, "Veterans History Project."

#### **HESB 30214. Nationalism**

(3-0-3)

Nationalism embraces a type of identity, a form of politics, and a basis for organizing societies. This course studies the origins, nature, and possible future of nationalism, overall and in particular cases that will be determined by students' interests—for example, what our responses to September 11 tells us about American nationalism. The main assignment will be a research paper on a topic chosen by each student.

#### **HESB 30217. American Political Thought**

(3-0-3)

This course will explore some of the major thinkers and themes of the history of American political theory. Beginning with the founding era, the course will examine the writings of Jefferson and the *Federalist Papers* in an attempt to shed light on the theory behind the new republic and the structure that that republic should take. From there, the course will move toward the crisis that culminated in the Civil War, in an attempt to clarify the purpose of the union and its shape if it is to survive the crisis. The course will then examine some writings dealing with the push toward industrialization, beginning with Reconstruction, continuing with the reality of global war, and ending with the prospects of a Great Society in the New Deal. The course will then explore thinkers concerned with the changing shape of democracy, such as Dewey, Reinhold Niebuhr, and Martin Luther King Jr.

#### **HESB 30218. Civil Liberties and Constitution**

(3-0-3) Barber

Most courses in constitutional law narrate the Supreme Court's evolving positions on constitutional rights and institutions. This course starts not with the Supreme Court, but with *The Federalist Papers*, from which it develops a general theory of the social and economic goals or ends of constitutional government in America. It then uses this theory as a framework for assessing the Supreme Court's position on property rights, race relations, personal privacy, and the place of religion in American life. This exercise can yield results that make for lively class discussion, not only about the Court, but also about the adequacy of the Constitution itself. Grades will be based on a midterm and a final exam, with a paper option in lieu of the final.

#### **HESB 30219. American Intellectual History I**

(3-0-3)

This lecture course will survey major developments in American thought from the first English contacts with North America to the mid-19th century. Emphasis will fall on ideas about religion, society, politics, and natural science, and on the institutions and social contexts of intellectual life, with an eye toward understanding the roots of our own ways of thinking. Especially in the first weeks of the course, European backgrounds will also receive attention. Students will write a midterm and a final exam, as well as a 10-page research paper.

#### **HESB 30221. Morality and Social Change in US History**

(3-0-3)

How do we explain sweeping moral changes in society? Why did so many people support legal slavery for so long, and what motivated others to turn against it? What is the relationship between social change and moral theory? The purpose of this class is to examine the moral frameworks that Americans have used to understand—and to change—their society. We will focus on hotly debated issues in American history, looking at the way that Americans thought about issues such as slavery, animal cruelty, sex, family roles, labor, economics, war and citizenship, and civil rights. We will look at both sides of debates to understand the values and beliefs that shaped traditions of social change and resistance to that change.

#### **HESB 30222. Modern Political Thought**

(3-0-3) Botting

In this course, students will study the focal ideas and arguments that helped shape the development of Western modernity through close readings of the classic texts of modern European political thought. Political theorist Charles Taylor's recent book, *Modern Social Imaginaries*, will provide a helpful historical and philosophical framework for the course and will be read and discussed gradually over the

semester. Machiavelli's *The Prince* will give students insight into the philosophical origins of the modern Western experience of secular, power politics. Hobbes's *Leviathan*, Locke's *Second Treatise of Government*, Rousseau's *Second Discourse* and *Social Contract*, and selected political essays by Kant will offer students the opportunity to understand the evolution of the social contract tradition, and how it helped produce the fundamental Western "modern social imaginaries" of natural rights, the contractual social order, popular sovereignty, and the public sphere.

### HESB 30223. Political Pathologies

(3-0-3)

Tyranny takes many forms. The tin-pot dictator, the fearsome totalitarian madman, the slow asphyxiating absurdity of faceless bureaucracy, the efficient provider of goods in exchange for freedom, the populist rabble-rouser, the anarchic madness of failed states—they all form part of the dubious pantheon of political pathology. These diseases of the political order in turn tell us about the things that we consider valuable in political life and the ways in which their attainment might be thwarted even while everybody pursues them in good faith. This course will be an adventure in the clinical exploration of these diseases. We will attempt to understand the difference between political order and disorder, disease and health, by looking to the philosophical treatments of tyranny and its opposites and contrasting these treatments with the varied experience of human beings of these things. Throughout, we will engage with such questions as: What distinguishes genuine statesmanship from tyranny? What are the fundamental characteristics of the tyrant? What causes tyranny and political disorder? What are the moral dilemmas that people face when living under tyranny? What are the basic cures for tyranny? Our goals are thus to understand the causes, symptoms, development, consequences, and cures of the great political pathologies. This task will require us to draw on texts from a wide variety of perspective, from philosophy to social science and artistic representations (novels and films, in particular), and to engage critically and imaginatively with arguments and situations that pose sometimes-excruciating choices.

### HESB 30224. American Intellectual History II

(3-0-3)

This lecture course will survey major developments in American thought from the later 19th century to the end of the 20th century. Emphasis will fall on ideas about religion, society, politics, and natural science, and on the institutions and social contexts of intellectual life, with an eye toward understanding the roots of our present ways of thinking.

### HESB 30225. Introduction to Christian Ethics

(3-0-3)

Faith in Jesus Christ as Lord and savior has practical implications for the way believers construe the world, organize their lives, and engage with the world. In this course, students will be introduced to the basic elements in Christian moral thinking and decision making. We will look at the nature of ethics, in general, and of Christian ethics, in particular. We will cover questions related to the specificity of Christian ethics, Jesus and moral thinking, the human (Christian) person as moral agent, and the different methods employed in making ethical decisions. This course is, therefore, a foundational course meant to prepare students for further studies in moral theology and ethics or for life as responsible Christian men and women who are reasonably well-equipped to face up to the implications of their faith for life in the world.

### HESB 30226. Justice: Ancient and Modern

(3-0-3)

What is justice? And why should one be just? These are core questions of political philosophy. In this course, we will study these questions by contrasting two conflicting theories of justice: Plato's *Republic* and Hobbes's *Leviathan*. Besides encouraging students to think critically about their own beliefs of justice and cultivating their ability to construct reasoned arguments, this course will introduce students to the contrast between ancient and modern political theory, and will encourage them to reflect on how both still speak to us today.

### HESB 30227. Faction: A Perennial Problem of Politics

(3-0-3)

Since the heated election of 2000, the terms "red state" and "blue state" have become a part of our political lexicon. But the phenomenon of factions, internal political conflict, is neither new nor unique to the United States. After beginning with an assessment of contemporary politics, this course will survey a variety of thinkers—ancient, modern, and American—on the problem of factions.

### HESB 30228. Health Care Ethics for the Twenty-First Century

(3-0-3)

This course explores the importance of religious and moral values for the life and death choices we make, individually and as a society. Basic principles and methods of contemporary bioethics will be introduced, and a range of issues considered, e.g., medical research, physician assisted suicide, health care reform, new genetic technologies, responding to AIDS. Especially recommended for students planning on a career in medicine or science. Lecture/ discussion format.

### HESB 30229. Conscience, Calling, and Character

(3-0-3)

This course is intended to be an introduction to Catholic moral theology customized for those discerning a career as a business professional. In the wake of ethics failures at a number of prominent corporations, business leaders have renewed their call for ethical behavior and have begun to establish criteria for hiring morally thoughtful employees and to institute ethics education in the workplace. In the first part of the course, we will examine Catholic theological ideas about conscience and how it functions in the process of making a moral decision. In the second part of the course, we will examine a selection of Catholic writings on the idea of vocation and calling, as well as the nature of human work, the relationship between workers and management, and the norms of justice that ought to govern these relations. Finally we will examine ideas about character and virtue to assess the challenges and opportunities for moral formation in a business context. Class format will combine analysis of theological texts and discussion of business cases. Course requirements include a midterm and final examination and a group project.

### HESB 30230. Religion and Social Life

(3-0-3) Christiano

How does social life influence religion? How does religion influence society? What is religion's social significance in a complex society like ours? Is religion's significance declining? This course will consider these and other questions by exploring the great variety in social expressions of religion. The course examines the social bases of churches, sects, and cults, and it focuses on contemporary religion in the United States.

### HESB 30231. Moral Problems

(3-0-3) Sterba

An introduction to the field of moral philosophy, with major emphasis on contemporary moral issues.

### HESB 30232. Morality and Modernity

(3-0-3) Solomon

An examination of the many of the deepest contemporary moral disputes that rest on philosophical disagreements about the nature of modernity. These disputes focus particularly on the modern commitments to individualism and the idea of progress.

### HESB 30233. Philosophy of Religion

(3-0-3) van Inwagen

A discussion of some basic issues: the nature of the philosophy of religion, the notion of God, grounds for belief and disbelief in God, faith, revelation, religious language and knowledge, verification, and immortality.

### HESB 30234. Continental Political Thought

(3-0-3) Villa

This course examines the response of leading theorists to the promise and pathologies of the modern age. Among other topics, we will consider the political implications of the decline of authority, community, and the public sphere; the problem of institutionalizing freedom in the modern nation-state; and the fate of

political and moral agency in a bureaucratized, “mass-ified” polity. Special attention will be paid to the Continental tradition’s critique of liberal institutions and political philosophy. Readings from Hegel, Tocqueville, Marx, Nietzsche, Weber, Schmitt, the Frankfurt School, Arendt, and Foucault.

### **HESB 30235. Democracy and Its Critics**

(3-0-3) Cohen de Lara

Most Americans and, increasingly, most people around the world, would agree that democracy is the only legitimate and feasible form of government. But what exactly does “democracy” mean? And is democracy always good, or can this form of government also be a source of problems? In this class, we will try to answer these questions by studying both the historical and contemporary debates about the meaning of democracy. We will begin the course with a brief look at the debate about democracy in ancient Athens. We will then examine the debate about democracy in early modernity. This is the period in which the main principles of modern democratic theory such as consent, equality, majority rule, and representation, received their theoretical defense. This is also the period in which democracy came under attack from liberal, conservative, and radical thinkers. In the last part of the course, we will discuss several competing 20th-century models of democracy. The purpose of this class is to provide the students with an increased historical awareness about the value of democracy, and to facilitate critical reflection about the meaning and limitations of democratic government.

### **HESB 30236. Ethics and Business**

(3-0-3) Holloway

This course aims at helping the student recognize the moral aspects of business decisions on the personal level and of business institutions on the social level.

### **HESB 30237. Medical Ethics**

(3-0-3) Solomon

An exploration from the point of view of ethical theory of a number of ethical problems in contemporary biomedicine. Topics discussed will include euthanasia, abortion, the allocation of scarce medical resources, truth telling in the doctor-patient relationship, the right to medical care and informed consent, and human experimentation.

### **HESB 30238. Philosophical Reflections on Christian Belief**

(3-0-3) Rea

An examination of some of the most philosophically fascinating features of the Christian faith, including the Christian conception of God, the doctrine of the incarnation, and the cogency of a Christian worldview.

### **HESB 30239. Environmental Philosophy**

(3-0-3) Sayre

A philosophically integrated examination of current environmental issues, drawing on familiar literature from ecology, economics, and ethics, as well as recent fiction.

### **HESB 30240. Feminist Political Thought**

(3-0-3) Abbey

This course will examine different ideas, approaches, and issues within feminist political thought. The first part of the course will compare different theoretical perspectives, from liberalism to Marxism, that have been employed by contemporary feminists. We will pay particular attention to the meanings ascribed to “woman” and her roles in society. The second part of the course will examine how women have been represented throughout Western political thought, and the values ascribed to them by political theorists. Finally, in the last part of the course, we will turn to an examination of several contemporary political issues particularly relevant to feminist thought.

### **HESB 30400. American Congress**

(3-0-3) Roos

*Prerequisite:* (POLS 10100 OR POLS 140 OR POLS 140A) OR (POLS 20100 OR POLS 240 OR POLS 240A) OR (GOVT 10100 OR GOVT 140) OR (GOVT 20100 OR GOVT 240 OR GOVT 240A)

This class will expose the student to the practical workings of the US Congress, some major theories attempting to explain those workings, and some of the

methods and materials needed to do research on Congress. It will place the study of Congress in the context of democratic theory, and, in particular, the problem of the way in which the institution across time grapples with the problem of the common good.

### **HESB 30401. Presidential Leadership**

(3-0-3)

This course examines the role of the presidency in the American regime and its change over time. Particular attention will be given to expectations about presidential leadership through the course of American political history. Beginning with questions about the original design and role of the presidency, the course turns to consideration of the role of leadership styles for change and continuity in American politics. Finally, cases of presidential leadership are studied to comprehend the way leadership and political context interact.

### **HESB 30402. Television in American Culture**

(3-0-3)

This course examines the formation of commercial broadcast television in the United States, focusing on the industrial, economic, technological, and social forces that have shaped the images we see. We will look at how American television developed in the competitive business climate of the 1920s and 1930s, and how advertiser-supported networks came to dominate. We then analyze the role of television in America’s social and political life: its links to suburbia and consumerism, its impact on the political movements of the 1960s, and the ways it has represented America’s changing ideas of race, gender, and ethnicity.

### **HESB 30403. Latino Politics**

(3-0-3) Barboza

This course provides a careful and “critical” analysis of the political status, conditions, and the political activities of the major Latino (or “Hispanic”) groups in the United States—Mexican Americans, Puerto Ricans, and Cuban Americans. To provide a context and grounding, various theoretical perspectives are first considered, followed by discussions of the historical experiences and contemporary socioeconomic situations of the several Latino groups. Attention then turns to a number of issues concerning political attitudes, behaviors, and activities. Assessments of Latino influence upon the major local, state and national institutions of the political system—and vice versa—are next considered. Policy areas particularly significant for Latinos are also examined. Finally, the major issues, questions, and themes considered throughout the semester are “revisited” and reconsidered.

### **HESB 30404. Therapeutic Jurisprudence**

(3-0-3)

Therapeutic jurisprudence (“TJ”) looks at how laws impact social life and at how laws and policies are social forces, producing both intended and unintended consequences in society. These consequences can be positive, negative, or both. The objectives of this course are to identify and explore the various consequences of laws and policies based on the history and use of laws and to develop empirical studies to analyze these consequences. The first portion of the course will be devoted to an overview of TJ principles and how these principles can be applied to laws and policies. Different perspectives—those of the various legal actors—will be examined, along with how legal actors can impact the effects of laws and policies. The aim for this portion of the course is to develop a method of critical review of laws and policies. The second portion of the course will look at societal influence on laws, interactions between different policies, and how the effects of a law or policy can be assessed through empirical research prior to enactment.

### **HESB 30405. Labor Economics**

(3-0-3)

A survey course covering the economics of employment and unemployment; wages and income distribution; poverty, education, and discrimination; unions and labor and industrial relations systems; and comparative labor systems.

### **HESB 30407. American Social Movements**

(3-0-3)

This interdisciplinary survey of civil rights and social protest movements in the United States examines suffrage inclusion, abolitionism and black civil rights movements, labor organizing, and women's rights in the 19th and 20th centuries, as well as several contemporary protest movements. These movements certainly question selected American ideologies, but they also draw on American values and practices. We will use history, film, fiction, journalism, and autobiographies to trace a tradition of protest that both depends on and offers challenges to a democratic society.

### **HESB 30408. Ethnicity in America**

(3-0-3)

A study of the ethnic and racial formation of American society and cultural pluralism; a review of the theory and history of ethnicity, its policy implications for family, education, economics, religion, government and international relations; and in-depth study of one ethnic group of choice.

### **HESB 30409. Self and Society**

(3-0-3)

You are an outcome of your past social environment, yet you can be independent of it. The goal of this course is to help you think reflectively about society and your place in it, to be aware of the values involved in people's perspectives on social issues, and to become aware of the social processes that define who you are. We spend most of our lives in a "taken-for-granted" world. We are taught certain values and ways of acting in different situations. Our values and behavioral patterns become a "natural" response to people and events that we encounter daily. A concrete aim in this course is to increase your conscious reflection and decision making in everyday life. Enhanced self-awareness entails self-knowledge—how you learn, your behavioral style, and your values. This course in applied social psychology should have practical value as you enter more fully into a culturally diverse and fragmented world.

### **HESB 30410. The United States Since WWII**

(3-0-3) Blantz

The purpose of this course is to study the political, diplomatic, economic, social, and cultural development of the United States from 1900 to 1945. The principle topics to be investigated will be the Progressive Period legislation of Presidents Theodore Roosevelt, William Taft, and Woodrow Wilson; the causes and effects of World War I; the cultural developments of the 1920s; the causes of the Wall Street Crash and Great Depression; the New Deal legislation of President Franklin Roosevelt; the diplomacy of the interwar period; and the home front during World War II.

### **HESB 30411. Race, Ethnicity, and Power**

(3-0-3)

Presents a review and discussion of social scientific research concerning the nature of race and ethnicity and their expression as social and cultural forces in the organization of multiethnic societies. The focus is multidisciplinary.

### **HESB 30412. Sociology of Education**

(3-0-3)

This course focuses on the relationship between education and society. In the course, a variety of theoretical approaches and contemporary issues in the field of education will be discussed. Topics to be addressed include, but are not limited to, gender and race inequalities in education, the role of schools as agents of selection and socialization, and the nature of educational reform movements. Class participation and the experiences of students will be emphasized.

### **HESB 30413. Theoretical Criminology**

(3-0-3)

This course will introduce you to theoretical interpretations of criminal behavior, empirical research on crime in diverse contexts, and policy debates on crime control and punishment. Our intent will be to raise critical questions and to challenge commonly held views about the nature of crime and punishment in the United States today. As students of sociology, we will operate under the assumption that crime and punishment are social phenomena; they can only be understood by analyzing their relationship to the broader social, political, and cultural context in

which they exist. We shall explore a variety of theoretical perspectives, both classical and contemporary, that attempt to uncover the causes, etiology, and solutions of the problem of criminal behavior. This class cannot be taken if the student has previously taken SOC 30732 because of content overlap.

### **HESB 30415. Economics of Education**

(3-0-3)

This course applies an economic perspective to current educational issues in America including the adequacy of public education, how much education individuals should undertake, how we should finance elementary and secondary education, and what should be done about the rising costs of higher education. The class as a whole will research a single issue with each student assuming responsibility for a unique aspect of that issue with the goal of developing a comprehensive understanding by sharing results.

### **HESB 30419. Deviant Behavior**

(3-0-3)

This course is concerned primarily with the sociological conceptions and theories of deviance. At the onset, deviance is differentiated from those phenomena designated as social problems and social disorganization. The remainder of the course focuses on deviant acts and deviants. Various responses are explored to questions such as: Who are deviants? What does it mean to be a deviant—to the deviant himself, as well as to others? What common social processes and experiences do most deviants undergo? Various theories or models of delinquency, crime, suicide, sex deviation, and drug use are used to aid in constructing a sociological understanding of deviance, the analysis of deviant acts, and the formation of deviant careers or roles.

### **HESB 30420. Sociology of Race and Ethnicity**

(3-0-3)

This course provides an overview of some of the classic and contemporary sociological understandings and perspectives of race and ethnicity. We will focus particular attention on the racial/ethnic groups common to the United States, broadly categorized as African, Asian, European, and Hispanic Americans. The course will cover areas of identity and culture and will address issues such as racism, immigration, assimilation, segregation, and affirmative action. We will use printed texts as well as film clips; some assignments may include movie viewing.

### **HESB 30421. Race/Ethnicity and American Politics**

(3-0-3) Pinderhughes

This course introduces students to the dynamics of the social and historical construction of race and ethnicity in American political life. The course explores the following core questions: What are race and ethnicity? What are the best ways to think about the impact of race and ethnicity on American citizens? What is the history of racial and ethnic formation in American political life? How do race and ethnicity link up with other identities animating political actions like gender and class? What role do American political institutions the Congress, presidency, judiciary, state and local governments, etc. play in constructing and maintaining these identity categories? Can these institutions ever be used to overcome the points of division in American society?

### **HESB 30422. Introduction to Social Problems**

(3-0-3) Sobolewski

Analysis of selected problems in American society such as crime, narcotic addiction, alcoholism, delinquency, racial and ethnic conflict, prostitution, and others. Discussions, debates, films, tapes, and readings.

### **HESB 30423. Political Participation**

(3-0-3)

This course is intended to explore some of the causes of citizens' differentiated rates of political participation in American politics, as well as the impact that this has on the representational relationship between constituents and legislators. We will begin with a theoretical overview of some of the unique aspects of our representational system. Next, we will analyze the factors that influence the formation of individuals' political preferences, and their propensity to undertake various forms of political participation. Then we will turn to an analysis of the formation

and uses of public opinion. Finally, the class will investigate the consequences of using institutional reforms geared toward “direct democracy” to increase political participation and/or the weight of public opinion on the legislative process.

### **HESB 30424. Social Deviance**

(3-0-3)

In this course, students will discuss deviant people and activities with special attention paid to the process whereby deviance is defined. Discussions will focus on issues of social power, moral entrepreneurship, and human variation.

### **HESB 30425. Economics of Poverty**

(3-0-3) Warlick

An examination of the extent and causes of poverty in the United States. The current system of government programs to combat poverty is analyzed. Reforms of this system are also considered. Writing-intensive.

### **HESB 30426. Today’s Gender Roles**

(3-0-3) Aldous

Current changes in male and female roles and the reasons for these changes are examined. Existing gender differences, various explanations for them and proposals for change are discussed and evaluated.

### **HESB 30427 American Political Parties**

(3-0-3)

Political parties play many vital roles in American politics: They educate potential voters about political processes, policy issues, and civic duties. They mobilize citizens into political activity and involvement. They provide vital information about public debates. They control the choices—candidates and platforms that voters face at the ballot box. They influence and organize the activities of government officials. Most importantly, by providing a link between government and the governed, they are a central mechanism of representation. These roles—how well they are performed, what bias exists, how they shape outcomes, how they have changed over time—have consequences for the working of the American political system.

### **HESB 30428. News in American Life**

(3-0-3)

This course seeks to promote an understanding of modern media by examining the goals and motivations of news makers, the power of instant information, the future of news delivery and an examination of how the traditional principles of fairness, privacy, and ethics are treated. Students will read several books and newspaper articles dealing with the history and the business of the media, and will use daily newspapers throughout the course.

### **HESB 30429. Media and American Culture**

(3-0-3)

This course examines the myths and realities of media in the American past and present, paying particular attention to the ways in which old media and new have combined to change our lives, and the ways different groups of Americans have used various media to make history.

### **HESB 30430. Industrial Organization**

(3-0-3)

An investigation into the structure of American industry and an analysis of the implications of corporate economic power for public welfare.

### **HESB 30431. Global Crime and Corruption**

(3-0-3)

This class will look at what constitutes the illegal today, who is engaged in crime and corruption, and what kinds of economic, political, and social powers they wield. It will also look at the societies and cultures of “out-laws.”

### **HESB 30432. Consumers and Culture in US History**

(3-0-3)

This course will explore the emergence of modern consumer society in the United States. From the vantage point of the close of the 20th century, American culture seems to be defined by the conspicuous consumption of goods. It is important

to remember, however, that phenomena like mass marketing, advertising, and mass distribution were not always so entrenched. A historical approach allows us to explore the changing relationship of Americans to consumer goods and the cultural transformation that went along with this change. The course is roughly chronological, with readings organized around a specific theme each week. The course will consist of both lectures and class discussions. Topics covered include the evolution of the American economy, advertising, retailing, gender and consumption, leisure, and consumer protest. There will be two short written assignments and one longer research paper.

### **HESB 30433. Culture Wars: 1960s America**

(3-0-3)

America remains divided over the legacy of the 1960s. We worry about whether our President inhaled marijuana or served in Vietnam; we debate abortion and the extent of the welfare state; we continue to have serious problems with racial relations and the aftermath of the sexual revolution; and we wonder how our culture broke so clearly along religious lines. The 1960s continue to be a controversial part of America’s historical memory because many of our current debates can be traced to that decade. How can we understand a time so recently in America’s past that it is both the source of new freedoms and frustrations? This course will explore the nature of American society—its culture, politics, and people—through an in-depth look at the 1960s. By studying primary sources, biography, architecture, films, and the work of historians, students will be able to locate and describe the basic divisions, main events, actors, and culture of the 1960s, and be able to relate them to our present society.

### **HESB 30434. The Social World and Adolescents’ Achievements**

(3-0-3)

This course examines the impact of the social world on the educational performances of adolescents. The relationship between social contexts, such as the family, neighborhood, school, peer network, and religion, and adolescent achievement will be explored. Theoretical and empirical research on the impact of these social contexts will also be explored. Finally, how all the contexts work simultaneously to influence the educational performance of adolescents will be discussed.

### **HESB 30435. Medicine and Public Health in US History**

(3-0-3) Hamlin

This course examines health as a unifying concept in American history. It follows several themes: how class, race, and gender, as well as age, lifestyle, and place, have manifested themselves in differential health experiences; the ongoing conflict between personal liberty and the interests of the state; the remarkable diversity of American medical systems and their close relation to religious and social diversity; the place of medicine in Americanization campaigns; the changing political economy of American medicine; and finally, the emergence of health as the core concern of the American dream. In short, by the end of the course, you should have a good understanding of the uniqueness of American medicine and its central place in America’s history. You should have acquired an historical and critical context that will be of use in your own encounters with matters of health and medicine—as intelligent citizens, and about issues of public health and questions of medical ethics, and as creative thinkers about more satisfactory modes of medical practice and health improvement and protection. The course will use three to five texts, and require exams, project, and presentation.

### **HESB 30437. Constitutional Law**

(3-0-3) Koppers

This course examines the main principles of American Constitutional law, the process of constitutional interpretation, and the role of the Supreme Court in the American political system. Topics covered are presidential war powers, congressional-executive relations, free speech, church-state relations, the right to life (abortion, right to die, and death penalty), race and gender discrimination, and the American federal system. A good deal of attention is given over to recent personnel changes on the Supreme Court and the extent to which these changes are reflected in the court’s opinions. A background in American national government is desirable.

**HESB 30438. American Social Movements**

(3-0-3)

This interdisciplinary survey of civil rights and social protest movements in the United States examines suffrage inclusion, abolitionism and black civil rights movements, labor organizing, and women's rights in the 19th and 20th centuries, as well as several contemporary protest movements. These movements certainly question selected American ideologies, but they also draw on American values and practices. We will use history, film, fiction, journalism, and autobiographies to trace a tradition of protest that both depends on and offers challenges to a democratic society.

**HESB 30439. The State of the American States**

(3-0-3)

This course provides a "critical" and comprehensive examination of politics in the states of the US, and does so by analyzing topics from several theoretical perspectives. States are major policymakers concerning such central public policies as education, welfare, and criminal justice, among a host of others. There is tremendous variation, yet, at the same time, there are similarities between and among the 50 states in their political processes and governmental institutions, as well as in their public policy concerns and outcomes. The focus of the course is on understanding why the states vary as they do and the consequences of that variation for such core American values as democracy and equality, and how states have different conceptualizations, or different visions or versions, of those core values.

**HESB 30440. Trust and Education Reform**

(3-0-3)

School reform efforts run the gamut from shared decision making to "teacher-proof" curricula. No matter what strategy is chosen, the success of any reform's implementation depends on person-to-person interactions between principals, teachers, students, and parents. Sociologists have found that relational trust serves as a key resource for the successful implementation of school reform. Why is trust important in schools, and how can it be built? In this course, we will examine the role of trust in organizations, how trust impacts school change efforts, and how trust might be fostered in a school community. Topics to be covered include competing models of trust in organizations, the special characteristics of schools as organizations, and the influence of power and authority on the development of trust.

**HESB 30441. Race and Ethnicity**

(3-0-3)

This course has three objectives. First, the course will help you to think critically about issues related to race and ethnicity in American society. The second objective is to foster a dialogue between you and other students about racist and ethnocentric attitudes and actions. The third objective is to encourage you to explore your own racial and ethnic identity and to understand how this identity reflects and shapes your life experiences.

**HESB 30442 Homefronts During War**

(3-0-3)

How have Americans responded at home to war and threats of war throughout the 20th century and into the 21st? What internal divisions and shared identities has war inspired or revealed? We will examine not the battles and factors that determined the military outcomes, but the domestic struggles that have defined our national experience and informed many of our responses to current events. Topics will include critiques of democracy and civil rights inclusion during WWI; treatment of Japanese Americans during WWII; development of peace movements, and antinuclear movements; cold war politics and fears of American communism; and debates over the draft, just-war, racism at home, and US policies abroad in the wake of Vietnam. The final unit will focus on the Gulf War, terrorism, and developments since September 11, 2001.

**HESB 30449. Constitutional Interpretation**

(3-0-3)

*Prerequisite:* (POLS 10100 OR POLS 140 OR POLS 140A) OR (POLS 20100 OR POLS 240 OR POLS 240A) OR (GOVT 10100 OR GOVT 140) OR (GOVT 20100 OR GOVT 240 OR GOVT 240A)

Americans have always debated Supreme Court opinions on specific constitutional questions involving the powers of government and the rights of individuals and minorities. The leading objective of this course is to acquaint students with the basic issues of constitutional interpretation and to show how they influence questions involving constitutional rights and powers and the scope of judicial review.

**HESB 30450. Labor Economics**

(3-0-3)

A survey course covering the economics of employment and unemployment; wages and income distribution; poverty, education, and discrimination; unions and labor and industrial relations systems; and comparative labor systems.

**HESB 30451. Leadership, Ethics and Social Responsibility**

(3-0-3) Brandenberger

This course examines leadership and empowerment issues from multidisciplinary perspectives, focusing on the role of the leader within organizations that promote service, social action, or other forms of social responsibility. Alternative models of leadership are explored, with attention to value and moral implications.

**HESB 30456. Jacksonian US: Politics/Society/Culture**

(3-0-3) Graff

This course explores the early 19th-century history of the United States, from the close of the War of 1812 to the coming of the Civil War (1815–48). Although the era and course take their name from President Andrew Jackson, we will cover much more than national politics and affairs of state. We will explore the birth of mass political parties, conflicts between nationalism and sectionalism, early industrialization and the rise of class conflict, the development of slavery and antislavery, changing gender roles and the rise of feminism, evangelical religion and reform, and Native American resistance and removal.

**HESB 30457. US Environmental History**

(3-0-3) Coleman

This course is an introduction to the new field of environmental history. While many people think "the Environment" suddenly became important with the first "Earth Day" in 1970 (or a few years earlier), environmental issues have, in fact, long been of central importance. In recent decades historians have begun actively to explore the past sensibilities of various groups toward the quality of their air, water, and land; the passionate discussions of philosophers, theologians, and social and natural scientists about resource use, the safety of the environment, and long-term prospects for humanity; and the customs, laws, and managerial systems that guided use of the environment. Historians have also increasingly paid attention to the ways environmental factors have affected the course history: the effects of the distribution of water, foodstuffs, wood, minerals, and of changes in climate or endemic disease. This course will range widely—in methodology, from the history of ideas to paleoclimatology; geographically, from the ancient Near East to modern America; and topically, from wood-cutting rights in medieval France to the rise of the organic farming movement and water-allocation laws in the 20th-century American West. Lecture/discussion format.

**HESB 30458. African American History II**

(3-0-3) Pierce

*Corequisite:* HIST 32800

African American history II is a course that examines the broad range of problems and experiences of African Americans from the close of the American Civil War to the 1980s. We will explore both the relationship of blacks to the larger society and the inner dynamics of the black community. We will devote particular attention to Reconstruction, the migration of African Americans from the rural south to the urban north, and the political machinations of the African American community. We will also examine the political impact of cultural exhibitions. The course will utilize historical documents in the form of primary sources, scholarly articles and other secondary sources. Classes will be conducted as lecture-discussions. Students enrolled in History 30800 must also take HIST 32800, a tutorial.

**HESB 30462. Race, Ethnicity, and Racism in Modern America**

(3-0-3)

This course will survey American attitudes, beliefs, and practices regarding race and ethnicity from the late 19th century to the present, including a consideration of the development and changing meaning of the concept of “racism.” A major emphasis will be to trace the shifting constructions of ethnicity over time and the constantly evolving understandings of what race entails, how racial boundaries are demarcated and crossed, and how all these definitions are historically and culturally flexible. Another central theme will be to trace how various European groups transformed themselves from racial-ethnic outsiders to being “white,” a process that simultaneously expanded the bounds of inclusion for some and solidified the terms of exclusion for others.

### **HESB 30465. Religion and Politics in Comparative Perspective**

(3-0-3) Dowd

An examination of the linkage among religious beliefs, worldviews, group identifications, political attitudes, and behavior, based on literature in political science, sociology, psychology, and theology. Topics include the meaning and measurement of religiosity; religious and anti-religious values embedded in American political institutions; religious worldviews and political philosophy; cue giving and political mobilization by religious groups, denominational traditions, partisanship, and issue positions; and religious movements, social conflict, and political coalitions.

### **HESB 30466. Leadership and Social Change**

(3-0-3)

This course is intended to introduce seminar participants to themes in leadership. Through readings, presentations, and other media (such as film and interaction with visitors), the course aims to provide critical reflections on the nature and sources of differing types of leadership and authority, and a deeper understanding of the vocation to lead.

### **HESB 30467. Information Security**

(3-0-3) Chapple

This course provides students with a working knowledge of information-security topics through a focus on best practices, applications and implementation strategies. Students will learn the fundamental principles of information security and explore contemporary topics in the field, including access control methodologies, business continuity/disaster recovery planning, fire walls, network security, operating system security, intrusion detection, cryptography, and incident handling.

### **HESB 30468. Civil Rights Movements**

(3-0-3)

This course traces the struggle for equal rights undertaken by various marginalized groups in the 20th-century United States, focusing particularly on the experience of African Americans. We will examine in detail the Civil Rights Movement of the 1950s and 1960s, considering its contesting visions for African American liberation and the meaning of American freedom and democracy. This will be put in context of the “long” struggle, going back to early efforts to fight Jim Crow and moving forward to current debates over issues such as affirmative action and reparations. A significant portion of the course will also focus on other groups’ struggles to achieve a full measure of constitutional rights and cultural acceptance, including women, Native Americans, Latinos, and gays and lesbians. The ideological and organizational relationships between these various movements will be examined.

### **HESB 30469. Public Policy/Narrative Nonfiction**

(3-0-3)

The first half of this course use narrative nonfiction—investigative journalism—as a stepping-stone into public policy issues. We supplement these texts in the second half of the course with an introduction to basic phases of the policymaking process, such as implementation and evaluation.

### **HESB 30470. Sport in American History**

(3-0-3)

Sport, a major part of American entertainment and culture today, has roots that extend back to the colonial period. This course will provide an introduction to the development of American sport, from the horse racing and games of chance in the colonial period through to the rise of contemporary sport as a highly

commercialized entertainment spectacle. Using a variety of primary and secondary sources, we will explore the ways that American sport has influenced and been influenced by economics, politics, popular culture, and society, including issues of race, gender, and class. Given Notre Dame’s tradition in athletics, we will explore the University’s involvement in this historical process.

### **HESB 30471. History of Western Medicine**

(3-0-3)

*Corequisite:* HIST 32552

This course introduces students to the history of Western medicine from the pre-Socratics to penicillin; it concludes by applying that history to modern medical questions, including professional identities, emerging diseases, and genetic manipulations. Major themes/topics include changing disease concepts, medical education, medical practitioners, “scientific” medicine, therapeutics, hospitals, and the body; sub-themes include women and medicine, race and medicine, and the patient. Class periods will be divided between lectures and seminars, the latter relying largely on discussions of primary source readings. Students will be encouraged to explore their own particular interests in a research paper.

### **HESB 30472. Mexican American History**

(3-0-3)

This course is an introductory survey of Mexican American history in the United States. Primarily focused on events after the Texas Revolution, and annexation of the American Southwest, we will consider the problems the Spanish and Mexican settlers faced in their new homeland, as well as the mass migration of Anglo-Americans into the region following the annexation. Throughout the course, we will explore the changing nature of Mexican American US citizenship. Other themes and topics examined will include immigration, the growth of agriculture in Texas and California, internal migration, urbanization, discrimination, segregation, language and cultural maintenance, and the development of a US-based Mexican American politics and culture. Although primarily focused on the American Southwest and California, this course also highlights the long history of Mexican American life and work in the Great Lakes and Midwestern United States. We will conclude with the recent history of Mexican and Latin American migration to the United States after 1965, and the changing nature of Mexican American identity and citizenship within this context.

### **HESB 30473. US Foreign Policy Since 1945**

(3-0-3) Miscamble

This course offers an overview of US foreign policy since World War II, focusing on the major crises and conflicts that have occurred since then—US and Soviet Union, Korea, Vietnam, Gulf War, and Kosovo.

### **HESB 30474. Crime, Heredity, and Insanity in the US**

(3-0-3) Przybyszewski

The 19th century witnessed a transformation in the understanding of the origins of criminal behavior in the United States. For many, a religious emphasis on humankind as sinful gave way to a belief in its inherent goodness. But if humans were naturally good, how could their evil actions be explained? Drawing on studies done here and abroad, American doctors, preachers, and lawyers debated whether environment, heredity, or free will determined the actions of the criminal. By the early 20th century, lawyers and doctors had largely succeeded in medicalizing criminality. Psychiatrists treated criminals as patients; judges invoked hereditary eugenics in sentencing criminals. Science, not sin, had apparently become the preferred mode of explanation for the origins of crime. But was this a better explanation than what had come before? Discussion will be the primary form of instruction.

### **HESB 30475. Public Budget Expenditure Policy**

(3-0-3)

This course will introduce students to normative and positive economic theories of the role of governmental agencies in the economy, privatization and the role of nonprofits; discussion of what level of government should undertake collective action (fiscal federalism); examination of the level and composition of our federal and local governments’ budgets, as well as the current budgeting process; cost-ben-

efit analysis, theoretical and pragmatic practices; and the impact of governmental rules and regulations on the economy.

### **HESB 30477. Sociology of Teaching**

(3-0-3) Kelly

This course surveys the sociological foundations of teaching and learning in America's elementary and secondary school classrooms. The class begins with an examination of teaching as a profession. What attracts individuals to the teaching profession, and why do they leave? What constitutes professional success for teachers? Next, we'll examine how local context shapes the work that teachers do, looking at some elements of schools and communities that impact the nature of teachers' work. The course concludes by looking at the teacher's role in producing educational success by considering two enduring educational problems, how to foster student engagement, and how to teach students of differing abilities within the same classroom. In addition to research in the sociology of teaching, students will be exposed to teacher narratives of success and struggle.

### **HESB 30478. Global Economic History**

(3-0-3)

The course presents a comparative economic history emphasizing the sources of long-term economic growth. The comparative analysis is used to explore different development strategies around the world over the past two centuries, from the British Industrial Revolution to the contemporary developing countries, focusing on examples from Europe, Latin America, and North America. Subjects include population change, migration, technological change, industrialization, market integration, education, inequality, and government expenditure. Each topic is discussed through a current economic policy concern. Special attention will be placed upon the role played by the natural resources endowments and institutional change. The last section of the course centers around the debates on globalization and inclusive development. Does going global foster growth? Who gains and who loses?

### **HESB 30479. Technology of War and Peace**

(3-0-3)

This course surveys the impact of military technologies on world history from the 16th century onward. Topics include the rise of gunpowder weaponry and the fortification revolution in the early modern period, navalism, particularly in the 19th century, the role of military technologies in European colonial expansion, and the science-based military of the 20th-century chemical and biological (and so-called "soft-kill") weapons, leading up to the age of nuclear weapons. The course considers also military technologies as deterrents, military technologies as expressions of culture, and the issue of warfare as a stimulus to technological development.

### **HESB 30480. Labor and America Since 1945**

(3-0-3)

This course explores the relationship between workers and the labor movement to American politics and culture since 1945. The United States emerged from World War II as the strongest global power, and its citizens subsequently enjoyed a long postwar economic boom that created what we might call the first truly middle-class society in world history. At the heart of that new society was the American labor movement, those unions like the United Auto Workers and the United Steel Workers who ensured that at least some of the postwar profits made it into the wallets of workers and their families. Today, however, unions represent only 8 percent of workers in the private sector. What accounts for the decline of organized labor since the 1950s? What has the decline of the labor movement meant for workers specifically, and the American economy and politics, more broadly? How and why have popular perceptions of unions changed over time? What has been the relationship of organized labor to the civil rights movement, feminism, and modern conservatism? What is "globalization" and what has been its impact upon American workers and their unions? Through an exploration of historical scholarship, memoirs, polemical writings, and Hollywood films, this course will try to answer these questions. Students interested in politics, economic development, international relations, social justice, human rights, peace studies, or mass culture are particularly welcome.

### **HESB 30481. American Voting and Elections**

(3-0-3)

This course will examine voting and opinions, and the linkage between political leaders and the mass public. Possible topics include an introduction to electoral analysis; the history of recent electoral politics; the nature of political participation, especially the rationality of voting turnout and non-electoral specialization; party identification and opinions, attitudes, and ideology; social groups and cultural identities; mass media and image campaigns; and differences between presidential and congressional elections.

### **HESB 30482. On War**

(3-0-3) Rosato

This course is about the causes and conduct of war. As regards causes, the focus is on evaluating the strengths and weaknesses of the most prominent explanations for the outbreak of major war, including balance of power, regime type (democracy/autocracy), civil/military relations, and the personality traits of individual leaders. As regards conduct, the emphasis is on considering the effect of broad political, social, and economic factors (nationalism, democratization, industrialization, military professionalization) on how wars are and have been fought. Particular historical emphasis is placed on the causes and conduct of great power wars (especially the two World Wars), although other wars will be discussed.

### **HESB 30483. Politics of Money and Banking**

(3-0-3)

This course investigates the political foundations of financial markets and banking regulatory structures. The objective is two-folded: (1) to provide an understanding of the function of money and the banking system within an economy; and (2) to offer an analytical framework with which to understand monetary, financial, and banking regulatory policies. Topics include, among others, the performance of banking systems, the role of international financial institutions, central bank independence, and banking regulation. Comparisons between the US and other banking systems (such as the Brazilian, and the Japanese banking systems) will also be covered.

### **HESB 30484. Intermediate Economic Theory—Macro**

(3-0-3)

An extensive examination of macroeconomics, with particular reference to the determination of economic growth, national income, employment, and general price level.

### **HESB 30485. Economics of Aging**

(3-0-3)

The course covers how the risks of work and the conflict between labor and capital have been handled by welfare capitalism and government policy. We will pay attention to worker response and demands in retirement security—a touchstone for the debate on security and risk. We are concerned with how labor force institutions will respond in the next century given the aging of the workforce. We look especially at two issues: The emergence of women workers into a more secure labor market and the debate about Social Security reform and privatization. We also examine issues of intergenerational equity. There are three readings where the students will be asked to apply abstract neoclassical theory (but they are not highly mathematical.) This is an ambitious class—mixing current policy issues with history and economic theory.

### **HESB 30486. Introduction to Political Economy**

(3-0-3)

The course is an introduction to the "other" side of economics: heterodox economics or political economy. Political economy perspectives include Marxian, Post Keynesian, radical, institutionalist, feminist, and other approaches. The course will also investigate the theoretical and social consequences of different approaches, and how policies and institutional changes that promote social justice and human dignity can be formulated in our current economic environment.

### **HESB 30487. Population Dynamics**

(3-0-3)

Demography, the science of population, is concerned with virtually everything that influences, or can be influenced by, population size, distribution, processes, structure, or characteristics. This course pays particular attention to the causes and consequences of population change. Changes in fertility, mortality, migration, technology, lifestyle, and culture have dramatically affected the United States and the other nations of the world. These changes have implications for a number of areas: hunger, the spread of illness and disease, environmental degradation, health services, household formation, the labor force, marriage and divorce, care for the elderly, birth control, poverty, urbanization, business marketing strategies, and political power. An understanding of these is important as business, government, and individuals attempt to deal with the demands of the changing population.

### **HESB 30488. The Internet and Society**

(3-0-3)

This course will spend the semester studying the impact the World Wide Web has had on several key areas of our society, including communications, commerce, marketing, productivity, education, collaboration, and our sense of community. Through a combination of discussion, group presentation, guest lectures, and out-of-class research, students will be exposed to some of the profound effects this medium has had on our culture. In spite of the bursting of the dot com bubble, the Web has left all of the above-mentioned areas substantially changed, many for the long term. The positive and negative forces brought on by this technology must be recognized, studied, and dealt with if we are to truly embrace the momentous opportunities brought about by the World Wide Web.

### **HESB 30489. Gender Roles and Violence**

(3-0-3) Sobolewski

Much of the violence in contemporary society—whether it is domestic abuse, school shootings, gang warfare, video games, or inter-ethnic conflict—has something to do with gender. This course explores the connection between gender role socialization and the expression of conflict or aggression. Through readings, discussions, films, and projects, students will be encouraged to examine sex differences in violent behavior as the outcome of complex processes. We will try to understand those processes better and develop the ability to describe the causes and their effects.

### **HESB 30490. International Migration and Human Rights**

(2-0-2) Bustamante

Designed to be either complementary to or independent of International Migration: Mexico and the US I. Both correspond to relations between theory and methods for the scientific research on the subject. Each course stands by itself inasmuch as the distinction between theory and methods can be made. The common objective of the courses is to prepare students to design research projects on international migration with emphasis on immigration to the US for these and dissertations. Course II refers to a review of basic questions on this subject and the methods through which these questions have been adequately or inadequately answered. The numbers, the impact, the nature, the structure, the process, the human experience, will be discussed in terms of the research methods commonly used to approach them.

### **HESB 30491. Employment in Changing Economy**

(3-0-3) Hachen

How is employment changing? What distinguishes the new economy from the old economy? How do people find better jobs? What are employers looking for when they attempt to meet their labor needs? This course will attempt to answer these and other questions by contrasting the new and the old economy. In the old economy, some people worked for the same employer their entire lives. Why did workers stay with the same firm? Why did employers want to retain their employees? In the new economy, employers seem to want flexibility. Why do they want flexibility, and how do they attempt to achieve it? What consequences does the quest for flexibility have for how people become employed?

### **HESB 30492. Consumerism in Twentieth-Century US**

(3-0-3) Orr

By 1900, the development of mass production made the possibility of consumption for private enjoyment available to increasing numbers of Americans. This

course will explore the creation of contemporary consumer culture beginning with the advent of mass production and mass marketing in the 19th century, including the rise of advertising and the growth of department stores. We will then examine how the ideas and institutions associated with consumerism changed throughout the 20th century during times of depression, war, and into the present. Additional topics will include how consumers have used consumption to fashion individual and group identities, as well as how American have embraced or challenged consumerism over time.

### **HESB 30493. New US Nation, 1781–1848**

(3-0-3) Grow

This course examines the social, political, and cultural history of the United States from the Constitutional Convention (1787) to the end of the Mexican-American War (1848). This time period witnessed rapid changes in American life as citizens of the new nation sought to define the meanings of the American Revolution and wrestled with the changes it unleashed. Themes will include the democratization of politics and society; westward expansion; early industrialization and class conflict; Native American resistance and removal; immigration and nativism; religious impulses and reform movements; changing ideas about gender and race; and slavery, resistance to slavery, and growing sectionalism between North and South.

### **HESB 30494. Religion and American Politics**

(3-0-3) Noll

Since the early 1950s, religion has been an obviously major factor in American political life driven first by the African American leaders of the Civil Rights Movement and then, in more recent decades, by the concerns of the Religious Right. Especially after the election of John F. Kennedy in 1960, Catholics have also been fully recognized participants in the nation's political uses of religion as well as in debates over whether and how religion should be used politically. This class tries to show that modern political-religious connections are but new instances of what has always gone on in the American past. The shape of contests over religion and politics may have changed considerably over time, but not the fact of dense connections between the two spheres. Readings for the course include primary and secondary accounts that treat notable incidents, problems, debates, and controversies from the colonial period to the present. Lectures spotlight major issues of historical interpretation, like religion and the Constitution, religion and antebellum debates over slavery, religion and Reconstruction, Catholic versus Protestant understandings of liberty, civil rights and the New Christian Right. Opportunities for student writing will feature responses to primary documents and historical interpretations.

### **HESB 30495. Development of American Political Institutions**

(3-0-3) Griffin

The US Constitution has remained essentially intact since 1787, yet contemporary political institutions and practices would hardly be recognizable to a citizen of the 19th century. Thus, the history of our political institutions is one of change and reform, as well as stability and persistence. This course will focus on the development of the US political system from the late 18th to the early 20th century. Of particular interest will be the evolution of legislative, executive, and electoral institutions.

### **HESB 30496. American Men, American Women**

(3-0-3) Ardizzone

What does it mean to be male or female in America? How different are our ideas about gender from those of other cultures? This course will focus on the 20th century and look at the origins and development of masculine and feminine roles in the United States. How much have they changed over time, and what aspects have been retained? We will explore the ways that cultural images, political changes, and economic needs have shaped the definition of acceptable behavior and life choices based on gender. Topics will range from Victorian ideals through the Jazz Age and war literature to movie Westerns, '50s television families, and '60s youth culture; and into recent shifts with women's rights, extreme sports, and talk shows.

### **HESB 30497. Great Depression**

(3-0-3) Giamo

This course explores the culture and society of one of the most turbulent periods in American history. The economic collapse and ensuing national crisis altered the political, social, and symbolic landscape of the country. We will examine the historical context and social activism of this period (1929–41), including the conditions and responses of those affected by various hardships. Also, we will be concerned with the cultural expression and representation of Depression America. How was the crisis confronted? What ways of seeing and understanding the events, and the people who lived through them, provided value, merit, and worth? In what ways did social positions and cultural values clash? In order to answer these and related questions, we will study the role and importance of documentary expression (letters, photographs, reportage), the art of urban social realism, literature, and film.

### **HESB 30498. The Politics of Educational Policy**

(3-0-3) DePouw

This course will provide an overview of the major political processes, structures, and issues in education. We will analyze the nature of policymaking in education and discuss the roles of the various participants in the decision-making process. In addition, we will critically analyze the language of educational policies and the impact that these policies have on various stakeholders. Finally, we will examine the roles that legislation and courts have in shaping education policy.

### **HESB 35090. Capital Punishment Litigation**

(1-0-1)

Currently, nearly 4,000 prison inmates in the US are awaiting their execution. In this class, students in the University of Notre Dame Washington Program will assist one such inmate, incarcerated in Virginia, with his legal appeals. This course is open to four students, who will receive one pass-fail credit for their work. It is expected that each student enrolled in the course will make at least one visit to Virginia's death row.

### **HESB 35094. Children's Rights Advocacy**

(1-0-1)

Special issue project under the direction of Thomas Kellenberg.

### **HESB 35095. Special Studies**

(3-0-3)

Special Studies under Thomas Kellenberg, Arts and Letters elective credit.

### **HESB 35206. Democracy in Age of the Web**

(3-0-3)

This course focuses on the paradoxical implications of the Internet revolution for modern democracy. On the one hand, we will investigate the potentially liberating and liberalizing implications of new communications technologies on democratic cultures worldwide. On the other, we will consider the threats to personal privacy and democratic liberties presented by these revolutionary developments.

### **HESB 35433. Integration in Global Economy**

(3-0-0)

dept

### **HESB 40405. Global Food Systems**

(3-0-3)

This is a course on food in society. The role food plays in the life course of a society may seem self-evident or commonplace to some. Yet food is more than the physical substances that sustain life. Food is intertwined with religion and central to many rites and rituals. Food is linked to medicine, which was largely based on dietary principles until well into the 18th century. Technology related to production of food has affected the inequalities found in all societies. The politics of food plays a major role in understanding the "social issues" affecting many nations around the globe. This is a fascinating area of study: that which we take for granted so much of the time is intertwined with economics, politics, psychology, social life, and law.

### **HESB 40416. US Presidents: FDR to Clinton**

(3-0-3) DeSantis

A study of the personalities, style, policies, and performances of American presidents from Franklin D. Roosevelt to Bill Clinton as they developed the modern American presidency and made it the most important elective office in the world.

### **HESB 40420. Current Trends in Computer Applications**

(3-0-3) Berzai

The current trends course allows the students to think about and discuss issues openly that pertain to computer ethics, business ethics, and some social ethical issues. We start out by having an understanding of the distinction between the terms "moral" and "ethical". The class works through the generally accepted theories for resolving moral and ethical conflicts. These are egoism, natural law, utilitarianism, and respect for persons. We also discuss the reasons businesses exist and what they think their responsibility toward society is now and how it might change in the future. The students also debate several business ethical issues. In the area of information technology, there is discussion about what the student sees as right or wrong, ethical or not ethical, in the many issues of discussion that are presented.

### **HESB 40485. Leadership and Social Change**

(3-0-3)

This course is intended to introduce seminar participants to themes in leadership. Through readings, presentations, and other media (such as film and interaction with visitors), the course aims to provide critical reflections on the nature and sources of differing types of leadership and authority, and a deeper understanding of the vocation to lead.

### **HESB 43020. Research Seminar in Public Policy**

(3-0-3) De Ridder

All Lyman interns are required to enroll in this post-internship seminar. Based on their internship experience, students will be asked to select a research topic, formulate a proposal, and write a research paper. Initial class meetings will focus on the nature of policy research. Students will then formulate a research proposal to be discussed and presented in class. After fall break, each participant will pursue research on an individual basis. Research findings will be presented in class at the end of the semester.

### **HESB 43500. Restoring Economic Vitality/Inner City**

(3-0-3)

This community-based learning and research course will examine the political economy of US inner-city revitalization, with South Bend as a case study. Community-based learning (CBL) requires that students both learn and apply what they are learning within a setting outside the classroom. In addition to in-class seminar sessions, CBL activities will include meetings with local organizations that link public agencies and private enterprise; visits to varied businesses located in urban South Bend; and meetings with area government representatives and relevant church and neighborhood organizations. During the first third of the semester, students will learn about the central problems of the US city and their roots, viewing the issues firsthand locally. In the second third, they will study how inner-city problems are being addressed in selected areas of the country as well as in South Bend.

### **HESB 43502. Self, Society, and Environment**

(3-0-3) Weigert

This course introduces students to social-psychological aspects of the natural environment. Issues considered include interacting with different environments, symbolic transformations of environments, competing accounts and claims concerning environments. With an overview of basic information, these issues are discussed from the perspectives of individual self and sociocultural institutions. The course touches on alternative ways of envisioning, interacting, and valuing human-environment relations with an eye toward individual and collective change.

### **HESB 43503. Race, Gender, and Women of Color**

(3-0-3)

This seminar analyzes dominant American beliefs about the significance of race and gender primarily through the focusing lens of the experiences of women of color in the US. How did intersecting ideologies of race and gender attempt to

define and limit the lives of women of color as well as other Americans? How have women of color responded to and reinterpreted white American ideas about their identity to develop their own self-defenses and ideologies?

### **HESB 43504. America as a World Phenomenon**

(3-0-3)

This course will consider the United States as a world phenomenon by examining how current globalization processes are prefigured in American history and how they play out in the United States today. Globalization is defined as a set of longstanding and intensifying transformative processes that include the flow of people, goods and services, capital, information, ideas, and other commodities across borders. The United States is considered both product of globalization(s) and agent of globalism. Because the course is organized as a research seminar, students are expected to actively participate in discussions and present their research findings in class.

### **HESB 43505. Introduction to Political Economy**

(3-0-3)

An introduction to theoretical frameworks, economic policies, and social factors often downplayed or ignored in mainstream economics. Topics include alternative theories of political economy, the relationship between economics and politics, and the analysis of institutions.

### **HESB 43506. Society and Culture Through Films**

(3-0-3)

This course will deal with a variety of social issues as they are perceived, conceptualized, represented, and understood by the movies. The focus of this course will not be on the cinema history, cinema structure, or movie-making processes, but on how important human problems such as cultural diversity, race relations, the crafting of national identity and national heroes, urban life, class conflict, family structure, war, and some ideological values such as success, love, happiness, fairness, misfortune, destiny, honesty, faith, and the like are depicted and treated by the movies.

### **HESB 43508. Current Economic Policy**

(3-0-3)

The purpose of the seminar is to discuss current economic policy issues. The students are required to read the newspapers (*Wall Street Journal*, *New York Times*) on a daily basis and be prepared to discuss the economics of what was in the newspaper. Periodically throughout the semester, the students have to write one-to two-page critiques of the coverage of an issue that they found in the newspaper. They are required to write a major paper on a current issue and make a presentation in the seminar.

### **HESB 43509. Cultural Aspects of Clinical Medicine**

(3-1-4) Wolosin

The course examines popular medical concepts and expectations patients bring with them to the clinical or hospital setting, as well as the attitudes, organization, and goals of the clinical medical care. Students divide their time between classroom and service as patient/family liaisons in an area emergency room. Student access to a car is necessary.

### **HESB 43511. Economics, Ethics, and Public Policy**

(3-0-3)

A study of the interaction of economics and ethics, both in economic theory and economic policy. Focus will be on selected economic issues, employment policy, international trade policy, etc. Theoretical issues will include process and end-result theories of justice, Pareto optimality vs. the Common Good, etc. Special attention will be given to the Catholic contribution to the debates.

### **HESB 43513. Family Policy Seminar**

(3-0-3)

The seminar covers family policy in the United States and in other countries with a concentration in the United States. There is comparison of the background, content, and consequences of policies in the various countries. Such provocative topics as welfare policy, parental leave, and childcare are discussed. The relation

between families and the work setting or families and government will also be addressed. A discussion format is used. Students write a term paper on some aspect of family policy. It is directed especially for juniors, seniors, and graduates.

### **HESB 43514. Understanding Story: Culture, Conflict, and Identity**

(3-0-3)

During the last decade, interest in narratives has increased dramatically. Feminist studies, cultural studies, and anthropology have broadened our appreciation for the role story plays, not simply in personal psychology, but also in constructing and mediating our social life. The purpose of this seminar-style course is to investigate the shape, purposes, and multiple meanings of narratives, both in the lives of individuals and within institutions and cultures. In order to understand how story influences personal identity; contributes to or ameliorates conflict; constructs, deconstructs, and reconstructs history; and advances political agendas, we will examine how story is used by (1) journalists in reporting news as story; (2) medical professionals in collecting case histories; (3) ethnographers in describing unfamiliar cultural practices or investigating inter-group or inter-state conflict situations; (4) historians in interpreting the past; (5) political leaders in establishing public policy and political power; and (6) advertising and marketing interests.

### **HESB 43515. Families and Their Interrelationships with Gender and Work**

(3-0-3) Aldous

A consideration of the part gender plays in family processes like the couple formation through cohabitation and/or marriage, having and rearing children, division of labor, and the post-children era.

### **HESB 43516. Confronting Homelessness**

(3-0-3)

The purpose of this seminar is to examine the conditions of extreme poverty and homelessness within the broader context of American culture and society. In order to confront the nature of these conditions, this seminar will draw upon insights from history, literature, documentary film and photography, and the social sciences. We will focus on the degree of permanence and change in our approach to both traditional and modern forms of the social problem. There will be an experiential component to the seminar as well.

### **HESB 43517. The Schooled Society**

(3-0-3)

This seminar focuses on the structure and organization of schooling in American society, and the societal forces that influence decisions about schools and student learning. These forces include legislation governing schooling, and cultural and religious norms that impact schools. The course will cover the role of schools in society; the political, economic, and social dimensions of schooling; education reform and its underpinnings; and the transformation of higher education.

### **HESB 43518. Technology, Privacy, and Civil Liberties**

(3-0-3)

This seminar will examine the many ways in which technology has had (and is having) an impact on civil liberties in the United States. It will also explore how technology affects privacy in the United States and other countries. We will explore various technologies and applications, such as information technology, genetic profiling, radio-frequency identification tags, data mining, thermal imaging, and bio-behavioral technologies (e.g., “functional MRI” of the brain). The course will also examine exactly what we mean by “civil liberties,” by focusing on the US Constitution and Supreme Court case law. We will also examine US law and European Union directives on privacy, to compare and contrast the approaches each takes to protecting personal privacy vis-à-vis information technologies, in particular. The course will rely on the Constitution, case law, texts, and newspapers and magazines as its core reading material. Students will be evaluated on the basis of short written assignments, a midterm exam, participation in a “mock trial” or other major role-playing activity, and a research paper.

### **HESB 43519. Seminar in Health Care Policy**

(3-0-3)

The first segment of the course demonstrates how economics can be applied to the analysis of the health care sector. The second part focuses upon the pending policy debate of how we as a society will provide for the health care needs of the elderly.

**HESB 43521. Latino Economic Development Research and Policy**  
(0-0-2)

This course examines the Latino experiences in the United States and the underlying conditions of Latino workers, businesses, and communities. It begins with a profile of Latino workers by age, gender, education, immigrant make-up, and occupation in the labor market. Students will learn how to use federal and state data to examine Latino workers, income, and occupation status. Students will learn about the industrial and occupational classification systems used by the federal government to study workers and working conditions. They will also study related public policies of the federal government that govern over the human rights, economic status, and economic well-being of all US workers.

**HESB 43524. Unequal America**  
(3-0-3)

Although America is world's richest nation, it has the most unequal distribution of wealth and income in the industrialized world. In this course, we will examine why this is so. In particular, we will examine the following questions: What social forces create inequality in society? Is inequality inevitable? Is there such a thing as "social class"? Who gets ahead, and why? Why is race/ethnicity and gender still related to social status, wealth, and income? Does America have a "ruling elite"? Who are "the poor," and what explains their poverty? Are there social policies that can create more equality in American society? Is that what Americans really want?

**HESB 43526. Research on School Effects**  
(3-0-3)

It might seem a truism that schools have powerful effects on student achievement. Yet beginning with the landmark Equality of Educational Opportunity study in 1966, social scientists have debated the role that schools play in the production of student achievement. Does it matter much, which school a student attends? Why are some schools chronically low performing, and what are the characteristics of more effective schools? Students should have completed coursework in methods and statistics for social research or equivalent coursework before enrolling in this course.

**HESB 43527. Global Sociology**  
(3-0-3)

Globalization, or the spread of international communications and exchange, has impacted many aspects of contemporary societies. This course helps students understand the global economic and political forces that shape people's local and national experiences, and it considers the ways that citizens and states help shape the course of global change. We will explore how global economic and political change affect conflicts within and between nations, as well as how global change impacts the practice of democracy worldwide. The course examines some of the core sociological work in the area of global change, focusing on the development of national and global institutions, the expansion of capitalism, and the emergence of transnational networks of popular groups seeking to shape global conflicts and culture.

**HESB 43528. Migration, Education, and Assimilation: Three Forces that Built America**  
(3-0-3) Wozniak

This course uses the tools of economics to understand driving trends and episodes of migration, education, and assimilation throughout America's history. Readings will apply economic concepts in various historical contexts, from the settling of the country by Europeans to the present day. Examples of course topics include: the major waves of European migration to the US, including waves of Irish immigration; the development and rise of the high school in America; important trends in educational attainment particularly of women and minorities; the economic effects of civil rights legislation; and the English-language-only debate. Economics knowledge at the level of principles of microeconomics would be helpful but is not required. A research paper is required.

**HESB 43529. Labor Relations Law**  
(3-0-3)

A study of the development of common and statutory law with reference to industrial relations in the United States with emphasis on the case method.

**HESB 43530. Problems in Political Economy**  
(3-0-3)

A seminar course on the political economy of globalization. Topics include neoliberalism, corporate strategies, capital mobility, outsourcing, free-trade agreements, international financial crises, the IMF, immigration, race and gender, plant closures, labor solidarity, and union strategies. The course will compare and contrast orthodox views of globalization with perspectives drawn from the writings of Marx, Keynes, Veblen, Polanyi, and other economists in the political economy tradition.

**HESB 43531. Economics and the Law**  
(3-0-3)

This course will introduce students to the economics analysis of our legal framework pertaining to property, contract, and tort law. Additional topics will include an examination of the legal process and the relationship between crime and punishment.

**HESB 43532. Economics of Science**  
(3-0-3) Mirowski

This course describes the changing history of the organization and subsidy of scientific research, then surveys the different methods of economic theories and applied scientific process.

**HESB 43533. Society and Identity**  
(3-0-3)

This course looks at sources, dynamics, and consequences of identity in contemporary society. Identity is conceived as definitions of an individual that self and others use as a basis for interacting with one another. Significant outcomes of the way we are defined are the life chances, evaluations and emotional meanings we experience. The course format is a discussion. Seminar.

**HESB 43534. Sociology of Economic Life**  
(3-0-3)

Economic actions like working, buying, selling, saving, and giving are a fundamental part of everyday life, and all spheres of society, from family to religion to politics, are interrelated with economy. Sociologists examine how social relationships, from small networks to transnational linkages, affect economic actions and their outcomes, and the ways cultural meanings and political strategies shape those social relationships. The goal of this class is to provide students with new perspectives on economic actions by reading recent sociological studies of topics like money, markets, work, businesses, industries, and consumer society.

**HESB 43535. Crime and Deviance in Ideological Perspective**  
(3-0-3) Welch

This seminar course will examine selected issues (e.g., white-collar crime, gang violence, pornography, etc.) in the study of crime and deviance (issues will change each time the course is offered) and compare responses made by those representing the Left and Right in American society. We will critique the adequacy of these responses from a sociological viewpoint.

**HESB 43536. Cultural Sociology**  
(3-0-3) Spillman

In this class, we will examine cultural dimensions of important social processes, and we will survey contemporary sociological approaches to analyzing culture. Examples will include readings on home and work, social hierarchies, political culture, media and the arts, and social change. This class cannot be taken if SOC 30009 has previously been taken; course content may overlap.

**HESB 43537. Environmental Justice**  
(3-0-3) Shrader-Frechette

This course will survey environmental impact assessment (EIA), ecological risk assessment (ERA), and human-health risk assessment (HHRA); ethical and methodological issues related to these techniques; then apply these techniques to contemporary assessments for which state and federal governments are seeking comments by scientists and citizens.

### **HESB 43538. Bio-Medical Ethics and Public Health Risk**

(3-0-3) Shrader-Frechette

Designed for pre-med, science, and engineering students, the course will survey ethical issues associated with current public health problems such as pollution induced cancers; universal health care; occupational injury and death; and inadequate medical attention to prevention, nutrition, and environmental health.

### **HESB 43539. Collective Bargaining: Public Sector**

(3-0-3) Leahy

This course will examine the relevant state and federal laws covering the public-sector collective bargaining. It will examine the various issues and techniques covering collective bargaining in government. The major part of this course will be a game theory in which an actual contract will be bargained.

### **HESB 43540. International Migration and Human Rights**

(3-0-3) Bustamante

This course is an extension from the mini-course to a full term, with a wider coverage of international migration experiences in the world with an emphasis on human rights. It starts with a historical approach to various immigration waves to the United States, from the years of the Industrial Revolution to the present. It focuses on the current debate on the impact of the undocumented immigration from Mexico and Central America, with a discussion of the gap between public perceptions and research findings. Differences between Mexico and the United States' migration policies, and its social and economic implications, are discussed. The recent developments within the context of the United Nations' Commission of Human Rights on the relationship between migration and human rights are also covered.

### **HESB 43541. Religion and American Society**

(3-0-3) Sikkink

This course will explore the role that religion plays in United States society.

### **HESB 43542. Race, Ethnicity, and Education in the Midwest**

(3-0-3) DePouw

The purpose of this course is to examine the complexities of education within local context, and to highlight the unique histories of how race and ethnicity are lived in Midwestern communities. Because much of the academic literature that addresses race and ethnicity focuses on large urban areas or upon the East or West coasts, the Midwestern context is often overlooked. Through our readings and discussions, we will come to better understand the ways in which geographic location, regional history, shifting ethnic composition and regional policy decisions impact public education in the Midwest.

### **HESB 46000. Directed Readings**

(0-0-V)

Juniors and seniors have an opportunity to further their knowledge about a public policy topic through a semester of "a la carte" readings. Permission and proposal must be presented to the director of the program in the beginning of the semester. Number of credits varies.

### **HESB 47000. Special Studies**

(3-0-3)

Special studies to be determined by the professor and the student.

## **Department of History**

### **HIST 10050. African History to 1800**

(3-0-3)

*Corequisite:* HIST 12050

This course introduces students to major themes in African history to 1800. It investigates agricultural and iron revolutions, states and empires, religious movements, and patterns of migration and labor exploitation. The latter part of the course focuses on Africa in the era of trans-Atlantic slave trade, from 1550 to 1800. We will study the various methods that historians use to investigate the past; we will also delve into some of the intellectual debates surrounding pre-colonial Africa and the slave trade. By the end of the course, students will have a firm understanding of states and societies in Africa in the pre-colonial period.

### **HIST 10106. Introduction to Modern South Asian History**

(3-0-3)

More than one-fifth of the world's population lives in South Asia, a region comprised of the modern nations of India, Pakistan, Bangladesh, Sri Lanka, Nepal, Bhutan, Afghanistan, and the Maldives. This introductory course will provide a survey of issues and events in South Asian history from the establishment of British East India Company rule in 1757 to the decolonization of South Asia in 1947. The course will explore the following themes: the rise of a trading company, the East India Company, and its transition into a colonial power; the emergence of a colonial economy; colonial production of knowledge; 19th- and 20th-century cultural, religious, and political movements and formations of new identities; the emergence of elite and popular nationalisms; independence; and the partition of the subcontinent.

### **HIST 10200. Western Civilization I**

(3-0-3) Noble

*Corequisite:* HIST 12200

A survey of the central themes in Western civilization from ancient Mesopotamia to the Renaissance. Emphasis will be on problems of social organization, especially the mutual obligations and responsibilities of individuals and states; evolving concepts of justice; aesthetic standards; religious ideas and institutions; basic philosophical concepts; different kinds of states; and the ideologies that defined and sustained them.

### **HIST 10210. Ancient Greece and Rome**

(3-0-3) Mazurek

An introduction to the major historical and cultural periods of ancient Greek and Roman civilization through close reading of texts central to the Classical Greek and Latin literary traditions. Topics to be considered include concepts of the divine; heroism and virtue; concepts of gender; and democracy, empire, and civic identity. The course aims to deepen students' appreciation for the classical roots of their own social, intellectual, and religious lives.

### **HIST 10400. Western Civilization II**

(3-0-3) Kselman

*Corequisite:* HIST 12400

This course will provide a comprehensive overview of European history over the last four centuries. During this period, European states emerged as powerful institutions, extending their control over the peoples of Europe and battling with each other for territory, subjects, and status, both in Europe and throughout the world. The enormous growth of state power provoked opposition from both elites and ordinary people. This course will explore resistance to the state as well as tracing its growth, with special attention paid to the English revolution in the 17th century, the French and Russian revolutions in 1789 and 1917, and the collapse of the Soviet empire in the late 20th century. Particular attention will be paid to the development of the ideologies of liberalism, socialism, and nationalism, which defined new relationships between people and their states in the 19th and 20th centuries. The changing status of women, and the emergence of feminism as another ideological alternative, will be dealt with as well. The conflicted relationship between Europe and its colonial territories will constitute another major theme.

**HIST 10600. US History I: to 1877**

(3-0-3)

*Corequisite:* HIST 12600

A survey of the social, cultural, and political history of the British North American colonies and the United States to the close of the Civil War. Organized around the question of American “nationhood,” topics include Native American, European, and African encounters; regional development and divergence; imperial conflict and revolution; constitutional development and argument; democratization and its implications; religious impulses and reformism; immigration and nativism; the importance of land and westward expansion; slavery and emancipation; and sectional division and Civil War.

**HIST 10605. US History II: 1877 to the Present**

(3-0-3) McGreevy

*Corequisite:* HIST 12605

This course will be a survey of the political, diplomatic, economic, social, and cultural development of the United States from 1865, the end of the Civil War, to 1988, the end of the Ronald Reagan presidency. Major topics to be covered include post-war reconstruction, the Industrial Revolution of the late 19th century; the progressive legislation of Presidents Theodore Roosevelt and Woodrow Wilson; the causes of the Wall Street Crash and Great Depression; the New Deal programs of Franklin Roosevelt; World Wars I and II; the Fair Deal and containment policies of Harry Truman; Dwight Eisenhower’s Modern Republicanism; the New Frontier of John Kennedy; Lyndon Johnson’s Great Society; the civil rights and feminist movements; Vietnam; Richard Nixon and Watergate; and the presidencies of Gerald Ford, Jimmy Carter, and Ronald Reagan.

**HIST 10612. American Catholic Experience**

(3-0-3)

*Corequisite:* HIST 12612

This course will examine the history of the Irish in the United States. In many respects the Irish are the great success story in American history. They have moved from the shantytowns of urban America to the boardrooms of Wall Street. Along the way they have left their mark on American politics, literature, religion, and the labor movement. These are the areas that the course will study. The course begins in the 18th century when large numbers of Irish immigrated to North America. Then we will examine the Great Famine of the 1840s and the subsequent immigration of over one million Irish people to the US. The great themes of Irish American history—politics, literature, religion, and labor—will be the focus of our study as we examine the Irish during the century of immigration, 1820–1920. We will conclude our study with an overview of 20th-century Irish America and the new Irish immigrants of the 1980s and 1990s.

**HIST 10750. History of US National Security Policy Since the 1890s**

(3-0-3) Soares

In the aftermath of 9/11, with American troops deployed in Afghanistan and Iraq, and concern about the nuclear ambitions of such nations as North Korea and Iran, “national security” is the phrase that is often discussed and is of crucial importance to informed citizens. This course will examine national security policy: what it is, how it is formulated and executed, and how US national security policies have evolved since the 1890s. Using a variety of readings and films such as *Casablanca* and *Dr. Strangelove*, this course will examine US national security policies from the late 1890s through two world wars, the interwar period, the Cold War, the post-Cold War years, and up to the current post-9/11 world. We will identify continuities and departures in historic US national security policies, and consider the roles of policymakers and their critics in a self-governing society.

**HIST 10901. Colonial Latin America**

(3-0-3)

*Corequisite:* HIST 12901

When Columbus stepped ashore in the Caribbean in 1492, he set in motion a process that led to the creation of wealthy Spanish and Portuguese empires in the Americas, the genocide of countless numbers of indigenous men and women, the enslavement of millions of African men and women, and the eventual formation of a variety of independent states competing in the world economy. In this

semester-long survey, we will examine topics in this history that will allow us to consider how history is produced as well as what happened in the past, from various perspectives, from elite colonial administrators and merchants to indigenous peasants and formerly enslaved men and women.

**HIST 13184. History University Seminar**

(3-0-3)

An introduction to the seminar method of instruction that explores the major methodologies of the historical discipline and which accents the organization and expression of arguments suggested by readings in historical topics.

**HIST 13195. American Political Traditions Since 1865**

(3-0-3)

*Prerequisite:* (ALHN 13950 (MAY BE TAKEN CONCURRENTLY) OR ALHN 195)

Students will investigate the political debates—and simultaneous examinations of democracy’s character—that have animated American reformers and intellectuals since the mid-19th century. The focus will be on these political traditions, not the studies of voter behavior or policy implementation that also constitute an important part of political history. The course will begin with discussion of work and labor after the Civil War, and move through the “social question” of the late 19th century; Progressive reform in the early 20th century; the New Deal; the origins of modern conservatism; and various post-World War II social reform movements, from civil rights in the South and North to the battle over *Roe v. Wade* (1973), concluding with discussion of Red and Blue America. Readings will include at least one novel, court cases, speeches, and a sampling of the philosophical and historical literature.

**HIST 13196. The American Revolution**

(3-0-3) Slaughter

*Prerequisite:* (ALHN 13950 OR ALHN 195)

Readings in books and original documents on the background, causes, contexts, events, outcomes, and consequences of the American Revolution, ca.1750–83. We will focus on the social, cultural, intellectual, diplomatic, and political history of the period, and not on wartime combat. The course will decidedly not be military history.

**HIST 20075. Introduction to Islamic Civilization**

(3-0-3)

This course provides an introduction to Islamic civilization and Muslim culture and societies through scholarly works, literature, media clips, films, and audio-video material (some made by the instructor during recent trips to the Middle East). The background readings will provide a context for the audio-visual material, giving a general overview of the history of the Islamic world from the advent of Islam to the present day. The ultimate goal of this course is for students to gain a better understanding of the Muslim peoples and their culture and societies within the broader context of Islamic civilization. Focal point: brief overview of the canons and basic tenets of Islam as a world religion, recognition and transcendence of stereotypes, awareness of Western culture and political influence on today’s Arab-Islamic world and vice versa, and exposure to Middle Eastern culture.

**HIST 20076. Revelation and Revolution**

(3-0-3)

Between the years AD 100 and 1000, Christianity and Islam were born and struggled for supremacy as world empires. The rivalry that resulted was religious and theological, but it expressed itself in story, art, and imagination. This course follows the early progress of a rivalry that continues to our own day. [Topics include history of religious interaction, politics of empire, Arabic literature, mytho-poetics, art, and architecture.]

**HIST 20079. Historical Survey of the Arab Middle East**

(3-0-3) Amar

This course will chart the history of the Arab Middle East from the formative period of the emergence of Islam in the seventh century through the fall of Constantinople in 1453 and the creation of the Ottoman Turkish Empire. Intended to be broad in its coverage and comprehensive in its scope, the course

will introduce students to the social, cultural, and religious crosscurrents that came to define the Arab life and culture in the region.

### **HIST 20106. Introduction to Modern South Asian History**

(3-0-3)

More than one-fifth of the world's population lives in South Asia, a region comprised of the modern nations of India, Pakistan, Bangladesh, Sri Lanka, Nepal, Bhutan, Afghanistan, and the Maldives. This introductory course will provide a survey of issues and events in South Asian history from the establishment of British East India Company rule in 1757 to the decolonization of South Asia in 1947. The course will explore the following themes: the rise of a trading company, the East India Company, and its transition into a colonial power; the emergence of a colonial economy; colonial production of knowledge; 19th- and 20th-century cultural, religious, and political movements and formations of new identities; the emergence of elite and popular nationalisms; independence; and the partition of the subcontinent.

### **HIST 20110. Ancient Japan**

(3-0-3) Thomas

This course provides training in understanding and engaging history as a series of wide-ranging debates. The class will examine three issues: first, the politically charged question of Japan's origins in myth and archeology; second, the question of whether the forces of Chinese culture or nature as disease and environmental degradation defined the Yamato state from the sixth to the ninth century; and, third, whether Heian court power until about 1200 rested on economic, political, military, judicial, or aesthetic grounds. The second purpose of the course, the development of the disciplined imagination necessary to enter another culture and another time, relies on the reading of primary texts in translation. There will be three tests and several classroom assignments.

### **HIST 20200. Western Civilization I**

(3-0-3) Noble

*Corequisite:* HIST 22200

A survey of the central themes in Western civilization from ancient Mesopotamia to the Renaissance. Emphasis will be on problems of social organization, especially the mutual obligations and responsibilities of individuals and states; evolving concepts of justice; aesthetic standards; religious ideas and institutions; basic philosophical concepts; different kinds of states; and the ideologies that defined and sustained them.

### **HIST 20204. King Arthur in History and Literature**

(3-0-3)

This course—intended to introduce undergraduates to one of the major themes as well as to the interdisciplinary approaches characteristic of medieval studies—is a team-taught examination of the development and influence of the legend of Arthur, King of Britain, both in history and in literature. The historical Arthur is very obscure, but he was probably a Romanized Celtic war-leader who fought the invading Anglos and Saxons at the beginning of the history of what was to become England. His memory was preserved in the oral literature of his own people, now called the Welsh, but he was soon converted into a mythic hero surrounded by magical companions. In the 12th century, this legendary Arthur was not only incorporated into the new historiography of England (since 1066 under the rule of French-speaking Normans), but into the new genre of literature created in France around 1150—the chivalric romance—which, itself, embodied a new ideal for the relationship between men and women derived from the songs of the troubadours of the south. The great majority of these tales of love and marvelous adventures written over the next four centuries were to be set in the court of the legendary Arthur, and the Round Table was invented in this period as the central focus of the ideals it was made to represent. History soon began to imitate literature, as kings and princes attempted to emulate the idealized Arthurian court in their tournaments and other court festivities, and from 1330 to 1469 actually founded orders of knights based on the Round Table. The class will read the relevant parts of some of the chronicles, histories, and epics in which Arthur was mentioned, as well as a representative sample of the Arthurian romances of the later period, and of related documents like the statutes of the chivalric orders.

### **HIST 20290. Castles and Courts in Medieval Europe**

(3-0-3)

*Corequisite:* HIST 22290

The expanded title of this course is Castles, Castellannies, and Courts in Latin Europe, 900–1650. This course will examine the high period in the history of the castle—a combination of fort and residence—of the castellany or district subjected to the domination of a castle, and of the household and court of the kings, princes, and barons who built such residences and organized their lives and their activities within their various structures. It will first consider the castle as a form of fortification, review briefly the history of fortifications before 900, and examine the ways in which lords and their builders steadily improved their defensive capabilities in response to new knowledge and to new methods and tools of siegecraft. It will then examine the relationship of the castle to the contemporary forms of nonfortified or semi-fortified house, and finally its relationship to the lordly household (the body of servants organized into numerous departments associated with particular rooms or wings of the castle) and with the court (or body of soldiers, officers, allies, students, and temporary guests) who filled the castle when the lord was present. The course will conclude with an examination of the history of the castellany as a form of jurisdiction. The course will concentrate on the castles of the British Isles and France, but will examine the great variety of types found throughout Latin Europe.

### **HIST 20400. Western Civilization II**

(3-0-3) Kselman

*Corequisite:* HIST 22400

This course will provide a comprehensive overview of European history over the last four centuries. During this period European states emerged as powerful institutions, extending their control over the peoples of Europe, and battling with each other for territory, subjects, and status, both in Europe and throughout the world. The enormous growth of state power provoked opposition, from both elites and ordinary people. This course will explore resistance to the state as well as tracing its growth, with special attention paid to the English revolution in the 17th century, the French and Russian revolutions in 1789 and 1917, and the collapse of the Soviet empire in the late 20th century. Particular attention will be paid to the development of the ideologies of liberalism, socialism, and nationalism, which defined new relationships between people and their states in the 19th and 20th centuries. The changing status of women, and the emergence of feminism as another ideological alternative, will be dealt with as well. The conflicted relationship between Europe and its colonial territories will constitute another major theme. In addition to political and social developments, this course will treat in broad terms the major cultural and intellectual trends in Europe, examining the growth of the critical spirit in the Enlightenment and the emphasis on feeling and subjectivity in the age of Romanticism. The course will conclude with a section on recent developments, focusing on efforts to create an integrated Europe, and on the emergence of the current tensions that divide Europe and the United States. Slides, music, and film will be used to illustrate and supplement material treated in lectures. Students will be assigned a general text and about five additional books, including both primary and secondary sources. The grade will be based on two short essays, a mid-term and final exam, and on class participation. Students registering for this class are also required to take a co-requisite tutorial.

### **HIST 20600. US History I: to 1877**

(3-0-3) Grow

A survey of the social, cultural, and political history of the British North American colonies and the United States to the close of the Civil War. Organized around the question of American “nationhood,” topics include Native American, European, and African encounters; regional development and divergence; imperial conflict and revolution; constitutional development and argument; democratization and its implications; religious impulses and reformism; immigration and nativism; the importance of land and westward expansion; slavery and emancipation; and sectional division and Civil War.

### **HIST 20605. US History II: 1877 to the Present**

(3-0-3) McGreevy

*Corequisite:* HIST 22605

This course will be a survey of the political, diplomatic, economic, social, and cultural development of the United States from 1865, the end of the Civil War, to 1988, the end of the Ronald Reagan presidency. Major topics to be covered include post-war reconstruction; the industrial revolution of the late 19th century; the progressive legislation of Presidents Theodore Roosevelt and Woodrow Wilson; the causes of the Wall Street Crash and Great Depression; the New Deal programs of Franklin Roosevelt; World Wars I and II; the Fair Deal and containment policies of Harry Truman; Dwight Eisenhower's Modern Republicanism; the New Frontier of John Kennedy; Lyndon Johnson's Great Society; the civil rights and feminist movements; Vietnam, Richard Nixon and Watergate; and the presidencies of Gerald Ford, Jimmy Carter, and Ronald Reagan. The class format will be two lectures each week and one discussion session. There will be three short writing assignments, a midterm, and a final examination.

### HIST 20612. American Catholic Experience

(3-0-3)

*Corequisite:* HIST 22612

This course is a survey of the history of Roman Catholicism in the United States from colonial times to the present. We will consider, among others, the following topics: immigrant and ethnic Catholicism, women in the Church, Catholic social reform, devotional and parish life, and the relationship between Catholicism and American democracy. Texts for the course include a general history, two interpretive works, and a course packet of primary sources. Requirements include a midterm and final examination and three short (three- to five-page) essays. Students enrolled in this class must also take HIST 22612, a tutorial.

### HIST 20631. History of American Sport Since 1876

(3-0-3) Soares

Since professional baseball was institutionalized with the establishment of the National League in 1876, sport in the United States has played a large and complex role in American life, intertwined with such developments as the rise of the mass media, democratization of higher education, race and gender issues, and the growing popularity of sport as a form of entertainment exemplified by the rise of the ESPN "family of networks." This course will explore the social, cultural, political, and economic implications of sport in American society since 1876. It will include such topics as the rise of professional sport, the long history and rapid fall of the "reserve clause" that gave so much power to pro sport owners, the origins and development of college sports (and Notre Dame's place in that history), the rise of "sports heroes" in the 1920s, the role of sport in the Cold War, sport and the social turmoil of the 1960s, and sports' impact on changing race relations and gender roles in recent decades.

### HIST 20750. American Men, American Women

(3-0-3)

What does it mean to be male or female in America? How different are our ideas about gender from those of other cultures? This course will focus on the 20th century and look at the origins and development of masculine and feminine roles in the United States. How much have they changed over time, and what aspects have been retained? We will explore the ways that cultural images, political changes, and economic needs have shaped the definition of acceptable behavior and life choices based on gender. Topics will range from Victorian ideals through the Jazz Age and war literature to movie Westerns, '50s television families, and '60s youth culture; and into recent shifts with women's rights, extreme sports, and talk shows.

### HIST 20900. Introduction to Latin American History

(3-0-3)

This course will introduce students to the history of Latin America from the encounter of European and indigenous civilizations in 1492, up to the present. It will cover three major historical periods (colonial, 19th-century, and contemporary), utilizing a variety of sources, including history, literature, and film. The course will pay special attention to such issues as the dynamics of centralization and fragmentation, regionalism and *caudillismo*, political instability, and international relations. However, it will also serve as an introduction to Latin American culture, popular as well as elite, as reflected in literature and art.

### HIST 20910. History of Mexico

(3-0-3)

Mexican history is often portrayed as a recurring conflict between foreign conquests and an authentic Mexican culture. We will examine this theme over 500 years of Mexican history, from indigenous cultures and the Spanish conquest to the 20th-century revolution and its social consequences. Through readings, lectures, discussions, art, and film, we will explore the roots of modern Mexico and its development from the 15th century to the present. No background in Mexican or Latin American history is required.

### HIST 20975. Making Australia

(3-0-3) Miscamble

The struggle to "make" Australia, as opposed to replicating Britain, got underway early on after European settlement, and it has been in process ever since. This course will seek to understand and illuminate this nation-building process. Approximately two-thirds of the course will be devoted to examining the major issues in Australia's history, beginning with an appropriate treatment of Aboriginal history through to the present debates over Australian identity and the nation's political structure. The final third of the course will explore important issues in contemporary society and culture. This course will have special interest for students who either have studied or plan to study in the Notre Dame Australia program. In addition to reading five or six books, students will view a number of important Australian documentary and feature films. A willingness to participate in extracurricular activities is a prerequisite for the course. (Please keep Wednesday evening clear in your schedule.) The course will involve lecture, discussion, and class presentations. Students will write a 10-page research paper and take midsemester and final examinations.

### HIST 30050. African History to 1800

(3-0-3)

*Corequisite:* HIST 32050

This course introduces students to major themes in African history to 1800. It investigates agricultural and iron revolutions, states and empires, religious movements, and patterns of migration and labor exploitation. The latter part of the course focuses on Africa in the era of trans-Atlantic slave trade, from 1550 to 1800. We will study the various methods that historians use to investigate the past; we will also delve into some of the intellectual debates surrounding pre-colonial Africa and the slave trade. By the end of the course, students will have a firm understanding of states and societies in Africa in the pre-colonial period.

### HIST 30060. African History Since 1800

(3-0-3)

This course will focus on African history from 1800 to the independence movements of the 1960s. In the 19th century, new states, economies, and societies emerged in Africa as African peoples developed new relations among themselves and with the rest of the world. With the "scramble for Africa" of the 1880s, European powers colonized Africa and suppressed many of these processes. In the 1960s, however, self-rule resurged as Africans helped throw off the yoke of colonial rule and form independent nation-states. This course will consider the social, economic, and political history of Africa by using case studies from the Democratic Republic of Congo (Congo-Zaire), Nigeria, Sierra Leone, and South Africa.

### HIST 30078. Hieroglyphs and History

(3-0-3)

This course will focus on Egyptian hieroglyphs both as a means to reconstruct Egyptian history and culture as well as a reflection of that culture. The student will be taught to translate and interpret primary sources, especially on monuments and archaeological finds. Material from the tomb of Tutankhamun will be read and analyzed in detail. In addition, there will be lectures and discussions on specific historical topics and also on developing chronologies, understanding color symbolism, recognizing the numerous Egyptian deities, and interpreting Pharaonic names.

### HIST 30079. Death and the Afterlife in Ancient Egypt

(3-0-3) Ladouceur

*Prerequisite:* (HIST 30078 OR CLAS 30799)

After an initial survey of historical sources, this course will focus on a wide range of texts, archaeological artifacts, and architectural remains associated with Egyptian funerary practice and conceptions of the Otherworld.

### **HIST 30080. Medieval Middle East**

(3-0-3) Cobb

This course offers a survey of Middle Eastern history from the rise of Islam in the seventh century CE until the rise of Mongol successor polities in the 15th century. The course is structured to cover political and cultural developments and their relationship with broader changes in society during the formative centuries of Islamic civilization. Specific topics include the career of the Prophet Muhammad and the origins of the earliest Muslim polity; the creation and breakup of the Islamic unitary state (the Caliphate); the impact of Turkic migrations on the Middle East; social practices surrounding the transmission of learning in the Middle Ages; the diversity of approaches to Muslim piety and their social and political expression; popular culture; non-Muslims in Islamic society; and the creation of the medieval Islamic "international" cultural order. Among the more important themes will be long-term cultural and social continuities with the Islamic and ancient Near East, and concepts of religious and political authority.

### **HIST 30085. Modern Middle East**

(3-0-3)

This course surveys Middle Eastern history from 1500 to the present. The primary themes to be covered include the emergence and demise of the last Muslim unitary states; European colonial and imperial penetration of the Middle East in the 19th century; the social and cultural impact of imperialism; state-building in the 20th century; new ideologies/nationalisms; and contemporary problems of political and economic development. We will also consider the most important movements of Islamic reform and revival over the past two centuries.

### **HIST 30086. Twentieth-Century Jerusalem**

(3-0-3)

This course examines the relationship between what could roughly be defined as "the West" (Europe and the United States) and Middle Eastern societies from the Napoleonic invasion of Egypt in 1798 until the American invasion of Iraq in 2003. We shall start by trying to make sense of the terms the "West" and the "Middle East." We shall then explore different and eclectic themes such as European colonial penetration into the Middle East, reciprocal stereotypes of the Middle East and the West, cultural exchanges between these regions, and the relationship between contemporary Europe and its growing Muslim population. We shall also examine American involvement in the region by focusing on themes such as oil interests, the Arab-Israeli conflict, and the Iraqi imbroglio. Finally, we shall discuss contemporary Middle Eastern perceptions of the West in light of American hegemonic power around the globe in general and in the Middle East in particular.

### **HIST 30087. The Israeli-Palestinian Conflict**

(3-0-3) Kaufman

This class discusses the roots, evolution, current situation, and prospects of resolution of the Israeli-Palestinian conflict. In order to better understand this theme, the class will also locate this conflict in larger regional and global perspectives. Thus, issues such as nationalism in the Middle East, colonial impact in the region, the Arab states and their involvement in the conflict, and Cold War and post-Cold War dynamics, will all be an integral part of the class discussions. We will also juxtapose the competing narratives of Israelis and Palestinians toward this conflict. Finally, we will engage in an un-historical practice by looking at the future and thinking about possible avenues for concluding this protracted conflict.

### **HIST 30099. Borders, Boundaries, and Frontiers**

(3-0-3)

This course explores political borders, boundaries, and frontiers and their changing meaning and dynamics from the beginning of the colonial era (ca. 1500) until the present. Through the analysis of these three terms we will explore the formation of political borders, life along borders and border conflicts and their resolutions (or lack thereof). Geographically, we will look at areas including the Middle East,

Africa, South-East Asia, and the US-Mexico border in order to analyze this theme through both global and regional perspectives.

### **HIST 30106. Modern South Asia**

(3-0-3)

Home to over a billion people, just over 23 percent of humanity, the South Asian subcontinent is a fascinating laboratory in which to analyze the unfolding of such themes in modern history as colonialism, nationalism, partition, decolonization, post-colonial democracies, the modern state, economic development, center-region problems, and relations between Asia and the West. The course will consider critical themes in social, political, economic, and cultural history, which will include imperialism, capitalism, nationalism, religious politics, regionalism, ethnicity, globalization, diaspora, ecology, social inequality, and gender, development, and democracy. It will not only provide a lively historical narrative told through lectures based on scholarly research and primary texts, but will also seek to embellish this narrative with the perception and articulation of vision and sound, as well as with readings from representative genres of South Asian literature.

### **HIST 30110. Ancient Japan**

(3-0-3) Thomas

This course provides training in understanding and engaging history as a series of wide-ranging debates. The class will examine three issues: first, the politically charged question of Japan's origins in myth and archeology; second, the question of whether the forces of Chinese culture or nature as disease and environmental degradation defined the Yamato state from the sixth to the ninth century; and, third, whether Heian court power until about 1200 rested on economic, political, military, judicial, or aesthetic grounds. The second purpose of the course, the development of the disciplined imagination necessary to enter another culture and another time, relies on the reading of primary texts in translation. There will be three tests and several classroom assignments.

### **HIST 30115. Japan's Imperial House**

(3-0-3) Thomas

Japan boasts the longest, unbroken imperial line extant today, but what does this continuity really mean? This course looks at Japan's emperors and empresses from Antiquity to the present, raising questions about the nature of power, the idea of good government, gender, divinity, war responsibility, and the liberty of the family now called upon to symbolize a purportedly democratic nation. Although most of the course will focus on modern emperors, it begins with Japan's earliest political structures in order to ask such questions as: Was the Imperial House an indigenous idea, or was it an imitation of Chinese ideas of power? Why were there so many powerful women leaders in ancient Japan, and why did Japan stop having empresses on the throne? What is the relationship between the Imperial House and the various religions of Japan? The course will then consider the medieval and Tokugawa periods asking why powerful samurai failed to overthrow the militarily impotent emperors. Finally, the course will turn to the modern period, beginning in the middle of the 19th century with the elevation of the Meiji Emperor to unprecedented prominence. Why was the ancient imperial house used to modernize Japan? Even though the sex of emperors has been male for centuries, why were ancient emperors female, and why is the imperial gender (and Japan as a whole) in the modern period often regarded as female? Was Hirohito guilty of fomenting war? What is the function of the Imperial House today? This course sweeps through myth and 1500 years of Japanese history, tracing the permutations, continuities, and discontinuities of the imperial line.

### **HIST 30120. Modern Japan**

(3-0-3) Thomas

This introduction to modern Japanese history focuses on political, social, economic, and military affairs in Japan from around 1600 to the early post-WWII period. It considers such paradoxes as samurai bureaucrats, entrepreneurial peasants, upper-class revolutionaries, and Asian fascists. The course has two purposes: (1) to provide a chronological and structural framework for understanding the debates over modern Japanese history; and (2) to develop the skill of reading texts analytically to discover the argument being made. The assumption operating both in the selection of readings and in the lectures is that Japanese history, as with all histories, is the site of controversy. Our efforts at this introductory level will be

dedicated to understanding the contours of some of the most important of these controversies and judging, as far as possible, the evidence brought to bear in them.

### **HIST 30140. Pre-Modern China**

(3-0-3)

The course will provide a general survey of Chinese history from the Shang Dynasty (1766–1027 BC) to AD 1600. Besides highlighting the major developments of each dynasty, the course will devote special attention to the Confucian and legalist underpinnings of the Chinese empire, the influence of Buddhism on Chinese society, the emergence of gentry culture and the civil service examination system, and the phenomenon of “barbarian” conquest and cultural interaction.

### **HIST 30141. History of Chinese Medicine**

(3-0-3)

In light of the contemporary currency of certain Chinese practices in the field of alternative medicine, this course will explore the phenomenon of Chinese traditional medicine in both its historical and contemporary settings. The first unit, *Medicine in Ancient China*, will explore the earliest medical ideas of the Chinese and will demonstrate how the state’s political unification gave rise to a correlative cosmology that not only included Heaven and Earth, but also human beings as integral elements of an organic cosmos. The second unit will explore the influences and contributions of Taoism (Daoism) and Buddhism to Chinese medicine, and will explore what it meant to be both physicians and patients in late imperial China. The third unit will focus on medicine in contemporary China and will feature the experiences of Elisabeth Hsu, a student of Chinese medical anthropology who, as a part of her doctoral research, enrolled as a student in Yunnan Traditional Chinese Medical College between September 1988 and December 1989. We will conclude the course with a brief examination of the influence of Chinese medicine on the contemporary world.

### **HIST 30142. Chinese Mosaic: Philosophy, Politics, and Religion**

(3-0-3)

This course is a special-topics class that provides an introduction to the diverse life ways constituting the puzzle of the Chinese people. The course will chart the terrain of current Chinese imagination as it has been shaped from the contending, and often contentious, influences of religion, philosophy, and politics, introducing students to the heralded works of the Chinese intellectual tradition, while at the same time requiring critical engagement with the philosophic and religious traditions animating this culture. Thus, as they learn about China, students will also reflect on how it has been interpreted by Chinese and by Westerners. From readings in both primary texts and secondary interpretations, the class will reconstruct the ethos of the Chinese, attending particularly to the ways in which inherited traditions have been affected by the rise of the modern, authoritarian state. Our concerns will include questions of philosophy as a response to moral crisis, the abridgement of tradition in ideology, the creative reinvention and persistence of popular religion, and the politics of representation. From our attempts to address these concerns, we will reconstitute the philosophic discourse of ancient China and the religious practice of the present in an unconventional, but more evocative, manner that engenders understanding of contemporary political resistance to single-party rule.

### **HIST 30143. Chinese Ways of Thought**

(3-0-3) Jensen

This is a special-topics class on religion, philosophy, and the intellectual history of China. Conventionally, it is assumed that the religion and philosophy of the Chinese can be easily divided into three teachings: Daoism, Buddhism, and “Confucianism.” This class questions this easy doctrinal divisibility by introducing the student to the worldview and life experience of Chinese as they have been drawn, and local cultic traditions, worship and sacrifice to heroes, city gods, earth gods, water sprites, nature deities, and above all, the dead. China’s grand philosophical legacy of Daoism, Buddhism, “Confucianism,” and later “Neo-Confucianism,” with which we have become familiar in the West, derived from the particular historical contexts of local practice and it was also in such indigenous contexts that Islam and later Christianity were appropriated as native faiths.

### **HIST 30144. Introduction to Chinese Culture and Civilization**

(3-0-3) Yang

This is a survey course that introduces the students with little or no knowledge of the Chinese language or culture to the major aspects of Chinese cultural tradition from the dawn of its civilization to the present time. Readings (in English translation) include traditional Chinese historical, philosophical, political, religious, and literary texts, as well as modern scholarship. Students are encouraged to bring in their experience, living or reading, of Western culture in order to approach the Chinese texts from a comparative perspective. This course will use a combination of lectures, discussion, and presentation by students. Movie documentaries will also be used from time to time. Reading assignments should be done before the lectures and in the sequence as they are given in the course schedule for each class so that the students may be ready for discussion in class. Whereas their amount and level of difficulty vary, the texts always demand careful and thoughtful reading.

### **HIST 30150. Modern China**

(3-0-3)

The course will provide a general survey of Chinese history from 1644 (the establishment of the Qing Dynasty) to the present. It will highlight China’s evolution from a period of strength and unity during the last dynasty to a period of disunity and weakness during the revolutionary period 1911–49, back to a period of strength under the Communist government from 1949 to the present. Special attention will be given to the problems of economic modernization, the role that foreigners have played in this process, and the relationship of both to cultural development.

### **HIST 30169. Sex, Freedom, and Economy in Contemporary China**

(3-0-3) Jensen

Today China is undergoing a revolution (a word used so frequently as to be meaningless, but very meaningful in this case as we will learn) in society, politics, economy, and thought perhaps as significant as that which brought the Chinese Communist Party to national power in 1949. The objective of this course, constructed through film and new media investigation, along with readings on social status, identity, sexuality, work, home, youth culture, gender, business, education, sports, and ecology, is to come to an understanding of the multiple domestic forces that have made China a global power. Furthermore, the course will familiarize the student with the very complex ramifications of the passionate national quest for international recognition as it affects every aspect of present-day life while exploring the mercurial manner in which the economic transformation of China has been represented in the media. In this last respect, it represents an experiment in cultural studies in that its avowed subject, contemporary China, is studied in dialogue with the United States—the two nations most exemplifying the promise and terror of modernization. No knowledge of Chinese or previous knowledge of China is required.

### **HIST 30201. History of Christianity to 1500**

(3-0-3)

A survey of the development of Christianity from late Antiquity to the eve of the 16th-century Reformation. Emphases include processes of Christianization, definitions of proscribed and proscribed beliefs and practices, institutional elaboration, relations with imperial and royal authority, impact of and on culture, and varieties of religious behaviors. Although the history of the Latin (Catholic) church is highlighted, the dynamics and consequences of its separation first from the Oriental and then from the Orthodox churches will be examined. The course aspires to achieve a routine of interactive lectures. There will, in addition, be three small-group reading seminars and at least one individual conference. Requirements include three short (five to six pages) papers that engage the texts discussed in the seminars, midterm and final examinations, class attendance, and participation. The written examinations seek to assess knowledge applied as analysis.

### **HIST 30211. Sex and Gender in Greco-Roman Antiquity**

(3-0-3) Mazurek

This course examines the differing roles and stereotypes, forms of behavior, and values associated with women and men in Greco-Roman Antiquity. Special attention is given to the preoccupations of the Greeks and Romans with the categories of “female” and “male” and to the dynamics of relations and relationships between

women and men. The course both deepens knowledge of Greco-Roman society and provides an informed background for contemporary gender debates.

### HIST 30212. History of Ancient Medicine

(3-0-3) Ladouceur

This course will trace the development of Ancient medicine from the Neolithic period down to the second century after Christ. The emphasis will be on three cultures: Egyptian, Greek, and Roman. How historians use the three main categories of evidence (written documents, human remains, and artistic representations) will be clearly illustrated.

### HIST 30220. History of Ancient Greece

(3-0-3)

The purpose of the course is to provide a basic narrative history of Greece from the Bronze Age through the Roman conquest. The second purpose is systematic insight into special problems of two key phases of Greek development, the archaic and classical periods. The rapid growth of the city-states and the cultural ideals and problems that led to the invention of philosophy and tragedy are considered. The course then takes up the institutions and policies of democratic and imperialistic Athens and the political theories they embodied. The class ends with a look at the new Hellenistic world and the impact of Greek values on Christianity. The grade is based primarily on two essay exams plus the final.

### HIST 30221. Democracy and the Greeks

(3-0-3) Baron

This course builds on CLAS 30105, History of Ancient Greece, and examines the theory, practice, and development of ancient Greek, especially Athenian, democracy. Particular attention is devoted to comparing ancient with modern forms of democracy. Among the special topics studied are the origins of democracy, its advantages and disadvantages as a form of government, Greek ideas of alternatives to democracy, and democracy as an abiding legacy of Greek civilization to the modern world.

### HIST 30222. Gods, Heroes, Mysteries, and Magic

(3-0-3)

Contrary to popular belief, the ancient Greeks were a strange bunch. Their statues were not really pristine white marble; their beliefs were hardly consistently rational. With this mindset as our starting point, in this course we will examine some literary (epic, hymns, tragedy, comedy), archaeological (temples, sanctuaries), and material (vase paintings, coins, votives, curse tablets) remains of the ancient Greek world to develop a picture of its varied and unique religious beliefs and practices. In addition to this historical perspective, this course will also take an anthropological and cultural approach to the study of Greek religion. We will consider anthropological definitions of religion and read comparative material from other cultures. Finally, in articulating Greek religious beliefs and practices, we will further consider how these institutions intersected with politics, gender, and class within and among Greek city-states, focusing on ancient Athens, for which we have the most thorough documentation.

### HIST 30223. Alexander the Great

(3-0-3) Baron

This course examines the military achievements of Alexander of Macedon (356–323 BC) and their far-reaching political, social, cultural, and religious consequences. Topics covered include the Greek, Macedonian, Persian, and other cultural contexts of the time; Alexander's attitude toward divinity (including his own); his concept of empire; his generalship; and his legacy for Greco-Roman Antiquity. Particular attention is devoted to representations of Alexander through the ages, beginning during his own lifetime with the accounts of ancient writers, "historians and others," down to novels and films of the present day. Ancient authors and documents are read in translation.

### HIST 30230. Roman History

(3-0-3) Mazurek

This course introduces students to ancient Roman history by tracing the development of Roman civilization through the major political, religious, and social institutions of the Roman Republic and Empire. Major topics of study will

include Rome's conquests in Europe and the Mediterranean; the careers of Julius Caesar and the Emperor Augustus; and Rome's treatment of foreign peoples and institutions (e.g., early Christianity).

### HIST 30231. Roman Law and Governance

(3-0-3)

The course will provide a historical overview of Roman Republican and Imperial law from the XII Tables to Justinian's *Digest*. We will investigate not only the Roman judiciary and juristic writings, but also the other branches of government, in order to create a thorough understanding of the bureaucratic operation of the ancient Roman state. Specific topics covered include civil law, criminal law, constitutions, juries, jurists, magistracies, assemblies, and provincial administration. In addition to taking a midterm and final, students will write and rewrite one three- to five-page paper. Prior study of Roman history is recommended, but not required.

### HIST 30232. Roman Literature and Culture

(3-0-3)

This course surveys the leading works of ancient Roman literature and examines the cultural contexts in which they were written, received, and transmitted. Students read poetry and prose from many genres, and sample works from 600 years of literary versatility that combined enormous originality with a literary tradition inherited from the Greeks. Among the authors introduced are Plautus, Lucretius, Catullus, Cicero, Horace, Livy, Lucan, Tacitus, Apuleius, Ammianus, and Augustine. Special attention is paid the formal structures of Roman literary works, the cultural issue they raise, and the lasting value of Latin literature to the modern age. The course prepares students for more advanced study in classical literature and culture. Offered annually.

### HIST 30233. The Roman Revolution

(3-0-3)

This course builds on the work of CLAS 30012 and CLAS 30022 and examines the climactic events in Roman history of the late first century BC and early first century AD that changed Rome from an open republic to a repressive military monarchy. Chronologically, the course begins with the appearance on the Roman political stage of the unabashedly ambitious Julius Caesar, and ends with the accession of an hereditary autocrat in the person of the morose ruler Tiberius. Exploring a variety of sources, the course focuses on the political tensions and civil commotions of the revolutionary era associated with warlords like Pompey, Crassus, Caesar, and Antony, and concentrates especially on the rise to power of Augustus, the most ruthless warlord of all, and his creation of a personal political regime that was to last in style for centuries.

### HIST 30250. The World of the Middle Ages

(3-0-3)

*Corequisite:* MI 22001

The Middle Ages have been praised and reviled, romanticized, and fantasized. The spectacular popularity of *Harry Potter*, *The Lord of the Rings*, and *Narnia* have brought a revival of interest in and curiosity about the Middle Ages. But what were they like, these 10 centuries between Rome and the Renaissance? In this course, we will explore major themes and issues in medieval civilization in an attempt to offer some basic answers to that question. We will have in view three kinds of people: rulers, lovers, and believers. But we will also study carefully those who wrote about those kinds of people. We will constantly ask how can we know about the Middle Ages, and what kinds of things can we know? We will consider major literary texts as both works of art and historical documents. We will explore various kinds of religious literature. We will try to understand the limits, boundaries, and achievements of philosophy and theology. Some lectures will incorporate medieval art so as to add a visual dimension to our explorations. This course will constitute an extended introduction to the dynamic and fascinating world of the Middle Ages.

### HIST 30260. Late Antiquity

(3-0-3)

This course will explore the transformation of the Roman World from about AD 300 to 600. We will ask: Was the "fall" of the Roman Empire a civilizational catastrophe? Or was it a slow, messy process, blending continuity and change? Or

was late Antiquity, itself, a dynamic and creative period? Our emphasis will fall on the changing shape of Roman public life; the barbarians and their relations with Rome; the emergence of the Catholic Church; the triumph of Christian culture; and literature, art, and architecture in the late imperial world. There will be a midterm and a final. Students will write either one term paper or a series of shorter papers. Readings will emphasize primary sources.

### HIST 30261. Middle Ages I

(3-0-3) Boulton

This course will examine the history of the Roman world from the time of the first incursions of barbarians into the Roman empire in the 3rd century to the time of the final invasions in the 10th. It will concentrate first on the crises of the 3rd century, and on the consequent transformation of the relatively unified, urbanized, tolerant, polytheistic Roman Empire of late Antiquity into the two distinct, deurbanized, intolerant, monotheistic, and politically divided civilizations of Latin or Catholic Christendom and Greek or Orthodox Christendom. Next, it will briefly examine the emergence in the 7th century of the new monotheistic religion of Islam and of the new civilization and empire centered on it, which quickly conquered not only the old Persian empire but most of the Asian and all of the African provinces of the continuing Roman Empire, and in 711–18 conquered most of Spain as well. The remainder of the course will concentrate on the history of Latin Christendom and its pagan barbarian neighbors to the north and east between the beginning of the Germanic conquests of the western provinces c. 400 and the final conversion of the peoples of central and northern Europe to Christianity and the simultaneous emergence of a new socio-political order in the older kingdoms around 1000. There will be two short papers, two tests, and a final examination.

### HIST 30263. Age of Charlemagne

(3-0-3) Noble

The Carolingian (from *Carolus*, Latin for Charles: Charles the Great—Charlemagne—was the most famous Carolingian) period, roughly the 8th and 9th centuries, was foundational for Western Europe. But this was also the time when the mid-Byzantine Empire consolidated its position, and when the Abbasid family of caliphs introduced important and durable changes in the Islamic world. This course will focus on the West in the age of Charlemagne, but will draw frequent comparisons with and make continuous reference to Europe's Byzantine and Islamic neighbors. The course will explore such themes as Europe's Roman and Christian inheritances from antiquity; the peoples of the Carolingian world; kingship and empire; political and social institutions and ideologies; religious and secular law; war and diplomacy; agriculture and trade; the church—popes, bishops, monks, and nuns; theology; art and architecture; Latin and vernacular literature. Reading assignments will combine modern scholarship and primary sources (in translation). Students will write midterm and final examinations and will choose between several short papers or one long paper.

### HIST 30270. Middle Ages II

(3-0-3)

This course is a thematic survey of the high (1000–1300) and late (1300–1500) Middle Ages. The course begins with an introduction to three emblematic developments of the high Middle Ages: cathedral building, the crusading movement, and the beginnings of the universities. Themes addressed include the nature of high medieval religion, the agricultural and commercial revolutions, and high medieval politics and patronage. Treating the later Middle Ages, the course focuses upon a catastrophic event and an epic poem. The Black Death (and related late-medieval catastrophes) has traditionally been seen as marking a turning point in European history. To what extent is this so? Finally, Dante's *Inferno* will offer a window into key issues of late-medieval religious culture, including papal politics; the role of the laity in religion; late-medieval philosophical thought; heresy; and the Italian city-state as the site of a new Renaissance of learning.

### HIST 30272. Twelfth-Renaissance and Reform

(3-0-3) Van Engen

Twelfth-Century European Renaissance and Reform.

### HIST 30273. World of the Late Middle Ages, 1300–1500

(3-0-3)

The course studies Europe in the time of the late Middle Ages, roughly 1300 to 1500, often called a time of crisis: plague, war, rebellion, and economic upheaval. But it was also a time of enormous achievement, of Dante and Chaucer, of new techniques in warfare and government, of conciliar representation in church and state, and of extravagant display in fashion and building. This course will proceed by way of both secondary and primary readings, with at least three short papers and student discussion required.

### HIST 30282. The Medieval Mind

(3-0-3) Van Engen

This course offers an introduction to thought and culture in the European Middle Ages, the era of Romance, scholastic theologians, and female mystics. After a relatively brief look at the early Middle Ages, the course will focus on the origins of the literature of love and chivalry, of schoolmen in universities, and of women religious writers. There is a general textbook to guide the course, but much of the reading will be in primary sources, that is, in the thinkers and poets and mystics of the medieval period.

### HIST 30291. Politics and Religion in Medieval Europe

(3-0-3)

This course considers the intersection between political action and religious claims in medieval Europe. Virtually all the powers—kings and popes, princes and bishops—claimed to act on religious principle and in accord with transcendent notions of virtue or world order. And yet they fought bitterly with each other, with words and with swords, and mutually condemned one another. The course will begin with the showdown between emperors and popes known as the investiture contest, then take up pivotal figures like Pope Innocent III, King Frederick II, and Pope Boniface IX, and conclude with sections on the spiritual Franciscans and on conciliarism. Two papers based on primary sources, one midterm, and a final.

### HIST 30293. Crusade and Jihad: Medieval Holy Wars

(3-0-3)

This course will provide a history of the crusading movement of Western Europe (c1095–1291 AD) and its impact on the civilizations of the medieval West and Near East. Course material will address the history, not only of the events of the Crusades, but of the peoples and ideas involved in them, as well as their long-term legacies. What were the motivations of the Christian crusaders? How did the Muslims and Jews of the Near East view the Crusades, and how did they respond to them? In what ways did the prolonged contact between these two major civilizations affect the societies, religions, and economies of each?

### HIST 30295. War in the Middle Ages

(3-0-3) Wynn

This course explores war and its impact on religion, society, and politics in Western Europe during the Middle Ages. The years from about 500 to 1500 witnessed a distinctive period in the history of Western warfare, with repercussions still felt today. The period began with an increased emphasis on the importance of cavalry, which ultimately had profound social and economic consequences for Western Europe. As the dominant religion in the Latin West, Christianity permeated the mentality of medieval warriors, providing them with an ideology of war that justified their actions and defined their war aims. Over this period, the technology of war became progressively more lethal, and culminated in the Late Middle Ages with the development of gunpowder weapons that ended the era of chivalric warfare. At the end of the Middle Ages, the demands of war furthered and consolidated the development of effective monarchical states, recognizable as the beginnings of modern France, England, and Spain.

### HIST 30296. War and Diplomacy in the Middle Ages

(3-0-3)

What kinds of governments and “non-state actors” engaged in warfare and diplomacy during the European Middle Ages? Were battles and military campaigns commonplace between approximately AD 500 and 1500? Did the rulers of Europe in this period develop effective strategies for settling their disputes in more peaceful ways? This course will give students the opportunity to answer these and other

questions about the nature of war and diplomacy in the Middle Ages. Topics will include the Roman Empire's efforts to control the waves of Germanic invaders; the dynastic disputes that regularly threatened to destroy the Merovingian and Carolingian Empires; the Viking incursions; the papacy's conflicts with the rulers of Germany; the crusaders' strategies for conquering and maintaining control of the Holy Land; the emergence of the Italian city-states as military powers; and the Hundred Years War. Through lectures, discussions, and the reading of a broad range of primary sources, students will be challenged to think about how various types of medieval rulers used war and diplomacy to achieve their political goals.

### **HIST 30321. Medieval Ireland**

(3-0-3)

Consideration of the period between 950 and 1400 is of crucial importance in understanding Irish history. This course not only covers the range of continuities and radical discontinuities that marked Ireland's development during this time, but charts the attempted conquest of the entire country by the English Crown. The lecture series also seeks to answer a number of questions. Why did the papacy give the English Crown sovereignty over Ireland? Why did a country like Ireland, on the verge of attaining political and economic centralization, not organize better resistance to English attempts to subdue it? Why did the English colony fail to prove more successful in exerting its will over indigenous Irish potentates? Culturally the period also witnessed the growing assimilation of English invaders to the norms of Gaelic Irish politics and society. Lastly, events in Ireland had a serious influence on developments in England, Wales, and Scotland, provoking, amongst other things, the fall of the Plantagenet dynasty and an attempted invasion by King Robert I of Scotland.

### **HIST 30330. Muslims and Christians in Medieval Europe**

(3-0-3)

*Corequisite:* HIST 32330

The encounter between Christianity and Islam began in the 7th century AD, the time of the Prophet Muhammad. Within a few centuries, Islamic rule had spread across the southern Mediterranean world, from Syria to Spain. This shift initiated a long-term relationship—sometimes hostile and sometimes peaceful—between Christians and Muslims in these regions. The neighboring presence of Islam had an enduring influence on medieval Christian theology, philosophy, medical knowledge, literature, culture, imagination, art, and material life. Likewise, developments in Christian Europe and Byzantium, especially the Crusades, affected the Islamic world. This course will trace the history of the Christian-Muslim relationship, from its beginnings in the early medieval period until the Renaissance (15th century). The heritage of this medieval encounter still has profound resonance in the modern world of today.

### **HIST 30331. Medieval Spain: Land of Three Religions**

(3-0-3)

This lecture course will cover the history of medieval Spain from the Visigothic period (6th to the 7th centuries) until the time of Ferdinand and Isabella (15th century). The main focus of the course will be the interaction (both congenial and confrontational) of the three religious groups resident in the Iberian Peninsula: Christians, Jews, and Muslims. The course will proceed roughly chronologically, with pauses to consider particular topics in social, intellectual, and economic history. Interspersed with lectures, discussion sessions will concentrate on close readings of primary texts and consideration of some of the historiographical problems peculiar to Spanish history. There will be several short papers, a midterm, and a final exam.

### **HIST 30352. The Reformation**

(3-0-3) Gregory

*Corequisite:* HIST 32352

A narrative history of Christianity in Western Europe from ca. 1500 to ca. 1650, which takes an international and comparative perspective, including Catholicism, Protestantism, and radical Protestantism. Topics covered include Christianity on the eve of the Reformation, Christian humanism, Luther and the German Reformation, the Peasants' War and Anabaptism, the English Reformation, Calvin and Calvinism, Catholic Reform and the Council of Trent, the French Wars of Religion, confessionalization, the Thirty Years War, and the English Revolution.

Major themes include matters of religious content (doctrinal positions and devotional sensibilities), the relationship between different Christian groups and political regimes, the impact of religious changes across the population, and the definitive emergence of Christian pluralism. Lectures plus discussion.

### **HIST 30353. The Catholic Reformation**

(3-0-3)

*Corequisite:* HIST 32353

This course will examine some of the main historical realities, theological developments, and traditions of spirituality within Roman Catholicism ca. 1450–ca. 1700, the period of Catholic reform both before and after the emergence of the Protestant Reformation. The class format will be two lectures plus one discussion-based tutorial section per week, the latter based on the reading of primary sources in translation. Major topics to be discussed include the character of the late medieval church and reforming efforts within it (e.g., the Observantine movement, Christian humanism); Roman Catholic response to the Protestant Reformation, including the Roman Inquisition; the revival of existing and emergence of new religious orders (especially the Society of Jesus); the Council of Trent and its implementation among the clergy and laity; Catholic missionary activity in Asia and the Americas; post-Tridentine Catholic art and scholarship; the relationship between the Church and European states in the 16th and 17th centuries; Jansenism; and the flowering of Catholic spirituality in the 17th century.

### **HIST 30398. Madness and Us: A History of Psychiatry From the End of the Eighteenth Century Through the Present**

(3-0-3) Merie

The course is a thematic overview of the history of psychiatry from its inception at the end of the 18th century to the present day. It raises issues concerning: the nature of the self and its relationship with social compulsion and state power; the connection between body and mind; the nature of disease and illness; the relations between the individual and the expert; the position of marginal groups (women, colonial subjects, homosexuals, etc.) vis-a-vis social norms and authority.

### **HIST 30401. History of Christianity II, 1500 to the Present**

(3-0-3)

This course surveys the development of modern Christianity, with emphasis on the West. Subjects include ideas and movements of reform, church government and structures, missionary enterprises, forms of spirituality and worship, and the political role and cultural impact of Christianity. Two examinations and class participation, including three reading seminars with papers.

### **HIST 30405. Europe from the French Revolution to World War I**

(3-0-3)

*Corequisite:* HIST 32405

During this time, Europe changed dramatically in ways that shaped the 20th century: political reform movements advocating nationalism, democracy, and socialism challenged established regimes; the industrial revolution led to massive changes in society and the economy, including the emergence of a large and affluent middle class and an industrial proletariat; European states consolidated power and mobilized popular support and an advanced technology for wars in Europe and throughout the world, into which they expanded as colonial powers; writers, artists and composers reacted to the changes and conflicts with novels, paintings, songs, and symphonies that, in their variety of styles, suggest the vitality and anxiety of this period.

### **HIST 30406. Europe in the Twentieth Century**

(3-0-3)

This course presents a general history of the world from a European perspective, 1917 to 1989. The goal of this course is to convey a broad understanding of various policies—what they have and have not been, the major problems they faced, and the directions they might be taking. The approach of the course is neither revisionist nor traditionalist. In such controversial areas, it is impossible to give really broad answers that everyone will find acceptable.

### **HIST 30407. Europe Between The Wars**

(3-0-3)

Between the end of the First World War and the beginning of the Second, there were only 20 years. But during this short period were Hitler, Stalin, the Great Crisis, the League of Nations, and much more. Understanding the present requires knowledge of these pivotal years.

### HIST 30408. Holocaust

(3-0-3)

*Corequisite:* HIST 32408

In this lecture/discussion class, we will study the Nazi German program of mass killings that has come to be known as the Holocaust. We will explore the ideas, decisions, and actions that culminated in the murder of an estimated hundred thousand people deemed handicapped, half a million Roma (Gypsies), and six million European Jews. The role of historical prejudices, the impact of National Socialist ideology and leadership, and the crucial factor of the war itself will all be considered. We will address the experiences of those targeted for annihilation as well as the actions of perpetrators and the role of others: bystanders, witnesses, and rescuers. At the same time, we will examine how attacks on other groups—for example, homosexuals, Polish intellectuals, Soviet prisoners of war, Jehovah's Witnesses, and Afro-Germans—fit into the overall Nazi scheme for a “new world order.” The legacy of the Holocaust after 1945 will be discussed, as well. Course requirements include short papers in response to weekly readings, a comparative book review, and a cumulative final exam.

### HIST 30409. History of Europe Since 1945

(3-0-3)

This course will include discussion of the history, politics, and culture of the post-World War II period. Beginning with the destruction wrought by the war, it will examine closely the tie between the economic-political resurgence of Europe, and the development of the “Cold War.” Important subjects covered include the development of the European Union, the development of consumer societies, the 1968 turmoil in both the West and East, the establishment and eventual collapse of the dictatorships in Russia and eastern Europe, the growing internationalization of European economies after the 1960s, the “normalization” of politics and societies after 1970, the end of the Cold War, and the major role of European countries throughout the world in the contemporary period. Naturally, the role of individuals in these broad transformations will not be neglected.

### HIST 30410. Elizabethans and Their World

(3-0-3)

England underwent profound changes between the death of King Henry VIII and the death of Elizabeth I, including its establishment as an international economic force and an empire in the making. Social consequences included assertiveness mixed with anxiety, desires for change tinged by fears of disorder, and a new sense of freedom haunted by fears of isolation. Such anxieties found public expression through two contradictory issues: (1) England's role of principal defender of the Protestant Reformation in a Europe increasingly under the influence of an ascendant Counter-Reformation, and in a world now dominated by Hapsburg Spain; and (2) the accident of England's rule by a female monarch, Elizabeth, who dominated domestic and foreign politics, asserting her right as a true king and supreme governor of the English church, while refusing either to produce an heir through marriage or to name a successor. In this turmoil, great literary and artistic flowering took place. This course aims to set the work of the great figures of the “Elizabethan Renaissance”—Shakespeare, Spenser, and Sidney—in their larger cultural and intellectual context, such as political commentaries, social polemics, historical works, crime writing, religious exhortations, ballads, engravings, and maps, which made up the Elizabethans' attempts to comprehend and control their perilously changing world.

### HIST 30411. British History: 1660–1800

(3-0-3) Smyth

This course of lectures and readings concentrates on British (that is, Scottish as well as English) history from the restoration of monarchy in 1660 to the great crisis detonated by the French Revolution and war in the 1790s. Themes include the politics of Protestant dissent, political ideologies, the role of parliament, Jacobitism, and the rise of the radical parliamentary reform movement.

### HIST 30415. England Since 1789

(3-0-3)

The course involves, besides lectures, reading and thinking about, and discussing both the history and the interpretation of major elements in the development of modern English politics, society, and culture. Requirements include regular class attendance and participation, midterm and final examinations, and 20 to 25 pages of writing associated with the small seminars into which the class will divide a few times during the semester.

### HIST 30416. The Great Victorian Experiment: England in the Long Nineteenth Century

(3-0-3)

A thematic survey of Great Britain during the long 19th century, from the impact of the French revolution in 1789 to the first World War I in 1914. The period saw the emergence of many of the most characteristic and most controversial features of the modern world, such as industrialism, capitalism, the welfare state, the expansion of civil and political rights, and the colonial development of the non-western world. The course uses the three themes of introspection, innovation, and inquiry to understand these changes. Nineteenth-century Britain is known for its earnestness, the intensity with which its elites scrutinized their souls on everything from the foundations of faith to social responsibility to their own sexuality. It is known also for an enormous amount of social-technical innovation, planned and unplanned, of steam engines, sewers, and slums, of new ways of organizing work and handling money, of new aspirations, of new classes and class relations, and of new modes of social organization and social control. Finally, it is known as a time of passionate spirit of inquiry, a time of a massive increase in literacy and of hunger for knowledge, a time of immense confidence when it was felt that new knowledge from economics, sociology, biology, geography, and would provide true, rational, and fair answers to all political problems and conflicts.

### HIST 30431. Irish History to 1800

(3-0-3) Smyth

This course explores the main themes in Irish histories from the plantation of Ulster, after 1603, to the rebellion of 1798 and the Act of Union with Great Britain in 1800. Attention focuses on plantation, colonization, and religious conflict; the Cromwellian reconquest and the Williamite wars in the 17th century, and the anti-Catholic penal laws and rise of Protestant Ascendancy in the 19th century. This dramatic and formative period witnessed the emergence of many of the forces and rivalries that shaped modern Irish politics and society and continues to generate lively disagreement among historians today.

### HIST 30432. Irish History II: Ireland Since 1800

(3-0-3)

This course will consist of lectures and readings examining Irish political history and Anglo-Irish relations from 1801 up to and including the current conflict in Northern Ireland. Attention will be given to religious conflict, the development of romantic and revolutionary nationalism, the changing nature of Anglo-Irish relations, and the special problems of the North. A midsemester examination, a paper/essay, and a final will be required.

### HIST 30434. Late Medieval/Early Modern Ireland

(3-0-3)

This course offers new perspectives on the struggle for mastery in Ireland from 1470 to 1660. Though keeping in mind the traditional view of the “English reconquest” (decades of rebellion, dispossession, and plantation until, in the aftermath of Cromwell, all Ireland was finally subjected to English rule), this course will take a different approach. By investigating a range of primary sources from the period, students will explore the interactions between the three different models of conquest: (1) descendants of the old Norman colonists (e.g., Fitzgeralds and Butlers) seeking to finish the job; (2) Tudor reform (inspired by Renaissance optimism), by which the English attempted to establish rule by means of legal, social, and cultural assimilation; and (3) unabashed exploitation by English private entrepreneurs on the make. The most important effect of these “contending conquests” was the way they shaped the diverse responses of the native Irish, ranging from accommodation and assimilation to outright rebellion and national war.

**HIST 30435. Nineteenth-Century Ireland**

(3-0-3) Leaney

Drawing on monographs and general studies, this course invites students to consider how different social groups experienced the profound changes that transformed 19th-century Ireland. Although the course traces political developments, it pays equal attention to socioeconomic and cultural issues, including the shift from high fertility to sexual restraint; patterns of emigration, consumption, and social unrest; improvements in education and literacy; linguistic change; changing devotional practices and cultural “revival” in the late 1800s.

**HIST 30437. Ireland: From Famine to Independence**

(3-0-3)

This course explores Irish politics and society from the Great Famine (1845–49) to the establishment of the independent Irish Free State amidst civil war (1922–23). It examines the causes of the famine and its legacies of mass emigration, nationalism, and rapid linguistic, devotional, and demographic change; the political and social origins of the “Land War”; the politics of Parnell and Home Rule; “New Nationalism” and Ulster Unionism; and the WW I-era “revolution”—that undermined British authority in Ireland and led to the establishment of two new states. Particular attention is given to the “Irish Revolution” (1913–23): its longer-term origins; how and why the British government lost legitimacy in Ireland; the nature of revolutionary violence; who joined the IRA and other nationalist organizations; and what changed, and what remained the same with the achievement of independence.

**HIST 30438. Science and Medicine in Ireland, 1600–1900**

(3-0-3)

This course surveys the history of science and medicine in Ireland from the 17th to the 19th centuries. The course will consider the role of science and medicine in Irish social and political life and will offer a fresh dimension to the cultural and intellectual history of Ireland. Lectures will situate scientists and doctors within their historical contexts, showing how intellectual history intersects with political history. Topics will include science as an instrument of colonialism in Cromwellian Ireland, the scientific satires of Jonathan Swift, the role of the medical community during the Great Famine, women in Irish science, and the role of science in the cultural revival. Note that no scientific knowledge is assumed or required.

**HIST 30450. France: From the Old Regime to the Revolution**

(3-0-3)

In 1700, France, under the Sun King, Louis XIV, was the most powerful state in Europe. Louis’ court at Versailles was a brilliant cultural center, envied by the rest of Europe, whose kings saw France as a model to be emulated. In 1789, the French Revolution challenged and eventually destroyed the monarchy, but the power of France nonetheless grew. By 1800, France, under the leadership of the consul Napoleon, was expanding rapidly in Europe, and would eventually control an empire that included Spain, Italy, and much of central Europe. This course examines French history from the establishment of the Bourbon family on the throne in 1589 to the rise of Napoleon in 1790s, with about one-third of the class concentrating on the revolutionary events that began in 1789. The course is organized around major political developments, and seeks to understand how the monarchy, so potent in 1700, could have collapsed less than a century later. Students will also read, listen to, and view some of the great cultural achievements of the time—the plays of Molière, the music of Lully, the novels of Voltaire, and the paintings of David. The course will generally consist of lectures on Monday and Wednesday and discussions on Friday. Students will read about six books, a mixture of primary and secondary sources, which will form the basis for discussions. There will be a midterm and a final, and students will also write one 10-page essay on a topic of their choice.

**HIST 30451. Modern France**

(3-0-3)

This course will survey the history of France in the 19th and 20th centuries and will balance attention to political and social developments with an interest in French culture. Themes will include the revolutions of the 19th century that culminated in a democratic republic; industrialization and the persistence of the peasant ideal; changes in women’s roles, gender relations, and sexuality;

colonialism and imperialism; victory in World War I; defeat and collaboration in World War II; the role of intellectuals in French social life; decolonization and postcolonialism; cultural and ethnic differences in contemporary France; and Franco-American relations. Students will develop an appreciation for the vitality of the French past and an understanding of the current role of France in Europe and the world. The format will be lectures supplemented by discussions, readings, and some films.

**HIST 30465. Twentieth-Century German History**

(3-0-3)

*Corequisite:* HIST 32465

This course examines modern Germany from national unification in 1871 to the recent unification of the two Germanies and beyond. We will investigate cultural, political, and social dimensions of Germany’s dynamic role in Europe and in the world. Topics include Bismarck and the founding of the Second Reich, World War I and the legacy of defeat, challenge and authority in the Weimar Republic, the National Socialist revolution, war and Holocaust, collapse of the Third Reich, conflict and accommodation in East and West Germany, and unification and its aftermath. Class format will combine lectures with discussion of readings from political, social, literary, and diplomatic sources.

**HIST 30470. Medieval and Early Modern Russia**

(3-0-3) Martin

This course will examine the history of Russia from its medieval origins until the age of Catherine the Great in the 18th century. We will begin with the genesis of Orthodox Slavic civilization in medieval Kievan Rus and that state’s destruction in the Mongol invasion. Then we will study the rise of the tsardom of Muscovy and the fateful developments that nearly doomed it in the 16th–17th century: the reign of Ivan the Terrible, the Time of Troubles, the imposition of serfdom, the schism of the Orthodox Church, and widespread popular revolts. Lastly, we will see how Peter the Great and his 18th-century successors attempted to stabilize the social order, Westernize the upper classes, and make Russia a great European power.

**HIST 30471. Early Imperial Russia, 1700 to 1861**

(3-0-3) Martin

The course begins in the early 1700s with the reforms of Peter the Great, which made Russia into a highly centralized, powerful, oppressive society, whose nobles grew wealthy and Europeanized while its peasants were reduced to poverty and serfdom. Successive tsars made Russia the greatest power of continental Europe, while failing to reform its increasingly archaic sociopolitical order. As a result, the regime ultimately faced a restive peasantry, a radicalized intelligentsia, and deepening economic and military backwardness. The course concludes with the final, vain attempt by the monarchy in the 1860s–70s to stave off revolution by dismantling the system that Peter had created.

**HIST 30472. Late Imperial Russia**

(3-0-3)

This course examines Russian history from the end of serfdom in 1861 to the revolutions of 1917. The instructor will acquaint students not only with the political history of Russia in this turbulent period, but also with topics that are sometimes neglected in broad surveys: the resemblances between Russian serfdom and American slavery; the history of family life, gender relations and sexuality in Russia; the role of religion in defining Russian identities; the psychological underpinnings of political radicalism and terrorism; the difficult relationships between various ethnic groups in the “prison of peoples.” Course requirements will include a short essay, a midterm examination, and a final examination. No prior knowledge of Russian history required.

**HIST 30473. Twentieth-Century Russian History**

(3-0-3) Lyandres

This course will examine some of the most important ideas, events, and personalities that shaped Russian and Soviet history from the beginning of the last tsar’s reign in 1894 to the emergence of the Soviet Empire at the end of the Second World War. In particular, we will explore the role of politics and ideology in Russian society, the origins of Leninism and the creation of the first socialist state

as well as the experience of Stalinism and the Nazi-Soviet War. Students will be asked to take two examinations and to write a term paper.

### **HIST 30474. Russian History Since World War II**

(3-0-3)

This course surveys the history of Russia and its peoples in the second half of the 20th century, with a particular focus on the role of ideology, politics, and culture in Soviet and contemporary Russian society. We will explore the emergence of the Soviet Empire at the end of WW II, the experience of late Stalinism and post-Stalinist socialism, the collapse of the communist regime, and the disintegration of the Soviet Union in 1991, as well as Russia's uneasy transition "out of totalitarianism" during the last decade of the 20th century. Students will be asked to take two exams and to write a 10-page term paper.

### **HIST 30481. East-Central European History II**

(3-0-3)

*Corequisite:* HIST 32481

A survey of the history of East-Central Europe from the partitions of Poland to the outbreak of World War II. The lecture will place special emphasis on the political, social, and cultural histories of Poles, Czechs, Slovaks, Croats, and Hungarians.

### **HIST 30482. Eastern Europe Since 1945**

(3-0-3)

The course surveys the emergence of communist Eastern Europe in the wake of World War II, and then explores the seminal developments that contributed to the collapse of communism. Emphasis will be placed on the Hungarian, Czech, Polish, and Yugoslav experiences. Students in the course will examine the evolution of East European society by reading traditional historical and political writings as well as drawing on literary and film accounts of the period. Although a lecture class, the instructor has reserved Fridays for in-class discussion. Students will read approximately seven books. They will also be expected to sit for a midterm examination and a final examination, and to complete a 10- to 15-page research paper.

### **HIST 30483. History of Eastern Europe in the Twentieth Century**

(3-0-3) Kunicki

*Corequisite:* HIST 32483

This course surveys the history of 20th-century Eastern Europe, the conglomeration of states and nations between Germany and Russia, stretching from the Baltic Sea in the north to the Black and Adriatic seas in the south. The class aims to provide students with a basic understanding of the chronology of events and developmental processes in this part of Europe. It also attempts to answer the question whether "Eastern Europe" is or is not a meaningful historical, political, and cultural construct. Themes include nationalism, the creation of nation-states and the influence of great powers, indigenous fascism, the role of the intelligentsia, Nazi occupation, Stalinism, and the evolution of communism and response from society. Finally, by employing participant accounts, novels, and films, the course will introduce students to the cultures, traditions, and leading voices of the lands and peoples under discussion.

### **HIST 30490. Nineteenth- and Twentieth-Century Polish History**

(3-0-3)

This lecture course explores Polish history from the partitions to the present. Special emphasis will be placed on understanding Poland's changing political, cultural, social, and physical geography. Politically effaced from the map of Europe twice in the two centuries under study, Poland ceased to exist as a political nation between 1797 and 1918 and 1939 to 1945. In the wake of World War II, moreover, Poland's geographies shifted once more as the country changed physical shape and simultaneously came under Soviet rule. Each time independence melted away, the Polish nation grew stronger and experienced social, cultural, and political transformation, ultimately spearheading the drive of all of Eastern Europe to overthrow communist rule. Although basically a lecture course, the instructor will provide ample opportunity for discussion and questions in class. About seven books will be assigned. There will be a midsemester and final examination, as well as a paper.

### **HIST 30491. Modern European Jewish History**

(3-0-3)

A survey of modern European Jewish history, with a special emphasis on Eastern Europe, particularly Poland.

### **HIST 30495. Twentieth-Century Poland**

(3-0-3) Kunicki

*Corequisite:* HIST 32495

This course surveys Polish history from 1900 to the present. It aims to provide a basic knowledge of the major events and processes that shaped the political, social, and cultural history of Poland in the 20th century. Key themes include nationalism and the rise of independent Poland in 1918; democracy and its failure during the interwar period; Nazi and Soviet occupations, and the impact of World War II on Polish society; the imposition and evolution of communism and response from society; the Polish Solidarity movement and the collapse of the communist system; and contemporary Poland.

### **HIST 30498. Polish History Since 1945**

(3-0-3)

The aim of the course is to trace major post-World War II historical processes in Europe by examining Polish history. Therefore, it will survey the emergence of Cold War divisions, anti-communist uprisings, and the offspring of new democracies, which now aspire for membership of the European Union. Students will explore such questions as: How was the installation of communism in Poland ever possible? How did Poles resist the system, and what role did the Catholic Church play in opposition movements? What were the perils of the Polish road toward democracy, and how does democracy work in present-day Poland? We will investigate the role of the US in supporting Poland's way to freedom and get to know the main actors of the Polish political scene. The course is designed to foster a broader understanding of contemporary Poland, a country returning to play a lively role in the world.

### **HIST 30500. Italian Renaissance, 1400–1650**

(2-0-3)

*Corequisite:* HIST 32500

This course examines the political, cultural, social, and religious history of Italy from about 1350 to 1550. Starting with an extended study of Florence, its economic foundations, social and political structures, artistic monuments, and key personalities, the course then examines how the culture of the Florentine Renaissance spread to the rest of Italy, especially to the papal court of Rome and the princely courts of northern Italy, and, finally, to the new nation-states of northern Europe. Key topics will include the growth of the Italian city-state; the appearance of new Renaissance "characters" (the merchant, the prince, the courtier, the mercenary, the learned lady, the self-made man); Renaissance humanism and the classical revival; the relationship between art and politics; and Renaissance ideas of liberty, virtue, historical change, and the individual's relationship to God. The course will not tell a story of steady progress from medieval to modern institutions, societies, and modes of thinking; rather, we will consider the Renaissance as a period in flux, in which established traditions thrived alongside creative innovations and vigorous challenges to authority. Students will write one long paper and take a midterm and a final exam.

### **HIST 30501. Early Modern Rome**

(3-0-3)

This course traces the interlocking histories of the papacy and the city of Rome from the Renaissance to the birth of the modern Italian state. Topics will include the rise and fall of the papal monarchy; cultural and intellectual life at the Vatican court; the urban fabric of Rome from the Renaissance to the Baroque; the peculiar strains of Roman society; and the tumultuous relationship, both political and cultural, between Rome and the rest of Europe from the Reformation to the age of revolution. The course will proceed chronologically, but will pause frequently to examine special topics including the Renaissance cardinal and his household; Michelangelo's Rome; the building of St. Peter's; Jesuit science; the trial of Galileo; archaeology and antiquarianism; the Roman Carnival; the Inquisition; Bernini's Rome; the Grand Tour; Rome in the Romantic imagination; and Napoleon's

Rome. Students will write several short papers in response to readings and visual materials, and take a midterm and a final exam.

### **HIST 30550. Technology of War and Peace**

(3-0-3)

This course surveys the impact of military technologies on world history from the 16th century onward. Topics include the rise of gunpowder weaponry and the fortification revolution in the early modern period; navalism, particularly in the 19th century; the role of military technologies in European colonial expansion; and the science-based military of the 20th century; and chemical and biological (and so-called “soft-kill”) weapons, leading up to the age of nuclear weapons. The course considers also military technologies as deterrents, military technologies as expressions of culture, and the issue of warfare as a stimulus to technological development.

### **HIST 30551. Technology in History**

(3-0-3)

A thematic survey of the history of technology, from the Neolithic discovery of agriculture to the information age. Topics include the chemistry and metallurgy of Antiquity (high-tech ca. 1000 BC), technology in Christian theology; the power revolution of 1200; arms races from the 15th century onward; the marriage of art and science; the industrial, agricultural, transport and communications revolutions; the American system of manufactures; the evolution of the engineering profession; and modern efforts to plan the technological future. These topics form the basis for exploring the following themes: How does technology change? How did we get where we are? Do we have the technology now that we must have, should have, or need to have? What guides technical creativity? How have social effects of technologies been assessed and dealt with? How have technologies fundamentally changed ordinary life and societal organization?

### **HIST 30552. History of Western Medicine**

(3-0-3)

This course introduces students to the history of Western medicine from the pre-Socratics to penicillin; it concludes by applying that history to modern medical questions, including professional identities, emerging diseases, and genetic manipulations. Major themes/topics include changing disease concepts, medical education, medical practitioners, “scientific” medicine, therapeutics, hospitals, and the body; sub-themes include women and medicine, race and medicine, and the patient.

### **HIST 30580. Modern European Imperialism**

(3-0-3)

Whatever prompted a few French priests to leave Europe in the 1840s and journey across the fields and forests of northern Indiana to the site of what would become the University of Notre Dame du Lac? Could their motivations have included elements similar to those prompting and justifying European imperial expansion across the globe? Continuing from an exploration of the above questions, this course will examine the consolidation, progression, disintegration, and consequences of the modern European empires. We will focus on how Europeans forged a cultural identity through their encounters with American, African, Middle Eastern, and Asian cultures. Using readings and film, you will explore how Europeans civilized themselves by constructing, denigrating, and adopting aspects of non-European culture, as well as post-colonial constructions of identity. Finally, we will debate the issue of what current global conflicts owe to the colonial legacy. The class will be organized as a geographical tour of imperialism with thematic detours that will include religion; gender; ecology/biology, medicine, and technology; ethnicity, resistance and class; and terrorism.

### **HIST 30581. Modern European Diplomacy**

(3-0-3)

This course will investigate some of the main problems in the history of European relations from the middle of the 19th century to the present. The emphasis will be on the patterns of political interaction between and among the European powers (Britain, France, Germany, Austria-Hungary, Russia, and Italy). We shall also examine their respective military strategies, both in peacetime and in war, and

whether those strategies changed over time. Our other concern will be to place European relations with the context of the great-power system as a whole.

### **HIST 30582. Twentieth-Century European Women’s History**

(3-0-3)

This course explores European history of the 20th century as it has been shaped, experienced, and interpreted by women. Using a variety of sources—memoirs, government documents, novels, films, and newspaper accounts—we will examine women’s lives from the turn of the century to the present day. Themes to be addressed include suffrage, women and war, the women’s movement, wealth and poverty, paid and unpaid work, women’s bodies and reproductive issues, ethnicity, religion, and popular representations of femininity. Rather than providing a generalized survey, the course will focus on different societies and regions as case studies for specific issues. Course format will combine discussions, lectures, and weekly reading and writing assignments. Reading will include works by people such as Sigmund Freud, Marie Stopes, Sylvia Pankhurst, Alexandra Kollontai, Rosa Luxemburg, Natalia Ginzburg, Dolores Ibarruri, Simone de Beauvoir, Adina Blady Swzajger, Helene Cixous, Mother Teresa, Slavenka Drakulic, and many more.

### **HIST 30583. War, Violence, and Politics in Europe Since World War I**

(3-0-3) Orr

This class will examine the management and effects of armed conflicts on European society and politics since the First World War. Although centered on Europe, this course will be geographically expansive. In recognition of the powerful tie between events in Europe and events in the Middle East or Southeast Asia, the course will study Europe within a global context to probe the interrelation of war and society—and especially democracy—in 20th-century Europe. The overriding question of the course will be, “How has politically motivated violence shaped and been shaped by European societies?” Course themes include the effects of domestic political structures on war, the effects of war on racial and gender norms, the effects of race and gender on war and political violence, and the attempts to come to terms with terror as a political weapon.

### **HIST 30585. History of Fascism, 1919–45**

(3-0-3)

This course focuses on the rise and fall of fascism from D’Annunzio’s seizure of Trieste in 1919 to the fall of the Axis Powers in 1945. We will begin with an understanding of the historical events and key ideas of Italian and French fascism after the Great War. Then we will examine the expansion of fascism into Germany, Spain, Britain, and Japan in the late 1920s and 1930s. We will conclude with a discussion of the fruits of fascism during the Second World War. Throughout the semester students will be asked to compare these different fascist movements with one another. To aid in this comparative task, different themes will be highlighted: themes such as the role of anti-Semitism, the modern aestheticization of politics, fascist relationships with the Christian churches, and the importance of ideology in totalitarian movements.

### **HIST 30601. Colonial America**

(3-0-3)

This course considers the history of New World exploration and settlement by Europeans from the 15th century to the 18th century. It examines the process of colonization in a wide variety of cultural and geographic settings. It explores the perspectives of Indians, Europeans, and slaves with a particular emphasis on the consequences of interracial contacts. We will discuss the goals and perceptions of different groups and individuals as keys to understanding the violent conflict that became a central part of the American experience. Lectures, class discussions, readings, and films will address gender, racial, class, and geographic variables in the peopling (and de-peopling) of English North America.

### **HIST 30602. Revolutionary America**

(3-0-3) Smith

When speaking of the American Revolution, many writers reach for a comment made by John Adams in 1818 that, “[T]he Revolution was effected before the war commenced. The Revolution was in the minds and hearts of the people.” Whether this assertion is true historically or not, it still does not adequately describe what

that revolution was. The American Revolution obviously had its political elements, primarily the formation of the United States. To reach its political goals, military means were necessary. Without a successful War for Independence, there would have been no revolution. To leave matters there, however, would be insufficient. A fuller understanding of the revolution would need to address how it affected the whole spectrum of American life. It would consider the revolution as a social movement that challenged the political and social hierarchies of the day. It would also ask how the revolution affected those who were not white males, especially women, slaves, and Native Americans. Without considering the possible negative implications of the revolution, any telling would be incomplete. This class will take up these challenges and attempt to make a full-orbed presentation of the events surrounding the American Revolution. It will introduce students both to elites and to those whom the popular narrative glosses over. It will attempt to count the losses, as well as the gains, which flowed from the move to independence from Britain. Finally, it will attempt to describe the many changes through this period, which resulted, not only in a new political nation, but in a new society and culture—changes that in varying degrees are still with us today and of which contemporary Americans are the inheritors.

### **HIST 30603. The New American Nation, 1781–1848**

(3-0-3) Grow

This course examines the social, political, and cultural history of the United States from the ratification of the Constitution to the beginnings of the political crisis over expansion and slavery. It covers the democratization of politics and the problems of national independence in the wake of the Revolution; territorial expansion; economic change; the development of regional, class, religious, racial, ethnic, and gendered subcultures; slavery and resistance to slavery; and the new political and reform movements that responded to the era's deep and lasting changes.

### **HIST 30604. US Civil War and Reconstruction, 1848–77**

(3-0-3) DeGruccio

Through intensive reading and writing, students will explore the social and cultural history of America's costliest war. We will focus on various topics as they relate to the war: antebellum origins, religion, gender, Lincoln's reasons for waging war, dead bodies, freedmen's families, black soldiers, and the uses of war memory. This will not be a guns-and-generals-smell-the-smoke course, although knowledge of military matters can be helpful. We will ask and try to answer who really "won" and "lost" the war.

### **HIST 30606. US Gilded Age/Progressive Era**

(3-0-3) Gloege

Through discussion and lectures, students will examine the emergence of a recognizably modern United States. Topics examined will include the emergence of the corporation, Progressive reforms, the changing contours of American religion, the character of the New South, the battle for women's suffrage, developments in the arts, and American involvement in the First World War.

### **HIST 30608. The United States, 1900–45**

(3-0-3) Blantz

The purpose of this course is to study the political, diplomatic, economic, social, and cultural development of the United States from 1900 to 1945. Major topics will include the background for Progressive reform, the New Nationalism and New Freedom administrations of Theodore Roosevelt and Woodrow Wilson, the diplomacy of the early 20th century, the causes and results of World War I, the Republican administrations of the 1920s, the New Deal administration of Franklin D. Roosevelt, isolationism and neutrality in the inter-war period, and the American home front during World War II. There will be a required reading list of approximately seven books, two shorter writing assignments, and three major examinations, including the final.

### **HIST 30609. United States Since World War II**

(3-0-3) Blantz

The purpose of this course is to study the political, diplomatic, economic, social, and cultural development of the United States from 1945 through the presidency of George H.W. Bush. Although the military and diplomatic history of World War II will be considered by way of background, the principal topics of investigation

will be the Fair Deal Program of President Truman, the Cold War, the Korean Conflict, the Eisenhower Presidency, the New Frontier, Vietnam, President Johnson's Great Society, the Civil Rights Movement, the Nixon years, the social and intellectual climate of this post-war era, and the presidencies of Gerald Ford through George H.W. Bush. There will be a required reading list of approximately six books, two smaller writing assignments, and three examinations.

### **HIST 30611. Latinos in the United States**

(3-0-3)

This course will examine the history of Latinos/as in the US. Readings and discussions will trace the founding and development of early Mexican-American communities in the present-day Southwest. We will then topically and chronologically cover the post-1900 urban and regional experiences of Latin American-origin immigrants, migrants, and exiles throughout the US. The focus will be on those people coming from Mexico and the Hispanic Caribbean, but immigrants from Central and South America are also included. Some of the areas of emphasis are the Chicano Movement and civil rights; Latino music and culture; race, ethnicity, and the family; education; and contemporary trends in transnational migration. The instructor will necessarily adopt a comparative approach, and students will study and critique a variety of interpretations and ideologies. Lectures and discussions will be supplemented with visual material. Grading will be based primarily on two midterm essay exams and a final research paper (10 pages).

### **HIST 30612. War, Memory, and American History**

(3-0-3)

Wars have always cast long shadows over American history. The 2004 presidential election—with its heated rhetoric about swiftboats, discarded medals, National Guard string-pulling, and even forged documents—has been a timely reminder that the memory of the Vietnam War continues to pervade American life. These events have coincided with a surge of recent historical scholarship that has argued that memory matters in American history. In particular, battles over the meaning and memory of wars have shaped American culture and politics long after the actual bullets have stopped flying. The memory of wars—how the participants and subsequent generations perceive them, what we collectively remember and what we forget—may be as important as the wars themselves in influencing American culture. This class will examine the memory of wars in American history from the colonial period to the present. We will consider the memory of wars between colonists and Native Americans, the American Revolution, the Civil War, World War I, World War II, and Vietnam.

### **HIST 30613. Violence in US History**

(3-0-3)

In the late 1960s, black militant H. Rap Brown exclaimed, "Violence is as American as apple pie." It might be said that the purpose of this entire course will be to evaluate the truth of Brown's statement. This will be accomplished in two ways: first, by surveying of some of the major episodes and themes of violence in American history, from its colonial origins through contemporary foreign policy and domestic debates; and second, by assessing the meaning of that violence as it simultaneously reflects and shapes American society, culture, and values. This course will include significant reading and writing components, as well as a group project.

### **HIST 30614. History of Education**

(3-0-3)

This course will explore the development of education in the United States from the 19th century to the present. The evolution of schooling through American history and the influence of social, cultural, and political changes upon America's educational system will provide the main framework for discussion. Topics such as school segregation and desegregation, parochial schools, gender and education, and unionization will be examined and placed within a historical context. The format of the class will rely primarily on student discussion and will require a significant amount of reading and writing.

### **HIST 30617. Women and American Catholicism**

(3-0-3)

This course is a survey of the history of American Catholic women from the colonial period to the present. Through a combination of lectures, reading and discussion, we will explore the following themes and topics: the role of religious belief and practice in shaping Catholics' understanding of gender differences; the experience of women in religious communities and in family life; women's involvement in education and social reform; ethnic and racial diversity among Catholic women; devotional life; the development of feminist theology, and the emergence of the "new feminism" as articulated by Pope John Paul II. We will seek to understand how Catholic women, both lay and religious, contributed to the development of Church and nation, and examine how encounters with the broader American society have shaped Catholic women's relationship to the institutional church over the last three centuries.

### **HIST 30618. United States Labor History**

(3-0-3)

This course will examine the history of paid and unpaid labor in the United States from colonial times to the near present. We will seek to understand how working people both shaped and were shaped by the American Revolution, early industrialization, the debates over slavery and free labor culminating in the Civil War and Reconstruction, the rise of big business, the creation of a national welfare state, the Cold War-era repression of the Left, and continuing debates over the meanings of work, citizenship, and democracy. Throughout the course, we will devote considerable time to the organizations workers themselves created to advance their own interests, namely the unions and affiliated institutions that have made up the labor movement. We will also pay special attention to the crucial connections between work and identities of class, race, and gender as they evolved over the past two centuries.

### **HIST 30619. American Thought, Belief, and Values Since 1865**

(3-0-3)

A study of Americans' most characteristic intellectual, moral, and religious beliefs and why these have flourished in the American cultural setting. The course will survey American history with emphasis on topics such as Old World influences on American ideals, the relation of American materialism to American beliefs, the relation of individuals to communities, the outlooks of diverse subcultures, competing religious and secular faiths, religion in education, the search for truth in a pluralistic society, moral authority in democratic culture, the competing authorities of faith and science, social science and civil law, popular philosophies such as Enlightenment ideals, romanticism, pragmatism, and postmodernism, and the impact of mass media on American beliefs and values. Substantial readings, discussions, short reports and papers on readings, and exams will be required.

### **HIST 30621. Mexican American History**

(3-0-3)

This course is an introductory survey of Mexican American history in the United States. Primarily focused on events after the Texas Revolution, and annexation of the American Southwest we will consider the problems the Spanish and Mexican settlers faced in their new homeland, as well as the mass migration of Anglo-Americans into the region following the annexation. Throughout the course, we will explore the changing nature of Mexican American US citizenship. Other themes and topics examined will include immigration, the growth of agriculture in Texas and California, internal migration, urbanization, discrimination, segregation, language and cultural maintenance, and the development of a US-based Mexican American politics and culture. Although primarily focused on the American Southwest and California, this course also highlights the long history of Mexican American life and work in the Great Lakes and Midwestern United States. We will conclude with the recent history of Mexican and Latin American migration to the United States after 1965, and the changing nature of Mexican American identity and citizenship within this context.

### **HIST 30622. History of Consumerism in Modern America, 1890s to the Present**

(3-0-3)

By 1900 the development of mass production made the possibility of consumption for private enjoyment available to increasing numbers of Americans. This course will explore the creation of contemporary consumer culture beginning with

the advent of mass production and mass marketing in the 19th century, including the rise of advertising and the growth of department stores. We will then examine how the ideas and institutions associated with consumerism changed throughout the 20th century during times of depression, war, and into the present. Additional topics will include how consumers have used consumption to fashion individual and group identities, as well as how Americans have embraced or challenged consumerism over time.

### **HIST 30626. Medicine and Public Health in US History**

(3-0-3) Hamlin

This course examines health as a unifying concept in American history. It follows several themes: how class, race, and gender, as well as age, lifestyle, and place, have manifested themselves in differential health experience; the ongoing conflict between personal liberty and the interests of the state, the remarkable diversity of American medical systems and their close relation to religious and social diversity; the place of medicine in Americanization campaigns; the changing political economy of American medicine; and finally, the emergence of health as the core concern of the American dream. In short, by the end of the course you should have a good understanding of the uniqueness of American medicine and its central place in America's history. You should have acquired an historical and critical context that will be of use in your own encounters with matters of health and medicine—as intelligent citizens and about issues of public health and questions of medical ethics, and as creative thinkers about more satisfactory modes of medical practice and health improvement and protection. The course will use three to five texts, and require exams, project, and presentation.

### **HIST 30627. History of the American West**

(3-0-3)

Few American regions have generated as many cultural narratives, myths, and icons as the trans-Mississippi West. This course takes both the reality and the romance of the West seriously, asking students to examine how the American conquest of the West inspired storytelling traditions that distorted and shaped the region's history. To get at this interaction, we will read novels, histories, and first-hand accounts as well as view several Hollywood Westerns. The class is reading- and discussion-intensive. Students will write several short papers as well as a longer final essay.

### **HIST 30628. American Legal History**

(3-0-3)

This seminar-style course deals with the interaction between the legal system and social change in the United States from the 1600s to the 1980s. Primary emphasis is given to the 19th century and 20th century, two periods where American legal culture took on much of its fundamental character and adjusted to significant social change. Main themes include the relationships between law and development; individual rights in the public and private spheres; the development of the legal profession; the post-New Deal state; and the various US "rights" movements. Reading consists of primary sources documents and a short survey text. Grades will be based on a series of short papers and classroom discussion. Prior knowledge of American history is helpful but not required.

### **HIST 30629. Morality and Social Change in US History**

(3-0-3)

How do we explain sweeping moral changes in society? Why did so many people support legal slavery for so long, and what motivated others to turn against it? What is the relationship between social change and moral theory? The purpose of this class is to examine the moral frameworks that Americans have used to understand—and to change—their society. We will focus on hotly debated issues in American history, looking at the way that Americans thought about issues such as slavery, animal cruelty, sex, family roles, labor, economics, war and citizenship, and civil rights. We will look at both sides of debates to understand the values and beliefs that shaped traditions of social change and resistance to that change.

### **HIST 30630. Religion and American Politics**

(3-0-3) Noll

Since the early 1950s, religion has been an obviously major factor in American political life—driven first by the African American leaders of the Civil Rights

Movement and then, in more recent decades, by the concerns of the Religious Right. Especially after the election of John F. Kennedy in 1960, Catholics have also been fully recognized participants in the nation's political uses of religion—as well as in debates over whether and how religion should be used politically.

This class tries to show that modern political-religious connections are but new instances of what has always gone on in the American past. The shape of contests over religion and politics may have changed considerably over time, but not the fact of dense connections between the two spheres. Readings for the course include primary and secondary accounts that treat notable incidents, problems, debates, and controversies from the colonial period to the present. Lectures spotlight major issues of historical interpretation, like religion and the Constitution, religion and antebellum debates over slavery, religion and Reconstruction, Catholic versus Protestant understandings of liberty, and civil rights and the New Christian Right.

### HIST 30631. Sport in American History

(3-0-3)

Sport, a major part of American entertainment and culture today, has roots that extend back to the colonial period. This course will provide an introduction to the development of American sport, from the horse racing and games of chance in the colonial period through to the rise of contemporary sport as a highly commercialized entertainment spectacle. Using a variety of primary and secondary sources, we will explore the ways that American sport has influenced and been influenced by economics, politics, popular culture, and society, including issues of race, gender, and class. Given Notre Dame's tradition in athletics, we will explore the university's involvement in this historical process.

### HIST 30632. US Environmental History

(3-0-3) Coleman

This course is an introduction to the new field of environmental history. While many people think “the Environment” suddenly became important with the first “Earth Day” in 1970 (or a few years earlier), environmental issues have in fact long been of central importance. In recent decades historians have begun actively to explore the past sensibilities of various groups toward their surroundings and fellow creatures. They have also increasingly paid attention to the ways environmental factors have affected history. This course will range widely, from world history to the story of a single river, from arguments about climate change to the significance of pink flamingos, and will survey a number of types of history including cultural, demographic, religious, and animal.

### HIST 30633. American Religious History

(3-0-3)

This course will examine religion in American life from the encounter between Europeans and Native Americans in the 16th century to the present. We will explore the ways in which religion has shaped American society, culture, and politics, and in turn how the US setting has shaped religious expression. Themes will include the rise of religious diversity and ideas of religious freedom; the interactions between the American religious “mainstream” and minority religious traditions; the relationship between religion in the US and its international setting; and the diversity and persistence of religion in American culture.

### HIST 30634. Men, Women, and Work in American History

(3-0-3)

Why do Wal-mart's current advertising campaigns idealize the “stay-at-home mom”? Conversely, why does Congress require that mothers on welfare be sent out to work? This course will introduce students to a broad view of American social history that foregrounds the gendered aspects of work and asks students to examine the meaning of work in American history from the colonial period to the 21st century. This broad historical perspective is especially crucial to the examination of the construction of current beliefs about work in the United States since changing gender ideologies dictated the work experiences of large race- and class-defined segments of the population. On one level, this approach allows for the recovery of women's and girls' contributions to the formal and informal economies, including their work activities within the household. Male work practices will be similarly illuminated through a gender studies approach. Hence, an overarching purpose of the course will be to explore the fluidity and instability of those conceptions of work that were applied alternately to masculine as opposed to feminine occupa-

tions, just as they were alternately applied to white versus non-white, free versus enslaved, and public versus domestic activities.

### HIST 30635. African American Women's History

(3-0-3) Stuckey

This course will trace the cultural, economic, and political history of African American women in the United States from slavery to the present. Through a combination of books, primary sources, and film, we will explore how African American women have addressed what is often referred to as the “double burden” of sexism and racism while seeking to define their own identities as individuals, wives, mothers, workers, and citizens. Major themes will include labor, family social movements, and civil rights.

### HIST 30636. What's Love Got to Do with It? Marriage and Family in American History from the Revolution to the Present

(3-0-3) DeGruccio

From the heated trenches of America's “culture wars,” few things are as polarizing as marriage and the family. At the extremes, some hearken back to less troubled days when one man and one woman made enduring commitments to each other; others imagine a narrative of progress with women throwing off the shackles of patriarchy, as both men and women forged new kinds of relationships informed by individual needs. Through intensive reading and writing, students will grapple with these conflicting narratives of decline and triumph. We will explore Native-American families, polygamy, free-love communities, Cold War homemakers, the black family, and gay marriage. In all of these, we will flesh out the ways in which defining “the family” has always been entangled with citizenship, national politics, and religious intolerance.

### HIST 30649. Faith and the African American Experience

(1-0-1)

This course will introduce students to the African American faith experience, with particular attention being given to the historical development of spiritualities of liberation in the American diaspora. Guest lecturers and seminar leaders will offer “perspectives” on this rich and heterogeneous tradition from several vantage points within the humanities, social sciences, and theological disciplines. In addition to a course pack of selected readings, the PBS series, *This Far by Faith: African American Spiritual Journeys*, and its companion volume will constitute the required texts for the course. There will be seven class meetings of two hours each. The course will begin on January 18, 2006 and conclude on March 1, 2007. Attendance at all class sessions, active participation in seminar discussions, completion of six short (i.e., 2–3 pages in length) weekly reflection papers, and a final examination are required.

### HIST 30650. Prehistory of Western North America

(3-0-3)

This course deals with archaeological data and cultural life of prehistoric western North Americans over the last 20,000 years, until contact with European cultures. The course emphasizes origins and cultural development from an early pioneer stage to the later, sophisticated, and diverse cultures of the Native Americans. The course will focus on material culture, environmental relationships, and technology to explore cultural change, land-use patterns, economics, and political complexity. In addition, some understanding of the methods by which archaeology is done by scientists in North America and an introduction to historical archaeology are included.

### HIST 30651. Prehistory of the American Southwest

(3-0-3)

This course uses archaeological data and theory to explore the cultural life of prehistoric Southwest Americans over the last 12,000 years. The course emphasizes origins and cultural development from an early pioneer stage to the later, sophisticated and diverse cultures of the American Southwest. The descendants of these cultures include the Pueblo peoples, the Dene, and the O'odham peoples. In the course, students will explore cultural change, land-use patterns, economics, and political complexity, using information on environmental relationships, technology, and other aspects of material culture.

**HIST 30652. Women and Work in Early America**

(3-0-3) White

This course will introduce students to a broad view of early American social history that foregrounds the gendered aspects of work in Early America—defined loosely as the period from colonial settlement to 1820. On one level, this approach allows for the recovery of women's and girls' contributions to the formal and informal economies of pre-industrial early America, including their work activities within the household. This perspective is especially crucial to the examination of the gendered ideologies of white, Native American, and African servitude and/or slavery. These ideologies dictated the work experiences of large race-and-class-defined segments of the population. Yet cultural retention also played a part and this course will invite students to investigate the impact of derivative work practices (for example examining African women's dominance of market activities in the New World through the lens of West African work practices). Further, while the course title emphasizes women's experiences, the class and race implications of male work practices in early America will be similarly illuminated by a gender studies approach. Thus, an overarching purpose of the course will be to highlight the fluid and instable conceptions of work that were applied alternately to masculine as opposed to feminine occupations, just as they were alternately applied to European versus non-European, free versus enslaved, and public versus private spheres.

**HIST 30654. Fashioning Identity in Colonial America**

(3-0-3)

This course will focus on dress and material/visual culture in Colonial North America. It will introduce methodology, and offer an overview of key themes in the history of dress and consumerism within the framework of gender studies. In our focus on the colonial period (especially the 18th century), we will analyze the economics of dress (the production, marketing, and acquisition of cloth and clothing) and will assess the importance of fashion to commerce and politics. We will evaluate the role of dress in the construction of colonial identities, and we will examine the ways that dress operated as a visual locus for racial, class, and ethnic encounters.

**HIST 30658. Early American Empires**

(3-0-3) Cortes

Between 1400 and 1750, a fierce battle for Empire was waged between and among the Spanish, French, and British nations and the peoples they sought to control, particularly Africans and Amerindians. The result of this fateful encounter would determine the political, economic, cultural, racial, and ecological character of what became the United States of America. Students will engage with this momentous event in several ways: through select readings in the theoretical and historiographical literature; by using primary sources written by the colonizers and the colonized; and by reading important secondary works. The themes we will explore include the symbols used by the various empires to establish rights to the land; the different patterns of settlement; the various European interactions with Africans and Amerindians; the effect that contestants for empire had upon the land; and the response of Africans and Amerindians to European attempts at subjugation.

**HIST 30659. Imagining America: Encounters, Expectations, and Perceptions in Early America**

(3-0-3)

The European encounter with America brought the peoples of Africa, America, and Europe into close contact and intertwined their fates. What happened to Europeans' conceptions of the world and their place in it as they became aware of the existence of America? How did they view the land and the peoples of Africa and America? Conversely, how did the Africans and the Indians perceive the Europeans? This course surveys the responses of Africans, Indians, and Europeans to the social, economic, and intellectual changes wrought by their mutual encounter from their first contact to the 18th century. Europeans projected their best hopes and worst nightmares on to the New World. Some imagined it to be a paradise populated by noble savages. Others believed Indians and Africans were barbaric pagans, devoid of humanity. The close contact between Europeans, Africans, and Indians prompted new discussions of the differences between what we now call "races." Many Europeans came to the Americas for economic profit. Yet others saw the new world as a mission field or a land in which they could build a new, pristine, Christian civilization, free from the corruptions of Europe.

The course will be divided into three broad categories: empire, anthropology, and religion.

**HIST 30680. Jacksonian America: Politics, Culture, and Society, 1815–48**

(3-0-3) Graff

This course explores the early 19th-century history of the United States, from the close of the War of 1812 to the coming of the Civil War (1815–48). Although the era and course take their name from President Andrew Jackson, we will cover much more than national politics and affairs of state. We will explore the birth of mass political parties, conflicts between nationalism and sectionalism, early industrialization and the rise of class conflict, the development of slavery and antislavery, changing gender roles and the rise of feminism, evangelical religion and reform, and Native American resistance and removal.

**HIST 30700. African American History to 1877**

(3-0-3)

This African American history survey begins with an examination of West African origins and ends with the Civil War era. We will discuss the Atlantic slave trade, slavery in colonial America, the beginnings of African American cultures in the North and South during and after the revolutionary era, slave resistance and rebellions, the political economy of slavery, and resulting sectional disputes. Particular attention will be paid to northern free blacks.

**HIST 30701. British-American Intellectual History, 1650–1900**

(3-0-3)

A survey of the intellectual history of Britain and English-speaking America from around 1600 to the mid-19th century, including European backgrounds and contexts, with an emphasis on writings about religion, government, natural science, education, and human nature. Besides exploring the early-modern Anglophone world on its own terms, the course aims to help us understand better the origins and implications of our own ways of thinking. There will be a midterm examination, a final examination, and a term paper based on primary sources.

**HIST 30703. History of US South to 1877**

(3-0-3)

This course will provide a survey of the American South through Reconstruction. We will briefly describe Native American societies and early Spanish settlements in Florida and the Southwest before addressing in greater detail the political, cultural, and social history of the region as it was settled beginning in the southeast. We will examine how ideas like honor, freedom, patriarchy, and religious beliefs were forged and evolved in the context of a slave economy, and how they shaped the day's political questions. We will also consider the Confederate experience and Reconstruction.

**HIST 30704. History of American Women I**

(3-0-3)

This course surveys the social, cultural, and political developments that shaped American women's lives from the colonial period to 1890. It will analyze both the ways American culture defined women's place during different historical periods and the ways women themselves worked to comply with or to resist those definitions. Topics include pre-industrial society, transformations in work and family life, industrialism and class formation, slavery, women's culture, and the emergence of a women's movement. Throughout, stress will be laid on the importance of class, race, and ethnicity in shaping women's historical experience.

**HIST 30705. US Foreign Policy Before 1945**

(3-0-3)

This course covers the main developments in American foreign relations from the Spanish-American War in 1898 through World War II. It traces the emergence of the United States as a major world power and examines in some detail how the United States became involved in the two world wars. A recurring theme will be the major traditions in America foreign policy and the ways in which these traditions influenced policy makers in the early years of the "American Century."

**HIST 30706. Sex, Sexuality, and Gender in the United States to 1900**

(3-0-3) Bederman

Sexuality, like other areas of social life, has a history. Yet historians have only written about the history of sex for the last 40 years or so. This course will both introduce students to a variety of current themes in the history of sexuality and invite them to consider how they themselves might research and write that history. The class will survey recent topics in the history of sexuality from first colonial settlement to the end of the Victorian era. Issues we may consider include different religions' attitudes towards sexuality (the Puritans were not anti-sex!); how different cultures' views of sex shaped relations between colonists and Indians; why sex was an important factor in establishing laws about slavery in Virginia; birth control and abortion practices; changing patterns of courtship; men who loved men and women who loved women; and why the average number of children in American families fell by 50 percent between 1790 and 1890. Over the course of the semester, students will also design a small research proposal on some aspect of the history of American sexuality prior to 1890. Written assignments will include a weekly journal; midterm and final examinations; a book review; and a small research project.

**HIST 30707. American Intellectual History I**

(3-0-3)

This lecture course will survey major developments in American thought from the first English contacts with North America to the mid-19th century. Emphasis will fall on ideas about religion, society, politics, and natural science and on the institutions and social contexts of intellectual life, with an eye towards understanding the roots of our own ways of thinking. Especially in the first weeks of the course, European backgrounds will also receive attention.

**HIST 30750. Race, Ethnicity, and Racism in Modern America**

(3-0-3)

This course will survey American attitudes, beliefs, and practices regarding race and ethnicity from the late 19th century to the present, including a consideration of the development and changing meaning of the concept of "racism." A major emphasis will be to trace the shifting constructions of ethnicity over time and the constantly evolving understandings of what race entails, how racial boundaries are demarcated and crossed, and how all these definitions are historically and culturally flexible. Another central theme will be to trace how various European groups transformed themselves from racial-ethnic outsiders to being "white," a process that simultaneously expanded the bounds of inclusion for some and solidified the terms of exclusion for others.

**HIST 30800. African American History Since 1865**

(3-0-3) Pierce

*Corequisite:* HIST 32800

This course examines the broad range of problems and experiences of African Americans from the close of the American Civil War to the 1980s. We will explore both the relationship of blacks to the larger society and the inner dynamics of the black community. We will devote particular attention to Reconstruction, the migration of African Americans from the rural south to the urban north, and the political machinations of the African-American community. We will also examine the political impact of cultural exhibitions. The course will utilize historical documents in the form of primary sources, scholarly articles, and other secondary sources. Classes will be conducted as lecture-discussions. Students enrolled in History 30800 must also take HIST 32800, a tutorial.

**HIST 30802. US Political Traditions Since 1865**

(3-0-3)

Students will investigate the political debates—and simultaneous examinations of democracy's character—that have animated American reformers and intellectuals since the Civil War. The focus will be on these political traditions, not the studies of voter behavior or policy implementation that also constitute an important part of political history. The course will begin with discussion of the debate over slavery and Reconstruction, and move through the "social question" of the late 19th century, Progressive reform in the early 20th century, the New Deal, the origins of modern conservatism, and various post-World War II social reform movements.

Readings will include court cases, memoirs, speeches, and a sampling of the philosophical and historical literature.

**HIST 30803. Southern United States History Since 1865**

(3-0-3)

Popular notions of the South tend to portray it as a region lost in time, trapped within backwards traditions and a hostile view of the modern world. Yet, no region of the country has experienced such sweeping social, cultural, and economic changes as the American South between the Civil War and the 1980s. Over the course of that period, southerners witnessed rapid economic transformation from plantation economy to Sunbelt industrialism; the rise and fall of Jim Crow and the tremendous racial strife that accompanied these changes; a literary flourishing brought on by what writers called the region's unique sense of tragedy and loss; the movement of southern folk life away from the farms and mill towns into urban areas; and the rising appeal of southern politics and culture to a larger national community in the modern day. This course will examine these and other developments in the context of American history, casting a comparative eye toward how other societies have sought to embrace modernization while clinging to a variety of traditions, real and imagined.

**HIST 30804. History of American Women II**

(3-0-3)

This course surveys women's relationships to the social, cultural, and political developments shaping US society from 1890 to the present, concentrating on developments in women's activism, work, and popular culture. Topics include the New Woman and Progressivism; the transformation of feminism in the 1920s; women's role in the development of the welfare state; women's paid and unpaid labor; women's changing roles in the Depression, World War II, and Cold War periods; the Women's liberation movement of the 1960s; and the polarized politics of gender in recent decades. Written assignments will include a 10- to 12-page research paper and short weekly journals on the readings and lectures. Readings will include a mix of recent articles and primary sources. Particular attention will be paid to the impact of class, race, ethnicity, and sexuality on issues of gender.

**HIST 30805. US Foreign Policy Since 1945**

(3-0-3) Miscamble

This course offers an overview of US foreign policy since World War II, focusing on the major crises and conflicts that have occurred since then—US and Soviet Union, Korea, Vietnam, Gulf War, and Kosovo.

**HIST 30806. Sex, Sexuality, and Gender in US History Since 1880**

(3-0-3) Bederman

Topics may include representations of sexuality in movies and advertising; new courtship practices among unmarried heterosexuals (from courting to dating to hooking up); changing concepts of same-sex love (from inversion to homosexuality to gay liberation to LGBTQ); the demographic shift to smaller families; the 20th-century movements for and against birth control and legal abortion; and the late-20th-century politicization of sexual issues.

**HIST 30807. American Intellectual History II**

(3-0-3)

This lecture course will survey major developments in American thought from the later 19th century to the end of the 20th century. Emphasis will fall on ideas about religion, society, politics, and natural science and on the institutions and social contexts of intellectual life, with an eye toward understanding the roots of our present ways of thinking.

**HIST 30850. Twentieth-Century American Military Experience**

(3-0-3)

Is America, as historian Geoffrey Perret contends, a "country made by war"?

Regardless of one's opinion, a systematic study of America's wars is essential to either confirm or refute the above statement and obtain a more complete understanding of the nation. There have certainly been ample historical occurrences to support Perret's assertion over the last century, and this course will investigate the validity of the question by examining the modern American military experience from after the Franco-Prussian War of 1871 to the present. We will explore the

causes, conduct, and consequences of the major military conflicts of the 20th century in which the US was involved or that had a significant impact on the US, using traditional historical materials. We will also read several battlefield memoirs to further examine the conflicts at the tactical level and also explore the human dimension of war. Using a fundamental thesis to address war at the political, strategic, operational, and tactical levels, the goal of the course will be to gain a better understanding of the relationship among the different levels as well as the importance of each. As a part of their discovery process, students will take three essay exams and write a research paper assessing the combat effectiveness of a particular unit that existed during this period to assist them in determining, developing, and delivering a response to Perret's statement.

### **HIST 30854. US Presidents: FDR to Clinton**

(3-0-3) DeSantis

A study of the personalities, style, policies, and performances of American presidents from Franklin D. Roosevelt to Bill Clinton as they developed the modern American presidency and made it the most important elective office in the world.

### **HIST 30855. Catholicism in Twentieth-Century America**

(3-0-3)

The course examines the patterns of Catholic intellectual life, religious culture, social engagement, and public presence in the United States throughout the 20th century. Themes receiving special attention in the lectures and class discussions will include: US Catholic response to the theory of evolution and to the social sciences; the rise and decline of Thomism as the philosophical framework of Catholic thought and education; Catholic participation in the labor movement and the Civil Rights Movement; the new theologies and social ethics of the '60s; the impact of the Second Vatican Council; shifting modes of public Catholicism; and the Catholic culture wars of the 1980s and 1990s.

### **HIST 30856. Labor and America Since 1945**

(3-0-3)

This course explores the relationship between workers and the labor movement to American politics and culture since 1945. The United States emerged from World War II as the strongest global power, and its citizens subsequently enjoyed a long postwar economic boom that created what we might call the first truly middle-class society in world history. At the heart of that new society was the American labor movement, those unions like the United Auto Workers and the United Steel Workers who ensured that at least some of the postwar profits made it into the wallets of workers and their families. Today, however, unions represent only 8 percent of workers in the private sector. What accounts for the decline of organized labor since the 1950s? What has the decline of the labor movement meant for workers specifically, and the American economy and politics more broadly? How and why have popular perceptions of unions changed over time? What has been the relationship of organized labor to the civil rights movement, feminism, and modern conservatism? What is "globalization" and what has been its impact upon American workers and their unions? Through an exploration of historical scholarship, memoirs, polemical writings, and Hollywood films, this course will try to answer these questions. Students interested in politics, economic development, international relations, social justice, human rights, peace studies or mass culture are particularly welcome.

### **HIST 30857. The United States in the 1960s**

(3-0-3) Hoang

Few periods in American history have been as controversial as the 1960s. Sometimes called the "Long Sixties," it runs conceptually from the mid-1950s to the early 1970s, and was a turbulent time. Concentrating on politics and society, this course explores the major personalities and events, including Martin Luther King, John F. Kennedy, Lyndon Johnson, Richard Nixon, the New Frontier, the Great Society, the Vietnam War, the breakdown of the liberal consensus, the rebirth of the conservative movement, and national movements led by youths, women, and African Americans. Although the emphasis is on the US, the course also visits several major international issues. There are two goals for students: acquiring knowledge about the period, and developing analytical tools to form their own judgments about it. Toward the first goal, students will encounter a combination of readings, videos, mini-lectures, and class discussions. Toward the

second, they will be exposed to four different approaches: (1) discussing primary documents and writing a paper on some of them; (2) studying three small-scale case studies; (3) examining the large-scale phenomenon of protest; and (4) reading the memoirs of a Cabinet member, hence gaining an insider's view of the life and activities in the White House.

### **HIST 30886. American Men, American Women**

(3-0-3) Ardizzone

What does it mean to be male or female in America? How different are our ideas about gender from those of other cultures? This course will focus on the 20th century and look at the origins and development of masculine and feminine roles in the United States. How much have they changed over time and what aspects have been retained? We will explore the ways that cultural images, political changes, and economic needs have shaped the definition of acceptable behavior and life choices based on gender. Topics will range from Victorian ideals through the Jazz Age and war literature to movie Westerns, '50s television families, and '60s youth culture; and into recent shifts with women's rights, extreme sports, and talk shows.

### **HIST 30892. American Utopias**

(3-0-3) Halperin

From our colonial roots to the present day, from the Puritans "City Upon a Hill" to the Branch Davidians and the Waco compound, Americans have been trying to create ideal communities based on their particular version of the truth. In this course, we will survey a wide variety of utopian communities, some based on protection from the world, others based on free love and/or perfection of human relations, some now considered cults, and others mainstream religions. We will examine how they were supposed to work versus how they worked in reality, and the dreams and beliefs upon which they were based. We will explore the ways these experiments in living were created by American culture and have, in turn, transformed it.

### **HIST 30894. Visual America II**

(3-0-3) Schlereth

Offered as a sequel to American Art (AMST 20107). The course has two objectives: first, to introduce students to the various methods scholars have developed to use visual evidence in cultural history research; and second, to provide students with a content course in United States history, one where they receive an overview of the various roles that the art forms noted above have played in 19th- and 20th-century American life. Iconographic analysis—the uncovering of past and present, conflicting and paradoxical layers of cultural meanings within an image or assemblage of images—will be an important part of the course.

### **HIST 30897. Home Fronts During War**

(3-0-3) Ardizzone

In the wake of the events of September 11 and the current uncertainty of their effects on our military actions and international relations, this course turns to look within the United States. How have Americans responded at home to war and threats of war throughout the 20th century and into the 21st? What internal divisions and shared identities has war inspired or revealed? In other words, we will examine not the battles and factors that determined the military outcomes, but the domestic struggles that have defined our national experience and informed many of our responses to current events. Topics will include critiques of democracy and civil rights inclusion during WWI; treatment of Japanese Americans during WWII; development of peace movements, anti-nuclear movements; Cold War politics and fears of American communism; debates over the draft, just-war, racism at home, and US policies abroad in the wake of Vietnam. The final unit will focus on the Gulf War, terrorism, and developments since September 11, 2001.

### **HIST 30899. American Social Movements**

(3-0-3)

Where does social protest fit in the history of American politics? What counts as activism? This interdisciplinary survey of civil rights and social protest movements in the United States examines 19th- and 20th-century movements, as well as several contemporary protest movements. These movements certainly question selected American ideologies, but they also draw on American values and practices. We will use history, film, fiction, journalism, and autobiographies to trace several

traditions of protest that both depend on and offer challenges to a democratic society.

### **HIST 30901. Colonial Latin America**

(3-0-3)

*Corequisite:* HIST 32901

This course provides an introduction to the major themes of Latin American colonial history, including the discovery, conquest, and settlement of the New World; the institutional framework established by the Iberian countries to advance their economic, political, and religious interests in the region; and various aspects of Latin American society and culture until independence in the early 19th century.

### **HIST 30902. The Emergence of Nationalism in Latin America**

(3-0-3)

This course provides an introduction to the major themes of 19th-century Latin American history. It provides an overview of the colonial background to the independence struggle that engulfed the region in the early part of the century, describes the motivations, and in many cases reluctance, of the colonies to disengage from the Spanish empire, and the legacies and opportunities for the construction of a new social, political, and economic order in the region. The course examines the influence of regionalism in the emergence of the new nations, and pays particular attention to the impact of liberalism on social, political, and economic structures in the region. Course requirements include reading assigned chapters and essays for each class, a midterm exam, a book review essay, and a final exam.

### **HIST 30903. Modern Latin America**

(3-0-3) Beatty

From Patagonia at the extreme southern tip of South America to Ciudad Juárez on the US border, the Latin American region encompasses a great diversity of nations, peoples, and cultures. This course examines central trends and problems in the study of Latin American history from the mid-19th century to the present, including revolutions in Mexico, Guatemala, Cuba, Nicaragua, Chile, and Peru; the Catholic Church in both its progressive and conservative faces; the pervasive influence of the United States; and the changing welfare of most Latin Americans through a century of economic development from the export boom to neoliberalism. We will use readings, film, news accounts, and lectures to examine this history. No previous exposure to Latin American history is necessary.

### **HIST 30909. Race and the Nation in Latin American History**

(3-0-3) Valiant

This course offers a critical analysis of the particular representations of race and nation as presented in film, art, and essays from the colonial to the current era in Latin America. Utilizing these materials we will examine issues of independence, statehood, slavery, revolution, wealth, poverty, education, and gender in public culture.

### **HIST 30911. Indigenous and Colonial Mexico**

(3-0-3)

This course investigates the history of Mesoamerica from the Olmec, Mayan, and Aztec societies to Mexico's independence from Spain after 1800. We will examine the nature of several indigenous societies; their conquest and domination by Europeans; post-conquest debates concerning Indians' nature and colonial Indian policy; the structure of colonial society, including relations between Indians, Africans, and Europeans; Catholic conversions and the role of the Church; and finally the causes of independence. We will use readings, lectures, discussions, archeological evidence, film, and literature throughout the course. Students need not have any background in Latin American history.

### **HIST 30912. History of Modern Mexico**

(3-0-3)

This course examines Mexico from the late 19th century to the present. Through readings, lecture, discussion, film, and research we will visit the major themes of modern Mexico. Our studies range from the country's economic growth at the turn of the century to NAFTA; from the violent years of revolution after 1910 to the gradual emergence of democracy in the 1990s; and from the many who have

struggled with poverty to those few who have wielded economic and political power. One of the paradoxes of 20th-century Mexico is the juxtaposition of one of Latin America's most politically stable nations in a society filled with divisions and frequently with conflict. The ways in which the Mexican Revolution, the nation's unique agrarian reform project, and late-century neo-liberalism have shaped Mexico over the last century will receive particular attention.

### **HIST 30930. Chronicles of the Conquest of Latin America**

(3-0-3)

This seminar examines key aspects of the conquest of Latin America through readings of chronicles and other texts written by Spaniards and Amerindians in the 15th to 17th centuries. We will focus upon the ways in which Spaniards and Amerindians theorized and explained their experiences, and their representations of themselves and their "others." In particular, we will pay attention to the beginnings of modern notions of race and ethnicity through discussions of barbarians, wildmen and cannibals, among other "types" important to the colonial encounter.

### **HIST 30952. Inequalities in Latin American History**

(3-0-3)

Any quick survey of contemporary Latin America quickly uncovers a glaring range of social inequalities. Sharp divides and diverging conditions separate individuals and groups along economic, political, ethnic, educational, and gender lines, to name a few. Although nearly all the earth's societies exhibit social inequalities, Latin America's have proved particularly endemic, enduring, and intractable; they have fundamentally shaped the region's potential for democratic governance and economic development; they are also deeply rooted in the region's past. This course will begin by examining manifestations of social inequalities in the region today. We will then spend most of the semester tracing the roots of today's conditions through the region's history. Students need not have any background in Latin American history.

### **HIST 30975. Making Australia**

(3-0-3)

The struggle to "make" Australia, as opposed to replicating Britain, got underway early on after European settlement, and it has been in process ever since. This course will seek to understand and illuminate this nation-building process. Approximately two-thirds of the course will be devoted to examining the major issues in Australia's history, beginning with an appropriate treatment of Aboriginal history through to the present debates over Australian identity and the nation's political structure. The final third of the course will explore important issues in contemporary society and culture. This course will have special interest for students who either have studied or plan to study in the Notre Dame Australia program. In addition to reading five or six books, students will view a number of important Australian documentary and feature films. A willingness to participate in extracurricular activities is a prerequisite for the course. (Please keep Wednesday evening clear in your schedule.) The course will involve lecture, discussion, and class presentations. Students will write a 10-page research paper and take mid-semester and final examinations.

### **HIST 30985. World History of Christianity Since 1900**

(3-0-3) Noll

A survey of the dramatic changes that have recently altered the face of Christianity in the world. For Catholics, Protestants, Eastern Orthodox, and the rapidly growing number of "independent" churches, the last century witnessed changes on a scale not seen since the first centuries of Christian history. The long-time Christian heartlands of Europe and North America have undergone unprecedented secularization. The once-missionary regions of Africa, Asia, and Latin America have developed larger communities of active believers than now exist in "the Christian West." All over the world, Christian interactions with war (and peace), poverty (and affluence), and disease (and health) have multiplied with increasing complexity. The course concentrates on Asia, Africa, and Latin America, with developments in Europe and North America in the background. Throughout, a primary aim is to link Christian events with major international developments like the world wars, the Cold War, economic globalization, and colonization-decolonization.

**HIST 33000. History Workshop**

(3-0-3) Bederman, Cobb, Kunicki

This course introduces students to how historians study the past. Students will gain insight into the nature of historical inquiry through discussion of exemplary works of history, analysis of primary source documents from various time periods and places, and, most important, their own efforts to write history. Readings will include important secondary historical works, as well as discussions of how historians actually do history. Writing assignments will include at least two 10-page histories written by each student from primary source documents. This course is a requirement for—and open only to—history majors pursuing the standard major in history (not the supplementary major).

**HIST 35000. History Internship**

(V-V-V)

History Internship credit is designed for students who undertake unpaid internships with organizations dedicated to the discipline of history, whether through preservation, exhibition, public education, or scholarship. Please see the director of Undergraduate Studies for more information about this opportunity.

**HIST 37050. Directed Readings**

(V-0-V)

Independent study of special topics under the direction of a faculty member. Requires permission of the faculty member as well as the director of Undergraduate Studies.

**HIST 40123. American Occupation of Japan**

(3-0-3)

After years of fierce fighting in the Pacific, the victorious Allies occupied Japan from August 1945 until 1952. The “Basic Initial Post-Surrender Directive” charged military occupiers and their civilian auxiliaries with democratizing the former enemy empire. This course examines three aspects of this effort, namely the political, economic, and cultural restructuring of Japan. We will explore the goals, methods, and mix-ups of the (mostly) American attempt to recast Japanese society in a democratic mold and the Japanese response. The Big Question—one that we will return to again and again in our discussions—is what is democracy and how is it created and sustained?

**HIST 40231. Cicero and Political Tradition**

(3-0-3)

The life and writings of Marcus Tullius Cicero (106–43 BC) have been studied in light of the different aspects of his eventful career as a lawyer and advocate, orator, politician, statesman, and philosopher. His surviving writings—political and judicial speeches, treatises on religion, law, ethics, political philosophy and rhetoric, and also many personal letters—shed light on the diverse successes and reversals of his public and private life. Those who study Cicero tend to focus on one or two aspects of his achievement to the exclusion of the others. In this course, we will try to understand how the different branches of Cicero’s life and work fit together, why he thought that philosophy, law, and religion were relevant to politics, and why and how ethical considerations should condition one’s private and public life. In pursuing these issues, we will think about Cicero’s intellectual and political predecessors, both Greek and Roman, before reading a selection of his own writings. By way of understanding some aspect of Cicero’s enormous influence we will conclude with reading part of *The Federalist Papers*.

**HIST 40232. Romans and Christians**

(3-0-3)

This course will examine the early development of the Christian religion in its historical Roman context. It will begin with a survey of the political, social, and administrative structures of the Roman Empire in the period from Augustus to Constantine, move to a study of the complexity and diversity of Roman religious life and culture (with special attention to Mystery Cults, e.g., that of Isis), and then examine the development of the Jesus movement and Rome’s reaction to it. Particular topics to be studied will include miracle working and the practice of magic, the problem of the historical Jesus, the sectarian and subversive character of early Christianity, the issue of how persecution and martyrdom are to be historically understood, and the meaning of religious conversion in the polytheistic

Roman world. Above all, the course will concentrate on the questions of how and why in historical terms a new religious system came to have such appeal that Constantine chose to make himself the first Christian emperor of Rome.

**HIST 40233. The Romans and Their Gods**

(3-0-3) Taylor

An introduction to the way in which the Romans conceived of, worshipped, and communicated with the myriad gods of their pantheon. The course will focus first on conventional religious rituals and their cultural value, and secondly on the success of Roman polytheism in adapting to changing historical and social conditions. Particular attention will be paid to the so-called “Mystery Religions,” including Christianity, and their relationship to conventional forms of religious behavior.

**HIST 40234. Family/Household in Roman World**

(3-0-3)

A survey of the life-course in Roman Antiquity. Topics studied will include marriage, divorce, child-rearing, old age, the way in which family and household were conceptualized by the Romans, and the demography of the Roman world.

**HIST 40235. Rome, the Christians, and Early Europe**

(3-0-3)

The course studies continuity and discontinuity in the Mediterranean world during a formative period, the transition from Roman Empire to early medieval European kingdoms. Christianity played a vital role during this transformation, but not the only one. Beginning with a review of Roman institutions, law, culture and religion, we will observe the changes they underwent between ca. 150 CE and ca.750 CE. At this latter point in time, some people were still thinking of themselves as living within the Roman Empire, even though the local potentate was a non-Roman king. Also, Roman law had become Christian law, and Latin was beginning to generate the languages now collectively described as “Romance.” On the fringes of Europe, in England and Ireland, meanwhile, missionaries shared with their converts not just Christianity but also the Latin language and Latin literature along with certain Roman concepts of culture and political organization.

**HIST 40236. The Roman Empire**

(3-0-3)

This advanced course in ancient history examines the Roman Empire from Augustus to Constantine. It deals with the establishment of the Augustan Principate and the progression of autocracy at Rome in the first two centuries of the Imperial Age, leading to discussion of what is generally called the third-century crisis and the new monarchy of Diocletian and Constantine. It investigates how the Roman Empire as a geo-political unit was governed and administered (paying particular attention to the all-powerful figure of the Roman emperor), and how the diverse regional cultures of the greater Mediterranean world were affected by Roman rule. Among topics studied are contemporary debates on Roman society, economy, demography, and culture.

**HIST 40237. The Roman World of Apuleius**

(3-0-3) Bradley

An advanced course in Roman history and literature that investigates the Latin author Apuleius in his socio-cultural context. The course begins with the Romano-African setting into which Apuleius was born, recreates the educational travels to Carthage, Athens, and Rome that occupied his early life, and focuses especially on his trial for magic in Sabratha in Tripolitania before following him back to Carthage, where he spent the remainder of his life. Notice will be taken of all Apuleius’s writings, but special attention will be paid to the *Apology*, a version of the speech of defense made at his trial, and to the socio-cultural significance of his work of imaginative fiction, the *Metamorphoses*. The course is open to students with or without Latin.

**HIST 40238. Creation, Time, and City of God in Augustine of Hippo**

(3-0-3) MacCormack

In his youth, Augustine (AD 354–430) received an excellent education in the Latin classics, the benefits of which remained with him throughout his life. Later, he also read philosophical writings, and, after his conversion, works by Christian

authors. The book he quoted most frequently was the Bible. From his childhood, Augustine was endowed with a most unusual ability to ask awkward questions. Initially targeting his teachers, he later addressed his questions to the authors whose books he read, and to God. His writings, therefore, tend to take a dialogic form where the interlocutors include not only the reader but God, and—among human beings—Cicero, Vergil, and other Romans, and also Augustine's Christian contemporaries, including Jerome, Paulinus of Nola, and Count Marcellinus, to whom he addressed the *City of God*. In following these dialogues, we will read not just Augustine's best known writings (*Confessions* and *City of God*) but also his commentaries on Genesis, and some of his letters and sermons. The purpose is to arrive at an understanding of Augustine's ideas about creation and time, and about the nature of human society and its goals. We will also ask what can be learned from Augustine's dialogic and sometimes disputatious way of thinking, explaining, and debating. Almost all of Augustine's writings have been translated into English, but obviously, an ability to read Latin will be most useful.

### HIST 40239. Augustine and the CITY OF GOD

(3-0-3) MacCormack

The aim of the course is to gain a detailed understanding of one of the world's important works of historical and political theology. Writing in response to the destruction of the City of Rome by Visigothic invaders in AD 410, Augustine devoted the first half of this "long and difficult work" to a refutation of Roman religion and ancient philosophy (Books I–X). In the second half (Books XI–XXII) he explained what he meant by City of God and Terrestrial City, and traced the evolution through time of the two cities in relation to each other. We will study the *City of God* in light of the sources Augustine engaged with. For the first part, these include the philosophers Plato, Apuleius, Plotinus, and Porphyry, the historians Sallust and Livy, and also the statesman Cicero, and the poet Vergil. In the second part, Augustine builds on biblical theology, history, and chronology. To conclude, we will devote some time to the influence of this very long book. It will be studied in English, but those with viable Latin will be encouraged to use it.

### HIST 40294. Thought and Culture in the High Middle Ages

(3-0-3)

This is a course about the thought and culture of Medieval Europe in the years 1100 to 1350. The course takes seriously the notion of "mind," that all people, whatever their gender or social class, were gifted with powers of understanding and decision making amidst life's dilemmas. It asks what we know about how these people thought about, perceived, and experienced their world, what ideals they set for themselves, what they hoped to achieve, how they set about the task of living. The course will proceed with lectures on specific topics and introductions to texts or authors, but in good part by way of a careful reading and discussion of assigned primary sources. Those sources will range from medieval romances to mystical poems, from political philosophy to devotional meditations.

### HIST 40297. Knighthood and Chivalry in Medieval Europe, 750–1625

(3-0-3) Boulton

This course introduces students to the history of knighthood (the status of noble heavy cavalryman) and chivalry (the distinctive ethos and code of the knightly class) from their emergence in Western Europe between 950 and 1180 through their apogee between 1180 and 1380 to their slow decline between 1380 and 1625 (and their revival in the 19th century). It will deal first with the knight as warrior, vassal, and monk (in the religious orders of knighthood), then with the knight as nobleman and landowner, and finally with the knight as courtier and civil servant in the emerging state. It will next proceed to an examination of knightly games, festivals, and iconography, and conclude with a look at the survival and revival of chivalry in the post-Gothic period.

### HIST 40448. Ideology, Poetry and Politics in Jacobite Ireland

(3-0-3)

The political poetry of the period 1541–1688 will be discussed and analyzed against the historical background. The primary focus will be the mentality of the native intelligentsia as it is reflected in the poetry and as it responded to the momentous changes of the period. The origins and rise of the cult of the Stuarts will be examined and the historiography of the period will be assessed.

### HIST 40470. Dostoevsky's Russia

(3-0-3)

This course will focus: (1) on Dostoyevsky's life, his religious and ideological beliefs as articulated in major fictional and nonfictional works, his contributions to 19th-century debates about Russia's place in the world and its historical "mission"; and (2) on the Russian social, religious, and ideological context(s) in which Dostoyevsky operated. The reading will likely include Dostoyevsky's *Notes From the House of the Dead*, *Notes From the Underground*, *Crime and Punishment*, *The Idiot*, and *Brothers Karamazov*.

### HIST 40475. Modern Russian Society and Politics I

(3-0-3)

This course examines selected critical issues in the foundations of modern Russian society and culture from the late 19th through the first half of the 20th century. Lectures and discussions include such topics as late Imperial politics and society, cultural innovation of the "Silver Age," World War I, Revolutions of 1917, creation of socialist society and culture, and the experience of the Stalinist terror. There will be a term paper, a midterm, and a final exam.

### HIST 40476. Modern Russian Society and Politics II

(3-0-3)

This course surveys the history of Russia and its peoples in the second half of the 20th century, with a particular focus on the role of politics and ideology in Soviet (1941–91) and contemporary Russian society (1991–2000). We will explore the experience of the Great Patriotic War, late Stalinism and post-Stalinist socialism, the emergence of the Soviet Empire at the end of the Second World War, the collapse of the communist regime and the disintegration of the Soviet Union in 1991, as well as Russia's uneasy transition out of totalitarianism during the last decade of the 20th century. Students will be asked to take midterm and final examinations, and to write a term paper.

### HIST 40502. Family and Society in Early Modern Italy

(3-0-3)

A dialogue-intensive class focusing on the family and society in early modern Italy.

### HIST 40551. History of Modern Astronomy

(3-0-3)

Traces the development of astronomy and cosmology from the late 17th century to the 1930s. Attention is given to the interactions of astronomy with other areas of science and with philosophical, religious, and social factors.

### HIST 40580. Enlightenment in Europe

(3-0-3)

By intensively studying diverse works, we shall first try to map the sheer variety of the cultural achievements of Europeans, from Dublin to Naples and Koenigsberg to Madrid, during the long 18th century (ca. 1687–1807). Then we shall critically analyze some of the major scholarly efforts to reduce and organize it all into some unitary movement, usually called "the Enlightenment." Requirements include actively participating in class meetings, which will center on our discussions of particular works; two examinations; and writing a 15- to 20-page integrative essay on one of the major themes (freedom, power, knowledge, faith, emotions, history, and progress) of the works we study together.

### HIST 40628. African American Resistance

(3-0-3)

Through a close examination of 12 historical events, we will study African American resistance in the United States from the 17th century through the 20th century. We will employ a case-study method and seek to categorize and characterize the wide variety of African American resistance. Our study will include the politics of confrontation and civil disobedience, polarization of arts, transformation of race relations, the tragedies and triumphs of Reconstruction, interracial violence, black political and institutional responses to racism and violence, the Harlem Renaissance, jazz, blues, and the Civil Rights and Black Power movements. Students will be confronted with conflicting bodies of evidence and challenged to analyze these issues and arrive at conclusions. Music and film will supplement classroom discussions.

**HIST 40630. Crime, Heredity, and Insanity in American History**

(3-0-3) Przybyszewski

The 19th century witnessed a transformation in the understanding of the origins of criminal behavior in the United States. For many, a religious emphasis on humankind as sinful gave way to a belief in its inherent goodness. But if humans were naturally good, how could their evil actions be explained? Drawing on studies done here and abroad, American doctors, preachers, and lawyers debated whether environment, heredity, or free will determined the actions of the criminal. By the early 20th century, lawyers and doctors had largely succeeded in medicalizing criminality. Psychiatrists treated criminals as patients; judges invoked hereditary eugenics in sentencing criminals. Science, not sin, had apparently become the preferred mode of explanation for the origins of crime. But was this a better explanation than what had come before? Discussion will be the primary form of instruction.

**HIST 40648. Science and Environmental Policy in the United States**

(3-0-3) Vande Wall

This class will meet in a seminar format. We'll examine the history of US scientific and environmental policy from 1850 to the present day. Particular attention will be paid to what kinds of research were funded by the federal government in each period, and how this reflects the changing concerns of the populace. We also examine the role of both the executive and legislative branches of government in supporting science and identify interest groups that have been influential in shaping science policy. Attending a conference on "The Commerce and Politics of Science," being held at Notre Dame this fall, will be required of students in this course. This will introduce students to two central concerns: first, how do commercial and political interests shape scientific inquiry, knowledge, and practice, both now and in the past? Second, is it possible to say that one or another economic or political context is favorable or unfavorable to science or more likely or less likely to produce "good science"? The final portion of the course will be devoted to case studies in current scientific and environmental policy. Students will be required to research the development of a particular policy—stem cell research, the Clean Air Act, the space station—and present to the class and analysis of both the history of the policy and an evaluation of its impact on public life.

**HIST 40851. African American Civil Rights Movement**

(3-0-3) Mason

There may not be a term in American society as recognized, and yet as misunderstood, as "civil rights." Often civil rights are conflated with human rights, even though each are distinct of the other. During the semester, we will trace the African American Civil Rights Movement in the United States during the 20th century, as well as its lasting impact on American society. We will do so using as many media as possible. Fortunately, we will have the opportunity to study an important part of American history in significant detail. The time span we cover will not be that great, but the issues we investigate challenge the founding principles of American society to its core.

**HIST 40853. US and the Vietnam War**

(3-0-3)

This course examines the participation of the United States in its "longest war"—the conflict in Vietnam. The course is taught primarily from an "American" as opposed to a "Vietnamese" perspective. Broad topics to be covered include Vietnamese background (land, people, history, culture); American political and diplomatic decision making; 1950–75: how the war was fought; debating the war; the war at home; the aftermath of war; and lessons of the war. This is a lecture AND a discussion course.

**HIST 40855. Labor Movements in Twentieth-Century US**

(3-0-3)

This course explores American workers' collective efforts as workers in their search for economic security, political power, and social and cultural autonomy from the 1890s to the near present. For the most part, this course will focus on the unions and related organizations forged by workers throughout the past century—from major umbrella groups like the American Federation of Labor, the Industrial Workers of the World, and the Congress of Industrial Organizations,

to important sectoral actors like the Brotherhood of Sleeping Car Porters, the United Automobile Workers, the American Federation of Teachers, and the United Farm Workers. The central questions of the course will be: When, where, and why have US workers organized collectively in the 20th century—and how successful have they been? What has been the response of employers, the government, and the public at large to these collective efforts of workers, and how and why have those responses changed over time? What has been the relationship between organized labor and racial and gender discrimination, as well as the causes of racial and gender equality? And how have Americans generally, and workers in particular, understood the labor movement in relation to capitalism, freedom, and democracy?

**HIST 40856. Culture of Great Depression**

(3-0-3)

This course will explore various American cultural expressions during the Depression years of 1929–40. Specifically, we will study the many ways literature, art, drama, photography, and music responded to and were influenced by economic and cultural crisis.

**HIST 40857. History of Sport and the Cold War**

(3-0-3) Soares

This course will explore the ways that sport reflected the political, ideological, social, economic, and military struggle known as the Cold War. Sport permitted opportunities to defeat hated rivals or to develop competition more peacefully. It reflected the internal politics and societies in nations, and also illuminated relations among allies. Using a variety of readings, media accounts and film clips, this course will look at a number of crucial teams, athletes and events from the Cold War, including the 1980 US Olympic hockey team, the controversial 1972 Olympic basketball final, "ping pong diplomacy," Olympic boycotts, Martina Navratilova and other Eastern European tennis stars, East German figure skater Katarina Witt, Romanian gymnast Nadia Comaneci, the ferocious Soviet-Czechoslovakian hockey rivalry following the Soviet invasion of 1968, and more.

**HIST 40885. The Meaning of Things**

(3-0-3) White

This course will introduce students to a range of practices relating to consumption in America. We will investigate the gendered aspects of production, marketing, buying, and using goods in American history, as these impact not only on gender, but also on the construction of class, ethnic, and "racial" identities.

**HIST 40886. Jesus in America**

(3-0-3)

While many modern Americans share a faith in Jesus as Messiah, Son of God, and Redeemer, they have also portrayed him as everything from a socialist to a Ku Klux Klansman, a polygamist to a black woman, an advertising executive to a Buddha-to-be. In the kaleidoscope of opinions about Jesus we can find the very essence, character, and vitality not only of American Christianity, but also of American values and beliefs more broadly speaking. In this course, we will study depictions and representations of Jesus in American culture, primarily in the 20th century, using a variety of texts, including canonical sources, films, novels, visual art, music, scholarly criticism, and popular culture. In addition to readings, film viewings, and a group project, this senior seminar will culminate in a major research paper that will be developed throughout the semester, with extensive comments from other students and the professor.

**HIST 40887. Material America: Creating, Collecting, and Consuming**

(3-0-3)

A seminar exploring how historians, archaeologists, art historians, folklorists, geographers, and cultural anthropologists use material culture as important evidence in interpreting the American historical and contemporary experience. Research fieldwork in area museums and historical agencies such as the Snite Museum, the Northern Indiana Center For History, National Studebaker Museum, and Copshaholm/Oliver Mansion will be part of the seminar.

**HIST 40888. Building America**

(3-0-3)

A seminar designed to examine the social and economic factors, energy and land use policies, demographic urban/suburban trends, technological innovations and artistic impulses that have produced the American-built environment, 1740 to 1940. Comparing several building types, the private residence, the workplace, and the public building the seminar will explore structures and spaces as material culture evidence of American domestic, real estate, political, and cultural history. Attention will be paid to high-style and vernacular architecture and new building forms (skyscrapers, highway buildings, department stores), as well as work sites such as mills, factories, and commercial buildings, plus four American world fairs.

**HIST 40890. Nature in America**

(3-0-3) Schlereth

This is a seminar designed to explore the concept of nature in the American historical and contemporary experience within an interdisciplinary context of art, history, literature, and ecology. In addition to weekly reading discussions, the seminar will meet, on a number of occasions, at several nature sights: Morris Conservatory and Muessel-Ellison Tropical Gardens; Potawatomi Zoo; Elkhart Environmental Center; Shiojiri Niwa Japanese Garden; Fernwood Botanical Garden and Nature Preserve; University of Notre Dame Grene-Nieuwland Herbarium. Purpose: To study nature in American art (painting, photography, sculpture), seminar meetings will be held at the Snite Museum of Art, South Bend Regional Museum of Art, and the Midwest Museum of American Art.

**HIST 40891. Race, Gender, and Women of Color**

(3-0-3)

This seminar analyzes dominant American beliefs about the significance of race and gender primarily through the focusing lens of the experiences of women of color in the US. How did intersecting ideologies of race and gender attempt to define and limit the lives of women of color as well as other Americans? How have women of color responded to and reinterpreted white American ideas about their identity to develop their own self-defenses and ideologies?

**HIST 40896. Presidency in American Culture**

(3-0-3)

This course examines the interactions among journalists, media companies, and Presidents in the United States since the Great Depression. Throughout the term, we will emphasize several general principles or trends. We will explore how new forms of technology have triggered changes in political practice, a trend that becomes clear when we analyze the role the Internet has taken in this year's campaign. During the semester we will look at representations of Presidents and the presidency that are embodied in films and television programs.

**HIST 40950. Global Development in Historical Perspective**

(3-0-3)

The difference between rich and poor nations is not, as Ernest Hemingway once said, that the rich have more money than the poor, but is in part because the rich produce more goods and services. Industrialization, in other words, has often brought wealth (as well as social dislocation and protest) to those who have succeeded. This course examines the process of industrialization from a comparative perspective and integrates the history of industrialization and its social consequences for Western Europe (Britain and Germany), the United States, Latin America (Mexico), and East Asia (Japan and South Korea). We will concentrate on these countries' transition from agriculture-based societies to industrial societies. We will analyze the process of industrialization on two levels from above the role of political authority and from below a view of factory life, industrial relations, and protest from the perspective of workers and the working classes. No specific prerequisites in history or economics are necessary.

**HIST 40951. Technology and Development in History**

(3-0-3)

Technologies are often seen as either the product of human genius and achievement, or as an alienating, inhuman, and sometimes destructive force. Both perspectives argue that technological change has been one of the most important forces shaping world history over recent centuries. This course examines

technological developments and theories of technological change in world history. It focuses on the relationship between new technologies, social change, and economic development since 1750, surveying cases from Britain, the United States, China, Japan, and Latin America. We will pay special attention to technology transfers: the movement of new machines and processes and knowledge from one society to another, and the ways that social, cultural, and political forces have shaped technological change in different parts of the world.

**HIST 40973. Archives and Empires: Inca/Spaniards**

(3-0-3)

Traditionally, scholars have highlighted the differences between the Inca Empire and that of its Spanish conquerors. These differences are indeed striking, and will be explored in this course. But there are also similarities between the two imperial polities, which we will likewise study. Attention will focus on the production, collection, ordering, and storage of information by both imperial and local authorities, and on how this information was used. The Incas recorded administrative and narrative information on *quipus* (knotted cords) and with reference to indigenous Andean languages. The Spanish in the Andes briefly used this system before switching to alphabetic writing and the Spanish language. Questions we will address include: did this change affect the kind of information that was preserved, and if so, how? And also, what role did culture and religion (as documented in imperial records) play in the creation and maintenance of imperial power?

**HIST 40974. de las Casas:Context/Resonance**

(3-0-3)

The Spanish conquest of Central and South America generated a crisis of conscience in Spanish universities and in Spain at large. People wanted to know: was the conquest justified, and if not, seeing that it could not be undone, what were the invaders to do? In this prolonged and often bitter debate, Bartolome de las Casas (1484-1566), Dominican friar and bishop of Chiapa in Mexico, formulated what still are among the most moving and intellectually incisive arguments for the equality of all human beings. He also wrote one of the earliest comparative histories of civilization (the *Apologetica Historia*). The task of the course is to understand the thought of Las Casas and his followers in its 16th-century context, and then to enquire into the connections between the ideas of Las Casas and contemporary theologians of liberation, in particular Gustavo Gutierrez.

**HIST 43075. Seminar: Jerusalem**

(3-0-3)

This research seminar provides an in-depth examination of the city of Jerusalem and its diverse historical experiences from the rise of Islam to the present (ca. 600–2000). Although the instructor will provide background information and feedback, this course is primarily student-driven: you will lead portions of discussions, present your research, and constructively critique the work of your peers. In addition to certain common readings, discussions will center on certain “hot topics” in the historical image of Jerusalem. Students will be assigned specific, usually “classic” studies of the topic at hand. Specific topics include the meaning of the Dome of the Rock; pilgrimage; the origin(s) of the Crusades; cross-cultural notions of sanctity; the Ottoman context, and the divided city. Rather than a simple chronological “biography” of a city, this course will provide a nuanced introduction to one of the most enduring symbols in Western, Jewish, and Islamic civilization.

**HIST 43130. Seminar: Occupation of Japan**

(3-0-3)

After years of fierce fighting in the Pacific, the victorious Allies occupied Japan from August 1945 until 1952. The “Basic Initial Post-Surrender Directive” charged military occupiers and their civilian auxiliaries with democratizing the former enemy empire. This course examines three aspects of this effort, namely the political, economic, and cultural restructuring of Japan. We will explore the goals, methods, and mix-ups of the (mostly) American attempt to recast Japanese society in a democratic mold and the Japanese response. The Big Question—one that we will return to again and again in our discussions—is what is democracy and how is it created and sustained?

**HIST 43250. Seminar: Travel in the Middle Ages and Beyond**

(3-0-3)

Many familiar events (from Exodus, to the voyages of Columbus, the Crusades, or the American Gold Rush) can be seen as examples of travel in history. This seminar will examine the phenomenon of travel, and will look at different types of travelers, including soldiers, pilgrims, explorers, missionaries, adventurers, and merchants. We will concentrate on the medieval period (500–1500 CE), but will also consider travel in other periods. The chronological scope of the course will be broad in order to trace changing perceptions of the world from the early Middle Ages up through the voyages of Marco Polo and Christopher Columbus. We will read the writings of Christian, Jewish, and Muslim travelers, and will discuss the differing motives, interests, and concerns of these itinerant men and women. We will also discuss the evolution of cartography, and shifting views of the world as revealed in early maps. The course will cover the technical aspects of medieval travel, with a discussion of roads, bridges, inns, overland transport, and shipping. We will also consider less physical aspects of travel and the ways in which medieval writers employed the metaphor of travel in different genres of literature such as the epic quest and accounts of spiritual journeys. Students will write a research paper based on primary sources broadly concerned with issues of travel in a historical period of their choice.

**HIST 43252. Heretics and Friars, Mystics and Nuns**

(3-0-3)

From about 1100 until about 1400, European society witnessed wave after wave of new religious movements. These energies yielded groups and teachers of all stripes, men and women regarded as heretics and as saints. This course will treat the most important of these, from the Cistercian monks who rejected the established ways of their fellow Benedictines around 1100, to Francis of Assisi's lay penitents and preachers, to suspect beguines in the Lowlands and the Rhineland mystics. The emphasis will fall upon studying texts from these religious teachers and actors that will help us get at the aspirations of these new religious, while setting them in their social and cultural environments.

**HIST 43410. Seminar: Victorian Revolution in Government**

(3-0-3)

Prior to the 19th century, government—particularly in the British Isles—was expected to be minimal, occasional, amateur, (and cheap), concerned only with maintaining property and religion, and, when unavoidable, with the defense of the realm. Modern governments (including the British) are large, permanent, professional (and costly) complex bureaucracies, concerned with how much you can load on a ship, what colors you can put in margarine, what you must learn in school, and with the regulation of the economy; the welfare of all citizens; and the quality of the environment, social and natural. We know that this revolutionary change in government happened during the 19th century, primarily in response to the great social changes of urbanization and industrialization, but historians disagree as to how it came about. Early in the semester, our meetings will be devoted to a critical reading of the state of the historical literature on this question; in the middle we will be learning to use the archives; and toward the end we will be meeting together to discuss our interpretations of the evidence. This seminar will meet the research seminar requirement for history majors, who have priority in enrollment. The seminar is also recommended to any student with an interest in public service or public policy.

**HIST 43440. Northern Ireland Troubles**

(3-0-3) Smyth

This discussion-based seminar explores the history of the six north-eastern counties of Ireland which became "Northern Ireland" in 1920–21. Northern Ireland remained part of the United Kingdom and had a built-in Protestant Unionist majority. The Catholic minority, alienated from the state from the outset, looked across the new border and to Dublin, capital of the Irish Free State, as the true site of their allegiance. Northern Ireland was thus, from the beginning, dysfunctional, scarred by sectarian violence and systematic discrimination in housing and employment. After examining the origins of the state and the early decades of its existence the seminar will turn to its main concern "the Troubles," which broke out in the late 1960s. The major episodes under scrutiny include the civil rights movement, Bloody Sunday, the hunger strikes, and the Good Friday Peace Agreement.

Students are obliged to produce a 25-page essay based on original research, and many are expected to draw on the rich microfilm archive of "the troubles," the Linenhall Collection, held in the Hesburgh Library.

**HIST 43470. Seminar: The Russian Revolution**

(3-0-3)

This research seminar is designed to familiarize history majors with main categories of primary sources (e.g., official documents, diaries, memoirs, correspondence), major historical interpretations, and historical method through study of selected events of the Russian Revolution. Students are expected to write a major research paper.

**HIST 43550. Seminar: The Cold War**

(3-0-3)

This course will address the individuals and issues involved in the emergence and development of the Cold War from its World War II beginnings to its postwar development. Stress will be placed on the origins of the Cold War but topics that have a major bearing on its later development will be considered. Students will be graded on their classroom participation (25 percent), short classroom presentations (25 percent), and on their final term paper (50 percent). While emphasis will be placed on the European/Russian role in the Cold War, the role of Americans will, naturally, be included. Students will be required to seek out original documents such as memoirs and printed archival sources, when not hindered by language obstacles. Of course, some original sources involving major individuals and issues have been translated into English.

**HIST 43552. Seminar: Nationalism in Europe**

(3-0-3)

This course will begin with several joint sessions devoted to an examination of the role nationalism has played in shaping modern European history. Given the broad nature of the course, emphasis will be placed on the theoretical underpinnings of nationalism, and on how national mythology influences historiography. The second portion of the course offers students an opportunity to conduct research on topics approved by the instructor. Research can focus on any European national experience in either the 19th or the 20th century. The instructor will consider topics touching on any aspect of diplomatic, social, religious, intellectual, or political history as long as the inquiry helps to enlarge our understanding of European nationalism. Students will be expected to present the results of their research at the end of the semester. Course requirements include submission of a bibliography, a thesis statement, a first draft, and a 25-page research paper at the end of the term. No prior knowledge of European history is required, though some basic knowledge of historical events will provide a firmer foundation to select a research topic. Students with even a rudimentary knowledge of a European foreign language will be expected to test their linguistic abilities in the final research project.

**HIST 43553. Seminar: Republicanism**

(3-0-3)

"Republicanism" refers principally, but not exclusively, to republican ideas in the English-speaking Atlantic world in the period 1600 to 1800. After looking briefly at republican ideology in the ancient world and in Renaissance Europe, the seminar will move to the substance of the course: the English "classical" republicans of the 17th century, such as Marchamont Nedham, John Milton, and James Harrington; the transmission of their ideas to 18th-century America; and, finally, the particular version of republicanism as it developed in Ireland in the same period. This seminar course is discussion-based. Members of the seminar are expected to research topics, which will at first be stipulated by the instructor, and will subsequently be of the student's own choice. Students will present the findings of their research as the basis for leading a class discussion. The semester's work will conclude with a 20-page essay on a subject negotiated between the student and the instructor.

**HIST 43555. Seminar: Europe in the Nazi Era**

(3-0-3)

This research seminar will address issues related to the rise, expansion, and defeat of Nazism between 1933 and 1945. Although Germany occupies a central place in this history, we will focus on the Europe-wide impacts of Nazi ideas and aggres-

sion. Students will read and discuss key works in the field dealing with topics such as Hitler's rise to power, European diplomacy in the 1930s; the course of World War II; Nazi occupation practices; the Holocaust and other programs of mass killing; women and the war effort; popular consensus, collaboration, and resistance; and the immediate postwar period. At the same time, each student will write a major research paper, based on primary sources, that explores in depth some aspect of this crucial period of European history. Class time will be divided approximately equally between discussing common readings and developing the skills necessary to produce a research paper.

### **HIST 43557. Seminar: Modern European Revolutions**

(3-0-3) Lyandres

This research seminar is designed to familiarize history majors with main categories of primary and secondary sources, major historical interpretations, and historical method through study of selected events and personalities of Modern European Revolutions, including the Russian Revolutions of 1905, 1917, and 1991; Eastern European Revolutions of 1989; the Orange Revolution in Kiev in November and December 2004 (as well as the Velvet Revolution in Tbilisi in the fall of 2003). Students are required to write a major research paper based largely on primary sources.

### **HIST 43558. Major Seminar: European Enlightenment**

(3-0-3)

The course will establish that Enlightenment (not THE Enlightenment) brought into being the modern Atlantic world. Because European Enlightenment was various and contradictory, our own world is various, tense, and contradictory. It is impossible to understand the formative long eighteenth century (ca. 1687–1807) as a game of either capture the flag or follow the leader. Sampling some of the variety of the cultural achievement of Europeans, from Ireland to Italy and from Prussia to Spain, will locate everyone on a level playing field. (No prior knowledge of European history is expected.) You will devote the rest of the semester to researching and writing of seminar papers on one or another major theme of or contributor to Enlightenment in Europe. You will present your seminar papers for class discussion over the last four meetings of the semester. Students who possess even an elementary reading knowledge of a non-English European language will apply their knowledge in their seminar papers.

### **HIST 43559. The Age of Democratic Revolutions, 1770-1850**

(3-0-3)

Between 1770 and 1850 North America, South America, and Europe were swept by waves of revolutionary unrest, a period that marked the beginnings of the modern world across several dimensions—political, social, and cultural. This seminar will begin with some common readings, looking at this period in comparative perspective through works by R.R. Palmer, Eric Hobsbawm, and others, in order to define both the common and distinctive features of the revolutions as they affected the different nations. Students will write research papers of about 25 pages based on their interests in particular topics and regions.

### **HIST 43560. Communist Europe: The Soviet Bloc, 1945–91**

(3-0-3) Kunicki

This research seminar examines the rise, progression, and fall of communist regimes in East Central Europe, the conglomeration of states that, by 1948, had fallen under the Soviet political and military domination. The Left and the Right are elusive concepts in Eastern Europe. Therefore we will begin by analyzing communism against the backdrop of the political and historical traditions in the region. We will examine how the communists conformed to domestic realities, in order to identify commonalities and differences between members of the Soviet bloc. Primary issues include: communist takeovers and the founding of people's democracies; the Cold War rivalry and its impact on the communist regimes; Stalinism and de-Stalinization; the pattern of relationship between the Moscow center and its Eastern European peripheries; the entanglement of nationalism and communism; pluralism within communism; détente and the democratic opposition; the dynamics of the revolutionary and reforming processes that led to the collapse of the communist system. Students will research and write a 25-page paper based on primary and secondary sources.

### **HIST 43610. Seminar: Notre Dame History**

(3-0-3) Blantz

This seminar will offer the student the opportunity to research an aspect of Notre Dame history of his or her particular interest—academic program, student life, administrative decision, etc. Research topics might include Father Sorin's rebuilding of the Main Building after the fire of 1879; priest-chaplains serving in the Civil War; Notre Dame during World War I or World War II; Rev. Julius Nieuwland, C.S.C., and the discovery of synthetic rubber; Notre Dame's Minims Department (grade school); Notre Dame's Preparatory School (high school); Notre Dame's Manual Labor School; immigrant scholars on the Notre Dame faculty in the 1930s; Holy Cross religious as Japanese prisoners of war in World War II; the inauguration of the Great Books Program; Rev. John J. Cavanaugh, C.S.C., and the Kennedy Family; Rev. Theodore Hesburgh, C.S.C., and the Civil Rights Commission; etc. After some introductory readings on the history of the University, the principal work of the course will be the research, in primary and secondary sources, and the writing of a paper of approximately 30 pages, and a presentation of the paper for class discussion.

### **HIST 43612. Seminar: US Catholic History**

(3-0-3)

This seminar is designed with two goals in mind: to introduce students to the major events and themes in the history of American Catholicism, and to help students organize, research, and write an original work of historical scholarship. During the first half of the semester, we will read and discuss a variety of primary and secondary sources concerning the following topics: immigrant and ethnic Catholicism; the experience of Catholic women, especially women religious; Catholic devotional life; Catholic social movements; and the relationship between Catholics and the broader American society. We will explore some of the major historical interpretations of the Catholic experience, and become familiar with methods of historical research. During the second half of the semester, students will work independently (in consultation with the instructor) to prepare their research papers. At the end of the semester, they will share their findings with other participants in the seminar through an oral presentation.

### **HIST 43613. Seminar: US Legal History**

(3-0-3)

This course examines the role of law in the history of the United States from its origins as a British colony to the late 20th century. It looks at law not only as a functional response to social transformation, but also as both a powerful force shaping daily life and as a key component of American political mythology. The course will examine constitutional, common, and statute laws, as well as legal culture and institutions. Key subjects include the market revolution, slavery, the Civil War amendments, laissez-faire constitutionalism, legal realism, the New Deal, and civil rights. This course combines lecture and discussion. To that end, the instructor will pick three to five students each week to be responsible for the reading, and will call on those students during class. Each student will be on-call at least twice during the semester. It is advisable for you to read for every session, as it will be difficult to follow the lecture without adequate preparation.

### **HIST 43614. Seminar: The Religious Factor in American History**

(3-0-3)

A research seminar surveying how religion has interacted with American culture, including thought, moral values, social views, education, and politics. Students will write a research paper on a topic of their choice.

### **HIST 43615. The Right to Vote in American History, 1607 to the Present**

(3-0-3) Graff

This research seminar focuses on the right to vote in American history. Students will explore the right to vote as it evolved over the course of American history, beginning with the colonial experiments in Virginia in the 17th century and ending with the contested presidential elections of 2000 and 2004. Alex Keyssar's *The Right to Vote: The Contested History of Democracy in the United States* will provide the central text, and we will investigate case studies centering on age, property, religion, race, gender, naturalization, and other issues throughout four centuries of American history. Each student will explore one particular case study from any

period in American history and produce a 25-page paper based on primary source research.

### **HIST 43616. Seminar: Reforming America**

(3-0-3) Grow

This research seminar examines the role of political and social reform in American history from the late 18th century to the present. Throughout US history, reformers have targeted a variety of social ills—including slavery, poverty, industrialization, racism, lack of women's rights, and political and moral corruption—in their efforts to transform American culture, politics, and society. We will study the broad dynamics of reform as well as investigate specific movements as case studies. Themes will include the struggles between competing visions of reform to define America; the religious roots (both Protestant and Catholic) of various reform movements; and the international influences on reform. Students will write a 25-page paper, based on primary source research, which explores a case study of a reform movement or individual reformer from any period in American history.

### **HIST 43651. Women and Gender in the United States, 1929-84**

(3-0-3)

This research seminar will cover changing gender relations in the US between the Great Depression and the end of the Reagan era. Students will read and discuss recent books and articles covering a variety of topics which may include: gender relations during the Great Depression; whether WWII was a turning point for women's work; the feminine mystique; women in the Civil Rights movement; the women's liberation movement of the 1960s and 1970s; changes in masculinities and their relation (or lack of relation) to the women's movement; the gay rights movement; and changes in women's work force participation and family life. During the latter half of the semester, students will concentrate on producing a substantial paper, based on original primary source research, on a topic of their choice selected in consultation with the instructor.

### **HIST 43652. Seminar: US Thought, Belief, and Values**

(3-0-3)

A research seminar surveying early America's most characteristic intellectual, moral, and religious outlooks. The course will provide a broad introduction to topics such as the religious foundations of influential Americans groups such as Puritans in New England and Quakers in Pennsylvania, the European origins of American beliefs, the Enlightenment of the 18th century, the origins of American political thought, the impact of evangelicalism on the new republic, romanticism and Transcendentalism, the role of science, anti-slavery and other reform thought before the Civil War, the South, and the ideological and moral issues of the Civil War. The course will include consideration of the outlooks of some of early America's greatest thinkers and writers. Students will write a research paper on a specific person or topic in one of these areas.

### **HIST 43750. Seminar: United States in the Twentieth Century**

(3-0-3) Blantz

The purpose of this course is twofold. First, it should permit the student to gain a greater familiarity with several of the major topics in 20th-century American history—the Progressive Period of Theodore Roosevelt and Woodrow Wilson; the Wall Street Crash of 1929 and the Great Depression; the New Deal legislation of Franklin Roosevelt; World Wars I and II; the Cold War; the Fair Deal Program of Harry Truman; Dwight Eisenhower's Modern Republicanism; John Kennedy's New Frontier; the Great Society of Lyndon Johnson; the Civil Rights Movement and the Feminist Movement; Richard Nixon and Watergate; aspects of 20th-century American culture; and the presidency of Ronald Reagan. Second, and more importantly, the course will offer each student the opportunity to research and produce a major paper on a topic of his or her own choosing in 20th-century American history. Approximately one-fourth of the semester will be devoted to reading and discussion of several of the above topics, and the rest of the semester to research and writing the seminar paper. The papers will be summarized for class discussion in the last four meetings of the semester.

### **HIST 43751. Seminar: Religion and Politics in Twentieth-Century US**

(3-0-3)

This course will examine the relationship between religion and political violence in the 20th century, focusing on the United States in comparative perspective. The course will be divided into three parts; students may write their seminar paper on a topic in any one of these three thematic areas. Part one will examine the writings and cultural influence of major thinkers in the US Protestant, Catholic, and Jewish communities who addressed the questions of war, peace, and America's role in the world (e.g., Reinhold Niebuhr, Thomas Merton, Abraham Joshua Heschel, and John Courtney Murray, S.J.). The second part will examine cases of religiously inspired violence in the United States (e.g., the Ku Klux Klan, the militias, and Oklahoma City), Egypt, Iran, Palestine/Israel, Lebanon, and India in the 20th century. The third part will examine the concept of "American exceptionalism" and whether, to what extent, and why it applies to the question of religious violence. Each student will be required to write brief reviews of weekly assignments during the first part of the semester and to prepare a seminar paper, to be presented at later meetings.

### **HIST 43753. Seminar: Urban Oral Histories**

(3-0-3)

For years, historians rejected oral sources, claiming that they were unverifiable utterances from respondents who were often equally unreliable. In the recent past, however, oral history has become an accepted form of research and a staple of certain historical fields. In the seminar, participants will devise, construct, and implement an urban history research project that draws extensively on oral sources. We will examine the methodology, practices, and pitfalls of oral history in classroom discussion and secondary sources.

### **HIST 43754. Seminar: African American Civil Rights in the US**

(3-0-3)

The primary goals of the class are to introduce the participants to the major scholarly works and developments related to African American civil rights and to facilitate the development of a research strategy for the production of an article-length scholarly treatment of a selected aspect of civil rights history. Projects should reflect the evolving interpretive synthesis of the history of the Civil Rights Movement and its relationship to the major social, political, economic, and cultural trends of the 20th century. Students may also examine the ways in which the history and achievements of the Civil Rights Movement have been represented and interpreted.

### **HIST 43755. Major Seminar: US Presidents and Presidencies, FDR to Clinton**

(3-0-3)

The purpose of this course is essentially twofold. First, it should permit the student to gain a greater familiarity with American history from the New Deal through to the end of the century using the prism of the American presidency. Second, and more importantly, the course will offer each student the opportunity to research and produce a major paper on a topic of his or her own choosing in this broad area. Approximately one-third of the semester will be devoted to reading and discussion of the various presidential administrations, and the rest of the semester to research and writing of the seminar paper. The papers will be presented for class discussion in the last four meetings of the semester.

### **HIST 43900. Latin American Independence Movements**

(3-0-3)

This seminar focuses on the breakdown of the Spanish empire in Latin America, and the emergence of new nation-states in the region in the first quarter of the 19th century. Contrary to common expectations, the former colonies did not form a united nation, but rather split into 10 different republics that developed their own unique histories, only to split further apart during the course of the century. This seminar examines the origins and actors of the independence movements, the development of an ideology of emancipation, and the variegated causes of fragmentation. The first third of the seminar is devoted to a common set of readings on Latin American independence. Students choose, in consultation with the professor, a specific topic of research. Students will work on primary source material, develop a thesis, and present their results in class for comment and discussion. At the end of the semester, students will submit a 25-page seminar paper.

**HIST 43901. Seminar: Coffee/Sugar/Other Goods**

(3-0-3)

Between their origin in the earth and their ultimate destination in our bodies, coffee, sugar, and other addictive commodities (such as tobacco, cacao, tea, opium, cocaine, and perhaps oil) have had profound effects on world history. In all cases, their production, processing, distribution, and consumption have been intertwined with the historical development of individuals, peoples, nations, and international relations. Growing consumption has profoundly altered the social, economic, and environmental history of producing countries, with especially profound impact on those individuals whose labor brings them from the earth. And in all cases, most of the world's supply of such commodities comes from relatively poor regions while consumption is centered in the relatively wealthy, industrialized nations. The course introduces students to the broad outlines of the history of comparative commodities through class readings and discussions. Students will then conduct research on an approved topic related to a specific commodity or theme that examines one aspect of the role of a commodity in world history. Course requirements include the submission of a bibliography, a thesis statement, a first draft, and a 25-page research paper.

**HIST 43902. Latin American Research Seminar**

(3-0-3) Beatty

After briefly examining different models of research and writing, students will undertake a major, semester-long primary source research project on a topic within Latin American history (which could include foreign relations with the United States or European nations, immigration to or from the region, etc.). I anticipate that most students will use research materials available at Notre Dame. Interested students are encouraged to see the instructor prior to the beginning of the semester in order to begin exploring possible topics and available research materials.

**HIST 47050. Special Studies**

(V-0-V)

Independent study, writing, and research under the direction of a faculty member.

**HIST 53001. Honors Methodology**

(3-0-3) Martin

This course is open only to students in the Department of History Honors Program. It has two agendas: (1) to introduce students to theoretical and practical foundations of historical method; and (2) to help get you started on your honors research. During the first half of the semester, we will discuss and practice key aspects of historical method, providing a structure for you to start your own research. You will work on multiple drafts of a research proposal, develop a bibliography, and begin your research in primary sources. By the end of the semester, you should be close to completing your research and beginning to write the first draft of your honors essay. This course will try to assist you in planning and budgeting your time toward the goal of minimizing the stress and maximizing the intellectual rewards of participating in the honors program.

**HIST 53002. Honors Colloquium**

(3-0-3) Thomas

This course, open only to students in the History Honors Program, introduces students to the ways in which history is conceptualized, written, and argued about. Students approach these issues by reading and discussing the historiography of the instructor's chosen field or fields. The emphasis of the class will be on understanding how historians have framed their questions for research, in conversation with one another and with their own interests, and how their work, collectively and individually, has shaped the development and the research agendas of the larger discipline of history.

**HIST 56050. Directed Readings**

(0-0-V)

Independent study of special topics under the direction of a faculty member. Agreement by the faculty member and approval by the director of graduate studies required. (Annual)

**HIST 58003. Honors Thesis**

(3-0-3)

History Honors Program students only. In the fall and spring of the senior year, the history honors student will work on a thesis (40–80 pages) under the supervision of a specific faculty member.

## Department of Irish Language and Literatures

### IRLL 10101. Beginning Irish I

(3-0-3) Conneely, Macleod

No prior knowledge of the Irish language is required. This course provides an enjoyable introduction to modern Irish. Energetic teachers in small classes teach basic language skills and prepare students to conduct conversations and read authentic texts. Extensive use is made of role-play and interactive teaching methods. Irish 10101 is a superb opportunity to learn a new language, explore Irish/Celtic culture, and investigate the linguistic politics of the only minority language offered at Notre Dame. In addition to satisfying the language requirement of the College of Arts and Letters and the College of Science, Irish satisfies the popular Irish studies minor's requirements, and selected students will have an opportunity to study in Dublin.

### IRLL 10102. Beginning Irish II

(3-0-3) Macleod

*Prerequisite:* (IRLL 10101 OR IRLL 101) OR (IRST 10101 OR IRST 101) OR (CLIR 10101 OR CLIR 101)

Second semester of instruction in the Irish language. More emphasis will be placed on reading simple texts in Irish.

### IRLL 13186. Literature University Seminar

(3-0-3) Nic Dhiarmada

The *Hidden Ireland* denotes both a book and a concept. The book was written by Daniel Corkery in 1924 and was an immediate success as it encapsulated a version of Irish history that had not hitherto been available to the general public; it is still considered to be a classic of its kind. The concept promoted the notion that history should emanate from “below” and should not be confined to the elites and governing classes. Both book and concept have had a profound impact on our understanding of Irish identity, Irish history, and Irish literature. This course will examine the book in depth and utilize it to open a window on the hidden Ireland of the 18th century.

### IRLL 20103. Intermediate Irish

(3-0-3) McKibben

*Prerequisite:* (IRLL 10102 OR IRLL 102) OR (IRST 10102 OR IRST 102) OR (CLIR 10102 OR CLIR 102)

Continuation of the study of the Irish language with increased emphasis on the ability to read 20th-century literary work in the original Irish.

### IRLL 20105. Old Irish

(3-0-3)

The aim of this course is to enable students with no previous knowledge of Irish, medieval or modern, to take the first steps toward acquiring a reading knowledge of Old Irish. “Old Irish” is meant conventionally the language of the seventh and eighth centuries AD. The emphasis will be on reading texts in the original language by means of a detailed examination of the grammatical structure of the language. We will also, however, give some consideration to aspects of the literary and cultural contexts in which our texts were composed. The texts we will use have yet to be decided.

### IRLL 20109. Celtic Heroic Literature

(3-0-3) Fogarty

An exciting introduction to Celtic literature and culture, this course introduces the thrilling sagas, breathtaking legends, and prose tales of Ireland and Wales. Readings include battles, heroic deeds, feats of strength and daring and dilemma faced by the warrior heroes of the Celts. Celtic Heroic Literature, which requires no previous knowledge of Irish or Welsh, studies the ideology, belief system and concerns of the ancient Celtic peoples as revealed in their saga literature. By examining the hero's function in society, students investigate the ideological concerns of a society undergoing profound social transformation and religious conversion to Christianity and the hero's role as a conduit for emotional and social distress. Among the heroes to be studied in depth are Cu Chulainn, Lug, St. Patrick, and the king-heroes. Wisdom literature and archaeological and historical evidence will

also be considered in this course. No prior knowledge of Irish required. All texts provided in English.

### IRLL 20203. Advanced Readings in Irish Culture

(3-0-3) O Conchubhair

*Prerequisite:* (IRLL 20103 OR IRLL 103) OR (IRST 20103 OR IRST 103) OR (IRLL 60103 OR IRLL 503)

An advanced course focusing on reading and translating a variety of texts in the Irish language. We concentrate on further development of reading, interpretive, and technical skills mastered in previous language courses (IRLL 10101, IRLL 10102, and IRLL 20101). Texts from various authors and historical periods allow students to taste different writing styles: contemporary fiction, journalism, literary criticism, and historical and cultural texts. Emphasis will be on sentence structure, stylistics, and syntax. Students are required to have earned a high grade in IRLL 20101 in order to take this class. At the conclusion of this course, students will be able to conduct independent research with Irish texts.

### IRLL 23511. Irish Heroic Literature in Modern Adaptation

(3-0-3)

Beginning with a study of the ethos of Irish/Celtic heroic literature in its historic and cultural context, this course examines the ideological, aesthetic, and personal uses to which that material has been put by Irish writers of the past two centuries (19th and 20th centuries), writing in English and Irish. Among the authors to be studied are Seamus Heaney, Flann O'Brien/Myles na Gopaleen, Nuala Ní Dhomhnaill, and Eugene Watters/Eoghan ÓTuairisc. Particular attention will be paid to shifting concepts of “authenticity” and the degree to which various creative artists have retained, reinterpreted, or reinvented what they perceived to be the essence of their originals. This course will interest English majors, modernists, and medievalists.

### IRLL 26311. Directed Readings

(3-0-3)

Directed readings in Irish literature.

### IRLL 30107. The Hidden Ireland

(3-0-3) O'Buachalla

The *Hidden Ireland* denotes both a book and a concept. The book was written by Daniel Corkery in 1924 and was an immediate success as it encapsulated a version of Irish history that had not hitherto been available to the general public; it is still considered to be a classic of its kind. The concept promoted the notion that history should emanate from “below” and should not be confined to the elites and governing classes. Both book and concept have had a profound impact on our understanding of Irish identity, Irish history, and Irish literature. This course will examine the book in depth and utilize it to open a window on the hidden Ireland of the 18th century. The cultural, historical, and literary issues that are raised by the book will be studied in the context of the poetry of the period. Poetry will be read in translation.

### IRLL 30111. The Celtic Otherworld in Early Irish Sources:

(3-0-3) Fogarty

In early Irish tradition, the everyday world (of men, women, kings, warriors, and cattle) and the Otherworld stand in unstable and uneasy relation to one another. The Otherworld has several aspects: it can be positive and beneficial—indeed, it is viewed as the legitimating source of rule in this world—but also baleful and destructive. In this course, we will study a range of Otherworld encounters, seeking to understand the vast range of contacts between the human world and the other world (or worlds) of early Irish tradition.

### IRLL 30120. The Irish Short Story

(3-0-3) O Conchubhair

This course studies the Irish short story as a literary genre that reflects the changing political and cultural forces at play in Ireland. We begin the course by surveying various critical theories that can be applied to the genre before reading and discussing a wide selection of short stories. The course considers Irish writing in the broader sense—literature written in either Irish or English. Among the authors included are Patrick Pearse, Pádraic Ó Conaire, Séamus Mac Grianna, James

Joyce, Liam O'Flaherty, Elizabeth Bowen, Frank O'Connor, Sean O'Faolain, Éilís Ní Dhuibhne, Angeal Bourke, Seán Mac Mathúna, Micheál Ó Conghaile, Eithne Strong, Pádraic Breathnach, Alan Titley, Mary Lavin, William Trevor, Gerry Adams, and Bernard MacLaverty.

### IRLL 30203. Advanced Readings in Irish Culture

(3-0-3)

Reading on culture, literature, sport, current affairs, and politics form the basis of this course. Each week we read and contextualize a prearranged text. Students are encouraged to suggest readings/texts that relate to their studies or research topics, and every reasonable effort is made to incorporate such material into the syllabus. Examples of texts studied in this class include interviews with contemporary Irish writers: Nuala Ni Dhomhnaill and Alan Titley; essays by political figures (Sinn Féin/SDLP), journalism/opinion pieces from the *Irish Times*, *Foinse*, *Feasta*, and *Beo*; and literature criticism by Breandan O Buachalla and Diarmuid O Giollain. This course suits students returning from a semester/year in Dublin, eager to keep in touch with current affairs and with the political and cultural landscape in Ireland. A solid command of the language is required for this course. All texts are in Irish. This course is required for the minor in Irish language and literature

### IRLL 30301. Women in Irish Oral Tradition

(3-0-3)

Oral tradition offers individuals and communities ways of constructing and maintaining identity, often against considerable external pressure. This course will explore oral verbal art in Irish and English through transcribed texts, sound recordings, and film, paying particular attention to depiction of and performances by women, and offering gendered readings of the material studied.

### IRLL 30306. Saints and Kings in Celtic Ireland

(3-0-3) Fogarty

This course focuses on a series of encounters (in early Irish and Hiberno-Latin) between saints and kings or other royal characters. Through these stories and characters, tensions between the domains of spiritual and secular, the local and the "national," the native and the external, are raised, explored, and (sometimes, though by no means always) resolved. Saints such as Patrick, Colmcille, Brigit, Ciarán, and Caimnech, together with kings such as Lóegaire Mac Néill, Diarmuid Mac Cerbaill, and Muirchertach Mac Erca will be studied.

### IRLL 40103. Irish Heroic Literature in Modern Adaptation

(3-0-3) O'Leary

Beginning with a study of the ethos of Irish/Celtic heroic literature in its historic and cultural context, this course examines the ideological, aesthetic, and personal uses to which that material has been put by Irish writers of the past two centuries (19th and 20th centuries), writing in English and Irish. Among the authors to be studied are Seamus Heaney, Flann O'Brien/Myles na Gopaleen, Nuala Ní Dhomhnaill, and Eugene Watters/Eoghan Ó Tuairisc. Particular attention will be paid to shifting concepts of "authenticity" and the degree to which various creative artists have retained, reinterpreted, or reinvented what they perceived to be the essence of their originals. This course will interest English majors, modernists, and medievalists.

### IRLL 40304. Poetry and Politics in Early Modern Ireland, 1541–1688

(3-0-3)

The political poetry of the period 1541–1688 will be discussed and analyzed against the historical background. The primary focus will be the mentalité of the native intelligentsia as it is reflected in the poetry and as it responded to the momentous changes of the period. The origins and rise of the cult of the Stuarts will be examined and the historiography of the period will be assessed.

### IRLL 40305. The Poetry of Nuala Ni Dhomhnaill

(3-0-3)

This course will focus on the interstices of gender and cultural identity in the work of Nuala Ni Dhomhnaill. Her poetry will be situated within a theoretical framework that draws, inter alia, on recent feminist scholarship. It will address theories of the feminine as well as the specificities of Irish-language literary

and oral discourses and their impact on Ni Dhomhnaill's poetic practice. The course will also address the implications of translation. While texts will be read in English, there will be an opportunity for close textual comparisons with the original Irish-language poems.

### IRLL 40306. The Irish in Their Own Words: Identities in Early Modern Ireland

(3-0-3) McQuillan

The topic to be covered in this course is the formation of individual and collective identity through language, literature, and history in this period. In addition to the works of the great early-modern poets (16th–18th centuries) like Tadhg Dall Ó Huiginn, Dáibhí Ó Bruadair, and Aogán Ó Rathaille, we will focus on such important prose works as *Foras Feasa ar Éirinn*, the foundation history of the "new" Irish nation of the 17th century. Important secondary works here will include those of Anthony D. Smith and Adrian Hastings on premodern forms of nationalism as well as Stephen Greenblatt on identity formation in 16th-century England and Paul Friedrich on linguistic relativism and the poetic in language.—

### IRLL 40307. Gender, Politics and the Poetic Tradition in Irish

(3-0-3)

This course begins with the fundamental feminist assumption that gender matters and that gender is one of the central terms through which people both understand and critique their world. Our particular area of inquiry will be the role of gender in the Irish poetic tradition from the 16th century onwards, something that has only recently begun to receive attention from critics like Angela Bourke, Mairin Nic Eoin, and Briona Nic Dhiarmada. The class will focus on how gendered representations of masculinity and femininity underwrite political appeals, particularly regarding Ireland's colonial relationship to England. We'll also look at how gender is used to represent and to resist related social changes, like shifting class relations, unstable power relations between men and women, and contested notions of sexuality. We will read a variety of poetic texts, some serious and formal, some funny and popular; genres will include formal bardic poetry, the *aisling* (or vision poem), oral lament, song poetry, and comic verse. The methodology will be historically informed close reading, meaning that we will read texts closely, rather than generalize abstractly, so that we have a sound basis for our analysis. No knowledge of Irish language is required or necessary, although original texts will be provided alongside translations. This class is discussion-based and will ask for your engaged participation at all times. Students will be responsible for presentations and will write several shorter papers and a longer term paper.

### IRLL 40308. Modern Irish Poetry

(3-0-3) Nic Dhiarmada

An introduction to modern Irish literature and the Irish poetic tradition, this course is a magnificent opportunity to study modern Irish poetry with the foremost Irish-language critic. Visiting Notre Dame for this academic year, Prof. Briona Nic Dhiarmada, as the Fulbright Professor-in-Residence, will teach a course on modern and contemporary Irish poetry in the Department of Irish Language and Literature. This course focuses on key canonical texts by Irish-language poets, and students will conduct close textual readings, examine the social and political context, consider various theoretical applications, and deconstruct the mechanics of individual poems. Among the texts to be studied are Cathal Ó Searcaigh, Gearóid Mac Lochlainn, Biddy Jenkinson, Michael Hartnett, Máire Mhac an tSaoi, Michael Davitt, Gabriel Rosenstock, Liam Ó Muirlithe, Pearse Hutchinson, Seán Ó Ríordáin, Máirtín Ó Direáin, and Áine Ní Ghlinn. Particular attention will be paid to the poetry of Nuala Ní Dhomhnaill and the politics of translation.

### IRLL 40310. Ideology, Poetry, and Politics in Jacobite Ireland

(3-0-3)

Jacobitism, or allegiance to the course of the House of Stuart (from Latin *Jacobus*, James, the deposed James II), was the common voice of political dissent in 18th-century Ireland, Scotland, and England. Irish Catholic advocacy of the Stuart cause had already become a political orthodoxy in the course of the 17th century, and when the Stuarts were deposed by William of Orange (King Billy) later succeeded by the Hanoverians (1714), the culture of dispossession and displacement and the rhetoric of return and restoration became firmly entrenched in the political ideology of Catholic Ireland. This course will examine the development of Irish

Jacobitism in its various literary, historical, and ideological aspects, in addition to placing it within its wider British and European context in the 18th century.

**IRLL 40313. The Celtic Otherworld in Early Irish Sources**

(3-0-3)

In early Irish tradition, the everyday world (of men, women, kings, warriors, and cattle) and the Otherworld stand in unstable and uneasy relation to one another. The Otherworld has several aspects: it can be positive and beneficial—indeed it is viewed as the legitimating source of rule in this world—but also baleful and destructive. In this course, we will study a range of Otherworld encounters, seeking to understand the vast range of contacts between the human world and the other world (or worlds) of early Irish tradition.

**IRLL 57001. Special Studies**

(3-0-3)

Special studies course with instructor.

**Irish Studies Program**

**IRST 10101. Beginning Irish I**

(3-0-3) Conneely, Macleod

An introduction to modern spoken and written Irish: basic principles of grammar and sentence structure, as well as core vocabulary. Emphasis is placed on the application of these principles in everyday situations.

**IRST 10102. Beginning Irish II**

(3-0-3) Macleod

*Prerequisite:* (CLIR 10101 OR CLIR 101) OR (IRST 10101 OR IRST 101) OR (IRLL 10101 OR IRLL 101)

The second of three courses in Irish; see preceding for description of program.

**IRST 13186. Literature University Seminar**

(3-0-3) McQuillan

Medieval Ireland witnesses a political and military struggle between England and Ireland, Protestantism and Catholicism, and colonists and natives. This course introduces students to the literature of medieval Ireland. Students read literary texts and explore how and why these texts shed light on the bloody and turbulent political and military life of medieval Ireland. No prior knowledge of Irish required.

**IRST 20020. Ireland in Transition: Emigration to Immigration and Beyond**

(3-0-3)

Throughout the 20th century, Ireland was characterized by a relatively high rate of emigration. Over the century, however, the nature, type, and destination of Irish emigrants changed. Whereas Irish emigrants were once drawn almost exclusively from the agricultural and laborer classes, in the closing decades of the 20th century, emigration came to permeate the entire social system. Thus, Irish migrants were to be found not just among the ranks of skilled and semi-skilled labor, but also among the trans-national professional elite that criss-crosses the globe. Current migration trends suggest a radical departure from the pattern that has characterized Irish demography for more than two centuries. Nowadays, more people are entering Ireland than leaving, bringing the country's migratory profile more into line with its European partners. Apart from a high rate of return migration, there has been an enormous increase in the numbers of immigrants coming to Ireland, particularly, after several Eastern European countries entered the EU in 2004. Just over 10 percent of the population is now foreign born, and up to 200 different languages are spoken on the island. The study of migration and its meaning in the context of the unprecedented buoyancy of the Irish economy directs us to new concerns about multiculturalism, immigration policy and practices, Ireland's position in the global economy, and the relationship between the Irish diaspora and the homeland. This course will focus on four key themes in particular: (1) the socio-historical context of Irish emigration; (2) case studies of the lived experience of Irish emigrants in the late 20th century; (3) the phenomenon of return migration; and (4) immigration into Ireland and the multicultural challenge.

**IRST 20103. Intermediate Irish**

(3-0-3) McKibben

*Prerequisite:* (CLIR 10102 OR CLIR 102) OR (IRST 10102 OR IRST 102)

Continuation of the study of the Irish language with increased emphasis on the ability to read 20th-century literary work in the original Irish.

**IRST 20105. Old Irish**

(3-0-3)

The aim of this course is to enable students with no previous knowledge of Irish, medieval or modern, to take the first steps toward acquiring a reading knowledge of Old Irish. By "Old Irish" is meant conventionally the language of the seventh and eighth centuries AD. The emphasis will be on reading texts in the original language by means of a detailed examination of the grammatical structure of the language. We will also, however, give some consideration to aspects of the literary and cultural contexts in which our texts were composed. The texts we will use have yet to be decided.

**IRST 20109. Celtic Heroic Literature**

(3-0-3) Fogarty

An exciting introduction to Celtic literature and culture, this course introduces the thrilling sagas, breathtaking legends, and prose tales of Ireland and Wales. Readings include battles, heroic deeds, feats of strength, and daring and dilemma faced by the warrior heroes of the Celts. Celtic Heroic Literature, which requires no previous knowledge of Irish or Welsh, studies the ideology, belief system, and concerns of the ancient Celtic peoples as revealed in their saga literature. By examining the hero's function in society, students investigate the ideological concerns of a society undergoing profound social transformation and religious conversion to Christianity and the hero's role as a conduit for emotional and social distress. Among the heroes to be studied in depth are Cu Chulainn, Lug, St. Patrick, and the king-heroes. Wisdom literature, and archaeological and historical evidence will also be considered in this course. No prior knowledge of Irish required. All texts provided in English.

**IRST 20201. Stage Irish: The Irish in Plays**

(3-0-3)

A study of representations of the Irish drama in the 19th and 20th centuries.

**IRST 20203. Advanced Readings in Irish Culture**

(3-0-3) O Conchubhair

An advanced course focusing on reading and translating a variety of texts in the Irish language. We concentrate on further development of reading, interpretive, and technical skills mastered in previous language courses (IRLL 10101, IRLL 10102, and IRLL 20101). Texts from various authors and historical periods allow students to taste different writing styles: contemporary fiction, journalism, literary criticism, and historical and cultural texts. Emphasis will be on sentence structure, stylistics, and syntax. Students are required to have earned a high grade in IRLL 20101 in order to take this class. At the conclusion of this course, students will be able to conduct independent research with Irish texts.

**IRST 20229. Twentieth-Century Irish and Native American Literature: When We Were Noble Savages**

(3-0-3)

From the outset of colonization in both Ireland and North America, literature was employed in similar fashion to romanticize, demonize, and, more often than not, silence Irish and Native American cultures. Today, with the surge in post-colonial literatures, Irish and Native American literatures have found new voices that look to the past in order to explore the present. Instead of romanticizing cultural memories, these authors subvert and challenge heroic representations while dispelling stereotypes. Together, these separate literary traditions intersect and diverge, challenging accepted perspectives of history and culture while blending stories with oral tradition, popular history, and pop culture. With these intersections in mind, we will explore an array of literature from both Irish and Native American traditions, from novels to poetry to film. We will look at a variety of authors, including Flann O'Brien, Nuala Ni Dhomhnaill, Eilis Ni Dhuibhne, Leslie Marmon Silko, Sherman Alexie, and Simon Ortiz. Requirements include a midterm exam, one short paper (3–5 pages), one longer paper (8–10 pages), and a presentation.

**IRST 20230. City Streets, City Beats: Belfast, Dublin, London, and Paris from Baudelaire to Bono**

(3-0-3)

As one of the most dominant themes of modernity, the city figures as a poster child of trendsetters, go-getters, floozies, and philanderers. It is the embodiment of shabby chic. Wherever there is culture there are cutthroats, and if there is a ballroom there is bound to be a bordello. *Baudelaire's Paris* sets the tone for the modern cities' fast-paced but staggering tempo, and 150 years later, it can still be heard in Bono's gravelly tones and nostalgic lyrics. This course focuses on four cities intimately connected through literature, art, music, and film. It will study both their tense political and social relationships with one another as well as their idiosyncratic cultures and geographies (including their landmarks, streets, transportation and water systems, etc.), and will think about the resonance of these cities histories on global, contemporary culture. Readings include selections from Baudelaire and Apollinaire; works by Padraic O Conaire, Joseph Conrad, James

Joyce, Liam O'Flaherty, Samuel Beckett, Virginia Woolf, Elizabeth Bowen, John Banville, and Michael McLaverty; and selected poems from Seamus Heaney, John Montague, Derek Mahon, and Ciaran Carson. Photos, paintings, and song lyrics will supplement the readings, and there will also be a few movie showings. Course requirements include class participation, weekly quizzes, one 10–12 page paper, and a midterm.

**IRST 20401. The Irish Military Tradition**

(2-0-3)

*Corequisite:* IRST 22401

A study of the history and culture of "fighting Irish" military tradition from medieval through modern times.

**IRST 20403. The Irish American Experience**

(3-0-3)

*Corequisite:* HIST 22610

For sophomores only. This course will examine the history of the Irish in the United States.

**IRST 20512. Culture and Politics in Northern Ireland**

(3-0-3)

This course explores the politics of culture, and the cultures of politics, in the North of Ireland during the 20th century. Using a multiplicity of genres—drama, fiction, poetry, film, painting, and documentary material—we will unravel the history behind partition, the causes of the Troubles, and the nature of the conflict. Among the key moments or events upon which we will concentrate are the Somme, the sinking of the Titanic, Bloody Sunday, the hunger strikes, Drumcree, the Anglo-Irish Agreement, and the Shankill Butchers. Certain key themes will stretch through our semester's work. Among these are sectarianism, the relationship between violence and culture, the role of religion in the state, borders, hatred, identity, and issues of social and political justice. Some of the writers whose work we will read are Seamus Heaney, Frank McGuinness, Sam Thompson, John Montague, Seamus Deane, Eoin MacNamee, Bernard MacLaverty, Bernadette Devlin, and Thomas Kinsella. This class is discussion-based, and will involve student presentations and engaged participation.

**IRST 20515. Celtic Mythology**

(3-0-3)

A review of the legends and myths of the Celtic world, along with some of their contemporary adaptations.

**IRST 20518. Anglo-Irish Literature: The Cultured Misrule of Dissolute Lords and Rebel Countesses**

(3-0-3)

An examination of Irish Identity through an introduction to the literature, both historical and contemporary, of Anglo Ireland.

**IRST 20522. Mapping Ireland**

(3-0-3) Wilson

In this course, we will read modern Irish history, film, poetry, drama, short fiction, and the novel to explore the various ways Irish artists and writers have sought to give shape to national identity and the political geography of Irish life. Our primary intention will be to read and appreciate the individual works, but over the course of the semester we shall seek to compare the different visions of nation and culture those works present. Because of Ireland's exceptional history, we may, in fact, discover that the central element of so much of its best art is precisely to imagine what it means to be Irish. In consequence, Irish works provide us a window through which to examine the relation between art and politics, imagination and the nation. Readings will range from John Ford's *The Quiet Man*; to poems by Seamus Heaney, W.B. Yeats, and Eavan Boland; to fiction by Edna O'Brien, John McGahern, and James Joyce. Assignments include four short essays, several in-class presentations, and a final exam.

**IRST 20528. Folklore in Irish Literature**

(3-0-3)

A close reading of traditional Irish myths, tales, songs, customs, rituals, and beliefs.

**IRST 20530. Contemporary Irish and Native American Literature**  
(3-0-3)

From the outset of colonization in both Ireland and North America literature was employed in similar fashion to romanticize, demonize and, more often than not, silence Irish and Native American cultures. Today, with the surge in post-colonial literatures, Irish and Native American literatures have found new voices that look to the past in order to explore the present. Instead of romanticizing cultural memories, these authors subvert and challenge heroic representations while dispelling stereotypes. Together these separate literary traditions intersect and diverge, challenging accepted perspectives of history and culture while blending stories with oral tradition, popular history, and pop culture. With these intersections in mind, we will explore an array of literature from both Irish and Native American traditions, from novels to poetry to film. We will look at a variety of authors including Flann O'Brien, Nuala Ni Dhomhnaill, Eilís Ni Dhuibhne, Leslie Marmon Silko, Sherman Alexie, and Simon Ortiz. Requirements include a midterm exam, one short paper (3–5 pages), one longer paper (8–10 pages), and a presentation.

**IRST 20538. Irish Prison Literature**

(3-0-3)

Along with the church, the university and the army, the prison is one of the central institutions in Ireland, and literature has traditionally been the way prisoners protest, resist, and critique their harrowing experiences. In this course, we will examine work written by men and women during and after their incarceration, including major literary figures (Brendan Behan and Oscar Wilde), key figures in Irish history (Jeremiah O'Donovan Rossa and Tom Clarke), and revolutionary women (Maude Gonne and Kathleen Clarke). Course requirements include response papers, presentations, and a research paper.

**IRST 21601. Irish and American Tap Dance**

(1-0-1)

This course will teach a range of fundamental steps.

**IRST 22401. The Irish Military Tradition: Tutorial**

(0-1-0)

*Corequisite:* IREST 20401

Corequisite tutorial for The Irish Military Tradition.

**IRST 30105. The Irish in Their Own Words**

(3-0-3)

This course is designed as an introduction to the literature of Medieval Ireland. The manner in which such texts shed light on the nature of medieval Irish society will be examined.

**IRST 30106. Irish Poetry in Translation: 1880–2000**

(3-0-3)

This course will examine poetry written in Irish from the early days of the Gaelic Revival up to the very recent past. No previous knowledge of Irish is required.

**IRST 30107. The Hidden Ireland: Themes and Issues in Eighteenth-Century Irish Poetry**

(3-0-3) O'Buachalla

The Hidden Ireland denotes both a book and a concept. The book was written by Daniel Corkery in 1924 and was an immediate success as it encapsulated a version of Irish history that had not hitherto been available to the general public; it is still considered to be a classic of its kind. The concept promoted the notion that history should emanate from "below" and should not be confined to the elites and governing classes. Both book and concept have had a profound impact on our understanding of Irish identity, Irish history and Irish literature. This course will examine the book in depth and utilize it to open a window on the hidden Ireland of the 18th century. The cultural, historical, and literary issues raised by the book will be studied in the context of the poetry of the period. Poetry will be read in translation.

**IRST 30111. Archaeology of Ireland**

(3-0-3) Kuijt

This course is an introduction to the methods, goals, and theoretical concepts of archaeology, with a primary focus on that practiced in the Middle East, North America, Central America, Europe, and Africa.

**IRST 30120. The Celtic Otherworld in Early Irish Sources:**

(3-0-3) Fogarty

In early Irish tradition, the everyday world (of men, women, kings, warriors, and cattle) and the Otherworld stand in unstable and uneasy relation to one another. The Otherworld has several aspects: it can be positive and beneficial—indeed it is viewed as the legitimating source of rule in this world—but also baleful and destructive. In this course, we will study a range of Otherworld encounters, seeking to understand the vast range of contacts between the human world and the other world (or worlds) of early Irish tradition.

**IRST 30125. The Irish Short Story**

(3-0-3) O Conchubhair

This course studies the Irish short story as a literary genre that reflects the changing political and cultural forces at play in Ireland. We begin the course by surveying various critical theories that can be applied to the genre before reading and discussing a wide selection of short stories. The course considers Irish writing in the broader sense—literature written in either Irish or English. Among the authors included are Patrick Pearse, Pádraic Ó Conaire, Séamus Mac Grianna, James Joyce, Liam O'Flaherty, Elizabeth Bowen, Frank O'Connor, Sean O'Faolain, Éilís Ní Dhuibhne, Angeal Bourke, Seán Mac Mathúna, Micheál Ó Conghaile, Eithne Strong, Pádraic Breathnach, Alan Titley, Mary Lavin, William Trevor, Gerry Adams, and Bernard MacLaverty.

**IRST 30202. Crime and Progress in the Nineteenth-Century British Novel**

(3-0-3)

Violence and social change, sexuality, economics, and politics in novels written in Ireland and Britain during the last half of the 19th century.

**IRST 30203. Victorian Empire Writing 1868–1901**

(3-0-3)

An exploration of the empire as theme in selected Irish writers of the late 19th century.

**IRST 30204. Northern Irish Writing and Politics**

(3-0-3)

A study of Irish writers in the North since the Troubles began in the 1960s.

**IRST 30205. Modern British and Irish Drama**

(3-0-3)

Dramatic representations of the Irish "character" and the Irish nation from the end of the 19th century through the 20th. Includes Yeats, Lady Gregory, O'Casey, Shaw, and Synge.

**IRST 30206. Writing in Northern Ireland**

(3-0-3)

This course explores the politics of culture, and the cultures of politics, in the North of Ireland during the 20th century.

**IRST 30207. Anglo-Irish Literature**

(3-0-3)

An examination of Irish Identity through an introduction to the literature, both historical and contemporary, of Anglo Ireland.

**IRST 30208. Writing and Politics in Northern Ireland**

(3-0-3)

This course explores the politics of culture, and the cultures of politics, in the North of Ireland during the 20th century.

**IRST 30209. Irish Fiction, 1945–2001**

(3-0-3)

A study of major Irish writers since World War II.

**IRST 30210. Irish Writing, 1600–2000**

(3-0-3)

A survey of major writers over the last four centuries.

**IRST 30211. Irish Gothic/Union to Troubles**

(3-0-3)

An exploration of the ways in which Irish literature, both historical and contemporary, uses ghosts, vampires, demons, and rebels to grapple with threats facing Irish society.

**IRST 30213. Imprisonment in Irish Literature**

(3-0-3)

The theme of imprisonment in 19th-century Irish writing.

**IRST 30214. Twentieth-Century Irish Literature**

(3-0-3) O'Brien

The cultural and political factors that have shaped Ireland's extraordinary literary achievement, paying particular attention to Irish Decolonization and the Northern Troubles. Readings from Shaw, Yeats, Joyce, Bowen, Friel, Heaney, and Deane.

**IRST 30220. Reading the Irish Revival**

(3-0-3)

This course will examine the Irish Revival (1891–1939) as a dynamic moment in modern Irish literature in which key literary figures like W.B. Yeats, Lady Gregory, John Millington Synge, and James Joyce worked to make Ireland a center of cultural innovation once again. This significance of this period to Ireland's decolonization and to related debates over the appropriate forms and language for an Irish national literature will provide a central focus. Texts to be considered will include the drama of J.M. Synge and Lady Gregory, the poetry of W.B. Yeats, and Joyce's *Dubliners*.**IRST 30222. Culture and Politics in Northern Ireland**

(3-0-3)

This course discusses the literature of Northern Ireland and how it reveals the culture and politics of Northern Ireland.

**IRST 30301. Women in Irish Oral Tradition**

(3-0-3)

This course will explore oral verbal art in Irish and English, through transcribed texts, sound recordings, and film, paying particular attention to depiction of and performances by women, and offering gendered readings of the material studied.

**IRST 30306. Saints and Kings in Medieval Ireland**

(3-0-3) Fogarty

This course focuses on a series of encounters (in early Irish and Hiberno-Latin) between saints and kings or other royal characters. Through these stories and characters, tensions between the domains of spiritual and secular, the local and the "national," the native and the external are raised, explored, and (sometimes, though by no means always) resolved. Saints such as Patrick, Colmcille, Brigit, Ciarán, and Cainnech, together with kings such as Lóegaire Mac Néill, Diarmuid Mac Cerbaill, and Muirchertach Mac Erca will be studied.

**IRST 30321. Medieval Ireland**

(3-0-3)

Consideration of the period between 950 and 1400 is of crucial importance in understanding Irish history. This course not only covers the range of continuities and radical discontinuities that marked Ireland's development during this time, but charts the attempted conquest of the entire country by the English Crown. The lecture series also seeks to answer a number of questions. Why did the papacy give the English Crown sovereignty over Ireland? Why did a country like Ireland, on the verge of attaining political and economic centralization, not organize better resistance to English attempts to subdue it? Why did the English colony fail to prove more successful in exerting its will over indigenous Irish potentates? Culturally, the period also witnessed the growing assimilation of English invaders to the norms of Gaelic Irish politics and society. Lastly, events in Ireland had a serious influence on developments in England, Wales, and Scotland, provoking,

amongst other things, the fall of the Plantagenet dynasty and an attempted invasion by King Robert I of Scotland.

**IRST 30371. Introduction to Irish Writers**

(3-0-3)

*Corequisite:* ENGL 22514

W.B. Yeats, Elizabeth Brown, Bram Stoker, J.M. Synge, Seamus Heaney, and Medbh McGuckian.

**IRST 30404. Irish History I**

(3-0-3)

Irish political history from the beginning of the Tudor Reconquest to the enactment of the legislative union in 1801. Attention is given to colonization, religious conflict, the Ulster Plantation, political and constitutional reactions to British government policies, and the rise of Protestant patriotism.

**IRST 30405. Irish History II**

(3-0-3)

Irish political history and Anglo-Irish relations from 1801 up to and including the current conflict in contemporary Northern Ireland. Attention will be given to religious conflict, the development of romantic and revolutionary nationalism, the changing nature of Anglo-Irish relations, the Irish American dimension, and the special problems of the North.

**IRST 30406. Northern Ireland Since 1920**

(3-0-3)

This course examines society and politics in Northern Ireland, from the partition of Ireland to the current, increasingly unstable peace process.

**IRST 30407. The Fighting Irish Since 1534**

(3-0-3)

This course will focus on the cult of the "fighting Irish" in history, literature, art, iconography, film, and media. Lectures and readings will deal primarily with the period between the Reformation (1534) and the Irish Civil War (1922–23).

**IRST 30408. Ireland: From Famine to Independence**

(3-0-3)

This course explores Irish politics and society from the Great Famine (1845–49) to the establishment of the independent Irish Free State amidst civil war (1922–23). It examines the causes of the famine and its legacies of mass emigration, nationalism, and rapid linguistic, devotional, and demographic change; the political and social origins of the "Land War"; the politics of Parnell and Home Rule; "New Nationalism" and Ulster Unionism; and the WW I-era "revolution" that undermined British authority in Ireland and led to the establishment of two new states. Particular attention is given to the Irish Revolution (1913–23): its longer-term origins; how and why the British government lost legitimacy in Ireland; the nature of revolutionary violence; who joined the IRA and other nationalist organizations; and what changed and what remained the same with the achievement of independence.

**IRST 30409. Late Medieval and Early Modern Ireland**

(3-0-3)

This course is intended as a broad survey of Irish political, cultural, and social history in the medieval and early modern periods. Starting with an examination of Gaelic-Irish world prior to the 12th century Anglo-Norman invasion, we will emphasize a vibrant and viable society, and its interaction with its neighbors throughout the British Isles. The Anglo-Norman invasion and the Gaelic response will be the next major theme. Norman perceptions of the Irish as "Other" will be studied through the work of Giraldus Cambrensis. The development of a feudal society in the Norman controlled portions and its interaction with Gaelic Ireland and the subsequent development of two interacting societies, Gaelic, and the other, English, yet significantly Gaelicized, will receive special attention. The 16th-century Tudor conquest will be the next major topic, with a focus on the development of colonizing schemes. Elizabethan representations of the Irish will follow, with an emphasis on the work of the poet and settler Edmund Spenser.

Seventeenth-century developments including plantations, the rebellion of 1641 and the interaction of languages, will be tracked to 1690.

### **IRST 30411. Tudor England: Politics and Honor**

(3-0-3)

England underwent profound changes between the death of King Henry VIII and the death of Elizabeth I, including its establishment as an international economic force and an empire in the making. Social consequences included assertiveness mixed with anxiety, desires for change tinged by fears of disorder, and a new sense of freedom haunted by fears of isolation. Such anxieties found public expression through two contradictory issues: (1) England's role of principal defender of the Protestant Reformation in a Europe increasingly under the influence of an ascendant Counter-Reformation, and in a world now dominated by Hapsburg Spain; and (2) the accident of England's rule by a female monarch, Elizabeth, who dominated domestic and foreign politics, asserting her right as a true king and Supreme Governor of the English Church while refusing either to produce an heir through marriage or to name a successor. In this turmoil, great literary and artistic flowering took place. This course aims to set the work of the great figures of the "Elizabethan Renaissance"—Shakespeare, Spenser, and Sidney—in their larger cultural and intellectual context, such as political commentaries, social polemics, historical works, crime writing, religious exhortations, ballads, engravings, and maps, which made up the Elizabethans' attempts to comprehend and control their perilously changing world.

### **IRST 30412. British History: 1660–1800**

(3-0-3) Smyth

This course of lectures and readings concentrates on British (that is, Scottish as well as English) history from the restoration of monarchy in 1660 to the great crisis detonated by the French Revolution and war in the 1790s. Themes include the politics of Protestant dissent, political ideologies, the role of parliament, Jacobitism, and the rise of the radical parliamentary reform movement.

### **IRST 30415. Irish History to 1800**

(3-0-3) Smyth

This course explores the main themes in Irish histories from the plantation of Ulster, after 1603, to the rebellion of 1798 and the Act of Union with Great Britain in 1800. Attention focuses on plantation, colonization, and religious conflict; the Cromwellian reconquest and the Williamite wars in the 17th century, and the anti-Catholic penal laws and rise of Protestant ascendancy in the 19th century. This dramatic and formative period witnessed the emergence of many of the forces and rivalries that shaped modern Irish politics and society and continues to generate lively disagreement among historians today.

### **IRST 30420. The Logics and Politics of International Migration**

(3-0-3) Messina

This course investigates the primary economic, humanitarian, and political forces that are driving and sustaining the complex phenomenon of contemporary transnational migration. Within this context, three core questions are addressed. First, have the forces of globalization and the entanglements of international commitments and treaty obligations significantly diminished the policy-making autonomy of the traditional nation state? Second, what are the significant benefits and costs of transnational migration for the immigration receiving countries? Finally, is a liberal immigration regime desirable, and, if so, can it be politically sustained?

### **IRST 30432. Irish History II: Irish History Since 1800**

(3-0-3)

This course examines political history and Anglo-Irish relations from the Act of Union (1801) up to and including the Northern Ireland "Troubles" and the peace process. It focuses on religious conflict, Catholic emancipation, famine, the development of romantic and revolutionary nationalism, unionism, rebellion, the changing nature of Anglo-Irish relations, modernization, and the special problems of the North.

### **IRST 30435. Nineteenth-Century Ireland**

(3-0-3) Leaney

Drawing on monographs and general studies, this course invites students to consider how different social groups experienced the profound changes that transformed 19th-century Ireland. Although the course traces political developments, it pays equal attention to socioeconomic and cultural issues, including the shift from high fertility to sexual restraint; patterns of emigration, consumption, and social unrest; improvements in education and literacy; linguistic change; changing devotional practices and cultural "revival" in the late 1800s.

### **IRST 30438. Science and Medicine in Ireland, 1600–1900**

(3-0-3)

This course surveys the history of science and medicine in Ireland from the 17th to the 19th centuries. The course will consider the role of science and medicine in Irish social and political life and will offer a fresh dimension to the cultural and intellectual history of Ireland. Lectures will situate scientists and doctors within their historical contexts, showing how intellectual history intersects with political history. Topics will include science as an instrument of colonialism in Cromwellian Ireland, the scientific satires of Jonathan Swift, the role of the medical community during the Great Famine, women in Irish science, and the role of science in the Cultural Revival. Note that no scientific knowledge is assumed or required.

### **IRST 30501. Folklore, National Culture, Irish History**

(3-0-3)

This course will explore the idea of folklore within the history of ideas and will examine the relationships between folklore and popular culture and between folklore and modernity in Ireland.

### **IRST 30502. Irish Traditional Culture**

(3-0-3)

To examine Irish peasant culture, this course will focus on the materials accumulated by folklorists since the late 19th century.

### **IRST 30602. Irish Traditional Music**

(0-0-3)

This course examines the historical background of the instrumental and song traditions; musical style and its relationship to specific musicians and regional traditions; performance practice; and the social and cultural context of "the music."

### **IRST 30603. National Cinema: Irish Cinema/Culture**

(3-2-3)

*Corequisite:* FTT 31232

This course examines the films of Ireland and other countries to reveal their distinctive styles, stories, and visual and narrative techniques.

### **IRST 31603. National Cinema: Irish Cinema/Culture Lab**

(0-1-0)

*Corequisite:* IREST 30603

Corequisite for 30603

### **IRST 40103. Heroic Literature in Modern Adaptation**

(3-0-3)

Beginning with a study of the ethos of Irish/Celtic heroic literature in its historic and cultural context, this course examines the ideological, aesthetic, and personal uses to which that material has been put by Irish writers of the past two centuries (19th and 20th centuries) writing in English and Irish. Among the authors to be studied are Seamus Heaney, Flann O'Brien/Myles na Gopaleen, Nuala Ní Dhomhnaill, and Eugene Watters/Eoghan ÓTuairisc. Particular attention will be paid to shifting concepts of "authenticity" and the degree to which various creative artists have retained, reinterpreted, or reinvented what they perceived to be the essence of their originals. This course will interest English majors, modernists, and medievalists.

### **IRST 40215. Visits to Bedlam**

(3-0-3)

Literary, medical, and social views of madness in the 16th through the 19th century.

**IRST 40216. Irish and British Literature 1790–1815**

(3-0-3)

Burke, Paine, Godwin, Wordsworth, Edgeworth, and Scott in the context of the French Revolution and the Irish political situation at the end of the 18th century.

**IRST 40217. Anglo-Irish Identities 1600–1800**

(3-0-3)

Observers of the political and cultural problems that continue to plague relations between the modern Irish State, six counties in the north of Ireland, and Great Britain cannot fail to note that the unresolved differences that have festered over the last two hundred years had their roots in the traumas of the preceding centuries of English colonialism in Ireland. Focusing on that crucial period in Irish history, this course will explore the complex and contested cultural, political, and ideological identities of a group we have come to call the Anglo-Irish.

**IRST 40218. Studies in Six Irish Writers**

(3-0-3)

W.B. Yeats, Elizabeth Brown, Bram Stoker, J.M. Synge, Seamus Heaney, and Medbh McGuckian.

**IRST 40219. Modern Irish Drama**

(3-0-3)

In this course, we will study both the drama produced by the playwrights of the Irish literary renaissance—Yeats, Synge, Lady Gregory, and O’Casey—and the political struggle for Irish independence that was taking place at the same time.

**IRST 40220. Passing and Fictions of Race**

(3-0-3)

A close analysis of how notions of “race” are explored in Anglo and Anglo-Irish literature.

**IRST 40221. Anglo-Irish “Gothic”**

(3-0-3)

An interpretation of the uses of the uncanny and the supernatural in Anglo-Irish fiction of the 19th century. Readings will include ghost stories as well as Gothic and “Big House” fiction (some of it in English disguise).

**IRST 40222. Culture and Politics in Northern Ireland**

(3-0-3)

What the literature of Northern Ireland reveals about the culture and politics of Northern Ireland.

**IRST 40223. Versions of the Gothic**

(3-0-3)

A survey of Gothic fiction in England and Ireland from the mid-18th century to the Victorian Age.

**IRST 40224. Contemporary Irish Drama**

(3-0-3)

This course explores the drama produced by Irish playwrights during the latter half of the 20th century.

**IRST 40303. Identities in Early Modern Irish Literature**

(3-0-3) McQuillan

The topic to be covered in this course is the formation of individual and collective identity through language, literature and history in this period. In addition to the works of the great early-modern poets (16th–18th centuries) like Tadhg Dall Ó Huiginn, Dáibhí Ó Bruadair, and Aogán Ó Rathaille, we will focus on such important prose works as *Foras Feasa ar Éirinn*, the foundation history of the “new” Irish nation of the 17th century. Important secondary works here will include those of Anthony D. Smith and Adrian Hastings on premodern forms of nationalism, as well as Stephen Greenblatt on identity formation in 16th-century England and Paul Friedrich on linguistic relativism and the poetic in language.

**IRST 40304. Poetry and Politics in Early Modern Ireland 1541–1688**

(3-0-3)

The political poetry of the period 1541–1688 will be discussed and analyzed against the historical background. The primary focus will be the mentalité of the native intelligentsia as it is reflected in the poetry and as it responded to the momentous changes of the period. The origins and rise of the cult of the Stuarts will be examined and the historiography of the period will be assessed.

**IRST 40305. The Poetry of Nuala Ni Dhomhnaill**

(3-0-3)

This course will focus on the interstices of gender and cultural identity in the work of Nuala Ni Dhomhnaill. Her poetry will be situated within a theoretical framework that draws, inter alia, on recent feminist scholarship. It will address theories of the feminine as well as the specificities of Irish-language literary and oral discourses and their impact on Ni Dhomhnaill’s poetic practice. The course will also address the implications of translation. While texts will be read in English, there will be an opportunity for close textual comparisons with the original Irish-language poems.

**IRST 40306. Irish In Their Own Words**

(3-0-3) McQuillan

The purpose of this course is to introduce students to the richness and variety of literature produced in the Irish language during the medieval and early modern periods (we will cover primarily the period between approximately 800 and 1700 AD). The emphasis in the first half of the semester will be on studying the mainly prose saga literature of the medieval period in its various literary, cultural, and historical contexts. This will involve both a close reading of the texts themselves in English translation and an examination of the material in the light of recent scholarship in this area. The second half will investigate the literature of the early modern period, in this case largely the poetry. This period is one of cumulative crisis for the Irish and their linguistic and cultural well-being. Students read closely a selection of texts representative of various facets of this crisis and of Irish responses to them in their own language rather than in the English language of their colonizers. All the translations are accompanied by facing original text so that students gain some working knowledge of the Irish language, which will assist them in evaluating the translations they are reading and in appreciating the sensuous beauty of much of this poetry. The material provides interesting contrasts and comparisons for those who have already studied some Anglo-Irish literature and it should also be of interest to students of modern Irish history.

**IRST 40307. Gender, Politics, and the Poetic Tradition in Irish**

(3-0-3)

This course begins with the fundamental feminist assumption that gender matters, and that gender is one of the central terms through which people both understand and critique their world. Our particular area of inquiry will be the role of gender in the Irish poetic tradition from the 16th century onwards, something that has only recently begun to receive attention from critics like Angela Bourke, Mairin Nic Eoin, and Briona Nic Dhiarmada. The class will focus on how gendered representations of masculinity and femininity underwrite political appeals, particularly regarding Ireland’s colonial relationship to England. We’ll also look at how gender is used to represent and to resist related social changes, like shifting class relations, unstable power relations between men and women, and contested notions of sexuality. We will read a variety of poetic texts, some serious and formal, some funny and popular; genres will include formal bardic poetry, the *aisling* (or vision poem), oral lament, song poetry, and comic verse. The methodology will be historically informed close reading, meaning that we will read texts closely, rather than generalize abstractly, so that we have a sound basis for our analysis. No knowledge of Irish language is required or necessary, although original texts will be provided alongside translations. This class is discussion-based and will ask for your engaged participation at all times. Students will be responsible for presentations and will write several shorter papers and a longer term paper.

**IRST 40308. Modern Irish Poetry**

(3-0-3) Nic Dhiarmada

An introduction to Ireland and the Irish poetic tradition, this course is a magnificent chance to study with a world-renowned poet. It offers a unique opportunity to study modern Irish poetry with the greatest living Irish-language poet. Visiting Notre Dame for the 2006 fall semester only, Nuala Ni Dhomhnaill will teach a

course on modern and contemporary Irish poetry. This class will spotlight key canonical texts by Irish-language poets as students conduct close readings, examine the verses' social and political context, and deconstruct the mechanics of each individual poem. We will read Cathal O Searcaigh, Gearoid Mac Lochlainn, Biddy Jenkinson, Michael Hartnett, Maire Mhac an tSaoi, Michael Davitt, Gabriel Rosenstock, Liam O Muirliithe, Pearse Hutchinson, Sean O Riordain, Mairtin O Direain, and Aine Ni Ghlinn. This course also focuses on Nuala Ni Dhomhnaill's own work. All texts will be available in English. No prior knowledge of Irish required.

### **IRST 40309. Northern Ireland Troubles**

(3-0-3) Smyth

This discussion-based seminar explores the history of the six northeastern counties of Ireland, which became "Northern Ireland" in 1920–1. Northern Ireland remained part of the United Kingdom and had a built-in Protestant unionist majority. The Catholic minority, alienated from the state from the outset, looked across the new border and to Dublin, capital of the Irish Free State, as the true site of their allegiance. Northern Ireland was thus, from the beginning, dysfunctional, scarred by sectarian violence and systematic discrimination in housing and employment. After examining the origins of the state and the early decades of its existence, the seminar will turn to its main concern "the Troubles," which broke out in the late 1960s. The major episodes under scrutiny include the civil rights movement, Bloody Sunday, the hunger strikes, and the Good Friday Peace Agreement. Students are obliged to produce a 25- page essay based on original research, and many are expected to draw on the rich microfilm archive of "the Troubles," the Linenhall Collection, held in the Hesburgh Library.

### **IRST 40310. Ideology, Poetry, and Politics in Jacobite Ireland**

(3-0-3)

Jacobitism, or allegiance to the course of the House of Stuart (from Latin *Jacobus*, James, the deposed James II), was the common voice of political dissent in 18th-century Ireland, Scotland, and England. Irish Catholic advocacy of the Stuart cause had already become a political orthodoxy in the course of the 17th century, and when the Stuarts were deposed by William of Orange (King Billy) later succeeded by the Hanoverians (1714), the culture of dispossession and displacement and the rhetoric of return and restoration became firmly entrenched in the political ideology of Catholic Ireland. This course will examine the development of Irish Jacobitism in its various literary, historical, and ideological aspects, in addition to placing it within its wider British and European context in the 18th century.

### **IRST 40311. Visits to Bedlam**

(3-0-3) Fox

Until visitation was restricted in 1770, London's Bethlem Hospital (popularly known as "Bedlam") attracted as many as 96,000 spectators per year who paid for the privilege of watching mental patients: like the tigers in the Tower, these patients were not simply chained, but shown, put on exhibition. The cruelty of this practice and the fact that it was stopped, both point to the 18th-century fascination with madness, with the irrational, with what Freud would call the *Unheimlich*, the uncanny. Johnson's astronomer, who comes to believe that he personally controls the weather; Sterne's mad Maria, piping for her lost lover; Locke's man who believes himself made out of glass and who acts, "reasonably," to avoid hard objects; or Swift's modest proposer who concocts a cookbook to save the Irish nation—all bear witness to this other side of the 18th century, which will be the subject of this course. We will begin with selections from Cervantes's *Don Quixote* and some short readings in Locke and others who attempted to analyze madness. We will then move on to explorations of Johnson, Smollett, Sterne, and Swift. Our major focus will be the last writer, with special attention to his poetry, *Gulliver's Travels*, and *A Tale of A Tub*. (Swift, who was a governor of Bethlem Hospital, left most of his money to fund the first mental hospital in Ireland, St. Patrick's, which is still there). For the sake of comparison, we will conclude with several 19th-century selections.

### **IRST 40315. Re-imagining Ireland: sociological perspectives on a changing society**

(3-0-3)

In recent years we have witnessed the passing of many of the old orthodoxies in Irish society. The Roman Catholic Church has lurched from one scandal or crisis to another, all the time losing its legitimacy among the body politic. Politics has been exposed as a less than honorable affair, as tribunal after tribunal lay bare the unsavory financial ties between politicians, developers, and leading Irish businessmen. Irish sport, language, music, and culture have gone global in the process, transforming themselves into commodities that ultimately stretch their capacities to remain true to their local qualities. A sustained, if uncertain, economic prosperity engulfs the land. A new cult of individualism promotes the idea of more choice—whether that relates to supermarkets, schools, hospitals, or health care packages. In this course, we employ critical sociological analysis to explore present day Ireland in relation to class and social mobility, the rise of consumer culture, gender and gender relations, transformations of place and space, and cultural/media innovation and its diffusion.

### **IRST 40409. Elizabethans and Their World**

(3-0-3)

This course aims to set the work of the great figures of the Elizabethan Renaissance—Shakespeare, Spenser, and Sidney—in their larger cultural and intellectual context, such as political commentaries, social polemics, historical works, crime writing, religious exhortations, ballads, engravings, and maps, which made up the Elizabethans' attempts to comprehend and control their perilously changing world.

### **IRST 40410. Early Medieval Ireland**

(3-0-3)

This course comprises a survey of the history and culture of the Irish and the other Celtic peoples from the Neolithic era to approximately AD 1500. We will explore the main documentary sources in translation—mythological and historical, ecclesiastical and secular—as well as discussing the importance of the archaeological evidence.

### **IRST 40411. Ideology, Poetry, and Politics in Ireland**

(3-0-3)

This course is a broad-based exploration of Ireland and her neighbors from the eighth century to the 16th.

### **IRST 40412. Late Medieval/Early Modern Ireland**

(3-0-3)

This course offers new perspectives on the struggle for mastery in Ireland from 1470 to 1660. The most important effect of these contending conquests was the way they shaped the diverse responses of the native Irish, ranging from accommodation and assimilation to outright rebellion and national war.

### **IRST 40413. Ethnic Conflict to Northern Ireland**

(3-0-3)

A history of the Troubles.

### **IRST 40414. The Vikings**

(3-0-3)

Discussion will be based on medieval primary sources from England, Ireland, France, and Russia. Scandinavian life at home and the possible reasons for migration will also be considered as background to the more exciting events abroad. The importance of archaeological evidence (including art), and modern treatments of Vikings in film and literature, will also be included.

### **IRST 40415. Reading *Ulysses***

(3-0-3)

A close analysis of James Joyce's *Ulysses*.

### **IRST 40500. Religious Persecution in Early Modern England and Ireland**

(3-0-3)

This course examines the dynamics of religious persecution in the early modern period in England and Ireland. We will look at the experiences and perspectives of both the victims and the perpetrators in these two rapidly evolving and interacting societies. The theories of persecution and resistance will be examined in particular

for the period of the reformation. Intolerance and persecution are not new phenomena, and what we find when we examine their manifestation in the past is that some of the same motivations are exhibited in religious sectarianism and bigotry today. This is a course that calls on us to consider the experiences of mainstream Catholics and Protestants and the authorities involved, and to make connections with our present-day world.

**IRST 40501. Contemporary Irish Drama**

(3-0-3)

A close analysis of the dramatic literature produced by Irish playwrights during the latter half of the 20th century.

**IRST 40503. Archaeology of Ireland**

(3-0-3)

This course examines the cultural and historical trajectory of the archaeology of Ireland through a series of richly illustrated lectures, organized chronologically, that trace cultural, social, and technological developments from the Neolithic through the Viking period. Integrated with this lecture series, and running concurrently on alternate days, will be a series of seminar and discussion classes focused upon a number of anthropological and archaeological issues related to each of these periods of time. This includes the emergence of the unique systems of communities, and the development of systems of metallurgy in the Iron Age. Other classes will touch upon the topics of regionalism and identity and contact at different periods of time, mortuary practices and ritual, and discussion of village life in ring forts during the Bronze Age.

**IRST 40509. Modern Irish Drama**

(3-0-3)

In this course, we will study both the drama produced by the playwrights of the Irish literary renaissance—Yeats, Synge, Lady Gregory, and O’Casey—and the political struggle for Irish independence that was taking place at the same time.

**IRST 40515. Contemporary British and Irish Fiction**

(3-0-3)

A survey of major contemporary novelists and short story writers from Britain and Ireland, including Black Irish, Scottish, and Northern and Southern Irish writers, as well as English writers who fit into none of these categories.

**IRST 40517. The Politics of Civil Wars**

(3-0-3)

This course will explore social scientific explanations for the phenomenon of modern civil wars. It will do so through detailed exploration of individual theories of civil war, with a view to testing how they explain a variety of civil wars in the 20th century. Students will be expected to acquaint themselves with these theories and also with the history of some individual cases. The course will, therefore, cover both political science and historical materials, and students will be expected to write both a theoretical paper and an analysis of one individual case. The course will be assessed through two papers and a general exam.

**IRST 40525. Gender, Genre, and the Short Story**

(3-0-3)

This course discusses how representations of gender were explored in a survey of 19th- and 20th-century short stories from England, Ireland, France, Russia, and the Southern United States.

**IRST 40540. Conflict and Consensus in Twentieth-Century Ireland**

(3-0-3)

*Prerequisite:* (POLS 10200 OR POLS 141 OR POLS 141A) OR (POLS 20200 OR POLS 241 OR POLS 241A) OR (GOVT 10200 OR GOVT 141 OR GOVT 141A) OR (GOVT 20200 OR GOVT 241 OR GOVT 241A)

This course examines the government and politics of the Republic of Ireland and Northern Ireland through the lenses of democratization, state-development, nationalism, and unionism. Among the themes covered in the course are the British and Irish national questions; religion, ethnicity, and nationalism; the partition of Ireland and its consequences; the constitutional development and democratization of an independent Ireland; devolved government and control

in Northern Ireland; the party systems in Northern Ireland and the Republic of Ireland; and the consequences of British direct rule.

**IRST 40605. Film, Literature, and Irish Culture**

(3-0-3)

*Corequisite:* IRST 41606

A study of Irish film.

**IRST 41606. Irish Film and Culture Lab**

(0-1-0)

*Corequisite:* IRST 40605

Required for IRST 40605 Irish Film and Culture.

## Department of Latin American Studies

### LAST 10500. Beginning Quechua I

(4-0-4) Maldonado Gomez

This is an introductory, first-year language sequence with equal focus on the four skills: speaking, listening, reading, and writing. An appreciation for Quechua culture is also encouraged through readings and class discussions.

### LAST 10501. Intensive Beginning Quechua

(6-0-6)

Designed for highly motivated students, this intensive language course meets five days a week, covers material of LLRO 10101 and 10102, and counts as two courses. Along with the acquisition of language skills, LLRO 10115 emphasizes the active use of spoken Quechua in context.

### LAST 20000. Black Music, World Market

(3-0-3)

Slavery and the coerced migration of Africans to the New World left a multitude of popular musical styles from black peoples (and others) on both sides of the Atlantic. This course is an examination of the diversity of popular black musics on a global scale.

### LAST 20002. Societies and Cultures of Latin America

(3-0-3)

This course introduces students to the diverse cultures and societies of Latin America through historical, ethnographic, and literary study. Contemporary issues of globalization, violence, and migration will preoccupy the discussion of Central and South America and the Caribbean today.

### LAST 20151. Women in the Americas

(3-0-3) Delgadillo

A survey of a wide variety of literature (fiction, poetry, testimonio, personal essay, autobiography, critical essay, and oral history) and film written by and about women in the Americas from the time of conquest/encounter to the present.

### LAST 20152. Latino Literature

(3-0-3)

A survey of Latino fiction, poetry, and other literary works.

### LAST 20153. Caribbean Women Writers

(3-0-3) Palko

A sampling of novels written by Caribbean writers, with a particular emphasis on such themes as colonization, madness, childhood, and memory.

### LAST 20400. Studies in Spanish-American Culture

(3-0-3)

An introduction to the scope and variety of Spanish-American culture. Readings at an intermediate level in history, art, culture, and society.

### LAST 20402. *La Telenovela*

(3-0-3) Barry

*Prerequisite:* (ROSP 20202 OR ROSP 201 OR ROSP 202E)

In this course you will explore the genre of the *telenovela* (a major social, cultural, political, and economic force in Latin America and, more recently, in the United States) by reading about the genre (in Spanish) and watching two condensed *telenovelas* (also in Spanish). You will demonstrate your understanding of the *telenovela* and its importance in Hispanic culture through writing and discussion and through application of these ideas as you write, produce, direct, act in, record, and edit a mini-*telenovela* as a class. During this process, you will learn and apply basic production (videography) and post-production (computer-based video and audio editing) techniques.

### LAST 20500. Conversation and Composition: Afro-Brazilian Culture

(3-0-3)

This course explores cultural perspectives on Brazil through a wide variety of sources, including literary, sociological, and historical texts, feature films, music,

and news reports. Topics for discussion include race relations in Brazil, Afro-Brazilian culture and identity, and Brazil's contemporary relations with Africa. Oral and written assignments aim at perfecting students' proficiency in speaking, reading, and writing. This course reviews major concepts of Portuguese grammar in context and provides practical exercises in diction and vocabulary building. Course conducted in Portuguese.

### LAST 27500. Topics in Afro-Luso-Brazilian Cultures

(3-0-3)

This course explores cultural perspectives on Brazil through a wide variety of sources, including literary, sociological, and historical texts, feature films, music, and news reports. Topics for discussion include race relations in Brazil, Afro-Brazilian culture and identity, and Brazil's contemporary relations with Africa. Oral and written assignments aim at perfecting students' proficiency in speaking, reading, and writing. This course reviews major concepts of Portuguese grammar in context and provides practical exercises in diction and vocabulary building. Course conducted in Portuguese.

### LAST 27501. Special Studies: Intermediate Quechua I

(3-0-3)

This course is by department approval only for the student who wants to learn and study Quechua at an intermediate level.

### LAST 30001. Caribbean Diasporas

(3-0-3)

This course explores the transnational orientations and the multidimensional consequences of movement from the Caribbean as it affects sites in Miami, London, Paris, or Brooklyn, as well as Havana, Jamaica, Haiti, or Belize. Readings include works of ethnography, fiction, and history that pose questions about how the construction and reconstruction of family bonds, community identity, religion, political power, and economic relations will be treated in the domestic and the global context.

### LAST 30002. Archaeology of the African Diaspora

(3-0-3) Hauser

This course is designed to serve as an in-depth undergraduate level introduction to archaeological perspectives on the African diaspora. In this course, we examine the formation and transformation of the black Atlantic world, beginning with the transatlantic slave trade to the middle of the 19th century through the study of archaeological and historical sources. The emphasis in this course is on English-speaking African America, where the vast majority of archaeological investigations have been undertaken. A major objective of this course is to understand the material world of communities of the African diaspora within the context of the history and historiography of the black Atlantic. This course is organized around the following themes: (1) Diaspora and the Atlantic World; (2) Material Life of the Diaspora; (3) Diverse Communities of the Diaspora; and (4) Intersections of Race, Class, Gender, and Representation.

### LAST 30003. Immigration in Comparative Perspective

(3-0-3) Albahari

How do people in immigrant-receiving countries form their attitudes toward immigrants? What are the unintended consequences of increased governmental investments in border and immigration control? What are the differences between refugees and other migrants? How is immigration related to the 2005 riots in France? In this course, we will be able to examine such questions, and more generally to understand the causes, experiences, and consequences of transnational migration. We will acquire a sound interdisciplinary understanding of migration in its historical, social, political, and cultural facets. Diverse aspects of immigration history, policy implementation, and migrants' lives will be examined with fieldwork accounts from countries of origin and from the United States, Europe, and Japan. Issues to be addressed include ethnic neighborhood formation; gender and class differences in migration and settlement; religion; identity formation; border enforcement; racism; and mass-media representation.

### LAST 30100. Economic Development of Latin America

(3-0-3)

An examination of the roots of independence in Latin America. An analysis of the key problems of economic development and the policies prescribed for their solution.

#### **LAST 30101. Global Economic History**

(3-0-3)

The course presents a comparative economic history emphasizing the sources of long-term economic growth. The comparative analysis is used to explore different development strategies around the world over the past two centuries, from the British Industrial Revolution to the contemporary developing countries, focusing on examples from Europe, Latin America, and North America. Subjects include population change, migration, technological change, industrialization, market integration, education, inequality, and government expenditure. Each topic is discussed through a current economic policy concern. Special attention will be placed upon the role played by the natural resources endowments and institutional change. The last section of the course centers on the debates on globalization and inclusive development. Does going global foster growth? Who gains, and who loses?

#### **LAST 30102. Development Economics**

(3-0-3)

The current problems of Third World countries are analyzed in a historical context, with attention given to competing theoretical explanations and policy prescriptions. The course will combine the study of the experiences of Latin American, African, and Asian countries with the use of the analytical tools of economics.

#### **LAST 30150. Women in the Americas**

(3-0-3)

A survey of a wide variety of literature (fiction, poetry, testimonio, personal essay, autobiography, critical essay, and oral history) and film written by and about women in the Americas from the time of conquest/encounter to the present.

#### **LAST 30200. Modern Mexico**

(3-0-3)

This course examines the complex nation that is Mexico in the 20th century, its challenges, and its prospects. Focusing primarily on the period since 1870, we will study the social, economic, political, and cultural forces that have shaped the history of the United States's southern neighbor.

#### **LAST 30201. Indigenous and Colonial Mexico**

(3-0-3)

This course investigates the history of Mesoamerica from the Olmec, Mayan, and Aztec societies to Mexico's independence from Spain after 1800. It will examine the nature of several indigenous societies; their conquest and domination by Europeans; post-conquest debates concerning Indians' nature and colonial Indian policy; the structure of colonial society, including relations between Indians, Africans, and Europeans; Catholic conversions and the role of the Church; and, finally, the causes of independence. We will use readings, lectures, discussions, archeological evidence, film, and literature throughout the course. Students need not have any background in Latin American history.

#### **LAST 30202. The Emergence of Nations in Latin America**

(3-0-3)

This course provides an introduction to the major themes of 19th-century Latin American history. It provides an overview of the colonial background to the independence struggle that engulfed the region in the early part of the century; describes the motivations and, in many cases reluctance, of the colonies to disengage from the Spanish empire; and the legacies and opportunities for the construction of a new social, political, and economic order in the region. The course examines the influence of regionalism in the emergence of the new nations and pays particular attention to the impact of liberalism on social, political, and economic structures in the region.

#### **LAST 30203. History, Politics, and Society of Chile**

(3-0-3)

An introduction to the formation and development of Chilean national society. The course begins by examining the colonial period and the struggle for independence. It then focuses on 19th- and 20th-century issues such as the consolidation of the central state, the development of democracy, the creation of the party and electoral systems, economic cycles of growth and stagnation, the breakdown of democracy in 1973, the Pinochet dictatorship, and the return to democracy in the 1990s. Class lectures and discussions will include relevant comparisons with other Latin American and even European countries.

#### **LAST 30204. Survey of Latin American History**

(3-0-3)

This course provides an introduction to the major themes of Latin American colonial history, including the discovery, conquest, and settlement of the New World, the institutional framework established by the Iberian countries to advance their economic, political, and religious interests in the region, and various aspects of Latin American society and culture until independence in the early 19th century.

#### **LAST 30205. Modern Latin America**

(3-0-3) Beatty

A survey of modern Latin American History.

#### **LAST 30206. Inequalities in Latin American History**

(3-0-3)

Any quick survey of contemporary Latin America quickly uncovers a glaring range of social inequalities. Sharp divides and diverging conditions separate individuals and groups along economic, political, ethnic, educational, and gender lines, to name a few. Although nearly all the earth's societies exhibit social inequalities, Latin America's have proved particularly endemic, enduring, and intractable; they have fundamentally shaped the region's potential for democratic governance and economic development; they are also deeply rooted in the region's past. This course will begin by examining manifestations of social inequalities in the region today. We will then spend most of the semester tracing the roots of today's conditions through the region's history. Students need not have any background in Latin American history.

#### **LAST 30207. Religion and Social Movements in Latin American History**

(3-0-3)

The purpose of this course is to give students an understanding of the role religion has played in Latin American history from the colonial period to the present. We will focus specifically on how religion mediates relations between culturally distinct peoples during points of encounter and the role it plays in social movements. Religion in Latin America served paradoxically as a means of and justification for conquest but also at times as a foundation for subordinate people's resistance to domination. We will examine this dynamic as it evolved in successive efforts by outsiders to impose control over people of indigenous and African descent. The course will focus on Spanish proselytization and its results during the colonial period, millenarian movements by people of indigenous and African descent during the 19th century, and American Catholic and Protestant mission endeavors and their outcomes in the 20th century.

#### **LAST 30208. Race and Nation in Latin American History**

(3-0-3) Valiant

This course offers a critical analysis of the particular representations of race and nation as presented in film, art, and essays from the colonial to the current era in Latin America. Utilizing these materials, we will examine issues of independence, statehood, slavery, revolution, wealth, poverty, education, and gender in public culture.

#### **LAST 30209. Colonial Latin America**

(3-0-3)

*Corequisite:* HIST 32901

This course provides an introduction to the major themes of Latin American colonial history, including the discovery, conquest, and settlement of the New World; the institutional framework established by the Iberian countries to advance their

economic, political, and religious interests in the region; and various aspects of Latin American society and culture until independence in the early 19th century.

#### **LAST 30210. Chronicles of the Conquest of LA**

(3-0-3)

This seminar examines key aspects of the conquest of Latin America through readings of chronicles and other texts written by Spaniards and Amerindians in the 15th through 17th centuries. We will focus upon the ways in which Spaniards and Amerindians theorized and explained their experiences, and their representations of themselves and their "others." In particular, we will pay attention to the beginnings of modern notions of race and ethnicity through discussions of barbarians, wildmen, and cannibals, among other "types" important to the colonial encounter.

#### **LAST 30301. Latin American Politics and Economic Development**

(3-0-3)

During the past few decades, Latin America has undergone deep political and economic change. The patterns of political polarization and the implementation of import substitution industrialization models that characterized the region were altered by the emergence of bureaucratic authoritarian regimes. From the 1980s on, Latin American nations sought to reinstall democracy and promote economic development, yet the paths they followed to those ends have been quite diverse, as have their achievements. This course examines those divergent paths during the past four decades. After introducing students to some contextual information on the region, the course will examine the different roads to democratic breakdown, the emergence of authoritarian regimes, and the contrasting paths to redemocratization and development.

#### **LAST 30302. International Relations of Latin America**

(3-0-3)

This course is based on the commonly accepted assumption from theories of political realism that the United States successfully has exercised hegemony over the Western Hemisphere since the beginning of the 20th century. The first topic to be considered is what tactics were used to consolidate that hegemony and how the "face of hegemony" evolved during the 1900s up until the present day. This will involve an examination of the history of hemispheric relations with an emphasis on the political, economic, and cultural aspects of Washington's strategy. The examination assumes that great powers attempt to control the behavior of less powerful countries in their sphere of influence, and one should not be surprised to find such a situation. The second half of the semester deals with some discrete situations or issues within the hemisphere: economic integration efforts such as NAFTA, CAFTA, and MERCOSUR; the role of petroleum (particularly as regards Venezuela); the drug issue; developments relating to the US-Mexico border; the longstanding Castro regime in Cuba; and the foreign policies of individual Latin American countries (particularly Brazil and Mexico). There will be two written examinations, plus a final one and one paper and/or class presentation.

#### **LAST 30304. Politics and Violence in Latin America**

(3-0-3)

This course examines the political, historical, and economic context of violence in Latin American countries, and the significance of violence in Latin American politics today.

#### **LAST 30305. Current Events of Latin America**

(3-0-3)

This course analyzes the main challenges that Latin America has tackled for the past few years. After introducing students to some basic concepts and contextual information on the region, the course explores the various social, economic, and political events that Latin American countries have confronted, as well as the different ways in which they have responded to these challenges. The course also incorporates an analysis of some of the "unsolved" issues of the region, such as environmental protection and sustainable development, gender quality, and ethnic minority rights.

#### **LAST 30306. Political Economy of Latin America**

(3-0-3)

This course analyzes the political bases of the developmental and distributive strategies pursued by several Latin American countries in the post-World War II period, and the relationship between economic crises in the region and political change. Topics covered include the rise and fall of import-substituting industrialization, the economic stabilization and recovery policies undertaken by politically repressive regimes, and the challenges and opportunities presented to democratic governments in the 1980s and 1990s to implement a neo-liberal economic order.

#### **LAST 30307. US-Latin American International Relations**

(3-0-3)

This course examines the international relations of Latin America with an emphasis on what determines US policy toward Latin America, and the policies of Latin American states toward the United States, other regions of the world, and each other. It analyzes recurring themes in US-Latin American relations, including the response of the United States to dictatorships, expropriations of US-owned property, and revolution. It also studies new directions and issues in Latin America's international relations; e.g., trade policy, the environment, migration, and drugs in a post-Cold War world.

#### **LAST 30308. Latin American Politics**

(3-0-3) Mainwaring

This course is an introduction to Latin American politics. Thematically, we will focus on two of the great issues facing this region of the world at the end of the 20th century: democratization and strategies for promoting economic development. After spending the first part of the course examining these two issues in a broad way, we will then analyze these same issues, but focused on Brazil, Chile, and Mexico.

#### **LAST 30309. Latin American Development and Politics**

(3-0-3)

Latin American countries face many challenges, some inherited from Spanish and Portuguese colonial rule; some created by today's globalization; and some common to all developing countries. This course examines how several Latin American countries have responded to the most important of these challenges: how to build a state that can maintain order at home and stay at peace with its neighbors; how to form legitimate governments that can pass needed laws; how to ensure that citizens have political rights and a say in the political process; how to promote industrialization and economic growth; and how to achieve a more equal distribution of wealth and ensure that basic human needs are met.

#### **LAST 30310. Contemporary Latin American Political Thought**

(3-0-3)

This course offers a global perspective on contemporary Latin American politics. It examines the consequences of democratization in different Latin American countries, the connections between democracy and social and economic development, trends in government institutions, political parties and elections, and the still-present tensions between democratic and nondemocratic practices and ideologies in the region.

#### **LAST 30311. Law and Democracy in Latin America**

(3-0-3)

This course explores many of the challenges to the rule of law across Latin America, and their connection to democracy. We will begin by examining the relationship between law and democracy, then look at a series of issues that illustrate the strength or weakness of the rule of law in the region. Rather than focusing on one country at a time or a few countries in depth, we will use events and systems in various countries as illustrations of important themes. We will then look at the possible consequences of these challenges for democracy in the region, and possible solutions. The course materials will, at times, cover difficult and controversial topics such as violence, human rights violations, and corruption. By the end of the course, you will have acquired some basic information about Latin American legal systems, and some basic concepts about the different ways courts work in that part of the world. More importantly, however, you will have a greater understanding of what a robust democracy should look like, and where different countries fall short. You should be able to engage in a discussion about the role

courts and laws do play, should play, and can play in the (democratic) political systems of Latin America, and its potential for improvement.

### LAST 30312. Politics and Development in Central America

(3-0-3) Cosenza-Jimenez

This course will explore the impact that politics and politicians have had on development in Central America. It will begin with a discussion of the concept of development and how we attempt to measure it. It will then proceed to review the different approaches used to spur development and what conventional wisdom holds today to be the determinants of growth. After this, it will review the socio-economic indicators of Central America and how they have evolved with time. It will subsequently study how politics and politicians, through current constitutions, laws, institutions, political culture, and practice have affected the determinants of growth. It will close with a discussion of the changes needed to foster high, sustainable, and equitable growth in the region.

### LAST 30400. Survey of Spanish-American Literature I

(3-0-3) Anadón

A general introduction to and survey of major works of colonial and 19th-century literature up to modernism.

### LAST 30401. Survey of Spanish-American Literature II

(3-0-3) Moreno

A survey of literary trends and major figures in modern Spanish-American literature from 1880 to the present. Readings of selected texts in prose, poetry, and theatre.

### LAST 30402. Nations in Motion: Latino/Latina Literature in the United States

(3-0-3)

This course focuses on the analysis of literary works by Mexican-American, Cuban-American, Puerto Rican, and Dominican-American authors. Some reading knowledge of Spanish recommended.

### LAST 30550. Chile in Comparative Perspective

(3-0-3) Valenzuela

Students will learn about the Chilean political process since the 1930s, with a special emphasis on the period from 1964 to 2002. Students will analyze and discuss institutional, economic, social, and cultural changes that occurred during that period. Chilean politics, economics, and sociology will be addressed from a historical perspective.

### LAST 30600. From Power to Communion: Toward a New Way of Being Church Based on the Latin American Experience

(3-0-3)

This seminar explores the present and the future of the Catholic Church, placing emphasis on how its future is foreshadowed in the growing ecclesial interdependence that exists between the churches of North and Latin America. Emphasis is placed on the growing involvement of the laity in Latin America and where this may lead the North American Church. In a particular way, attention is given to the role of small Christian communities.

### LAST 30650. Mexican Photography

(3-0-3)

This course examines Mexican photography from the 19th century on to contemporary works. Theoretical issues pertaining to the histories of photography, with emphasis in documentary photography, photography as an art form, photojournalism and photo manipulation are part of this course. Key films, such as *Mala Hierba* from 1940 and *Canoa* (1970), will be discussed in the context of the relation they have with still images. Photography and film will be situated to particular photographic moments and specific socio-cultural and political developments in Mexico. Critical questions on the role of photography in the formation of national narratives and the role of photographers in the life of art and culture will be addressed. Works by Romuldo García, Agustín Casasola, Manuel Álvarez Bravo, Nacho López, Lola Álvarez Bravo, Tina Modotti, Lourdes Grobet, Graciela Iturbide, and other artists will be discussed.

### LAST 30652. Creole Language and Culture

(1.5-0-1.5) Richman

This course introduces students to the vivid, sonorous language of *Kreyòl*, or Creole, and to the fascinating culture of its speakers. This intensive, beginning-level course is intended for students with no knowledge of Creole. In small-group teaching sessions, students will be prepared for conversational fluency with basic reading and writing skills, emphasizing communicative competence as well as grammatical and phonetic techniques. Our study of *Kreyòl* is closely linked to our anthropological exploration of how the language is tied to Caribbean society and culture. The course takes a holistic, anthropological approach to the history, political economy, and religion of Haiti. In addition to class work, audiotapes, music, and film enhance the study of the Haitian language and culture.

### LAST 30653. Migration, Documented

(1-0-1)

Students will examine issues of educational equity and achievement in the United States from 1950 to the present. The course begins by framing these issues in terms of social and cultural processes, using an anthropological perspective. Students then will examine issues of educational equity in relation to long-established patterns of social stratification by race, ethnicity, and class. The course will conclude with a discussion of equity in light of the nation's rapidly changing demographics.

### LAST 30725. Caribbean Historiography

(3-0-3) Hauser

This class will introduce students to major events in Caribbean history and the various ways in which these histories have been represented. This course will present a picture of the Caribbean very different from that held by many North Americans. For 500 years, this region has been the site of encounters and clashes among Native Americans, Europeans, Africans, and Asians. For three centuries, Europe's leading states fought each other to control these islands, which were the most valuable real estate in the Atlantic world. At the same time Dutch, English, French, and Spanish colonists imported millions of enslaved men, women, and children from Africa to work on the sugar and coffee plantations that made the region so profitable for its masters. Supported by racism and colonialism, plantation slavery left its mark on the Caribbean long after emancipation and independence. We will be emphasizing recent, representative texts, monographs, and essays, but placing them in the context of early research.

### LAST 33100. Political Economy of Development

(3-0-3) Kim

The course is divided into two parts. The first part provides an overview of the institutional and empirical features of the developing world, followed by a survey and critical evaluation of the conventional development theories. The second part looks into the selected topics evoking the critical, controversial stakes in Third World development debates today. The topics include rent-seeking activities, land tenure and peasantry, micro-financing, corporate governance, failed state and market failure, market and democracy, income-distribution and poverty, feminism in development, ethnic conflicts in resource use, and population pressures. The approach taken in this course is a political-economy perspective with references to the historical, cross-cultural, and empirical materials. The course aims at providing the students with intellectual spaces for alternative development paradigms and strategies. Where appropriate, the tools used in economic analysis will be reviewed at an elementary and accessible level.

### LAST 36500. Testimonials from Urban Brazil

(3-0-3)

This course, taught in Portuguese, explores contrasting images of social change in recent Brazilian literature and cinema. The focus is on attempts to give voice to the poor, the marginal, the rogue, and other agents of social change in urban Brazil. Course materials are drawn from fictional auto/biographies and diaries, street memoirs, documentary novels, crime stories, prisoners' accounts, films, and documentaries. Texts by Caio Fernando Abreu, Rubem Fonseca, Sebastião Uchoa Leite, Paulo Lins, João Gilberto Noll, Esmeralda do Carmo Ortiz, Moacyr Scliar, and others. Films by Cláudio Assis, Ana Carolina, Fernando Meirelles and Kátia Lund, Murilo Salles, and Walter Salles and Daniela Thomas. (*Prerequisite:* a 20000-level course in Portuguese or equivalent).

**LAST 40000. Race, Ethnicity, and Power**

(3-0-3)

Presents a review and discussion of social scientific research concerning the nature of race and ethnicity and their expression as social and cultural forces in the organization of multiethnic societies. The focus is multidisciplinary.

**LAST 40001. Aesthetics of Latino Culture**

(3-0-3)

This course analyzes the philosophy and principles underlying the social and political aspects of Latino art.

**LAST 40002. Latino Image in American Films**

(3-0-3)

This course traces the historical depiction of Chicanos, Mexicanos, Puerto Ricans, Cubans, and other Latinos in Hollywood-made movies. Cinematic plots, roles, and motifs from the earliest of silent films through the onset of the 1980s are examined to explore the changing physical, social, and cultural definitions of Latinos in the United States. All films and filmmakers are considered within their historical context. Though the main object of study is the Latino image, the course also surveys corresponding images for other ethnic minority groups.

**LAST 40003. Human Rights in Latin America**

(3-0-3) *Prerequisite:* (ANTH 10109 OR ANTH 109) OR (ANTH 30104 OR ANTH 326 OR ANTH 326A) OR (ANTH 30103 OR ANTH 328 OR ANTH 328A)

This course takes the concept of international human rights as the framework to explore contemporary cultural, economic, and political debates about identity, culture, and society in Latin America. We will review the civil and political rights, the social and economic rights, and the indigenous people's rights of the International Declaration of Human Rights through ethnographic case studies. For example, we will explore (1) freedom of speech in Chile, and review the report of the findings of the Truth Commission; (2) indigenous people's rights in Colombia, and learn about the Afro-Colombian movements for ancestral lands; and (3) social and economic rights in Guatemala and current efforts to implement socio-economic recommendations of the Commission for Historical Clarification. In each area, we will specifically address the role of anthropology, the American Anthropological Association's human rights declaration, and the unique contribution anthropologists can make to international efforts to understanding human rights.

**LAST 40004. Multiculturalism**

(3-0-3)

The course explores the economic, state, and national conditions of multiculturalism as a social relation and semiotic form. Seminal questions include the issues of difference deployed in debates over multiculturalism and anthropology's location in them as a study of human diversity.

**LAST 40006. Cultural Memory**

(3-0-3)

Looking at examples from around the world through readings, films, slides, recordings, and other media, we will consider a variety of strategies humans use to instill a sense of socially and culturally shared memory, including ritual; performative traditions such as dance and theater; written and oral histories; art and literature; media and popular culture; museums and monuments; science and technology (particularly archaeology, craft productions, and ecology); and certain aspects of everyday life, such as food, clothing, jokes, and the transference of knowledge.

**LAST 40007. Cultural Difference and Social Change**

(3-0-3) Tsitsopoulou

This course is designed especially for students returning from summer service projects or study abroad programs in the developing world. Students can only enroll with the permission of the instructor. In the class, students will conduct research to better understand the sites that they visited during their overseas projects, orienting them in relation to broader global, regional, and national patterns. Course readings will cover such topics as world systems theory, globalization, development, NGOs, various understandings of human rights, applied anthropology, activism, and the relation between cultural relativism and

service. Students will develop three collaborative websites during the semester (although each student will receive individual grades for his work). These collective projects will present the students' own research interests based on their overseas experiences, and will focus on the sites where they worked, problems that they observed in cross-cultural perspective, and an analysis of strategies for redressing these sorts of problems. The overall goal of the course will be for students to gain an understanding of how social science analysis might help to understand and confront problems in cross-cultural contexts.

**LAST 40008. Archaeology of Catholic Missions**

(3-0-3) Hauser

The Catholic Church has sponsored missions for centuries. As colonial forces seeking land, labor, and resources spread European influence across the globe, Catholic missions became a global phenomenon that continues to this very day. This course is designed to look at Catholic missions in the "New World" (North and South America) during the colonial period using historical and material evidence. The course will take a comparative approach by studying missions in different geographic and cultural areas, and in different colonial contexts. Historical sources are used to contextualize how Catholicism and missionary activities were a part of broader colonial endeavors. Material evidence is used to tell us about day-to-day activities and local living conditions, as well as how missions affected the lives of local native populations. In this course, we will attempt to use historical and material sources in tandem to learn more about these institutions than either type of source could provide alone.

**LAST 40150. Icons and Active Figures in Latino/a Literature**

(3-0-3)

Understanding US Latino/a literature, art, and film through its many allusions to and representations of traditional icons and historic figures, as well as legends, myths, popular figures, and action heroes/heroines of the Americas (including those with origins in Native American, Latino/a, African, Asian, and European cultures).

**LAST 40151. Latino/a Poetry**

(3-0-3)

A study of prominent contemporary Latino/a poets whose work has enriched and diversified the canon of American poetry in the last 20 years.

**LAST 40152. American Visions**

(3-0-3)

A survey of literatures written by English- and Spanish-speaking peoples from the late-16th century to the mid-19th century.

**LAST 40200. Technology and Development in History**

(3-0-3)

Technologies are often seen as either the product of human genius and achievement or as an alienating, inhuman, and sometimes destructive force. Both perspectives argue that technological change has been one of the most important forces shaping world history over recent centuries. This course examines technological developments and theories of technological change in world history. It focuses on the relationship between new technologies, social change, and economic development since 1750, surveying cases from Britain, the United States, China, Japan, and Latin America. We will pay special attention to technology transfers: the movement of new machines and processes and knowledge from one society to another; and the ways that social, cultural, and political forces have shaped technological change in different parts of the world.

**LAST 40201. Global Development in Historical Perspective**

(3-0-3)

The difference between rich and poor nations is not, as Ernest Hemingway once said, that the rich have more money than the poor, but is, in part, because the rich produce more goods and services. Industrialization, in other words, has often brought wealth (as well as social dislocation and protest) to those who have succeeded. This course examines the process of industrialization from a comparative perspective and integrates the history of industrialization and its social consequences for Western Europe (Britain and Germany), the United States, Latin

America (Mexico), and East Asia (Japan and South Korea). We will concentrate on these countries' transition from agriculture-based societies to industrial societies. We will analyze the process of industrialization on two levels: from above, the role of political authority; and from below, a view of factory life, industrial relations, and protest from the perspective of workers and the working classes. No specific prerequisites in history or economics are necessary.

**LAST 40202. Seminar: Coffee/Sugar/Other Goods**  
(3-0-3)

Between their origin in the earth and their ultimate destination in our bodies, coffee, sugar, and other addictive commodities (such as tobacco, cacao, tea, opium, cocaine, and perhaps oil) have had profound effects on world history. In all cases, their production, processing, distribution, and consumption have been intertwined with the historical development of individuals, peoples, nations, and international relations. Growing consumption has profoundly altered the social, economic, and environmental history of producing countries, with especially profound impact on those individuals whose labor brings them from the earth. And in all cases, most of the world's supply of such commodities comes from relatively poor regions, while consumption is centered in the relatively wealthy, industrialized nations. The course introduces students to the broad outlines of the history of comparative commodities through class readings and discussions. Students will then conduct research on an approved topic related to a specific commodity or theme that examines one aspect of the role of a commodity in world history. Course requirements include the submission of a bibliography, a thesis statement, a first draft, and a 25-page research paper.

**LAST 40300. In the President's Shoes: Leading Struggling Democracies in a Globalized World**

(3-0-3)  
Public support for democracy is shrinking rapidly in developing countries. Massive protests around the world blame the globalized economic system and its main political actors for increasing poverty and inequality. In South America, four elected presidents have been forcefully replaced since 1998, and two others are facing great difficulties to remain in power, let alone exercise authority or leadership. How have so many governments disappointed their citizenry? What can be done, if anything, to curb this dangerous trend? This course, taught predominantly from a Third World perspective by a former president of Ecuador, is offered to students planning to participate actively in civil or political life or trying to understand how the public sector works and relates with society as a whole. The course introduces students to the basic tool kit of skills (decision making, negotiation, communication, leadership) that allow one to deal with public policies (economic, social, environmental) and institution building immersed in a broader ethical, value-ridden, purpose-oriented debate. In essence, the course is a "flight simulator experience." Through case analysis, role-playing exercises, and confrontations with real-life dilemmas, the students are invited to fly in the plane's cockpit, to play the president's role in recognizing, analyzing, and prioritizing problems, and brainstorming strategies and action plans.

**LAST 40400. Studies in Latin American Colonial Literature**  
(3-0-3)

An in-depth study of a particular theme, author, or genre in colonial Latin American literature.

**LAST 40401. Mexican Literature**  
(3-0-3)

Combines an overview of the historical development of prose, poetry, and theatre in Mexico, with a close look at special problems and issues in Mexican literature.

**LAST 40402. Film/Latin American Imagery**  
(3-0-3)

A survey of the development of the short-story genre in Spanish America. Close readings of works by representative authors.

**LAST 40403. Spanish-American Poets of the Twentieth Century**  
(3-0-3) Verani

This course will focus on the principal trends of Spanish America lyrical production through close readings of poetry from the avant-garde to the present.

**LAST 40404. Argentine Narrative**  
(3-0-3)

This course may cover an in-depth study of a particular author, theme, genre, or century. In addition to treating primary texts, some critical material will be required reading. The course culminates in a substantial research paper. May be taken either fall or spring term.

**LAST 40405. Spanish American Short Story**  
(3-0-3)

This course considers the issue of Latin American identity through a variety of media, including film, literature, and popular culture. Focus may be on a particular region or genre.

**LAST 40406. Seminar: *Selvas, llanos y otro***  
(3-0-3)

This course may cover an in-depth study of a particular author, theme, genre, or century. In addition to treating primary texts, some critical material will be required reading. The course culminates in a substantial research paper. May be taken either fall or spring term.

**LAST 40408. Film and the Latin American Imagery**  
(3-0-3)

*Corequisite:* LAST 41408

This course considers the issue of Latin American identity through films from various national traditions, including Cuba, Chile, Mexico, and Brazil. Class discussions consider how shared cultural elements are represented in Latin American film and how these representations challenge assumptions about identity politics.

**LAST 40409. Topics in Colonial Latin American Literature**  
(3-0-3)

An in-depth study of a particular theme, author, or genre in colonial Latin American literature.

**LAST 40411. Does This Nation Have a Woman's Face?**  
(3-0-3)

A study of the national imaginary depicted in 19th-century Spanish-American fictional prose and essays. Special attention will be given to gender issues and historical events.

**LAST 40412. Topics in Spanish-American Poetry**  
(3-0-3)

A survey of the development of the short-story genre in Spanish America. Close readings of works by representative authors.

**LAST 40413. Spanish-American Literature: Borges y Cortazar**  
(3-0-3)

This course will examine the short narrative (short story and novellas) of 20th-century authors Jorge Luis Borges and Julio Cortazar. The emphasis will be on close readings of the texts, along with recent developments in critical theory.

**LAST 40415. Studies in Latin American Colonial Literature**  
(3-0-3)

An in-depth study of a particular theme, author, or genre in colonial Latin American literature.

**LAST 40419. Beyond the Islands: Latino/a Caribbean Literature and Culture**  
(3-0-3)

From Loisaida to Washington Heights to Calle 8, Latinos/as from the Spanish-speaking Caribbean have become a strong cultural presence across the United States. Like other minorities in the US, the centuries-old history of Caribbean Latino settlement in this country has been recorded in the literature and cultural production of this group. In this course, we will examine literary works and other artistic expressions (film, music, etc.) by Puerto Rican, Cuban-American, and

Dominican-American authors and artists. We will also examine precursor texts from Puerto Rico, Cuba, and the Dominican Republic, which offer representations of the immigrant experience from an island-centered perspective. Readings from various disciplines such as history, sociology, and anthropology will help students understand the reasons behind the massive movements of peoples from the Hispanic Caribbean to the US, as well as their current conditions in their new homeland. Issues of migration, transnationalism, transculturation, gender, and racial and class discrimination will be central to our discussions. Some of the authors studied include Jose Luis Gonzalez, Pedro Juan Soto, Pedro Pietri, Piri Thomas, Lino Novas Calvo, Gustavo Perez Firmat, Cristina Garcia, Junot Diaz, and Julia Alvarez. Texts discussed will be in Spanish and/or English. There will be several short essays, a final paper, a midterm, and a final exam. Knowledge of Spanish is required. Class discussions and written work will be in Spanish.

#### **LAST 40420. Women's Narrative in the Southern Cone**

(3-0-3) Olivera-Williams

This course designed as a seminar for upper-level Spanish students aims to critically analyze some of the most important narrative texts by 20th-century Argentine, Chilean, and Uruguayan women authors. Some of the writers to be studied include Somers, Geel, Guido, Peri-Rossi, Mercado, Eltit, and Valenzuela. Our readings of the selected works will be informed by the social and political circumstances of their time, which will enable us to understand the emergence of feminine subjectivities and their fictional representations. Concepts of gender, sex, and sexuality will be central to our discussions. Thus, theoretical and critical texts on feminism will also be included.

#### **LAST 40421. Self, Family, Nation: Isular and Hispanic Caribbean Women Writers**

(3-0-3) Moreno

This course focuses on the literature of Hispanic Caribbean women authors in the islands and in the US. By contrasting the works of recent and more established authors from Puerto Rico, Cuba, the Dominican Republic, and their counterparts in the US, we'll explore the construction of gender and sexuality from a Caribbean feminist perspective. Some of the texts that this course will examine include *In the Time of the Butterflies* by Julia Alvarez, *Papi* by Rita Indiana, *When I was Puerto Rican* by Esmeralda Santiago, *Maldito amor* by Rosario Ferré, and *Dreaming in Cuban* by Cristina Garcia.

#### **LAST 40422. Modernization in Latin America: Urban Changes, Technology and Desires at the Turn of the Last Century**

(3-0-3) Olivera-Williams

This course designed as a seminar for upper-level Spanish students aims to critically analyze some of the major transformations of Latin America at the time of its entrance in the world market (1875–1910). Focusing on the dramatic transformations of space—urban changes—and of time—the popular knowledge and use of modern technology—we will study how literature responds to these major changes at the same time that it proposes ways to articulate the new Latin American sensitivity. Writers such as Cuban José Martí, Nicaraguan Rubén Darío, Argentine Leopoldo Lugones, Uruguayans José Enrique Rodó, Julio Herrera y Reissig and Delmira Agustini, and others, will enable us to reflect on the thoughts of Latin American intellectuals regarding the advantages and disadvantages of modernization, as well as their ideas on the different development of the two Americas at a pivotal time in their history. Concepts of nationalism, subjectivities, and gender will be part of our discussions. Thus, theoretical and critical texts on these subjects will also be included.

#### **LAST 40500. Luso-Brazilian Literature and Society**

(3-0-3)

This course will focus on questions of national identity in the Luso-Brazilian world. We will examine how social and cultural issues are perceived, conceptualized, represented, and understood in and by literature. The course will pay particular attention to how literature depicts important human problems such as gender and race relations, the crafting of national identity and national heroes, class conflict, family structure, and some ideological values such as success, love, happiness, fairness, misfortune, destiny, honesty, equality, and faith. Authors to be studied will include Manuel Antonio de Almeida, Machado de Assis, Jorge

Amado and Guimares Rosa, on the Brazilian side, and Miguel Torga, Jo de Melo, Jose Saramago, and Lydia Jorge, on the Portuguese side. Conducted in English with readings in Portuguese or English (discussion group available in Portuguese). Requirements will include active class participation, two oral presentations, and two papers.

#### **LAST 40501. Short Fiction of the Portuguese-Speaking World**

(3-0-3)

This is a comparative study of short prose fiction in the Portuguese-speaking world, with special emphasis on theoretical issues related to this literary genre. Authors studied include Machado de Assis, Joso Guimares Rosa, Clarice Lispector, Mario de Sa-Carneiro, and Luandino Vieira. Texts and discussions in English.

#### **LAST 40502. Immigrant Voices/Contemporary Brazilian Literature**

(3-0-3)

This course examines literary perspectives on the European and non-European immigrant experience in Brazil. Readings from literature, literary and cultural theory, cultural studies, history, and anthropology. Authors studied include Moacyr Scliar, Samuel Rawet, Nelda Pion, and Milton Hatoum. Texts and discussions in English.

#### **LAST 40503. Dictatorships in Lusophone Fiction and Film**

(3-0-3)

This course explores the role of the dictator as painted in popular fiction and film production.

#### **LAST 40504. Colonialism Revisited**

(3-0-3)

With readings from Angola, Mozambique, Brazil, and Portugal, this course examines colonialism and its aftermath in Africa in light of postcolonial fiction and contemporary sociological and anthropological writing from the Lusophone world. This course brings the Lusophone experience, with its important varieties, yet overlooked implications, into broader debates in the field of postcolonial studies. Course conducted in English with readings in Portuguese and/or English.

#### **LAST 40505. Brazilian Cinema and Popular Music**

(3-0-3) Ferreira Gould

This course offers social, cultural, and historical perspective on Brazil through film and popular music.

#### **LAST 40506. Carnival in Cinema and Literature**

(3-0-3)

Brazil, the largest South American country, has tantalized our imagination with the images of Samba and Carnival. As Brazilian anthropologist Roberto DaMatta asserts, Carnival creates a festival out of the everyday social world in which there is no emphasis on the harsh rules that govern membership and identity. This course will offer an exploration of Brazilian culture by investigating the ways in which the celebrations of Carnival have been viewed, articulated and unsettled by film and literature. Along with major films, documentaries and literary works, we will examine contemporary sociological and anthropological writing that contributes to our understanding of Carnivals within and beyond Brazil. We will learn how key issues in Brazilian society (race and gender relations, national identity, rituals and symbols, values and social roles) play out in Carnival. Course offered in English.

#### **LAST 40550. Religion and Power in Latin America**

(3-0-3)

The cultural dimension of religion and the institutional building abilities present in religious communities are building new power sources for religions in the present Latin American context. Taking the experience of Peru, we will look at Latin American recent processes in the religious domain. The course will describe the changing conditions of the Catholic Church in Latin America and the new situation of religious pluralism produced by the growing presence of evangelical groups and Pentecostalism. We will look at the impact of religion in the empowerment of people from below and its relation to new social movements, as well as to the institutionalization of power at the state level in the new context of globalization.

**LAST 40551. International Migration and Human Rights**

(3-0-3) Bustamante

This course is an extension from the mini-course to a full term offered by Prof. Bustamante, with a wider coverage of international migration experiences in the world with an emphasis on human rights. It starts with a historical approach to various immigration waves to the United States, from the years of the Industrial Revolution to the present. It focuses on the current debate on the impact of the undocumented immigration from Mexico and Central America, with a discussion of the gap between public perceptions and research findings. Differences between Mexico and the United States's migration policies, and its social and economic implications, are discussed. The recent developments within the context of the United Nations's Commission of Human Rights on the relationship between migration and human rights are also covered.

**LAST 40552. Social Transformations and Democratic Chile**

(3-0-3)

This course provides a comprehensive view of the social, cultural, and political transformations that have taken place in Chile since 1990. These transformations have been effected by the consolidation of democracy and the rapid pace of economic growth and modernization in the country. The course draws comparisons to the same processes that have occurred in recent years in Central and Eastern Europe.

**LAST 40553. Ideology and Politics in Latin America**

(3-0-3)

Ideological discourse shapes political action in Latin America. Thinkers such as Mart, Maritegui, Haya de la Torre, Lombardo Toledano, Mella, Recabarren, Prebish, Medina Echavarrá, Germani, Cardoso, and others, and their discourses—nationalism, revolutionary nationalism, Latin American Marxism, developmentalism, modernization theory, dependency theory, democratization—acted within specific historical contexts and contributed actively to the conformation of political action. It is our purpose to present the main ideological positions and their impact upon political action in the continent. Their constituent elements conform a unity that we will discuss on the basis of lectures, reading of the texts, and debates presented by teams of students. The course is divided into 21 sessions (including the three reading exams and four debates). For each session, we indicate required readings. The final paper is to be presented on the last session of the course, together with the third reading exam.

**LAST 40554. Building Democratic Institutions in First-Wave Democracies**

(3-0-3) Valenzuela

Elements of democratic regimes emerged long before the regimes, as such, can be identified as being minimally in place. Beginning with a brief discussion of the essential features of democracies, the course examines how and why such institutions emerged, and the critical moments in which the actual transitions to the new democratic regimes occurred. The course focuses on democratizations that took place before the Second World War, and will examine key European and Latin American cases.

**LAST 40650. Mexican Immigration: A South Bend Case Study**

(4-0-4) Richman

This course uses experiential learning in the Mexican community of South Bend in order to understand how Mexican migrants conduct their lives across the vast distances separating South Bend and their homeland. The course begins with readings in social science and fiction about transnationalism, Mexican-US migration, and the history and sociology of the local community. Next, we learn ethical fieldwork methods in preparation for community research. Students working in two-person teams will gather data on local and transnational households and kin networks, political involvement, employment, consumption practices, cultural activities, and religious life, working through contacts with social service agencies, the Mexican consulate, and Mexican- or Latino-run media, businesses, food stores, and sports leagues. We will document the innovative adaptations of this migrant community, especially the growth of an ethnic enclave of small businesses that both unite Mexicans as an ethnic group and sustain their ties to their homeland. We intend to

compile the research in a volume published by Latino Studies to be given to those who shared their lives with us and to entities that are committed to helping them.

**LAST 40997. Colonialism Revisited**

(3-0-3)

With readings from Angola, Mozambique, Brazil, and Portugal, this course examines colonialism and its aftermath in Africa in light of postcolonial fiction and contemporary sociological and anthropological writing from the Lusophone world. This course brings the Lusophone experience, with its important varieties, yet overlooked implications, into broader debates in the field of postcolonial studies. Course conducted in English with readings in Portuguese and /or English.

**LAST 41408. Film and the Latin American Imagery**

(3-0-3)

*Corequisite:* LAST 40408

This course considers the issue of Latin American identity through films from various national traditions, including Cuba, Chile, Mexico, and Brazil. Class discussions consider how shared cultural elements are represented in Latin American film and how these representations challenge assumptions about identity politics.

## Department of East Asian Languages & Cultures

### Chinese

#### EALC 10111. First-Year Chinese I

(5-0-5) Yin

A course designed for students who have not studied Chinese before. Equal emphasis is placed on the basic language skills in speaking, listening, reading, and writing. Students will learn both the Chinese Romanization system of the pinyin and written characters, and to perform conversational skills in daily-life situations.

#### EALC 10112. First-Year Chinese II

(5-0-5) Chang, Yin

*Prerequisite:* (EALC 10111 OR EALC 111)

Continuation of First-Year Chinese I. Equal emphasis is placed on the basic language skills in speaking, listening, reading, and writing. Students will learn both the Chinese Romanization system of the pinyin and written characters, and to perform conversational skills in daily-life situations. By the end of the course they are expected to have mastered a spoken vocabulary of about 1,000 words and 500 written characters.

#### EALC 20211. Second-Year Chinese I

(5-0-5)

*Prerequisite:* (EALC 10103 OR EALC 103) OR (EALC 10112 OR EALC 112)

Grammar review and training in the four basic skills to higher levels of sophistication: oral-aural skills for fluency in communication, reading for critical understanding, and the ability to write simple compositions.

#### EALC 20212. Second-Year Chinese II

(5-0-5)

*Prerequisite:* (EALC 20211 OR EALC 211)

Continuation of Second-Year Chinese I. Grammar review and training in the four basic skills to higher levels of sophistication: oral-aural skills for fluency in communication, reading for critical understanding, and the ability to write simple compositions.

#### EALC 30311. Third-Year Chinese I

(3-0-3)

*Prerequisite:* (EALC 20212 OR EALC 212)

The course focuses on the development of advanced conversational, reading, and writing skills, using a wide range of authentic materials, including material from news media.

#### EALC 30312. Third-Year Chinese II

(3-0-3)

*Prerequisite:* (EALC 30311 OR EALC 311)

Continuation of Third-Year Chinese I. The course focuses on the development of advanced conversational, reading, and writing skills, using a wide range of authentic materials, including material from news media.

#### EALC 40411. Fourth-Year Chinese I

(3-0-3)

*Prerequisite:* (EALC 30312 OR EALC 312)

The course focuses on the practice in advanced conversational, reading, and writing skills, using newspapers, short fiction, videotapes, and other types of authentic materials.

#### EALC 40412. Fourth-Year Chinese II

(3-0-3)

*Prerequisite:* (EALC 40411 OR EALC 411)

Continuation of Fourth-Year Chinese I. The course focuses on the practice in advanced conversational, reading, and writing skills, using newspapers, short fiction, videotapes, and other types of authentic materials.

#### EALC 40421. Advanced Chinese

(3-0-3)

*Prerequisite:* (EALC 40412 OR EALC 412)

This course is appropriate for majors and individuals with language experience overseas. The yearlong sequence helps students become functional speakers, readers, and writers of modern Chinese through articles and essays from newspapers, magazines, and scholarly journals, as well as engagement with popular media and online communications. *Prerequisite:* successful completion of four years of Chinese language training, as determined by placement examination. The learning goals of the course are to introduce modern Chinese culture while developing competence in reading, speaking, and writing standard modern Chinese.

#### EALC 40422. Advanced Chinese II

(3-0-3)

*Prerequisite:* EALC 40421 OR EALC 421

This course is appropriate for majors and individuals with language experience overseas. The yearlong sequence helps students become functional speakers, readers, and writers of modern Chinese through articles and essays from newspapers, magazines, and scholarly journals, as well as engagement with popular media and online communications. *Prerequisite:* successful completion of four years of Chinese language training, as determined by placement examination. The learning goals of the course are to introduce modern Chinese culture while developing competence in reading, speaking, and writing standard modern Chinese.

### Japanese

#### EALC 47498. Special Studies

(V-0-V)

Requires “contractual agreement” with the professor prior to scheduling. For advanced students who wish to pursue an independent research project reading Chinese-language materials.

#### EALJ 10111. First-Year Japanese I

(5-0-5)

This course is designed for students who have not studied the Japanese language before. The goal of this class is to gain an acquisition of the four basic language skills in Japanese—reading, writing, speaking, and listening. Students will learn to read and write Hiragana, Katakana, and Kanji. This course uses *Nakama I*.

#### EALJ 10112. First-Year Japanese II

(5-0-5)

*Prerequisite:* (EALJ 10111 OR EALJ 111)

Introduction to the fundamentals of Japanese. Equal emphasis on the four skills: speaking, listening, reading, and writing. This course uses *Nakama I*.

#### EALJ 20211. Second-Year Japanese I

(5-0-5)

*Prerequisite:* (EALJ 10103 OR EALJ 103) OR (EALJ 10112 OR EALJ 112)

This course is designed for students who have completed First-Year Japanese or its equivalent. Students will build on their acquisition of the four basic language skills—reading, writing, speaking, and listening. This course uses *Nakama I*.

#### EALJ 20212. Second-Year Japanese II

(5-0-5)

*Prerequisite:* (EALJ 20211 OR EALJ 211)

This course has continued training in the fundamentals of the modern language. Equal emphasis on the four skills: speaking, listening, reading, and writing. This course uses *Nakama II*.

#### EALJ 30311. Third-Year Japanese I

(3-0-3)

*Prerequisite:* (EALJ 20212 OR EALJ 212)

A course designed for students who have completed EALJ 20212 or its equivalent. Students will build on their acquisition of the four basic language skills—reading, writing, speaking, and listening.

#### EALJ 30312. Third-Year Japanese II

(3-0-3)

*Prerequisite:* (EALJ 30311 OR EALJ 311)

Development of oral-aural skills with an emphasis on typical conversational situations. Improvement of reading and writing skills.

### EALJ 40421. Advanced Japanese I

(3-0-3)

*Prerequisite:* (EALJ 40412 OR EALJ 412) OR (EALJ 30312 OR EALJ 302)

Advanced Japanese is a three-credit course for students who have completed EALJ 40412 or EALJ 30312. This course takes students beyond the grammar-centered approach of textbooks to the study and discussion of original materials produced in Japanese for everyday Japanese consumption. Course materials include excerpts from short stories, poetry, letters, social criticism, academic writing, newspaper articles, and video clips. Students may repeat the course more than once, as the content of the course changes according to the needs and interests of the students enrolled.

### EALJ 40422. Advanced Japanese II

(3-0-3)

*Prerequisite:* (EALJ 40421 OR EALJ 421)

This course takes students beyond the grammar-centered approach of textbooks to the study and discussion of original materials produced in Japanese for everyday Japanese consumption. Course materials include excerpts from short stories, poetry, letters, social criticism, academic writing, newspaper articles, and video clips. Students may repeat the course more than once, as the content of the course changes according to the needs and interests of the students enrolled.

### EALJ 47498. Special Studies

(V-0-V)

This course takes students beyond textbook Japanese by introducing original materials created for Japanese audiences (literature, current events, video materials, etc.). Emphasis is on grammar and syntax, vocabulary building, speaking, reading, and writing.

### LLEA 13186. Literature University Seminar

(1-0-3)

An introduction to the study of East Asian literature. The course will focus on either Chinese or Japanese literature.

### LLEA 20101. Introduction to Chinese Culture and Civilization

(3-0-3) Yang

This is a survey course that introduces the students with little or no knowledge of the Chinese language or culture to the major aspects of Chinese cultural tradition from the dawn of its civilization to the present time. Readings (in English translation) include traditional Chinese historical, philosophical, political, religious, and literary texts as well as modern scholarship. Students are encouraged to bring in their experience, living or reading, of Western culture in order to approach the Chinese texts from a comparative perspective. This course will use a combination of lectures, discussion, and presentation by students. Movie documentaries will also be used from time to time. Reading assignments should be done before the lectures and in the sequence as they are given in the course schedule for each class so that the students may be ready for discussion in class. Whereas their amount and level of difficulty vary, the texts always demand careful and thoughtful reading.

### LLEA 23101. Chinese Literary Traditions

(3-0-3) Yang

A survey course introducing students to the major themes and genres of Chinese literature through selected readings of representative texts.

### LLEA 23301. Masterpieces of Japanese Literature

(3-0-3) Brownstein

This course is a survey of Japanese poetry, fiction, and drama from the earliest times through the 20th century. All texts are in English, and no special knowledge of Japan or Japanese is required. The course is divided into four units. We will begin with the development of court poetry (*waka*) as found in the *Manyoshu* (*Collection of Ten Thousand Leaves*) and the first imperial anthologies, followed by episodes from the *Tales of Ise*, and selected chapters from Murasaki Shikibu's masterpiece of courtly love, *The Tale of Genji* (ca. 1000 AD). In addition to social

and historical factors influencing the development of a courtly aesthetic, we will also consider the influential role played by Buddhism and Chinese literature. In the second unit we will look at how Japanese literature developed under the patronage of the samurai aristocracy during Japan's "medieval" period (12th–16th centuries) with readings of Noh plays, linked verse (*renga*) and philosophical essays such as *An Account of My Hut and Essays in Idleness*. For the third unit, we move to the early modern period with the haiku poetry of Basho, short stories by Saikaku ("Five Women Who Loved Love"), and *The Love Suicides at Amijima*, a play by Chikamatsu Monzaemon. For the last unit, we will read a selection of modern stories and plays.

### LLEA 30101. Chinese Ways of Thought

(3-0-3) Jensen

This lecture and discussion course on the religion, philosophy, and intellectual history of China that introduces the student to the world view and life experience of Chinese as they have been drawn from local traditions, as well as worship and sacrifice to heroes, and the cult of the dead. Through a close reading of primary texts in translation, it also surveys China's grand philosophical legacy of Daoism, Buddhism, "Confucianism" and "Neo-Confucianism," and the later religious accommodation of Christianity and Islam.

### LLEA 30102. Popular Religion and the Practice of Philosophy in China

(3-0-3) Jensen

This lecture/discussion course will introduce the student to the plural religious traditions of the Chinese as manifested in ancestor worship, sacrifice, exorcism, and spirit possession. From an understanding of these practices, the course will offer insight into the mantic foundations of Chinese philosophy, especially metaphysics, to reveal how these foundations undergird the ordinary. Readings will consist of texts in translations of the texts popular cults, including Falun gong, as well as scholarly interpretations of these phenomena. No prior knowledge of Chinese history, language, or literature is required.

### LLEA 30103. A Chinese Mosaic: Philosophy, Politics, and Religion

(3-0-3) Jensen

A Chinese Mosaic is a special topics class that provides an introduction to the diverse life ways constituting the puzzle of the Chinese people. The course will chart this terrain of current Chinese practice as it has been shaped from the contending, and often contentious, influences of religion, philosophy, and politics, introducing students to the heralded works of the Chinese intellectual tradition while requiring critical engagement with the philosophic and religious traditions animating this culture today. Thus, as they learn about China, students also will reflect on how Chinese and Westerners have interpreted it.

### LLEA 30104. Sex, Freedom, and Economy in Contemporary China

(3-0-3) Jensen

Today China is undergoing a revolution (a word used so frequently as to be meaningless, but very meaningful in this case, as we will learn) in society, politics, economy, and thought, perhaps as significant as that which brought the Chinese Communist Party to national power in 1949. The objective of this course, constructed through film and new media investigation, along with readings on social status, identity, sexuality, work, home, youth culture, gender, business, education, sports, and ecology, is to come to an understanding of the multiple domestic forces that have made China a global power. Furthermore, the course will familiarize the student with the very complex ramifications of the passionate national quest for international recognition as it affects every aspect of present-day life while exploring the mercurial manner in which the economic transformation of China has been represented in the media. In this last respect, it represents an experiment in cultural studies in that its avowed subject, contemporary China, is studied in dialogue with the United States—the two nations most exemplifying the promise and terror of modernization. No knowledge of Chinese or previous knowledge of China is required.

### LLEA 30110. Ancient Japan

(3-0-3) Thomas

This course provides training in understanding and engaging history as a series of wide-ranging debates. The class will examine three issues: first, the politically charged question of Japan's origins in myth and archeology; second, the question of whether the forces of Chinese culture or nature as disease and environmental degradation defined the Yamato state from the sixth to the ninth century; and, third, whether Heian court power until about 1200 rested on economic, political, military, judicial, or aesthetic grounds. The second purpose of the course, the development of the disciplined imagination necessary to enter another culture and another time, relies on the reading of primary texts in translation. There will be three tests and several classroom assignments.

### LLEA 30115. Japan's Imperial House

(3-0-3) Thomas

Japan boasts the longest, unbroken imperial line extant today, but what does this continuity really mean? This course looks at Japan's emperors and empresses from antiquity to the present, raising questions about the nature of power, the idea of good government, gender, divinity, war responsibility, and the liberty of the family now called on to symbolize a purportedly democratic nation. Although most of the course will focus on modern emperors, it begins with Japan's earliest political structures in order to ask such questions as: Was the imperial house an indigenous idea, or was it an imitation of Chinese ideas of power? Why were there so many powerful women leaders in ancient Japan, and why did Japan stop having empresses on the throne? What is the relationship between the imperial house and the various religions of Japan? The course will then consider the medieval and Tokugawa periods, asking why powerful samurai failed to overthrow the militarily impotent emperors. Finally, the course will turn to the modern period, beginning in the middle of the 19th century with the elevation of the Meiji Emperor to unprecedented prominence. Why was the ancient imperial house used to modernize Japan? Even though sex of emperors has been male for centuries, why were ancient emperors female, and why is the imperial gender (and Japan as a whole) in the modern period often regarded as female? Was Hirohito guilty of fomenting war? What is the function of the imperial house today? This course sweeps through myth and 1,500 years of Japanese history, tracing the permutations, continuities, and discontinuities of the imperial line.

### LLEA 30280. International Relations in East Asia

(3-0-3) Moody

This course explores the interactions of the states and societies in the East Asian region, focusing mainly on the relationships of China and Japan, their interactions with each other and with the outside "Asian" powers, the United States and Russia (Soviet Union). Topics include the China-centered system in east Asia prior to the intrusion of the new world system carried by Western imperialism; the Western impact, including colonialism, the Chinese revolution, and Japan's "defensive modernization"; the clash between Japanese and Chinese nationalism; the diplomacy of the Second World War and postwar developments; the Cold War; decolonization and the emergence of new states and nationalism; the Sino-Soviet rift; the failure of the American policy of deterrence in Vietnam; the diplomatic reconciliation of the United States and China; the liberal reforms in China and their partial disappointment; the end of the Cold War; China's growth as a potential world power; Japan's perhaps increasing restiveness in serving as an American surrogate; Asian assertiveness against perceived American hegemonic aspirations; potential tensions and rivalries within the region itself; and the collapse of the Asian economic boom and the onset of a period of chronic economic troubles. Specific readings have yet to be decided. Course requirements include assigned readings and class participation; a midterm and final examination; and completion of two brief research papers dealing with the foreign policy of one of the "smaller" Asian countries (that is, one of the countries other than China and Japan).

### LLEA 30602. Modern Japan

(3-0-3) Thomas

This introduction to modern Japanese history focuses on political, social, economic, and military affairs in Japan from around 1600 to the early post-World War II period. It considers such paradoxes as samurai bureaucrats, entrepreneurial peasants, upper-class revolutionaries, and Asian fascists. The course has two purposes: (1) to provide a chronological and structural framework for understanding the debates over modern Japanese history, and (2) to develop the skill of reading

texts analytically to discover the argument being made. The assumption operating both in the selection of readings and in the lectures is that Japanese history, as with all histories, is the site of controversy. Our efforts at this introductory level will be dedicated to understanding the contours of some of the most important of these controversies and judging, as far as possible, the evidence brought to bear in them.

### LLEA 30604. Chinese Society and Culture

(3-0-3)

This course introduces students to the complexities of contemporary Chinese society in the context of the past. Topics covered include food, family and gender, political activity, ethnicity and identity, urban and rural life, work and unemployment, economic complexity, multilingualism, arts, religion, medicine and the body, and literature.

### LLEA 30606. Chinese Politics

(3-0-3)

Study of the contemporary Chinese political system and process in the light of Chinese history and culture. Some of the topics treated include the traditional political order; the revolutionary movements; the rise of communism; Maoism and the rejection of Maoism; the political structure; leadership, personalities, and power struggles; economic policy; social policy and movements; problems of corruption and instability; and prospects for democratic development. There will be some attention to Taiwan and to Hong Kong as special Chinese societies.

### LLEA 30607. Political Movements in Asia

(3-0-3)

This course analyzes a wide range of political movements including nationalist and revolutionary movements, guerrilla insurgencies, terrorist organizations, democracy movements, and peace movements. The Asian region encompasses China (including Taiwan, Tibet, Xinjiang, Hong Kong), Mongolia, North and South Korea, Japan, the Philippines, Vietnam, Thailand, Cambodia, Burma, Malaysia, Indonesia, India, Pakistan, Nepal, Afghanistan, and so on. To understand various movements, we will study global trends, human rights values, cultural differences, religious doctrines, historical legacies, state-society relations, leadership skills, mobilization strategies, and violent vs. nonviolent trajectories. In addition to analytical readings, we will also watch a series of documentaries and read a number of prominent (auto-)biographies.

### LLEA 30608. The Worlds of Buddhism

(3-0-3) Gimello

A thematic introduction to the pan-Asian (i.e., South, Southeast, and Central Asian as well as East Asian) Buddhist tradition exploring the fundamentals of Buddhist doctrine and practice while also sampling major themes in the religion's social, cultural, and material history. Among the particular topics to be covered are the life of the Buddha (history and hagiography), the "Four Noble Truths" (the essentials of the Buddhist "creed"), the Buddhist canon (the nature and scope of Buddhist scripture), Buddhist cosmology (Buddhist conceptions of the formation and structure of the universe, i.e., of time and space), Buddhist monasticism, meditation and the Buddhist contemplative life, Buddhist ethics, the ritual lives of Buddhists, Buddhism and politics, Buddhist "family values," Buddhism and the arts, etc.

### LLEA 31316. Introduction to Japanese Popular Culture Lab

(0-0-0)

*Corequisite:* LLEA 33316

This course will examine postwar Japanese popular culture using the theories and methods of cultural studies, media studies, and gender studies. We will explore some of the primary sites of postwar popular culture across media, as well as emphasizing the theoretical distinctions between those media. Rather than chronological order, the course will be grouped into sections by media, including novels, film, television, *manga*, and *anime*. As we discuss issues specific to each of these media and across genres, however, our discussion will be framed by some key questions: What was the role of popular culture in defining a national identity to the postwar? What was the role of foreign influences, most importantly, American pop culture? How have popular culture texts spoken to and defined specific

audiences (for instance, teenagers, women, non-Japanese)? Knowledge of Japanese is not required.

### LLEA 33101. Heroism and Eroticism in Chinese Fiction

(3-0-3) Ge

In this course we will read works in Chinese fiction from the late imperial periods. We will discuss the aesthetic features of such works and their cultural underpinnings, especially the infusion of Confucian, Taoist, and Buddhist meanings. Particularly, we will focus on heroism and eroticism as two major themes in Chinese fiction and their specific expressions in each work. We will consider the transition from heroism to eroticism as a shift of narrative paradigm, which coincided with a general trend of "domestication" in traditional Chinese fiction. Through the readings and discussions, the students are expected to become familiar with pre-modern Chinese narrative tradition and acquainted with some aspects of Chinese culture. All the readings are in English translation, and no prior knowledge of China or the Chinese language is required.

### LLEA 33103. Twentieth-Century Chinese Literature

(3-0-3) Ge

In this course we will read English translations of works in 20th-century Chinese literature, especially short stories and plays written from the May 4th Movement in 1919 to the beginning of the reform in the early eighties. We will discuss the literary expressions of China's weal and woe in modern times and of the Chinese people's frustrations and aspirations when their country was experiencing unprecedented social changes. No prior knowledge of the Chinese language or Chinese culture is required for taking the course.

### LLEA 33107. City in Chinese Film/Fiction

(3-0-3)

Since the first decade of the 20th century, China has undergone tremendous changes, which are most evident in the life of city dwellers. In this class, we will read short stories and analyze films about urbanites and their desires, anguish, and aspirations. We will examine, for instance, why Shanghai was portrayed as the nadir of vice in the 1930s. Or how the underprivileged youths struggle in present-day Beijing. We will read about how the men and women of Taipei and Hong Kong grapple with their changing social, political, economic, and spiritual realities. To complete our understanding of the city in the mind of the Chinese, we will also explore writings by overseas Chinese on foreign cities such as New York and Paris. We will try to answer questions such as how different cities are portrayed, and what these diverse perceptions represent. How have these perceptions changed over time? Is the city always exciting, threatening, or benign, and how do people in these various places cope with modern life in the city? Is there no more distinction among cities, now that we are all living in a global village?

### LLEA 33108. Anti-Social Behavior in Modern Chinese Fiction

(3-0-3) Lin

Chinese society is often characterized as highly conformative and lacking in individuality. Is this true? What kind of behaviors, then, would be considered anti-social, and what are their moral, social, and political consequences? In this course, we will read fictional works depicting behaviors and attitudes that are considered by society in general as antisocial, unconventional, and sometimes anti-Party. We will investigate the contexts of these behaviors and their political implications. For instance, are these behaviors justified? Are different standards applied to women? What are the temporal and spatial factors in people's conception of an antisocial behavior? To what extent are these behaviors culturally determined? No prior knowledge of the Chinese languages or China is required.

### LLEA 33112. Readings in Chinese Drama

(3-0-3) Ge

This course studies a number of works in Chinese dramatic traditions from the premodern times up to the 20th century. While attention will be paid to Chinese theater as performing art, the plays selected for this course will be studied primarily as literary texts. The purpose of the course is to familiarize students with some of the most outstanding formulations in Chinese drama and their underpinning cultural meanings. All readings are in English translations, and no prior knowledge of Chinese culture or language is required.

### LLEA 33155. Multi-Cultural China

(3-0-3) Lin

This course showcases the multifaceted aspects of China not only in the ethnic sense but also in the political sense. We will read literary works by writers of different ethnic backgrounds (e.g., Han, Tibetan, and the Atayal tribe from Taiwan) and geographical origins (the PRC, Taiwan, and Hong Kong). The objective of this course is to help students to gain a deeper understanding of the notion of "Greater China" and the concept of "Chinese-ness." Through analyzing works by different ethnic writers, we will learn to appreciate the diversity of Chinese culture that is often overshadowed by a misconception about Chinese homogeneity. Likewise, fictional creation by writers from the three regions will give us a broader knowledge of Chinese culture that is constantly threatened by a political need for unity. This course is taught in English, and no prior knowledge of the Chinese languages is required.

### LLEA 33301. Love, Death, and Revenge in Traditional Japanese Drama

(3-0-3) Brownstein

Love, death, and revenge were major themes in Noh, Kabuki, and Bunraku, the three main forms of traditional Japanese drama. During the first weeks of this course, we will read plays from the Noh theatre, which evolved out of a variety of performing arts and reached maturity in the 15th century under the patronage of the samurai aristocracy. In an effort to create an atmosphere of mystery and beauty, the plays transformed episodes from folk tales, courtly romances, and military epics into highly stylized dance-dramas imbued with the austere aesthetic of Zen Buddhism. In the play *Atsumori*, for example, we witness a confrontation between the ghost of Taira Atsumori, a young warrior, and Kumagai no Jiro Naozane, the man who killed him in battle. In another play, *Dojoji*, a young woman turns into a giant serpent to kill the man who deceived her. For the remainder of the course, we will study Kabuki (a theater of live actors) and Bunraku (puppet theater). These two rival forms of popular entertainment developed in the early modern period (17th and 18th centuries) as part of a new and lively urban culture. This was the "floating world" (*ukiyo*) of teahouses, brothels, and theaters, where townsmen mingled with samurai in the pursuit of pleasure and spectacle, and where Kabuki actors became the first "superstar" celebrities. We will focus on plays by Chikamatsu Monzaemon (1653-1725), the "Japanese Shakespeare", who wrote for both Kabuki and Bunraku. Plays such as *The Love Suicides at Sonezaki*, *Gonza the Lancer*, and *The Woman-Killer and the Hell of Oil*, bring to life tragic tales of star-crossed lovers, unfaithful wives, and murdering ne'er-do-wells. In the last weeks of the course, we will read *Chushingura*, the revenge of the 47 samurai, based on a true event that occurred in 1703 when the former retainers of Lord Asano burst into the mansion of a high-ranking but corrupt government official and killed him to avenge the death of their master almost two years earlier.

### LLEA 33314. Cruel Stories of Youth: Children and Teens in Japanese Film

(3-0-3) Shamon

From the wide-eyed children of *anime* to the crazy street fashions of Harajuku, images of kids and teens in Japanese popular culture are now distributed and consumed around the world. How, then, are those young audiences depicted and addressed within Japanese popular culture? What aspects of childhood or teen identity are repeated across generations? In order to answer these questions, we will look at Japanese films, including animation, from across the 20th century, that represent children and teens from a variety of perspectives, from the celebration of innocence to the threat of juvenile delinquency. In addition to analyzing representations of children and teens, students will also gain familiarity with Japanese film history and genres, and develop the critical vocabulary of film analysis. Films will include *I Was Born But...*, *Crazed Fruit*, *A Cruel Story of Youth*, *Battle Royale*, *All About Lily Chou Chou*, *Nobody Knows, Grave of the Fireflies*, and *Akira*. All films will be subtitled. There will also be secondary readings in cultural studies and film studies, relating to the films we watch in class. Assignments will include an oral presentation, several short writing assignments, a film viewing journal, and a longer paper.

### LLEA 33315. Men and Women in Modern Japanese Literature

(3-2-3) Shamon

In 20th-century Japan, as old roles such as samurai and geisha waned; both men and women had to redefine the characteristics and meaning of masculinity and femininity. This course will look at constructions of gender in modern Japanese literature by both female and male authors. As we discuss both normative and deviant depictions of male and female roles, some topics we will address include men and women at work and at war, marriage and family life, homosociality and homosexuality. Students will also gain familiarity with some of the major authors, genres, and literary movements of modern Japanese literature. Texts will include *Kokoro* by Natsume Soseki, *Confessions of a Mask* by Mishima Yukio, *Diary of a Vagabond* by Hayashi Fumiko, and short stories by Higuchi Ichiyo, Kono Taeko, and Oe Kenzaburo. This course is taught in English and no knowledge of the Japanese language is required.

### LLEA 33316. Introduction to Japanese Popular Culture

(3-0-3) Shamooin

*Corequisite:* LLEA 31316

This course will examine postwar Japanese popular culture using the theories and methods of cultural studies, media studies, and gender studies. We will explore some of the primary sites of postwar popular culture across media, as well as emphasize the theoretical distinctions between those media. Rather than following a chronological order, the course will be grouped into sections by media, including novels, film, television, *manga*, and *anime*. As we discuss issues specific to each of these media and across genres, however, our discussion will be framed by some key questions: What was the role of popular culture in defining a national identity in the postwar? What role did foreign influences, most importantly, American pop culture play? How have popular culture texts spoken to and defined specific audiences (for instance, teenagers, women, non-Japanese)? This course is taught in English, and no knowledge of the Japanese language is required.

### LLEA 40123. American Occupation of Japan

(3-0-3)

After years of fierce fighting in the Pacific, the victorious Allies occupied Japan from August 1945 until 1952. The “Basic Initial Post-Surrender Directive” charged military occupiers and their civilian auxiliaries with democratizing the former enemy empire. This course examines three aspects of this effort; namely the political, economic, and cultural restructuring of Japan. We will explore the goals, methods, and mix-ups of the (mostly) American attempt to recast Japanese society in a democratic mold and the Japanese response. The Big Question—one that we will return to again and again in our discussions—is what is democracy, and how is it created and sustained?

### LLEA 40605. Nation and Culture in Modern Japan

(3-0-3)

From Gilbert and Sullivan’s operetta *The Mikado* to the cherry blossom poems of kamikaze suicide pilots in World War II, the nation of Japan has been presented as obsessed with the arts. But is this aesthetic image simply ornamental? What are the political ramifications of a national identity intimately intertwined with ideas of traditional high culture? When was this association between nation and art made and why? This course traces the intersection between high art and national identity in Japan from the mid-19th century to the mid-20th century (with a brief postwar postscript.) During this century, Japanese government officials and intellectuals carefully crafted a national image that went through at least three stages in relation to high culture. In the early Meiji period (1868–90), the Japanese leadership had little use for Japan’s traditional arts and fervently pursued a policy of Westernization in culture as well as politics and economics. After 1890, Japanese arts were revived as a basis for Japanese nationalism, partly because of interest from Europeans and Americans who were intrigued by Japanese handicrafts, painting, sculpture, and ceremonies. During the Taisho (1912–26) and early Showa (1926–60) eras, culture was developed as a bulwark of ultranationalism. The main focus of this course will be the ideological and political uses of high culture. Readings for this course will include primary documents (in translation) as well as secondary works. No background knowledge of Japanese history is required.

### LLEA 40606. Modern China

(3-0-3)

The course will provide a general survey of Chinese history from 1644 (the establishment of the Qing Dynasty) to the present. It will highlight China’s evolution from a period of strength and unity during the last dynasty to a period of disunity and weakness during the revolutionary period 1911–49, back to a period of strength under the communist government from 1949 to the present. Special attention will be given to the problems of economic modernization, the role that foreigners have played in this process, and the relationship of both to cultural development.

### LLEA 40608. Nature/Environment: Japan/Europe

(3-0-3)

The purpose of this course is to explore Japanese concepts of nature in comparison with those of the West and then to ask how these concepts affect modern Japan’s understanding of environmental protection. In other words, this course combines intellectual history and environmental history in Japan and Europe. We discuss the relationship among nature, divinity, and human beings in the Bible and Shinto and Confucian texts. We read radical agrarianist Ando Shoeki, and see how his vision of the natural state compares with that of his French counterpart, Rousseau. We consider how nature shapes political history in Hegel and Maruyama. Finally, we try to figure out what the claim that the Japanese love nature means, both in terms of aesthetics and nationalism and in terms of environmental protection.

### LLEA 40609. Pre-Modern China

(3-0-3)

The course will provide a general survey of Chinese history from the Shang Dynasty (1550–1045 BCE) to 1600 CE. Besides highlighting the major developments of each dynasty, the course will devote special attention to the Confucian and Legalist underpinnings of the Chinese empire, the influence of Buddhism on Chinese society, the emergence of gentry culture and the civil service examination system, and the phenomenon of “barbarian” conquest and cultural interaction.

### LLEA 40610. History of Chinese Medicine

(3-0-3)

In light of the contemporary currency of certain Chinese practices in the field of alternative medicine, this course will explore the phenomenon of Chinese traditional medicine in both its historical and contemporary settings. The first unit, Medicine in Ancient China, will explore the earliest medical ideas of the Chinese and will demonstrate how the state’s political unification gave rise to a correlative cosmology that not only included Heaven and Earth, but also human beings as integral elements of an organic cosmos. The second unit will explore the influences and contributions of Taoism (Daoism) and Buddhism to Chinese medicine and will explore what it meant to be both physicians and patients in late imperial China. The third unit will focus on medicine in contemporary China and will feature the experiences of Elisabeth Hsu, a student of Chinese medical anthropology who, as a part of her doctoral research, enrolled as a student in Yunnan Traditional Chinese Medical College between September 1988 and December 1989. We will conclude the course with a brief examination of the influence of Chinese medicine on the contemporary world.

### LLEA 40615. Hong Kong Action Cinema

(3-0-3)

*Corequisite:* LLEA 41615

This course addresses the global significance of the *gong fu vague* [kung fu new wave] that hit world cinema in the early 1970s and its ripple effects up to the present. As the signature genre of the Hong Kong film industry, it does not stand in global isolation but is rather a product of careful market research in developing a distinctive genre that could have global popularity outside of its traditional regionalized domestic market (HK and Southeast Asia) and its overseas ethnic Chinese enclaves in numerous Chinatowns across the world. Some of the key issues that we will cover include: How does a small, non-national population sustain a commercially viable film industry? How can a film industry create a version of action cinema that supersedes Hollywood’s dominance in the genre? Is this purely a “Chinese” phenomenon, or one that is inherently dependent on non-Chinese participation? Do these films have ideological, aesthetic, and economic significance within a larger framework, or must they be critically dismissed outright? What does it mean that “everybody was kung fu fighting” and

continuing to do so? Taught in English. No knowledge of Mandarin or Cantonese is required. Whenever possible, we will view the films in their original language with English subtitles. A few films will be dubbed in English.

**LLEA 41615. Hong Kong Action Cinema Lab**  
(0-1-0)

*Corequisite:* LLEA 40615

Certain films will be viewed for further discussion in class.

**LLEA 47498. Special Studies**

(V-0-V)

Requires "contractual agreement" with the professor prior to scheduling. For advanced students who wish to pursue an independent research project reading Chinese language materials.

## Department of German and Russian Languages and Literatures

See also

[German](#)

[Russian](#)

**GE 10101. Beginning German I**

(4-0-4) Boes, McChesney

An introductory course of the spoken and written language. Aims at the acquisition of basic structures, vocabulary, and sound systems. For students with no previous study of the language.

**GE 10102. Beginning German II**

(4-0-4) DellaRossa, Wimmer

Continuation of an introductory course of the spoken and written language. Aims at the acquisition of basic structures, vocabulary, and sound systems.

**GE 10111. Intensive Beginning German I**

(6-0-6) Weber

In this course, students will develop skills in understanding, speaking, reading, and writing German. They will also attain a grasp of the basic structures of the language. During class, emphasis will be placed on using the language to communicate and interact in a variety of situations and contexts. In addition, there will be a comprehensive introduction to the culture of German-speaking countries, with a particular emphasis on Austria, as this course is designed to prepare students with no previous study of German to participate in the International Studies Program in Innsbruck.

**GE 10112. Intensive Beginning German II**

(6-0-6) Weber

Continuation of GE 10101 (with permission) or 10111. In this course students will develop skills in understanding, speaking, reading, and writing German. They will also attain a grasp of the basic structures of the language. During class, emphasis will be placed on using the language to communicate and interact in a variety of situations and contexts. In addition, there will be a comprehensive introduction to the culture of German-speaking countries, with a particular emphasis on Austria, as this course is designed to prepare students to participate in the International Studies Program in Innsbruck.

**GE 13186. Literature University Seminar**

(3-0-3)

An introduction to the seminar method of instruction, emphasizing the analysis of literary texts.

**GE 20201. Intermediate German I**

(3-0-3) DellaRossa, Norton

In this course, students will build on and develop their communicative abilities acquired in Beginning German I and II. The four-skills approach (speaking, listening, reading, and writing) is centered on authentic texts, recordings, videos, and other images. The course includes grammar review, concentrated vocabulary expansion, and intensive practice.

**GE 20202. Intermediate German II**

(3-0-3) Hagens

In this bridge course, students will strengthen and refine the four linguistic skills (speaking, listening, reading, and writing). Students will work toward greater fluency, accuracy, and complexity of expression. They will debate, analyze, and express opinions. Materials and class discussions will center on a cultural topic that will carry through the entire semester.

**GE 20211. Intensive Intermediate German I**

(6-0-6) Weber

Comprehensive training in all language skills leading to a balanced mastery of German. For students with two to three years of German in high school, this course serves as preparation for the Central European Studies Program in Innsbruck.

**GE 20212. Intensive Intermediate German II**

(6-0-6) Weber

This course provides comprehensive training in all language skills (speaking, reading, writing, and listening). Students will read and discuss selected cultural and literary texts with an emphasis on the period between 1945 and the present. They will review grammar in the context of situations and readings, become acquainted with Austrian culture and history, employ typical conversational strategies and gambits, sharpen listening skills, produce various types of written expression, and enlarge their active and passive vocabulary. This course is designed to prepare students with some previous study of German for the Central European Studies Program in Innsbruck.

**GE 20610. The Crises of Modernity in German Culture, 1900–33**

(3-0-3) Boes

German culture during the period from 1900 to 1933 can be read as the sustained response to a series of crises that overturned moral, religious, and social conventions. Sexual and political emancipation, the mass suffering of the First World War, the turmoil of the “Golden Twenties,” and the ultimate rise of the Nazi party presented writers, artists, and philosophers with unprecedented experiences that demanded new forms of creative expression. In this course, we will study the varied responses to this challenge and discover how the foundations for our modern consciousness were laid in the first three decades of the 20th century. After reading two influential theoretical accounts of modernity by Nietzsche and Freud, we will move on to the sumptuous aestheticism of Vienna during the age of Strauss, Kafka, and Kokoschka. During the second half of the course, we will study the frantic urban culture of Berlin during the 1920s, paying special attention to works by Brecht, Mann, Weill, and others. In addition to literature and philosophy, we will cover music, film, and the fine arts, paying special attention to mixed genres and limit cases of literature, such as opera, song cycle, and artist book. (In English)

**GE 27998. Special Studies: German**

(3-0-V)

This course was created to allow students to add credit in special circumstances to an already existing course offered in the department. Approval of department chair and instructor of the course is required.

**GE 30102. The ABCs of Reading and Writing about Literature (in German)**

(3-0-3) Profit

At most, two works will be read: Dürrenmatt's *Der Richter und sein Henker* and *Der Besuch der alten Dame*. We will read these carefully, with great attention to detail. Writing assignments will evolve from the readings; they may include a character portrayal, the description of an outdoor event, a short conversation, description of a crime scene, etc. They will increase in length from a single paragraph to two or three pages.

**GE 30103. Advanced German Conversation**

(3-0-3) Norton

This is an advanced German language course, designed for students who have successfully completed a minimum of four semesters of German. This course expands on the grammatical structures of the German language spoken in German-speaking countries today, with emphasis on communication and acquisition of advanced language skills: reading and listening comprehension, and oral and written expression. A study of everyday German culture supports the language study. The conversational component of the course requires student-teacher and student-student interaction (in large and small group settings) to exchange information, clarify meanings, express opinions, argue points of view, and engage in any other communicative function for which native speakers use language. The course includes ongoing evaluation of students, using a variety of evaluative instruments and communicative contexts. Note: Native speakers or students who already have achieved a high level of oral proficiency (to be determined by an oral proficiency interview with the instructor) will not be given credit for this course.

**GE 30105. Advanced Stylistics and Composition**

(3-0-3)

This course offers students the opportunity to increase the sophistication of their written German. Speaking, listening, and reading skills also will benefit. Assignments are varied widely to address the interests and strengths of all students and to allow many opportunities for creativity. For example, students may work at writing letters, biography or autobiography, short stories, editorials, film reviews, or advertisements, to name just a few of the genres and writing styles we explore. In the process, students build their vocabulary, including idiomatic expressions, and solidify their understanding of German grammar. German culture, as expressed in short texts, the Internet, films, and music, provide a rich and meaningful context for the writing process. Students work frequently in groups to read and edit each other's work.

**GE 30107. Kulturgeschichte**

(3-0-3) DellaRossa

This course offers a survey of major developments in the cultural history of Germany and Central Europe. The course will investigate different manifestations of German and Central European cultures, such as literature, painting, architecture, music, and philosophy, as well as their interrelationship and historical contextualization. The course will provide an overview of important cultural and historical developments that have shaped German-speaking Europe. The goal is to familiarize students with basic techniques of approaching and interpreting texts and artifacts while preparing them for a wider range of more specialized courses. Taught in German.

**GE 30108. Literatur von gestern und heute**

(3-0-3) DellaRossa

This course acquaints students with the major periods and issues of German literature through the examination of a significant constellation of literary texts. Students read, discuss, and analyze selected texts from prose, poetry, and drama and become familiar with basic techniques of approaching and interpreting texts that will prepare them for a wider range of more specialized courses.

**GE 30113. Business German**

(3-0-3) Wimmer

German business language and practices. Designed to introduce the internationally oriented business and German major to the language, customs, and practices of the German business world.

**GE 30215. Medieval German Literature**

(3-0-3) Wimmer

This course constitutes a survey of German literature from its beginnings during Germanic times until the 16th century. Ideas, issues, and topics are discussed in such a way that their continuity can be seen throughout the centuries. Lectures and discussions are in German, but individual students' language abilities are taken into consideration. Readings include modern German selections from major medieval authors and works such as *Hildebrandslied*, *Rolandslied*, *Nibelungenlied*, *Iwein*, *Parzival*, *Tristan*, courtly lyric poetry, the German mystics, secular and religious medieval drama, *Der Ackermann aus Böhmen*, and the beast epic *Reineke Fuchs*. Class discussions and brief presentations in German by students on the selections are intended as an opportunity for stimulating exchange and formal use of German.

**GE 30565. The German Novella**

(3-0-3)

This course will explore the German novella, one of the most popular genres of 19th-century German literature. Each work will be read and discussed with careful attention to its formal characteristics as well as its historical and cultural contexts. By proceeding chronologically through the literary periods of Romanticism, Biedermeier, poetic realism, and naturalism, students will gain a sense of literary developments in the 19th century and how these reflect shifts within the broader culture. Among the writers to be read: Goethe, Tieck, Kleist, Hoffmann, Eichendorff, Stifter, Storm, Keller, and Hauptmann. As a 30000-level course, writing will be emphasized. Students will be required to rewrite each of their essays.

**GE 30650. The Romantic Tradition**

(3-0-3)

Between 1790 and 1830, the movement known as Romanticism profoundly changed the artistic, musical, historical, religious, and political sensibilities on the Continent and in Britain. Romanticism marked a turn from the rational formalism of the classical period and reawakened an interest in myth, religious faith, the imagination, and emotional experience. In this course, we will focus principally on the German contribution to Romanticism and trace its origins, development, and eventual decline in works of literature, philosophy, theology, music, painting, and architecture. Works to be studied will include those by the writers Ludwig Tieck, Friedrich von Hardenberg (Novalis), and Friedrich Schlegel; the philosophers Fichte and Schelling; the theologian Friedrich Schleiermacher; the painters Caspar David Friedrich and some members of the Nazarene school; the composers Franz Schubert, Felix Mendelssohn, and Robert Schumann; and the architect Karl Friedrich Schinkel.

**GE 30685. Discourses of Unity or Disunity? Representing Germany after 1990**

(3-0-3) McChesney

The fall of the Berlin Wall in 1989 brought the hope of unity to two diverse German traditions. Yet despite rapid political and geographical unification, even now, more than 15 years later, Germany seems in many respects more dis-united than ever. In this course, we will examine the unity discourse in contemporary German film and text. Focusing in particular on current depictions of the former East and West, we will consider whether these representations contribute to a new sense to national unity by emphasizing the similarities in a common past and present, or whether in fact they accentuate a sense of disunity by bringing out areas of difference, divergence and even conflict. The course will facilitate explorations of the literary, cultural, and historical impact of (dis)unity in present-day Germany through intensive discussion, written essays, and short student-led presentations.

**GE 30891. Masterpieces of German Literature**

(3-0-3)

A sampling of the most beautiful, moving, and humorous prose and poetry of the 20th century will be read and interpreted. Amongst other authors, we will focus our attention on selections from Heinrich Boll, Wolfgang Borchert, Max Frisch, Karl Krolow, and Rainer Maria Rilke. The written assignments will evolve from the texts studied. Taught in German. Junior standing and dean's list.

**GE 40430. The Classical Period of German Literature (1750 to 1830)**

(3-0-3) Norton

Modern German literature comes into being at the middle of the 18th century. This period of German culture, often referred to as its "Classical Age," is represented by such figures as Klopstock, Lessing, Herder, Schiller, Goethe, Hölderlin, and Kleist. In this class, we will read and discuss some of the great works written by these authors and analyze them in relation to the intellectual and cultural currents of the time.

**GE 40440. Goethe and His Time**

(3-0-3)

An intensive study of Goethe's major works of poetry, prose, and drama within the cultural framework of his times.

**GE 40471. Twentieth-Century Prose and Poetry**

(3-0-3)

In order to acquaint the student with the rich diversity characteristic of 20th-century German literature, a wide variety of materials will be studied. They will not only encompass various genres: the short story, the drama, and the poem, but will also represent various time periods: from the beginnings of the 20th century to the '50s. Among others, readings will include Franz Kafka, *Die Verwandlung*; Wolfgang Borchert, *Draussen vor der Tür*; and poems from Rilke to Celan. An oral report, two papers, and a two-hour final will supplement thorough and engaging class discussions based upon close readings of the selected texts.

**GE 40484. Overcoming Political Tragedy**

(3-0-3)

An interdisciplinary course in drama and peace studies. Drama is a potentially fascinating topic for peace studies because, at the heart of traditional drama and theatre, there is conflict—and the question of whether it can be resolved. Moreover, just as politics is often dramatic, drama is often political; there is, for example, an extensive tradition of plays that make a theme of political revolution, usually in the form of tragedy or comedy. Students in this course read classic political dramas that are neither tragedies nor comedies, but rather bring potentially tragic public conflict to positive yet nontrivial resolution. Having discussed definitions of tragedy and comedy, and what might be the advantages of aesthetic renditions of conflict, the class then reads some of these dramas of political reconciliation: Aeschylus, *Oresteia/Leumenides*; Shakespeare, *Measure for Measure*; Calderon, *The Mayor of Zalamea*; Corneille, *Cinna*; Lessing, *Nathan the Wise*; Schiller, *William Tell*; Kleist, *The Prince of Homburg*; Brecht, *The Caucasian Chalk Circle*; Lan, *Desire*; and Fugard, *Valley Song*. (We also may include selected films, such as *Meet John Doe*, *On the Waterfront*, or *Twelve Angry Men*.) We will examine these plays (and films) through the categories of drama analysis and theories of conflict resolution, mediation, and transformation, with the expectation of achieving greater depth in our interpretations of the dramatic texts and in our understanding of the theories of conflict resolution. Students of peace studies and political science who are familiar with these pieces of world literature will have acquired a new kind of resource for their ability to think through and work in conflict resolution.

**GE 40490. Schiller (in German)**

(3-0-3)

In this course, we will consider Friedrich Schiller as a dramatist, poet, aesthetic philosopher, and historian. We will read several of Friedrich Schiller's most important plays, including *Die Rauber*, *Kabale und Liebe*, *Die Verschwörung des Fiesko*, *Wallenstein*, *Maria Stuart*, and *Die Braut von Messina*. In addition, we will read from his letters on beauty (*Kallias*), and the essays *von über Anmut und Würde*, *Über naive und sentimentalische Dichtung*, and *Die ästhetische Erziehung des Menschen*. Finally, we will also read selections from his historical works on the Thirty Years' War and on The Netherlands.

**GE 40648. German Cinema in the Weimar Republic (1918–33) (in English)**

(3-0-3)

The years between 1918 and 1933 are the Golden Age of German film. In its development from expressionism to social realism, the German cinema produced works of great variety, many of them in the international avant-garde. This course gives an overview of the silent movies and sound films made during the Weimar Republic and situates them in their artistic, social, and political context. The oeuvre of Fritz Lang, the greatest German director, receives special attention. Should we interpret Lang's disquieting visual style as a highly individual phenomenon independent of its environment, or can we read his obsessive themes (world conspiracies and terrorized masses, compulsive violence and revenge, entrapment and guilt) as a mirror image of the historical period? Might his films, as some critics have suggested, even illustrate how a national psyche gets enmeshed in fascist ideology? Films subtitled, dubbed, or in English; readings, lectures, and discussions in English.

**GE 40669. Modern Metropolis in German Literature**

(3-0-3)

If Paris was known as the capital of the 19th century, turn-of-the-century Berlin was declared the capital of the 20th century. The largest German metropolis came to epitomize rapid and spectacular modernization in Germany that started before World War I and continued during the Weimar Republic. Berlin had it all: gigantic industrial factories, glamorous boulevards, street lights, dazzling shop windows, night life, movies and entertainment, armies of white-collar employees, housing barracks, modern architecture, shopping, traffic, crime, and social problems. This course offers an introduction to one of the most dynamic periods in German cultural history (1900–33) as it is represented in texts and films about the big city. The discussions will focus on the following questions: Why did the big city appear fascinating and inspiring to some authors, and to others it loomed as a dreadful epitome of alienation and decadence? How were modern phenomena reflected in language and images? What were the forms of aesthetic innovation and artistic

experimentation associated with the representation of modern life? Did men and women experience metropolitan modernity differently?

### GE 40672. The Modern German Short Story

(3-0-3) Wimmer

The German short story and other forms of prose from the Stunde Null in 1945 to the 1990s. Authors range from East and West German writers of the immediate postwar era to the most recent commentators on issues of politics, society, gender, and aesthetics.

### GE 40675. Minority German Writers (in German)

(3-0-3)

This course explores German-language literature written by authors of non-German heritage. As a seminar, it opens up the possibilities of reading a more diverse body of post-1945, and more specifically, post-Wende, German literature. Secondary texts will help us to understand the social and historical context in which these authors write. The primary reading selections will include works by authors of African, Turkish, Sorbian, Roma, and Arab heritages.

### GE 40685. Twentieth-Century German Literature

(3-0-3)

This survey course introduces students to the major writers in 20th-century German-language literature. We will be reading, discussing, and writing about poems, short stories, and dramas by authors such as George, Hofmannsthal, Rilke, Trakl, Thomas Mann, Kafka, Musil, Brecht, Celan, Bachmann, Frisch, Dürrenmatt, Enzensberger, Christa Wolf, Peter Schneider, Brinkmann, Hahn, and Konigsdorf. By also considering these writers, contexts—the trends and movements they were part of, the activities in the other arts that influenced them, the contemporary discourses that surrounded them—we may be able to add depth and nuance to our readings. Thus, depending on student interest and ability, we will familiarize ourselves with the larger environs of 20th-century German-language culture. Taught in German.

### GE 40855. German Drama 1750 to the Present (in German)

(3-0-3)

We will read and discuss some of the greatest plays in the German dramatic tradition, by authors such as Lessing, Goethe, Schiller, Kleist, Grillparzer, Nestroy, Freitag, Hauptmann, Hofmannsthal, Brecht, and Werfel. This semester we will focus on the so-called “drama of reconciliation,” a newly rediscovered genre, where the conflict is serious but ends harmoniously. By interpreting classic German-language plays in the original, you will (1) learn how to approach drama analysis, and (2) develop a sense for the history of drama throughout the past 250 years. In addition, we will study a few short, and often English-language, texts in the theory of drama (Aristotle, Schelling, Carriere, and Cavell, as well as the department’s own Hösle and Roche), which will (3) allow you to differentiate between the basic genres of drama (tragedy, comedy, and drama of reconciliation), and (4) better understand the nature of conflict and reconciliation. Students interested in other national literatures will have the opportunity to draw comparisons with plays by authors such as Aeschylus, Sophocles, Shakespeare, Calderon, Corneille, Racine, and Ibsen; and those interested in film may branch out into analyzing works by directors such as Hitchcock, Renoir, Ford, Capra, Curtiz, Hawks, Chaplin, and Kurosawa.

### GE 40889. Literature and Religion

(3-0-3)

Literature, according to Martin Walser, descends just as irrefutably from religion as human beings do from the apes. Indeed, there is no denying that even during aesthetic modernism, literature, art, and religion are closely intertwined. When art achieved autonomous status in the second half of the 18th century, it did, to be sure, shed its subservient function relative to religion, yet in terms of its topics, themes, and, most particularly, its claim to interpret and give meaning to human existence literature remained tied to religion, in fact became its great rival. This seminar will examine several stations of this development. Beginning with church hymns during the Renaissance and Baroque, we will see how the Bible was discovered as a literary text in the 18th century. At the end of the century, art is conceived as an autonomous, even holy artifact. Poetry, for some, even becomes

the medium of human self-definition and the place in which new myths are created. In the Romantic period, art and religion become fused into a single unity. A century later, art and religion again come into close contact in lyric poetry of the *fin-de-siecle*. The seminar concludes with a consideration of the psalm form in 20th-century poetry. Readings will include works by Luther, Paul Gerhardt, Klopstock, Hölderlin, Wackenroder, Stefan George, Rilke, Trakl, Brecht, Celan, and Bachmann.

### GE 40891. Evil and the Lie (English and German)

(3-0-3)

In an attempt to define the nature of evil and its relation to such phenomena as lying and the preservation of a self-image, this seminar will carefully analyze works spanning the years 1890–1972. Among them will be Wilde, *The Picture of Dorian Gray*; Gide, *The Immoralist*; and Frisch, *Andorra*. Further courses acceptable for comparative literature majors will be found listed by the Department of English. Consultation of program director is required.

### GE 40905. “Siegfried”: How Richard Wagner’s Opera became a Code Word of Anti-Semitism

(3-0-3) Zelinsky

Richard Wagner was not only a musician, but also a prolific author. Indeed, his writings from the late 1840s onward are essential for a complete understanding of his music. In particular, his infamous essay “On Jewishness in Music” of 1850 lays the racist and anti-Semitic foundation for his final and most controversial work, *I* of 1882. In this course, we will focus on the anti-Semitic element of Wagner’s creations and trace the evolution of the Wagner cult that began even before his death and culminated in his virtual deification during the National Socialism regime. Indeed, one can argue that Wagner’s influence reached its apex (or perhaps better its nadir) in a phrase by Adolf Hitler that was inscribed on a bronze plaque above the museum erected in Munich to house the infamous exhibition on “Degenerate Art” in 1937: “Art is a sublime mission that demands fanaticism.”

### GE 40911. Self-Definition and Quest for Happiness in Continental and American Prose of the Twentieth Century

(3-0-3)

Everyone from the ancients to the most technologically conscious CEOs tell us that those who succeed know the difference between the important and the unimportant, and they allocate their time accordingly. But how does one make these choices? If, in fact, success and happiness are synonymous, as some would claim, which way lies success, lies happiness? And what are the guideposts? What really matters? In an age such as ours, does anything have lasting value? Do I really matter? If I am most assuredly defined by my beliefs and my deeds, what then do I believe, what do I do? In the final analysis, who am I? If literature, as so many maintain, not only mirrors but also foretells world events, how have several 20th-century authors representing diverse national traditions formulated the answers to these seminal questions? Readings will include F. Scott Fitzgerald, *The Great Gatsby*; Albert Camus, *The Stranger*; and Max Frisch, *Homo Faber*.

### GE 40980. From Goethe to Nietzsche to Kafka: The Search for God in German Literature and Philosophy

(3-0-3)

One of the peculiarities of German culture is the strong connection between philosophy and literature; another, the heroic attempt to develop a religion no longer based on authority, but on reason. We will discuss the main steps in this German quest for God, alternating philosophical and literary texts by authors such as Lessing, Goethe, Kant, Hegel, Schopenhauer, Nietzsche, and Kafka. Texts and discussions in English. *Prerequisite*: junior or senior standing.

### GE 40988. Plato Before *The Republic*

(3-0-3)

Plato is the philosopher most difficult to interpret. The range of his interests, the innovative nature and the complexity of his thought, finally, the fact that he does not speak in first person adds to the difficulty. After a general introduction into the main problems and positions of Plato scholarship today, we will read some of his dialogues written before his most important work, *The Republic*, dealing with such various topics as virtues, the nature of art, the relation of ethics and religion,

the politics of Athens, and the essence of knowledge. We will analyze both his arguments and the literary devices by which he communicates them and partly withholds and alludes to further ideas.

### GE 40989. Philosophical Dialogues

(3-0-3)

Philosophy is communicated in different literary genres—as essays, treatises, didactic poems—the choice of which influences in a subtle manner the contents exposed. One of the most interesting literary genres used by philosophers is certainly the dialogue, since it allows to hide the author's mind behind a variety of different positions that get the chance to articulate themselves and since it shows the connection between philosophical ideas and discursive behavior. We shall read different texts ranging from Plato to Feyerabend to see how different philosophers have exploited the possibilities of this genre.

### GE 43439. Goethe's Lives

(3-0-3)

Goethe is doubtless the greatest German poet. He was the last Renaissance man—a philosophical mind, a scientist, and a statesman, who has written some of the most sublime German literature in all three genres. But one of his greatest artworks was his own life. We will read his autobiography *Dichtung und Wahrheit*, which gives us a splendid overview of Germany's intellectually most prolific time, and his *Italienische Reise*, one of the most intense experiences of the essence of Italian culture ever. One of the focuses of the seminar will be on the literary transformation of biographical facts peculiar to all autobiographies, and to Goethe's in particular.

### GE 43483. Seminar on German Women Writers (in German)

(3-0-3)

Participants in this seminar will explore the rich literary history of female writers from German-speaking Europe. We read works of many genres (drama, short story, novella, novel, letter) by women from the early Middle Ages to the present. In the process, we encounter Europe's first playwright, one of the 21st-century's brightest young literary stars, and an array of intriguing women who lived in the interim. We scrutinize and apply various theoretical and critical approaches to women's literature, both in writing and in lively debates.

### GE 43499. German Literature Senior Seminar

(3-0-3)

Seminar devoted to the intensive study of selected works, periods, and genres of German literature.

### GE 47498. Special Studies

(3-0-3)

Senior standing, dean's list.

### GE 48439. Goethe's Lives

(3-0-3)

Goethe is doubtless the greatest German poet. He was the last Renaissance man—a philosophical mind, a scientist, and a statesman, who wrote some of the most sublime German literature in all three genres. But one of his greatest artworks was his own life. We will read his autobiography *Dichtung und Wahrheit*, which gives us a splendid overview of Germany's intellectually most prolific time, and his *Italienische Reise*, one of the most intense experiences of the essence of Italian culture ever. One of the focuses of the seminar will be on the literary transformation of biographical facts peculiar to all autobiographies, and to Goethe's in particular.

### GE 48499. Senior Thesis

(3-0-3)

German majors who wish to graduate with honors may write a senior thesis. For those German majors who elect to write a thesis, several requirements must be met: (1) The student must have a GPA of 3.5 or higher in the major; (2) the thesis must be at least 30 pages long; and (3) the thesis must be written in German. The student writing a thesis enrolls in GE 48499 and receives one course credit (three credit hours) for the course. Although the thesis is graded by the advisor (to receive

honors, the thesis must receive a grade of B+ or higher), the entire department reads the thesis, acting as an advisory body to the advisor. The thesis is due the week after spring break, and the student is strongly advised to begin thinking about it and start conferring with the advisor before the October break of the fall term.

### Russian

#### RU 10101. Beginning Russian I

(4-0-4) Gillespie, Marullo

No prerequisite. Develops students' skills in listening, speaking, reading, and writing while also fostering an appreciation for Russian culture. Emphasis is placed on the acquisition of basic structures, vocabulary, and sound systems. Students will be encouraged to use their language skills to communicate and interact in a variety of situations and contexts.

#### RU 10102. Beginning Russian II

(4-0-4) Gillespie, Walker

Continuation of Beginning Russian I. Develops students' skills in listening, speaking, reading, and writing while also fostering an appreciation for Russian culture. Emphasis is placed on the acquisition of basic structures, vocabulary, and sound systems. Students will be encouraged to use their language skills to communicate and interact in a variety of situations and contexts.

#### RU 13186. Literature University Seminar (in English)

(3-0-3)

First-year students only. This course introduces students to Russian literature and culture while also serving as an introduction to the seminar method of instruction. The course is writing-intensive, with emphasis given to improving students' writing skills through the careful analysis of specific texts.

#### RU 20101. Intermediate Russian I

(3-0-3) Gasperetti

This is the first half of a two-semester review of Russian grammar designed to facilitate a near-native proficiency with the form and function of Russian nouns, verbs, and adjectives. Exceptional forms are stressed, and reading selections on contemporary Russian life and excerpts from literature are employed to improve comprehension and build conversational and writing skills.

#### RU 20102. Intermediate Russian II

(3-0-3) Gasperetti

This is the second half of a two-semester review of Russian grammar designed to facilitate a near-native proficiency with the form and function of Russian nouns, verbs, and adjectives. Exceptional forms are stressed, and reading selections on contemporary Russian life and excerpts from literature are employed to improve comprehension and build conversational and writing skills.

#### RU 30101. The Literature of Imperial Russia I (in English)

(3-0-3) Marullo

No prerequisite. The first part of a two-semester survey of long and short fiction focusing on the rise of realism in Russia. Topics to be included are the content and method of realism ("gentry," "urban," "classical," "romantic," "empirical," and "psychological"); the evolution of the "family" chronicle; the nature and development of the Russian hero and heroine, particularly the "superfluous man," "the philosophical rebel," the "man-god," and the "moral monster"; the interplay of "patriarchal," "matriarchal," and "messianic" voices; the dynamics of the Russian soul and soil; the interaction of lord and peasant; the premonition of catastrophe and Apocalypse; and finally, the conflict between city and country, "old" and "new," Russia and the West. Daily readings and discussions. Several papers, projects, and exams.

#### RU 30102. The Literature of Imperial Russia II (in English)

(3-0-3) Marullo

No prerequisite. The second part of a two-semester survey of long and short fiction and focusing on the rise of realism in Russia. Topics to be included are the content and method of realism ("gentry," "urban," "classical," "romantic," "empirical," and "psychological"); the evolution of the "family" chronicle; the nature and

development of the Russian hero and heroine, particularly the “superfluous man,” “the philosophical rebel,” the “man-god,” and the “moral monster”; the interplay of “patriarchal,” “matriarchal,” and “messianic” voices; the dynamics of the Russian soul and soil; the interaction of lord and peasant; the premonition of catastrophe and Apocalypse; and finally, the conflict between city and country, “old” and “new,” Russia and the West. Daily readings and discussions. Several papers, projects, and exams.

### RU 30103. Literature of the Russian Revolution, 1900-25, (taught in English)

(3-0-3) Marullo

No prerequisite. Literature of the Russian Revolution (in English) focuses on the national written expression that attended the explosion in the arts in Russia in the first 30 years of the 20th century; e.g., Stravinsky in music; Diaghilev in ballet; and Benois, Goncharova, Chagall, and Larionov in art. Readings include the “decadence” of Ivan Bunin, Leonid Andreev, and Feodor Sollogub; the “proletarian” writings of Maxim Gorky; the “symbolism” of Andrei Bely and Alexander Blok; and the “modernism” of Mikhail Kuzmin, Evgeny Zamiatin, Vladimir Maiakovsky, Isaac Babel, and Boris Pilniak. (Bunin was the first Russian writer to be awarded the Nobel Prize in literature; Zamiatin’s novel, *WE*, was the model for the antiutopian fiction of Orwell and Huxley; Bely is the Russian James Joyce.) Topics to be considered are the content and method of Russian “decadence,” “symbolism,” and “modernism”; the “lost” man and woman in the early 20th century; the conflict between city and country, “old” and “new,” Russia and the West; the dynamics of revolution, catastrophe, and apocalypse; the nature of “imprisonment,” “liberation,” and “exile” (physical, social, spiritual, and aesthetic); the interplay of “patriarchal,” “maternal,” and “messianic” voices; the form and function of antiutopian themes, psychological investigation, and the grotesque; the yearning for “ancient” Russia and the dismay at the new Soviet state; links to “modern” Russian painting, music, and ballet; and the critique of modernity and its implications for humankind. Daily readings and discussions; several small papers, projects, and exams. The course is designed to sharpen students’ aesthetic and analytical capabilities, improve their reading comprehension, and strengthen their written and oral skills.

### RU 30104. Literature of Russian Dissidence, 1927-90 (taught in English)

(3-0-3) Marullo

No prerequisite. The second half of a year-long survey of 20th-century Russian literature, this course focuses on literature as protest against Soviet totalitarianism and as an assertion of the freedom and dignity of the individual in the face of challenges from the state and from “modern life.”

### RU 30201. Dostoevsky (in English)

(3-0-3) Marullo

No prerequisite. Dostoevsky in English is an intensive, in-depth survey of the major long and short fiction of one of the world’s greatest and most provocative writers. Readings include: *The House of the Dead* (1862); *The Notes From the Underground* (1864); *Crime and Punishment* (1866); and *The Brothers Karamazov* (1879-80). Topics to be discussed: the evolution of the Dostoevskian hero and heroine within the context of the writer’s fiction, as well as within the social and literary polemics of the age; the content and method of both “urban” and “psychological” realism; the interplay of “patriarchal,” “matriarchal,” and “messianic” voices; the dynamics of Russian soul and soil; the conflict between city and country, “old” and “new,” Russia and the West; the influence of the “saint’s tale,” the “family chronicle,” the “detective story,” and the genres of journalism and drama on Dostoevsky’s writing; and the writer’s political, theological, and epistemological visions, in particular, his distrust of behavior (i.e., co-dependency, sadomasochism, sexual perversion, and the like); and his endorsement of so-called “Pauline mysticism.” The first three weeks of the course will focus on Dostoevsky’s early fiction, the thesis being that many of the ideas, images, and themes of the writer’s major novels were rooted in the early experiments of both his “Petersburg” and “Siberian” periods. Daily readings and discussions. Several small papers, projects, and exams.

### RU 30202. Tolstoy (in English)

(3-0-3) Marullo

No prerequisite. Tolstoy in English is an intensive, in-depth survey of the major long and short fiction of one of the world’s greatest and most provocative writers. Readings include *Childhood, Boyhood, Youth* (1852-57), *The Sevastopol Tales* (1855-56), *The Cossacks* (1863), *War and Peace* (1865-69), *Anna Karenina* (1875-77), *The Death of Ivan Ilyich* (1886), *The Kreutzer Sonata* (1889), *Master and Man* (1895), *Father Sergius* (1898), and *Hadji Murad* (1904). Topics to be discussed: the evolution of the Tolstoyan hero and heroine within the context of the writer’s fiction, as well as with the social and literary polemics of the age; the interplay of “patriarchal,” “matriarchal,” and “messianic” voices; the dynamics of Russian soul and soil; the conflict between city and country, “old” and “new,” Russia and the West; and the writer’s political, theological, and epistemological visions, in particular, his theory of history, his defense of the family, his endorsement of “rational egoism,” and his distrust of socially inspired “great men” in life.

### RU 30441. Soviet and Post-Soviet Russia

(3-0-3)

This course will examine the political system of the Soviet Union, why it lasted, and why it collapsed. It will then examine the transition from Soviet rule to the contemporary Russian political system and the various problems of transition.

### RU 30515. Russian Realms: Societies/Cultures of Eastern Europe and Beyond (in English)

(3-0-3) Gaffney

This course explores the social structures, the historical contexts, and the symbolic universes of the peoples who either identify themselves as Russian or whose way of life has come to be deeply affected by the Russian tradition. It concentrates on those territories that were formerly incorporated into the Tsarist empire and subsequently formed parts of the Soviet Union. It will include an examination of the extensive efforts by Russian thinkers to characterize their own national spirit, reflecting, for example, on classic and contemporary attempts to define *dusha* or a distinctively Russian “soul,” as well as some of the consequences of these formulations, looking at this famous “civilization” question through art, literature, and film as well as social science works. However, the chief approach of the course will be through reading of anthropological studies that have addressed the larger questions from numerous specific, local venues. A strong emphasis will also be placed on the so-called current “transition period,” as a new Russia in the neighborhood of the “Commonwealth of Independent States” seeks to reshape its heritage amid complex problems arising from social, economic, political, and cultural factors, not to mention old ghosts of global rivalry, terrorism, and disputed legitimacy.

### RU 30531. Art into History: Reading the Art of Medieval Byzantium

(3-0-3)

Byzantine art has often been opposed to the traditions of Western naturalism, and as such, has been an undervalued or little known adjunct to the story of medieval art. In order to develop a more sophisticated understanding of this material, we will examine the art produced in Byzantium in the period from the 9th to the 12th century, a period that marks the high point of Byzantine artistic production and influence. Stress will be placed on the function of this art within the broader setting of this society. Art theory, the notions of empire and holiness, the burdens of the past, and the realities of contemporary praxis will be brought to bear on our various analyses of material from all media. How we, as art historians, can write the history of this rich culture will be a central issue of this course.

### RU 30555. The City in Literature and Cinema: New York, St. Petersburg, Moscow

(3-0-3) Walker

No prerequisite. This course will examine the cultural history of three Russian and American metropolises: New York, St. Petersburg and Moscow. Using a wide variety of sources, including literature, film, and graphic art, we will consider these urban centers not as geographical entities, but as continually evolving symbolic systems that generate meaning about and insight into Russian and American culture. By comparing and contrasting these three cities and their cultural heritage, we will also learn much about where American and Russian cultures diverge and

come together. Works to be examined include two recognized literary masterpieces: Fitzgerald's *The Great Gatsby* and Bulgakov's *The Master and Margarita*, and films by Martin Scorsese, Woody Allen, and the award-winning Russian director Aleksei Balabanov. Taught in English.

### RU 33301. BROTHERS KARAMAZOV (in English)

(3-0-3) Gasperetti

No prerequisite. This course is a multifaceted investigation into the philosophical, political, psychological, religious, and literary determinants of Fyodor Dostoevsky's longest and most complex novel, *The Brothers Karamazov*. Emphasis is placed on daily, in-depth discussions based on a close reading of the text. Additional assignments illuminate a variety of themes in the novel, from the author's visionary political predictions and rejection of West European materialism to his critique of rationalism and insistence on the link between faith and morality.

### RU 33401. Russian Women Memoirists (in English)

(3-0-3) Gillespie

No prerequisite. Throughout the history of Russian literature, the genres of autobiography, memoir, and diary have provided a venue for women to find their voices in a private arena safely distanced from the privileged genres of novels and lyric poetry. This course examines the history and development of the female memoir in Russian literature, from the 18th-century memoirs of a courtier of Catherine the Great to documents of the Stalinist terror and prison camp life of the 20th century. We also will address theoretical questions about women's autobiographical writing and consider the relationship of the works we read to the dominant "male" literary tradition.

### RU 33450. Progress, Prosperity, (In)Justice: The Plight of the Individual in Nineteenth-Century Literature

(3-0-3) Gasperetti

No prerequisite. Analyzes a seminal transition in Western society as it moves from an agrarian world centered around the rural estate to an urban culture built on industry and commerce. Literary texts emphasize the physical, psychological, and moral consequences to the individual of the decline of the estate, the rise of capitalism, the nontraditional nature of life and work in the city, various challenges to the established order (socialism, anarchism), and changing notions of gender. Texts include Daniel Defoe, *Robinson Crusoe*; Nikolai Gogol, "The Overcoat"; Eugene Sue, *The Mysteries of Paris* (excerpts); Leo Tolstoy, *Childhood*; Charles Dickens, *Hard Times*; Horatio Alger, *Ragged Dick*; Emile Zola, *Germinal* and Henrik Ibsen, *A Doll's House*. Nonliterary texts used to support the literary depiction of the era include John Locke, "Of Property," Adam Smith, *The Wealth of Nations* (excerpts); Karl Marx and Friedrich Engels, *The Communist Manifesto*; and Henry Mayhew, *London Labour and the London Poor* (excerpts).

### RU 33520. New Directions in Russian Cinema

(3-0-3) Gillespie

No prerequisite. Freed from the constraints of Soviet-era censorship, since 1990 Russian filmmakers have exploited the unique qualities of the film medium in order to create compelling portraits of a society in transition. The films we will watch cover a broad spectrum: reassessing Russia's rich pre-Revolutionary cultural heritage as well as traumatic periods in Soviet history (World War II, the Stalinist era); grappling with formerly taboo social issues (gender roles, anti-Semitism, alcoholism); taking an unflinching look at new social problems resulting from the breakdown of the Soviet system (the rise of neo-fascism, the war in Chechnya, organized crime); and meditating on Russia's current political and cultural dilemmas (the place of non-Russian ethnicities within Russia, Russians' love-hate relationship with the West). From this complex cinematic patchwork emerges a picture of a new, raw Russia, as yet confused and turbulent, but full of vitality and promise for the future. Short readings supplement the film component of the course.

### RU 40101. Advanced Russian I

(3-0-3) Walker

*Prerequisite:* RU 20202 OR RU 202

This yearlong course is designed to significantly improve students' comprehension and self-expression skills in Russian, serving as a preparation for Russian literature

courses in the original. The course will include an intensive review of Russian grammar; Russian stylistics, syntax, and grammar at the advanced level; reading and analysis of a wide range of 19th-century Russian literary texts; writing essays in Russian; and extensive work on vocabulary building and advanced conversation skills. The course will be conducted in Russian.

### RU 40102. Advanced Russian II (in Russian)

(3-0-3) Walker

*Prerequisite:* RU 20102 OR RU 202

This yearlong course is designed to significantly improve students' comprehension and self-expression skills in Russian, serving as a preparation for Russian literature courses in the original. The course will include an intensive review of Russian grammar; Russian stylistics, syntax, and grammar at the advanced level; reading and analysis of a wide range of 20th-century literary texts (including fiction, poetry, interviews, songs, and newspaper materials); writing essays in Russian; and extensive work on vocabulary building and advanced conversation skills.

### RU 43101. Nineteenth-Century Russian Literature Survey (in Russian)

(3-0-3)

*Prerequisite:* (RU 20102 OR RU 202)

Introduces the major movements and authors of the 19th century. Special attention is given to the genesis of the modern tradition of Russian literature in the first half of the century and to the role literary culture played in the political and social ferment of the era. Readings, discussions, and written assignments are in Russian and English.

### RU 43102. Twentieth-Century Russian Literature Survey (in Russian)

(3-0-3)

*Prerequisite:* (RU 20102 OR RU 202)

This course surveys the generic richness, stylistic innovation, and political intrusion into literature that defined Russian literary culture in the first six decades of the 20th century. It introduces such movements/periods as symbolism, Acmeism, futurism, the "fellow travelers," socialist realism, and the "thaw." Readings, discussions, and written assignments are in Russian and English.

### RU 43208. Chekhov (in Russian)

(3-0-3)

*Prerequisite:* RU 20102 OR RU 202

This course is an introduction to the short stories and plays of Anton Chekhov, with attention to the development of his art of characterization, dialogue, plot construction, and innovative dramatic technique. Central themes of the course will be alienation and banality in Chekhov's works, Chekhov's attitude to science and progress, and his views on the future of Russia. A portion of the semester will be largely devoted to the reading and performance (in Russian) of one of Chekhov's plays.

### RU 43405. Russian Romanticism (in Russian)

(3-0-3) Gillespie

*Prerequisite:* (RU 20102 OR RU 202)

This course introduces students to the literature of Russian Romanticism, which came into being at the turn of the 19th century, dominated Russian literature in the 1820s and was still influential well into the latter part of the century. Inspired by Russian writers' encounters with English, German, and French Romantic literature, Russian Romanticism was, paradoxically, the first literary movement in Russia that sought to develop a definitively national, uniquely Russian literature and literary language. We will explore this quest for a national literature in light of Russian Romanticism's Western influences. In so doing, we will study works of poetry, fiction, drama, and literary criticism by a diverse group of Romantic writers including Vasily Zhukovsky, Alexander Pushkin, Nikolai Gogol, Mikhail Lermontov, Karolina Pavlova, Fedor Tiutchev, Afanasy Fet, and others. Themes of the course will include the national and the exotic, the natural and the supernatural, rebellion and social alienation, violence, and passion.

**RU 43420. Post-Soviet Literature and Culture**

(3-0-3)

*Prerequisite:* RU 20102 OR RU 202

In the last two decades, Russia has undergone dramatic changes ranging from the crisis of the totalitarian system and disintegration of the Soviet empire to the rapid development of new trends in literature and culture. We will survey these new trends, with a focus on defining the nature and multiplicity of “post-Soviet” cultural sensibilities in recent Russian short fiction, essays, poetry, lyrics, and interviews, as well as in pop-culture and film. Topics under consideration will include traditional and new, post-Soviet and postmodern, as well as feminist, émigré, and post-colonial discourses.

**RU 43470. Fantasy and Realism in Russian Literature and Culture**

(3-0-3) Walker

*Prerequisite:* (RU 20102 OR RU 202)

Russian literature has produced a rich array of works in the fantastic mode, from the stories of Pushkin and Gogol to longer masterpieces by Dostoevsky and Bulgakov. This course will explore the complex interrelation between the fantastic and Russian/Soviet reality. In our examination of short stories, poems, film and cartoons we will focus in particular on how the fantastic is often used as a vehicle for grappling with issues related to personal and national identity.

**RU 43501. St. Petersburg as Russian Cultural Icon (in Russian)**

(3-0-3)

*Prerequisite:* RU 20102 OR RU 202

Uses St. Petersburg’s rich cultural heritage to investigate Russia’s struggle for national identity. Areas to be covered include literature (Pushkin, Gogol, Dostoevsky, Blok, Akhmatova, Zamiatin), painting (Repin, Surikov, Malevich), music (Stravinsky, Shostakovich) and film (Eisenstein).

**RU 46100. Advanced Grammar and Introduction to Literature**

(3-0-3)

Directed readings in advanced grammar and literature.

**RU 46101. Directed Reading**

(3-0-3)

Directed reading course.

**RU 47101. Area Studies**

(3-0-3)

Fall semester research in Russian and East European area studies. By the end of the semester, the student will be expected to produce an annotated bibliography of sources, a thesis statement, and an outline/proposal for the research project as a whole.

**RU 48410. Honors Thesis Research and Writing I**

(1.5-0-1.5)

Thesis writers work closely with their advisor, who guides them through the bulk of their research and the initial stages of writing the thesis. Goals to be accomplished in the first semester include the submission of a thesis statement and one-paragraph introduction by October 1, a two-page prospectus and an annotated bibliography by November 15, and 10 pages of the thesis by the end of the semester.

**RU 48420. Honors Thesis Research and Writing II**

(1.5-0-1.5)

Working closely with an advisor, the student completes the research and writing of the honors thesis. Goals to be accomplished in the second semester include the submission of the completed thesis to the advisor in mid-March (the first Monday after spring break), submission of the final draft of the thesis incorporating the revisions suggested by the advisor (Monday of the last full week of classes), and the candidate’s oral defense of the thesis before the faculty of the Russian section (approximately one week after the submission of the final draft).

**Department of Romance Languages and Literatures**

See also

[French](#)[Italian](#)[Portuguese](#)[Spanish](#)**LLRO 10101. Beginning Quechua I**

(4-0-4)

The principal aims of this beginning-level Quechua language course are to encourage the development of competency and proficiency in listening, speaking, reading, writing, and to generate cultural understanding. LLRO 10101, taken in connection with LLRO 10102 and 20201, fulfills the language requirement.

**LLRO 13186. Literature University Seminar**

(3-0-3) Boyer. Rice

Cultural and literary crossroads in the Francophone, Italian, Hispanic, and Lusophone worlds. Restricted to first-year students.

**LLRO 27201. Special Studies: Intermediate Quechua I**

(3-0-3)

An intermediate-level, third-semester, college language course with emphasis on and refinement of grammatical competence and oral and written language skills. Class time is dedicated to interactive discussion encouraging the development of language proficiency and generating cultural understanding.

**LLRO 30123. King Arthur in History and Literature**

(3-0-3) Boulton

This course, intended to introduce undergraduates to one of the major themes as well as to the interdisciplinary approaches characteristic of medieval studies, is a team-taught examination of the development and influence of the legend of Arthur, King of Britain, both in history and in literature.

**LLRO 30125. Arthurian Literature in France and England**

(3-0-3) Boulton

Survey of Arthurian literature.

**LLRO 30800. Rome: Journey in Art and History**

(3-0-3)

This class is an exploration of the history and culture of Rome from late medieval times through the 20th century, with an emphasis on art and architecture. We will examine the urban panorama of the Eternal City through a series of layered investigations of its major sites and monuments, such as the Capitoline Hill, St. Peter’s and the Vatican complex, the Lateran, and Santa Maria Maggiore. We will read travelers’ descriptions and literary evocations of the city with a view to reliving the enchantment of Rome, and the “idea” of Rome, through the ages. In addition to our readings and lectures, members of the class will have an opportunity to develop projects on objects, structures, or works of art of their own choosing.

**LLRO 40040. Introduction to Linguistics**

(3-0-3)

This course requires no previous study of linguistics. It serves as an introduction to the most basic elements of human language. Students will have the opportunity to analyze the word order and sound systems of various languages of the world. Each student will have the option of focusing investigations on one language in particular. Through this course, they will “discover” universal rules that govern all languages of the world. Finally, the course will take a brief look at how both first and second languages are learned, both inside and outside of the classroom. Students of all languages are strongly encouraged to register for this course.

**LLRO 40105. France, England, and the Hundred Years War**

(3-0-3)

The course will examine in depth some of the major works of English and French literature in the period of the Hundred Years War, when each country defined its sense of national identity, and will set these works in their cultural, social, and political context.

#### LLRO 40115. Dante I

(3-0-3)

Dante I and Dante II are an in-depth study, over two semesters, of the entire *Comedy*, in its historical, philosophical and literary context, with selected readings from the minor works (e.g., *Vita Nuova*, *Convivio*, and *De vulgari eloquentia*). Dante I focuses on the *Inferno* and the minor works; Dante II focuses on the *Purgatorio* and *Paradiso*. Lectures and discussion in English; the text will be read in the original with facing-page translation. Students may take one semester or both, in either order.

#### LLRO 40116. Dante II

(3-0-3) Moevs

Dante I and Dante II are an in-depth study, over two semesters, of the entire *Comedy*, in its historical, philosophical and literary context, with selected readings from the minor works (e.g., *Vita Nuova*, *Convivio*, and *De vulgari eloquentia*). Dante I focuses on the *Inferno* and the minor works; Dante II focuses on the *Purgatorio* and *Paradiso*. Lectures and discussion in English; the text will be read in the original with facing-page translation. Students may take one semester or both, in either order.

#### LLRO 40120. From Roland to the Holy Grail

(3-0-3) Boulton

This is a survey of medieval French literature from 1100 to 1300, including the epic, the romance, drama, and poetry.

#### LLRO 40145. Dante I

(3-0-3) Sbordoni

The course will be a journey inside the ultimate nightmare in the whole history of literature: Dante's *Inferno*—a prison for eternity, accurately subdivided like a model dungeon, perfectly organized, with no possible evasions, no bribery to the guardians, no leagues between inmates, crossed through by two traveling poets, one of them relating about his trip with outstanding precision, the other guiding him after rescuing him and becoming one of the great characters of the entire poem. We will study this great metaphor of a cosmic incarceration created by Dante's genius, and the amazing variety of the world of the convicted felons, and the philosophical ideas that rule this descent into the womb of the Earth where Lucifer, the utmost convict, lies.

#### LLRO 40230. Renaissance Woman

(3-0-3) DellaNeva

This course is designed as an introduction to the study of women and literature of the Renaissance period in Europe. It considers the image of women in the writings of male authors as well as the work of female authors.

#### LLRO 40542. Comedy, Italian Style!

(3-0-3)

An exploration of comic traditions in Italy: the popular film genre known as "comedy, Italian style" is analyzed in its historical development in the 1950s and '60s, together with Italian film comedies from the silent period through the present. Roberto Benigni's new film version of *Pinocchio*, for example, released in the United States in December of 2002, extends a long line of comic genius. The commedia dell'arte, Goldoni's comedy of manners, and the political farce of Nobel Prize winner Dario Fo provide further examples of a comic tradition that continues to be a vital force of aesthetic pleasure and political comment. Requirements include attendance at mandatory film screenings, participation in class discussions, a number of short papers, and midterm and final exams. The class will be conducted in English.

#### LLRO 40545. Italian National Cinema

(3-0-3)

Corequisite: LLRO 41545

Conducted in English, this course examines the concept and reality of "national cinema" in the Italian case. A history of one of the world's most renowned national cinemas focusing on the construction of national identity in film.

#### LLRO 40548. Italian Cinema: Realities of History

(3-0-3)

This course explores the construction and development of the Italian cinematic realist tradition from the silent era to the early 1970s, although its primary focus is on the period 1934–66, which stretches from the appearance of Blasetti's openly fascist "historical" reconstruction *La vecchia guardia* to Pasolini's "eccentric" exercise in Left-wing commitment *Uccellacci e uccellini*, with its mix of expressionist and hyper-realist techniques. At the center of this period are found some of Italy's most highly regarded films made by directors, such as Vittorio DeSica, Roberto Rossellini, and Luchino Visconti, who belonged to the neo-realist movement (1945–53). These filmmakers rejected escapist cinema and tried to make films that examined the contemporary experiences of ordinary Italians. As well as analyzing the films in themselves, the course examines the formal and ideological continuities and differences between neo-realist films and their silent and fascist predecessors. In a similar way, it analyses neo-realism's impact on later filmmakers such as Federico Fellini, Pietro Germi, Pier Paolo Pasolini, Gillo Pontecorvo, Dino Risi, and Francesco Rosi, who attempted to develop new versions of cinematic realism. Finally, the course aims to locate the films in their historical and cultural contexts and to address theoretical issues arising from the concept of realism.

#### LLRO 40560. Brazilian Film and Popular Music

(3-0-3) Ferreira Gould

This course provides insights into 20th- and 21st-century Brazilian history, culture, and politics through film, photography, literature, and popular music. Topics discussed include Samba, Bossa Nova, Tropicalia, and the reception of Cinema Novo and of the new Brazilian Cinema. Special attention will be paid to Tropicalia (a movement with key manifestations in the visual arts, cinema, popular music, and literature) and the circumstances surrounding its creation, including the repressive military regime that governed Brazil from 1964 to 1985. This course satisfies the fine arts requirement and is cross-listed in FTT. Offered in English.

#### LLRO 40655. Italy in Modern Europe

(3-0-3)

The course will treat the cultural, literary, artistic, and political relationships between Italy and the rest of Europe in the modern period (since the Renaissance). Central concerns will be the presence and influence of masterpieces of Italian literature both in translation and in the original Italian in other European countries, and the image of Italy (and in particular of Rome) in the religious polemics (Catholic/Protestant) of modern Europe.

#### LLRO 40906. French Literature Goes to the Opera

(3-0-3) MacKenzie

In this course, the full title of which is "Taking Liberties: From Book to Libretto, or French Literature Goes to the Opera," and which is being taught in ENGLISH for the first time, we will be looking a series of "parent" texts, written originally in French, and their operatic "offspring." Our objective will be less to highlight textual difference, although in certain cases that is far from being an uninteresting area of investigation, than to appreciate the theme and variation of, let us say, Merimée's *Carmen* and the treatment she gets in Bizet's opera. Among the text/operas we will examine, as books (in English translation or in the original French depending on individual student preference and as operas (DVD projections with subtitles), will be *The Barber of Seville* (Beaumarchais/Rossini); *The Marriage of Figaro* (Beaumarchais/Mozart); *Don Juan* (Molière) and *Don Giovanni* (Mozart); *Manon Lescaut* (Prévost/Puccini); and *Carmen* (Mérimée/Bizet). We may try for one more: either *Le roi s'amuse* (Hugo)/ *Rigoletto* (Verdi) or *La dame aux camélias* (Dumas)/ *La Traviata* (Verdi). As a so-called "appreciation" course, students need not necessarily know French or music theory. What are required are open minds, eyes, and ears. There will be two papers, the second being more ambitious than the first, and a final exam. *Prerequisite:* 30xxx-level literature or music course, or permission of instructor. This course does fulfill a 40xxx-level requirement for French majors.

**LLRO 40955. Dictatorships in Luso-Brazilian Fiction and Film**

(3-0-3)

A literary and cinematic study of 20th-century dictatorships in Brazil and Portugal, with readings in Luso-Brazilian fiction, history, film, and cultural theory. Conducted in English with readings in Portuguese or English.

**LLRO 40956. Carnival in Cinema and Literature**

(3-0-3)

Brazil has tantalized our imagination with images of Samba and Carnival. This course explores Brazilian culture by investigating the ways in which the celebrations of Carnival have been viewed, articulated, and unsettled by film and literature. Along with major films, documentaries, and literary works, we examine contemporary sociological and anthropological writing that contributes to our understanding of Carnivals within and beyond Brazil. We learn how key issues in Brazilian society (class, race and gender relations, national identity, rituals and symbols, values, and social roles) play out in Carnival. Course offered in English.

**LLRO 40981. Short Fiction across the Atlantic: Brazil, Portugal, and Lusophone Africa**

(3-0-3)

This is a comparative study of short prose fiction in the Portuguese-speaking world, with special emphasis on theoretical issues related to this literary genre. Authors studied include Machado de Assis, Joao Guimaraes Rosa, Clarice Lispector, Mario de Sa-Carneiro, Miguel Torga, and Luandino Vieira. Texts and discussions in English.

**LLRO 40983. Immigrant Voices in Modern Brazilian Literature**

(3-0-3)

This course examines literary perspectives on the European and non-European immigrant experience in Brazil and addresses fundamental questions that have occupied major contemporary Brazilian authors; How do we recreate a sense of home after having lost it? What makes us feel at home in a new place or country? How do we adapt to relocations of home? We will search for answers in the fiction of Milton Hatoum, Elisa Lispector, Salim Miguel, Ana Miranda, Raduan Nassar, Nelidon Pinon, Samuel Rawet, and Moacyr Scliar. Conducted in English with readings in Portuguese or English (discussion groups available in Portuguese.)

**LLRO 40995. Dictatorship/Lusophone Fiction and Film**

(3-0-3)

*Prerequisite:* (ROPO 20202 OR ROPO 202 OR ROPO 202P)

This course explores the role of the dictator as painted in popular fiction and film production.

**LLRO 40997. Portuguese Colonialism Revisited**

(3-0-3)

With readings from Brazil, Angola, Mozambique, and Portugal, this course examines colonialism and its aftermath in Africa in light of postcolonial fiction and contemporary sociological and anthropological writing from the Lusophone world. The course brings the Lusophone experience, with its important varieties yet overlooked implications, into broader debates in the field of postcolonial studies. Course conducted in English with readings in Portuguese and/or English.

**LLRO 41512. Comedy, Italian Style! Lab**

(0-2-0)

*Corequisite:* LLRO 40512

An exploration of comic traditions in Italy: the popular film genre known as “comedy, Italian style” is analyzed in its historical development in the 1950s and ’60s, together with Italian film comedies from the silent period through the present. Roberto Benigni’s new film version of *Pinocchio*, for example, released in the United States in December of 2002, extends a long line of comic genius. The commedia dell’arte, Goldoni’s comedy of manners, and the political farce of Nobel Prize winner Dario Fo provide further examples of a comic tradition that continues to be a vital force of aesthetic pleasure and political comment. Requirements include attendance at mandatory film screenings, participation in class discussions, a number of short papers, and midterm and final exams. The class will be conducted in English.

**LLRO 41545. Italian National Cinema Lab**

(3-1-4)

*Corequisite:* LLRO 40545

Conducted in English, this is the lab component of the course that examines the concept and reality of “national cinema” in the Italian case. A history of one of the world’s most renowned national cinemas focusing on the construction of national identity in film.

**LLRO 41548. Italian Cinema: Realities Lab**

(2-0-0)

*Corequisite:* LLRO 40548

This is the lab component of the course that explores the construction and development of the Italian cinematic realist tradition from the silent era to the early 1970s, although its primary focus is on the period 1934–66, which stretches from the appearance of Blasetti’s openly fascist “historical” reconstruction *La vecchia guardia*, to Pasolini’s “eccentric” exercise in Left-wing commitment *Uccellacci e uccellini*, with its mix of expressionist and hyper-realist techniques. At the centre of this period are found some of Italy’s most highly regarded films made by directors, such as Vittorio DeSica, Roberto Rossellini, and Luchino Visconti, who belonged to the neo-realist movement (1945–53). These filmmakers rejected escapist cinema and tried to make films that examined the contemporary experiences of ordinary Italians. As well as analyzing the films in themselves, the course examines the formal and ideological continuities and differences between neo-realist films and their silent and fascist predecessors. In a similar way, it analyses neo-realism’s impact on later filmmakers such as Federico Fellini, Pietro Germi, Pier Paolo Pasolini, Gillo Pontecorvo, Dino Risi, and Francesco Rosi, who attempted to develop new versions of cinematic realism. Finally, the course aims to locate the films in their historical and cultural contexts and to address theoretical issues arising from the concept of realism.

**French****ROFR 10101. Beginning French I**

(4-0-4)

An appreciation for French culture is also encouraged through readings and discussions. This course is to be followed by ROFR 10102.

**ROFR 10102. Beginning French II**

(4-0-4)

*Prerequisite:* (ROFR 10101 OR ROFR 101) OR CEFR FOR MIN. SCORE OF 231 OR CEFR FOR MIN. SCORE OF 231

The second-semester course of the beginning French sequence. We will focus on a balanced approach to acquisition and appreciation of French language and culture.

**ROFR 10115. Intensive Beginning French**

(6-0-6)

This course covers the material of ROFR 10101 and 10102 in one semester, with classes five days per week. Equal emphasis is placed on spoken and written French. ROFR 10115 counts as two courses, and is designed for more highly motivated students. It is to be followed by ROFR 20201 or ROFR 20215.

**ROFR 20201. Intermediate French I**

(3-0-3)

*Prerequisite:* ((ROFR 10102 OR ROFR 102 OR ROFR 102A) OR (ROFR 10115 OR ROFR 111F OR ROFR 112F OR ROFR 115)) OR CEFR FOR MIN. SCORE OF 301 OR ROFR 10115

ROFR 20201 course fulfills the language requirement. This is a third-semester, second-year language sequence, with equal focus on oral and written production. It includes a review of basic grammar and then transitions into more difficult features of French. Students learn to discuss and write about French cultural topics, current events, and literary texts. This course is to be followed by ROFR 20202 or ROFR 20215.

**ROFR 20202. Intermediate French II**

(3-0-3) Escoda-Risto

*Prerequisite:* (ROFR 20201 OR ROFR 103 OR ROFR 201F) OR CEFR FOR MIN. SCORE OF 351

A fourth-semester college language course. Includes review and expansion of basic grammatical structures, extensive practice in speaking and writing, and readings and discussions of a variety of literary and nonliterary text of appropriate difficulty.

### ROFR 20215. Intensive Intermediate French

(6-0-6) McDowell

*Prerequisite:* (ROFR 10102 OR ROFR 102 OR ROFR 102A) OR (ROFR 10115 OR ROFR 115F OR ROFR 111F OR ROFR 112F OR ROFR 115) OR CEFR FOR MIN. SCORE OF 301 OR (ROFR 10115)

A two-semester sequence of intensive, comprehensive training in the language skills necessary for residence and study in France. Includes review of grammar, readings, civilization, and specific orientation for international study. For students with two to three years of high school French (with satisfactory achievement) preparing for the Angers international study program.

### ROFR 20220. Intermediate Grammar Review

(3-0-3)

*Prerequisite:* (ROFR 20201 OR ROFR 103 OR ROFR 201F) OR (ROFR 20215 OR ROFR 115F OR ROFR 215F)

This one-semester comprehensive review of French grammar is intended for students with intermediate proficiency in the four language skills. In addition to the formal grammar review, there will be a close reading of two novels.

### ROFR 20300. Conversational French

(3-0-3) Escoda-Risto

*Prerequisite:* (ROFR 20202 OR ROFR 202 OR ROFR 202F) OR (ROFR 20215 OR ROFR 201 OR ROFR 215) OR CEFR FOR MIN. SCORE OF 401

This course is designed to further develop the student's conversational skills and grasp of a wide variety of styles and registers in French. Spoken French will be practiced through various types of classroom activities and assignments. Emphasis will be on topics of current interest.

### ROFR 20305. French Through Acting

(3-0-3) McDowell

*Prerequisite:* (ROFR 20202 OR ROFR 201 OR ROFR 202 OR ROFR 202F)

A nontraditional approach to conversational French that asks students to create scenes for a weekly soap opera centered on a large cast of student-created characters who live together in an apartment building in France. Scenes are performed in class for workshop on phonetics, gestures, and choice of idioms. Not intended for international study returnees.

### ROFR 20450. French for Business

(3-0-3) Menyard

In this course, students investigate the particularities of the Francophone business world, in order to acquire cultural and linguistic tools enabling them to establish links within it. For business students, this would fulfill a requisite in the International Business Program.

### ROFR 21205. Angers: Atelier

(1.5-0-1.5)

A mini-course that prepares students accepted for study abroad in Notre Dame's program in Angers, France. Students are prepared for various cultural and day-to-day challenges that await them in Angers. Course begins the week after spring break.

### ROFR 21206. Post-Study Abroad

(1.5-0-0)

A mini-course for students returning from study abroad in Notre Dame's program in Angers, France.

### ROFR 27500. Approaches to French and Francophone Cultures: Topics Vary

(3-0-3)

*Prerequisite:* ((ROFR 20202 OR ROFR 201 OR ROFR 202 OR ROFR 202F) OR (ROFR 20215 OR ROFR 215)) OR CEFR FOR MIN. SCORE OF 401

This content-driven course is intended for students who want to broaden their knowledge of the French language and related cultures, as well as improve both their understanding of the French and Francophone world and their communication skills in the French language. Recent topics taught are Facets of French: France and the French; French Civilization and Culture; and Tahiti.

### ROFR 30310. Textual Analysis: The Art of Interpretation

(3-0-3)

*Prerequisite:* ROFR 27500 OR ROFR 270 OR ROFR 260

Introduction to French techniques of formal analysis of literary texts through detailed study of content and form. Application to prose, poetry, and theater. Includes significant written and oral component. Required of all majors. ROFR 30310 should be completed by the end of junior year.

### ROFR 30320. Advanced Grammar and Writing

(3-0-3)

*Prerequisite:* CEFR FOR MIN. SCORE OF 501

This advanced-level course, taught in French, is designed for students, including those returning from abroad, who wish to improve their speaking and writing skills and for students already in the 30000–40000 sequence who seek additional assistance with writing skills and grammar.

### ROFR 30510. On Stage and Screen: French Theater and Film from 1900–67

(3-0-3) Toumayan

This course will examine the parallel and related evolutions of theater and film from the beginning of the 20th century to the eve of May 1968. We will study the principal playwrights and filmmakers, works, and movements as well as the manner in which these works both expressed and influenced the dominant ideological trends and aesthetic movements of the first two-thirds of the century. Texts by Anouilh, Artaud, Beckett, Camus, Claudel, Cocteau, Giraudoux, Ionesco, and Sartre. Films (or excerpts of films) by Carne, Cocteau, Godard, Marker, Resnais, and Renoir. Conducted in French. *Prerequisites:* by placement, 20xxx-level French course or equivalent, or by permission. Requirements: one oral presentation, two papers, final examination.

### ROFR 30602. Deciphering France on the Front Page

(3-0-3) Morel

The year 2007 will change the course of French history. With presidential and legislative elections taking place in the spring, France will be on the front page not only of French newspapers, but also of publications around the world. This context will provide an opportunity to examine the various aspects of a current situation of crisis that has been highlighted often over the past months.

### ROFR 30710. Survey of French Literature and Culture I

(3-0-3) Boulton

*Prerequisite:* (ROFR 27500 OR ROFR 270 OR ROFR 260)

Reading of selections and complete works of outstanding French authors from major genres from the Middle Ages through the 17th century and periods. All majors are required to take this sequence, or equivalent advanced courses. Students are expected to have already taken ROFR 30310 or to take ROFR 30310 concurrently with the first survey taken.

### ROFR 30720. Survey of French Literature and Culture II

(3-0-3)

*Prerequisite:* (ROFR 27500 OR ROFR 260 OR ROFR 270)

Reading of selections and complete works of outstanding French authors from major genres and periods. All majors are required to take this sequence, or equivalent advanced courses. Students are expected to have already taken 30310 or to take ROFR 30310 concurrently with the first survey taken.

### ROFR 37000. Special Studies

(V-0-V)

*Prerequisite:* Junior standing, dean's list.

### ROFR 40100. Introduction to Old French and Anglo-Norman

(3-0-3) Boulton

This course is designed to be an introduction to the language and dialects of medieval France, including Anglo-Norman. Readings will include texts written between the 12th and the 14th centuries, such as the *Lais* of Marie de France, *trouverè* poetry, the prose *Lancelot*, Machaut, and Froissart.

**ROFR 40110. From Roland to the Holy Grail**

(3-0-3) Boulton

This is a survey of medieval French literature from 1100 to 1300, including the epic, the romance, drama, and poetry.

**ROFR 40220. Life, Love, and Literature: Renaissance and the City of Lyons**

(3-0-3) DellaNeva

This course focuses on the city of Lyons, the cultural center of the French Renaissance. Literary works include extensive readings from the city's major poets, Scève, Du Guillet, and Labé, as well as excerpts from the works of Rabelais, Marot, and Du Bellay. Cultural topics include the role of women in Lyonnais society, art, music, royal pageantry, banking, printing, and the presence of Italians in Lyons.

**ROFR 40221. Love Poetry of the Renaissance**

(3-0-3) DellaNeva

*Prerequisite:* ROFR 30310

This is an in-depth study of the love poetry of Scève, DuBellay, Ronsard, and their contemporaries.

**ROFR 40230. *La Femme a la Renaissance***

(3-0-3) DellaNeva

This course will consider the image of women in the works of Renaissance male writers as well as the literary production of women in Renaissance France. Authors to be discussed include Jeanne Flore, Hélisene de Crennes, Marguerite de Navarre, Louise Labé, and Pernette Du Guillet. Taught in French.

**ROFR 40250. Topics in French Renaissance Literature**

(3-0-3) DellaNeva

This is an in-depth study of a particular theme, author, or genre in Renaissance literature.

**ROFR 40300. Reading Versailles**

(3-0-3) MacKenzie

The political, social, and artistic phenomena resumed in the word Versailles, approached from a number of perspectives: historical, architectural, mythological, and in literature.

**ROFR 40340. Seventeenth-Century French Theater**

(3-0-3) MacKenzie

A study of major works by Corneille, Racine, and Molière.

**ROFR 40410. *l'utopie et la dystopie au 18 e siècle***

(3-0-3) Douthwaite

This course treats the topic of utopian literature and its dark alter ego, the dystopian world of *roman noir* and Gothic fiction from the Enlightenment and Revolutionary era in France. With a base in stylistics and genre studies, this course embraces an interdisciplinary approach.

**ROFR 40590. Global France: Fifty Years of Film as Text**

(3-0-3) Rice

This course will focus on cinematographic production in French and other Francophone areas (in Africa and the Caribbean) over the last 50 years. Students will acquire a vocabulary for film analysis by reading critical articles and analyses in French and will also examine the literary inspirations behind the films.

**ROFR 40610. Nineteenth-Century French Literature**

(3-0-3) Toumayan

Lectures and extensive readings on and from French literature of the various schools and genres of the 19th century.

**ROFR 40635. Nineteenth-Century Short Story**

(3-0-3) Toumayan

This course will focus on the development of the genre of short narrative during the 19th-century in France. Representative works of Balzac, Nerval, Barbey d'Aureville, Flaubert, Gautier, Mérimée, Maupassant, Nodier, and Villiers de l'Isle Adam will be considered. We will examine distinctive features of the various aesthetics of Romanticism, realism, and symbolism as well as generic considerations relating to the *conte fantastique*. Course requirements: one oral presentation, two papers of moderate length, and a final exam.

**ROFR 40718. Humanism and Responsibility**

(3-0-3) Toumayan

An interdisciplinary investigation of the idea of the responsibility of both individuals and sovereign states to respond to social injustice, political persecution or conflict, natural disasters, and humanitarian crises.

**ROFR 40732. Politics of Fiction, Fictions of Politics**

(3-0-3) Morel

This course will examine a variety of French literary works from the 19th and 20th centuries that portray aspects of revolt, engagement, and resistance. From Victor Hugo to Simone de Beauvoir, from Jacques Derrida to Amélie Nothomb, readings will focus on the interactions of politics and literature.

**ROFR 40805. French Travelers to North Africa**

(3-0-3) Perry

This course explores works by French writers and artists who visited or resided in the North African countries of Morocco and Algeria from the early 19th through the late 20th centuries. We examine a variety of works, including diaries, letters, paintings, travel narratives, short stories, novels, and studies on Orientalism and Islamic culture.

**ROFR 40830. Francophone Picaresque**

(3-0-3) Rice

This course will focus on Francophone novels that depict movement, particularly in the form of travel. We will read in chronological order works by writers from the Caribbean, Sub-Saharan Africa, and the Maghreb in an examination of the ways in which movement to and from (as well as within) the country of origin is addressed over time. A recurring theme will be the "return" to the country of origin after a stay in the French metropole.

**ROFR 40835. Contemporary French and Francophone Fiction**

(3-0-3) Perry

What are some of the main areas of concern to us in our world today? This course will offer a means to explore and reflect on contemporary issues such as exile, immigration, postcolonialism, East-West encounters, the war in Iraq, Islamic extremism and terrorism, psychopathic crime, and the critique of French cultural values through the most recent fiction by French and Francophone writers such as Tahar Ben Jelloun (*Partir*, 2006), Chahdortt Djavann (*Comment peut-on être français?*, 2006), Yasmina Khadra (*Les Sirenes de Bagdad*, 2006), J.-M. G. Le Clézio (*Ouranias*, 2006), Andréï Makine (*L'Amour humain*, 2006), Alain Mabanckou (*Mémoires de porc-épic*, 2006), and Amélie Nothomb (*Journal d'Hirondelle*, 2006). Class taught in French.

**ROFR 40836. Women's Voices in Twentieth- and Twenty-First Century French Prose**

(3-0-3) Perry

This course examines the gendered notions of "voice" and "silence" in the narrative prose of French and Francophone women authors of the 20th to 21st centuries. Works by Anna de Noailles, Gerard d'Houville (Marie de Regnier), Colette, Simone de Beauvoir, Anne Herbert, Marguerite Duras, Nicole Brossard, Sylvie Germain, and Amélie Nothomb, and essays in French feminist criticism.

**ROFR 40905. Literature and Opera**

(3-0-3) MacKenzie

This course will examine a certain number of important French literary texts and the operas they engendered.

**ROFR 40906. French Literature Goes to the Opera**

(3-0-3) MacKenzie

In this course, the full title of which is "Taking Liberties: From Book to Libretto, or French Literature Goes to the Opera," we will be looking at a series of "parent" texts, written originally in French, and their operatic "offspring." Works will include *The Barber of Seville* (Beaumarchais/Rossini); *The Marriage of Figaro* (Beaumarchais/Mozart); *Don Juan* (Molière) and *Don Giovanni* (Mozart); *Manon Lescaut* (Prévost/Puccini); and *Carmen* (Mérimée/Bizet).

**ROFR 40950. Existentialism**

(3-0-3)

This course will examine the elaboration of the humanist doctrines of Camus, Malraux, and Sartre.

**ROFR 41590. French Theatre Production**

(1-0-1)

In this course, we work on a French play throughout the fall semester, which is produced the second week of the spring semester. The first six weeks of the course is dedicated to a workshop on Molière's theater. Students register after auditions on the first class day.

**ROFR 46000. Directed Readings**

(V-0-V)

Specialized reading related to the student's area of study.

**ROFR 47000. Special Studies**

(3-0-3)

*Prerequisite:* Senior standing, dean's list.

**ROFR 48000. Senior Thesis**

(3-0-3)

This course may cover an in-depth study of a particular author, theme, genre, or century. In addition to primary texts, some critical material will be required reading. This course culminates in a substantial research paper.

**ROFR 53000. Senior Seminar**

(3-0-3)

An in-depth study of a particular author, theme, genre, or century. Senior seminar courses may be offered anywhere in the course number range of ROFR 53000 to 53999.

**Italian****ROIT 10101. Beginning Italian I**

(4-0-4)

This is an introductory, first-year language sequence with equal focus on the four skills: speaking, listening, reading, and writing. An appreciation for Italian culture is also encouraged through readings and class discussion. The sequence 10101-10102 is to be followed by ROIT 20201 or ROIT 20215.

**ROIT 10102. Beginning Italian II**

(4-0-4)

*Prerequisite:* (ROIT 10101 OR ROIT 14101 OR ROIT 101)

This is an introductory, first-year language sequence with equal focus on the four skills: speaking, listening, reading, and writing. An appreciation for Italian culture is also encouraged through readings and class discussion. The sequence 10101-10102 is to be followed by ROIT 20201 or ROIT 20215.

**ROIT 10105. Beginning Italian for Architects I**

(3-0-3) Lenzi-Sandusky

An introduction to Italian similar to 10101-10102, but with a greater emphasis on practical information necessary for architects planning an international study experience.

**ROIT 10106. Beginning Italian for Architects II**

(3-0-3) Lenzi-Sandusky

*Prerequisite:* (ROIT 10105 OR ROIT 105)

An introduction to Italian similar to 10101-10102, but with a greater emphasis on practical information necessary for architects planning an international study experience.

**ROIT 10115. Intensive Beginning Italian for Study Abroad**

(6-0-6)

This course covers the material of ROIT 10101 and 10102 in one semester with classes five days per week. Equal emphasis is placed on spoken and written Italian. ROIT 10115 counts as two courses and may be taken in conjunction with ROIT 20201 or ROIT 20215 to fulfill the language requirement. This course is designed for highly motivated students and is especially useful for those planning to study abroad.

**ROIT 20201. Intermediate Italian I**

(3-0-3)

*Prerequisite:* (ROIT 10102 OR ROIT 102) OR (ROIT 10106 OR ROIT 106) OR (ROIT 10115 OR ROIT 115 OR ROIT 115F)

ROIT 20201 fulfills the language requirement. This is an intermediate, second-year language course with equal focus on oral and written production. The course includes a review of basic grammar and then transitions into more difficult features of Italian. Students learn to discuss and write about Italian cultural topics, current events, and literary texts.

**ROIT 20202. Intermediate Italian II: Italian Writing and Culture**

(3-0-3)

*Prerequisite:* (ROIT 20201 OR ROIT 201)

This fourth-semester course is designed to explore various aspects of Italian culture while consolidating language skills, introducing more advanced grammar and idioms, and providing experience in speaking and writing. 20202 courses (listed under ROIT 27500) are designed as a bridge to 30000-level courses for students who have completed ROIT 20201 and for students preparing to study in Italy.

**ROIT 20215. Intensive Intermediate Italian**

(6-0-6)

*Prerequisite:* (ROIT 10115 OR ROIT 115 OR ROIT 115F) OR (ROIT 10102 OR ROIT 102)

This course is an accelerated language and culture course combining the study of more complex language structures, communication tasks, and cultural concepts in a stimulating daily classroom environment. If you have completed ROIT 10115 or ROIT 10102 successfully and are ready for a challenge, this course may be the perfect continuation for you. It completes the language requirement and is also recommended for students who wish to advance their linguistic preparation significantly before going to study in Italy. This course counts as two courses and covers material of ROIT 20201 and ROIT 20202 in one semester.

**ROIT 21205. Pre-Study Abroad**

(1.5-0-1.5)

A mini-course that prepares students accepted for study abroad in Notre Dame's programs in Italy. Students are prepared for various cultural and day-to-day challenges that await them in Italy. Course begins the week after spring break

**ROIT 27500. Intermediate Italian II : Cinema and Culture**

(3-0-3)

*Prerequisite:* (ROIT 20201 OR ROIT 201) OR (ROIT 20215 OR ROIT 215)

An advanced, fourth-semester, content-driven language course designed to further the student's conversational skills as well as grasp of a wide variety of styles and registers in Italian. Spoken and written Italian will be practiced through various classroom activities and assignments. Readings include a wide array of literary and nonliterary texts (newspapers and magazines, short fiction, and so on). Each course focuses on a different aspect of Italian culture. Recent topics include art and culture, Italian mass media, media and culture, attitude: Italian style, and Italian society today.

**ROIT 30200. Renaissance Italy**

(3-0-3)

*Corequisite:* HIST 32500

This course examines the political, cultural, social, and religious history of Italy from about 1350 to 1550. Starting with an extended study of Florence, its economic foundations, social and political structures, artistic monuments, and key personalities, the course then examines how the culture of the Florentine Renaissance spread to the rest of Italy, especially to the papal court of Rome and the princely courts of northern Italy, and, finally, to the new nation-states of northern Europe. Key topics will include the growth of the Italian city-state; the appearance of new, Renaissance “characters” (the merchant, the prince, the courtier, the mercenary, the learned lady, the self-made man); Renaissance humanism and the Classical revival; the relationship between art and politics; and Renaissance ideas of liberty, virtue, historical change, and the individual’s relationship to God. The course will not tell a story of steady progress from medieval to modern institutions, societies, and modes of thinking; rather, we will consider the Renaissance as a period in flux, in which established traditions thrived alongside creative innovations and vigorous challenges to authority. Students will write one long paper and take a midterm and a final exam.

### ROIT 30310. Textual Analysis and Advanced Grammar

(3-0-3) Sbordoni

This is a fifth-semester advanced grammar review and introduction to the critical analysis of Italian literary texts. It is recommended that this class be taken before ROIT 30711 or 30721 (formerly ROIT 371 and 372).

### ROIT 30610. Rome: A Journey in Art and History

(3-0-3)

This class is an exploration of the history and culture of Rome from late medieval times through the 20th century, with an emphasis on art and architecture.

### ROIT 30711. Medieval-Renaissance Italian Literature and Culture

(3-0-3) Moevs

*Prerequisite:* (ROIT 202 OR ROIT 215 OR ROIT 20215) OR (ROIT 27500 OR ROIT 202E OR ROIT 20505 OR ROIT 235)

An introduction to the close reading and textual analysis of representative texts from the Duecento through the Renaissance, including Lentini, Guinizzelli, Cavalcanti, Dante, Petrarch, Boccaccio, Poliziano, Machiavelli, and Ariosto. We will trace the profile of Italian literary history in this period, setting the texts in their cultural and historical context (including music, art, and architecture), with attention to the changing understanding of human nature and the physical world in these centuries. Requirements include class participation, short essays, a midterm, and a final. Taught in Italian. Required for majors and supplementary majors.

### ROIT 30721. Modern Italian Literature and Culture

(3-0-3) Cachey

This course introduces students to major writers and literary movements in 18th-, 19th-, and 20th-century Italy, including Goldoni, Leopardi, Foscolo, Manzoni, Verga, Pirandello, and many others. Taught in Italian. Required for majors and supplementary majors.

### ROIT 30830. High Renaissance and Mannerist Art

(3-0-3)

Leonardo, Michelangelo, Bramante, and Raphael provide the basis of study of one of the most impressive periods of artistic activity in Italy, the High Renaissance in Rome and Florence. The course also investigates the origins of mannerism in the excessive achievements of Jacopo Pontormo, Rosso Fiorentino, and the succeeding generation of late-Renaissance *maniera* artists who helped to formulate a new courtly style.

### ROIT 37000. Special Studies

(3-0-3)

*Prerequisite:* Junior standing, dean’s list.

### ROIT 40115. Dante I

(3-0-3) Sbordoni

Dante I and Dante II are an in-depth study, over two semesters, of the entire *Comedy*, in its historical, philosophical and literary context, with selected readings

from the minor works (e.g., *Vita Nuova*, *Convivio*, and *De vulgari eloquentia*). Dante I focuses on the *Inferno* and the minor works; Dante II focuses on the *Purgatorio* and *Paradiso*. Lectures and discussion in English; the text will be read in the original with facing-page translation. Students may take one semester or both, in either order.

### ROIT 40116. Dante II

(3-0-3) Moevs

Dante I and Dante II are an in-depth study, over two semesters, of the entire *Comedy*, in its historical, philosophical and literary context, with selected readings from the minor works (e.g., *Vita Nuova*, *Convivio*, and *De vulgari eloquentia*). Dante I focuses on the *Inferno* and the minor works; Dante II focuses on the *Purgatorio* and *Paradiso*. Lectures and discussion in English; the text will be read in the original with facing-page translation. Students may take one semester or both, in either order.

### ROIT 40117. Boccaccio

(3-0-3)

A textual analysis of the *Decameron*, with emphasis on structure and themes. Different critical approaches will be used in the analysis of individual tales, their relationships to the frames, and their reflection on Boccaccio’s society.

### ROIT 40215. Petrarch: The Soul’s Fragments

(3-0-3)

The course will explore fundamental themes in Petrarch’s writings in Latin, especially the *Secretum* and the epistles, and in the *Triumphs* and the *Canzoniere*. Contemporary critical approaches will be employed in the analysis of the *Canzoniere*.

### ROIT 40230. La letteratura di viaggio: Storia e Critica

(3-0-3)

This course examines major Renaissance Italian narratives of the Age of Discovery. It concentrates on the theoretical and practical problems involved in attempting to read historical texts as “literary artifacts.”

### ROIT 40231. Machiavelli and Guicciardini

(3-0-3)

This course will compare and contrast major works of these Classical Italian Renaissance authors.

### ROIT 40505. Italian National Cinema

(3-0-3) Welle

Conducted in English, this course examines the concept and reality of “national cinema” in the Italian case. A history of one of the world’s most renowned national cinemas focusing on the construction of national identity in film.

### ROIT 40508. Cinema e Letteratura

(3-0-3)

*Corequisite:* ROIT 41508

Conducted in Italian, this course analyzes Italian films and literary works in studying points of intersection and divergence between film and literature.

### ROIT 40512. Comedy, Italian Style!

(3-0-3)

*Corequisite:* ROIT 41512

An exploration of comic traditions in Italy: the popular film genre known as “comedy, Italian style” is analyzed in its historical development in the 1950s and ’60s, together with Italian film comedies from the silent period through the present. Roberto Benigni’s new film version of *Pinocchio*, for example, released in the United States in December of 2002, extends a long line of comic genius. The commedia dell’arte, Goldoni’s comedy of manners, and the political farce of Nobel Prize winner Dario Fo provide further examples of a comic tradition that continues to be a vital force of aesthetic pleasure and political comment. Requirements include attendance at mandatory film screenings, participation in class discussions, a number of short papers, and midterm and final exams. The class will be conducted in English.

**ROIT 40520. *Cinema e autori: Pasolini***

(3-0-3)

This course presents one of Italy's greatest 20th-century humanists. Pier Paolo Pasolini was a poet, novelist, critic, and filmmaker whose works are among the most well-known and highly debated of the last century. We will read and discuss a selection of his texts and analyze his use of literary adaptation and autobiographical reference film. Students will gain an idea of Pasolini's place within the larger context of Italian filmmaking in the '60s and '70s, and we will consider his interactions with other auteur filmmakers such as Fellini and Bertolucci. Assignments include film viewings, short papers and presentations, and a final exam.

**ROIT 40530. *Commedia all'italiana***

(3-0-3) Welle

Taught in Italian, this course explores Italian comic traditions in drama, literature, and film in relation to history, politics, and society from the 18th century until today. Authors, directors and performers include Goldoni, Collodi, Marinetti, Pirandello, Fellini, Torò, Calvino, Wertmuller, Fo, and Benigni.

**ROIT 40548. Italian Cinema: Realities of History**

(3-0-3)

This course explores the construction and development of the Italian cinematic realist tradition from the silent era to the early 1970s, although its primary focus is on the period 1934–66, which stretches from the appearance of Blasetti's openly fascist "historical" reconstruction *La vecchia guardia* to Pasolini's eccentric exercise in left-wing commitment *Uccellacci e uccellini* with its mix of expressionist and hyper-realist techniques. At the centre of this period are found some of Italy's most highly regarded films made by directors such as Vittorio DeSica, Roberto Rossellini, and Luchino Visconti, who belonged to the neo-realist movement (1945–53). These filmmakers rejected escapist cinema and tried to make films that examined the contemporary experiences of ordinary Italians. As well as analyzing the films in themselves, the course examines the formal and ideological continuities and differences between neo-realist films and their silent and fascist predecessors. In a similar way, it analyzes neo-realism's impact on later filmmakers, such as Federico Fellini, Pietro Germi, Pier Paolo Pasolini, Gillo Pontecorvo, Dino Risi, and Francesco Rosi, who attempted to develop new versions of cinematic realism. Finally, the course aims to locate the films in their historical and cultural contexts and to address theoretical issues arising from the concept of "realism."

**ROIT 40610. Pirandello**

(3-0-3)

The literary, theatrical, and cinematic works of Luigi Pirandello within the context of Italian culture and society between the 1880s and the 1930s, and as an integral force of Italian and European modernism.

**ROIT 40650. Modern Italian Fiction**

(3-0-3)

Major works of Italian fiction from the 19th century until the present are analyzed in relation to Italian society and culture within the contexts of European history and literary movements.

**ROIT 40655. Italy in Modern Europe**

(3-0-3)

The course will treat the cultural, literary, artistic, and political relationships between Italy and the rest of Europe in the modern period (since the Renaissance). Central concerns will be the presence and influence of masterpieces of Italian literature both in translation and in the original Italian in other European countries, and the image of Italy (and in particular of Rome) in the religious polemics (Catholic/Protestant) of modern Europe.

**ROIT 40720. The Italian Lyric**

(3-0-3)

An in-depth textual analysis of selected lyric masterpieces from the breadth of the Italian tradition, from Cavalcanti to Montale. Taught in Italian.

**ROIT 40740. *Teatro del novecento***

(3-0-3)

An exploration of the rich tradition of theatre, drama, and spectacle in modern Italian culture. Topics include: the verismo theatrical tradition of Giovanni Verga, Nino Martoglio, and Salvatore Di Giacomo; the Mediterranean tragedies of Gabriele d'Annunzio and the aesthetic and political implications of his poetics of spectacle; Futurist theatre and the European avant-garde; AND Pirandello's theatrical art and European modernism(s). In the second half of the 20th century, figures include Ugo Betti, Edoardo De Filippo, Pier Paolo Pasolini, Natalia Ginzburg, Dario Fo, and Dacia Maraini. The variety theatre, the dialect theatre, and the relationship between theatre and cinema will also be examined. Class requirements include thorough preparation of dramatic texts and critical materials, attendance at a number of film screenings outside of class, a number of brief papers and oral presentations, a midterm, and a final exam. The class will be conducted in Italian.

**ROIT 40802. Italian Dialect Literature**

(3-0-3)

In this course, we will discuss aspects of Italy's literary tradition in dialect across time, space, and genres. Following a brief introduction to Italy's dialect varieties, we will consider some major poets who wrote in Milanese, Roman, and Neapolitan dialect. We will also address the plurilingual theatrical tradition in dialect, centered primarily on Naples and Venice. Against the backdrop of Italy's sociolinguistic panorama in the last two decades, we will analyze the nature and function of dialects in the present revival of poetic dialects as well as in Italian narrative prose.

**ROIT 40810. Topics in Medieval Art**

(3-0-3)

The topic and format of this course will vary from year to year.

**ROIT 40820. Topics in Renaissance Art: Painting and Sculpture in Central Italy after the Death of Raphael**

(3-0-3) Coleman

Topics course on special areas of Renaissance art.

**ROIT 40825. Fifteenth-Century Italian Art**

(3-0-3) Rosenberg

This course investigates the century most fully identified with the Early Renaissance in Italy. Individual works by artists such as Brunelleschi, Donatello, Ghiberti, Botticelli, and Alberti are set into their social, political, and religious context. Special attention is paid to topics such as the origins of art theory, art and audience, Medician patronage, and art for the Renaissance courts of northern Italy and Naples.

**ROIT 40828. Seminar: Venetian and Northern Italian Art**

(3-0-3)

This course focuses on significant artistic developments of the 16th century in Venice, with brief excursions into Lombardy and Piedmont. Giorgione, Titian, and Palladio, the formulators of the High Renaissance style in Venice, and subsequent artists such as Tintoretto and Veronese are examined. An investigation of the art produced in important provincial and urban centers such as Brescia, Cremona, Milan, Parma, Varallo, and Vercelli also provide insight into the unique traditions of the local schools and their patronage.

**ROIT 40908. Italian Women Writers**

(3-0-3)

This course is taught in English and explores the role of women writers in the Italian literary canon across the centuries. Particular emphasis will be given to 20th-century women writers and the ways in which their works reflect specific social and cultural environments. Texts include poetry, prose, and drama, and films, and discussions will include topics such as motherhood, female subjectivity, fascism, and feminism.

**ROIT 40920. Alfieri, Foscolo, and Leopardi**

(3-0-3)

A study of selected works from the three greatest poets of the neoclassical and Romantic period, with particular attention paid to the tension and fusion in their

thoughts between Enlightenment and Romantic conceptions of self, humanity, and nature.

**ROIT 40921. Ariosto e Calvino UN IDEA DI LETTERATURA**  
(3-0-3)

This course examines Lodovico Ariosto's "*Orlando Furioso*" in the light of Italo Calvino's reading of the poem and the recent "Calvinian" reading of the poem by one of Italy's leading philologist-critics, Corrado Bologna (*La macchina del Furioso*). This course will begin with a reading of Calvino's "Six Memos for the Next Millennium" and then move on to a reading of *Furioso*.

**ROIT 40935. Italian Short Story**  
(3-0-3)

Taught in Italian, this course treats the historical development of the short prose narrative in Italian literature. Beginning with the folktale, and moving into selected *novelle* by such medieval and Renaissance writers as Boccaccio, Bandello, Firenzuola, and Machiavelli, the course also includes modern and contemporary contributors to the genre, including Verga, D'Annunzio, Pirandello, Moravia, Gozzano, Tozzi, Deledda, Serao, Maraini, Calvino, and Ginzburg. Students will be required to write a number of brief papers, give brief oral presentations, and participate in class discussions. There will be a midterm and a final exam.

**ROIT 40950. Manzoni**  
(3-0-3)

A close reading of the *Promessi Sposi* in its historical and cultural context, with special attention given to its artistic and social aims as a novel at once historical, political, and self-consciously Catholic.

**ROIT 41505. Italian National Cinema Lab**  
(0-0-0)

This is the lab component of the course ROIT 40505.

**ROIT 41508. Italian Cinema: Realities Lab**  
(0-0-0)

This is the lab component of the course ROIT 40508.

**ROIT 41512. Comedy, Italian Style Lab**  
(0-0-0)

This is the lab component of the course ROIT 40512.

**ROIT 41548. Italian Cinema: Realities of History Lab**  
(0-0-0)

*Corequisite:* ROIT 40548

This is the lab component for the course ROIT 40548.

**ROIT 41590. Italian Theatre Workshop**  
(2-0-2)

A full-immersion language experience for the study, practice, production, and performance of authentic Italian texts. Includes analytical and writing components.

**ROIT 42115. Dante I LAC Discussion Group**  
(1-0-1)

The aim of this discussion group is to help students extend their language learning experiences in Italian to their primary interests in a particular discipline, fostering their ability to use Italian for further study and research. This LAC discussion group also seeks to prepare students to develop a more global perspective of a multilingual and cross-cultural world.

**ROIT 42116. Dante II LAC Discussion Group**  
(1-0-1)

The aim of this discussion group is to help students extend their language learning experiences in Italian to their primary interests in a particular discipline, fostering their ability to use Italian for further study and research. This LAC discussion group also seeks to prepare students to develop a more global perspective of a multilingual and cross-cultural world. Students of the Italian language are eligible to sign up for an additional single-credit discussion section as part of the Languages across the Curriculum (LAC) initiative in the College of Arts and

Letters. Choosing this option means that students will read a canto per week of the *Comedy* in Italian and meet once a week with a section leader who will guide a discussion in Italian and grade some brief writing assignments. The LAC discussion section in Italian associated with this course will be graded on a pass-fail basis and credited to the student's transcript. Up to three LAC discussion credits can be applied toward a major, secondary major, or minor in Italian.

**ROIT 47000. Special Studies**  
(V-0-V)

*Prerequisites:* Senior standing, dean's list.

**ROIT 53000. Italian Seminar**  
(3-0-3)

An in-depth study of a particular author, theme, genre, or century. In addition to treating the primary texts, some critical material will be required reading. This course culminates in a substantial research paper. The Italian seminar courses are numbered in the range ROIT 53000 to 53999.

**ROIT 53609. Senior Seminar**  
(3-0-3) Welle

An in-depth study of a particular author, theme, genre, or century. In addition to treating the primary texts, some critical material will be required reading. This course culminates in a substantial research paper. The Italian seminar courses are numbered in the range ROIT 53000 to 53999.

**ROIT 58000. Honors Thesis**  
(3-0-3)

This course may cover an in-depth study of a particular author, theme, genre, or century. In addition to primary texts, some critical material will be required reading. This course culminates in a substantial research paper.

**Portuguese**

**ROPO 10103. Brazilian Portuguese Language and Culture I**  
(4-0-4) Teixeira

This course sequence provides a solid foundation in the Portuguese language and introduces students to contemporary Brazilian culture through film, music, news media, and Internet resources. Designed for students with no previous knowledge of Portuguese, this sequence offers equal emphasis on speaking, listening, reading, and writing. ROPO 10103\_10104 uses a situational approach that privileges active communication in context. The sequence is followed by ROPO 20201 or ROPO 20202. ROPO 10103\_10104 and either ROPO 20201 or ROPO 20202 together fulfill the language requirement.

**ROPO 10104. Beginning Portuguese II**  
(4-0-4) Teixeira

This is an introductory, first-year language sequence with equal focus on speaking, listening, reading, and writing. An appreciation for the diverse cultures of the Portuguese-speaking world is also encouraged through readings, music, videos, and class discussion.

**ROPO 10105. Portuguese for Spanish Speakers I**  
(3-0-3) Teixeira

This course sequence is designed for students with at least intermediate-level proficiency in Spanish. Classroom activities emphasize the acquisition of basic language structures, vocabulary, and sound systems, as well as the active use of spoken language in context. Students are introduced to the diverse cultures of the Portuguese-speaking countries through current video, printed media, music, and short fiction. This sequence is followed by ROPO 20201 or ROPO 20202. ROPO 10105-10106 and either ROPO 20201 or ROPO 20202 together fulfill the language requirement.

**ROPO 10106. Portuguese for Spanish Speakers II**  
(3-0-3) Teixeira

*Prerequisite:* (ROPO 10105 OR ROPO 105 OR ROPO 121)

This course sequence is designed for students with at least intermediate-level proficiency in Spanish. Classroom activities emphasize the acquisition of basic

language structures, vocabulary, and sound systems, as well as the active use of spoken language in context. Students are introduced to the diverse cultures of the Portuguese-speaking countries through current video, printed media, music, and short fiction. This sequence is followed by ROPO 20201 or ROPO 20202. ROPO 10105–10106 and either ROPO 20201 or ROPO 20202 together fulfill the language requirement.

**ROPO 10115. Intensive Beginning Portuguese for Study Abroad**  
(6-0-6) Teixeira

Designed for highly motivated students, this intensive language course meets five days a week, covers the material of ROPO 10101 and 10102, and counts as two courses. Along with the acquisition of language skills, ROPO 10115 emphasizes the active use of spoken Portuguese in context. ROPO 10115 and ROPO 20201 together fulfill the language requirement and prepare students to study abroad in Brazil.

**ROPO 20201. Intermediate Portuguese I**  
(3-0-3) Teixeira

*Prerequisite:* (ROPO 10102 OR ROPO 102) OR (ROPO 10106 OR ROPO 106 OR ROPO 122) OR (ROPO 10115 OR ROPO 10104 OR ROPO 115)

Through selected readings in Portuguese, Brazilian, and Lusophone African literatures, films, newspaper and magazine articles, and popular music, students discuss a variety of cultural issues and expand their vocabulary. Particular attention is placed on reviewing major topics in Portuguese grammar and on developing students' writing abilities. ROPO 20201 fulfills the language requirement and prepares students to study abroad in Brazil.

**ROPO 20202. Intermediate Portuguese II**  
(3-0-3) Teixeira

*Prerequisite:* (ROPO 20201 OR ROPO 201)

This is a continuation of ROPO 20201, but it may be taken separately. ROPO 20202 is a fourth-semester language course designed to develop facility in speaking, reading, and writing at an advanced level. Discussions and writing assignments are based on films as well as on short stories, chronicles, and newspaper articles.

**ROPO 20300. Advanced Oral Expression in Portuguese**  
(1-0-1) Teixeira

Designed for students interested in developing their comprehension, fluency, and pronunciation. This mini-course in Portuguese offers both informal and structured conversation based on current events. Topical conversation on Brazilian politics, society, and culture will be based on authentic materials. In addition to meeting one hour per week for group discussions, students organize and participate collectively in a round-table on a topic of their choice. Conducted in Portuguese. Recommended for returnee students from Brazil.

**ROPO 30600. Testimonials from Urban Brazil**  
(3-0-3) Ferreira Gould

This course, taught in Portuguese, explores contrasting images of social change in recent Brazilian literature and cinema. The focus is on attempts to give voice to the poor, the marginal, the rogue, and other agents of social change in urban Brazil. Course materials are drawn from fictional auto/biographies and diaries, street memoirs, documentary novels, crime stories, prisoners' accounts, films, and documentaries. Texts by Caio Fernando Abreu, Rubem Fonseca, Sebastião Uchoa Leite, Paulo Lins, João Gilberto Noll, Esmeralda do Carmo Ortiz, Moacyr Scliar, and others. Films by Cláudio Assis, Ana Carolina, Fernando Meirelles and Kátia Lund, Murilo Salles, and Walter Salles and Daniela Thomas. (*Prerequisite:* a 20000-level course in Portuguese or equivalent).

**ROPO 40560. Brazilian Film and Popular Music**  
(3-0-3) Ferreira Gould

This course provides insights into 20th- and 21st-century Brazilian history, culture, and politics through film, photography, literature, and popular music. Topics discussed include Samba, Bossa Nova, Tropicalia, and the reception of *Cinema Novo* and of the new Brazilian Cinema. Special attention will be paid to Tropicalia (a movement with key manifestations in the visual arts, cinema, popular music, and

literature) and the circumstances surrounding its creation, including the repressive military regime that governed Brazil from 1964 to 1985. This course satisfies the fine arts requirement and is cross-listed in FTT. Offered in English.

**ROPO 40950. Luso-Brazilian Literature and Society**  
(3-0-3)

This course focuses on questions of national identity in the Luso-Brazilian world. We examine how social and cultural issues are perceived, conceptualized, represented, and understood in and by literature. Conducted in English with readings in Portuguese or English (discussion group available in Portuguese).

**ROPO 40951. Immigrant Voices in Modern Brazilian Literature**  
(3-0-3)

This course is twofold: It examines literary perspectives on the European and non-European immigrant experience in Brazil, and addresses fundamental questions that have occupied major contemporary Brazilian authors. How do we recreate a sense of home after having lost it? What makes us feel at home in a new place or country? How do we adapt to relocations of home? We will search for answers in the fiction of Milton Hatoum, Elisa Lispector, Salim Miguel, Ana Miranda, Raduan Nassar, Nérida Piñon, Samuel Rawet, and Moacyr Scliar. Conducted in English with readings in Portuguese or English (discussion group available in Portuguese).

**ROPO 40955. Literature and Dictatorship in Brazil and Portugal**  
(3-0-3)

*Prerequisite:* (ROPO 20202 OR ROPO 202 OR ROPO 202P)

This course offers a literary study of 20th-century dictatorships in Luso-Brazilian literature. Authors studied include Ivan Angelo, Loyola Brandao, Fernando Gabeira, Marcio Souza (Brazil), Antonio Lobo Antunes, Lidia Jorge, Vergilio Ferreira, Jose Saramago, and Miguel Torga (Portugal). Viewing of films by Maria de Medeiros, Glauber Rocha, Sergio Rezende, and Bruno Barreto. Conducted in English with readings in Portuguese, English or Spanish (discussion group available in Portuguese).

**ROPO 40956. Carnival in Cinema and Literature**  
(3-0-3)

Brazil has tantalized our imagination with images of Samba and Carnival. This course explores Brazilian culture by investigating the ways in which the celebrations of Carnival have been viewed, articulated, and unsettled by film and literature. Along with major films, documentaries, and literary works, we examine contemporary sociological and anthropological writing that contributes to our understanding of Carnivals within and beyond Brazil. We learn how key issues in Brazilian society (class, race and gender relations, national identity, rituals and symbols, values, and social roles) play out in Carnival. Course offered in English.

**ROPO 40977. Portuguese Colonialism Revisited**  
(3-0-3)

With readings from Angola, Mozambique, Brazil and Portugal, this course examines colonialism and its aftermath in Africa in light of postcolonial fiction and contemporary sociological and anthropological writing from the Lusophone world. This course brings the Lusophone experience, with its important varieties, yet overlooked implications, into broader debates in the field of postcolonial studies. Course conducted in English with readings in Portuguese and /or English.

**ROPO 40995. Short Fiction across the Atlantic: Brazil, Portugal, and Lusophone Africa**  
(3-0-3)

This is a comparative study of short prose fiction in the Portuguese-speaking world, with special emphasis on theoretical issues related to this literary genre. Authors studied include Machado de Assis, Joao Guimaraes Rosa, Clarice Lispector, Mario de Sa-Carneiro, Miguel Torga, Mia Couto, and Luandino Vieira. Conducted in English.

[Spanish](#)

**ROSP 10101. Beginning Spanish I**  
(4-0-4)

This is an introductory, first-year language sequence with equal focus on the four skills: speaking, listening, reading, and writing. An appreciation for Hispanic cultures is also encouraged through readings and class discussion. The sequence is to be followed by ROSP 20201 or ROSP 20215.

### **ROSP 10102. Beginning Spanish II**

(4-0-4)

*Prerequisite:* (ROSP 10101 OR ROSP 101) OR CESP FOR MIN. SCORE OF 281 OR CESP FOR MIN. SCORE OF 281

This is an introductory, first-year language sequence with equal focus on the four skills: speaking, listening, reading, and writing. An appreciation for Hispanic cultures is also encouraged through readings and class discussion. The sequence is to be followed by ROSP 20201 or ROSP 20215.

### **ROSP 10115. Intensive Beginning Spanish for Study Abroad**

(6-0-6) Fisher-McPeak

This course covers the material of ROSP 10101 and 10102 in one semester with classes five days per week. Equal emphasis is placed on spoken and written Spanish. ROSP 10115 counts as two courses and may be taken in conjunction with ROSP 20201 or ROSP 20215 to fulfill the language requirement. This course is designed for highly motivated students.

### **ROSP 17100. Beginning Spanish**

(4-0-4)

This is an introductory, first-year language sequence course with equal focus on the four skills: speaking, listening, reading, and writing. This course is to be followed by ROSP 20201 or ROSP 20215.

### **ROSP 20201. Intermediate Spanish I**

(3-0-3)

*Prerequisites:* (ROSP 10102 OR ROSP 102 OR ROSP 102A) OR (ROSP 10115 OR ROSP 111F OR ROSP 112F OR ROSP 115 OR ROSP 118) OR CESP FOR MIN. SCORE OF 341 AND ROSP 10115

This is an intermediate, second-year language sequence with equal focus on oral and writing skills. It includes a review of basic grammar and then transitions into more difficult features of Spanish. Students learn to discuss and write about Hispanic cultural topics, current events, and literary texts.

### **ROSP 20202. Intermediate Spanish II**

(3-0-3)

*Prerequisite:* ((ROSP 20201 OR ROSP 103 OR ROSP 201E) OR (ROSP 211 OR ROSP 20211)) OR CESP FOR MIN. SCORE OF 395

This is an intermediate, second-year language sequence with equal focus on oral and writing skills. It includes a review of basic grammar and then transitions into more difficult features of Spanish. Students learn to discuss and write about Hispanic cultural topics, current events, and literary texts.

### **ROSP 20211. Spanish for Heritage Speakers**

(3-0-3)

*Prerequisite:* (ROSP 10102 OR ROSP 102) OR (ROSP 10115 OR ROSP 115)  
A course of intensive grammar study, reading, and writing. Designed for those who may speak with considerable fluency but have little or no grasp of grammar and the written language. The goal is to achieve a level of literacy equivalent to that of a college-educated native speaker: to strengthen the command of written Spanish and the mechanics of composition and style.

### **ROSP 20215. Intensive Intermediate Spanish for Study Abroad**

(6-0-6)

*Prerequisite:* ((ROSP 10102 OR ROSP 102 OR ROSP 102A) OR (ROSP 10115 OR ROSP 115)) OR CESP FOR MIN. SCORE OF 341

ROSP 20215 is an intensive, intermediate course that covers the material from ROSP 20201 and ROSP 20202 in one semester with classes five days per week. Equal emphasis is placed on spoken and written Spanish. The course includes a review of major grammar points and literary and cultural readings. ROSP 20215 counts as two courses and fulfills the language requirement.

### **ROSP 20220. Intermediate Grammar Review**

(3-0-3)

*Prerequisite:* (ROSP 20202 OR ROSP 201 OR ROSP 202E) OR (ROSP 20215 OR ROSP 115F OR ROSP 128 OR ROSP 215 OR ROSP 215F) OR (ROSP 20211 OR ROSP 211 OR ROSP 211E OR ROSP 212)

Emphasis on refinement of oral and written language competence. This course is especially appropriate for first-year students with advanced proficiency in Spanish who have tested out of the 20202 level with an interest in study abroad. It is also open to students coming through the regular language sequence who may need additional review of grammar points.

### **ROSP 20237. Conversation and Writing**

(3-0-3)

*Prerequisite:* ((ROSP 20202 OR ROSP 201 OR ROSP 202E) OR (ROSP 20211 OR ROSP 211) OR (ROSP 20215 OR ROSP 215)) OR CESP FOR MIN. SCORE OF 440

Intended to develop writing proficiency through literary and nonliterary texts from Spain and Spanish America while continuing to promote the development of oral skills in Spanish.

### **ROSP 20300. Conversational Spanish**

(3-0-3)

*Prerequisite:* ROSP 20202 OR ROSP 201 OR ROSP 202E

This course is designed to further develop student's conversational skills and grasp of a wide variety of styles and registers in Spanish. Spoken Spanish will be practiced through various types of classroom activities and assignments, with special attention to conversation and vocabulary building. Emphasis will be on topics of current interest. Principles of grammar will be applied to structured conversations and compositions.

### **ROSP 20450. Spanish for Business**

(3-0-3)

*Prerequisite:* (ROSP 20202 OR ROSP 201 OR ROSP 202E)

This course is designed for the student who wants to learn and study Spanish terminology, phrases, and cultural conventions used in business situations in Spain and Latin America.

### **ROSP 20460. Spanish for Medical Profession**

(3-0-3)

*Prerequisite:* (ROSP 20202 OR ROSP 201 OR ROSP 202E) OR (ROSP 20211 OR ROSP 211) OR (ROSP 20215 OR ROSP 215)

This course introduces students who have mastered the rudiments of Spanish grammar to a vocabulary allowing them to discuss medicine and health care with the Spanish-speaking population in the United States.

### **ROSP 20502. LA TELENVELA: History, Culture, and Student Production**

(3-0-3)

*Prerequisite:* (ROSP 20202 OR ROSP 201 OR ROSP 202E)

The aim of this course is to explore the genre of the *telenovela*. Students sharpen oral and written language skills through exposure to authentic *telenovelas* from Spain and Latin America, and through the creation and production of their own *telenovela*.

### **ROSP 21205. Pre-Study Abroad**

(1.5-0-1.5)

A mini-course that prepares students accepted for study abroad in Notre Dame's programs in Chile, Mexico, and Spain. Course begins the week after spring break.

### **ROSP 27500. Approaches to Hispanic Culture Through Writing**

(3-0-3)

*Prerequisite:* ((ROSP 20202 OR ROSP 201 OR ROSP 202E) OR (ROSP 20215 OR ROSP 215) OR (ROSP 20237 OR ROSP 235E OR ROSP 237) OR (ROSP 20211 OR ROSP 211 OR ROSP 211E OR ROSP 212)) OR CESP FOR MIN. SCORE OF 440

This content-driven course is intended for students who want to further broaden their knowledge of the Spanish language and related cultures, as well as improve both their understanding of the Hispanic world and their communication skills in the Spanish language. Development of advanced structures is achieved through intensive practice in speaking and writing. Each course focuses on a different aspect of Hispanic culture.

### ROSP 30310. Textual Analysis

(3-0-3)

*Prerequisite:* (ROSP 201 OR ROSP 202 OR ROSP 20202 OR ROSP 215 OR ROSP 20215 OR ROSP 211 OR ROSP 20211 OR ROSP 20220 OR ROSP 20237 OR ROSP 27500)

This is an upper-division course for students with advanced preparation. It serves as the introduction to the analysis and explication of Spanish-language literary texts. Short texts in prose, poetry, and theatre from a variety of periods and countries within the Hispanic world are read, presented, and discussed. The course is a recommended prerequisite for the survey courses, and must be completed by the end of the junior year. Majors who have already taken upper-division courses in Spanish should substitute this course with a senior-level literature elective.

### ROSP 30320. Advanced Grammar and Writing

(3-0-3)

A further refinement of Spanish speaking and writing skills, this course is designed for students returning from abroad who wish to improve their proficiency in Spanish, and for students already in upper-division courses who seek additional assistance with writing skills and grammar.

### ROSP 30710. Survey of Spanish Literature I

(3-0-3) Juárez-Almendros

A survey of Spanish literature through 1700. Readings of selected texts in prose, poetry, and theater from the medieval, Renaissance, and Baroque periods. Recommended *Prerequisite:* ROSP 30310.

### ROSP 30720. Survey of Spanish Literature II

(3-0-3) Amago, Jerez-Farrán

A survey of Spanish literature from the neoclassical period to the present. Readings include a selection of texts by the most representative poets, playwrights, and novelists of each of the literary periods under study. Recommended prerequisite: ROSP 30310.

### ROSP 30810. Survey of Spanish America: Spanish American Literature I

(3-0-3) Anadón, Boyer, Heller

A general introduction to and survey of major works of colonial and 19th-century literature up to *modernismo*. Recommended *Prerequisite:* ROSP 30310.

### ROSP 30820. Survey of Spanish AmericaSpanish American Literature II

(3-0-3) Anderson, Heller, Ibsen, Moreno, Olivera-Williams, Verani

A survey of literary trends and major figures in modern Spanish AmericaSpanish American literature from 1880 to the present. Readings of selected texts in prose, poetry, and theatre. Recommended *Prerequisite:* ROSP 30310.

### ROSP 30890. Nations in Motion: Latino/Latina Literature in the United States

(3-0-3) Moreno

This course focuses on the analysis of literary works by Mexican American, Cuban American, Puerto Rican, and Dominican American authors. Some reading knowledge of Spanish recommended.

### ROSP 30902. Hispanic Caribbean Encounters

(1-0-1) Anderson

This mini-course explores the intersection of history, culture, and literature in the context of Puerto Rican, Cuban, and Dominican cultural representations both in the islands and in the United States. The class is designed to complement the spring 2006 conference series titled “*Encuentro caribe: Puerto Rico, isla frontera, Cuba y Republica Dominicana, islas peregrinas.*” Students will be introduced to key

literary texts by representative authors from each island. Issues of transnationalism, displacement, and migration between the islands and to the United States will be central to class discussions. Series attendance is mandatory and will be a factor in the final grade. Students will be expected to write reaction papers and a final essay. Although discussions will be conducted in English, knowledge of Spanish is recommended.

### ROSP 40110. Medieval Spanish Literature

(3-0-3) Seidenspinner-Núñez

This course is intended to introduce the student to the literature of medieval Spain. The texts are discussed and analyzed in the light of both medieval and modern critical concepts, and with a view to developing an understanding of the medieval culture of which they were a part.

### ROSP 40220. Renaissance and Baroque Poetry of Spain

(3-0-3) Juárez-Almendros

A close reading of traditional and Italianate poetry that includes *villancicos*, romances, and the works of Garcilaso de la Vega, Fray Luis de Leon, San Juan de la Cruz, Gongora, Quevedo, and Sor Juana Ines de la Cruz.

### ROSP 40221. Spanish Avant-Garde Literature

(3-0-3) Jerez-Farrán

An analysis of avant-garde literary movements in Spain including works by authors such as Valle-Inclán and the members of the Generation of 1927.

### ROSP 40231. Cervantes: *Don Quijote*

(3-0-3) Juárez

A close textual analysis of Cervantes's novel in its literary, historical, and cultural contexts.

### ROSP 40232. Golden Age Short Novel

(3-0-3)

A close reading of traditional peninsular narratives.

### ROSP 40235. The Picaresque Novel

(3-0-3) Juárez

An introduction to a unique Spanish genre, the Picaresque novel, or literature of the delinquent, with major focus on the Spanish Golden Age masterpieces: *Lazarillo De Tormes*, *Guzman De Alfarache*, and *El Buscon*.

### ROSP 40240. Spanish Golden Age Theater

(3-0-3) Juárez, Seidenspinner-Núñez

A critical evaluation of representative Golden Age plays, highlighting their major themes, national character, and the strengths and limitations of their conventions.

### ROSP 40370. Nineteenth-Century Spanish Novel

(3-0-3)

A study of the development of the Spanish novel, which is examined as an aesthetic expression of the long process of consolidation of the bourgeois social order in 19th-century Spain.

### ROSP 40380. *Modernismo y Generacion del '98*

(3-0-3) Jerez-Farrán

A study of the most representative literary works from these two movements, against the background of social, national, and ideological crises in turn-of-the-century Spain.

### ROSP 40414. Topics in Spanish AmericaSpanish American Literature: Cuban Literature

(3-0-3) Anderson

An in-depth study of a particular theme, author, or genre in Cuban literature.

### ROSP 40420. Modern Spanish Poetry

(3-0-3) Jerez-Farrán

A close reading and analysis of the major Spanish poets of late 19th- and 20th-century Spain, with emphasis on Machado, Jimenez, Lorca, Alberti, Guillen, and poets from post-Franco Spain.

**ROSP 40424. Dali, Lorca, and Bunel**

(3-0-3) Jerez-Farrán

A close analysis of surrealism in Spanish literature, film, and the plastic arts as represented by García Lorca, Luis Buñel, and Salvador Dalí. Especial attention will be given to the revolutionary import of surrealism's key tenets such as the subversion of traditional concepts of art, the irrational, art as a form of liberation from constraints like logic and morality, the promotion of an aesthetics of defamiliarization and shock, and the vindication of the subconscious.

**ROSP 40430. Modern Spanish Novel**

(3-0-3) Jerez-Farrán

Major novels of contemporary Spain examined within the context of the social, political, and intellectual crises from the time of the Spanish American War of 1898 to the post-Franco period. Includes works by Baroja, Unamuno, Cela, Martín-Santos, Laforet, Matute, Goytisolo, and Montero.

**ROSP 40435. Spanish Short Story**

(3-0-3) Jerez-Farrán

Close examination of the evolution of the short story in Spanish literature from the 19th to the 20th century with emphasis on contemporary authors such as Mateo Díez, J.A. Millán, Muñoz Molina, Lourdes Ortiz, Ana Rossetti, and Esther Tusquets.

**ROSP 40440. Modern Spanish Theater**

(3-0-3) Jerez-Farrán

A survey of Spanish theatrical expressions from the early 19th century to the present, which includes neoclassical, Romantic, and realist theatre, and the technical innovations of contemporary playwrights such as Benavente, Lorca, and Valle-Inclán.

**ROSP 40470. Recent Developments in the Spanish Novel**

(3-0-3) Amago

A panoramic view of contemporary (1990s and beyond) narrative in Spain. Authors discussed include Nuria Amat, Rosa Montero, Juan Jose Millas, and Javier Cercas.

**ROSP 40520. Recent Spanish Cinema**

(3-0-3) Amago

*Corequisite:* ROSP 41520

This course examines recent developments in Spanish film since the 1980s. Films discussed include works by Carlos Saura, Alejandro Amenabar, and Pedro Almodovar.

**ROSP 40530. Gender and National Identities in Contemporary Spanish Cinema**

(3-0-3) Jerez-Farrán

*Corequisite:* ROSP 41530

Discussion of films from the period immediately preceding the final demise of the Franco dictatorship to the present, with an emphasis on issues of gender and national identity.

**ROSP 40555. Film and the Latin American Imaginary**

(3-0-3) Heller

*Corequisite:* ROSP 41555

This course considers the issue of Latin American identity through films from various national traditions, including Cuba, Chile, Mexico, and Brazil. Class discussions consider how shared cultural elements are represented in Latin American film and how these representations challenge assumptions about identity politics.

**ROSP 40570. Hispanic Caribbean Identity Through Literature and Film**

(3-0-3) Anderson, Heller

This course explores the aesthetics and histories of the Hispanic Caribbean through its literature and film. We will read essays exploring the issue of Latin American and Caribbean identities (Jose Martí's *Nuestra America*, selections from Benítez Rojo's *La isla que se repite*, for example) as well as novels, autobiographies, and poetry that deal with slavery, religion and sexuality, and anti-colonialism,

such as Carpentier's *The Kingdom of This World*, Manzano's *Autobiography of a Slave*, Barnet's *Biografía de un cimarrón*, and Luis Rafael Sanchez's *La importancia de llamarse Daniel Santos*, and the poetry of Nicolas Guillen, Jose Lezama Lima, Manuel del Cabral, and others. In addition, we will screen several films. One paper, an oral report, a midterm, and a final.

**ROSP 40610. Las Casas: Context and Resonances**

(3-0-3)

The task of this course is to understand the thought of Bartolome de las Casas and his followers in its 16th-century context, and then to enquire into the connections between the ideas of Las Casas and contemporary theologians of liberation.

**ROSP 40612. Piracy, Witchcraft, and Prostitution**

(3-0-3) Boyer

This course examines the role played by luminal figures in defining the culture of the early Atlantic world. Through close analysis of poetry, novels, legal accounts, and theological treatises, we will consider the ways that gender, national identities, and an emergent international commercial space affected the constitution of early Modern subjects. Readings from Kramer and Sprenger's *Malleus Maleficarum* and inquisition documents, as well as works from Cotton Mather, Lope de Vega, Sir Francis Drake, Lucy Brewer, Catalina de Erauso, and others will be studied.

**ROSP 40615. Topics in Colonial Latin American Literature**

(3-0-3) Anadón, Boyer

An in-depth study of a particular theme, author, or genre in colonial Latin American literature.

**ROSP 40661. Does the Nation Have a Woman's Face?**

(3-0-3) Olivera-Williams

A study of the national imaginary depicted in 19th-century Spanish American fictional prose and essays. Special attention will be given to gender issues and historical events.

**ROSP 40720. Great Spanish American Poets of the Twentieth Century**

(3-0-3) Verani

This course is an in-depth exploration of major Spanish American poets of the 20th century, from the avant-garde movement through to the present. We will read selected poems of Neruda, Vallejo, Lezama Lima, Paz, Guillén, Cardenal, Alejandra Pizarnik, and others. While we will attend to the changing landscape of poetic technique and concerns, our main goal will be to understand the intertwining of language and historical context, as well as to embrace these poems as fundamental human artifacts that challenge our preconceived notions about language, reality, sex, class, ethnicity, gender, etc.

**ROSP 40761. Readings in Southern Cone Literature**

(3-0-3) Olivera-Williams

This course will analyze a selection of works from a wide range of genre by representative authors from Argentina, Chile, and Uruguay written from the early 20th century to the present.

**ROSP 40765. Topics in Spanish American Literature: Borges and Cortazar**

(3-0-3) Verani

This course examines the short narrative (short story and novellas) of 20th-century authors Jorge Luis Borges, and Julio Cortazar. The emphasis is on close readings of the texts along with recent developments in critical theory.

**ROSP 40766. Southern Cone Literature**

(3-0-3) Olivera-Williams

A study of representative movements and authors of 20th-century Southern Cone literature.

**ROSP 40767. Women's Narrative in the Southern Cone**

(3-0-3) Olivera-Williams

This course designed as a seminar for upper-level Spanish students aims to critically analyze some of the most important narrative texts by 20th-century

Argentine, Chilean, and Uruguayan women authors. Some of the writers to be studied include Somers, Geel, Guido, Peri-Rossi, Mercado, Eltit, and Valenzuela. Our readings of the selected works will be informed by the social and political circumstances of their time, which will enable us to understand the emergence of feminine subjectivities and their fictional representations. Concepts of gender, sex, and sexuality will be central to our discussions. Thus, theoretical and critical texts on feminism will also be included.

**ROSP 40771. Modern Caribbean Literature**

(3-0-3) Anderson, Heller

This course will examine a selection of works from a range of genre by authors from Cuba, the Dominican Republic, and Puerto Rico.

**ROSP 40775. New Readings in Modern Caribbean Literature**

(3-0-3) Anderson, Heller

This course will analyze a selection of works from a wide range of genres by representative authors from Cuba, the Dominican Republic, and Puerto Rico, written from the early 20th century to the present.

**ROSP 40777. Pop Culture: Caribbean**

(3-0-3) Anderson

In this class we will study a number of aspects of popular culture in the modern Hispanic Caribbean (Cuba, Puerto Rico, Dominican Republic) including literature, music, film, and art. All readings and class discussion will be in Spanish.

**ROSP 40778. Topics in Spanish America: Spanish American Literature: Cuban Literature**

(3-0-3) Anderson

This course focuses primarily on Cuban literature written during the first 100 years of the republic, within the context of the island's history and various aspects of Cuban culture, including art, music, and film.

**ROSP 40780. Mexican Literature**

(3-0-3)

Combines an overview of the historical development of prose, poetry, and theatre in Mexico, with a close look at special problems and issues in Mexican literature.

**ROSP 40831. Latino Literature**

(3-0-3) Moreno

This course examines Latino/a text of various ethnic backgrounds.

**ROSP 40877. Self, Family, Nation: Insular and US Hispanic Caribbean Women Authors**

(3-0-3) Moreno

This course focuses on the literature of Hispanic Caribbean women authors in the islands and in the US. By contrasting the works of recent and more established authors from Puerto Rico, Cuba, the Dominican Republic, and their counterparts in the US, we'll explore the construction of gender and sexuality from a Caribbean feminist perspective. Some of the texts that this course will examine include *In the Time of the Butterflies* by Julia Alvarez, *Papi* by Rita Indiana, *When I was Puerto Rican* by Esmeralda Santiago, *Maldito amor* by Rosario Ferré, and *Dreaming in Cuban* by Cristina García.

**ROSP 40890. From *El Barrio* to *Calle Ocho*: The Urban Experience in US Latino/a Literature**

(3-0-3) Moreno

This course examines Latino/a texts of various ethnic backgrounds that offer representations of the urban landscape and experience. Knowledge of Spanish required.

**ROSP 40891. Beyond the Islands: Latino/a Caribbean Literature and Culture**

(3-0-3)

This course examines the literary and cultural production of Latinas/as from the Spanish-speaking Caribbean. Issues of migration, transnationalism, and transculturation will be explored through the analysis of texts by Puerto Rican, Cuban-American, and Dominican American authors.

**ROSP 40909. Colonial Indigenism in Modern Latin American Literature**

(3-0-3) Anadón, Boyer

Reminiscences of colonial and indigenist themes in contemporary Latin American narratives.

**ROSP 40935. Spanish American Short Story**

(3-0-3)

A survey of the development of the short-story genre in Spanish America. Close readings of works by representative authors.

**ROSP 40960. Spanish American Poets of the Twentieth Century**

(3-0-3)

This course will focus on the principal trends of Spanish American poetry through close readings of texts from the avant-garde to the present.

**ROSP 40977. Modernization in Latin America: Urban Changes, Technology, and Desires at Turn-of-the-Last-Century**

(3-0-3) Olivera-Williams

This course designed as a seminar for upper-level Spanish students aims to critically analyze some of the major transformations of Latin America at the time of its entrance in the world market (1875–1910). Focusing on the dramatic transformations of space—urban changes—and of time—the popular knowledge and use of modern technology—we will study how literature responds to these major changes, at the same time that it proposes ways to articulate the new Latin American sensitivity. Writes such as Cuban José Martí, Nicaraguan Rubén Darío, Argentine Leopoldo Lugones, Uruguayan José Enrique Rodó, Julio Herrera y Reissig, and Delmira Agustini, among others, will enable us to reflect on the thoughts of Latin American intellectuals regarding the advantages and disadvantages of modernization as well as their ideas on the different development of the two Americas at a pivotal time in their history. Concepts of nationalism, subjectivities, and gender will be part of our discussions. Thus, theoretical and critical texts on these subjects will also be included.

**ROSP 40980. Contemporary Women's Fiction in Spanish America**

(3-0-3)

An overview of contemporary women writers, their fiction, and their situation within their respective cultures.

**ROSP 40981. Spanish American Theater**

(3-0-3)

The purpose of this course is to critically evaluate the most representative dramatic trends of the 20th- and 21st-centuries in Spanish America. The course will embark in an analytical journey that starts with the plays that recreate the modern sensitivity of Spanish America and will finish with those written and staged in the 2000s. Plays by authors such as Florencio Sanchez, Samuel Eichelbaum, Rodolfo Usigli, Griselda Gambaro, Jorge Diaz, Vicente Lenero, Sabina Berman, Eduardo Pavlosky, Marco Antonio de la Parra, and Ramon Griffiero.

**ROSP 40991. Realism, Imagination, and Social Crisis in Contemporary Mexican Literature**

(3-0-3) Anadón

We will study diverse contemporary themes such as identity, urban chaos, exile, nature, autobiography, and also stress varied examples of vanguardist techniques in the following novels by Arturo Azuela: *El tamaño del infierno*, *La mar de utopías*, *Estuche para dos violines*, and *Extravíos y maravillas*. In these novels, we will analyze a maritime novel taking place in several Latin American countries and Portugal, a travel adventure through Southern Cone countries discussing the present and future of Latin America, the development of "city" and "rural" themes through five families, and a historical representation of the theme of music through several countries in the United States, Europe, and Mexico.

**ROSP 41520. Introduction to Spanish Cinema Lab**

(0-2-0)

*Corequisite:* ROSP 40520

This course is the lab component of ROSP 40520.

**ROSP 41530. Gender and National Identities in Contemporary Spanish Cinema Lab**

(0-1-1)

This course is the lab component of ROSP 40530.

**ROSP 41555. Film and the Latin American Imaginary Lab**

(0-1-1)

This course is the lab component of ROSP 40555.

**ROSP 41590. Spanish Theater Workshop**

(2-0-2)

A full-immersion language experience for the study, practice, production, and performance of authentic Spanish texts. Includes analytical and writing components.

**ROSP 47000. Special Studies I**

(3-0-3)

*Prerequisites:* Senior standing, dean's list.

**ROSP 53000. Senior Seminar**

(3-0-3)

The senior seminar may actually be any ROSP course number in the range 53000–53999. This course is restricted to senior Spanish majors only, and includes an in-depth study of a particular author, theme, genre, or century. In addition to treating primary texts, some critical material will be required reading. The course culminates in a substantial research paper. May be taken either fall or spring term.

## Medieval Studies

**MI 20001. The World of the Middle Ages**

(3-0-3)

*Corequisite:* MI 22001

The Middle Ages have been praised and reviled, romanticized and fantasized. The spectacular popularity of *Harry Potter*, *The Lord of the Rings*, and *Narnia* have brought a revival of interest in and curiosity about the Middle Ages. But what were they like, these 10 centuries between Rome and the Renaissance? In this course, we will explore major themes and issues in medieval civilization in an attempt to offer some basic answers to that question. We will have in view three kinds of people: rulers, lovers, and believers. But we will also study carefully those who wrote about those kinds of people. We will constantly ask how can we know about the Middle Ages, and what kinds of things can we know? We will consider major literary texts as both works of art and historical documents. We will explore various kinds of religious literature. We will try to understand the limits, boundaries, and achievements of philosophy and theology. Some lectures will incorporate medieval art so as to add a visual dimension to our explorations. This course will constitute an extended introduction to the dynamic and fascinating world of the Middle Ages.

**MI 20195. Love and Romance in the Middle Ages**

(3-0-3)

Close readings of some of the seminal texts associated with “courtly love”: the love songs of the troubadours, the Arthurian romances of Chrétien de Troyes, Chaucer's *Troilus*, and *Sir Gawain and the Green Knight*, among others, with a focus on how romantic love is portrayed.

**MI 20276. Introduction to Islamic Civilization**

(3-0-3)

This course provides an introduction to Islamic civilization and Muslim culture and societies through scholarly works, literature, media clips, films, and audio-video material (some made by the instructor during recent trips to the Middle East). The background reading will provide a context for the audio-visual material, giving a general overview of the history of the Islamic world from the advent of Islam to the present day. The ultimate goal of this course is for students to gain a better understanding of the Muslim peoples and their culture and societies within the broader context of Islamic civilization. Focal point: brief overview of the canons and basic tenets of Islam as a world religion, recognition and transcendence of stereotypes, awareness of Western culture and political influence on today's Arab-Islamic world and vice versa, and exposure to Middle Eastern culture.

**MI 20473. Regarding the Islamic Challenge to Christian Theology**

(3-0-3)

*Prerequisite:* (THEO 10001 OR THEO 100) OR (THEO 13183 OR THEO 180G) OR (THEO 20001 OR THEO 200) OR (THEO 20002 OR THEO 201) While many Christians have described Islam as a Christian heresy, many Muslims consider Christianity to be an Islamic heresy. Jesus, they maintain, was a Muslim prophet. Like Adam and Abraham before him, like Muhammad after him, he was sent to preach Islam. In this view, Islam is the natural religion—eternal, universal, and unchanging. Other religions, including Christianity, arose only when people went astray. Therefore, Muslims have long challenged the legitimacy of Christian doctrines that differ from Islam, including the Trinity, the incarnation, the cross, and the new covenant and the church. In this course, we will examine Islamic writings, from the Qur'an to contemporary texts, in which these doctrines are challenged. We will then examine the history of Christian responses to these challenges and consider, as theologians, how Christians might approach them today.

**MI 20474. Pilgrimage**

(3-0-3)

This course will examine the literary record and lived experience of pilgrimage throughout Christian history by focusing on particular texts, persons, and sites. To enrich our understanding of this phenomenon, we will deliberately adopt a variety of perspectives (archeological, sociological, anthropological, liturgical, and art historical). We will necessarily also consider relics and the cult of the saints.

**MI 20661. Islam: Religion and Culture**

(3-0-3) Afsaruddin

This introductory course will discuss the rise of Islam in the Arabian Peninsula in the seventh century of the Common Era and its subsequent growth as a major world religion and civilization. Lectures and readings will deal with the life of the Prophet Muhammad, the Qur'an and its role in worship and society, early Islamic history, community formation, law and religious practices, theology, mysticism, and literature. Emphasis will be on the core beliefs and institutions of Islam and on its religious and political thought from the Middle Ages until our own time. The latter part of the course will deal with the spread of Islam to the West, resurgent trends within Islam, both in their reformist and extremist forms, and contemporary Muslim engagements with modernity.

**MI 20671. Celtic Heroic Literature**

(3-0-3) Fogarty

An exciting introduction to Celtic literature and culture, this course introduces the thrilling sagas, breathtaking legends, and prose tales of Ireland and Wales. Readings include battles, heroic deeds, feats of strength and daring, and dilemmas faced by the warrior heroes of the Celts. Celtic Heroic Literature, which requires no previous knowledge of Irish or Welsh, studies the ideology, belief system, and concerns of the ancient Celtic peoples as revealed in their saga literature. By examining the hero's function in society, students investigate the ideological concerns of a society undergoing profound social transformation and religious conversion to Christianity and the hero's role as a conduit for emotional and social distress. Among the heroes to be studied in depth are Cu Chulainn, Lug, St. Patrick, and the king-heroes. Wisdom literature, archeological, and historical evidence will also be considered in this course. No prior knowledge of Irish required. All texts provided in English.

**MI 20702. Introduction to Art and Catholicism**

(3-0-3)

This undergraduate lecture/discussion course will give students the opportunity to analyze and discuss the history of Catholic doctrine as it pertains to the visual arts. From the Council of Elvira in 306 AD to John Paul II's *Letter to Artists* of 1999, Catholicism has engaged with and debated the role of the arts as a legitimate vehicle for spiritual experience and theological knowledge. In this course, we will examine the changing, complex, and various ideas that have been brought to the question of the function of art in the Church. It will become clear that Catholic attitudes to the arts have been subject to a range of influences that have helped shape a still fluid and potential relationship between Catholicism and art. Among other topics, we will examine the accommodation of traditional pagan practices in Late Antiquity; the impact of Byzantine and Carolingian theological discourse on the arts; mendicant thought and practice regarding the arts; lay piety in the later Middle Ages; issues raised by the Reformation; the Council of Trent and the Counter Reformation; the implications of modernism; neo-Thomist aesthetics; and the aftermath of Vatican II. In all instances, the course will be shaped by the discussions of primary readings (in translation when necessary) that will set these texts in a context that is social, intellectual, theological, and cultural. Each reading will then lead to an examination of the artistic environment that preceded and succeeded the ideas shaped by these texts. It is expected that students will leave this course with a rich knowledge of the central ideas and works of art that have come to shape the continuing dialogue between Catholicism and art.

**MI 20772. Medieval and Renaissance Music History I**

(3-0-3) Blachly

A survey of music. The study of the major forms and styles in Western history. Required of music majors and minors, but open to students with sufficient musical background.

**MI 22001. The World of the Middle Ages: Tutorial**

(0-0-0)

Discussion section accompanying MI 20001.

**MI 30194. The Journey in Medieval Literature**

(3-0-3)

Map's *The Quest of the Holy Grail*; Dante's *Divine Comedy*; Chaucer's *Canterbury Tales*; Cervantes's *Don Quixote*.

**MI 30203. Middle Ages I**

(3-0-3) Boulton

This course will examine the history of the Roman world from the time of the first incursions of barbarians into the Roman Empire in the third century to the time of the final invasions in the 10th. It will concentrate first on the crises of the third century, and on the consequent transformation of the relatively unified, urbanized, tolerant, polytheistic Roman Empire of Late Antiquity into the two distinct, deurbanized, intolerant, monotheistic, and politically divided civilizations of Latin or Catholic Christendom and Greek or Orthodox Christendom. Next, it will briefly examine the emergence in the seventh century of the new monotheistic religion of Islam and of the new civilization and empire centered on it, which quickly conquered not only the old Persian empire but most of the Asian and all of the African provinces of the continuing Roman empire, and in 711–18 conquered most of Spain as well. The remainder of the course will concentrate on the history of Latin Christendom and its pagan barbarian neighbors to the north and east between the beginning of the Germanic conquests of the western provinces ca. 400 and the final conversion of the peoples of central and northern Europe to Christianity and the simultaneous emergence of a new sociopolitical order in the older kingdoms around 1000. There will be two short papers, two tests, and a final examination.

**MI 30204. Middle Ages II**

(3-0-3)

This course is designed as a topical introduction to European history between 1000 and 1500. It will examine the evolution of various forms of economic systems, societies, and civilizations in Western Europe during this period, concentrating on France, Italy, England, and Germany. History majors as well as students interested in a historical introduction to medieval civilization are welcome.

**MI 30218. History of Christianity to 1500**

(3-0-3)

A survey of the development of Christianity from Late Antiquity to the eve of the 16th-century Reformation. Emphases include processes of Christianization, definitions of prescribed and proscribed beliefs and practices, institutional elaboration, relations with imperial and royal authority, impact of and on culture, and varieties of religious behaviors. Although the history of the Latin (Catholic) church is highlighted, the dynamics and consequences of its separation first from the Oriental and then from the Orthodox churches will be examined. The course aspires to achieve a routine of interactive lectures.

**MI 30233. Medieval Ireland**

(3-0-3)

Consideration of the period between 950 and 1400 is of crucial importance in understanding Irish history. This course not only covers the range of continuities and radical discontinuities that marked Ireland's development during this time, but charts the attempted conquest of the entire country by the English Crown. The lecture series also seeks to answer a number of questions. Why did the papacy give the English Crown sovereignty over Ireland? Why did a country like Ireland, on the verge of attaining political and economic centralization, not organize better resistance to English attempts to subdue it? Why did the English colony fail to prove more successful in exerting its will over indigenous Irish potentates? Culturally the period also witnessed the growing assimilation of English invaders to the norms of Gaelic Irish politics and society. Lastly, events in Ireland had a serious influence on developments in England, Wales, and Scotland, provoking, among other things, the fall of the Plantagenet dynasty and an attempted invasion by King Robert I of Scotland.

**MI 30235. Medieval Middle East**

(3-0-3) Cobb

This course offers a survey of Middle Eastern history from the rise of Islam in the seventh century CE until the rise of Mongol successor polities in the 15th century. The course is structured to cover political and cultural developments and their relationship with broader changes in society during the formative centuries of Islamic

civilization. Specific topics include the career of the Prophet Muhammad and the origins of the earliest Muslim polity; the creation and breakup of the Islamic unitary state (the Caliphate); the impact of Turkish migrations on the Middle East; social practices surrounding the transmission of learning in the Middle Ages; the diversity of approaches to Muslim piety and their social and political expression; popular culture; non-Muslims in Islamic society; the creation of the medieval Islamic “international” cultural order. Among the more important themes will be long-term cultural and social continuities with the Islamic and ancient Near East, and concepts of religious and political authority.

**MI 30236. The Polish and Lithuanian Commonwealth**  
(3-0-3)

This course will survey the history of the Polish and Lithuanian Commonwealth from its origins in the 1386 dynastic union of Jogailo, Grand Duke of Lithuania, with Hedvig, the daughter of Polish king Louis the Great (1370–82), through the transformation into a political union at Lublin in 1569 to the collapse of the commonwealth, which culminated in three partitions at the end of the 18th century. Special emphasis will be placed on the political processes that transformed the commonwealth into one of the most democratic countries in the world, but also ultimately contributed to its decline. Attention, too, will be paid to the wars that ravaged the commonwealth, including those with Muscovy, Sweden, the Ottoman Empire, and with the peoples of what today is modern Ukraine.

**MI 30237. Medieval and Early Modern Russia**  
(3-0-3) Martin

This course will examine the history of Russia from its medieval origins until the age of Catherine the Great in the 18th century. We will begin with the genesis of Orthodox Slavic civilization in medieval Kievan Rus and that state’s destruction in the Mongol invasion. Then we will study the rise of the tsardom of Muscovy and the fateful developments that nearly doomed it in the 16th–17th century: the reign of Ivan the Terrible, the Time of Troubles, the imposition of serfdom, the schism of the Orthodox Church, and widespread popular revolts. Lastly, we will see how Peter the Great and his 18th-century successors attempted to stabilize the social order, Westernize the upper classes, and make Russia a great European power.

**MI 30255. Twelfth-Century European Renaissance and Reform**  
(3-0-3) Van Engen

The thousand years of history we call “the Middle Ages” witnessed repeated efforts to reform and enlighten society through learning and religion. Such aspirations did not wait for the periods we call Renaissance and Reformation. This course will examine reform movements in the years 1050–1215, a time of great cultural expansion often called the “12th-century renaissance.” Here we find the invention of the university and also of chivalry, mystics as well as satirical mockers. We will read original sources dealing with ethics, politics, love, and religion in that society. We will ask what it means, historically, to speak of a society as undergoing renewal or reform: Can a whole society be reformed? By whom? By what means?

**MI 30257. The Medieval Mind**  
(3-0-3) Van Engen

This course offers an introduction to thought and culture in the European Middle Ages, the era of romance, scholastic theologians, and female mystics. After a relatively brief look at the early Middle Ages, the course will focus on the origins of the literature of love and chivalry, of schoolmen in universities, and of women religious writers. There is a general textbook to guide the course, but much of the reading will be in primary sources; that is, in the thinkers and poets and mystics of the medieval period.

**MI 30269. The Late Middle Ages, 1300–1500**  
(3-0-3)

The course studies Europe in the time of the late Middle Ages, roughly 1300–1500, often called a time of crisis: plague, war, rebellion, economic upheaval. But it was also a time of enormous achievement, of Dante and Chaucer, of new techniques in warfare and government, of conciliar representation in church and state, of extravagant display in fashion and building. This course will

proceed by way of both secondary and primary readings, with at least three short papers and student discussion required.

**MI 30272. Christian/Jew/Muslim in the Middle Ages**  
(3-0-3)

This course examines the three major Abrahamic religions of the medieval West. We will explore the similarities and the differences among the three religions, and consider how they influenced each other and how they distanced and refuted each other. The goal is to investigate the range of ideas concerning the nature of faith and law existing in the Middle Ages and to think about how context—political, social, cultural, and intellectual—informs those ideas. During the semester students will compare important texts from the three major religions, analyze their content, and evaluate the relationships among them. All of our reading will be primary sources, available for purchase at the bookstore or as part of a course pack.

**MI 30301. Ancient and Medieval Philosophy**  
(3-0-3) Dumont, Freddoso

This course will concentrate on major figures and persistent themes. A balance will be sought between scope and depth, the latter ensured by a close reading of selected texts.

**MI 30411. Christian Theological Traditions I**  
(3-0-3) Cunningham, Wawrykow

A survey of Christian theology from the end of the New Testament period to the eve of the Reformation. Through the close reading of primary texts, the course focuses on the Christology of such influential thinkers as Origen, Athanasius, Augustine, Anselm, and Aquinas. How do these thinkers understand the person and work of Jesus Christ? What are the Christological problems that they tried to resolve? How do the different Christologies of these thinkers reflect their differing conceptions of the purpose and method of “theology”? Some attention will also be given to nontheological representations of Christ. How does the art of the early and medieval periods manifest changes in the understanding of the significance of Jesus? This course is obligatory for all first and supplementary majors, but is open to others who have completed the University requirements of theology and who wish to gain a greater fluency in the history of Christian thought. Fall only.

**MI 30477. Reading the Qur’an**  
(3-0-3)

To Muslims the Qur’an is the uncreated, eternal Word of God. As Jesus Christ is to Christians, the Qur’an to Muslims is the fullest expression of God’s mercy and concern for humanity. It is both the source of complete spiritual wisdom and the constitution for a more perfect society. In the present course we will encounter this revered text with the following goals: to examine the history of the Qur’an’s composition and reception; to explore the major themes of the Qur’an; to discuss new theories on and debates over the Qur’an; and, finally, to research the Qur’an’s statements on issues of contemporary interest, especially sex, politics, and war.

**MI 30500. Survey of Spanish Literature I**  
(3-0-3) Juárez-Almendros

A survey of Spanish literature through 1700. Readings of selected texts in prose, poetry, and theater from the medieval, Renaissance, and Baroque periods.

**MI 30530. Survey of French Literature and Culture I**  
(3-0-3) Boulton

Reading of selections and complete works of outstanding French authors from major genres and periods. Students are expected to have already taken ROFR 30310.

**MI 30577. Medieval-Renaissance Italian Literature and Culture**  
(3-0-3) Moevs

*Prerequisite:* (ROIT 202 OR ROIT 215 OR ROIT 20215) OR (ROIT 27500 OR ROIT 202E OR ROIT 20505 OR ROIT 235)

An introduction to the close reading and textual analysis of representative texts from the *Ducento* through the Renaissance, including Lentini, Guinizzelli, Cavalcanti, Dante, Petrarca, Boccaccio, Poliziano, Machiavelli, and Ariosto.

**MI 30600. Latin Literature and Stylistics**

(3-0-3)

*Prerequisite:* (CLLA 20003 OR CLLA 103 OR CLLA 103A OR CLLA 201)  
Provides an introduction to the advanced study of Latin literary texts through close reading of selected texts, combined with practice in Latin composition.

**MI 30607. The Roman Revolution**

(3-0-3)

This course builds on the work of CLAS 30012 and CLAS 30022 and examines the climactic events in Roman history of the late first century BC and early first century AD that changed Rome from an open republic to a repressive military monarchy. Chronologically, the course begins with the appearance on the Roman political stage of the unabashedly ambitious Julius Caesar, and ends with the accession of an hereditary autocrat in the person of the morose ruler Tiberius. Exploring a variety of sources, the course focuses on the political tensions and civil commotions of the revolutionary era associated with warlords like Pompey, Crassus, Caesar, and Antony, and concentrates especially on the rise to power of Augustus, the most ruthless warlord of all, and his creation of a personal political regime that was to last in style for centuries.

**MI 30662. Canon and Literature of Islam**

(3-0-3)

This course is an introduction to the religious literature of the Arab-Islamic world. Emphasis is on works from the classical and medieval periods of Islam, roughly from the seventh to the 14th century of the Common Era. We will read selections from the Qur'an (the sacred scripture of Islam), the Hadith literature (sayings attributed to the Prophet Muhammad), the biography of the Prophet, commentaries on the Qur'an, historical and philosophical texts, and mystical poetry. All texts will be read in English translation. No prior knowledge of Islam and its civilization is assumed, although helpful.

**MI 30663. Historical Survey: Arabic Middle East**

(3-0-3) Amar

This course will chart the history of the Arab Middle East from the formative period of the emergence of Islam in the seventh century through the fall of Constantinople in 1453 and the creation of the Ottoman Turkish Empire. Intended to be broad in its coverage and comprehensive in its scope, the course will introduce students to the social, cultural, and religious crosscurrents that came to define the Arab life and culture in the region.

**MI 30672. Saints and Kings in Medieval Ireland**

(3-0-3) Fogarty

This course focuses on a series of encounters (in early Irish and Hiberno-Latin) between saints and kings or other royal characters. Through these stories and characters, tensions between the domains of spiritual and secular, the local and the "national," the native and the external, are raised, explored, and (sometimes, though by no means always) resolved. Saints such as Patrick, Colmcille, Brigit, Ciarán, and Caimnech, together with kings such as Lóegaire Mac Néill, Diarmuid Mac Cerbaill, and Muirchertach Mac Erca will be studied.

**MI 30673. Celtic Otherworld Early Irish**

(3-0-3) O'Buachalla

In early Irish tradition, the everyday world (of men, women, kings, warriors, and cattle) and the Otherworld stand in unstable and uneasy relation to one another. The Otherworld has several aspects: it can be positive and beneficial—indeed it is viewed as the legitimating source of rule in this world—but also baleful and destructive. In this course, we will study a range of Otherworld encounters, seeking to understand the vast range of contacts between the human world and the other world (or worlds) of early Irish tradition.

**MI 30680. Medieval German Literature**

(3-0-3) Wimmer

This course constitutes a survey of German literature from its beginnings during Germanic times until the 16th century. Ideas, issues, and topics are discussed in such a way that their continuity can be seen throughout the centuries. Lectures and discussions are in German, but individual students' language abilities are

taken into consideration. Readings include modern German selections from major medieval authors and works such as *Hildebrandslied*, *Rolandlied*, *Nibelungenlied*, *Iwein*, *Parzival*, *Tristan*, courtly lyric poetry, the German mystics, secular and religious medieval drama, *Der Ackermann aus Böhmen*, and the beast epic *Reineke Fuchs*. Class discussions and brief presentations in German by students on the selections are intended as an opportunity for stimulating exchange and formal use of German.

**MI 30700. Introduction to Medieval Art**

(3-0-3) Barber

This course will introduce the visual arts of the period ca. AD 300 to ca. AD 1300. In the course of the semester, we shall devote much time to considering the possibility of a history of medieval art, as the objects and practices of the Middle Ages will be shown to make our assumptions about the nature of art history problematic. Working from individual objects and texts we will construct a series of narratives that will attend to the varieties of artistic practices available to the Middle Ages. From these, it will be shown that art was a vital, complex, lucid, and formative element in the societies and cultures, both secular and sacred, which shaped this period.

**MI 30720. Late Antique and Early Christian Art**

(3-0-3) Barber

Art in Late Antiquity has traditionally been characterized as an art in decline, but this judgment is relative, relying on standards formulated for art of other periods. Challenging this assumption, we will examine the distinct and powerful transformations within the visual culture of the period between the third and the eighth centuries AD. This period witnesses the mutation of the institutions of the Roman Empire into those of the Christian Byzantine Empire. The fundamental change in religious identity that was the basis for this development had a direct impact on the visual material that survives from this period, such that the eighth century witnesses extensive and elaborate debates about the status and value of religious art in Jewish, Moslem, Byzantine, and Carolingian society. This course will examine the underlying conditions that made images so central to cultural identity at this period.

**MI 30724. Gothic Art**

(3-0-3)

It was during the Gothic period, stretching approximately from the 12th to the 15th centuries, that artists raised their social status to a higher level and produced a greater quantity of works than ever before seen in the Christian West. The architectural forms that we identify as characterizing the Gothic style, such as pointed arches, flying buttresses, pinnacles, and quatrefoils were applied not only to buildings, but to altarpieces, illuminated manuscripts, liturgical objects, and even to domestic items such as spoons, beds, and chests. This style has a powerful legacy, and has been frequently revived to various purposes in the modern era. In this course we analyze representative examples of Gothic art and architecture in light of their production at a time of great social, intellectual, religious, and political dynamism and upheaval.

**MI 30753. Art into History: Reading the Art of Medieval Byzantium**

(3-0-3)

Byzantine art has often been opposed to the traditions of Western naturalism, and as such has been an undervalued or little known adjunct to the story of medieval art. In order to develop a more sophisticated understanding of this material, we will examine the art produced in Byzantium in the period from the ninth to the 12th century, a period marking the high point of Byzantine artistic production and influence. Stress will be placed on the function of this art within the broader setting of this society. Art theory, the notions of empire and holiness, the burdens of the past, and the realities of contemporary praxis will be brought to bear on our various analyses of material from all media. How we, as art historians, can write the history of this rich culture will be a central issue of this course.

**MI 30800. Ancient and Medieval Political Theory**

(3-0-3) Keys

What is the meaning of justice and why should we care about it? Can politics ever perfectly establish justice? Which forms of government are best for human beings to live under, and why? What is the political relevance of religion and philosophy, family and ethnicity, war and peace, nature and freedom, law and right? What are the qualities of a good citizen and political leader? How should relations among diverse political communities be conducted? This course introduces students to theoretical reflection on these and related questions through the study of some of the great works of ancient and medieval political thought. Readings will include writings of authors such as Thucydides, Plato, Aristotle, Cicero, Augustine, Farabi, Maimonides, and Aquinas.

### MI 40003. Introduction to Christian Latin

(3-0-3)

*Prerequisite:* (CLLA 20004 OR CLLA 325)

This course has two goals: to improve the student's all-around facility in dealing with Latin texts, and to introduce the student to the varieties of Christian Latin texts and basic resources that aid in their study. Exposure to texts will be provided through common readings that will advance in the course of the semester from the less to the more demanding and will include Latin versions of Scripture, exegesis, homiletic, texts dealing with religious life, formal theological texts, and Christian Latin poetry. Philological study of these texts will be supplemented by regular exercises in Latin composition.

### MI 40004. Medieval Latin

(3-0-3) Mantello

This course is an introduction to the Latin language and literature of the Late Antique and medieval periods (ca. AD 200–1500). Designed to move students toward independent work with medieval Latin texts, the course will emphasize the close reading and careful translation of a variety of representative medieval Latin texts and documents with attention to vocabulary and word formation, orthography and pronunciation, morphology and syntax, and prose styles and metrics. The course will provide a review of the principal constructions of classical Latin and an introduction to some of the areas of medieval Latin scholarship, including lexis, bibliographies, great collections and repertoires of sources, and reference works for the study of Latin works composed in the Middle Ages.

### MI 40102. History of the English Language

(3-0-3)

This course is designed to introduce students to the historical development of the English language, from its earliest recorded appearance to its current state as a world language.

### MI 40110. Introduction to Old English

(3-0-3) O'Keeffe

Training in reading the Old English language, and study of the literature written in Old English.

### MI 40117. *Beowulf*: Text and Culture

(3-0-3)

*Beowulf* is the longest and earliest surviving heroic poem in any medieval Germanic language, and has been recognized for over two centuries as a literary masterpiece. Yet, on examination, the reasons why it is reckoned a masterpiece are not always clear: its narrative design is frequently oblique and obscure; its language is dense and often impenetrable; and it relates to a Germanic society that can barely be reconstructed, let alone understood, by modern scholarship. The aims of the course will be to understand the narrative design and poetic language of *Beowulf*, and then to attempt to understand these features of the poem in the context of early Germanic society. The language of *Beowulf* is difficult; therefore, a sound training in old English grammar and a good reading knowledge of old English literature, especially poetry, are essential prerequisites for the course.

### MI 40142. Chaucer: *Canterbury Tales*

(3-0-3) Kerby-Fulton

The *Canterbury Tales* are read in the original Middle English, with the twin goals of obtaining a deepened knowledge of the text-world contained within it along with

how applications of contemporary critical practices can be used to produce new insights into the work.

### MI 40149. The Literature of Late Medieval England

(3-0-3)

This course will survey various kinds of late medieval English writing, from the chivalric romance, *Sir Gawain and the Green Knight*, to the dream vision, *Piers Plowman*, to the spiritual autobiography of Margery Kempe. We will focus on the language of the period, reading several of these texts in Middle English or in facing-page translations, as well as relevant aspects of medieval culture, its modes of representation, its literary genres, and its social and political conflicts.

### MI 40161. Arthurian Legends

(3-0-3)

An examination of the textual traditions surrounding the once-and-future-king, Arthur, through readings of Geoffrey of Monmouth's *History of the Kings of Britain*; Chretien de Troyes' *The Story of the Grail*; *The Quest of the Holy Grail*; selected short fictions from the Welsh *Mabinogion*; Marie de France's *Lais*; *Sir Gawain and the Green Knight*; and selections from Malory's *Morte D'Arthur*; Tennyson's *Idylls of the King*; and T.H. White's *The Once and Future King*.

### MI 40162. Medieval Narratives

(3-0-3)

Augustine invented the term "soliloquy" and used it as a title for one of his early dialogues, in which a fictional Augustine debates with an allegorical Reason about the nature of the soul. Thus, at its very inception, the term combines the philosophical and the literary, describing a constructed narrative that unfolds through a volley of competing ideas. This course will investigate the pre-Shakespearean history of the soliloquy and the inward narrative. It will begin with Augustine's *Confessions*, and Boethius's *Consolation of Philosophy*, and then consider how the same dialectical pattern informs works in the vernacular tradition, such as the *Pearl* poem, Chaucer's *Book of the Duchess*, the *Mirror of Simple Souls*, and Julian of Norwich's *Revelations of Divine Love*. We will consider the literary construction of the "I", its relation to the narrator, and the competing forces within the "I", which both fragment and constitute its identity. We will examine the role of memory, reason, and imagination for each writer, and consider how the interplay of these forces informs the literary, philosophical, and meditative dimensions of their work.

### MI 40180. Medieval Drama

(3-0-3)

This class will exercise literary, theatrical, and religious imagination through readings, critical writing, discussion, and enactments of medieval dramatic texts. There also will be occasional viewings of filmed contemporary presentations of medieval plays. The goal of our individual and collective work aims at a deeper understanding and appreciation of what it was that medieval people meant to do when they "played" salvation history—altering, embellishing, at times "modernizing" and sometimes "deforming" the text of sacred scripture on which these pre-Renaissance dramas were based. In the course of the semester, we will attend closely to the gradual, intricate movement from sacred liturgies to secular comedies, with special attention given to the relation of actors and audiences. In so doing, we will also observe and assess—theatrically and theologically—how the comic drama of everyday events and concerns has been subtly connected to the events of salvation history. We will also try to decide whether the development of farce, ribaldry, melodrama, and realism were a logical outgrowth of, or a deviation from, the original sacred traditions. All members of the class will take their occasional turn as producers and performers. In addition to periodic short, written assignments of one to two pages, each student will submit a version of production notes and observations generated by the experience of serving as producer and/or actor in an extended scene or entire short drama. Everyone, including the teacher, will read with an open notebook: this informal reading journal will record ideas, thoughts, difficulties, insights, questions, frustrations, and illuminations that will serve simultaneously as a sourcebook for the papers and productions.

### MI 40212. Age of Charlemagne

(3-0-3) Noble

The Carolingian (from *Carolus*, Latin for Charles: Charles the Great—Charlemagne—was the most famous Carolingian) period, roughly the eighth and ninth centuries, was foundational for Western Europe. But this was also the time when the mid-Byzantine Empire consolidated its position and when the Abbasid family of caliphs introduced important and durable changes in the Islamic world. This course will focus on the West in the age of Charlemagne, but will draw frequent comparisons with and make continuous reference to Europe's Byzantine and Islamic neighbors. The course will explore such themes as Europe's Roman and Christian inheritances from antiquity; the peoples of the Carolingian world; kingship and empire; political and social institutions and ideologies; religious and secular law; war and diplomacy; agriculture and trade; the church—popes, bishops, monks, and nuns; theology; art and architecture; and Latin and vernacular literature. Reading assignments will combine modern scholarship and primary sources (in translation). Students will write midterm and final examinations and will choose between several short papers or one long paper. Graduate students will meet weekly with the professor, carry out reading assignments different from those of the undergraduates, and submit a series of short papers.

### MI 40214. Renaissance Italy

(3-0-3)

*Cerequisite:* HIST 32500

This course examines the political, cultural, social, and religious history of Italy from about 1350 to 1550. Starting with an extended study of Florence, its economic foundations, social and political structures, artistic monuments, and key personalities, the course then examines how the culture of the Florentine Renaissance spread to the rest of Italy, especially to the papal court of Rome and the princely courts of northern Italy, and, finally, to the new nation-states of northern Europe. Key topics will include the growth of the Italian city-state; the appearance of new, Renaissance “characters” (the merchant, the prince, the courtier, the mercenary, the learned lady, the self-made man); Renaissance humanism and the classical revival; the relationship between art and politics; and Renaissance ideas of liberty, virtue, historical change, and the individual's relationship to God. The course will not tell a story of steady progress from medieval to modern institutions, societies, and modes of thinking; rather, we will consider the Renaissance as a period in flux, in which established traditions thrived alongside creative innovations and vigorous challenges to authority. Students will write one long paper and take a midterm and a final exam.

### MI 40215. History of Medicine to 1700

(3-0-3)

This class surveys the history of Western biomedical ideas, research, and health care practices from ancient Mediterranean and Middle Eastern foundations to the medical reforms and materialistic theories of the mid-18th century. The canonical approach emphasizes the growth of rational medicine, focusing on the development of medical epistemology and method, but also considers how medicine as it was practiced in the West reflected classical theory, embraced folk beliefs and treatments, and integrated the therapeutic and doctrinal knowledge of medieval Islam. Medical thought and practice was shaped by the intellectual, social, and religious changes that shook Europe in the late Middle Ages and early modern period, resulting in a profound transformation of natural philosophy and efforts to reform society during the scientific revolution and nascent Enlightenment. Many of the basic elements of modern medical ethics, research methodology, and the criteria for sound scientific thinking that first emerged in late classical Greek thought were refined during this period, and much of the diversity of healing paradigms in American and European national cultures today, as well as many of the reactions of Western medical authorities to non-Western ideas and practices, can be understood if viewed in the context of antecedent medical principles.

### MI 40220. The Roman Empire

(3-0-3)

This advanced course in ancient history examines the Roman Empire from Augustus to Constantine. It deals with the establishment of the Augustan Principate and the progression of autocracy at Rome in the first two centuries of the imperial age, leading to discussion of what is generally called the third-century crisis and the new monarchy of Diocletian and Constantine. It investigates how the Roman Empire as a geopolitical unit was governed and administered (paying

particular attention to the all-powerful figure of the Roman emperor), and how the diverse regional cultures of the greater Mediterranean world were affected by Roman rule. Among topics studied are contemporary debates on Roman society, economy, demography, and culture.

### MI 40261. Politics and Religion in Medieval Europe

(3-0-3)

This course considers the intersection between political action and religious claims in medieval Europe. Virtually all the powers—kings and popes, princes and bishops—claimed to act on religious principle and in accord with transcendent notions of virtue or world order. Yet they fought bitterly with each other, with words and with swords, and mutually condemned one another. The course will begin with the showdown between emperors and popes known as the Investiture Contest, then take up pivotal figures like Pope Innocent III, King Frederick II, and Pope Boniface IX, and conclude with sections on the Spiritual Franciscans and on conciliarism.

### MI 40267. Thought and Culture in the High Middle Ages

(3-0-3)

This is a course about the thought and culture of medieval Europe in the years 1100 to 1350. The course takes seriously the notion of “mind,” that all people, whatever their gender or social class, were gifted with powers of understanding and decision making amidst life's dilemmas. It asks what we know about the way these people thought about, perceived, and experienced their world; what ideals they set for themselves; what they hoped to achieve; and how they set about the task of living. The course will proceed by lectures on specific topics and introductions to texts or authors, but in good part by way of a careful reading and discussion of assigned primary sources. Those sources will range from medieval romances to mystical poems, from political philosophy to devotional meditations.

### MI 40321. Boethius: An Introduction

(3-0-3)

This course will attempt a study of Boethius, one of the foundational figures of medieval culture, in an interdisciplinary and open-ended manner. Our approach will be interdisciplinary in that we shall simultaneously study philosophical—theological and literary subject matter and simultaneously apply philosophical—theological and literary methods. It will be open-ended in that students will be expected to react creatively to the topics under review in terms of their own independent studies and research (e.g., in connecting Latin and vernacular materials). During the course, we shall read a broad selection of passages in Latin and in English translation drawn from Boethius's work in the fields of science (arithmetic, music), logic, and theology. Part of the course will be devoted to a close study of *De Consolatione Philosophiae*. We shall study Boethius as reading intertextually the Greek philosophers Plato and Aristotle and the Greek scientists Nicomachus and Ptolemy, without forgetting the Latin theology of Augustine. Turning from Boethius to Boethius in quotation marks and Boethius “under erasure,” we shall study Boethius read intertextually by glossators, commentators, and other writers from the eighth to the 14th century. Requirement: one final essay (approx. 20 pages).

### MI 40322. Founders of the Middle Ages

(3-0-3) Gersh

One of the difficulties of studying medieval philosophy arises from the need to read, along with the medieval philosophers themselves, the various ancient sources on which they depend. Everybody knows that Plato and Aristotle enjoy a special status among these sources. It is also widely known that the philosophy of these Greek writers was transmitted to the medieval world through certain less well-known writers of Late Antiquity who sometimes overwhelmed what they were transmitting with their own thoughts and commentaries. This course is aimed at introducing the student to the three most important of these late ancient intermediaries: Augustine, Pseudo-Dionysius the Areopagite, and Boethius. In the first half of the semester, we will learn something of these writers themselves by reading some of Augustine's early dialogues, extracts from the Dionysian corpus, and Boethius' *Consolation of Philosophy* and theological tractates. After the midsemester break, the focus will shift to the medieval readings of these works: for example, in Eriugena, Anselm of Canterbury, Thierry of Chartres, Albert the Great, Meister

Eckhart, and Nicholas of Cusa. Language requirement: Latin desirable but not necessary. Written requirement: one final essay (20 pages).

### MI 40340. Aquinas on God

(3-0-3)

A close reading of the first 43 questions of the first book of the *Summa Theologiae*. These questions, which deal both with the divine essence and with the three divine persons, provide a comprehensive survey of St. Thomas's *Metaphysics*.

### MI 40361. Plato Christianus

(3-0-3)

This course is designed as an introduction to the philosophy of Plato, the "Platonism" (i.e., Middle Platonism, Neoplatonism) of antiquity, the transformation of Platonism by the Greek and Latin Church Fathers, and the medieval and Renaissance traditions derived from the above. In the first half of the semester, we shall survey the tradition as a whole and deal with a variety of general questions. However, particular attention will be given to two fundamental hermeneutic criteria employed by the followers of this tradition: namely, "radical selectivity" and "philosophical allegorization." In the second half of the semester, two specific texts that have arguably set the pattern for the Latin and Greek intellectual traditions, respectively, will be studied in more detail: Augustine's *On the City of God* and the works of Pseudo-Dionysius the Areopagite. The course is intended to be accessible to students without knowledge of Latin or Greek. Requirement: one final paper of approximately 20 pages.

### MI 40362. Deconstruction and Exegesis

(3-0-3) Gersh

The aim of this course will be to compare and contrast what one might loosely term ancient (medieval, early modern) and post-modern approaches to the reading of texts, following the twin approaches of theoretical exposition and practical application (neither of which can be sustained without the intervention of the other). It will be necessary to rely on concrete examples of the ancient and contemporary methods. The examples in the first half of the semester will be Augustine's *On Christian Teaching* and *Literal Interpretation of Genesis* and Derrida's *Of Grammatology*, *Writing and Difference*, and *Dissemination*. This double reading will put us in a position to take as our examples Augustine's *Confessions* and Derrida's *Circonfession* in the second half of the semester. Certain questions—which can sometimes but not always be answered in the conventional sense—will persist during our readings. These will include: What is philosophy? What is literature? What is the relation between philosophy and exegesis? What is the relation between literature and exegesis? What is the relation between philosophy and literature? Language requirement: Latin and/or French desirable but not necessary. Written requirement: one final essay (20 pages) either (a) on one of the texts or authors studied in the course, or (b) applying the methodologies discussed to another philosophical or literary text of your choice.

### MI 40363. Poetry and Philosophy in the Twelfth Century

(3-0-3)

This course will aim to provide a close reading of Bernard Silvestris's *Cosmographia* and Alan of Lille's *de Planctu Naturae* against the background of early 12th-century philosophical thought and grammatical-rhetorical theory. Although it will be initially necessary to cover the philological and historical ground with some care, the course will also attempt to explore in a more speculative and creative manner the question of the kind of relation between philosophy and literature in general that works like the *Cosmographia* and *de Planctu* suggest. As stimuli to such reflections, we shall pause to examine in some detail such textual phenomena as the philosophical allegory, the hermeneutical and metaphysical implications of number, the notion of self-reflexivity, and the negative symbol. The course is intended to be accessible to students without skill in Latin (although the latter would, obviously, be an advantage). Requirement: one final paper of approximately 20 pages.

### MI 40364. Anselm and Nicholas of Cusa: God as Maximum

(3-0-3)

A study of two of the most important nonscholastic philosophical writers before 1500—Anselm of Canterbury and Nicholas of Cusa—laying emphasis upon the methodological and doctrinal continuities and contrasts between them. Of

Anselm, we shall read *Monologion*, *Proslogion*, and *De Veritate*, and of Cusanus *de Docta Ignorantia*, *de li Non Aliud*, and *de Possess*. Among the philosophical issues selected for discussion will be (1) starting from Anselm's notion of God as "That-than-which-a-greater-cannot-be-thought"—the theological and cosmological notion of maximum; (2) the contrast between Anselm's Aristotelian-Boethian logic and the alternative logic(s) of Cusanus; and (3) the contrast between Anselm's (apparently) Augustinian Platonism and the more Dionysian and "Chartrian" Platonism(s) of Cusanus. Requirement: one final written paper of approximately 20 pages.

### MI 40365. Aquinas and Dante

(3-0-3)

A comparative study of two giants of medieval Catholicism. The course will be a chance to make a tour of the *Summa Theologiae* and the *Divine Comedy*, supplemented with looks at other works of these two giants of Western culture. The dependence of the *Divine Comedy* on the *Summa* is a cliché, but a close look at the theological and poetic visions of the whole of reality as seen through the eyes of faith is an essential component of cultural literacy.

### MI 40410. Jews and Christians through History

(3-0-3)

In the closing days of the Second Vatican Council *Nostra Aetate* (Declaration on Non-Christian Religions) reversed a negative attitude of the Catholic Church toward Judaism and the Jewish people. This remarkable change promoted "dialogue" with Jews, and positive changes in the ways in which Judaism was presented in liturgy and catechesis. Reactions from the Jewish communities were diverse: from rejection to welcome. This course will explore a number of issues that emerge from the history of Christian thought and theology: How did a negative image of Judaism develop within Christianity? In what ways did these unfavorable teachings contribute toward violence against the Jews? What is the relationship between Christian anti-Jewish teachings and anti-Semitism? Is there any correspondence to Christian hostility within Judaism? In what ways have Jewish authors reacted to Christian tradition? We shall also want to construct a more positive theology for the future. How can Jews and Christians develop religious responses to modernity? In what senses can a study of Judaism by Christians, or Christianity by Jews, help either community to understand itself better? How can Christians and Jews develop a theology of "the other" that is not triumphalist, but empathic?

### MI 40433. Theology of St. Augustine

(3-0-3) Daley

Augustine of Hippo was arguably the most influential theological thinker in the history of Western Christianity. A brilliant professional rhetorician and a profound student of Neoplatonic philosophy, Augustine brought his gifts and training to the service of the Church when he was baptized, after a long struggle of faith, in 387. Yet perhaps because of his gifts, he was always surrounded by controversy, and has remained so down to the present—appearing to many to be responsible for some of the main shortcomings of the Church's theology and practice, even as his writings largely set the agenda for later theological discussion in the West. In this course, we will read a representative sample of his major works—some of his early philosophical treatises, the *Confessions*, his homilies on I John and on some of the Psalms, some of his controversial works on grace and human freedom, and parts of *On Christian Teaching*, *On the Trinity*, and *On the City of God*. Our goal will be to discover Augustine's characteristic blend of exegesis, pastoral concern, philosophical speculation, and spirituality, and to let it challenge and nourish our own reflective faith.

### MI 40442. Thomas Aquinas and the Pursuit of Wisdom

(3-0-3) Wawrykow

This course offers an orientation to the theology of Thomas Aquinas through his account of "wisdom," which in Thomas refers to the contemplation of divine things and the ordering of all else in that light. The theme of "wisdom" threads its way through the entire range of Thomas's theology, and attention to "wisdom" will make clear many of Thomas's most important convictions about the nature of the theological enterprise; the interrelated doctrines of God, and, of Christ; and, the specific character of Christian discipleship.

**MI 40465. Topics in Medieval Theology: The Sacraments**

(3-0-3)

An examination of the development of Christian thought from the Council of Constance in 1415 to the First Vatican Council in 1869–70, with special attention given to the impact of the Reformation and the Enlightenment on the formation of Christian theology.

**MI 40476. The Monastic Way in the History of Christianity**

(3-0-3)

This course considers the origins of monasticism in the ascetic traditions of Second Temple Judaism/earliest Christianity and examines the varying institutions of the monastic life from the late third century through the Counter Reformation of the 16th.

**MI 40479. Medieval Jewish Bible Interpretation**

(3-0-3)

The course will deal with commentaries on the Hebrew Bible composed by five major medieval Jewish exegetes, from two main Jewish cultural entities, Ashkenaz (mostly Germany and France), and Sepharad (mostly Spain): Solomon ben Isaac (1040–1105), known as Rashi; one of Rashi's grandsons, Samuel ben Meir (ca. 1080–ca. 1170), a.k.a. Rashbam–Abraham Ibn Ezra (1089–1164); Moses ben Nahman (1194–1270), known as Nahmanides; and Isaac ben Judah Abrabanel (1437–1508). We will read and discuss commentaries of these authors (in English) on selected portions of the Hebrew Bible, chosen following the interests and wishes of the participants. We will delve also into a selection of modern scholarly works about these exegetes.

**MI 40481. Mysticism and Morality**

(3-0-3) Clairmont

Is mysticism (variously described as the presence of God, a direct experience of God, a consciousness of God, or pure love of God) the culmination of the moral life or its true beginning? To what extent should our moral decisions be guided by our personal experiences of the divine? Given the frequent appeals that thoughtful Christians make to the judgments of conscience, how if at all can we distinguish between the true voice of God in the human heart and self-consoling delusion? Are those who claim to have had, and write sweetly about, an "experience" of God real guides to be trusted by the Christian community or are they dangerous spiritual individualists who threaten the coherent moral witness of the Church? How, if at all, are we to reconcile the teachings of Christian mystical writers with the sacramental life of the Church and the cultivation of Christian virtue? Is a life of intense asceticism, or even an explicitly Christian faith, necessary for mystical knowledge? We will examine these and other questions in the four parts of the course: (1) Maps of the Soul (through a comparison of Augustine's *Confessions* and Teresa of Avila's *Interior Castle*); (2) Reasons of the Soul (through a comparison of Bonaventure's *Journey of the Mind into God* and Marguerite Porete's *Mirror of Simple Souls*); (3) Loves of the Soul (through a comparison of Catherine of Siena's *Dialogue* and Ignatius of Loyola's *Spiritual Exercises*; and (4) Questions of the Soul (through a comparison of Simone Weil's *Waiting for God* and *The Dark Night of the Soul* by John of the Cross). Course requirements include two class presentations and a final paper comparing two of the authors examined during the semester.

**MI 40482. Saints in Art and Icons**

(3-0-3) Roy

A diachronic exploration of the lives and legends of the saints as depicted in art and iconography. Students will explore lives of the saints in select *vitae* as well as the most influential hagiographical collection of the Middle Ages, *The Golden Legend* of Dominican bishop James of Voragine. Due attention is paid to the arrangement of the sanctoral cycle, the compilation of calendars and martyrologies, and the theological underpinnings of classic iconography. Primary focus on identifying saints by iconographical attributes and conventions in both western and eastern iconography.

**MI 40504. Cervantes: Don Quixote**

(3-0-3)

A close reading of Cervantes's novel in relation to the prose tradition of the Renaissance: novella, the pastoral romance, the romance of chivalry, the humanist

dialogue, and the picaresque novel. We will also pay attention to the historical, social, and cultural context of the work. Students in this seminar must participate actively in class discussions. Each student will be required to make a presentation (15 minutes) on the subject of his/her term paper. The term paper, of approximately 8–10 pages, will be on a topic individually agreed upon and discussed by each student with the instructor. No prior knowledge of Cervantes is necessary to take this course, but a solid knowledge of Spanish is required. The final grade will be given according to the following distribution: one midterm exam, 20 percent; one term paper and presentation, 40 percent; one final exam, 25 percent; class participation, 15 percent.

**MI 40533. Life, Love, and Literature in Renaissance Lyons**

(3-0-3)

The city of Lyons was a cultural center of Renaissance France. This course will focus on the literature that arose from that location, most especially (but not exclusively) the love poetry of three French Renaissance lyricists: Maurice Scève's *Délie*, the *Rymes* of Pernette Du Guillet, and the *Oeuvres Poétiques* of Louise Labé. Excerpts from other authors associated with Lyons, including Rabelais, Marot, and Du Bellay, will also be treated. This course will take a "cultural studies" approach, and students will be expected to work on topics such as the presence of Italians; royal pageantry and celebrations; the presence of the court; industry, fairs, banking and trade; architecture, art and music; intellectual circles; and the Reformation in the city of Lyons. Special attention will be given to the role of women in Lyonnais society and the *Querelle des Amyes* generated in that city. This course will be taught in French. ROFR 30310 (Textual Analysis) or prior experience with textual analysis highly recommended. NOTE: If there is sufficient interest, it may be possible to arrange a "field trip" to Lyons over spring break. Please contact the professor immediately if you have an interest in pursuing this possibility.

**MI 40538. La femme a la Renaissance**

(3-0-3) DellaNeva

This course will consider the image of women in the works of Renaissance male writers as well as the literary production of women in Renaissance France. Authors to be discussed include Jeanne Flore, Hélienne de Crennes, Marguerite de Navarre, Louise Labé, and Pernette Du Guillet. Taught in French.

**MI 40552. Dante I**

(3-0-3) Sbordoni

An in-depth study, over two semesters, of the entire *Comedy*, in its historical, philosophical, and literary context, with selected reading from the minor works (e.g., *Vita Nuova*, *Convivio*, *De vulgari eloquentia*). Lectures and discussion in English; the text will be read in the original with facing-page translation. Students may take one semester or both, in either order.

**MI 40553. Dante II**

(3-0-3) Moevs

An in-depth study, over two semesters, of the entire *Comedy*, in its historical, philosophical, and literary context, with selected readings from the minor works (e.g., *Vita Nuova*, *Convivio*, *De vulgari eloquentia*). Lectures and discussion in English; the text will be read in the original with facing-page translation. Students may take one semester or both, in either order.

**MI 40554. Petrarch**

(3-0-3)

The course will explore fundamental themes in Petrarch's writings in Latin, especially the *Secretum* and the epistles and in the *Triumphs* and the *Canzoniere*. Contemporary critical approaches will be employed in the analysis of the *Canzoniere*.

**MI 40555. Boccaccio**

(3-0-3)

A textual analysis of the *Decameron*, with emphasis on structure and themes. Different critical approaches will be used in the analysis of individual tales, their relationships to the frames, and their reflection on Boccaccio's society.

**MI 40581. Renaissance Woman**

(3-0-3)

This course is designed as an introduction to the study of women and literature of the Renaissance period in Europe. It will treat the subject of the “Renaissance woman” in three ways. First, there will be a brief historical overview of the condition of women of different social classes during this period, focusing on topics such as their education, the role of marriage, and the convent as an alternative to married life. Secondly, it will survey how women were viewed in the literature written by men in various European countries. Here we shall read excerpts from Dante and the courtly love tradition, Petrarch and the Petrarchists, Shakespeare, and Rabelais, among others. We shall also consider the portrayal of women in artistic works of this time, comparing this to their literary representation. Next, we shall study the literature created by women during the Renaissance in Europe. During this part of the course, we shall consider some of the problems generated by women’s writing, using Virginia Woolf’s *A Room of One’s Own* as a point of departure for our discussions. At the end of the course, we will resume our study of the image of woman in the Renaissance by reading a modern play set at that time (Peter Whelan’s *The Herbal Bed* on the trial of Shakespeare’s daughter) that treats some of the issues facing women at that time. All foreign texts will be read in English translation.

**MI 40606. Family and Household in the Roman World**

(3-0-3)

A survey of the life-course in Roman antiquity. Topics studied will include marriage; divorce; child rearing; old age; the way in which family and household were conceptualized by the Romans; and the demography of the Roman world.

**MI 40632. Medieval Latin Survey**

(3-0-3)

The aim of this course will be to compare and contrast what one might loosely term ancient (medieval, early modern) and post-modern approaches to the reading of texts, following the twin approaches of theoretical exposition and practical application, neither of which can be sustained without the intervention of the other. It will be necessary to rely on concrete examples of the ancient and contemporary methods. The examples in the first half of the semester will be Augustine’s *On Christian Teaching* and *Literal Interpretation of Genesis* and Derrida’s *Of Grammatology*, *Writing and Difference*, and *Dissemination*. This double reading will put us in a position to take as our examples Augustine’s *Confessions* and Derrida’s *Circonfession* in the second half of the semester. Certain questions—which can sometimes but not always be answered in the conventional sense—will persist during our readings. These will include: What is philosophy? What is literature? What is the relation between philosophy and exegesis? What is the relation between literature and exegesis? What is the relation between philosophy and literature? Language requirement: Latin and/or French desirable, but not necessary. Written requirement: one final essay (20 pages) either on one of the texts or authors studied in the course applying the methodologies discussed to another philosophical or literary text of your choice.

**MI 40633. Medieval Latin Texts**

(3-0-3)

A survey of medieval Latin texts, designed to introduce intermediate students to medieval Latin literature and to help them progress in translation skills.

**MI 40634. St. Augustine’s *Confessions***

(3-0-3)

*Prerequisite:* (CLLA 20004 OR CLLA 325)

This course provides an introduction to St. Augustine’s *Confessions*, through reading of extensive selections from the Latin text, a careful reading of the entire work in English translation, and the application of a variety of critical approaches, old and new.

**MI 40635. Creation, Time, and the *City Of God* in Augustine of Hippo**

(3-0-3) MacCormack

In his youth, Augustine (354–430 AD) received an excellent education in the Latin classics, the benefits of which remained with him throughout his life. Later,

he also read philosophical writings, and, after his conversion, works by Christian authors. The book he quoted most frequently was the Bible. From his childhood, Augustine was endowed with a most unusual ability to ask awkward questions. Initially targeting his teachers, he later addressed his questions to the authors whose books he read, and to God. His writings therefore tend to take a dialogic form where the interlocutors include not only the reader but God, and—among human beings—Cicero, Vergil, and other Romans, and also Augustine’s Christian contemporaries, including Jerome, Paulinus of Nola, and Count Marcellinus to whom he addressed the *City of God*. In following these dialogues, we will read not just Augustine’s best-known writings (*Confessions* and *City of God*) but also his commentaries on Genesis, and some of his letters and sermons. The purpose is to arrive at an understanding of Augustine’s ideas about creation and time, and about the nature of human society and its goals. We will also ask what can be learnt from Augustine’s dialogic and sometimes disputatious way of thinking, explaining, and debating. Almost all of Augustine’s writings have been translated into English, but obviously, an ability to read Latin will be most useful.

**MI 40636. Augustine and the *City of God***

(3-0-3) MacCormack

The aim of the course is to gain a detailed understanding of one of the world’s important works of historical and political theology. Writing in response to the destruction of the City of Rome by Visigothic invaders in 410 AD, Augustine devoted the first half of this “long and difficult work” to a refutation of Roman religion and ancient philosophy (Books I–X). In the second half (Books XI–XXII), he explained what he meant by City of God and Terrestrial City and traced the evolution through time of the two cities in relation to each other. We will study the *City of God* in light of the sources Augustine engaged with. For the first part, these include the philosophers Plato, Apuleius, Plotinus, and Porphyry, the historians Sallust and Livy, and also the statesman Cicero and the poet Vergil. In the second part, Augustine builds on biblical theology, history, and chronology. To conclude, we will devote some time to the influence of this very long book. It will be studied in English, but those with viable Latin will be encouraged to use it.

**MI 40681. *Der Artusroman*/Arthurian Epic**

(3-0-3)

Come and explore the enduring legend of King Arthur and his court as interpreted by German authors of the high Middle Ages (late 12th and 13th centuries). We spend the majority of the semester on the three best-known and most complete Arthurian epics in the German tradition: *Erec* and *Iwein* by Hartmann von Aue, and Wolfram von Eschenbach’s *Parzival*, as well as other later German adaptations they influenced. These tales are among the most imaginative and fascinating in the German canon, full of the adventures and exploits of knights and ladies. Our exploration of these texts focuses on their relationship to their French and English predecessors, on the many twists and turns in story line and character development that each individual author creates, and on the information they suggest about “real” life in the medieval world. We also take a look at some of the most interesting modern literary and film adaptations of the Arthurian legend.

**MI 40721. Early Medieval Art**

(3-0-3)

This course will investigate the art produced in Western Europe in the period between the seventh and 11th centuries. Often characterized as a Dark Age, this period in fact demonstrates a fertile, fluid, and inventive response to the legacy of the Roman Empire. The city of Rome, the Carolingian Empire of the ninth century, the Ottonian Empire of the 10th century, and Anglo-Saxon art will provide the primary material discussed. Themes that will thread through this course include those of papal and imperial authority and patronage, monasticism, the role of the past, the impact of theology upon artistic production, and the book.

**MI 40722. Romanesque Art**

(3-0-3)

In this course, we will examine the place of art in an expanding culture. The 11th and 12th centuries witnessed the economic and military expansion of the societies of western Europe. This growth produced a complex and rich art that can be broadly labeled as Romanesque. We will investigate this phenomenon (or rather these phenomena) through three actual and metaphorical journeys: the pilgrimage

to Santiago de Compostela, a journey to the ruins of ancient Rome, and a visit to the Palestine of the Crusades. These journeys, in many ways typical of this period, will provide the means of examining how the art of this period responds to the various new demands of an increasing knowledge provoked by travel.

#### MI 40723. Byzantine Art

(3-0-3)

Byzantine art has often been opposed to the traditions of western naturalism, and as such has been an undervalued or little known adjunct to the story of medieval art. In order to develop a more sophisticated understanding of this material we will examine the art produced in Byzantium in the period from the ninth to the 12th century, a period that marks the high point of Byzantine artistic production and influence. Stress will be placed on the function of this art within the broader setting of this society. Art theory, the notions of empire and holiness, the burdens of the past, and the realities of contemporary praxis will be brought to bear on our various analyses of material from all media. How we, as art historians can write the history of this rich culture will be a central issue of this course.

#### MI 40725. Fifteenth-Century Italian Renaissance Art

(3-0-3) Rosenberg

Open to all students. This course investigates the century most fully identified with the early Renaissance in Italy. Individual works by artists such as Brunelleschi, Donatello, Ghiberti, Botticelli, and Alberti are set into their social, political, and religious context. Special attention is paid to topics such as the origins of art theory, art and audience, portraiture and the definition of self, Medician patronage, and art for the Renaissance courts of northern Italy and Naples.

#### MI 40726. Northern Renaissance Painting

(3-0-3)

Open to all students. This course traces the development of painting in Northern Europe (France, Germany, and Flanders) from approximately 1300 to 1500. Special attention is given to the art of Jan Van Eyck, Roger van der Weyden, Heironymous Bosch, and Albrecht Dürer. Through the consideration of the history of manuscript and oil painting and the graphic media, students will be introduced to the special wedding of nature, art, and spirituality that defines the achievement of the Northern Renaissance.

#### MI 40784. Vocal Sacred Music II

(3-0-3) Blachly

Vocal Sacred Music II is devoted to Renaissance polyphony (ca. 1400–1600). The course will cover matters of liturgy, performance practice, musical forms, notation, sources, and major composers. The course is open to upper-class music majors and graduate students in the Medieval Institute and Master of Sacred Music Program.

#### MI 43001. Senior Seminar: Medieval Studies

(3-0-3)

Required for a major in medieval studies, the advanced seminar presents students with an issue of multidisciplinary significance to scholars of the Middle Ages and asks them to analyze the topic from a variety of viewpoints. The analysis requires extensive primary source readings as well as a review of secondary source literature. Thoughtful class discussion encourages more detailed individual exploration in the form of a substantial research paper on a topic selected in consultation with the instructor. The goal of the seminar is to engage students in thinking critically and knowledgeably across the boundaries of traditional disciplines while maintaining a focus on a particular time, place, or issue.

#### MI 43181. Seminar: Mystic Voices

(3-0-3) Ziemann

The divine “vision” was a special form of religious experience in medieval Europe. In this class, we will read both primary texts and some modern critical theory to consider texts reporting visionary experience as problems of representation. How could experiences of such intensity be represented in writing? How were they to be interpreted? Who had the authority to do so? Why were visions so much more common to women than men?

#### MI 43285. Knighthood and Chivalry in Medieval Europe, 750–1625

(3-0-3) Boulton

This course introduces students to the history of knighthood (the status of noble heavy cavalryman) and chivalry (the distinctive ethos and code of the knightly class) from their emergence in Western Europe between 950 and 1180 through their apogee between 1180 and 1380 to their slow decline between 1380 and 1625 (and their revival in the 19th century). It will deal first with the knight as warrior, vassal, and monk (in the religious orders of knighthood), then with the knight as nobleman and landowner, and finally with the knight as courtier and civil servant in the emerging state. It will next proceed to an examination of knightly games, festivals, and iconography, and conclude with a look at the survival and revival of chivalry in the post-Gothic period.

#### MI 43303. The History of Medieval Philosophy

(3-0-3) Dumont

A semester-long course focusing on the history of medieval philosophy. It provides a more in-depth consideration of this period than is allowed in PHIL 30301, Ancient and Medieval Philosophy, and may be considered a follow-up to that course.

#### MI 43323. Moses Maimonides

(3-0-3)

A careful reading of Maimonides' philosophical classic *A Guide for the Perplexed*. Close attention will be paid to its influence on Aquinas.

#### MI 43341. Aquinas's Philosophy and Theology

(3-0-3) O'Callaghan

A close examination of the philosophical arguments within the first 13 questions of Aquinas's *Summa Theologiae*, including arguments about the distinction between philosophy and sacred theology, the existence of a god, divine simplicity, divine perfection, divine goodness, divine infinity, divine immutability, divine eternity, divine unity, how God is known by us, and how God is spoken about by us.

#### MI 43506. Senior Spanish Seminar

(3-0-3)

This course may cover an in-depth study of a particular author, theme, genre, or century. In addition to treating primary texts, some critical material will be required reading. The course culminates in a substantial research paper. May be taken either fall or spring term.

#### MI 43556. Senior Italian Seminar

(3-0-3)

An in-depth study of a particular author, theme, genre, or century. In addition to treating the primary texts, some critical material will be required reading. This course culminates in a substantial research paper. Taught in Italian.

#### MI 43750. Seminar: Topics in Medieval Art

(3-0-3)

The subject of this seminar will vary from year to year.

#### MI 43751. Renaissance Art Seminar

(3-0-3)

Seminar on specific subjects in Renaissance art.

#### MI 46020. Directed Readings: Undergraduate

(V-0-V)

Offers advanced undergraduate students a possibility to work closely with a professor in preparing a topic mutually agreed upon.

#### MI 47801. Research in Biocultural Anthropology

(6-0-6)

The Jerusalem field school will engage students in an experiential learning environment that immerses them in anthropological method and theory. Using the large Byzantine St. Stephen's skeletal collection as the cornerstone, historical and archaeological information will be synthesized in a biocultural reconstruction of ancient monastic life. Students will conduct original research, share in a field

trip program visiting numerous Byzantine sites and area research institutions, and participate in a lecture program delivered by top scholars in the fields of biological anthropology, classics, and Near Eastern studies.

## Department of Music

### MUS 10010. Rudiments of Music

(1-0-1)

A course designed for students with little or no musical background. Topics covered include musical notation, scales, keys, key signatures, triads, seventh chords, rhythm, and meter.

### MUS 10090. Theory for Non-Majors

(3-0-3)

A one-semester survey of the structure of tonal music. Topics covered include chord formation, voice leading, harmonic progression, cadences, dissonance treatment, and form.

### MUS 10111. Introduction to Eighteenth-Century Music

(3-0-3)

Introduction to the major composers and musical genres of the 18th century. Composers studied include Vivaldi, Bach, Handel, C.P.E. Bach, Gluck, Mozart, and Haydn; musical genres studied include the cantata, concerto, sonata, fantasia, quartet, opera, and oratorio. Readings include reactions and criticisms of 18th-century listeners and writings of modern music scholars.

### MUS 10112. Mozart, Beethoven, Schubert, Wagner, and Brahms

(3-0-3)

Music in its historical context.

### MUS 10120. Introduction to Romantic Music

(3-0-3)

Music from Beethoven to Mahler. No musical background required.

### MUS 10121. Introduction to European Romanticism

(3-0-3)

A survey of 19th-century European Romanticism in art and music. No musical background required.

### MUS 10125. Literature and Opera

(3-0-3) MacKenzie

In this course, the full title of which is “Taking Liberties: From Book to Libretto, or French Literature Goes to the Opera,” and which is being taught in ENGLISH for the first time, we will be looking at a series of “parent” texts, written originally in French, and their operatic “offspring.” Our objective will be less to highlight textual difference, although in certain cases that is far from being an uninteresting area of investigation, than to appreciate the theme and variation of, let us say, Mérimée’s *Carmen* and the treatment she gets in Bizet’s opera. Among the text/operas we will examine are books (in English translation or in the original French depending on individual student preference and as operas (DVD projections with subtitles) will be *The Barber of Seville* (Beaumarchais/Rossini); *The Marriage of Figaro* (Beaumarchais/Mozart); *Don Juan* (Molière) and *Don Giovanni* (Mozart); *Manon Lescaut* (Prévost/Puccini); and *Carmen* (Mérimée/Bizet). We may try for one more: either *Le roi s’amuse* (Hugo), *Rigoletto* (Verdi), *La dame aux camélias* (Dumas, or *La Traviata* (Verdi). As a so-called “appreciation” course, students need not necessarily know French or music theory. What are required are open minds, eyes, and ears. There will be two papers, the second being more ambitious than the first, and a final exam. *Prerequisite:* 30xxx-level literature or music course, or permission of instructor. This course does fulfill a 40xxx-level requirement for French majors. This course does not fulfill a 20xxx-level class for music majors.

### MUS 10131. Introduction to Jazz

(3-0-3) Dwyer

A music appreciation course requiring no musical background and no prerequisites. General coverage of the history, various styles, and major performers of jazz, with an emphasis on current practice.

### MUS 10132. Current Jazz

(3-0-3) Dwyer

A study of the jazz performers and practices of the latter half of the 20th century to today—the roots, stylistic developments, and directions of individual artists,

small combos, and big bands, using recordings, videos, and live concerts. No musical experience is required.

**MUS 10133. Gender, Sexuality in Pop Media**

(3-0-3)

This course focuses on predetermined gendered roles and sexuality in our culture as represented in popular media. Special emphasis will be placed on film as we look at, among other things, issues of sexuality and homosexuality on the silver screen. We will also look closely at music, the emergence of a female presence, music videos, and hip-hop culture.

**MUS 10150. Music of the Catholic Rite**

(3-0-3)

A study of the music composed for the Mass, the Office hours (primarily Vespers), and the Requiem Mass from the Middle Ages to the present day. The musical repertoire of each era is examined both from a purely musical standpoint and in light of the reactions of various popes, from John XXIII through Pius X, to the sacred music of their day. Documents on sacred music issued after Vatican II also are examined in relation to postconciliar church music for both the choir and the congregation.

**MUS 10190. Introduction to Classical Music**

(3-0-3)

Historical survey of Western art music from the Middle Ages to the present, with emphasis on the study of selected significant vocal and instrumental works.

**MUS 10191. Medieval and Renaissance Music (History I)**

(3-0-3)

A survey of music. The study of the major forms and styles in Western history. Required of music majors and minors, but open to students with sufficient musical background. MUS 20001 and MUS 20002 recommended before taking this class.

**MUS 10201. Brass Ensemble**

(1-0-1) O'Leary

Special groups of brass instruments meeting weekly. Literature covered will depend upon the nature of the ensembles organized and student enrollment. Will not apply to overload.

**MUS 10203. Percussion Ensemble**

(V-0-V) Sanchez

This ensemble is organized according to the needs of those who audition through the regular process at the beginning of each semester. It consists of those for whom the larger ensembles are inappropriate. Examples include Clarinet Choir, Percussion Ensemble, and other band instrument ensembles.

**MUS 10210. Chorale**

(1-0-1) Blachly

A select group devoted to the singing of diversified sacred and secular literature. Performs at Notre Dame and on tour.

**MUS 10221. Glee Club**

(1-0-1) Stowe

Notre Dame's traditional all-male choir.

**MUS 10222. Collegium Musicum**

(1-0-1) Stowe

A select choir that concentrates its performances in the medieval and Renaissance repertoire.

**MUS 10230. Jazz Ensemble**

(1-0-1) Dwyer

Open through audition.

**MUS 10231. New Orleans Brass Band**

(1-0-1) Merten

An ensemble performing the traditional and new music of New Orleans-style brass bands.

**MUS 10240. Symphonic Winds**

(1-0-1) Dye

This ensemble prepares and performs traditional and contemporary works for band in a smaller, wind ensemble setting, rehearsing twice per week, with a short concert tour and two concerts during the semester.

**MUS 10241. Wind Ensembles**

(1-0-1) Dye

Wind and brass ensembles assembled for performance with special instrumentation.

**MUS 10242. Symphonic Band**

(1-0-1) Dye

This ensemble prepares and performs traditional and contemporary works for band in a large concert ensemble setting, rehearsing twice per week, with a short concert tour and two concerts during the semester.

**MUS 10244. Fall Concert Band**

(1-0-1) Sanchez

This ensemble prepares and performs traditional and contemporary works for band in a large concert ensemble setting, rehearsing once per week with one concert near the end of the semester.

**MUS 10245. University Band**

(1-0-1) Dye

This ensemble will provide a traditional concert band experience for brass, woodwind, and percussion players in the Notre Dame community. Under the direction of Prof. Kenneth Dye and the Notre Dame band staff, the University band prepares and performs a wide variety of music, including everything from marches, overtures, and pop melodies to the traditional Notre Dame favorites. Rehearsals take place in the Band Building. Those who are able may register for "MUS 10245, University Band" for one credit, although registration is not required to participate. Application for membership can be made by contacting the band office.

**MUS 10246. Varsity Band**

(0-0-1) Dye

Performs for athletic events and special functions. Does not apply to overload.

**MUS 10247. Concert Winds**

(1-0-1) Dye

This ensemble prepares and performs traditional and contemporary works for band in a small, wind ensemble setting, rehearsing once per week with one concert near the end of the semester.

**MUS 10249. Marching Band**

(1-0-1) Dye

Performs for athletic events and special functions. Admission by audition.

**MUS 10250. Orchestra**

(1-0-1) Stowe

Performs music from the 18th to the 20th century in several concerts a year.

**MUS 10251. Chamber Orchestra**

(1-0-1) Blachly

An ensemble of 10 to 15 players drawn primarily from the ranks of the Notre Dame orchestra.

**MUS 10300. Piano Class**

(1-0-1) Blacklow

Piano instruction for beginners. Classes consist of 5 to 10 students meeting one hour per week. Arranged according to student's schedule. A fee of \$240 is charged per semester, which includes instruction and an hour's daily use of the practice facilities. Must sign up in the Music Department office (105 Crowley Hall) to get department approval.

**MUS 10340. Voice Class**

(1-0-1) Resick

A class for beginners in voice. Must sign up in the Music Department office (105 Crowley Hall) to get department approval.

**MUS 10351. Guitar Class I**

(0-0-1) Miller

A class for beginners in guitar. Must sign up in the Music Department office (105 Crowley Hall) to get department approval.

**MUS 10352. Guitar Class II**

(0-0-1) Miller

For those who have passed section I or equivalent studies. In class II the student will develop further the ability to play solo pieces, interact as an ensemble, and develop chord knowledge and accompaniment styles. Must sign up in the Music Department office (105 Crowley Hall) to get department approval.

**MUS 10353. Guitar Class III**

(0-0-1) Miller

For those who have passed section II or equivalent studies. The student continues in all aspects of development and begins learning music of more depth and difficulty. Must sign up in the Music Department office (105 Crowley Hall) to get department approval.

**MUS 10361. Contemporary Songwriting**

(1-0-1)

*Prerequisite:* (MUS 20001 OR MUS 231)

Exploring fundamentals of songwriting, composing, and performing vocal or instrumental songs.

**MUS 11300. Piano**

(V-0-V)

Lessons for nonmajors. Some prior study of piano is advised. Half-hour lessons or one-hour lessons reserved for students of upper-intermediate performance ability as determined through audition. Lessons are given by members of the department and by outside, part-time associate instructors. Must sign up in the Music Department office (105 Crowley Hall) to get department approval.

**MUS 11301. Organ**

(V-0-V)

Lessons for nonmajors. Some prior study of organ is advised. Half-hour lessons or one-hour lessons reserved for students of upper-intermediate performance ability as determined through audition. Lessons are given by members of the department and by outside, part-time associate instructors. Must sign up in the Music Department office (105 Crowley Hall) to get department approval.

**MUS 11302. Harpsichord**

(V-0-V)

Lessons for nonmajors. Individual instruction. Must sign up in the Music Department office (105 Crowley Hall) to get department approval.

**MUS 11303. Jazz Piano**

(V-0-V)

Lessons for nonmajors. Individual instruction according to the level and ability of the student. Must sign up in the Music Department office (105 Crowley Hall) to get department approval.

**MUS 11307. Fortepiano**

(V-0-V)

Lessons on an early 19th-century, Graf-style piano. Must sign up in the Music Department office (105 Crowley Hall) to get department approval.

**MUS 11310. Violin**

(V-0-V)

Lessons for nonmajors. Some prior study of violin is advised. Half-hour lessons or one-hour lessons reserved for students of upper-intermediate performance ability as determined through audition. Lessons are given by members of the department

and by outside, part-time associate instructors. Must sign up in the Music Department office (105 Crowley Hall) to get department approval.

**MUS 11311. Viola**

(V-0-V)

Lessons for nonmajors. Individual instruction. Some prior study of the viola is advised. Half-hour lessons or one-hour lessons reserved for students of upper-intermediate performance ability as determined through audition. Lessons are given by members of the department and by outside, part-time associate instructors. Must sign up in the Music Department office (105 Crowley Hall) to get department approval.

**MUS 11312. Cello**

(V-0-V)

Lessons for nonmajors. Some prior study of cello is advised. Half-hour lessons or one-hour lessons reserved for students of upper-intermediate performance ability as determined through audition. Lessons are given by members of the department and by outside, part-time associate instructors. Must sign up in the Music Department office (105 Crowley Hall) to get department approval.

**MUS 11313. String Bass**

(V-0-V)

Lessons for nonmajors. Individual instruction. Must sign up in the Music Department office (105 Crowley Hall) to get department approval.

**MUS 11314. Harp**

(V-10-V)

Lessons for nonmajors. *Prerequisite:* Musical background. Individual instruction. Must sign up in the Music Department office (105 Crowley Hall) to get department approval.

**MUS 11320. Woodwinds**

(V-0-V)

Lessons for nonmajors. Individual instruction. Must sign up in the Music Department office (105 Crowley Hall) to get department approval.

**MUS 11321. Brass**

(V-0-V)

Lessons for nonmajors. Individual instruction. Must sign up in the Music Department office (105 Crowley Hall) to get department approval.

**MUS 11330. Percussion**

(V-0-V)

Lessons for nonmajors. Individual instruction. Must sign up in the Music Department office (105 Crowley Hall) to get department approval.

**MUS 11340. Voice Class**

(V-0-V)

Lessons for nonmajors. Some prior study of voice is advised. Half-hour lessons or one-hour lessons reserved for students of upper-intermediate performance ability as determined through audition. Lessons are given by members of the department and by outside, part-time associate instructors. Must sign up in the Music Department office (105 Crowley Hall) to get department approval.

**MUS 11351. Jazz Guitar**

(V-0-V)

Lessons for nonmajors. Classes consist of seven to 12 students meeting one hour per week. Arranged according to student's schedule. A fee of \$190 is charged per semester. Does not apply to overload. Must sign up in the Music Department office (105 Crowley Hall) to get department approval.

**MUS 11390. Music Technology Lessons**

(V-0-V)

Private instruction on the various facets of music technology including, but not limited to Finale, Reason, Cool Edit and other music technology programs. Lesson fee applies. Does not count toward lesson requirement for music majors.

**MUS 13182. Fine Arts University Seminar**

(3-0-3) Frandsen, Youens

This is a University seminar course offered by the Music Department.

**MUS 20001. Harmony and Voice Leading (Theory I)**

(3-0-3) Haimo, Smith

A systematic approach to the understanding and manipulation of the basic materials of music. Required of and intended for music majors and minors, but open to students with sufficient musical background.

**MUS 20002. Music Theory II**

(3-0-3) Johnson, Smith

*Prerequisite:* (MUS 20001 OR MUS 231)

A systematic approach to the understanding and manipulation of the basic materials of music. Required of and intended for music majors and minors, but open to students with sufficient musical background.

**MUS 20011. Musicianship I**

(1-0-1) Tidaback

Exercise and mastery of basic skills in music: melodic, harmonic, rhythmic, and keyboard. To be taken along with Theory I and II. Required of all students intending to major in music.

**MUS 20012. Musicianship II**

(1-0-1) Tidaback

Exercise and mastery of basic skills in music: melodic, harmonic, rhythmic, and keyboard. To be taken along with Theory I and II. Required of all students intending to major in music.

**MUS 20041. Counterpoint**

(3-0-3) Haimo

*Prerequisite:* (MUS 20001 OR MUS 231) OR (MUS 10090 OR MUS 230)

This course will focus on the practice of counterpoint—the writing of independent voices and their polyphonic combination. This course is designed primarily for music majors, but qualified nonmajors are also welcome. (The prerequisite for the course is normally Theory I, but Theory for Nonmajors can also serve as a prerequisite.) For more than 400 years, the polyphonic vocal music of the 16th century (and the music of Palestrina, in particular) has been viewed as an ideal. Ever since the 18th century, the craft of counterpoint has been learned using a pedagogic method called species counterpoint. (When Beethoven came to Vienna to study with Haydn, he studied species counterpoint with Haydn.) Species counterpoint is a graded set of compositional problems that take the student from the simplest rhythmic situations for two voices, progressively through more complicated rhythmic situations, all the way to free writing for four or more voices. Students will be assigned species counterpoint exercises for every other class. In class, the assignments will be put up on the board and critiqued. The final project for this course will be the writing of a motet for four voices in the style of Palestrina. Essential for any student interested in composition, species counterpoint is also invaluable as a tool to understand the inner workings of polyphonic music and the treatment of dissonance throughout the Baroque, Classical, and Romantic eras.

**MUS 20101. Medieval and Renaissance Music History I**

(3-0-3) Blachly

A survey of music. The study of the major forms and styles in Western history. Required of music majors and minors, but open to students with sufficient musical background. MUS 20001 and MUS 20002 recommended before taking this class.

**MUS 20112. Baroque Music (History II)**

(3-0-3) Frandsen

*Prerequisites:* MUS 20002 AND MUS 20001

A survey of music. The study of the major forms and styles in Western history. Required of music majors and minors, but open to students with sufficient musical background. MUS 20001 and MUS 20002 recommended before taking this class.

**MUS 20141. Understanding World Music**

(3-0-3)

This course introduces a wide variety of musical systems, emphasizing the integration of culture-specific concepts about musical sound with the particular historical, social, and political contexts that shape and are shaped by that sound. Select musical case studies from South Asia, Africa, and Latin America will be explored and juxtaposed to reveal relationships to relevant themes such as nationalism, migration/diaspora, spirituality, the social position of music/musicians, improvisation, and social protest. No background in music is required, only open ears and minds.

**MUS 20145. Appreciating World Music**

(3-0-3) Ng

*Prerequisites:* (MUS 20001 OR MUS 231 AND MUS 20002 OR MUS 232)

Through this ethnomusicology course, students will learn the roles music occupies in world religions. More than a world music course, we will examine the creative expression of the divine through the universal language of organized sound as music, as music plays a major role in the practice of most religions worldwide. This study involves all the major continents, highlighting new perspectives as to the confluence between religious culture and musical expression. Knowledge of music beneficial but not required; just ears and minds open to the diverse ontological understandings comprising various worldviews.

**MUS 20146. Music and Globalization in Asia**

(3-0-3) Ng

This course explores musical production in India and China, the “new cultural cores” that are gradually replacing the USA and Western Europe in cultural influence in Asia and the Asian diaspora. Taking into account these countries’ colonial and semi-colonial histories, their political and economic development, and the increasing transnational movement of their citizens, this course charts the development of commercially successful music from these countries— bhangra; Bollywood; Chinese pop; and fusion music popularized by bands like Twelve Girl Band and composers like Tan Dun in films like *Crouching Tiger, Hidden Dragon* that have not only captured Asia but the West as well, and shaped the imagination of what Indian-ness and Chinese-ness are, both to the Chinese/Indians and non-Chinese/Indians. In addition, this course examines Filipino entertainers, a group of musicians who provide live entertainment of a transnational capacity throughout Asia. They represent important channels for the dissemination of Indian and Chinese popular music in that region. Globalization and cosmopolitanism theories will be discussed in this course.

**MUS 20147. Music of Africa and the African Diaspora**

(3-0-3) Ngwenyama

Students explore music from West Africa, Southern Africa, East Africa, and the Caribbean, South America, and the United States, paying close attention to how their reception and performance inform and influence each other historically and contextually. The seminar emphasizes an interdisciplinary approach to the subject, drawing from the ethnomusicology, African and African American studies, anthropology, and colonial and postcolonial studies.

**MUS 20148. Music and World Religions**

(1.15-0-3) Ngwenyama

Through this ethnomusicology course, students will learn the roles music occupies in world religions. More than a world music course, we will examine the creative expression of the divine through the universal language of organized sound as music, as music plays a major role in the in the practice of most religions worldwide. This study involves all the major continents, highlighting new perspectives as to the confluence between religious culture and musical expression. Knowledge of music beneficial but not required; just ears and minds open to the diverse ontological understandings comprising various worldviews.

**MUS 20491. Instrumental Techniques**

(3-0-3) O’Leary

A hands-on music and liberal arts course designed to teach students instrumental techniques in preparation for experiential learning experiences within the local community and abroad. Students will receive instruction on wind and percussion instruments that will enable them to excel while outside the classroom. Students

will apply these skills as directors and mentors in the Bandlink program and service opportunities overseas.

### MUS 20651. Ensemble Management

(3-0-3) Dye

Students will learn pedagogical techniques to help them manage a large ensemble rehearsal. Students will receive one-on-one instruction from faculty as well as have extensive hands-on opportunities to practice these techniques. Students will serve as directors within the Bandlink program and share responsibility for classroom management, literature selection, instruction, logistics, and budget.

### MUS 20691. Instrumental Pedagogy

(1-0-1) Dye

Notre Dame students will learn teaching techniques on their instruments through hands-on instruction of local students in the Bandlink program. Instruction will be in individual lessons and small group rehearsals.

### MUS 20890. The Business of Music

(3-0-3) Dye

A historical survey of the synergistic relationship between music and business. Covering major technological, legal, and economic forces influencing the musical arts. This class will address the latest developments by studying historical practices, cutting-edge technologies, emergent business practices, and global trends in both business and music.

### MUS 20941. Vocal Physiology and Pedagogy

(1-0-1)

In this class, students will learn in detail the anatomical structures and processes that are involved in singing. They will also be introduced to important concepts and issues involved in vocal pedagogy. Coursework will involve class participation, reading assignments, tests, and a small project.

### MUS 21046. Music and Globalization in Asia

(3-0-3)

This course explores musical production in India and China, the “new cultural cores” that are gradually replacing the USA and Western Europe in cultural influence in Asia and the Asian diaspora. Taking into account these countries’ colonial and semi-colonial histories, their political and economic development, and the increasing transnational movement of their citizens, this course charts the development of commercially successful music from these countries— bhangra; Bollywood; Chinese pop; and fusion music popularized by bands like Twelve Girl Band and composers like Tan Dun in films like *Crouching Tiger, Hidden Dragon* that have not only captured Asia but the West as well, and shaped the imagination of what Indian-ness and Chinese-ness are, both to the Chinese/Indians and non-Chinese/Indians. In addition, this course examines Filipino entertainers, a group of musicians who provide live entertainment of a transnational capacity throughout Asia. They represent important channels for the dissemination of Indian and Chinese popular music in that region. Globalization and cosmopolitanism theories will be discussed in this course.

### MUS 30003. Chromatic Harmony (Theory III)

(3-0-3) Smith

*Prerequisites:* (MUS 20001 OR MUS 231) AND (MUS 20002 OR MUS 232)

Studies in advanced harmony.

### MUS 30004. Twentieth-Century Music Theory IV

(3-0-3) Johnson

Intended for music majors. The theoretical and historical sources and development of music from Debussy to the present.

### MUS 30013. Musicianship III

(1-0-1)

*Prerequisite:* (MUS 20011 OR MUS 233) OR (MUS 20012 OR MUS 234)

Exercise and mastery of more advanced skills in music: melodic, harmonic, rhythmic, keyboard, and score reading. To be taken along with Theory III and IV. Required of all students majoring in music.

### MUS 30014. Musicianship IV

(1-0-1)

Exercise and mastery of more advanced skills in music: melodic, harmonic, rhythmic, keyboard, and score reading. To be taken along with Theory III and IV. Required of all students majoring in music.

### MUS 30050. Orchestration

(3-0-3)

A class focusing on (1) the ranges, techniques, and timbres of each orchestra instrument, and (2) major scoring problems, as well as techniques of transcribing piano, chamber, and band music for orchestra.

### MUS 30123. Classical and Romantic Music (History III)

(3-0-3) Youens

A survey of music. The study of the major forms and styles in Western history. Required of music majors and minors, but open to students with sufficient musical background. MUS 20001 and MUS 20002 recommended before taking this class.

### MUS 30141. Music, Religion, and Media in South Asia

(3-0-3)

This course explores the meaning of musical sound across a range of spiritual and mass-mediated contexts from North and South India, Pakistan, and Nepal. Special attention is paid to the ecstatic and spiritual uses of music in the rituals and performances of various Buddhist, Hindu, Muslim (especially Sufi), Christian, Sikh, and agnostic communities. An underlying focus of the course is the relationship between the sacred and the secular, and between commercial and devotional practices of music making and music listening: How do musical and spiritual practices become commercialized by mass-mediated production and reception? Conversely, are there ways in which the uses of mass-mediated music are ritualized and take on a spiritual dimension? We will approach these and other related questions through case studies, such as Muslim-Hindu relations as depicted in “Bollywood” movies, cassette-playing as a devotional act on Himalayan pilgrimages, and classical music performance as the expression of religious sentiment. Musical experience and ability to read music are preferred, but not required.

### MUS 30142. Post-Nineteenth-Century Music of African Diaspora

(3-0-3)

Study of a specific geographical area in world music to be determined by the professor.

### MUS 30200. Chamber Music

(1-0-1) Buranskas

Study and performance of selected chamber compositions. Intended for music majors or with special permission.

### MUS 30210. Opera Workshop

(1-0-1)

A group devoted to the performance of classical operas.

### MUS 30211. Opera Production

(1-0-1) Beudert

Performance of an opera. Admission by audition.

### MUS 30213. Opera Scenes

(1-0-1) Beudert

The course will end with workshop performances of various scenes, accompanied by piano, taking place in early December at a venue to be announced.

### MUS 30400. Piano Performance Class

(1-0-1) Blacklow

Master class format designed to give piano students opportunities in which to perform.

### MUS 30410. String Performance Techniques

(1-0-1) Buranskas, Plummer

Performance class/master class format designed to give string students opportunities to perform.

**MUS 30451. Conducting I**

(2-0-2) Stowe

Basic techniques of instrumental and choral conducting. For music majors only or with special permission of the instructor.

**MUS 30452. Conducting II**

(2-0-2)

Basic techniques of instrumental and choral conducting. For music majors only or special permission of the chairman of the department.

**MUS 30453. Instrumental Conducting**

(3-0-3) O'Leary

Instrumental conducting provides basic to intermediate theory and technique for rehearsing and conducting instrumental ensembles. Presented in a participatory ensemble setting in which students conduct and play for their peers, the course provides opportunities for development and growth through peer feedback, videotape evaluation, and staff mentoring. Specific areas of instruction related to conducting will include fundamentals of score reading, baton technique, rehearsal techniques, and musical interpretation.

**MUS 31300. Piano**

(V-0-V)

Private lessons at an advanced level for music majors. Must sign up in the Music Department office (105 Crowley Hall) to get department approval.

**MUS 31301. Organ**

(V-0-V)

Private lessons at an advanced level for music majors. Must sign up in the Music Department office (105 Crowley Hall) to get department approval.

**MUS 31302. Harpsichord**

(V-0-V)

Private lessons at an advanced level for music majors. Must sign up in the Music Department office (105 Crowley Hall) to get department approval.

**MUS 31310. Violin**

(V-0-V)

Private lessons at an advanced level for music majors. Must sign up in the Music Department office (105 Crowley Hall) to get department approval.

**MUS 31311. Viola**

(V-0-V)

Private lessons at an advanced level for music majors. Must sign up in the Music Department office (105 Crowley Hall) to get department approval.

**MUS 31312. Cello**

(V-0-V)

Private lessons at an advanced level for music majors. Must sign up in the Music Department office (105 Crowley Hall) to get department approval.

**MUS 31314. Harp**

(V-0-V)

Private lessons at an advanced level for music majors. Must sign up in the Music Department office (105 Crowley Hall) to get department approval.

**MUS 31320. Woodwinds**

(V-0-V)

Private lessons at an advanced level for music majors. Must sign up in the Music Department office (105 Crowley Hall) to get department approval.

**MUS 31321. Brass**

(V-0-V)

Private lessons at an advanced level for music majors. Must sign up in the Music Department office (105 Crowley Hall) to get department approval.

**MUS 31330. Percussion**

(V-0-V)

Private lessons at an advanced level for music majors. Must sign up in the Music Department Office(105 Crowley Hall) to get department approval.

**MUS 31340. Voice**

(V-V-V)

Private lessons at an advanced level for music majors. Must sign up in the Music Department Office(105 Crowley Hall) to get department approval.

**MUS 31350. Guitar**

(V-0-V)

Individual instruction. Must sign up in the Music Department Office(105 Crowley Hall) to get department approval.

**MUS 31360. Composition**

(V-0-V)

Creative writing in various forms, conventional and contemporary. Private instruction only. Must sign up in the Music Department Office(105 Crowley Hall) to get department approval.

**MUS 37900. Special Studies**

(V-0-V)

An individualized course in directed studies under personal supervision of the teacher.

**MUS 38390. Junior Recital**

(1-0-1)

Majors only. Public performance of appropriate solo repertoire.

**MUS 40023. Twentieth-Century Russian Composers: Skryabin, Stravinsky, Prokofiev, Shostakovich**

(3-0-3) Johnson

*Prerequisites:* (MUS 20001 OR MUS 231) AND (MUS 20002 OR MUS 232) AND MUS 30003 AND MUS 30004

The analysis of works by Skryabin, Stravinsky, Prokofiev, and Shostakovich, with particular attention to theories that have been developed to explain their music.

**MUS 40025. Music Theory V**

(3-0-3)

*Prerequisites:* (MUS 20001 OR MUS 231) AND (MUS 20002 OR MUS 232) AND (MUS 30003 OR MUS 251)

A study of the procedures for harmonic, melodic, rhythmic, and formal analysis.

**MUS 40052. Orchestration and Synthesetration Through Songwriting**

(3-0-3)

*Prerequisite:* (MUS 10090 OR MUS 230) OR (MUS 20001 OR MUS 231)

This course will investigate first the standard orchestral and popular instruments by arranging and performing student songs, from liturgical to popular to art song. The second half of the course will investigate MIDI synthesis, notation, and recording as it applies to songwriting. Students will be assigned different song-form projects in various genres and instrumental combinations. Arranging those songs for instruments and synthesizers, notating them efficiently and clearly, and communicating their intentions to performers will constitute the bulk of the course. Special emphasis will be placed on techniques for orchestrating piano music.

**MUS 40122. Goethe and Song**

(3-0-3) Youens

A study of 19th and 20th century songs to poetry by the great German writer Johann Wolfgang von Goethe (1749-1832), including music by Schubert, Schumann, Brahms, Hugo Wolf, and many others.

**MUS 40402. Piano Collaboration**

(1-0-1)

For advanced piano students only, by permission of instructor. Pianists in this course have an opportunity to develop the specific skills and abilities needed for

accompanying vocalists and/or instrumentalists, and are encouraged to bring their colleagues to class.

**MUS 40441. Diction I - German**

(1-0-1) Resick

Elements and expressive techniques of German diction, utilizing the International Phonetic Alphabet.

**MUS 40442. Diction II - English, Italian**

(1-0-1) Resick

Elements and expressive techniques of English and Italian diction, utilizing the International Phonetic Alphabet.

**MUS 40443. Diction III-French**

(1-0-1)

Elements and expressive techniques of French diction, utilizing the International Phonetic Alphabet.

**MUS 40444. French Vocal Literature**

(1-0-1)

A survey of vocal literature in France from the 16th century to the present with an emphasis on comparative listening.

**MUS 40490. Orchestral Excerpts**

(3-0-3)

Excerpts from the standard orchestral literature encompassing styles from the 18th century through the 20th century. Instructed by individual members of the faculty.

**MUS 40500. Music Through Technology**

(3-0-3) Dye

Music through Technology is a lecture/lab course open primarily to CAPP and music majors, with consideration of music minor and other talented students. Lecture topics include the historical evolution of technology in music, surveying the influence that technology had on the music world, both from a creative standpoint to the accessibility and distribution of music to the masses. Other examples of technology's influence in music may include the development of multi-track recording on popular music, synthesizer, and midi technology, technology's applications for musical composition, and the adaptation of CD and mp3 formats to musical performers. The historical influence of technology is an illuminating foundation to current developments in the creative processes of music. Lab topics cover an introduction to current music technology including digital audio recording and editing, midi technology (sound and notation) and the digital management and distribution of music. Students will experience all of these technologies on an introductory level, but focus their interests on a technology-based final project to develop and display their acquired skills.

**MUS 43140. Music and Culture Seminar**

(3-0-3)

A seminar class for the Music and Culture concentration of Music Major. Area of study to be determined by professor.

**MUS 43991. Issues in Film and Media**

(3-0-3)

*Corequisite:* FTT 41601

This course serves as a capstone course for film, television and media students, and an elective course for music students. It combines theoretical and historical reading and the opportunity for applied research, either as a 20-page term paper or as a creative project in film or music. There is a class topic that varies each semester. For Fall 2006 it is "Audio + Visual: Sound and Moving Images." Readings will highlight the historical and aesthetic development of the acoustic dimension of cinema (and to some extent, television and video) from pre-cinema to contemporary sound design to the Video iPod. The student projects may concentrate on some aspect of the class topic, or compose an accompaniment for a film, or create a sound design for a film. The course will be conducted as the kind of seminar that one might encounter in a graduate program, with students giving oral presentations based on readings and screenings. The class meets in

weekly 150-minute sessions, with a short mid-session break. There will be guest faculty visiting the class. The term projects are developed over the semester in close consultation with the instructor. For the music students in the class, there is the possibility of traveling to a silent film and music festival in Italy, October 7-14. (This is contingent on a successful grant application for the course, on the students' eligibility for international travel, and on the permission of their instructors for them to miss classes during that week.) Lab attendance at weekly screenings, Tuesday at 7:00-9:30 pm, is required.

**MUS 48390. Senior Recital**

(1-0-1)

A requirement for performance music majors. Sixty-nine credit performance music majors must give two full-length (one hour) recitals and should achieve an advanced level in public performance by the completion of the degree. Thirty-six credit performance music majors must present one full-length or two half-length recitals by graduation.

**MUS 48900. Senior Thesis**

(V-0-V)

Fifty-four credit music history and theory majors and 36-credit theory and history concentrate majors must write a senior thesis. They will be assigned an advisor with whom they will work.

**MUS 50021. Tonal Forms**

(3-0-3)

*Prerequisite:* (MUS 30003 OR MUS 251)

A systematic study of the principal forms of tonal music (sonata, rondo, variation) with in-depth analysis of selected works by Haydn, Beethoven, and Brahms.

**MUS 50022. Schenkerian Analysis**

(3-0-3)

*Prerequisite:* (MUS 30003 OR MUS 251)

Intensive analysis of musical composition utilizing the Schenkerian method.

**MUS 50023. Rhythm, Harmony, Form in the Nineteenth Century**

(3-0-3)

Studies in theoretical issues arising from 19th-century musical techniques.

**MUS 50060. Band Arranging**

(3-0-3)

Covers the basic orchestral, technical, and formal problems associated with arranging pre-existing material for band. This course will be project-oriented, and instruction will focus on the student's own arrangements.

**MUS 50100. Intro to Medieval Plainchant**

(3-0-3)

An introduction to the genres and sources of medieval liturgical chant. Genres will be examined within the context of the history of liturgy and as musical forms and styles. Manuscript sources will be studied as documents in the history of musical notation and as foundations for establishing viable editions of melodies and texts. A basic knowledge of musical notation is a pre-requisite. Some knowledge of German or French or Latin is highly desirable.

**MUS 50101. Vocal Sacred Music I**

(3-0-3)

Vocal Sacred Music I is devoted primarily to Gregorian Chant, with some study toward the end of the semester of medieval polyphonic works based on chant. The course will cover matters of liturgy, performance practice, musical forms, notation, and sources. The course is open to upper-class music majors and graduate students in the Master of Sacred Music Program.

**MUS 50102. Vocal Sacred Music II**

(3-0-3) Blachly

Vocal Sacred Music II is devoted to Renaissance polyphony (ca. 1400-1600). The course will cover matters of liturgy, performance practice, musical forms, notation, sources and major composers. The course is open to upper-class music majors and graduate students in the Medieval Institute and Master of Sacred Music Program.

**MUS 50113. Vocal Sacred Music III**

(3-0-3) Frandsen

This is a seminar designed for graduate students in the Master of Sacred Music program. Senior music majors may also register for this course (under this number only). The course covers sacred art music composed for performance within a liturgical context as well as in public concerts between ca. 1600 and 1750, or from Monteverdi and Schütz to Bach and Handel, and examines this repertoire both from an analytical perspective and in relation to its various performance contexts. Students will read a variety of studies from the disciplines of musicology, music theory, and church history (including papal legislation on music), and will be expected to be able to discuss the works under consideration in class from a variety of perspectives, including musical form, musical style, harmonic language, and liturgical use. Questions of the relationship between music and liturgy, devotion, spirituality, and contemporary culture will also be considered. The hymnody of this era will also be examined. The course will also include the examination of contemporary musical sources, both print and manuscript. Students will be asked to make several class presentations throughout the semester, and to write a research paper of at least 15 pages. Grading will be based on class participation, class presentations, and the research paper.

Examination of scores and technical investigation of practice in contemporary music.

**MUS 50120. Studies In Lied**

(3-0-3)

The study of selected German art songs for solo voice and piano by the masters of the genre.

**MUS 50121. 19th Century Sacred Music**

(3-0-3)

A study of sacred music between 1750 and 1900. The course will examine the sacred art music of this period, both that composed for liturgical use and that composed for the concert stage, and will also cover important developments during this period such as the Cecilian Reform Movement. The course is open to upper-class music majors and graduate students in the Master of Sacred Music Program.

**MUS 50122. Vocal Sacred Music V**

(3-0-3) Joncas

Survey and analysis of Christian sacred music of the 20th and 21st centuries, including both sacred art music and repertoires composed for the congregation. Official denominational directives for, scholarly assessments of, and pastoral evaluations concerning these repertoires. The course is open to upper class music majors and graduate students in the Master of Sacred Music Program.

**MUS 50190. Opera**

(3-0-3)

Topics relating to the history of opera.

**MUS 50220. 20th Cent. Analysis: Schoenberg**

(3-0-3)

Techniques of composition employed by composers of the 20th century.

**MUS 50400. Organ Music of J.S. Bach**

(3-0-3)

An exploration of the 18th-century composer's work.

**MUS 51360. Composition**

(V-0-V)

Creative writing in various forms, conventional and contemporary. Private instruction only. Must sign up in the Music Department Office(105 Crowley Hall) to get department approval.

**MUS 53440. Vocal Pedagogy**

(1-0-1)

Basic techniques of vocal pedagogy.

**MUS 53490. Contemporary Music Performance Techniques**

(3-0-3)

## Philosophy

### PHIL 10100. Introduction to Philosophy

(2-0-3) David, Gutting

*Corequisite:* PHIL 12100

A general introduction to philosophy, with emphasis on perennial problems such as the existence of God, human freedom, and moral obligation. The course is also intended to sharpen the student's skills of critical thinking.

### PHIL 10101. Introduction to Philosophy

(3-0-3)

A general introduction to philosophy, with emphasis on perennial problems such as the existence of God, human freedom, and moral obligation. The course is also intended to sharpen the student's skills of critical thinking.

### PHIL 13185. Philosophy University Seminar

(3-0-3)

A general introduction to philosophy, taught in a seminar format, with emphasis on perennial problems such as the existence of God, human freedom, and moral obligation. The course is also intended to sharpen the student's skills of critical thinking.

### PHIL 13195. Honors Philosophy Seminar

(3-0-3)

A general introduction to philosophy, taught in a seminar format for students in the science and arts and letters honors program, with emphasis on perennial problems such as the existence of God, human freedom, and moral obligation. The course is also intended to sharpen the student's skills of critical thinking.

### PHIL 20101. Introduction to Philosophy

(3-0-3)

A general introduction to philosophy, with emphasis on perennial problems such as the existence of God, human freedom, and moral obligation. The course is also intended to sharpen the student's skills of critical thinking.

### PHIL 20201. Philosophy of Human Nature

(3-0-3) Reimers

An examination of some competing views of human nature based on classical readings ranging from Plato to the present day.

### PHIL 20202. Images of Humanity: Existentialist Themes

(3-0-3) Ameriks, Morris

An examination of fundamental questions about the nature of human beings and their destiny—based on a critical examination of the work of pivotal existentialist thinkers: Kierkegaard, Marcel, and Sartre.

### PHIL 20203. Death and Dying

(3-0-3) Neiman, Warfield

This course examines metaphysical and ethical issues associated with bodily death. Metaphysical issues taken up in this course include the following: What is death? Is death a bad thing? Is there any hope for survival of death? Ethical issues to be discussed include suicide, euthanasia, and abortion.

### PHIL 20204. Women: Alternative Philosophical Perspectives

(3-0-3)

An examination of some of the most pressing problems currently confronting women; the more important theories, from the ultraconservative to the radical feminist, that have been proposed to explain these problems; and the concrete proposals for change in society suggested by such theories.

### PHIL 20205. Theories of Sexual Difference

(3-0-3)

An examination of the following questions: What kind of differences separate men and women? Are these differences natural, or are they socially produced, and are these differences beneficial to us, or are they limiting? What does equality mean for people characterized by such differences?

### PHIL 20206. Simone de Beauvoir

(3-0-3)

An analysis of the philosophical writings of the greatest feminist theorist of this century, perhaps of all time. The main ethical and feminist themes discussed include freedom, love, resistance to oppression, sources of misogynist and sexist prejudices, bad faith, embodiment, intersubjectivity, negativity, and reciprocity.

### PHIL 20207. Self and World

(3-0-3)

A general introduction to the fundamental questions about the nature of the world and our place in it, the area of philosophy called metaphysics.

### PHIL 20208. Minds, Brains, and Persons

(3-0-3) Johnson, Stubenberg

This course will treat some central issues in the philosophy of mind, such as freedom of the will, personal identity, and the relationship between mind and body.

### PHIL 20209. Knowledge and Mind

(3-0-3) Franks

This lecture course concerns a range of philosophical problems about the nature of our knowledge of the world and our place in the world. Topics include skepticism about human knowledge, the problem of induction, epistemic foundationalism, types of knowledge (of facts, of what we should do, of ourselves), the relationship between the knower and the known.

### PHIL 20213. Images of Humanity in Modern Philosophy

(3-0-3) McLeman, Robbins

An examination of some philosophers from the 17th and 18th centuries and the implications of their views for ways in which we can conceive of ourselves as relating to the world around us, and as relating to God.

### PHIL 20214. Ancient Wisdom and Modern Love

(3-0-3) O'Connor

*Corequisite:* PHIL 22214

An examination of contemporary issues of love and friendship from the perspective of ancient philosophy. Course materials range from Plato and Aristotle to Shakespeare and contemporary film.

### PHIL 20215. Ways of Peacemaking: Gandhi/King

(3-0-3)

An intensive study of the philosophy and spirituality of two of the greatest activists and peace educators of our century, M. Gandhi and M. Luther King. We will be especially concerned with the way each of these human beings came to construct new, yet quite ancient, images or controlling myths that they hoped would lead us to think and act in revolutionary ways.

### PHIL 20217. Education of the Spirit

(3-0-3)

An introduction to issues in philosophy of education such as religion and education, education and politics (including global politics), the value of social and empirical sciences for the study of education, the problem of indoctrination, etc.

### PHIL 20218. Chinese Ways of Thought

(3-0-3) Jensen

This is a special topics class on religion, philosophy, and the intellectual history of China that introduces the student to the worldview and life experience of the Chinese as they have been drawn from local traditions, as well as worship and sacrifice to heroes, and the cult of the dead. Through a close reading of primary texts in translation, it also surveys China's grand philosophical legacy of Daoism, Buddhism, Confucianism, and Neo-Confucianism and the later religious accommodation of Christianity and Islam.

### PHIL 20219. Chinese Mosaic: Philosophy, Politics, and Religion

(3-0-3)

This is a special topics class that provides an introduction to the diverse lifeways constituting the puzzle of the Chinese people. The course will chart this terrain of current Chinese imagination as it has been shaped from the contending, and often

contentious, influences of religion, philosophy, and politics, introducing students to the heralded works of the Chinese intellectual tradition while requiring critical engagement with the philosophic and religious traditions animating this culture. Thus, as they learn about China, students also will reflect on how the Chinese and Westerners have interpreted it.

**PHIL 20220. Popular Religion and Philosophy in China**

(3-0-3)

This lecture/discussion course will introduce the student to the plural religious traditions of the Chinese as manifested in ancestor worship, sacrifice, exorcism, and spirit possession. From an understanding of these practices, the course will offer insight into the mantic foundations of Chinese philosophy, especially metaphysics. Readings will consist of texts in translation of popular cults, as well as scholarly interpretations of these phenomena.

**PHIL 20227. The Experiencing of Medicine, Science, Art, and Literature**

(3-0-3)

This course will compare the ways in which holistic and particularistic thinking form the basis for understanding how philosophical and scientific theories and the practice of medicine work, and how we experience art and literature. We will construe these diverse disciplines as differing approaches to the same broad project, that of understanding our experience of the world. We will consider modern medicine and science from both Western and Eastern perspectives, watch experimental films, read modern poetry and fiction, and compare Eastern and Western systems of ethics.

**PHIL 20401. Ethics**

(3-0-3)

An examination of the relationship between thought and action in light of contemporary and traditional accounts of the nature of ethics.

**PHIL 20402. Moral Problems**

(3-0-3) Baldwin

An introduction to the field of moral philosophy, with major emphasis on contemporary moral issues.

**PHIL 20403. Virtues and Vices**

(3-0-3)

What qualities of mind and character differentiate the good from the bad? This course examines six different and rival answers to this question, those of Confucius, Socrates, Aquinas, Machiavelli, Hume, and Nietzsche.

**PHIL 20404. Ethics and Business**

(3-0-3) Holloway

This course aims at helping the student recognize the moral aspects of business decisions on the personal level and of business institutions on the social level.

**PHIL 20406. Basic Concepts in Political Philosophy**

(3-0-3)

An introduction to important thinkers and problems of political philosophy. Basic concepts to be considered are equality, liberty, and authority.

**PHIL 20407. Classics of Political and Constitutional Theory**

(3-0-3) Flint

An examination of a number of the fundamental texts in political and constitutional theory, with an emphasis on works of special importance to the British and American political systems.

**PHIL 20408. Philosophy of Law**

(3-0-3)

An examination of the relationship between fair procedures and just outcomes in the judicial process, a study of the conditions under which punishment is morally defensible, an investigation of the extent to which the state may regulate the private affairs of its citizens, and a consideration of the role that moral theory has to play in the process of constitutional interpretation.

**PHIL 20409. War and Philosophy**

(3-0-3)

The goal of the course is to understand and evaluate the teachings that philosophers have drawn from the experience of war and conflict. Authors to be read include Thucydides, Plato, Augustine, Hobbes, and Maritain.

**PHIL 20411. Aesthetics and the Philosophy of Art**

(3-0-3)

An introductory course in the application of philosophical methods to questions of aesthetics and art. The first part of the course will concern the history of aesthetics, concentrating on the views of Plato, Aristotle, Horace, Aquinas, Kant, and Hegel. The second part of the course will consider contemporary approaches to problems such as the nature of aesthetic properties and categories, what distinguishes art from other things, and the role of critical interpretation in the experience of art.

**PHIL 20412. Philosophy and the Arts**

(3-0-3)

A consideration of the nature of art and the aesthetic using both philosophical texts and works of art drawn from a wide variety of media (painting, literature, film, architecture, etc.).

**PHIL 20413. Ethics and Imagination**

(3-0-3)

The aim of this course is to underscore the importance for moral reasoning of the moral imagination through a vivid juxtaposition of classic texts in moral and political philosophy with works of art, principally narrative art, but not excluding music, painting, architecture, sculpture, and dance.

**PHIL 20414. Nature, Law, and Rights**

(3-0-3)

An examination of how our understanding of human nature affects the way we think of law and human rights.

**PHIL 20415. Morality and Modernity**

(3-0-3) Solomon

*Corequisite:* PHIL 22415

An examination of the many of the deepest contemporary moral disputes that rest on philosophical disagreements about the nature of modernity. These disputes focus particularly on the modern commitments to individualism and the idea of progress.

**PHIL 20418. Living the Virtues**

(3-0-3) McNerny

What would make me happy? What is the point of my existence? No human being can avoid asking himself these questions, and for many philosophers, especially in the pre-modern age, these questions admit of a clear answer: happiness and meaning come from living the virtues. This course will be devoted to examining this answer; that is, to inquiring into the nature of virtue in general, and to the distinction and connection between the various virtues in particular. Guidance will be principally taken from works of Plato, Aristotle, and St. Thomas Aquinas, though some modern and contemporary conceptions of the virtues will be discussed by way of counterpoint. As part of a final course project, each student will be required to employ a work of literature in a discussion of the virtues.

**PHIL 20419. The Natural Law: An Introduction**

(3-0-3)

This course will explore the claim that the standard of right action in ethics and politics is to be found, in some sense, in nature, and is a "natural law." Our exploration of the claim will take us through history, from the first developments of natural law theory in ancient Greece and Rome, to the medieval understanding of natural law epitomized in the work of St. Thomas Aquinas, and finally to some modern conceptions of natural law as found in the work of Hobbes, Locke, and Rousseau.

**PHIL 20420. Agency, Responsibility, and Determinism**

(3-0-3)

This course will carefully explore some main philosophical problems involving human agency and moral responsibility. The course has four parts. First, we will assess main arguments for and against the compatibility of human freedom and causal determinism (roughly, the view that physical laws and present physical facts jointly necessitate all future facts). Second, we will critically examine numerous substantive, competing analyses of human freedom. Third, we'll consider the question of what's required for moral responsibility. Fourth and finally, we will explore whether human freedom is compatible with divine foreknowledge.

#### **PHIL 20421. Political Theory**

(3-0-3)

*Corequisite:* PHIL 22421

This course is an introduction to political theory as a tradition of discourse and as a way of thinking about politics. The course surveys selected works of political theory and explores some of the recurring themes and questions that political theory addresses. This introductory course fulfils the political theory breadth requirement for the political science major. For additional information about this course, please visit the following website: [nd.edu/~government/undergraduate/Summer05CourseDescriptions.htm](http://nd.edu/~government/undergraduate/Summer05CourseDescriptions.htm).

#### **PHIL 20422. Just War Theory**

(3-0-3) Green

An examination of contemporary accounts of Just War Theory. Some of the questions considered will include: What is terrorism? Are pre-emptive wars just? How should prisoners of war be treated? And what are the duties of an occupying nation?

#### **PHIL 20602. Medical Ethics**

(3-0-3) Solomon

*Corequisite:* PHIL 22602

An exploration from the point of view of ethical theory of a number of ethical problems in contemporary biomedicine. Topics discussed will include euthanasia, abortion, the allocation of scarce medical resources, truth-telling in the doctor-patient relationship, the right to medical care and informed consent, and human experimentation.

#### **PHIL 20603. Environmental Ethics**

(3-0-3)

The course will be an attempt to come to grips critically with the moral significance of contemporary concern for ecology and the environment.

#### **PHIL 20604. Modern Physics and Moral Responsibility**

(3-0-3)

An examination of such questions as: What are the moral responsibilities of the scientist? Should the scientist be held accountable for what might be done with the results of his or her scientific research? Does the scientist have any special role to play, as a citizen, in public debate about science policy? Should the scientist sometimes simply refuse to engage in some kinds of research because of moral concern about the consequences of research of that area? No special background in physics will be assumed.

#### **PHIL 20605. Gender, Politics, and Evolution**

(3-0-3)

An examination of ethical/political models of gender-neutral access to public and domestic requisites for the development of basic human capabilities, and a comparison of these models with current studies of the significance of human sexual dimorphism in evolutionary psychology.

#### **PHIL 20606. Science, Technology, and Society**

(3-0-3) Hamlin

*Corequisite:* STV 22556

This course focuses on the many ways in which science and technology interact with society and explores the character of the value-laden controversies that such interaction frequently produces.

#### **PHIL 20608. Philosophy of Technology**

(3-0-3)

Topics covered will be early philosophy of technology, recent philosophy of technology, technology and ethics, technology and policy, technology and human nature, and technology and science. Readings will be principally derived from David M. Kaplan (2004) *Readings in the Philosophy of Technology* and Francis Fukuyama (2002) *Our Posthuman Future*.

#### **PHIL 20609. Environmental Philosophy**

(3-0-3)

A philosophically integrated examination of current environmental issues, drawing on familiar literature from ecology (Leopold), economics (Boulding), and ethics (Singer), as well as recent fiction (Tolkien, Herbert).

#### **PHIL 20610. Brief History of Time/Space/Motion**

(3-0-3)

An examination of the historical evolution of the philosophical conceptions of time, space, and motion from Plato to Einstein. Special attention will be paid to the influence of developments in physics on this evolution in philosophical theorizing (and vice versa).

#### **PHIL 20611. Does the Universe Have a Purpose?**

(3-0-3)

Among the most basic questions of philosophy is whether nature, as a whole world and in its parts, has a purpose or pursues goals. Although such considerations typically belong to the philosophy of religion and the philosophy of biology, modern physics and its philosophy have never been completely free from analogous discussions. This course will explore these issues from the point of view of physics its philosophy.

#### **PHIL 20612. Philosophy and Cosmology: A Revolution**

(3-0-3)

In the 17th century, there was a revolution in our view of the cosmos and of our own place in it. Most vivid, perhaps, was the change from believing that the Earth is at the center of everything to believing that the Earth is just one planet among many, orbiting the sun. This course will consider how and why these changes took place.

#### **PHIL 20613. Science and Religion**

(3-0-3)

An examination of the interrelation and tension between contemporary science and traditional religious belief.

#### **PHIL 20614. Introduction to Philosophy of Biology**

(3-0-3)

An examination of key concepts and controversies in contemporary biology. The meaning of gene, organism, and environment and their interrelationships in the context of development, evolutionary theory, and ecology are closely considered.

#### **PHIL 20615. Practicing Medical Ethics**

(1-0-1) Solomon

This is a one-day, one-credit course. The purpose of this course is to give students who may have a vocation in health care the opportunity to engage in conversation with physicians, philosophers, and theologians familiar with medical ethics. Participants will be looking at real case studies and real situations they might encounter in practicing medicine. Does not satisfy University requirement.

#### **PHIL 20617. Philosophy of Science**

(3-0-3)

A detailed consideration of the central methodological and epistemological questions bearing on science.

#### **PHIL 20618. Bio-Medical Ethics and Public Health Risk**

(3-0-3)

Designed for pre-med, science, and engineering students, the course will survey ethical issues associated with current public health problems, such as pollution

induced cancers, universal health care, occupational injury and death, and inadequate medical attention to prevention, nutrition, and environmental health.

**PHIL 20620. Philosophy and Science Fiction**

(3-0-3) Rea

The goal of this course is to introduce students to some central philosophical problems via reflection on classic and contemporary works of science fiction in conjunction with classic and contemporary texts in philosophy.

**PHIL 20621. Making Choices About Science**

(3-0-3)

What should we do with science? This course is about science and the choices we make concerning what research to undertake, what methodologies to employ, and what applications to pursue. We focus on arguments for and against different choices, drawn from a variety of sources, including academic research papers and the media, and we consider a range of topics such as cloning, nuclear power, testing methodologies in medicine, space exploration, genetically modified food products, and high energy particle physics.

**PHIL 20801. Philosophy of Religion**

(3-0-3) van Inwagen

A discussion of some basic issues: the nature of the philosophy of religion, the notion of God, grounds for belief and disbelief in God, faith, revelation, religious language and knowledge, verification, immortality.

**PHIL 20802. Philosophical Reflections on Christian Belief**

(3-0-3) Rea

An examination of some of the most philosophically fascinating features of the Christian faith, including the Christian conception of God, the doctrine of the incarnation, and the cogency of a Christian worldview.

**PHIL 20803. Faith and Reason**

(3-0-3)

This course will deal with the relation between faith and reason. Some questions to be discussed are: Can the doctrines of the faith conflict with the deliverances of reason found in philosophy and science? Is it possible to defend the doctrines of the faith against the objections of nonbelievers in a non-question-begging way? How might one go about constructing an apologetics for the Christian faith? Authors to be read include St. Thomas Aquinas, G.K. Chesterton, and C.S. Lewis.

**PHIL 20804. God and Persons**

(3-0-3)

Members of Western culture living in the present age are, whether they like it or not, inheritors of a long history of reflection upon the stellar achievements of human reason and the demands of revealed religion. The purpose of this course is to engage that history philosophically. A number of traditions of reflection will be considered: contemporary, modern, ancient, and medieval.

**PHIL 20805. Thought of Aquinas**

(3-0-3)

A general introduction to Aquinas's overall philosophical view.

**PHIL 20806. Philosophy of Judaism**

(3-0-3)

An attempt to come to a reasonable understanding of the philosophy of Judaism as presented in Abraham Joshua Heschel's masterwork, *God in Search of Man: A Philosophy of Judaism*.

**PHIL 20808. Ethical and Religious Obligations**

(3-0-3)

What is the source of our various obligations and how do they arise? How does a person determine what his or her obligations are? What is the relationship between religious duty and ethical and social duty? Can a person be obligated to hold certain beliefs or to cultivate particular character traits? In this lecture course we will explore these questions about the nature of obligation through the writings of Plato, Cicero, Maimonides, and Kant. We will study how these thinkers answered

these questions as well as how their answers influenced the specific obligations they understood us as having.

**PHIL 20809. Aristotle and Aquinas**

(5-0-3) McInerney

A course devoted to understanding the relationship between Christianity and Greek philosophical inquiry. In particular, we will be considering the assimilation of the pagan Aristotle's moral and political thinking into the magnificent Christian moral and political theology of St. Thomas Aquinas. We will focus on questions concerning human happiness, the natural law, virtue, justice and political community, practical rationality, friendship, and contemplative wisdom.

**PHIL 26999. Special Topic: Philosophical Issues**

(V-0-V)

In exceptional circumstances, with written permission of instructor and approval of philosophy director of undergraduate studies, students are permitted to take a tutorial with a faculty member on a particular issue in philosophy. Readings will be assigned, and writing assignments required.

**PHIL 30301. Ancient and Medieval Philosophy**

(3-0-3) Dumont, Fredoso

This course will concentrate on major figures and persistent themes. A balance will be sought between scope and depth, the latter ensured by a close reading of selected texts.

**PHIL 30302. History of Modern Philosophy**

(3-0-3) Joy, Newlands

An examination of the perennial tension between reason and experience as exemplified in classical modern rationalism and empiricism, its subsequent synthesis in Kant.

**PHIL 30303. Nineteenth- and Twentieth-Century Philosophy**

(3-0-3)

A survey of developments in philosophy since Kant. Readings in both the Continental and Anglo-American traditions.

**PHIL 30306. Introduction to German Philosophy: Kant to Habermas**

(3-0-3)

A conceptual introduction to the rich intellectual tradition that begins with Kant and goes through Herder, German Romanticism, Idealism, Marx, Nietzsche, Logical Positivism, Phenomenology, Existentialism, and Critical Theory.

**PHIL 30313. Formal Logic**

(3-0-3) Bays

An introduction to the fundamentals and techniques of logic for majors.

**PHIL 30315. A Chinese Mosaic: Philosophy, Politics, and Religion**

(3-0-3)

This course will look at human rights and their continued relevance in the age of terrorism. Recent developments have shown the need for states to protect themselves and their populations from acts of terror while at the same time maintaining respect for human rights and the rule of law. This course examines how to uphold that balance and draws from the experience of Pakistan's involvement in the global fight against terror. It examines both the misuse of prevention of terrorism laws as well as the minimum safeguards and remedies that must be guaranteed and provided if human rights are not to become the first casualty in the war on terror. There is no exam. Grades based 75 percent on research paper and 25 percent on class participation. Students are expected to have done readings before the class.

**PHIL 30326. God, Philosophy, and Universities**

(3-0-3) MacIntyre

Enquiry and teaching in Catholic universities have aimed at understanding how the universe physical, animal, and human is ordered to God. One task of philosophy in the Catholic tradition has been to show how the various secular disciplines both contribute to such understanding and remain incomplete without theology. This course examines the question of how this task is to be carried out.

**PHIL 30335. Journalism and Ethics**

(3-0-3)

An open-ended discussion of questions such as: Does journalism have special responsibilities because of its importance to democracy (for example, a responsibility to present both sides of political debates rather than the side they think is true)? Have Internet technologies that produce "instant journalism" changed our ethical standards (for example, should editors publish stories available on the Internet even if they haven't confirmed them)? What ethical issues arise when the line between journalism and entertainment becomes blurred (for example in Oliver Stone's movies)?

**PHIL 30352. Ethics, Ecology, Economics, and Energy**

(3-0-3)

A critical examination of the following hypotheses: (1) that continuing economic growth requires ever-increasing consumption of energy, (2) that increasing energy consumption results in increasing degradation of the biosphere, and (3) that increasing degradation of the biosphere poses an increasing threat to human existence.

**PHIL 30354. Gender and Science**

(3-0-3)

An exploration of the ways in which science is gendered, starting with the ways in which women have been excluded from science, and moving through such issues as the invisibility and shabby treatment of women with the products of scientific research, the contributions of women to science and whether these are different in kind from the contributions of men, and the differential effects of science on men's and women's lives.

**PHIL 30357. Introduction to the Philosophy of Biology**

(3-0-3)

An examination of key concepts and controversies in contemporary biology. The meaning of gene, organism, and environment, and their interrelationships in the context of development, evolutionary theory, and ecology are closely considered.

**PHIL 30389. Philosophical Issues in Physics**

(3-0-3) Bland

This course is intended for non-science students who desire to begin an examination of the origins of the modern laws of physics and for science students who wish to know the actual route to the discovery and the broader implications of the formal theories with which they are already familiar. The historical background to and philosophical questions associated with major laws of physics will be discussed, in large measure by examining directly relevant excerpts from the writings of some of the creators of seminal concepts and theories in physics. The latter part of the course will concentrate on historical and philosophical issues related to relativity and especially to quantum theory and its interpretation. This course is accepted as a science elective in the College of Science.

**PHIL 30390. Environmental Philosophy**

(3-0-3) Sayre

A philosophically integrated examination of current environmental issues drawing on familiar literature from ecology, economics, and ethics, as well as recent fiction.

**PHIL 40314. Morality and Modernity**

(3-0-3) Solomon

*Corequisite:* PHIL 42314

An examination of many of the deepest contemporary moral disputes that rest on philosophical disagreements about the nature of modernity. These disputes focus particularly on the modern commitments to individualism and the idea of progress.

**PHIL 43101. Plato**

(3-0-3) Sayre

A detailed and systematic reading, in translation, of the fragments of the pre-Socratics and of the following Platonic dialogues: *Euthyphro*, *Apology*, *Crito*, *Meno*, *Protagoras*, *Phaedo*, *Republic*, *Phaedrus*, *Symposium*, and *Theaetetus*.

**PHIL 43102. Aristotle**

(3-0-3) An examination and evaluation of Aristotle's philosophy, with special emphasis on the logical, physical, and metaphysical writings.

**PHIL 43103. Plato's Phaedrus**

(3-0-3)

An advanced seminar focused on reading Plato's *Phaedrus* in Greek. Undergraduates must have completed CLGR 20004. Graduate students must have completed at least three semesters of Greek. Class meetings will be about equally divided between translations and interpretations.

**PHIL 43104. Socrates and Athens**

(3-0-3)

A study of the moral upheaval in Athens during the Peloponnesian War, using Thucydides, Aristophanes, Euripides, and Sophocles as primary sources. Then an examination of Socrates as responding to that crisis, using *Alcibiades I*, *Gorgias*, and other dialogues.

**PHIL 43105. Plato Before *The Republic***

(3-0-3)

After a general introduction into the main problems and positions of Plato scholarship today, we will read some of his dialogues written before his most important work, *The Republic*, dealing with as various topics as virtues, the nature of art, the relation of ethics and religion, the politics of Athens and the essence of knowledge.

**PHIL 43106. Hellenistic Ethics and the Subject of Knowledge**

(3-0-3)

An examination of the very distinctive manner in which Hellenistic philosophy (Cynics, Epicureans, Stoics, New Academy) defines the subject of knowledge, of action, and of interaction with others in the environment. The first part will study the salient features of Hellenistic Ethics. The second part will focus on stoicism and its powerful model of the integrated life and virtue as intrinsically relational. The third part will be open to a selection of related themes that serve best participants' interests.

**PHIL 43107. Plato on Death and Love**

(3-0-3)

A close reading of two Platonic dialogues, the *Phaedo* and the *Symposium*.

**PHIL 43134. History of Medieval Philosophy**

(3-0-3) Dumont

A semester long course focusing on the history of medieval philosophy. It provides a more in-depth consideration of this period than is allowed in PHIL 30301 Ancient and Medieval Philosophy, and may be considered a follow-up to that course.

**PHIL 43135. Anselm**

(3-0-3)

An examination of the major philosophical and theological writings of St. Anselm. His *Monologion*, *Proslogion*, and *Cur Deus Homo* will be of central concern, but several lesser known texts will also be read. Topics discussed in these writings include arguments for the existence of God, the divine nature, the Trinity, the Incarnation, freedom (and its compatibility with divine foreknowledge), and truth.

**PHIL 43136. Augustine and Aquinas on Mind**

(3-0-3)

Aquinas's early discussion of mind displays a significant Augustinian structure that disappears by the time of his last works, a shift that can be described as a more robust Aristotelianism. This course examines the philosophical significance of that shift in Aquinas's thought, and will relate it to questions about the nature of contemporary philosophy of the mind.

**PHIL 43137. Augustine and Bonaventure**

(3-0-3)

A course devoted to what used to be called philosophical psychology. The goal will be to understand some of the ways the Augustinian tradition in philosophy attempts to make sense of the soul, in terms of mind, spirit, will but especially in

terms of the heart. To be read are Augustine's *Confessions* and *De Trinitate*, and Bonaventure's *The Mind's Road to God*.

**PHIL 43138. Augustine and William James**

(3-0-3)

A course devoted, for the most part, to a careful reading of significant parts of Augustine's *Confessions* and James's *The Variety of Religious Experience*. The goal is to come to an understanding of what these two great philosophers and psychologists can teach us about the spiritual quest.

**PHIL 43139. Philosophical Poets: Poetic Philosophers**

(3-0-3)

A discussion of the difference between poetic and philosophical modes of discourse, with special reference to Dante and Paul Claudel.

**PHIL 43141. Aquinas: Moral Thought**

(3-0-3)

A systematic discussion of the main features of the moral teaching of Thomas Aquinas. The *Summa Theologiae*, *Prima Secundae* and Aquinas's commentary on the Nichomachean ethics will be the principal sources.

**PHIL 43142. Thomistic Personalism**

(2-0-3)

This course focuses on Aquinas's theoretical and moral philosophy in order (1) to reach an in-depth understanding of the concept of person and (2) to distinguish it from other related concepts like "soul," "Intellect," etc. Special attention will be given also to the concepts of "freedom," "moral law," "duty," "right," "friendship," and "virtue."

**PHIL 43143. Dante and Aquinas**

(3-0-3)

A comparative study of two giants of medieval Catholicism. The course will be a chance to make a tour of the *Summa Theologiae* and the *Divine Comedy*, supplemented with looks at other works of these two giants of Western culture. The dependence of the *Divine Comedy* on the *Summa* is a cliché, but a close look at the theological and poetic visions of the whole of reality as seen through the eyes of faith is an essential component of cultural literacy.

**PHIL 43144. Aquinas on Angels**

(3-0-3)

A close study of what St. Thomas Aquinas has to say in *Summa Theologiae* about the nature, cognition, and action of purely spiritual substances.

**PHIL 43145. Augustine and Wittgenstein**

(3-0-3)

A careful reading of two of the greatest of all philosophical autobiographies, Augustine's *Confessions* and Wittgenstein's *Philosophical Investigations*. The goals of the course are to better understand the works themselves and to understand the nature and values of this genre of philosophical writing.

**PHIL 43146. Philosophy of Duns Scotus**

(3-0-3)

Duns Scotus (1266–1308) was, along with Thomas Aquinas and William of Ockham, one of the three major, scholastic thinkers. This course will examine Scotus's major contributions in metaphysics, epistemology, and ethics, including the univocity of the transcendental concepts, the modal proof for the existence of God, the formal distinction, intuitive cognition, the elimination of the illumination theory of knowledge, and his strong voluntarism, particularly as the origin of the so-called synchronic theory of contingency. Attention will be given to how Scotus develops his views in reaction to his contemporaries, especially Henry of Ghent.

**PHIL 43147. Moses Maimonides**

(3-0-3)

A careful reading of Maimonides philosophical classic *A Guide for the Perplexed*. Close attention will be paid to its influence on Aquinas.

**PHIL 43148. Aquinas on Virtue and Law**

(3-0-3) Freddoso

A close study of virtue and law, and of their relation to one another, in the moral theory of St. Thomas Aquinas, as laid out in the first part of the second part of the *Summa Theologiae*.

**PHIL 43149. Aquinas's Philosophical Theology**

(3-0-3) O'Callaghan

A close examination of the philosophical arguments within the first 13 questions of Aquinas's *Summa Theologiae*, including arguments about the distinction between philosophy and sacred theology, the existence of a god, divine simplicity, divine perfection, divine goodness, divine infinity, divine immutability, divine eternity, divine unity, how God is known by us, and how God is spoken about by us.

**PHIL 43167. Cartesian Doubt and Certainty**

(3-0-3)

This lecture and discussion course is about Rene Descartes's theory of knowledge. The course is centered around the first three of Descartes's six \*Meditations on First Philosophy\*. In these "meditations," Descartes seems to believe that taking seriously a kind of radical doubt that most thinkers typically ignore can deepen the certitude of our knowledge. We will try to understand what kind of doubt Descartes entertains, what the value is of the type of certainty he seeks, and how the first is supposed to lead to the second. To sharpen our appreciation of Descartes' project, we will compare it to a couple of contemporary reflections on the relationship between doubt and certainty.

**PHIL 43168. Hume's Ethics and Philosophy of Mind**

(3-0-3)

An exploration of how modern philosophers in the British empiricist tradition developed new theories of moral psychology and human action. Chief among them was the Scottish philosopher David Hume.

**PHIL 43169. Kant**

(3-0-3) Ameriks

An examination of the background of Kant's work, followed by a tracing of some of the principal themes of the *Critiques*, especially the major themes of *The Critique of Pure Reason*.

**PHIL 43170. Hegel**

(3-0-3)

An intensive reading of Hegel's *Phenomenology of the Spirit*. Issues discussed will be Hegel's conception of self and society, his treatment of culture, art, and religion, the nature of dialectic, his views on systematic holism and critique, etc.

**PHIL 43171. Kierkegaard**

(3-0-3)

This course will be devoted to a central theme in Kierkegaard's ethics, i.e., his discussion of the religious commandment to love God and thy neighbor as thyself. We will proceed by way of a slow and careful reading of his *Works of Love*.

**PHIL 43172. Kierkegaard and William James**

(3-0-3)

An examination of the views of Kierkegaard and James on the traditional philosophical ideas of meaning and truth, knowledge, and explanation.

**PHIL 43173. Nietzsche**

(3-0-3)

A close consideration of Nietzsche's thought beginning with his early work under the influence of Schopenhauer, through his "naturalistic" or "positivistic" works, and on to his mature work of the 1880s.

**PHIL 43174. Maritain: Science, Metaphysics, and Mysticism**

(3-0-3)

The goal of Jacques Maritain's *Degrees of Knowledge* is in part to examine how the various forms of knowledge (including ordinary perception, modern science, as well as a metaphysics in the spirit of St. Thomas) might productively coexist.

In this course we will study Maritain's exposition of these forms and their interrelationship.

**PHIL 43175. Three Catholic Philosophers**

(3-0-3)

A study of the enquiries of three 20th-century Catholic philosophers at work within three very different philosophical traditions, designed to identify the relationship between a commitment to philosophical enquiry and Catholic faith. To be considered are Jacques Maritain's pursuit of questions opened up by Aristotle and Aquinas, Edith Stein's progress beyond Husserl in her phenomenological enquiries, and G.E.M. Anscombe's response to Wittgenstein.

**PHIL 43176. Wittgenstein**

(3-0-3)

A careful reading and detailed discussion of several key works of Wittgenstein such as *Tractatus-Logico-Philosophicus* and *Philosophical Investigations*.

**PHIL 43177. Kierkegaard and Newman**

(3-0-3)

An examination of the thought of two 19th-century figures of fundamental importance: Soren Kierkegaard (1813–55) and John Henry Newman (1801–90).

**PHIL 43178. Individuation and Identity in Early Modern Philosophy**

(3-0-3)

This course focuses primarily on ontological and epistemological problems associated with the individuation and identity of the material bodies and souls that are the basic entities of early modern mechanical philosophy. Themes addressed include transubstantiation, alchemical transformation, cohesion, the laws of nature, and the possibility of vacuum. Readings include extracts from Descartes, Boyle, Leibniz, Locke, Hobbes, Berkeley, Newton, and Hume.

**PHIL 43179. Hegel and Kierkegaard**

(3-0-3)

This course is an investigation of central themes in Hegel's thought and Kierkegaard's reaction to them. Concentration is on Hegel's *Phenomenology of Spirit* and the opening sections of his *Logic* and on Kierkegaard's *Philosophical Fragments* and portions of his *Concluding Unscientific Postscript*.

**PHIL 43180. Hume**

(3-0-3)

A careful reading of the *Treatise of Human Nature*.

**PHIL 43181. Goethe to Nietzsche to Kafka**

(3-0-3)

One of the peculiarities of German culture is the strong connection between philosophy and literature; another the heroic attempt to develop a religion no longer based on authority, but on reason. We will discuss the main steps in this German quest for God, alternating philosophical and literary texts by authors such as Lessing, Goethe, Kant, Hegel, Schopenhauer, Nietzsche, and Kafka. Texts and discussions in English.

**PHIL 43182. Socrates, Nietzsche, and Kierkegaard**

(3-0-3) Neiman

Socrates is often understood to have invented philosophy as an art of examination and way of life. In this course, we will examine the nature of the Socratic art, along with a few critical appropriations of it by Nietzsche and Kierkegaard, among others. The key question of the course is: Is philosophy as Socrates understood it possible today?

**PHIL 43201. Continental Philosophy**

(3-0-3)

An examination of leading issues in contemporary movements in continental philosophy (e.g., existentialism, hermeneutics, poststructuralism) in authors such as Habermas, Gadamer, Sartre, Derrida, and Foucault.

**PHIL 43202. Phenomenology**

(3-0-3)

An introduction to the arguments and themes of phenomenology, a school of philosophy based on the description of lived experience that had a broad impact on 20th-century philosophy.

**PHIL 43203. Heidegger's *Being and Time***

(3-0-3)

A close reading of Heidegger's seminal work *Being and Time*.

**PHIL 43204. Contemporary German Philosophy: Habermas**

(3-0-3)

The course will attempt to cover the "formative" phase of Habermas's career extending from his point of departure from Marx, and his analysis of the public sphere, through his critique of the human sciences and up to the beginning of his theory of communicative action.

**PHIL 43205. Existentialism: Philosophy and Literature**

(3-0-3)

We will read representative literary and philosophical texts by Sartre (excerpts from *Being and Nothingness*, *Nausea*, a few plays), Beauvoir (*The Philosophy of Ambiguity*, excerpts from *The Second Sex*, *A Very Easy Death*), a novel and/or excerpts from *A Memoir*, and Camus (*Myth of Sisyphus*, excerpts from *The Rebel*, *The Stranger*, *The Plague*, and/or *The Fall*).

**PHIL 43206. Hermeneutics, Deconstruction, and Medieval Thought**

(3-0-3)

The aims of this course are both methodological and historical. The methodological part will consist of an introduction to hermeneutics (in a broad sense) as theorized and/or practiced in certain areas of modern continental philosophy. After a brief look at the crucial innovations of Husserl, we shall study carefully chosen extracts (in English translation) of Heidegger: *Being and Time* and *What is Called Thinking*, Gadamer: *Truth and Method*, and Derrida: *Of Grammatology*, *Writing and Difference*, and *Dissemination* in order to illuminate the different (even opposing) ways in which the idea of hermeneutics can develop. This general discussion will be combined with specific consideration of the themes of allegory and negativity. The historical part of the course will concentrate on late ancient, patristic, and early medieval readings (Origen: *On First Principles*, Augustine: *On Christian Teaching*, *Literal Interpretation of Genesis*, and Proclus: *Commentary on Plato's Timaeus*). Here, we shall attempt to advance our comprehension of ancient literature by (1) looking for parallels with modern hermeneutic techniques, and (2) applying the modern techniques in test cases. The course is intended to be relatively open-ended, i.e., students will be expected to think about the way in which these discussions are internally coherent and also relate to their own areas of interest (which may be elsewhere in philosophy, theology, or literature (Latin or vernacular)). Requirement: one final essay of approximately 20 pages.

**PHIL 43207. Levinas: Ethics and God**

(3-0-3)

This seminar proposes a close reading and critique of the philosophy of Emmanuel Levinas. Its focus is his formulation of ethics as "first philosophy" and, in particular, his attempt to develop an account of human relations with God without any recourse to the phenomenality of revelation. By way of background, reference will be made to Kant's and Fichte's critiques of revelation. In terms of arguments, extensive reference will be made to Levinas's criticisms of Husserl and Heidegger, and to criticisms and alternate routes proposed by Henry, Derrida, and Marion.

**PHIL 43301. Ethical Theory**

(3-0-3) Warfield

A systematic study of philosophical foundations of morality, drawing from major historical developments. Basic concepts of classical ethics will be developed—human nature, happiness or fulfillment, freedom, and virtue—and their place in relation to moral judgment will be examined. Special attention to subjectivism vs. objectivism on the question of ethical norms and principles.

**PHIL 43302. Twentieth-Century Ethics**

(3-0-3)

A survey of a number of central positions and issues in contemporary ethical theory. The course will begin with an examination of the main metaethical positions developed from 1903 to 1970—intuitionism, emotivism, prescriptivism, and the various forms of ethical naturalism. This will provide a background for a discussion of issues arising from the more recent revival of classical normative theory. This is the core course for ethics. (Each academic year)

**PHIL 43303. Four Moral Philosophers**

(3-0-3)

A careful reading of basic texts from Aristotle, Hume, Kant, and Nietzsche, and an examination of the ways in which their views are appropriated for purposes associated with the contemporary problematic in normative ethics.

**PHIL 43304. Locke's Moral Philosophy**

(3-0-3)

A careful, evaluative reading of Locke's *Letter Concerning Toleration*, his *Second Treatise on Civil Government*, and his *Questions Concerning the Law of Nature*, as well as a more cursory look at his *Some Thoughts Concerning Education*.

**PHIL 43305. Ethics and Modernity**

(3-0-3)

A consideration of the following questions: Has modern philosophical thought led to a dead-end of ethical skepticism or relativism? Is there a crisis in modern ethical thought that requires a return to the Aristotelian tradition? Can a meaningful ethics be based on a modern naturalist or reductionist view of human beings? Is ethical relativism a coherent position? Is there any basis for maintaining that ethical judgments are objectively true? Authors to be read are MacIntyre, Rorty, Taylor, and Williams.

**PHIL 43306. Advanced Moral Problems**

(3-0-3)

An in-depth discussion of three very important moral problems of our time: affirmative action, animal rights, and sexual harassment.

**PHIL 43307. Seminar in Medical Ethics**

(3-0-3)

An examination of a number of the most important systematic contributions to medical ethics in recent years. Authors covered will include Tom Beauchamp, Jim Childress, H. Tristram Engelhardt, Stanley Hawerwas, Dan Callahan, and Al Jonsen. We will pay special attention to the relation between disputes within medical ethics and more general disputes in moral philosophy.

**PHIL 43308. Environmental Justice**

(3-0-3) Shrader-Frechette

This course will survey environmental impact assessment (EIA), ecological risk assessment (ERA), and human-health risk assessment (HHRA); ethical and methodological issues related to these techniques; then apply these techniques to contemporary assessments for which state and federal governments are seeking comments by scientists and citizens.

**PHIL 43309. Ethics and Risk**

(3-0-3)

An investigation of classical ethical papers, all in contemporary, analytic, normative ethics, that attempt to develop the ethical theory necessary to deal with legitimate imposition of risk of harm.

**PHIL 43310. Animal Minds and Animal Rights**

(3-0-3)

An examination of competing views of the moral status of nonhuman animals. Particular attention is given to views of the relation between the mental lives of animals and their moral status.

**PHIL 43311. Maritain: Science, Metaphysics, and Mysticism**

(3-0-3)

This course will begin with some elementary work in the philosophy of education on teaching, consider Kierkegaard's *Philosophical Fragments* where he compares the teaching of Socrates and Christ; move on to Plato's *Meno*, a famous dialogue on teaching and learning; and perhaps consider Augustine and Aquinas on the teacher.

**PHIL 43312. Aesthetics**

(3-0-3)

A consideration of some of the fundamental questions in aesthetics and philosophy of art, e.g., the nature of aesthetic representation, expression in art, the concept of beauty, what distinguishes art from "mere things," the structure and function of imagination.

**PHIL 43313. Philosophy and Literature Seminar**

(4-0-4) O'Connor

This intensive four-credit seminar is the introduction to the concentration in philosophy and literature and will pursue interdisciplinary approaches to literary, theoretical, and philosophical texts.

**PHIL 43314. Abortion, Euthanasia, and Capital Punishment**

(3-0-3)

This course involves an examination of recent philosophical work on abortion, euthanasia, and capital punishment. Though the focus is on the philosophical debates, some attention is given to relevant legal and public policy discussions.

**PHIL 43315. The Question**

(3-0-3)

This course addresses the question of the meaning of life. Its aim is not to arrive at a definitive answer, but rather to examine a range of possible responses. The first half of the course will focus on discussions by prominent philosophers (Plato, Boethius, Bentham, Bergson, and others), the second on major literary writings (e.g., by Dostoevsky, Tolstoy, Wilde, J.R.R. Tolkien, and T.S. Eliot) that illustrate possible answers.

**PHIL 43316. Science and Ethics**

(3-0-3)

A course that considers how scientists' methodological, logical, and epistemic flaws (in the way they do science) leads to serious ethical problems that compromise rationality and objectivity, as well as threaten public health. Coursework will focus on philosophy of science, epistemology, ethics, and science.

**PHIL 43317. Thomistic Ethics**

(3-0-3)

An examination of the commentary on Aristotle's *Nicomachean Ethics*, with attention paid to Thomas's way of dealing with issues that have vexed later Aristotelians. The morals of the *Summa Theologiae*, and the claim that Thomas had no ethics. The course will seek a balance between locating Thomas's work in his time and relating it to ours.

**PHIL 43318. The Ethics of Gender**

(3-0-3)

We observe gender differences between men and women, but these differences vary over time and place, depending on the customs and practices of different societies and depending on the choices individuals make. To the degree that gender differences are a product of social and individual choice, we can raise the question, as we will in this course, of what, if any, gender differences, we should have in society. This question is of particular ethical significance in light of our commitment to the equality of men and women.

**PHIL 43319. Moral Skepticism and Intuitionism**

(3-0-3) DePaul

A careful reading of Walter Sinnott-Armstrong's *Moral Skepticism* and Michael Huemer's *Ethical Intuitionism*.

**PHIL 43320. History of Ethics**

(3-0-3) Joy

This course focuses on theories of moral psychology in ancient philosophy, modern philosophy, and contemporary philosophy. It analyzes the changing conceptions of human nature and human action that are the basis of Aristotle's ethics, Hume's ethics, and Kant's ethics. It then discusses what happened to these conceptions in 20th-century ethical theory.

**PHIL 43401. Political Liberalism**

(3-0-3)

A seminar on "the later Rawls" involving a close reading of *Political Liberalism* and the *Laws of Peoples* together with some critical articles assessing this perspective on political philosophy.

**PHIL 43402. Terrorism and Political Philosophy**

(3-0-3)

An exploration of various ethical questions raised by terrorism through an evaluation of competing conceptions of justice. Some questions to be considered include: How should we understand the terrorism that the United States opposes? Is it something only our enemies have engaged in or have we ourselves and our allies also engaged in terrorist acts? Is terrorism always wrong, or are there morally justified acts of terrorism?

**PHIL 43403. Philosophy of Law**

(3-0-3)

An overview of central topics in philosophy of law, followed by consideration of a range of theoretical issues in general criminal law.

**PHIL 43404. Justice Seminar**

(3-0-3) Weithman

An examination of major theories of justice, both ancient and modern. Readings include representatives of liberal theorists of right, such as John Rawls, as well as perfectionist alternatives. The course also serves as the core seminar for the philosophy, politics, and economics concentration.

**PHIL 43426. God, Philosophy, and Politics**

(3-0-3) MacIntyre

This is the capstone seminar for the interdisciplinary minor in philosophy in the Catholic tradition. It is normally open only to undergraduates registered for that minor. The central concern is to understand the various ways in which Catholic philosophers have brought theology to bear on the study of politics, and vice versa. Authors studied include Augustine, Aquinas, Robert Dahl, and Maritain.

**PHIL 43427. Social and Political Philosophy**

(3-0-3)

An investigation of the major concepts and historical movements in political philosophy. Themes treated are state of nature, relationship of society to state, conception of democracy, rights theory, economic justice and justice between groups, and alternatives to liberalism. Readings are drawn inter alia from Plato, Aristotle, Locke, Smith, Rousseau, Marx, Mill, Weber, Lenin, Berlin, Rawls, Nozick, MacIntyre, Taylor, and Habermas.

**PHIL 43428. Contemporary Political Philosophy**

(3-0-3)

In this course we will critically evaluate the major political ideals of our time, namely, libertarian justice, welfare liberal justice, socialist justice, and feminist justice, with a particular focus on how feminist justice presents an important challenge to the other ideals that needs to be met. We will further consider how these political ideals apply to a range of practical problems on the assumption that addressing practical problems can sometimes lead us to revise the political theories we hold.

**PHIL 43501. Metaphysics**

(3-0-3) van Inwagen

An examination of the nature of metaphysics and of those metaphysical issues that have proved central in Western philosophical tradition. Topics discussed will include mind-body problem, freedom of will, universals, substance, time, categories, and God.

**PHIL 43601. Epistemology**

(3-0-3) David

The aim of this class is to provide an understanding of the fundamental issues and positions in the contemporary theory of knowledge.

**PHIL 43602. Philosophical Arguments**

(3-0-3)

This course will reflect on the nature of arguments for philosophical claims in contemporary analytic philosophy. We will proceed by close readings of key articles in current debates on metaphysical, epistemological, and ethical topics.

**PHIL 43603. Philosophy in a Different Voice: Feminist Perspectives on Knowledge**

(3-0-3)

Traditional epistemology and philosophy of science analyze the prospects and conditions of knowledge in a very abstract, general way—as though our individual characteristics (gender, race, etc.) and the sociopolitical situation in which we find ourselves have no bearing on such knowledge. In contrast, this course will consider such issues as the epistemic resources and liabilities of particular social locations, the ideological role of epistemic norms, and the relation between social values and objectivity.

**PHIL 43701. Philosophy of Science**

(3-0-3)

A detailed consideration of the central methodological and epistemological questions bearing on science.

**PHIL 43702. Philosophy of Biology**

(3-0-3)

Central issues in the philosophy of science from the perspective of the life sciences with particular emphasis on topics in evolution theory and sociobiology and upon the topic of inter-theoretical integration in the life sciences (from organic chemistry to cognitive neuroscience). Topics to be covered include teleology, reductionism and supervenience, the biological basis of cognition, explanation, scientific realism, theory change, and the critical appraisal of alternate research strategies.

**PHIL 43703. Philosophy of Cognitive Science**

(3-0-3) Ramsey

A course in philosophy of mind utilizing recent work in the area of cognitive science.

**PHIL 43704. Science and Social Values**

(3-0-3)

A consideration of such questions as: Should science be value-free, or should it be shaped by the needs and ideals of the society that supports it? If the former, how can scientists shaped by society contribute to it, and what claim to the resources of the society can scientists legitimately make? If the latter, how can scientists still claim to be objective?

**PHIL 43705. Addiction, Science, and Values**

(3-0-3)

Students will be introduced to topics in the ethics of care for the indigent; to alternative therapies for recovery and maintenance; and to current brain models of addiction. They will be placed as volunteers (for 14 weeks) with institutions serving indigent recovering addicts in St. Joseph and Elkhart counties.

**PHIL 43706. Gender, Politics, and Evolution**

(3-0-3)

An examination of ethical/political models of gender-neutral access to public and domestic requisites for the development of basic human capabilities, and a comparison of these models with current studies of the significance of human sexual dimorphism in evolutionary psychology.

**PHIL 43707. Philosophy and Psychiatry in the Twentieth Century**

(3-0-3)

A course dealing with (1) the intellectual history of psychiatry from the time of Freud and Kraepelin to the present, (2) the social history of the care of the mentally ill since World War II, and (3) the interpretation and critique of Freud and psychiatry.

**PHIL 43708. Bio-Medical Ethics and Public Health Risk**

(3-0-3) Shrader-Frechette

Designed for pre-med, science, and engineering students, the course will survey ethical issues associated with current public health problems, such as pollution-induced cancers, universal health care, occupational injury and death, and inadequate medical attention to prevention, nutrition, and environmental health.

**PHIL 43709. Evolutionary Psychology and the Sacred**

(3-0-3)

Anthropologists and archeologists have long argued that religious rituals and sacrificial ceremonies addressing the most serious aspects of human life are prehistoric and antedate the development of spoken language, perhaps by hundreds of thousands of years. Today evolutionary psychologists look at evidence suggesting that the concept of the sacred arises naturally from the “functional architecture” of the evolved human mind. We take a critical look at the possibility of integrating those two currents of thought.

**PHIL 43801. Joint Seminar: Philosophy and Theology**

(3-0-3)

Modern Western notions of freedom equate freedom with choice and exalt “doing what I wanna do”—something already exposed by Socrates as effective bondage to our endless needs. When freedom turns out to be bondage, and demands exploitation of other humans and of the earth to satisfy its demands, something seems wrong! We shall examine classical and modern sources to highlight the contrast, locating the signal difference in the presence (or absence) of a creator.

**PHIL 43802. Classical Philosophy of Religion**

(3-0-3)

A critical examination of some classical philosophical theories of religion. The central focus of the course will be issues concerning justification and explanation in religion.

**PHIL 43803. Contemporary Philosophy of Religion**

(3-0-3)

A critical examination of the philosophical import of some contemporary theories of religion. The course will be organized around the attempt to discover a meaningful place for religious forms of life in a secular culture.

**PHIL 43804. Faith and Reason**

(3-0-3)

An examination of some key theoretical issues concerning faith and reason. Among these issues are the nature of faith, the nature of intellectual inquiry, the role of affections in intellectual inquiry, the main competing accounts of intellectual inquiry, and of the philosophical life. Authors to be read include Aquinas, Descartes, Hume, Mill, Nietzsche, Chesterton, and Pope John Paul II.

**PHIL 43806. Aquinas on God**

(3-0-3)

A close reading of the first 43 questions of the first book of the *Summa Theologiae*. These questions, which deal both with the divine essence and with the three divine persons, provide a comprehensive survey of St. Thomas's *Metaphysics*.

**PHIL 43807. Divine Attributes**

(3-0-3)

A consideration of the attributes Christians have traditionally ascribed to God, such as omnipotence, omniscience, omnibenevolence, eternity, and simplicity. The course will examine both the reasons for attributing such properties to God and the ways in which philosophers have tried to explicate these concepts.

**PHIL 43808. Philosophy and Theology of the Body**

(3-0-3) Reimers

The first half of the course will focus on key concepts, such as solitude, gift, communion, shame, and nuptial significance, in relation to human sexual being and behavior. The second half will focus on the application of these theological concepts to ethics and vocation (marriage and celibacy), including John Paul's reflections of the encyclical *Humanae Vitae*.

**PHIL 43809. Christian Theism and Problems in Philosophy**

(3-0-3)

How, if at all, does Christian belief bear on the traditional concerns of philosophers? Is there such a thing as Christian philosophy? After considering the bearing of some common views of faith and reason on these questions, we turn to more specific questions in epistemology, ethics, and philosophical anthropology.

**PHIL 43810. Religion and Science**

(3-0-3)

An examination of the nature and limits of both scientific and religious knowledge, and a discussion of several cases in which science and religion seem to either challenge or support one another.

**PHIL 43811. Chesterton**

(3-0-3) Freddoso

An exploration of the thought of Gilbert Keith Chesterton (1874–1936) perhaps the best Catholic apologist of his time. The course will feature Chesterton's two greatest apologetic works, *Orthodoxy* and *The Everlasting Man*.

**PHIL 43812. Divine Providence**

(3-0-3)

An examination of the view of providence offered by the proponents of middle knowledge, and the objections raised against this Molinist view by both Thomists and contemporary analytic philosophers.

**PHIL 43813. Phenomenology and Theology**

(3-0-3)

In recent years phenomenologists have sought to develop new phenomenologies of Christianity. This seminar examines the attempts of three such thinkers: Michel Henry, Jean-Luc Marion, and Jean Louis Chretien. Can God properly be called “Life”? Of what use is the distinction between the icon and the idol? How far can the model of call and response go in either phenomenology or theology? These are the questions that will mainly interest us.

**PHIL 43901. Philosophy of Mind**

(3-0-3)

Dualist and reductionist emphases in recent analyses of mind. Topics covered will include identity of mind and body, intentionality, actions and their explanation and problems about other minds.

**PHIL 43902. Philosophy of Language**

(3-0-3)

The aim of this course is to provide an overview of the field. Major topics include the relation between truth and meaning; truth-conditional semantics; the meaning of sentences, proper names, definite descriptions, general terms and indexicals; the relations between expressing a belief, making a statement, and uttering a sentence.

**PHIL 43904. The Origins of Analytic Philosophy**

(3-0-3) Speaks

An examination of fundamental writings at the beginning of the 20th century that ushered in the linguistic and logical tradition of analytic philosophy.

**PHIL 43905. Postmodern Analytic Philosophy**

(3-0-3)

A study of several philosophers who combine an analytic commitment to clarity and argument with an interest in the history and critique of modern thought. Philosophers to be considered are Richard Rorty, Charles Taylor, Bernard Williams, and Martha Nussbaum.

**PHIL 43906. Philosophy of Mathematics**

(3-0-3)

A survey of central issues in the philosophy of mathematics.

**PHIL 43907. Intermediate Logic**

(3-0-3)

An introduction to the basic principles of formal logic. The course includes a study of inference, formal systems for propositional and predicate logic, and some of the properties of these systems. The course will concentrate on proving some of the major results of modern logic, e.g., the completeness of first-order logic, the undecidability of first-order logic, the Lowenheim-Skolem theorems, and Godel's incompleteness theorems.

**PHIL 43908. Topics in Philosophical Logic: Modal Metatheory**

(3-0-3)

This course will cover topics in the metatheory of modal logic. We will start with some basic correspondence theory, and then move on to discuss completeness and the finite model property. Also covered is recent work on the relationship between modal logic and classical logic.

**PHIL 43909. Perception**

(3-0-3)

There are many theories of perception: naive (or direct) realism, the sense-datum theory (and representative theories in general), the causal theory of perception, adverbialism, the theory of appearing, intentionalism, and disjunctivism. We will try to get an initial grasp of these theories by viewing them as different answers to the problems posed by illusions and hallucinations. To achieve a better understanding of them we will address a number of questions to each theory: Does it provide an explicit analysis of perception? Does it tell us what the objects of perception are? Does it commit us to nonphysical objects of perception? Does it provide an account of the content of perception? Does it account for the phenomenology of perception? Does it explain how perception can serve to justify beliefs about the physical world? Is it compatible with the results of the scientific study of perception?

**PHIL 43910. Personal Identity and Unity of Consciousness**

(3-0-3) Stubenberg

What sort of a thing am I? What is it to be a person? Can one living human body count as two or more persons (split-brain cases, multiple personality disorder)? Through which sorts of changes can a person persist (how much physical and mental change is survivable)? We shall study some of the traditional answers to these questions—especially Descartes's ego-theory and Hume's bundle theory.

**PHIL 43911. Logic Seminar**

(3-0-3)

A seminar offered periodically on various topics in logic and philosophy of logic.

**PHIL 43912. Between Mathematics and Philosophy**

(3-0-3) Detlefsen

The aim of this course is to introduce the student to important interactions between mathematics and philosophy throughout history. After a brief look at examples from antiquity, the middle ages and the renaissance, we'll focus on the modern era, where we'll pay particular attention to Hobbes, Descartes, the Port Royal logicians, Galileo, Leibniz, Berkeley, Kant and others. If time permits we'll also consider certain ideas of the early 19th-century mathematician-philosopher Bernard Bolzano."

**PHIL 46497. Directed Readings**

(V-0-V)

With consent of instructor and approval of department, advanced students are permitted to take a tutorial with a faculty member. Readings will be assigned in a particular area and writing assignments required.

**PHIL 46498. Directed Readings**

(V-0-V)

With consent of instructor and approval of department, advanced students are permitted to take a tutorial with a faculty member. Readings will be assigned in a particular area and writing assignments required.

**PHIL 48499. Senior Thesis**

(3-0-3)

An opportunity for senior philosophy majors to work on a sustained piece of research in a one-to-one relationship with a faculty member.

## Program of Liberal Studies

### PLS 13186. Literature University Seminar

(3-0-3) Crowe, Goehring

This seminar functions as an introduction to the Program of Liberal Studies. It is designed to develop habits of careful reading, discussion, and writing through the reading of classic texts. These seminars serve as an introduction to the "Great Books" style of education fostered by the Program of Liberal Studies.

### PLS 20201. Literature I: The Lyric Poem

(3-0-3) Fallon, Marvin

An introduction to poetry through intensive study of several lyric poets writing in English. Through close reading of selected poems, students will become familiar with central literary devices, including rhythm and meter, image, metaphor, symbol, paradox, and irony. Poems studied will range from the Renaissance to the 20th century, and may include Shakespeare's sonnets and Keats's odes, along with the works of other major poets such as Donne, Herbert, Marvell, Gray, Wordsworth, Dickinson, Hopkins, Yeats, Eliot, and Stevens. Fall.

### PLS 20301. Philosophical Inquiry

(3-0-3) Goehring, Affeldt, Munzel, Nicgroski, Reydams-Schils

This course introduces philosophical inquiry, both as distinct from and as it relates to other disciplines, through the exploration of primary texts representative of its different forms and questions, and within the context of an integrated liberal education. It also investigates the formal and informal principles of logical reasoning. Readings include selections from the Pre-Socratics, Plato's *Meno*, selections from Aristotle, beginning with his *Organon* and *Physics*, and such authors as Boethius, Descartes, and Nietzsche. Fall.

### PLS 20302. The Bible and Its Interpretation

(3-0-3) Mongrain, Murdoch

A close study of selected books of the Bible. The course will consider the role of the Bible in the life of the church, the history of its interpretation, and the various approaches of modern scholarship. Spring.

### PLS 20412. Fundamental Concepts of Natural Science

(3-0-3) Golding, Sloan, Stapleford

This course raises questions fundamental to our experience of the physical world. Questions such as "What is space?" and "What is time?" and broader issues about the nature of life are initially raised through a close reading of Plato's *Timaeus* and Aristotle's *Physics*, along with excerpts from other ancient texts. In attempting to answer these questions over the course of the semester, we will read a wide variety of sources: principally ancient and modern primary texts, with some secondary readings. These readings will include Euclid's *Elements*, Descartes' *Principles of Philosophy*, and Einstein's *Theories of Relativity*. Spring.

### PLS 23101. Great Books Seminar I

(4-0-4)d

The first in a series of six "Great Book" seminars, and the first in the sophomore sequence, this course focuses on ancient Greek literature and is designed to introduce students to the great books seminar method, which emphasizes discussion, close reading, and the communication of complex ideas. The texts include Homer's *Iliad* and *Odyssey*, Herodotus's *Histories*, Aeschylus's *Oresteia*, Sophocles's *Theban Plays*, Aristotle's *Poetics*, Euripides's *Medea* and *The Bacchae*, Thucydides's *Peloponnesian War*, Aristophanes's *The Clouds*, and three early dialogues by Plato: the *Apology*, *Crito*, and *Symposium*.

### PLS 23102. Great Books Seminar II

(4-0-4)

The second seminar in the sophomore sequence, this course represents a continuation of Great Books Seminar I. The material studied extends from ancient Greece through the Roman period through early Christianity and into the Middle Ages. The texts include Plato's *Republic* and *Phaedrus*, Aristotle's *On the Soul*, Lucretius's *The Way Things Are*, Cicero's *On The Republic*, Vergil's *Aeneid*, Epictetus's *Handbook*, Augustine's *Confessions* and *City of God*, St. Anselm's *Proslogion*, and St. Bonaventure's *Journey of the Mind to God*.

### PLS 30202. Literature II: Shakespeare and Milton

(3-0-3) Fallon, Marvin, Weinfeld

Building on the techniques of close reading developed in Literature I, this course will focus on the expressive power of literary genres, modes, and conventions and will take up the question of the unity and coherence of long works. The reading list will include several plays by Shakespeare and Milton's *Paradise Lost*. In some years, another major English narrative poem may be substituted for *Paradise Lost* (such as Chaucer's *Troilus and Criseyde*, Spenser's *Faerie Queene*, or Wordsworth's *Prelude*). Spring.

### PLS 30301. Ethics

(3-0-3) Affeldt, Goehring, Munzel, Power, Reydams-Schils

An examination of modes of moral reasoning and what constitutes the good life, based primarily on the study of Aristotle's *Nicomachean Ethics* and the moral philosophy of Kant. Readings may also include a selection from the utilitarian ethical tradition, as well as from works in moral development and in moral theology, such as by Augustine, Aquinas, and Newman. Fall.

### PLS 30302. Political and Constitutional Theory: Ancient and Modern

(3-0-3) Affeldt, Nicgroski

An approach to understanding the fundamental problems of political community and the nature of various solutions, especially that of democracy. Readings will include, but are not limited to, Aristotle's *Politics*, Locke's *Second Treatise*, and selections from *The Federalist Papers* and American founding documents. Spring.

### PLS 30411. Scientific Inquiry: Theories and Practices

(3-0-3) Goulding, Sloan, Stapleford

Using major historical texts as primary material, students will investigate crucial philosophical and methodological issues that arise in modern scientific inquiry, especially in the physical and life sciences. What can cause scientists to adopt (or resist) new theories? What relationships has science held to other intellectual disciplines, and how have those relationships changed over time? What fundamental assumptions about the natural world are adopted in much of modern science? What methods have scientists advocated for creating reliable knowledge? Students will grapple with these questions as we study and discuss central texts in the development of modern science, including the works of Ptolemy, Copernicus, Galileo, Descartes, and Newton.

### PLS 30501. Music as a Liberal Art

(3-0-3) Polzonetti

The study of music has occupied a central position in the liberal arts curriculum since the foundation of the earliest universities in the Western world. Music is studied in this PLS tutorial in line with that tradition, taking into account the way the liberal arts have developed during our contemporary era. This course will focus on (a) the scientific and philosophical foundations of harmonic principles from the pre-Socratic philosophers to post-tonal theory; (b) the aesthetic, social, and political relevance of music during selected historical epochs; and (c) the syntactical and formal structures through which composers organize sound in such relevant genres as the Mass, the opera, and purely instrumental musical forms such as the symphony and sonata.

### PLS 33101. Great Books Seminar III

(4-0-4)

Continuing from Great Books Seminar II, and the first in the junior seminar sequence, this course focuses on great works of the High Middle Ages and the Renaissance. The texts include two treatises from Aquinas's *Summa Theologiae* (*On Law and On Faith*), Dante's *Divine Comedy* (in its entirety), Petrarch's *Ascent of Mont Ventoux* and *On His Own Ignorance and that of Others*, selections from Chaucer's *Canterbury Tales*, Julian of Norwich's *Showings*, Erasmus's *Praise of Folly*, Machiavelli's *The Prince*, More's *Utopia*, essays by Montaigne, St. Teresa of Avila's *Interior Castle*, and Cervantes's *Don Quixote*.

### PLS 33102. Great Books Seminar IV

(4-0-4)

Continuing from Great Books Seminar III, and the second in the junior seminar sequence, this course focuses on works from the Renaissance to the Enlightenment period. The texts include Shakespeare's *Tempest*, Bacon's *New Organon*, Descartes' *Discourse on Method* and *Meditations on First Philosophy*, Hobbes's *Leviathan*, Pascal's *Pensées*, Swift's *Gulliver's Travels*, Hume's *Enquiry Concerning Human Understanding*, Rousseau's *Discourse on the Origin of Inequality*, Smith's *Wealth of Nations*, Kant's *Prolegomena to Any Future Metaphysics*, Malthus's *Essay on the Principles of Population*, Austen's *Pride and Prejudice*, Goethe's *Faust*, and Mozart's *Don Giovanni*.

#### PLS 40301. Christian Theological Tradition

(3-0-3) Emery, Mongrain, Murdoch

A study of the major Christian doctrines in their development, including God, creation and humanity, incarnation and redemption, and the sacraments. The course moves toward a historical and systematic understanding of Christianity, especially the Roman Catholic tradition. Readings typically include patristic authors, medieval authors such as Aquinas, and the documents of Vatican II. Fall.

#### PLS 40302. Metaphysics and Epistemology

(3-0-3) Affeldt, Goehring, Munzel, Reydams-Schils

An engagement with philosophical conceptions of the nature of knowledge, reality, and the relation between them. Selections from the Platonic tradition, Aristotle's *Metaphysics*, and Kant's *Critique of Pure Reason* form the basis of the course. Other readings may include works by such thinkers as Newman, Heidegger, Arendt, and Levinas. Spring.

#### PLS 40402. Science, Society, and the Human Person

(3-0-3) Power, Sloan, Stapleford

In this course students will explore two interrelated questions: what can science tell us about human nature, and what can historical and philosophical reflection tell us about science. By reading and discussing important historical and contemporary texts, students will engage the conundrums, challenges, and insights created through the scientific study of human beings and society. Readings will include works by Charles Darwin, Thomas Kuhn, and Jean Piaget. Spring.

#### PLS 40601. Intellectual and Cultural History

(3-0-3) Emery, Sloan

This course will deal with the issue of historical consciousness and with the limits and possibilities of historical understanding. The first portion of the course will examine the issues of historiography and the use of historical analysis in the contextualized reading of texts. From this foundation, the issue of history will be explored with reference to authors such as Augustine, Bossuet, Montesquieu, Kant, Hegel, Ranke, and Eliade. Fall.

#### PLS 43101. Great Books Seminar V

(4-0-4)

The first in the senior "Great Books" seminar sequence, this course focuses on classic texts from the 19th-century literature, and, in addition, on important works from the Eastern tradition that entered the European canon during the 19th century. The works studied include Tolstoy's *War and Peace*, Confucius's *Analects*, *The Way of Lao Tzu*, the *Bhagavad Gita*, Hegel's *Philosophy of History*, Kierkegaard's *Philosophical Fragments*, Newman's *Idea of a University*, De Tocqueville's *Democracy in America*, Melville's *Moby-Dick*, Thoreau's *Walden*, Mill's *On Liberty*, and Darwin's *Descent of Man*.

#### PLS 43102. Great Books Seminar VI

(4-0-4)

The second in the senior "Great Books" seminar sequence, this course focuses on works of seminal importance from the 19th and 20th centuries. The texts studied include Dostoevsky's *Brothers Karamazov*, Marx's *Capital* and *Communist Manifesto*, Flaubert's *Madame Bovary*, Nietzsche's *Beyond Good and Evil*, William James' *Varieties of Religious Experience*, Freud's *Introductory Lectures on Psycho-Analysis*, Jung's *Analytical Psychology*, Weber's *Protestant Ethic* and *The Spirit of Capitalism*, Wittgenstein's *Blue Book*, Heidegger's *What Is Philosophy?*, and Ellison's *Invisible Man*.

#### PLS 43313. Philosophy and Literature Seminar

(4-0-4)

This intensive four-credit seminar is the introduction to the concentration in philosophy and literature and will pursue interdisciplinary approaches to literary, theoretical, and philosophical texts.

#### PLS 46000. Directed Readings

(V-0-V)

Instructor's written permission and permission of chair required. Reading courses in areas of interest to the student.

#### PLS 47002. Special Studies

(V-0-V)

Instructor's written permission and permission of chair required. Reading courses in areas of interest to the student.

#### PLS 47012. Special Studies

(V-0-V)

Instructor's written permission and permission of chair required. Reading courses in areas of interest to the student.

#### PLS 48702. Essay Tutorial

(3-0-3)

This course provides the framework in which seniors in the program prepare a substantial essay as the culmination of their three years in the program. Faculty members working with small groups of students help them define their topics and guide them, usually on a one-to-one basis, in the preparation of their essays. Spring.

## Department of Political Science

### POLS 10100. Introduction to American Politics

(3-0-3)

This course surveys the basic institutions and practices of American politics. It examines the institutional and constitutional framework of American politics and identifies the key ideas needed to understand the subject and develop a basis for evaluating American politics today. This introductory course fulfills the American politics breadth requirement for the political science major.

### POLS 10200. Introduction to International Relations

(3-0-3)

*Corequisite:* POLS 12200

This course provides students with an understanding of historical and current events in world politics. As such, the course has three central objectives: to introduce various theoretical frameworks for analyzing international political and economic events, to provide an overview of substantive topics in international relations, and to supply a basic understanding of contemporary international events. We explore substantive issues such as cooperation and conflict in international relations, the causes of war, nuclear proliferation, regional free trade agreements, the causes and effects of economic globalization, and the role of international law and institutions. This introductory course fulfills the international relations breadth requirement for the political science major.

### POLS 10400. Comparative Politics

(3-0-3) Scully

*Corequisite:* POLS 12400

This course is a general introduction to the major political institutions and conflicts that shape our world today. Rather than focusing on any particular country or time period, I will use a shocking event—the birth of the modern nation-state—to organize our thinking about a diverse range of political movements and ideologies, including feudalism, colonialism, Leninism, and liberal democracy. This introductory course fulfills the comparative politics breadth requirement for the political science major.

### POLS 10600. Political Theory

(3-0-3)

*Corequisite:* POLS 22600

(3-0-3) Staff

This course is an introduction to political theory as a tradition of discourse and as a way of thinking about politics. The course surveys selected works of political theory and explores some of the recurring themes and questions that political theory addresses. This introductory course fulfills the political theory breadth requirement for the political science major.

### POLS 12200. International Relations Discussion

(0-1-0)

*Corequisite:* POLS 10200

Discussion section for International Relations.

### POLS 13105. Introduction to Globalization and International Studies

(3-0-3)

*Corequisite:* POLS 12105

This course has two purposes. First, it will examine the economic, political, and cultural impacts of easy movement of money, goods, and people that are collectively known today as "globalization." The course will consider the "pros" and "cons" of the roles played by the institutions that enforce growing financial trade integration and the international promotion by governments and transnational activists of democracy and human rights. It will also highlight the cultural reactions to globalization, including the resurgence of ethnic identities and religious fundamentalism. A second purpose is to introduce the educational opportunities at Notre Dame in international studies and international career options. Representatives of regional study programs and foreign languages, the Study Abroad Office, and several international institutes and the Center for Social Concerns will visit the class to explain the requirements for various undergraduate

majors and minors and study-abroad programs, as well as international internship and research opportunities for undergraduates. Visits by career professionals in international diplomacy, journalism, human rights, and business will also be arranged.

### POLS 13181. Social Science University Seminar

(3-0-3) Barber, Zuckert

A seminar for first-year students devoted to an introductory topic in political science in which writing skills are stressed. It will fulfill an arts and letters social science requirement, but does not count toward the political science major.

### POLS 13195. Mary Wollstonecraft and Mary Shelley

(3-0-3) Botting

*Prerequisite:* (POLS 13181 OR POLS 13190 OR POLS 195)

This political theory seminar explores the intellectual relationship of Mary Shelley, the author of the novel *Frankenstein*, to her mother, Mary Wollstonecraft, the author of the first book on women's rights, *A Vindication of the Rights of Woman*. Traditionally, scholarship has emphasized how the mother's death as a result of childbirth profoundly affected the daughter's psyche. Many scholars have then drawn the conclusion that the novel *Frankenstein* (1818) is the embodiment of Shelley's anxiety that she was the orphan monster responsible for her own mother's untimely demise. While not denying the psychological power of this thesis, this seminar will explore how Shelley's devoted, even compulsive and passionate, reading of Wollstonecraft's works—including *A Vindication of the Rights of Woman* (1792) and *Letters Written during a Short Residence in Sweden, Norway, and Denmark* (1796)—around the time that she composed *Frankenstein* meant that the novel engaged the major themes of her mother's writings, including Enlightenment views of sex and gender, social and political revolution, equality and freedom, democracy, science, and human progress. Shelley's substantive and often critical engagement of her mother's enlightened political theory shaped her own Romantic politics as represented by the novel *Frankenstein*. In this way, Wollstonecraft can be seen as contributing to the birthing of Frankenstein's monster, not just through her daughter's psychological reaction to her tragic death from childbirth, but even more importantly, through her profound philosophical impact on the political stories that are told by her daughter's momentous novel. These political stories—the egalitarian transformation of the family, the viciousness of class conflict, the desire and demand for social and political revolution, the power of science in politics, the human need for respect and recognition, and the longing for progress—were embodied in Frankenstein and his monster and have since roamed the landscape of the modern Western imagination. Alongside our readings of the fascinating and sometimes scandalous lives and works of Wollstonecraft and Shelley, we will also read the Romantic writers who inspired them (such as Rousseau and Burke) or were inspired by them (such as Percy Shelley and Lord Byron).

### POLS 20100. American Politics

(3-0-3) Campbell, Griffin

*Corequisite:* POLS 22100

This course surveys the basic institutions and practices of American politics. It examines the institutional and constitutional framework of American politics and identifies the key ideas needed to understand the subject and develop a basis for evaluating American politics today. This introductory course fulfills the American politics breadth requirement for the political science major.

### POLS 20200. International Relations

(3-0-3) Lieber, Lindley

This course provides students with an understanding of historical and current events in world politics. As such, the course has three central objectives: to introduce various theoretical frameworks for analyzing international political and economic events, to provide an overview of substantive topics in international relations, and to supply a basic understanding of contemporary international events. We explore substantive issues such as cooperation and conflict in international relations, the causes of war, nuclear proliferation, regional free trade agreements, the causes and effects of economic globalization, and the role of international law and institutions. This introductory course fulfills the International Relations breadth requirement for the political science major.

**POLS 20400. Comparative Politics**

(3-0-3) Gould

*Corequisite:* POLS 22400

This course teaches students how to think comparatively about politics. We study how nation-states emerged as the dominant form of political organization, explain the differences among various states, and explore diverse responses to economic, cultural, and military globalization. The empirical material is drawn from around the globe. This introductory course fulfills the comparative politics breadth requirement for the political science major.

**POLS 20600. Political Theory**

(3-0-3) Villa

*Corequisite:* POLS 22600

This course is an introduction to political theory as a tradition of discourse and as a way of thinking about politics. The course surveys selected works of political theory and explores some of the recurring themes and questions that political theory addresses. This introductory course fulfills the political theory breadth requirement for the political science major.

**POLS 30001. Presidential Leadership**

(3-0-3)

*Prerequisite:* (POLS 10100 OR POLS 140 OR POLS 140A) OR (POLS 20100 OR POLS 240 OR POLS 240A)

This course examines the role of the presidency in the American regime and its change over time. Particular attention will be given to expectations about presidential leadership through the course of American political history. Beginning with questions about the original design and role of the presidency, the course turns to consideration of the role of leadership styles for change and continuity in American politics. Finally, cases of presidential leadership are studied to comprehend the way leadership and political context interact.

**POLS 30005. American Congress**

(3-0-3) Roos

*Prerequisite:* (POLS 10100 OR POLS 140 OR POLS 140A) OR (POLS 20100 OR POLS 240 OR POLS 240A)

This class will expose the student to the practical workings of the U.S. Congress, some major theories attempting to explain those workings, and some of the methods and materials needed to do research on Congress. It will place the study of Congress in the context of democratic theory, and in particular the problem of the way in which the institution across time grapples with the problem of the common good.

**POLS 30010. American Political Parties**

(3-0-3) Wolbrecht

*Prerequisite:* (POLS 10100 OR POLS 140 OR POLS 140A) OR (POLS 20100 OR POLS 240 OR POLS 240A)

Political parties play many vital roles in American politics: They educate potential voters about political processes, policy issues, and civic duties. They mobilize citizens into political activity and involvement. They provide vital information about public debates. They control the choices-candidates and platforms that voters face at the ballot box. They influence and organize the activities of government officials. Most importantly, by providing a link between government and the governed, they are a central mechanism of representation. These roles—how well they are performed, what bias exists, how they shape outcomes, and how they have changed over time—have consequences for the working of the American political system.

**POLS 30025. Interest Group Politics**

(3-0-3) Wolbrecht

*Prerequisite:* (POLS 10100 OR POLS 140 OR POLS 140A) OR (POLS 20100 OR POLS 240 OR POLS 240A) OR (GOVT 10100 OR GOVT 140) OR (GOVT 20100 OR GOVT 240 OR GOVT 240A)

Interest groups have long been considered central to an understanding of the working of American politics. As mediating institutions, interest groups sit at the intersection between the public and the political decision makers who govern them. Examining if and how interest groups facilitate effective representation thus

tells us a great deal about the functioning and quality of American democracy. In this course, we will consider the historical development of interest group politics, the current shape of the interest group universe, potential bias in representation and function, membership and group maintenance, strategies and tactics, and above all, the influence and role of interest groups on democratic policy making and practice in the United States. We will explore broad theoretical issues, grounded in substantive cases from the current and historic experience of American group politics.

**POLS 30030. Political Participation**

(3-0-3)

*Prerequisite:* (GOVT 10100 OR GOVT 140) OR (GOVT 20100 OR GOVT 240 OR GOVT 240A) OR (POLS 10100 OR POLS 140 OR POLS 140A) OR (POLS 20100 OR POLS 240 OR POLS 240A)

This course is intended to explore some of the causes of citizens' differentiated rates of political participation in American politics, as well as the impact that this has on the representational relationship between constituents and legislators. We will begin with a theoretical overview of some of the unique aspects of our representational system. Next, we will analyze the factors that influence the formation of individuals' political preferences, and their propensity to undertake various forms of political participation. Then we will turn to an analysis of the formation and uses of public opinion. Finally, the class will investigate the consequences of using institutional reforms geared toward "direct democracy" to increase political participation and/or the weight of public opinion on the legislative process.

**POLS 30031. American Voting and Elections**

(3-0-3)

This course will examine voting and opinions, and the linkage between political leaders and the mass public. Possible topics include an introduction to electoral analysis; the history of recent electoral politics; the nature of political participation, especially the rationality of voting turnout and non-electoral specialization; party identification and opinions, attitudes and ideology; social groups and cultural identities; mass media and image campaigns; and differences between presidential and congressional elections.

**POLS 30033. Political Psychology**

(3-0-3)

Political Psychology is a multidisciplinary field of study concerned with how psychological processes are influenced by and inform political behavior of individual citizens, groups, political leaders, and behavior within political institutions. This class explores some of the major lines of political psychology theory and research, and their application to political life. These applications include the role of personality in the formation of political attitudes and democratic values; racism, stereotyping, ethnocentrism, and nationalism; the influences of emotion and cognition on voting decisions; social identity theory; information processing and political decision making; inter-group conflict; political intolerance; and methodological approaches in political psychology.

**POLS 30035. Race/Ethnicity in American Politics**

(3-0-3) Tillery

This course introduces students to the dynamics of the social and historical construction of race and ethnicity in American political life. The course explores the following core questions: What are race and ethnicity? What are the best ways to think about the impact of race and ethnicity on American citizens? What is the history of racial and ethnic formation in American political life? How do race and ethnicity link up with other identities animating political actions like gender and class? What role do American political institutions—the Congress, presidency, judiciary, state and local governments, etc.—play in constructing and maintaining these identity categories? Can these institutions ever be used to overcome the points of division in American society?

**POLS 30036. Race and Political Equality**

(3-0-3)

This course will describe and seek to explain racial differences in public opinion, political participation, party affiliation, representation, and policy outcomes.

**POLS 30037. Black Chicago Politics**

(3-0-3) Pinderhughes

This course introduces students to the vast, complex and exciting dimensions of black Chicago politics. First, institutional structures, geographic distribution, and population characteristics will inform students about the sociodemographic background of the African American population in the city. Second, the course explores varying types of political expression that have developed over more than a century, including electoral politics, mass movements, and partisan politics; it will also examine the impact of the Chicago machine, and of the Washington era on the political and economic status of African Americans in the city. Third, public policy developments in housing, education, and criminal justice will be discussed. Fourth, the course also compares black political standing with other racial and ethnic groups in the city. Finally, the course will introduce students to the long tradition of social science research centered on the city of Chicago.

**POLS 30038. Latino Politics**

(3-0-3) Barboza

This course will examine the history and diversity of Latinos in the United States and how Latinos related to the US political system. We will review the extent to which Latinos are incorporated into the political landscape and the degree to which they are adequately represented in the United States government. The course will emphasize the multiple pathways of Latino political assimilation and the ways in which Latinos become involved in politics, including electoral and non-electoral participation and partisanship acquisition.

**POLS 30040. Introduction to Public Policy**

(3-0-3) Ayala

*Prerequisite:* (POLS 10100 OR POLS 140 OR POLS 140A) OR (POLS 20100 OR POLS 240 OR POLS 240A)

The objective of this course is to introduce students to the process of public policy formation in American politics. The course will be divided into three parts. The first section will encompass a brief review of some of the more important mechanisms of American politics that affect the legislative process (political participation, interest groups, congressional elections, etc.). We will then engage in a general review of how such factors have affected the direction and tone of federal public policy over the past 30 years. The final two sections of the course will be devoted to detailed analysis of two public policy areas of particular interest to younger voters: education reform and drug laws. Building on the earlier readings and the analytical tools developed, we will examine the current debates and prospects for reform in these policy areas, with an eye toward understanding the political realities of public policy formation.

**POLS 30045. The State of the American States**

(3-0-3) Hero

This course provides a "critical" and comprehensive examination of politics in the states of the U.S., and does so by analyzing topics from several theoretical perspectives. States are major policymakers concerning such central public policies as education, welfare, and criminal justice, among a host of others. There is tremendous variation, yet, at the same time, there are similarities between and among the 50 states in their political processes and governmental institutions as well as in their public policy concerns and outcomes. The focus of the course is on understanding why the states vary as they do and the consequences of that variation for such core American values as democracy and equality, and how states have different conceptualizations, or different visions or versions, of those core values.

**POLS 30060. Constitutional Law**

(3-0-3) Kommers

This course examines the main principles of American Constitutional law, the process of constitutional interpretation, and the role of the Supreme Court in the American political system. Topics covered are presidential war powers, congressional-executive relations, free speech, church-state relations, the right to life (abortion, right to die, and death penalty), race and gender discrimination, and the American federal system. A good deal of attention is given over to recent personnel changes on the Supreme Court and the extent to which these changes are reflected in the court's opinions. A background in American national government is desirable.

**POLS 30062. Civil Liberties and Civil Rights**

(6-0-3) Kaplan

How do courts decide cases involving civil liberties and civil rights? What rationales support the different interpretations of constitutional rights? How has the doctrine of incorporation affected our understanding of constitutional rights? Why is the concept of neutrality so important in current jurisprudence? How do courts balance formal assumptions and attention to particular situations? The purpose of this course is to help you answer these and other basic questions about the law and politics of constitutional rights, including freedom of expression, due process, and equal protection, as well as civil liberties during wartime.

**POLS 30105. The Modern Presidency**

(3-0-3)

Presidential scholars have argued that the modern presidency has unique characteristics. This course identifies the ways that the powers and institution of the presidency have evolved over the last 60 years. It identifies the institutional and structural forces that have shaped the power of the presidency, and includes examination of the president and foreign affairs including war powers, the organization of the presidency, the president's role in the legislative and budgetary processes, the rise of party primaries, presidential elections, and relations between the President and Congress, the President and the Supreme Court, and the President and the bureaucracy, as well as theories of presidential power.

**POLS 30141. Politics and Science Policy**

(3-0-3)

This class will meet in seminar format. We will examine the general process for science policymaking and emphasize the role played by politics in several specific science programs such as the space program and the Human Genome Project. The first part of the seminar will be devoted to an overview of science policy in the US, to provide students with a grounding in how science has generally been undertaken by the federal government up until World War II. We will also examine the role of both the executive and legislative branches of government in supporting science and identify interest groups that have been influential in shaping science policy. The final portion of the course will require students to undertake an actual exercise in budget allocation, based on budget figures for various science programs in the federal government. The readings for the class will consist of excerpts from several books about science policy and politics, federal budget documents, and potentially transcripts of congressional committee hearings. There will also be at least one additional class meeting outside of the regularly scheduled time to view the film *The Right Stuff*. Students will be evaluated on the basis of one essay exam, one presentation, a group project (the budget exercise), and one research paper. Class participation will also be evaluated toward the final grade.

**POLS 30142. Unequal America**

(3-0-3)

Although America is the world's richest nation, it has the most unequal distribution of wealth and income in the industrialized world. In this course, we will examine why this is so. In particular, we will examine the following questions: What social forces create inequality in society? Is inequality inevitable? Is there such a thing as "social class"? Who gets ahead, and why? Why is race/ethnicity and gender still related to social status, wealth, and income? Does America have a "ruling elite"? Who are "the poor," and what explains their poverty? Are there social policies that can create more equality in American society—and is that what Americans really want?

**POLS 30143. Environmental Politics**

(3-0-3)

The first half of the course provides an overview of major American environmental policies such as regulating land use and preservation, water, air, and endangered species. The second half of the course deals more directly with issues of policy formulation, implementation and enforcement. This course requires significant student participation in addition to the 20-page research paper.

**POLS 30144. State Politics in the US**

(3-0-3)

The goal of this course is to understand the role of the states in American politics. The course examines the structure and history of American federalism, the institutional varieties of state governments, as well as policies that are formulated or implemented at the state level. In addition, we will examine the ways that state politics influences national politics, such as in the Electoral College, in congressional redistricting, and in the frequent jump of state chief executives to the presidency.

### **POLS 30201. American Foreign Policy**

(3-0-3) Lindley

*Prerequisite:* (POLS 10200 OR POLS 141 OR POLS 141A) OR (POLS 20200 OR POLS 241 OR POLS 241A)

The United States is the most powerful state in the world today. Its actions are important not just for US citizens, but they also affect whether others go to war, whether they will win their wars, whether they receive economic aid, whether they will go broke, or whether they will starve. What determines US foreign policy? What is the national interest? When do we go to war? Would you send US soldiers into war? If so, into which wars and for what reasons? How do our economic policies affect others? Does trade help or hurt the US economy and its citizens? We first study several theories about foreign policy. We then examine the US foreign policy process, including the president, Congress, the bureaucracy, the media, and public opinion. To see how this all works, we turn to the history of US foreign policy, from Washington's farewell address through the World Wars and the Cold War to the Gulf War. We then study several major issue areas, including weapons of mass destruction, trade and economics, and the environment. Finally, we develop and debate forecasts and strategies for the future.

### **POLS 30202. War and the Nation-State**

(3-0-3) Leiber

*Prerequisite:* (POLS 10200 OR POLS 141 OR POLS 141A) OR (POLS 20200 OR POLS 241 OR POLS 241A) OR (GOVT 141 OR GOVT 141A) OR (GOVT 241 OR GOVT 241A) OR (IIPS 20501 OR IIPS 241 OR IIPS 241A)

This course will examine the phenomenon of war in its broader political, social, and economic context since the emergence of the modern nation-state. The general themes of the course include the impact of nationalism, democratization, industrialization, military professionalization, the nuclear revolution, and the information and communication revolution on the development of warfare and the state. Particular historical emphasis will be placed on exploring the causes and conduct of World War I and World War II.

### **POLS 30203. On War**

(3-0-3) Rosato

This course is about the causes and conduct of war. As regards causes, the focus is on evaluating the strengths and weaknesses of the most prominent explanations for the outbreak of major war, including balance of power, regime type (democracy/autocracy), civil/military relations, and the personality traits of individual leaders. As regards conduct, the emphasis is on considering the effect of broad political, social, and economic factors (nationalism, democratization, industrialization, and military professionalization) on how wars are and have been fought. Particular historical emphasis is placed on the causes and conduct of great power wars (especially the two World Wars), although other wars will be discussed.

### **POLS 30210. Domestic Sources of US Foreign Policy**

(3-0-3) Lavallee

This course provides students with the analytical tools to understand and critically analyze the impact of domestic actors within the US foreign policy decision-making process. This course examines the roles of the President, Congress, the bureaucracy, public opinion, interest groups, the media and other sources of influence on the foreign policy-making process and its outcomes. Particular emphasis is given to the study of domestic foreign policy actors through the use of case studies as a qualitative tool of political science research. This course is designed to give the student a sense of real-world involvement in American foreign policy making by means of various exercises involving active student participation, especially case memos, simulations, and case discussions. Students will be required to integrate the conceptual and theoretical material presented in class discussions and readings with the case studies presented. In addition to improving students'

understanding of how domestic actors impact foreign policy choices, this course is also designed to enhance analytical thinking and problem-solving skills. Short research assignments, especially preparation for case memos, will increase students' "information literacy," or research skills. Because all students will be expected to participate in class discussions and debates, the course should also improve communication skills.

### **POLS 30220. International Law**

(3-0-3) Reydam

This course introduces the student to the sources, the subjects, and the institutions of the international legal order. Substantive international law is discussed on the basis of cases. Time is also made for discussing current issues, e.g. the docket of the International Court of Justice, the ad hoc UN International Criminal Tribunals for the former Yugoslavia and Rwanda, and the International Criminal Court, and the Iraqi question before the UN Security Council.

### **POLS 30225. United Nations and Global Security**

(3-0-3) Johansen

*Prerequisite:* (POLS 10200 OR POLS 141 OR POLS 141A) OR (POLS 20200 OR POLS 241 OR POLS 241A)

This course explores the United Nations' responsibility for maintaining international peace and security; the reasons for its successes and failures in peacekeeping, enforcement, and peace building in recent cases; the international legal basis for humanitarian intervention and for preventing crimes against the peace, war crimes, crimes against humanity and other gross violations of human rights; and the ethical challenges posed for people seeking to be good citizens both of their nation and of the world. Students evaluate ways to strengthen the role of international law and organization in preventing war and terrorism while addressing ethical issues related to international peace and security.

### **POLS 30227. Conflict Resolution: Theory and Practice**

(3-0-3)

This course has two fundamental aims: (1) to acquaint students with the broad array of social conflict theory that exists in the social sciences as it relates to our ability to manage conflict, ranging from the interpersonal to the international arenas; and (2) to teach basic skills of conflict resolution in low and high level disputes. Thus the course demands substantial reading as well as participation in simulation and training exercises

### **POLS 30228. Terrorism, Peace, Other Inconsistencies**

(3-0-3) Lopez

This course examines the roots and sustaining conditions of contemporary terrorism, as well as diverse counter-terrorism measures and policy prescriptions for the US and for the international community. We then address what challenges both the causes and the cures for terror pose to those who take seriously the creation of a world with less war and violence and greater cooperation among rivals.

### **POLS 30240. International Organizations**

(3-0-3)

This course exams governance in international relations, including both formal and informal institutions, and the functioning of organizations such as the United Nations, International Monetary Fund, World Trade Organization, European Union, and multilateral development banks. Students will conduct research on topics including peacekeeping and humanitarian intervention, political conflicts surrounding trade liberalization, and assessment of economic development programs.

### **POLS 30241. NGOs in International Relations**

(3-0-3)

*Prerequisite:* (GOVT 10100 OR GOVT 140) OR (GOVT 20100 OR GOVT 240 OR GOVT 240A) OR (POLS 10100 OR POLS 140 OR POLS 140A) OR (POLS 20100 OR POLS 240 OR POLS 240A)

This course examines the role that non-governmental organizations (NGOs) play in international relations. Since the end of World War II, international relations scholarship has been dominated by theories that assume primacy of the state. However, in the last twenty years, non-state actors have grown in number, size,

and influence. We will analyze the impact that this development has had on both traditional approaches to international relations as well as empirical problems associated with the prominence of NGOs in IR. The first half of the course will analyze several competing theoretical approaches to NGOs, while the second half of the course will focus on empirical topics and contemporary case studies which highlight the efforts of NGOs to influence state behavior.

### **POLS 30260. International Political Economy**

(3-0-3) Mukherjee

*Prerequisite:* (POLS 10200 OR POLS 141 OR POLS 141A) OR (POLS 20200 OR POLS 241 OR POLS 241A) OR POLS 141 OR GOVT 141A OR IIPS 20200 OR POLS 141 OR POLS 141A OR GOVT 241 OR GOVT 241A OR IIPS 241 OR POLS 241 OR POLS 241A

This course examines the interaction of politics and economics in the international arena. We begin with a brief historical exploration of the international political economy, and introduce four analytical perspectives on state behavior and international outcomes. Topics include trade policy, foreign direct investment and multinational corporations, international capital flows, exchange rate regimes and currency unions (including European Monetary Union), financial crises, and the fight against money laundering and terrorist financing.

### **POLS 30264. International Environmental Politics**

(3-0-3) Connolly

*Prerequisite:* GOVT 141 OR GOVT 141A OR GOVT 241 OR GOVT 241A OR POLS 141 OR POLS 141A OR POLS 241 OR POLS 241A OR (POLS 10200 OR POLS 141 OR POLS 141A) OR (POLS 20200 OR POLS 241 OR POLS 241A)

This course surveys the major actors (states, NGOs, scientists, IOs, consumers, corporations) and issues relating to global and regional environmental problems. We consider issues such as ozone depletion, deforestation, climate change, biodiversity, acid rain, water supply, nuclear power safety, and more. We will study the range of political mechanisms that have been used to foster international environmental cooperation and ask how existing political solutions have fared in response to some of the major international environmental problems. We will develop a sense of what works for international environmental protection and what does not, in order to assess how policymakers might devise effective responses to current and future environmental problems.

### **POLS 30265. Politics of Globalization**

(3-0-3)

This course analyzes the emerging world order and US foreign policy at the end of the Cold War. After a brief examination of the end of the Cold War, it discusses a number of underlying causes for various global problems, including colonization, state failure, political domination, poverty, and civilizational differences. The course samples some vexing problems on the ground such as ethnic identity and violence, religion and violence, humanitarian crises and humanitarian intervention, conflict resolution, post-conflict reconstruction, and transnational and transitional justice, and addresses various foreign policy questions that have become amplified by the war on Iraq, including international terrorism, rogue states, weapons of mass destruction, American primacy, democracy promotion, constitutional engineering, the democratic peace and the perils of illiberal and unconsolidated democracies.

### **POLS 30266. Political Economy of Globalization**

(3-0-3)

This course examines the intersection of politics and economics in an increasingly global world. Economic interdependence has increased dramatically over the past fifty years. While this has raised living standards in many countries, it has also given rise to new social, economic, and political tensions. This course offers an analytical framework for evaluating the consequences of globalization and provides an overview of several theoretical approaches to and the empirical issues in today's global economy. The first half of the course focuses on contending theories of globalization, while the second half of the course deals with more substantive issues. Empirical topics discussed include labor inequality, capital mobility, democratization, international institutions, regional trading blocs, the environment, human rights, and state sovereignty.

### **POLS 30267. Global Politics in Post-Cold War Era**

(3-0-3)

This course analyzes US foreign policy in the post-Cold War and post-September 11 world. We first examine a number of underlying causes for global problems in the post-Cold War world, including civilizational differences, state failure, poverty, and political domination. We then discuss the vexing problems of religious violence, ethnic cleansing, and genocide. Humanitarian crises present the challenges of humanitarian intervention, peace-making, post-conflict reconstruction, democracy building, and bringing justice for crimes against humanity. We will also explore a wide range of foreign policy issues in the post-September 11 world, including international terrorism, rogue states, weapons of mass destruction, American primacy, anti-Americanism, unilateralism and multilateralism, and the war in Iraq.

### **POLS 30280. International Relations in East Asia**

(3-0-3) Moody

This course explores the interactions of the states and societies in the East Asian region, focusing mainly on the relationships of China and Japan, their interactions with each other and with the outside "Asian" powers, the United States and Russia (Soviet Union). The first set of class discussions examines the China-centered system in east Asia prior to the intrusion of the new world system carried by western imperialism. The course then turns to a discussion of this western impact: the colonization of most of the southeast Asian societies, the reduction of China to a "semi-colony" and the subsequent process of revolution, both nationalist and communist, in that country, Japan's turn to "defensive modernization" and its own imperialism to ward off the west and claim status as a great power on a par with the western countries.

### **POLS 30285. International Relations of Latin America**

(3-0-3)

This course is based on the commonly accepted assumption from theories of political realism that the United States successfully has exercised hegemony over the Western Hemisphere since the beginning of the 20th century. The first topic to be considered is what tactics were used to consolidate that hegemony and how the "face of hegemony" evolved during the 1900s up until the present day. This will involve an examination of the history of hemispheric relations with an emphasis on the political, economic, and cultural aspects of Washington's strategy. The examination assumes that great powers attempt to control the behavior of less powerful countries in their sphere of influence, and one should not be surprised to find such a situation. The second half of the semester deals with some discrete situations or issues within the hemisphere: economic integration efforts such as NAFTA, CAFTA, and MERCOSUR; the role of petroleum (particularly as regards Venezuela); the drug issue; developments relating to the US-Mexico border; the long-standing Castro regime in Cuba; and the foreign policies of individual Latin American countries (particularly Brazil and Mexico). There will be two written examinations, plus a final one, and one paper and/or class presentation.

### **POLS 30291. Arab-Israeli Conflict**

(3-0-3)

This course tracks the Arab-Israeli conflict from its origins in the late 19th century to the present, making special use of primary sources that express differing perspectives in their full intensity. Current issues of the conflict will be analyzed in depth with the help of current periodical and electronic sources. Classes will include a mixture of lectures, video, and role-playing. There will be a midterm exam and a short policy paper.

### **POLS 30292. US-Latin American Relations**

(3-0-3)

The primary goal of the course is to understand the basis for the political, economic, and security relations of Latin American states with the United States. The course begins with a theoretical and historical examination of the competing perspectives on what determines United States policy toward Latin America: its normative ideals, its security interests, or its economic interests. It then takes up several enduring themes in US-Latin American relations, including the response of the United States to dictatorships, expropriations of United States-owned property, revolution, and efforts to promote development, democracy, and human rights.

Next, it considers the relations of several Latin American states with each other and the United States from the Latin American point of view, with special attention to the foreign policies of Cuba and Mexico. Finally, it examines several new issues in US-Latin American relations, including regional free trade agreements and trade policy, the environment, migration, and drugs, in a post Cold-War environment.

**POLS 30333. Human Rights in an Age of "Terrorism": the View from South Asia**

(3-0-3) Qazilbash

This course will look at human rights and their continued relevance in the "age of terrorism". Recent developments have shown the need for states to protect themselves and their populations from acts of terror while at the same time maintaining respect for human rights and the rule of law. This course examines how to uphold that balance and draws from the experience of Pakistan's involvement in the global fight against terror. It examines both the misuse of prevention of terrorism laws as well as the minimum safeguards and remedies that must be guaranteed and provided if human rights are not to become the first casualty in the war on terror. There is no exam. Grades based 75 percent on research paper, and 25 percent on class participation. Students are expected to have done readings before the class.

**POLS 30335. Understanding Change in International Politics**

(3-0-3)

The end of the Cold War and the beginning of the third millennium have sparked debates about change in international politics. This course takes a theoretical and historical approach to address this question. It first analyzes competing theoretical perspectives in IR, such as classical Realism (Morgenthau), structural Realism (Waltz and Gilpin), neoclassical Realism (Schweller), subaltern Realism (Ayooob), Liberalism (Doyle), and Constructivism (Wendt). The discussion focuses on various understandings of international politics and the possibility for transformation. The course then examines major forces that have powerfully shaped international politics, including international trade and capitalism, international norms and regimes, and democratization in domestic politics.

**POLS 30338. The Transatlantic Relationship**

(3-0-3) Thompson

Since the end of the Cold War, there have been two notable ideas developed by scholars of international relations. The first idea—first developed by Francis Fukuyama—is that Western civilization has triumphed globally over other civilizations, while the second idea—first developed by Samuel Huntington—is that Western civilization is about to enter a period of greater weakness, *vis-à-vis* other civilizations. In order to understand which argument is correct, we must first understand the current strength of Western civilization, and in particular, the relationship between its two halves—Western Europe and North America. In this course, therefore, we will undertake a study of the history and current state of that relationship, focusing primarily on the post-WWII period, and particularly on the security arrangements that have developed between the two regions. In this light, special attention will be applied to the NATO alliance and to the developing security capabilities of the European Union. Having considered the objective facts of the transatlantic security situation, we will then be able to return to the Fukuyama-Huntington debate in order to determine what the future of intercivilizational relations does indeed portend.

**POLS 30341. Politics of Humanitarianism**

(3-0-3) Fast

This course provides an in-depth analysis of the causes, conduct, and consequences of American foreign policy toward the Middle East since World War II. We will look at the origins of the American foreign policy, and explore the domestic and international factors that shape the policymaking process toward this region, including the roles of several American policy institutions such as the Departments of State and Defense and the Central Intelligence Agency. We will specifically focus on the evolution of American policy toward a number of major countries in the region, including Israel, Iran, Turkey, Saudi Arabia, Egypt, and Lebanon.

**POLS 30342. Security Motivations of Regional Integration**

(3-0-3) Thompson

In many regions of the world, states are combining aspects of their political authority in order to create transnational structures and agreements. Although these integrating structures—such as the European Union (EU), the North American Free Trade Agreement (NAFTA), etc.—are often treated as primarily economic institutions, they also address important security needs. In this course, therefore, we will explore the security concerns that prompted the creation of not only the EU and NAFTA, but also the Central American Free Trade Agreement (CAFTA), the MERCOSUR project in South America, and the ASEAN project in South East Asia, as well as notable failed integrative attempts in the Middle East, Africa, and Eastern Europe.

**POLS 30361. Politics of Money and Banking**

(3-0-3)

This course investigates the political foundations of financial markets and banking regulatory structures. The objective is two-fold: (1) to provide an understanding of the function of money and the banking system within an economy, and (2) to offer an analytical framework with which to understand monetary, financial, and banking regulatory policies. Topics include, among others, the performance of banking systems, the role of international financial institutions, central bank independence, and banking regulation. Comparisons between the US and other banking systems (such as the Brazilian, and the Japanese banking systems) will also be covered.

**POLS 30401. Latin American Politics**

(3-0-3) Mainwaring

(3-0-3)

This course is an introduction to Latin American politics. What are the major challenges facing Latin America in the new millennium? How are different countries facing these challenges? What are the origins of the current dilemmas and opportunities facing Latin America? This course is intended to give students an understanding of the major political and development challenges that Latin America has faced in the mid-20th to early 21st century. The course will survey the major theories and strategies of economic industrialization and neo-liberalism, and it will consider questions of reform, revolution, authoritarianism and democracy. Throughout the course we will use case studies focusing on specific countries and specific problems.

**POLS 30403. Latin American Development and Politics**

(3-0-3) Lies

Latin American countries face many challenges, some inherited from Spanish and Portuguese colonial rule, some created by today's globalization, and some common to all developing countries. This course examines to several Latin American countries have responded to the most important of these challenges: How to build a state that can maintain order at home and stay at peace with its neighbors, how to form legitimate governments that can pass needed laws, how to ensure that citizens have political rights and a say in the political process, how to promote industrialization and economic growth, and how to achieve a more equal distribution of wealth and ensure that basic human needs are met.

**POLS 30413. Current Events of Latin America**

(3-0-3)

This course analyzes the main challenges that Latin America has tackled for the past few years. After introducing students to some basic concepts and contextual information on the region, the course explores the various social, economic, and political events that Latin American countries have confronted as well as the different ways in which they have responded to these challenges. The course also incorporates an analysis of some of the "unsolved" issues of the region, such as environmental protection and sustainable development, gender equality, and ethnic minority rights.

**POLS 30420. Building the European Union**

(3-0-3) Messina

This undergraduate lecture course introduces the contemporary project for greater economic, political, and security integration among the current fifteen members of

the European Union within its appropriate historical context, its current economic and political setting, and its projected future ambitions. The course is thus very much concerned with recent events and important European events-in-the-making, including the implementation of the Amsterdam Treaty, the expansion of the membership of the European Union and EU-sponsored strategies to facilitate democratic transitions in Eastern Europe.

**POLS 30421. European Politics and Institutions**

(3-0-3) Gould

This course considers politics in Europe. We will examine the literature on three major issues: regional integration, origins of modern political authority, and industrial political economy.

**POLS 30451. Politics of Southern Africa**

(3-0-3) Walshe

This course focuses on the key state of the region - the republic of South Africa. After outlining the political history of apartheid, the phenomenon of Afrikaner nationalism, and the rise of African nationalism and the liberation movements, attention turns to the country's escalating turmoil of the 1980s and resulting political transition in the 1990s. South Africa's political and economic prospects are also examined. The semester concludes with a survey of the transitions that brought South Africa's neighboring territories to independence, the destabilization strategies of the apartheid regime and United States policy in that region.

**POLS 30452. Politics of Tropical Africa**

(3-0-3) Walshe

Following an introduction to traditional political institutions, the colonial inheritance and the rise of African nationalism, the course concentrates on the current economic and political problems of tropical Africa. This includes case studies of political organizations, ideologies and government institutions in Ghana, Nigeria, and Tanzania.

**POLS 30454 Peace and Development in Africa**

(3-0-3) Singh

This course addresses two questions: "Why is there so much conflict in Africa?" and "Why is Africa still so poor?" A variety of different explanations are considered, including pre-colonial and colonial legacies, ethnic heterogeneity, poor leadership, the character of African institutions, and international factors. Students will consider the nature of Africa's challenges, what conditions distinguish Africa's successes from its failures, and what can be realistically accomplished in the future.

**POLS 30456. Democracy, Development, and Conflict in Africa**

(3-0-3)

This course surveys African politics through the lens of the "big themes" in comparative politics—democratization, economic development, and internal conflict. Each theme is approached through both broad theories and specific case studies, so that students will learn about Africa in general and concrete ways. Students will consider the nature of Africa's challenges, what conditions distinguish Africa's successes from its failures, and what can be realistically accomplished in the future.

**POLS 30457. Introduction to African Politics**

(3-0-3)

Every week there is a news story concerning some tragedy in Africa. But what does it really mean? How do we understand what's going on in Africa right now? Is there any good news at all coming from the "Dark Continent"? Why is Africa so poor and so violent? How did Africa get this way? What can we do about it? Is there a realistic basis for optimism about Africa? This university seminar will be structured around a series of issues "ripped from today's headlines" so as to provide participants with a more thorough understanding of African politics today.

**POLS 30465. Chinese Politics**

(3-0-3) Moody

Study of the contemporary Chinese political system and process in the light of Chinese history and culture. Some of the topics treated include the traditional political order; the revolutionary movements; the rise of communism; Maoism and the rejection of Maoism; the political structure; leadership, personalities, and power struggles; economic policy; social policy and movements; problems of

corruption and instability; and prospects for democratic development. There will be some attention to Taiwan and Hong Kong as special Chinese societies.

**POLS 30466. Political Movements in Asia**

(3-0-3)

This course analyzes a wide range of political movements including nationalist and revolutionary movements, guerrilla insurgencies, terrorist organizations, democracy movements, and peace movements. The Asian region encompasses China (including Taiwan, Tibet, Xinjiang, and Hong Kong), Mongolia, North and South Korea, Japan, the Philippines, Vietnam, Thailand, Cambodia, Burma, Malaysia, Indonesia, India, Pakistan, Nepal, Afghanistan, and so on. To understand various movements, we will study global trends, human rights values, cultural differences, religious doctrines, historical legacies, state-society relations, leadership skills, mobilization strategies, and violent vs. nonviolent trajectories. In addition to analytical readings, we will also watch a series of documentaries and read a number of prominent (auto-)biographies.

**POLS 30480. Religion and Politics in Comparative Perspective**

(3-0-3) Dowd

In this course, we examine various hypotheses about the relationship between religion and politics, religious institutions and political institutions, and based on evidence from across time and space (i.e., Africa, Asia, Europe, Middle East, North America, and South America) discuss the robustness of such hypotheses. The aim of the course is to think critically about the conventional wisdom concerning the relationship between religion and politics. Special attention will be focused on the effects of modernization and globalization on the political salience of religion and whether certain types of religious systems (i.e., various types of Christianity and Islam) are more compatible with and conducive to democracy than others.

**POLS 30483. Contentious Politics and Resistance Movements**

(3-0-3)

This course analyzes prominent resistance movements in the 20th and 21st centuries. We first examine the conceptual tools of contentious politics, domination and resistance, state-society relations, and violent vs. nonviolent strategies of resistance. We then examine various nationalist independence movements, revolutionary movements, communist insurgencies, civil wars, and peaceful democracy movements. "To better understand resistance movements from the perspectives of leaders and participants, we will watch a series of documentaries and read the (auto-) biographies of Mahatma Gandhi, Nelson Mandela, Aung San Suu Kyi, the Dalai Lama, Wei Jingshen, and others." In analyzing democracy movements, we will further examine what the third wave of democracy entails, why some movements succeed while others fail, how new democracies should reconcile with past dictators, to what extent constitutional engineering can solve past problems and facilitate successful transitions, and why some new democracies remain fragile.

**POLS 30485. Game Theory**

(3-0-3)

This course will provide a basic introduction to the concepts and tools of game theory and demonstrate how these can be used in the social sciences. Emphasis is placed on understanding the logic of game theory and its application to the study of politics. Students will also be introduced to the debate concerning the applicability and limitations of formal approaches. The course assumes a familiarity with algebra, but no calculus is required.

**POLS 30490. The Logics and Politics of International Migration**

(3-0-3) Messina

This course investigates the primary economic, humanitarian, and political forces that are driving and sustaining the complex phenomenon of contemporary transnational migration. Within this context, three core questions are addressed. First, have the forces of globalization and the entanglements of international commitments and treaty obligations significantly diminished the policy-making autonomy of the traditional nation state? Second, what are the significant benefits and costs of transnational migration for the immigration receiving countries? Finally, is a liberal immigration regime desirable and, if so, can it be politically sustained? This is a course with a methodological component.

**POLS 30514. Latin American Politics and Economic Development**  
(3-0-3)

*Prerequisite:* (POLS 10400 OR POLS 142A) OR (POLS 20400 OR POLS 242 OR POLS 242A) OR (GOVT 10400 OR GOVT 142 OR GOVT 142A) OR (GOVT 20400 OR GOVT 242 OR GOVT 242A)

During the past few decades, Latin America has undergone deep political and economic change. The patterns of political polarization and the implementation of import substitution industrialization models that characterized the region were altered by the emergence of bureaucratic authoritarian regimes. From the 1980s on, Latin American nations sought to reinstall democracy and promote economic development, yet the paths they followed to those ends have been quite diverse, as have their achievements. This course examines those divergent paths during the past four decades. After introducing students to some contextual information on the region, the course will examine the different roads to democratic breakdown, the emergence of authoritarian regimes, and the contrasting paths to redemocratization and development.

**POLS 30523. Contemporary Latin American Political Thought**  
(3-0-3)

This course offers a global perspective on contemporary Latin American politics. It examines the consequences of democratization in different Latin American countries, the connections between democracy and social and economic development, trends in government institutions, political parties and elections, and the still present tensions between democratic and non-democratic practices and ideologies in the region.

**POLS 30525. Law/Democracy in Latin America**  
(3-0-3)

This course explores many of the challenges to the rule of law across Latin America, and their connection to democracy. We will begin by examining the relationship between law and democracy, then look at a series of issues that illustrate the strength or weakness of the rule of law in the region. Rather than focusing on one country at a time or a few countries in depth, we will use events and systems in various countries as illustrations of important themes. We will then look at the possible consequences of these challenges for democracy in the region, and possible solutions. The course materials will at times cover difficult and controversial topics such as violence, human rights violations, and corruption. By the end of the course, you will have acquired some basic information about Latin American legal systems, and some basic concepts about the different ways courts work in that part of the world. More importantly, however, you will have a greater understanding of what a robust democracy should look like, and where different countries fall short. You should be able to engage in a discussion about the role courts and laws do play, should play, and can play in the (democratic) political systems of Latin America, and the potential for improvement.

**POLS 30601. Ancient and Medieval Political Theory**  
(3-0-3) Keys

What is the meaning of justice and why should we care about it? Can politics ever perfectly establish justice? Which forms of government are best for human beings to live under, and why? What is the political relevance of religion and philosophy, family and ethnicity, war and peace, nature and freedom, law and right? What are the qualities of a good citizen and political leader? How should relations among diverse political communities be conducted? This course introduces students to theoretical reflection on these and related questions through the study of some of the great works of ancient and medieval political thought. Readings will include writings of authors such as Thucydides, Plato, Aristotle, Cicero, Augustine, Farabi, Maimonides, and Aquinas.

**POLS 30604. Christian Political Thought**  
(3-0-3) Keys

This course introduces students to the rich tradition of Christian reflection on politics and its place in human life. Central questions include (1) the relation of Christian ethics to citizenship and to the sometimes harsh necessities of political leadership, and (2) the interplay between reason and revelation, philosophy and theology. Readings will span the patristic, medieval, and contemporary periods, and will also include some documents from 20th-century Catholic social teaching.

**POLS 30610. The Enlightenment and Its Revolutions**  
(3-0-3) Botting

This course examines the political, social, economic and intellectual revolutions that shaped the trajectory of the age of Enlightenment from the late 18th to the late 18th century in Europe and America. We will study the political theories of Locke, Montesquieu, Rousseau, Voltaire, Smith, Jefferson, Madison, Hamilton, Kant, Burke, and Wollstonecraft, and how their ideas shaped the many revolutions of their time and the very meaning of the Enlightenment itself.

**POLS 30612. Nineteenth-Century Political Thought**  
(3-0-3) Kaplan

The problem of 19th-century political thought can be described as follows: We want to believe in something outside ourselves, but we want it to be our own choice. After the French Revolution, universal liberty seemed possible, but the legitimacy of actual institutions was called into question. This made political theory a vital part of political life itself. This course will investigate the themes of liberty, institutions, and change as they appear in selected works of French and German political thought by Joseph de Maistre, Auguste Comte, Alexis de Tocqueville, G.W.F. Hegel, Karl Marx, and Max Weber.

**POLS 30615. American Political Thought**  
(3-0-3) Zuckert

This course will explore some of the major thinkers and themes of the history of American political theory. Beginning with the founding era, the course will examine the writings of Jefferson and the *Federalist Papers* in an attempt to shed light on the theory behind the new republic and the structure that that republic should take. From there, the course will move toward the crisis that culminated in the Civil War, in an attempt to clarify the purpose of the union and its shape if it is to survive the crisis. The course will then examine some writings dealing with the push toward industrialization, beginning with Reconstruction, continuing with the reality of global war, and ending with the prospects of a Great Society in the New Deal. The course will then explore thinkers concerned with the changing shape of democracy, such as Dewey, Reinhold Niebuhr, and Martin Luther King Jr.

**POLS 30620. Modern Political Thought**  
(3-0-3) Botting

In this course, students will study the focal ideas and arguments that helped shape the development of Western modernity through close readings of the classic texts of modern European political thought. Political theorist Charles Taylor's recent book, *Modern Social Imaginaries*, will provide a helpful historical and philosophical framework for the course and will be read and discussed gradually over the semester. Machiavelli's *The Prince* will give students insight into the philosophical origins of the modern Western experience of secular, power politics. Hobbes's *Leviathan*, Locke's *Second Treatise of Government*, Rousseau's *Second Discourse* and *Social Contract*, and selected political essays by Kant will offer students the opportunity to understand the evolution of the social contract tradition, and how it helped produce the fundamental Western "modern social imaginaries" of natural rights, the contractual social order, popular sovereignty, and the public sphere.

**POLS 30621. Continental Political Thought**  
(3-0-3) Villa

This course examines the response of leading theorists to the promise and pathologies of the modern age. Among other topics, we will consider the political implications of the decline of authority, community, and the public sphere; the problem of institutionalizing freedom in the modern nation state; and the fate of political and moral agency in a bureaucratized, mass-ified polity. Special attention will be paid to the continental tradition's critique of liberal institutions and political philosophy. Readings from Hegel, Tocqueville, Marx, Nietzsche, Weber, Schmitt, the Frankfurt School, Arendt, and Foucault.

**POLS 30631. Social Choice and Democratic Theory**  
(3-0-3)

Is there a public good? A prevalent view in political science is that democracy is unavoidably chaotic, arbitrary, meaningless, and impossible. Such skepticism began with Condorcet's paradox of voting in the 18th century, and continued

most notably with Arrow's impossibility theorem and Riker's Liberalism against Populism in the 20th century. We will examine and challenge these long-standing doubts about democratic governance (among them cycling, agenda control, and multidimensional manipulation). The course will provide a non-technical introduction to social choice theory (formal analysis of the problem of preference aggregation in general, and of alternative voting rules). The tools of social choice will be illustrated in several close analyses of Congressional deliberation a voting. Most importantly, we will critically investigate the conceptual and normative foundations of social choice theory as it relates to current democratic theory.

### **POLS 30652. Machiavellianism**

(3-0-3)

Machiavelli is notorious for promoting a certain "hard-nosed realism" in political analysis and practice. This course explores Machiavellianism in the master himself and in the tradition to which we give his name. We will read representatives of Machiavellian republication, including a novel with a decidedly Machiavellian lesson (Mark Twain's *Tom Sawyer*), and conclude with the recent book by John Mearsheimer, often thought to be the leading Machiavellian analyst of international politics of our day.

### **POLS 30653. Politics and Conscience**

(3-0-3) Keys

*Prerequisite:* (POLS 20600 OR POLS 243 OR POLS 243A) OR (GOVT 20600 OR GOVT 243 OR GOVT 243A) OR GOVT 143 OR GOVT 143A OR GOVT 243 OR GOVT 243A OR POLS 143 OR POLS 143A OR POLS 243 OR POLS 243A

Against a backdrop of large-scale society, mass movements, and technological bureaucracy, the invocation of "conscience" recalls the individual human person as a meaningful actor in the political sphere. But what is conscience, and what are its rights and responsibilities? What is it about conscience that ought to command governmental respect, and are there any limits to its autonomy? What role should conscience play in questions of war and peace, law-abidingness and civil disobedience, citizenship and political leadership? And how does the notion of conscience connect with concepts of natural law and natural rights, nationality and prudence, religion and toleration? This course engages these questions through select readings from the history of political thought. We also will consider various 20th-century reflections on conscience, expressed in essays, plays, short stories, speeches, and declarations.

### **POLS 30660. Non-Western Political Thought**

(3-0-3) Dallmayr

The course offers an introduction to prominent modes of non-Western thought, such as Islam, Hinduism, Buddhism, and Confucianism, with a focus on the political implications of these teachings. In each case, attention will be given both to classical and to modern texts and developments. Among classical sources, consideration will be given to Al-Farabi, Averroes, Ibn Khaldun, the Vedas, Upanishads, some Buddhist sutras, and the Analects; among modern or recent developments the focus will be on Islamic "fundamentalism" and secularism, on Gandhi and Indian nationalism, and on "engaged Buddhism" and Chinese communism.

### **POLS 30668. Feminist Political Thought**

(3-0-3) Abbey

This course will examine different ideas, approaches, and issues within feminist political thought. The first part of the course will compare different theoretical perspectives, from liberalism to Marxism, that have been employed by contemporary feminists. We will pay particular attention to the meanings ascribed to "woman" and her roles in society. The second part of the course will examine how women have been represented throughout Western political thought, and the values ascribed to them by political theorists. Finally, in the last part of the course, we will turn to an examination of several contemporary political issues particularly relevant to feminist thought.

### **POLS 30669. The Public Sphere and Public Spaces**

(3-0-3)

*Prerequisite:* (POLS 10600 OR POLS 143 OR POLS 143A OR POLS 243F) OR (POLS 20600 OR POLS 243 OR POLS 243A)

How do political theorists distinguish between the public and the private? Which distinctive activities take place in the public sphere? What are the effects on contemporary society if the public sphere is lost or radically diminished or changed? This course will examine a number of different ways that modern and contemporary political theorists have conceptualized the public sphere. We will seek to apply our theoretical understandings of the public sphere to illuminate the political and philosophical issues embedded in how public spaces are constructed in the United States, using the New Urbanism movement in particular.

### **POLS 30670. Politics and Literature**

(3-0-3) M. Zuckert

*Prerequisite:* (POLS 10600 OR POLS 143 OR POLS 143A OR POLS 243F) OR (GOVT 20600 OR GOVT 243 OR GOVT 243A) OR (POLS 20600 OR POLS 243 OR POLS 243A)

This course will explore some of the major thinkers and themes of the history of American political theory. Beginning with the founding era, the course will examine the writings of Jefferson and the Federalist Papers in an attempt to shed light on the theory behind the new republic and the structure that that republic should take. From there, the course will move toward the crisis that culminated in the Civil War, in an attempt to clarify the purpose of the union and its shape if it is to survive the crisis. The course will then examine some writings dealing with the push toward industrialization, beginning with Reconstruction, continuing with the reality of global war, and ending with the prospects of a Great Society in the New Deal. The course will then explore thinkers concerned with the changing shape of democracy, such as Dewey, Reinhold Niebuhr, and Martin Luther King Jr.

### **POLS 30670. Politics and Literature**

(3-0-3) C. Zuckert

This course involves the study of works of political theory and literature in order to address some of the central questions of political theory in the modern age. The examination of the relation between truth, faith and politics, and the nature of political action will form central questions of the course. We will pay special attention to the problems of founding politics and membership in political communities.

### **POLS 30727. Theories of Law**

(3-0-3)

*Prerequisite:* (POLS 20600 OR POLS 243 OR POLS 243A) OR (GOVT 20600 OR GOVT 243 OR GOVT 243A)

This course will explore historical and contemporary theories of law, examining the nature of law in civil society and the moral foundations of systems of law. In examining the accounts offered by Aristotle, Cicero, Aquinas, Hart, Fuller, Dworkin, and Raz, the class will engage in the historical and contemporary debates over the nature of law, such as natural law versus positive law, law's pedagogical and deterrent functions, the relationship between law and virtue, and establishing a legitimacy of a legal system. The aims of the course will be to develop a theoretical understanding of law and its proper function in modern societies and to trace the historical contours of legal philosophy and the development of our own legal system.

### **POLS 30730. Political Pathologies**

(3-0-3)

Tyranny takes many forms. The tin-pot dictator, the fearsome totalitarian madman, the slow asphyxiating absurdity of faceless bureaucracy, the efficient provider of goods in exchange for freedom, the populist rabble-rouser, the anarchic madness of failed states—they all form part of the dubious pantheon of political pathology. These diseases of the political order, in turn, tell us about the things that we consider valuable in political life and the ways in which their attainment might be thwarted even while everybody pursues them in good faith. This course will be an adventure in the clinical exploration of these diseases. We will attempt to understand the difference between political order and disorder, disease, and health, by looking to the philosophical treatments of tyranny and its opposites and contrasting these treatments with the varied experience of human beings of these

things. Throughout, we will engage with such questions as: What distinguishes genuine statesmanship from tyranny? What are the fundamental characteristics of the tyrant? What causes tyranny and political disorder? What are the moral dilemmas that people face when living under tyranny? What are the basic cures for tyranny? Our goals are thus to understand the causes, symptoms, development, consequences, and cures of the great political pathologies. This task will require us to draw on texts from a wide variety of perspective, from philosophy to social science and artistic representations (novels and films, in particular), and to engage critically and imaginatively with arguments and situations that pose sometimes-excruciating choices.

### **POLS 30731. Authority and Legitimacy**

(3-0-3)

Why do we obey? When should a ruler or a political regime be acceptable to those who are ruled? The legitimacy of rule is one of the central problems in politics. This course examines the problem of legitimacy and the concept of authority from a theoretical perspective, using historical and contemporary cases as illustrations. The main questions we will address are: (1) Does legitimation harmonize rule and justice, or does it merely cloak the coercive power of the state? (2) Can consent legitimize rule? (3) Can there be a rational secular source of authority? We will read works by Rousseau, Weber, Arendt, Habermas, and Raz. Class assignments will ask students to use these theoretical approaches to reflect on historical cases and current affairs.

### **POLS 30732. Theories of Federalism**

(3-0-3)

Federalism is a fundamental and identifying component of the American political system. Federalism's role in American politics has been ascending since the mid-1990s, after approximately 60 years of diminished relevance. In addition to seeking to understand what, as an organizing principle of government, federalism is, this course explores the theoretical and historical basis of American federalism, as well as theories of federalism from Canada, Australia, and Western Europe, including the relatively new supranational federalism of the European Union. We will address questions of federalism's relationship to rights and minorities, liberty, security, and justice. We will also investigate concepts such as hard and soft federalism, symmetrical and asymmetrical federalism, and interstate versus intrastate federalism. Readings will include selections from *The Federalist Papers* and writings by Tocqueville, Calhoun, Lincoln, Martin Diamond, Herbert Storing, and Charles Taylor.

### **POLS 30733. The Problem of Faction**

(3-0-3)

Since the heated election of 2000, the terms "red state" and "blue state" have become a part of our political lexicon. But the phenomenon of faction—internal political conflict—s neither new nor unique to the United States. After beginning with an assessment of contemporary politics, this course will survey a variety of thinkers—ancient, modern, and American—on the problem of factions.

### **POLS 30734. Justice: Ancient and Modern**

(3-0-3)

What is justice? And why should one be just? These are core questions of political philosophy. In this course we will study these questions by contrasting two conflicting theories of justice: Plato's *Republic* and Hobbes's *Leviathan*. Besides encouraging students to think critically about their own beliefs of justice and cultivating their ability to construct reasoned arguments, this course will introduce students to the contrast between ancient and modern political theory, and will encourage them to reflect on how both still speak to us today.

### **POLS 30735. Democracy and Its Critics**

(3-0-3) Cohen de Lara

Most Americans and, increasingly, most people around the world, would agree that democracy is the only legitimate and feasible form of government. But what exactly does "democracy" mean? And is democracy always good, or can this form of government also be a source of problems? In this class, we will try to answer these questions by studying both the historical and contemporary debates about the meaning of democracy. We will begin the course with a brief look at the debate

about democracy in ancient Athens. We will then examine the debate about democracy in early modernity. This is the period in which the main principles of modern democratic theory, such as consent, equality, majority rule, and representation, received their theoretical defense. This is also the period in which democracy came under attack from liberal, conservative, and radical thinkers. In the last part of the course, we will discuss several competing 20th-century models of democracy. The purpose of this class is to provide the students with an increased historical awareness about the value of democracy, and to facilitate critical reflection about the meaning and limitations of democratic government.

in documents such as the UN's Universal Declaration of Human Rights, the touchstone for many legal and human rights claims.

### **POLS 30805. How To Do Political Research**

(3-0-3) Coppedge

This is a course primarily intended for juniors or seniors who are writing, or are planning to write, a senior essay, although it is open to all majors. It helps students acquire the practical skills that are essential for completing a substantial empirical research project: posing a research question, finding out what is already known, staking out an original argument, identifying counterarguments, deciding what kind of evidence is required to figure out who is right, clarifying concepts and boundary conditions, gathering the evidence, analyzing the evidence, and interpreting the analysis. The course encourages students to consider a variety of approaches and helps them decide whether to use quantitative methods, qualitative methods, or both. Students will do independent research to compile a bibliography, gather and analyze evidence, and write an outline, but will not write a paper. Instead, they will present and defend their findings orally and visually. All students are expected to participate vigorously in evaluations of their peers' research.

### **POLS 33001. Sophomore Seminar**

(3-0-3)

Writing seminars are devoted to a specialized topic and give students a chance to take a writing-intensive course in a seminar setting, with an emphasis on research skills and discussion.

### **POLS 35901. Internship**

(V-0-V) Arroyo

The goal of the internship program is to provide opportunities to integrate coursework with experiential learning. To this end, the department sponsors internships with a variety of local government or government-related agencies. Learning through internships polishes your resume, hones your interviewing skills, and improves your writing and analytical skills by entering the world of work and getting hands on experience. All internships are unpaid. Internship credits do not fulfill political science major requirements.

### **POLS 35903. Summer Internship**

(V-0-V)

Summer internships are an excellent way to explore career options, to gain valuable work experience and to build your resume. Students who have secured an unpaid summer internship can apply for academic credit by either visiting the Internship Program website at: [politicalscience.nd.edu](http://politicalscience.nd.edu) or by contacting the internship director. To qualify for credit, internships must have prior approval, must be unpaid, be at least four weeks in duration, and provide at least 80 hours of work. Permission required.

### **POLS 37910. Mock Trial**

(2-0-2)

Permission required. This course is designed to prepare students to participate in the American Mock Trial Association's annual mock trial tournaments. Students will learn to apply the judicial rules of civil/criminal procedure and rules of evidence to the 2003–04 national case. Participants will assume the roles of trial attorneys and witnesses for the plaintiff and defense and will develop critical analytical and communications skills in preparing and presenting the case through the direct examination and cross-examination at trial. Mock trial does not count for the political science major.

**POLS 40002. Presidents and Elections**

(3-0-3)

We will discuss the evolution and quality of presidential selection in the United States. Does our system select for individuals best suited for the office of the presidency? We will debate the Electoral College and the two-party system. We will compare our assessment of "what it takes" to be president in 2004 with theories of presidential leadership put forth by presidency scholars such as Richard Neustadt and Stephen Skowronek. Both the controversial 2000 and 2004 elections will serve as our major case studies.

**POLS 40005. The Development of American Political Institutions**

(3-0-3) Griffin

The US Constitution has remained essentially intact since 1787; yet contemporary political institutions and practices would hardly be recognizable to a citizen of the 19th century. Thus, the history of our political institutions is one of change and reform, as well as stability and persistence. This course will focus on the development of the US political system from the late 18th to the early 20th century. Of particular interest will be the evolution of the legislative, executive, and electoral institutions.

**POLS 40021. Religion and Politics: Comparative Perspective**

(3-0-3) Campbell

An examination of the linkage among religious beliefs, world views, group identifications, political attitudes and behavior, based on literature in political science, sociology, psychology and theology. Topics include the meaning and measurement of religiosity; religious and anti-religious values embedded in American political institutions; religious world views and political philosophy; cue giving and political mobilization by religious groups, denominational traditions, partisanship and issue positions; religious movements, social conflict and political coalitions.

**POLS 40025. Schools and Democracy**

(3-0-3) Campbell

Education sits high on the public policy agenda. We are living in an era of innovations in education policy, with heated discussion surrounding issues such as vouchers, charter schools, and the No Child Left Behind Act. This course introduces students to the arguments for and against these and other educational innovations, and does so through the lens of how schools affect the civic health of the nation. Often forgotten amidst debates over school choice and standardized testing is the fact the American schools have a mandate to teach young people how to be engaged citizens. Students in this course will grapple with the civic implications of America's educational landscape, and have an opportunity to propose ways to improve the civic education provided to young people.

**POLS 40040. Public Policy and Bureaucracy**

(3-0-3)

*Prerequisite:* (POLS 10100 OR POLS 140 OR POLS 140A) OR (POLS 20100 OR POLS 240 OR POLS 240A) OR (GOVT 10100 OR GOVT 140) OR (GOVT 20100 OR GOVT 240 OR GOVT 240A)

This course explores the process, substance, and efficacy of public policymaking and policy implementation in the United States. We begin by asking: Why do some problems become public issues while others do not? Attention is given to how government identifies problems and formulates policies meant to address them. Then we ask, once formulated, how policies are implemented. The course will examine government's "menu" of options for policy implementation. Student research papers will focus on the evolution over time of a specific policy, examining how that policy's implementation affected its impact.

**POLS 40044 Domestic Sources of US Foreign Policy**

(3-0-3) LaVallee

This course provides students with the analytical tools to understand and critically analyze the impact of domestic actors within the US foreign policy decision-making process. This course examines the roles of the President, Congress, the bureaucracy, public opinion, interest groups, the media and other sources of influence on the foreign policy-making process and its outcomes. Particular emphasis is given to the study of domestic foreign policy actors through the use of case studies as a qualitative tool of political science research. This course is designed to give the

student a sense of real-world involvement in American foreign policy making by means of various exercises involving active student participation, especially case memos, simulations, and case discussions.

**POLS 40061. Constitutional Interpretation**

(3-0-3) Barber

*Prerequisite:* (POLS 10100 OR POLS 140 OR POLS 140A) OR (POLS 20100 OR POLS 240 OR POLS 240A)

Americans have always debated Supreme Court opinions on specific constitutional questions involving the powers of government and the rights of individuals and minorities. The leading objective of this course is to acquaint students with the basic issues of constitutional interpretation and to show how they influence questions involving constitutional rights and powers and the scope of judicial review.

**POLS 40062. Judicial Politics**

(3-0-3)

This course examines the effect of the legal system on American politics, government, and society. We begin by reviewing the institutions, actors, and processes of the legal system, focusing on the institutional and individual influences on judicial decision-making. In the second part of the semester, we closely analyze the political consequences of legal decisions in areas such as criminal law, race and education—including desegregation, school finance, and school choice—abortion, the death penalty, and homosexual rights. We conclude by evaluating the extent to which courts can and should be expected to bring about social and political change.

**POLS 40064. Race and the Constitution**

(3-0-3)

This course will cover the decisions of the Supreme Court in the area of race relations, from the 19th-century problem of fugitive slaves to current problems involving school desegregation, affirmative action, and "private" acts of race discrimination. The class will focus not only on court cases but also on their broader constitutional and philosophical implications.

**POLS 40074. Civil Liberties**

(3-0-3) Barber

Most courses in constitutional law narrate the Supreme Court's evolving positions on constitutional rights and institutions. This course starts not with the Supreme Court but with the *Federalist Papers*, from which it develops a general theory of the social and economic goals or ends of constitutional government in America. It then uses this theory as a framework for assessing the Supreme Court's position on property rights, race relations, personal privacy, and the place of religion in American life. This exercise can yield results that make for lively class discussion, not only about the Court, but also about the adequacy of the Constitution itself. Grades will be based on a midterm and a final exam, with a paper option in lieu of the final.

**POLS 40150. Executive Branch and Public Policy**

(1-0-1) Kernan

This course will address public policy issues such as budgets, taxes, health, economic development, welfare and crime. Taught by Joe Kernan, former Mayor of South Bend, Lieutenant Governor and Governor of Indiana, the course will examine the political, economic, and ethical dimensions of policy development, as well as the crucial interaction between the executive and legislative branches of state government. There will be approximately 8 pages of writing and a moderate amount of reading, including handouts. Does not count for the political science major. Permission required.

**POLS 40201. Diplomacy of US Foreign Policy**

(3-0-3) Kammen

The United States emerged from World War II in a new peacetime role as a superpower. We had to discover for ourselves how to combine diplomacy and military power in a manner consistent with our democratic principles. While the policy choices were stark in the days of the Cold War, they have become more complex in recent years. Presented by a career diplomat who headed US overseas missions in four countries, the course emphasizes case studies and the practical problems

that have confronted US leaders from the end of World War II to the present. The issues treated will illustrate the height of tensions in the Cold War, the emergence of detente and deterrence, and the challenges of the global agenda after the end of the Cold War. The course aims to help the student understand current foreign policy issues, which will be discussed briefly in class

#### **POLS 40226. UN and Counterterrorism**

(3-0-3)

Our attention will be focused on the scope and meaning of the work of the UN Counter-Terrorism Committee (CTC), established by the Security Council Resolution 1373 on September 28, 2001. Working under the direction of the project research director, each participant will engage in an intense investigation of one of the numerous topics or queries relevant to the study.

#### **POLS 40261. The Politics of International Trade**

(3-0-3)

If global free trade is theoretically optimal for the economy, why does free trade foster so much concern politically? Spanning events from the 1700s to the present day, this lecture course will discuss the politics of free trade in four different issue areas: (1) global trade and national security; (2) winners, losers, and the domestic politics of trade policy; (3) global trade and the development of democracy; and (4) the rise of international institutions and the decline of sovereignty. The syllabus will draw on classic readings in international relations and comparative politics, and students will be exposed to the variety of methods used by political scientists to analyze these questions: qualitative descriptions, quantitative analysis, formal models, etc. While the course does not require any background in economics, basic economic models of trade will be covered in the introductory sections. Students will be evaluated by use of both examinations and short papers.

#### **POLS 40424. German Politics**

(3-0-3) Kommers

This course examines various aspects of German government and politics, including the party system, elections and voting, patterns of political participation, civil liberties, policymaking institutions, and foreign policy. The course also deals with the historical debates over Germany's past and current attempts to come to terms with it. It also focuses on Germany's constitutional order together with the political and societal problems arising out of Germany's reunification.

#### **POLS 40472. Soviet and Post-Soviet Russia**

(3-0-3) Javeline

This course will examine the political system of the Soviet Union—why it lasted, and why it collapsed. It will then examine the transition from Soviet rule to the contemporary Russian political system and the various problems of transition.

#### **POLS 40484. Private/Public/Internet**

(3-0-3) McAdams

This course is about the political and social implications of the Internet revolution. We will focus on the tension between private freedoms the Net avails and the broader public good it may serve. We will consider topics as wide ranging as the digital divide, counterterrorism, public morality, and political interest. In addition, the Net will serve as an important medium for both class exchanges and research. Because teams of students will design their own WWW pages, it would be nice if some students have Web design skills (but this is NOT a requirement)..

#### **POLS 40485. Leadership and Social Change**

(3-0-3) Scully

*Prerequisite:* Permission of instructor.

This course is intended to introduce seminar participants to themes in leadership. Through readings, presentations, and other media (such as film and interaction with visitors), the course aims to provide critical reflections on the nature and sources of differing types of leadership and authority, and a deeper understanding of the vocation to lead.

#### **POLS 40539. Comparing European Societies**

(3-0-3)

This course offers students a review of major patterns of difference, along with some similarities, among the 15 member states of the European Union. Despite the larger contrasts with the United States, and the pressures toward convergence generated by the process of European integration, European societies remain remarkably different from one another on a number of dimensions including: the overall level and form taken by employment and unemployment, systems of social protection and welfare state organization, demographic trends ranging from extremely low birth rates in most of southern Europe to significantly higher birth rates further north, the connections between urban and rural life, and the impact of education on inequalities. The role of institutions, cultures, national histories, and policies in accounting for this pattern of difference will be reviewed. The course will also examine the combinations of identities—national, regional, and European—found among citizens of Europe. Students will be encouraged to develop their expertise on at least one country while also doing comparative reading.

#### **POLS 40610. Theories of War and Peace**

(3-0-3) C. Zuckert

Why do people go to war? Is war inevitable, necessary, or, even, desirable? Can it be ameliorated or entirely eliminated? In this course we examine the different answers given to these questions by canonical political theorists like Thucydides, Plato, Augustine, Machiavelli, Grotius, Hobbes, Locke, Montesquieu, Kant, and Schmitt.

#### **POLS 40632. Contemporary Liberal Theory**

(3-0-3)

Ever since the publication of John Rawls' *A Theory of Justice* in 1971, liberal political theory has experienced a great revival and now is a flourishing enterprise. This course will take Rawls as its point of departure and survey the state of current liberal political philosophy, considering such thinkers as Ronald Dworkin, Joseph Raz, Richard Rorty, and Robert Nozick.

#### **POLS 40633 Liberalism and its Critics**

(3-0-3) Roos

This course will investigate questions about whether contemporary liberal theory, with its emphasis on freedom and equality, is an adequate basis for political life. It will examine several contemporary liberal thinkers, including John Rawls, as well as several critics of liberal individualism such as Alasdair MacIntyre and Michael Sandel. The course will compare and contrast these thinkers on several dimensions, including the role of reason in moral thought, the role of religion in political life, the tensions between freedom and obligation, and the questions of the role of friendship in civic life. In addition, student papers will focus on applying liberal and communitarian approaches to specific policy areas such as education, crime, welfare, regulation of the economy, and constitutional interpretation.

#### **POLS 40635. Liberty and Culture**

(3-0-3)

When and how is it justified to interfere with harmful traditional practices, such as female genital cutting in Africa and footbinding in China? We will examine, explain, and evaluate such practices, including as well early female marriage, male circumcision, corsetry, social alcoholism, obstetric taboos, kuru, and nonharmful conventions such as road rules. Why do people adhere to such practices? How do people abandon them? Should the state coercively intervene against such practices? Should a powerful country coercively intervene against the practice in weaker countries? Are noncoercive methods effective? Topics include the Millian harm principle, ethical relativism, women in development, liberal imperialism, and moral panics. The course will range through political theory, social ethics, simple game theory, and comparative politics and sociology.

#### **POLS 40651. Politics and Literature: J.R.R. Tolkien**

(3-0-3)

In this class we will read some of J.R.R. Tolkien's works, most prominently *The Lord of the Rings*, with attention to the light they shed on politically important problems and themes. These include the relationship between power and wisdom, justice and mercy, war and peace, leadership and citizenship, patriotism and humanism, individuality and friendship, freedom and sacrifice, fear and courage,

despair and hope. We will also read some of Tolkien's letters and essays that treat politics and philosophy, together with selections from the works of ethical and political thinkers Plato, Aristotle, Augustine, Aquinas, Hobbes, Locke, and Tocqueville. An overarching theme of the course will be the interrelation among politics, literature, culture, and education.

**POLS 40800. Research Design and Methods**

(3-0-3) Gould

This course is designed to equip students for both the consumption and production of social science research. While it is targeted at juniors preparing to write a senior honors thesis, students who are intending to attend graduate school or whose careers will involve research are welcome also. Students will gain experience in formulating empirical research questions, and then preparing to answer them. Along the way they will be exposed to a broad range of research methods, both qualitative and quantitative, as well as the logic of causal inference

**POLS 40803. Senior Essay Research**

(3-0-3)

This course is aimed at juniors (and sophomores who will be studying abroad in the spring of their junior year and who are thinking ahead) who are planning to write a senior thesis or doing other research in the Political Science Department. Students will be introduced to the basics of research, and will produce a research design for their senior thesis.

**POLS 40810. Quantitative Political Analysis**

(3-0-3) Coppedge

Students in this course will learn to understand the most common statistical techniques used in political science and acquire the skills necessary to use these techniques and interpret their results. A Mastery of these techniques is essential for understanding research on public opinion and voting behavior, electoral studies, and comparative research on the causes of democracy. For each topic, students will read works to orient them to key issues and debates. They will learn the reasoning behind the statistical analysis in these readings and create their own spreadsheet programs to execute such analyses. They will then download and clean datasets actually used in the published research, replicate selected analyses from these readings using a statistical package, and write short papers evaluating the inferences defended in the published research.

**POLS 43001. Junior Writing Seminar**

(3-0-3)

The department offers Political Science majors the opportunity to take a writing seminar in their junior year, including some writing seminars exclusively for juniors.

**POLS 43640. Justice Seminar**

(3-0-3) Roos, Weithman

This course is the required core seminar for the concentration in Philosophy, Politics and Economics. It is an intensive seminar, limited to 16 students. Works read will include John Rawls, Aristotle, Kenneth Arrow, William Riker, and the Lincoln-Douglas debates. The course will be run as a true seminar, focusing on student work. The course aims at tight critical analysis, both written and oral, of key problems arising out of the search for an adequate theory of justice. The course is for students who like intellectual interchange on such questions. The course is team-taught.

**POLS 46902. Directed Readings**

(V-0-V)

Students with a grade point average at dean's list level are eligible for independent study on a topic of their choice, under the supervision of a faculty member. Permission required.

**POLS 47905. Research Apprenticeship**

(1-0-1)

This one-credit course offers undergraduates a chance to learn about and participate in the research experience. After several training sessions students are assigned to a faculty member to work on an ongoing faculty research project. Strongly

recommended for students planning on pursuing a masters or PhD program in political science, international studies, or public policy.

**POLS 53001. Senior Writing Seminar**

(3-0-3)

Writing seminars are devoted to a specialized topic and give students a chance to take a writing-intensive course in a seminar setting, with an emphasis on research skills and discussion.

**POLS 58901. Senior Honors Thesis**

(3-0-3)

Students with a grade point average of 3.5 or above are encouraged to write a senior thesis. For this two-semester project, the student works on an independent research project under the supervision of a faculty member. Three credits of this two-semester project fulfill one writing seminar requirement; the other three credits count as elective credit, but not toward the major.

## Department of Psychology

### PSY 10000. Introductory Psychology: First Year

(3-0-3) Radvansky

A broad coverage of the methods and findings that characterize scientific psychology, including a description of historical and recent developments in the areas of learning and motivation; perceptual, cognitive, and physiological processes; social, personality, and child development; and abnormal behavior and clinical treatment. Open to first-year students only.

### PSY 13110. Honors Seminar in Psychology

(3-0-3)

A broad coverage of the methods and findings that characterize scientific psychology, including a description of historical and recent developments in the areas of learning and motivation; perceptual, cognitive, and physiological processes; social, personality, and child development; and abnormal behavior and clinical treatment. Open to first-year students only.

### PSY 13181. Social Science University Seminar

(3-0-3) Day, Eberhard, Scheutz

An introduction to the seminar method of instruction accenting the organization and expression of arguments suggested by readings in psychology.

### PSY 13625. Seminar in Counseling Theories

(3-0-3) Kelly

*Prerequisite:* AL 13950

This seminar-style course offers students the opportunity to explore the field of psychology.

### PSY 20000. Introductory Psychology for Sophomores, Juniors, and Seniors

(3-0-3) Farris

A broad coverage of the methods and findings that characterize scientific psychology, including a description of historical and recent developments in the areas of learning and motivation; perceptual, cognitive, and physiological processes; social, personality, and child development; and abnormal behavior and clinical treatment. Open only to sophomores, juniors, and seniors.

### PSY 20001. Introductory Psychology, Personalized System of Instruction (PSI) (3-0-3) Crowell

This course covers the same content as PSY 211 but is taught using an individualized, self-paced method of instruction. This method is a variant of the Personalized System of Instruction (PSI) format and includes features such as self-paced learning, emphasis upon mastery of the written rather than the spoken word, frequent testing and an option to retake unsatisfactory quizzes. The department requires that Introductory Psychology (PSY 111, PSY 211, or PSY 211A) precede its 30000- and 40000-level courses.

### PSY 20010. Psychology: Science, Practice, and Policy

(1-0-1) Venter

This one-credit seminar introduces the department's programs and faculty research interests as well as the profession of psychology. The goal is to encourage more active reflection on how psychology can be useful, both personally and professionally; also to present the major tensions within contemporary psychology as well as its potential impact on public policies in the decade ahead.

### PSY 20385. Practicum in Diversity Training

(1-0-1) Howard

This is a one-credit course designed to instruct students in the theory of diversity education while training them in the art of facilitating diversity discussions. The theoretical framework for the material in this course comes from the "theory of oppression" and the various individual, institutional, cultural, and systemic manifestations of that oppression. The application portion of this course entails the presentation of diversity programs in a required course (Concepts of Wellness) for first-year students. The structure of the Practicum in Diversity Training course includes theory instruction/training prior to the semester break, and making

presentations/facilitating diversity discussions for the remaining portion of the semester.

### PSY 20670. Practicum in Teaching Technology

(3-0-3) Crowell

An introduction to and experience in applying the principles and methods of behavior instruction in the classroom.

### PSY 20671. Computers in Psychological Research and Education

(3-0-3) Crowell

Permission of instructor required. Possible projects include education, work productivity, decision making, database management, expert systems, knowledge retrieval, data analysis, and experiment control. Projects may require campus mainframe computer or microcomputers, particularly the Macintosh or IBM PC. Same as CAPP 30360.

### PSY 20678. Fundamentals of Business Thinking

(3-0-3) Sucec

This course is designed to provide an integrated understanding of the foundational business disciplines of accounting, finance, marketing, and management, especially for CAPP majors planning a career in business. Fundamental leadership and consulting skills will also be addressed. Case analysis, coupled with a highly interactive format, will be employed to ensure practical exposure to today's business environment. Primary areas of focus will address the critical elements for success in the corporate environment, the knowledge and preparation necessary to facilitate your interviewing process, and the business fundamentals for those with entrepreneurial aspirations.

### PSY 21280. Research on Families

(0-3-0)

Provides students with learning opportunities related to conducting research in the area of family relations. The instructor is conducting three large, externally funded studies, all of which involve cutting-edge research, and have as their goals happier marriages, better adjusted kids, and prevention of family problems. His research utilizes a wide range of methodologies. Thus, students are provided with hands-on, extra-classroom opportunities to participate in advanced developments in theory, research, and methodology in an important area of social science research and practice.

### PSY 23090. Social Concerns Seminar: Children and Poverty

(1-0-1) Brandenberger

This seminar focuses on concerns that affect the youth of our nation, especially poverty and violence, and examines efforts to foster positive youth development. Immersion in New York City. Participants read Catholic social teaching focused on youth/family issues.

### PSY 23091. Social Concerns Seminar: Leadership Ethics

(1-0-1) Tomas Morgan

Permission required. Apply at the Center for Social Concerns. Will not apply to overload. Cross-listed with THEO 33953. This seminar allows students to participate in an experiential opportunity designed to examine contemporary social problems. Emphasis will be placed on understanding issues/conflicts from the perspective of the various participants. Preparation and follow-up sessions are tailored to the specific opportunity.

### PSY 23094. Social Concern Seminar: Understanding Mental Illness

(1-0-1)

*Prerequisite:* (PSY 30310 OR PSY 354 OR PSY 354A OR PSY 354B OR PSY 354C OR PSY 354D)

This course will expose students to the concepts of mental illness, available services, the National Alliance on Mental Illness (NAMI), and the impact of stigma. It will introduce and define the different major mental illnesses: schizophrenia, bi-polar, major depression, anxiety disorders, and obsessive-compulsive disorder. The genetic, biological, psychological, and environmental influences involved in the onset of mental illness will be addressed. The link between chemical imbalances, symptoms, and medications will also be covered as well as information

regarding addictions/substance abuse and teen suicide. An exposure to a variety of social programs related to the treatment and support of persons with mental illness will be studied through experiential opportunities facilitated by the Center for Social Concerns.

**PSY 23095. Lives in the balance: Youth, Violence, and Society**

(1-0-1) Brandenberger

This seminar examines the world of youth impacted by violence. To develop an understanding of the roots and consequences of aggression and violence, a comparative study will be conducted between South Bend and Over-the-Rhine, an inner-city neighborhood in Cincinnati, Ohio. Early in the semester, participants will visit a South Bend school and meet with local leaders and organizations that work with youth. During fall break, participants will spend a week in Over-the-Rhine, visiting with youth organizations, government entities, and schools. Participants will examine the history of the neighborhood, current youth-related challenges, and solutions being implemented. Participants will analyze challenges each community faces, and identify tools used in Over-the-Rhine that can be implemented to benefit youth in the South Bend community. Readings (in psychology and youth development) and written analyses will augment the direct learning experience. The course is built upon collaboration among the Center for Social Concerns, the Robynson Community Learning Center, and various University departments. Apply online: [socialconcerns.nd.edu/academic/fall/fall.shtml](http://socialconcerns.nd.edu/academic/fall/fall.shtml)

**PSY 23271. Autism**

(3-0-3) Whitman

This seminar discusses topics related to developmental disabilities, with a special emphasis on pervasive developmental disorders and autism. Issues regarding their definition, etiology, and treatment are also discussed.

**PSY 23339. Marital Therapy Seminar**

(3-0-3)

This didactic course covering the principles and practice of couples therapy and prepares trainees for the companion practicum (61394), through which they will subsequently carry cases at the Marital Therapy and Research Clinic. Sample topics include communication, problem solving, domestic violence, parenting, and sex/intimacy.

**PSY 23852. Social Concerns Seminar: L'Arche Communities**

(1-0-1) Miller McGraw

This seminar centers on travel to a L'Arche community (e.g., Toronto, Canada) to share community life with developmentally challenged persons. Students draw from the philosophy of Jean Vanier, the works of theologian Henri Nouwen, and other spiritual writings to augment this participatory learning experience.

**PSY 23853. Conscience in Crossfire: War**

(1-0-1)

This course will explore issues central to the 2004 elections, with a focus on how citizens, in particular those who bring a faith perspective, may address social concerns in their voting and political participation. Guest speakers from campus and beyond will present multiple secular, religious, and policy perspectives.

**PSY 23854. Social Concerns Seminar: NSYP Training**

(1-0-1)

Training for students working in the National Youth Sports Program, sponsored by the Center for Social Concerns.

**PSY 23855. Social Concerns Seminar: Take Ten**

(1-0-1) Overdyck

This will be an applied course with student leaders of Take Ten, an effort to promote nonviolence among youth that is developing nationally.

**PSY 25270. Practicum in Developmental Dysfunction**

(3-0-3)

This practicum/seminar is the logical outgrowth of a long, informal relationship that student volunteers have had with families in the Michiana community who have autistic and other special-needs children. The practicum aspect of the course

will involve students going into a family home and working in a structured program with an autistic child for, on average, three times a week and a total of six to seven hours. In addition, students will meet in class once a week for discussion on a range of topics relating to autism, including issues regarding its definition, assessment, etiology, and treatment, as well as topics regarding the impact of autism on the family, community resources, and social policy. A number of classes will feature discussions led by parents of autistic children. This class is recommended particularly for students interested in child clinical psychology, education, developmental psychology, and social work.

**PSY 25275. Sign Language**

(3-0-3)

The American Sign Language class is designed to introduce basic vocabulary and simple sentence structure for conversational use. A cultural view is presented to examine traditions and values. A linguistic view is presented to introduce structure, syntax, and manual alphabet. Experiential activities, receptive and expressive exercises, and fluency opportunities are incorporated into the format. This is an introductory class for students with no prior knowledge of American Sign Language.

**PSY 26800. Directed Readings**

(V-0-V)

Directed reading is carried out under the supervision of a faculty member. A typewritten report on the reading is required.

**PSY 28801. Thesis Direction**

(V-0-V)

Directed reading is carried out under the supervision of a faculty member. A typewritten report on the reading is required.

**PSY 30100. Experimental Psychology I: Statistics**

(4-0-4) Ghiaseddin, Gibson

An introduction to the analysis and evaluation of experimental data, with particular emphasis on measures of central tendency, variability, and covariability and their relationship to psychological theory and explanation.

**PSY 30105. Exploratory and Graphical Data Analysis**

(3-0-3)

The process by which psychological knowledge advances involves a cycle of theory development, experimental design and hypothesis testing. But after the hypothesis test either does or doesn't reject a null hypothesis, where does the idea for the next experiment come from? Exploratory data analysis completes this research cycle by helping to form and change new theories. After the planned hypothesis testing for an experiment has finished, exploratory data analysis can look for patterns in these data that may have been missed by the original hypothesis tests. A second use of exploratory data analysis is in diagnostics for hypothesis tests. There are many reasons why a hypothesis test might fail. There are even times when a hypothesis test will reject the null for an unexpected reason. By becoming familiar with data through exploratory methods, the informed researcher can understand what went wrong (or what went right for the wrong reason). This class is recommended for advanced students who are interested in getting the most from their data.

**PSY 30121. Tests and Measurement**

(3-0-3)

This course is intended to facilitate students' understanding of theories and methods underlying psychological assessment. We will review such concepts as scales of measurement, the normal distribution, error, correlation, and inference, and students will come to understand their applicability within a measurement context. We will evaluate the psychometric properties of measurement tools, and as such, students will learn how to critically evaluate the usefulness and limitations of several commonly administered personality and intelligence instruments as well as alternative means of assessing psychological functioning. The socio-historical context of psychological assessment will be presented, and students will examine current ethical and cultural issues related to testing.

**PSY 30160. Experimental Psychology II: Methods**

(4-0-4) Carlson, Corning, McNeil

*Prerequisite:* (PSY 30100 OR PSY 341) OR (BA 20100 OR BA 230) OR (BIOS 40411 OR BIOS 411 OR BIOS 411A) OR BIOS 40411

A continuation of PSY 30100, with emphasis on the design and methods of execution of psychological research. Training in writing reports in professional format is also provided.

**PSY 30200. Developmental Psychology**

(3-0-3) Farris

*Prerequisite:* (PSY 10000 OR PSY 111) OR (PSY 20000 OR PSY 211) OR (PSY 20001 OR PSY 211A)

Major theories and research findings on social, emotional, and cognitive development are covered. Although emphasis is on the time from birth to early adulthood, some research on adulthood and the elderly is included. Attention is given to how different environments enhance or hinder healthy development.

**PSY 30210. Exploratory and Graphical Data Analysis**

(3-0-3)

*Prerequisites:* ((PSY 30100 OR PSY 341) OR (BA 20100 OR BA 230)) AND (PSY 30160 OR PSY 342)

The process by which psychological knowledge advances involves a cycle of theory development, experimental design, and hypothesis testing. But after the hypothesis test either does or doesn't reject a null hypothesis, where does the idea for the next experiment come from? Exploratory data analysis completes this research cycle by helping to form and change new theories. After the planned hypothesis testing for an experiment has finished, exploratory data analysis can look for patterns in these data that may have been missed by the original hypothesis tests. A second use of exploratory data analysis is in diagnostics for hypothesis tests. There are many reasons why a hypothesis test might fail. There are even times when a hypothesis test will reject the null for an unexpected reason. By becoming familiar with data through exploratory methods, the informed researcher can understand what went wrong (or what went right for the wrong reason). This class is recommended for advanced students who are interested in getting the most from their data.

**PSY 30300. Psychology of Personality**

(3-0-3) Kelly

*Prerequisite:* (PSY 10000 OR PSY 111) OR (PSY 20000 OR PSY 211) OR (PSY 20001 OR PSY 211A)

Major theories and research findings on social, emotional, and cognitive development are covered. Although emphasis is on the time from birth to early adulthood, some research on adulthood and the elderly is included. Attention is given to how different environments enhance or hinder healthy development.

**PSY 30310. Abnormal Psychology**

(3-0-3) Monroe

*Prerequisite:* (PSY 10000 OR PSY 111) OR (PSY 20000 OR PSY 211) OR (PSY 20001 OR PSY 211A)

Defines the concept of abnormal or maladaptive behavior; reviews the principles involved in human development and adjustment, and describes the common clinical syndromes, their causes, and treatments.

**PSY 30314. Introduction to Clinical Psychology**

(3-0-3) Haefel

This course provides an introduction to clinical psychology. The emphasis will be on clinical research and empirically based practices. It will cover (1) research methods for studying clinical phenomena (2) key issues and controversies in the field, and (3) specific topics such as classification and diagnosis, assessment, prevention, and intervention.

**PSY 30340. Cross-Cultural Psychology**

(3-0-3)

The general purpose of this course is to examine and learn to talk about issues of culture and race in the United States from a psychosocial perspective. Culture and race are not synonyms. So, we will be examining some of the ways that each affects the quality of our psychological functioning. The goals of this course are to

learn to recognize and appreciate culture in ourselves and others; to examine the different ways that cultural and racial socialization influence behavior, to consider how culture and race relate to various psychological constructs, and to understand the ways in which racism and ethnocentrism operates in everyday life. To accomplish these goals, we will use readings, group discussions, lectures, films, and each other to expand our awareness of how culture and race operates in our everyday life. As a student in this class, you will be encouraged to share your ideas and life experiences.

**PSY 30400. Cognitive Psychology**

(3-0-3) Carlson, Passarotti

*Prerequisite:* (PSY 10000 OR PSY 111) OR (PSY 20000 OR PSY 211) OR (PSY 20001 OR PSY 211A) OR (PSY 13110 OR PSY 195)

A lecture course presenting a cognitive approach to higher processes such as memory, problem solving, learning, concept formation, and language.

**PSY 30430. Learning and Memory**

(3-0-3) Radvansky

*Prerequisite:* (PSY 10000 OR PSY 111) OR (PSY 20000 OR PSY 211) OR (PSY 20001 OR PSY 211A) OR (PSY 13110 OR PSY 195)

A survey of the theories and methods relating to basic processes in learning and memory from both biological and cognitive perspectives.

**PSY 30440. Sensation and Perception**

(3-0-3) Mangini

Includes a diverse range of topics, from sensory processes and perceptual development to sensory deprivation and visual illusions. Emphasis is on auditory and visual perception.

**PSY 30500. Physiological Psychology**

(3-0-3) Passarotti

*Prerequisite:* (PSY 10000 OR PSY 111) OR (PSY 20000 OR PSY 211) OR (PSY 20001 OR PSY 211A)

The course is designed to provide a broad overview of the neurobiological mechanisms underlying behavior, cognition, and affect. The course considers the functioning of the mature nervous system, how the nervous system changes across the life span and the effect these changes have on behavior, and the neurobiological foundation of various neurological and psychiatric disorders. The content of the course is covered in lecture, readings, and written assignments.

**PSY 30600. Social Psychology**

(3-0-3) Venter

*Prerequisite:* (PSY 10000 OR PSY 111) OR (PSY 20000 OR PSY 211) OR (PSY 20001 OR PSY 211A)

An introduction to the major theoretical orientations within the field of experimental social psychology and a survey of the research findings in selected areas such as attitude formation and change, affiliation, interpersonal attraction, and social cognition.

**PSY 30640. Educational Psychology**

(3-0-3)

Although the goal of educational psychology is to understand and improve education in general, every classroom offers unique challenges relating to each student's individual differences. In this course, we will explore the three primary dimensions associated with the field of individual differences (i.e., cognition, affect, and motivation/volition) to determine how they collectively and uniquely contribute to a model of integrated learning. Can we design educational experiences that engage our minds, wills, and emotions? What types of classrooms encourage students to care about their subjects? These and other provocative questions will be addressed by examining a cross-section of the educational literature on motivation, cognition, and emotion.

**PSY 30710. Behavioral Genetics**

(3-0-3)

Behavioral genetics is the study of genetic and environmental influence on individual differences, and can be used to examine all aspects of development.

The purpose of the class is threefold: first, to orient students to the basic genetic principles necessary for the understanding of hereditary influences on development; secondly, to overview genetic and environmental influence on behavioral, biomedical, and bio-behavioral attributes; and, lastly, to assist students to realize that behavioral genetics is a powerful tool for the study of environmental as well as genetic influences on development.

### **PSY 33290. Applied Behavior Analysis**

(3-0-3)

Applied behavior analysis (ABA) is a field of inquiry that investigates the factors that influence learning and human behavior. It then uses this knowledge to develop effective educational and therapeutic programs. This course will introduce the students to concepts, techniques, and methodology associated with ABA. Students will observe ABA programs being used in home settings to teach children with autism and then have the opportunity to implement such programs with this same population. The course is especially recommended for students interested in developmental psychology, clinical psychology, social work, and special education. Course requirements include completion of assigned readings, a practicum, and writing assignments.

### **PSY 33325. Cognitive Neuroscience**

(3-0-3) Passarotti

The purpose of this course is to examine the neural bases of human cognition as well as the main theories and research findings in this relatively new interdisciplinary field. In particular, the course will focus on principles of brain organization, perception, attention, memory, and brain imaging techniques.

### **PSY 33640. Developmental Disabilities**

(3-0-3)

Only by prior permission of the program. Application required early in the semester prior to departure for London. Held at Rectory Paddock School. This course looks at how knowledge and understanding of developmental psychology informs professional practice in schools for pupils with severe and profound learning disabilities. The course examines how children with severe developmental disabilities come to understand their world and how teachers and other school-based professionals devise programs to meet children's very individual needs. The course will be based at a school for pupils with severe learning disabilities. Each week, students will spend time with pupils and professionals in classrooms. This practical focus will be followed by a lecture. Students will have opportunities to meet with parents and families of young people with disabilities.

### **PSY 33641. Motivation and Academic Learning**

(3-0-3)

Traditional studies of learning have focused almost exclusively on cognitive, or "cold," processes. Recent research on learning illustrates how "hot" processes also influence thinking and academic learning. In this course, we focus on how social, motivational, and emotional influences interact with cognitive processes to affect academic learning. Social influences will include students' social goals in school, friendships, and family dynamics. Motivational influences are explored through the study of major theories of achievement motivation, including attribution, self-efficacy, intrinsic motivation, "possible selves," and goal theories. Emotional factors such as coping mechanisms, test anxiety, and wellbeing also are discussed. In addition, we explore how development affects students' social, motivational, and emotional responses to learning. Child, adolescent, and adult models are discussed, and applications to educational child settings will be an integral part of the course.

### **PSY 35386. Psychology Externship**

(3-0-3)

This course provides an opportunity for students to gain supervised work experience in a health, school, or social service agency. The student will be expected to find a placement from among those specified by the department, where they will be required to spend eight hours a week. A learning agreement will be required. The classroom component of the course is a weekly two-and-a-half-hour seminar where the issues from the externship experience and relevant research materials will be discussed.

### **PSY 37900. Special Studies Junior**

(V-0-V)

Independent research carried out under supervision of a faculty member. A typewritten report of a research literature or an experimental study is required.

### **PSY 40120. Advanced Statistics**

(3-0-3)

This course extends PSY 30100 in two respects. First, additional attention is given to the logic of inferential statistics. Special focus is placed on the purpose, strengths, and limitations of hypothesis testing, especially as it is used in psychological research. Second, this course considers statistical analysis of data from more complex data structures than typically covered in PSY 30100. The goal of this part of the course is to heighten students' awareness of the variety of research questions that can be addressed through a wide range of designs and accompanying analyses. The orientation of the entire course focuses much less on the computational aspects of analyzing data than on the conceptual bases of what can be learned from different approaches to data analysis.

### **PSY 40121. Tests and Measurement**

(3-0-3)

This course is intended to facilitate students' understanding of the theories and methods underlying psychological assessment. We will review such concepts as scales of measurement, the normal distribution, error, correlation, and inference, and students will come to understand their applicability within a measurement context. We will evaluate the psychometric properties of measurement tools, and as such, students will learn how to critically evaluate the usefulness and limitations of several commonly administered personality and intelligence instruments as well as alternative means of assessing psychological functioning. The socio-historical context of psychological assessment will be presented and students will examine current ethical and cultural issues related to testing within this context.

### **PSY 40282. Developmental Psychopathology**

(3-0-3)

This course articulates principles for a life-span perspective on the origins and development of individual patterns of adaption and maladaptation.

### **PSY 40655. Cognitive Development**

(3-0-3) McNeil

This course provides an introduction to the central issues in the field of cognitive development. It will cover (1) general frameworks for studying cognitive development, (2) key questions in the field, and (3) specific topics such as conceptual development, memory development, language development, and the development of mathematical understanding. The primary focus will be on cognitive development from infancy to adolescence. Students will be expected to synthesize and evaluate material presented in lectures, readings, and class discussions.

### **PSY 40656. Mathematical Cognition, Learning, and Development**

(3-0-3)

This course explores how humans acquire an understanding of mathematics. It will cover key questions such as (1) Are infants born with an understanding of number? (2) Is the brain specialized for learning mathematics? (3) Which aspects of mathematics are most difficult for children to learn? (4) How does the environment in which we grow up influence our learning of mathematics? (5) Does research on children's understanding of mathematics have implications for how math is taught in our schools? Students will be expected to synthesize and evaluate material presented in lectures, readings, and class discussions.

### **PSY 41280. Family Research Methods**

(3-0-3)

The primary goal of this course is to provide students the opportunity to receive advanced training in family research methods by working closely with faculty, professional staff, graduate students, and advanced undergraduate students. You will learn about both (1) the substantive areas of developmental psychology, family functioning, and the effects of family processing on children, and (2) conducting research and various aspects of running a major research project concerning families and children. Our class periods and time outside of class

will provide direct and hands-on experience with all phases of conducting major research projects on children and families, including topics such as marital conflict, parental depression, community violence and children, applied projects for educating parents about family processes based on research, and other topics. Our goals are that by the end of the course, you will (1) have advanced understanding of the methods and approaches used in research on families and children; have practical knowledge about the methods for conducting this research; (3) be knowledgeable about the major theories that form the basis of this research; (4) be knowledgeable about the findings and empirical research on family relationships and children; and (5) be able to critique the literature and be able to identify possible directions for future research.

### **PSY 43181. Qualitative Research**

(3-0-3)

This course is about theory construction using ethnographic methods, especially to analyze instruction and student development.

### **PSY 43210. Infant/Child Development**

(3-0-3)

This course focuses on physical, cognitive, and socio-emotional development during infancy and childhood. Readings will include a textbook and several articles. Topics for reading and discussion include methods for studying infants and young children, prenatal development, cognitive processes, language development, emotional processes, parent-child relationships, and peer relationships.

### **PSY 43217. Children and Poverty: Developmental Implications**

(3-0-3) Brandenberger

Examines the impact of rising levels of child poverty and related concerns from the perspective of developmental and social psychology.

### **PSY 43218. The Anthropology of Childhood and Education**

(3-0-3) Blum

Concepts of human growth vary extraordinarily across time and space. When children become full-fledged persons, when they can reason, when or whether they should be independent from their parents, and how all this happens are variable and illuminating. Education—either formal or informal—reflects and also constitutes a society's view of childhood. This course provides a (selective) cross-cultural survey of childhood and education, looking at stages from pregnancy and infancy to late adolescence. Students will devise and conduct projects of their own.

### **PSY 43220. Adolescent Development**

(3-0-3)

*Prerequisites:* (PSY 30160 OR PSY 342) AND (PSY 30200 OR PSY 350 OR PSY 350A OR PSY 350B OR PSY 350C OR PSY 350D) AND (PSY 30200)

Focuses on adolescent development within various social contexts, including family, peer groups, and the workplace. Special emphasis on normative development at the transition from childhood to adolescence.

### **PSY 43230. Mental Health and Aging**

(3-0-3)

The primary purpose of this course is to expose students to basic issues relevant to the mental health of the elderly, which includes an experiential learning component in the form of volunteer relationships with an older adult. In the classroom, students will be challenged to think critically about the mental health issues associated with later life and are expected to actively participate in class discussions. Topics focused on pathological aging include psychological disorders, assessment, diagnosis, and treatment; resiliency in aging topics include: physical and mental health, social support, personality, coping, and stress. Class presentations, volunteer activities, and the readings will be used to stimulate discussion and critical thinking. Students will also keep a journal for this purpose. The format of the course may include some lecture, but will rely heavily on class discussion and group activities. Students are required to participate in some type of volunteer activity over the course of the semester (i.e., a minimum of one hour/week). Students may generate their own volunteer placement or the instructor can help match you up with one.

### **PSY 43240. Theories of Moral Development and Identity**

(3-0-3) Narvaez

Students are challenged to think about the nature of moral development, learn how to examine and compare theories in moral development, develop critical thinking and have the opportunity to create a study of moral development. The course reflects on Catholic social teaching and its relation to moral identity and social action generally and in our own lives.

### **PSY 43242. Moral and Spiritual Development**

(3-0-3)

As an introductory course to the field of moral psychology, we examine major research traditions. We study the theoretical underpinnings, goals, and practices of major approaches to moral education.

### **PSY 43245. Character Formation: Theory, Research, and Pedagogy**

(3-0-3)

Students read research, study theory and learn pedagogical approaches in the area of character education and moral development. They apply course material in a real-world setting of their choice. Students develop creative, analytical, and practical intelligences as well as leadership skills.

### **PSY 43246. Self, Ego, and Identity**

(3-0-3) Lapsley

This seminar examines the major theoretical traditions that help us understand what it means to be a person. Particular emphasis is placed on developmental processes and recent empirical findings.

### **PSY 43247. Leadership, Ethics, and Social Responsibility**

(3-0-3) Brandenberger

This course examines leadership and empowerment issues from multidisciplinary perspectives, focusing on the role of the leader within organizations that promote service, social action, or other forms of social responsibility. Alternative models of leadership are explored, with attention to value and moral implications.

### **PSY 43248. Identity, Social Ethics, and Psychology**

(3-0-3) Montpetit

This course represents a unique opportunity to explore how developmental psychology and Catholic social teaching might engage in a creative dialogue to better understand the potential impact of poverty, injustice, and oppression on human development. The first stages of the course will explore why identity and personhood are central concerns to both psychology and theology, as well as how each arrives at knowledge and understanding of these themes. From this base of understanding, we will explore contemporary social concerns in which identity and personhood are salient issues: migration, aging, and race relations. Course material will include empirical and theoretical documents from both disciplines, guest speakers, and structured "immersion" experiences in which students will be invited to meet and perhaps share meals and stories with individuals affected by these issues. Finally, students will be required to choose one of these topics for a community-based learning project in the South Bend area; for example, a student may elect to conduct a life story interview to understand how an individual's identity is affected by the experience of migration, racism, or ageism. For more information, please contact: [mmontpet@nd.edu](mailto:mmontpet@nd.edu), [vcarmona@nd.edu](mailto:vcarmona@nd.edu), or [tbushlac@nd.edu](mailto:tbushlac@nd.edu).

### **PSY 43250. Cognitive Development**

(3-0-3) Day

Major theories in cognitive development and data relevant to those theories are reviewed. Mechanisms that might account for observed developmental changes across the life span (e.g., processing speed) are discussed.

### **PSY 43271. Autism**

(3-0-3) Whitman

This seminar discusses topics related to developmental disabilities, with a special emphasis on pervasive developmental disorders and autism. Issues regarding their definition, etiology, and treatment are also discussed.

**PSY 43272. Applied Behavioral Analysis**

(3-0-3) Whitman

Applied behavior analysis is a field of inquiry that investigates the factors that influence human behavior and uses this knowledge to develop effective educational and therapeutic programs. This course will introduce the students to concepts, techniques, and methodology associated with this field. Students will observe ABA programs being used in home settings to teach children with autism and then have the opportunity to design and implement such programs with this same population. The course is especially recommended for students interested in developmental psychology, clinical psychology, and special education.

**PSY 43280. Children/Families in Conflict**

(3-0-3)

Current trends and findings pertaining to constructive and destructive conflict within families, and the effects of conflicts within families on children, will be considered. A focus will be on interrelations between family systems (marital, parent-child, and sibling), and methodologies for studying these questions. A particular concern will be how positive and negative conflict processes in the marital relationship affects families, marriages and children. The role of interparental conflict in various family contexts (divorce, parental depression, violence and abuse, custody, physical illness or disability), and relations between family and community conflict and violence, will be examined. The positive side of family conflict will be considered, including the elements of constructive marital and family conflict, and psycho-educational strategies for promoting for constructive conflict processes within families. Theories and models for conceptualizing the effects from a family-wide perspective will also be considered. Requirements: Class attendance; active participation in class discussions and activities, including leading discussions on articles in small groups; participation and report of the results of small-scale field studies in small groups; completion of a review paper on a topic in this area; and completion of midterm and final in-class exams.

**PSY 43290. Applied Behavioral Analysis**

(3-0-3)

Applied behavior analysis is a field of inquiry that investigates the factors that influence human behavior and uses this knowledge to develop effective educational and therapeutic programs. This course will introduce the students to concepts, techniques, and methodology associated with this field. Students will observe ABA programs being used in home settings to teach children with autism and then have the opportunity to design and implement such programs with this same population. The course is especially recommended for students interested in developmental psychology, clinical psychology, and special education.

**PSY 43291. Human Resiliency**

(3-0-3)

As part of being alive, human beings confront routine stressors, major life challenges, and severe traumas. Individuals vary considerably in their ability to cope with such events. This course examines a range of stressors (e.g., adolescence, school and job "failure," divorce, parenting, chronic illness and disabilities, aging, death, poverty, prejudice, child abuse, and war) and how people manage them. Particular emphasis will be placed on examining why some individuals develop serious problems such as depression when challenged and others are resilient, that is, able to meet life's challenges and grow stronger. Theoretical (e.g., biological, psychoanalytic, humanistic, existential, and behavioral) perspectives on resiliency are evaluated along with relevant empirical research. Fictional and nonfictional examples of resilient individuals are examined. An important focus of the course is on thinking about how resiliency can be fostered through parenting, education, therapy, and social policy. Specific techniques for managing routine and exceptional stressors will be discussed. The course is especially recommended for students interested in clinical, counseling, educational, and developmental psychology.

**PSY 43293. Violence and Children/Families**

(3-0-3)

Current trends and findings pertaining to constructive and destructive conflict within families, and the effects of conflicts within families on children, will be considered. A focus will be on interrelations between family systems (marital,

parent-child, and sibling), and methodologies for studying these questions. A particular concern will be how positive and negative conflict processes in the marital relationship affects families, marriages and children. The role of interparental conflict in various family contexts (divorce, parental depression, violence and abuse, custody, physical illness, or disability), and relations between family and community conflict and violence, will be examined. The positive side of family conflict will be considered, including the elements of constructive marital and family conflict, and psycho-educational strategies for promoting for constructive conflict processes within families. Theories and models for conceptualizing the effects from a family-wide perspective will also be considered. Requirements: Class attendance; active participation in class discussions and activities, including leading discussions on articles in small groups; participation and report of the results of small-scale field studies in small groups; completion of a review paper on a topic in this area; and completion of midterm and final in-class exams.

**PSY 43303. Developmental Psychopathology and Families**

(3-0-3)

This course articulates principles for a life-span perspective on the origins and development of individual patterns of adaptation and maladaptation. (Spring)

**PSY 43311. Theories of Psychotherapy**

(3-0-3)

Students will be introduced to the key research methods, empirical findings, and theories from the clinical/counseling psychology literature. Prospects for developing and testing new theories of psychotherapy will be discussed. Students will be encouraged to begin forming concepts for research projects and developing their own integrated theoretical approaches to treating clients.

**PSY 43315. Seminar in Counseling Theories**

(3-0-3) Kelly

This seminar will address the following questions: Does counseling work? If so, how does counseling help people reduce their symptoms of depression, anxiety, and other types of problems? We will discuss several of the key traditional and nontraditional theories of counseling and show how these theories are applied to clients' problems.

**PSY 43316. Professional Psychology: Methods and Practice**

(3-0-3)

Students will be introduced to the key research methods, empirical findings, and theories from the clinical/counseling psychology literature. Prospects for developing and testing new theories of psychotherapy will be discussed. Students will be encouraged to begin forming concepts for research projects and developing their own integrated theoretical approaches to treating clients.

**PSY 43318. Stress, Disorder, and Disease**

(3-0-3)

There is considerable scientific interest in the concept of stress and its implications for health and well-being. This seminar will cover (1) original articles on the concepts and definitions of stress; (2) original articles on methods for assessing life stress; and (3) the animal and human research literatures on stress effects on biological and psychological functioning. Particular attention will be paid to the implications of these ideas and literatures for understanding psychological disorders, especially major depression, as well as physical illnesses.

**PSY 43330. Interpersonal Communication Skills**

(3-0-3)

The human relations training program provides instruction and experience in developing effective communication and basic helping skills. Attending, empathy, respect, immediacy, self-disclosure, and self-exploration are studied and practiced in small-group format. Open only to juniors and seniors.

**PSY 43331. Introduction to Counseling Skills**

(3-0-3)

This course will examine the elements of professional helping relationships and various counseling process models. Students will have an opportunity to study and practice basic counseling techniques used in developing rapport and a therapeutic

relationship and examine research relevant to clinical practice. Issues involving professional responsibility, development, and ethics will be discussed.

### **PSY 43340. Cross-Cultural Psychology**

(3-0-3)

The general purpose of this course is to examine and learn to talk about issues of culture and race in the United States from a psychosocial perspective. Culture and race are not synonyms. So, we will be examining some of the ways that each affects the quality of our psychological functioning. The goals of this course are to learn to recognize and appreciate culture in ourselves and others; to examine the different ways that cultural and racial socialization influence behavior, to consider how culture and race relate to various psychological constructs, and to understand the ways in which racism and ethnocentrism operates in everyday life. To accomplish these goals, we will use readings, group discussions, lectures, films, and each other to expanding our awareness of how culture and race operates in our everyday life. As a student in this class, you will be encouraged to share your ideas and life experiences.

### **PSY 43341. Moral Development and Character Education**

(3-0-3)

We review research and theory on moral identity development and its implications for character development and education. Students will select an aspect of moral character to study, reporting on their findings and designing a research study.

### **PSY 43343. Psychosocial Perspectives on Asian Americans**

(3-0-3)

This course examines major psychological topics relevant to Asian Americans. Broad areas to be covered include Asian American personality, identity, and mental health as well as socio-cultural influences that shape personality and mental health. Specific topics include cultural values and behavioral norms, the acculturation process, ethnic identity development, family processes, stressors and social support systems within Asian communities, psychopathology, academic achievement, and culturally competent mental health treatment and service delivery.

### **PSY 43345. Psychology of Discrimination**

(3-0-3)

This course is intended to facilitate students' understanding of discrimination and prejudice from a social-psychological perspective. The psychologically based causes, correlates, and consequences of discrimination and prejudice will be examined via the application of social-cognitive theories and research to the real experiences of stigmatized group members. As such, this course is intended to help students better understand the major psychological principles underlying prejudiced attitudes and discriminatory behavior; become acquainted with current research on the causes, correlates, and consequences of prejudice and discrimination; and engage in more objective examination of one's own attitudes and behaviors.

### **PSY 43348. Psychology of Race: Examining Racial and Ethnic Identity Development**

(3-0-3)

The purpose of this course is to examine the psychological aspects of racial and ethnic identity development in the United States. This course will look at the general ideas of identity development from a psychological basis as well as the personal identities of American groups. The main course objectives are: To increase students' cultural awareness of their own and others' racial and ethnic identities; To develop relevant knowledge of about identity constructs in understanding different populations; and, To develop critical thinking skills in studying and evaluating research on the role of racial and ethnic identity development in psychological processes and human behavior.

### **PSY 43349. Anthropology of Emotion**

(3-0-3)

Do people within different cultural and historical contexts "feel" in the same ways? Are the emotions we recognize universal, or are they learned? How has language shaped the way we define and think about emotions, and what role do these ideas play in shaping our thinking about personhood and gender, our perceptions of the body, and our experiences of health and illness? This course addresses these

questions by surveying the most important anthropological, historical, and psychological approaches to the study of emotion. We will also think about affect as that quality or state which exceeds or escapes being captured by categories, including nameable "emotions", and which can never quite be completely controlled. The course will conclude with specific ethnographic and historical case studies, including examinations of love, anger, jealousy, sympathy, and shame. Course requirements include active class participation, several short exercises in methods, presentations, a midterm exam, and a final research paper on a course-related topic of each student's choice.

### **PSY 43355. Psychological Theories of Race and the American Cinema**

(3-0-3)

This course examines race and ethnicity and its portrayal in the American cinema within the framework of psychological theory and research. Using an ecological perspective, the multiple contexts of individual, family, community, and society will inform the study about identity development. In particular, there will be an emphasis and in-depth discussions on specific groups in the US, as well as an examination of identity with the majority culture. Psychological research literature, group discussions, films, and lectures will be used to gain a deeper appreciation of the unique aspects of identity development. Students will be encouraged to share and reflect on their own identity(s) and life experiences.

### **PSY 43359. Psychology of Belief**

(3-0-3) Howard

Psychology is largely about what people choose to think and believe. However, the range of possibilities and constraints on what we choose to believe is not well known. We will consider belief in areas such as daily life, science, religion, politics, and the like. The course will be both writing and discussion intensive. The final test will be an oral examination.

### **PSY 43360. Health Psychology**

(3-0-3)

Because behavior plays a significant role in people's health, psychology has emerged as an important contributor to the process of coping with disease, disease prevention, and health enhancement. This course is designed to be an overview of health psychology and behavioral medicine. Topics will include psychology and medicine, health psychology models, stress and health, adaptation to illness, psychological aspects of cancer, pain, coronary artery disease, rehabilitation, infectious disease, health promotion and disease prevention, and professional opportunities in health psychology. In addition, health care professionals in the community who are working in areas to be covered in the course will be making presentations to the class. There will be two exams that will cover reading and lecture material. In addition, there will be two short papers that will help integrate the readings, lectures, and information provided by the speakers. Finally, there will be a lengthy paper that will consist of a summary review and critique of research in a specific area of health psychology.

### **PSY 43363. Introduction to Forensic Psychology**

(3-0-3)

This course introduces students to the fundamentals of forensic psychology understood as the study of psychology and law, criminal justice and mental health. Emphasis is given to the broad thematic coverage of relevant theory, policy and practice with particular attention to the role of the psychologist as expert witness.

### **PSY 43366. Psychology of Sports**

(3-0-3)

Social psychological, counseling, and personological approaches to issues of sports and athletic performance. Students will be introduced to the varied roles of sports psychologist-psychological skills trainer to academic researcher. Representative topics include: bridging the gap between science and practice in sport psychology, regulating arousal and managing performance-related anxiety, eating disorders within the athletic subculture, and retirement issues in sports.

### **PSY 43367. Coaching Youth Sports**

(3-0-3) Howard

This course is ideal for anyone who might serve as a coach at any time in the future. Topics include coaching strategies, substitution strategies, designing practices, dealing with parents, and the like. Conducting actual practice sessions and discussing relevant movies are scheduled throughout the course. There are no tests as a final portfolio is the sole grading method. Books include Phil Jackson's *Sacred Hoops* and Andy Hill and John Wooden's *Be Quick But Don't Hurry*.

### **PSY 43368. Psychology of Leadership**

(3-0-3)

This course will probe the ways to become a leader. Students will read material on great leaders: Jesus, Ghandi, Churchill, Joan of Arc, Henry Ford, John Adams, Rachel Carson, and the like. Students will select the leader they wish to study intensively. Secondly, psychological analyses of leadership theory will be recommended by the instructor. Lastly, students will read actively in the newspaper/magazine of their choice (e.g., *New York Times*, *Newsweek*). Selected articles will serve as the basis of class discussions (led by the student who suggested the article) designed to plot a course of action that the student will begin to undertake in the domain targeted in the article (e.g., Bills before Congress, environmental degradation, violations of civil rights). Grading will be based upon two long papers (on a leader and each student's own course of action, class participation, and a final exam. Class enrollment will be limited to 15 or 16 students.

### **PSY 43390. Applied Behavioral Analysis**

(3-0-3)

Applied behavior analysis is a field of inquiry that investigates the factors that influence human behavior and uses this knowledge to develop effective educational and therapeutic programs. This course will introduce the students to concepts, techniques, and methodology associated with this field. Students will observe ABA programs being used in home settings to teach children with autism and then have the opportunity to design and implement such programs with this same population. The course is especially recommended for students interested in developmental psychology, clinical psychology, and special education.

### **PSY 43409. Advanced Topics in Cognitive Psychology**

(3-0-3) Carlson

Advanced topics in Cognition is a survey-level course that will cover a diversity of topics in cognition, including attention, perception, memory, language, and categorization, focusing on uncovering common themes and underlying frameworks. Intended for advanced undergraduates and graduate students from across psychology and other related disciplines.

### **PSY 43410. Seminar in Spatial Cognition**

(3-0-3)

Have you ever gotten lost trying to navigate through a new environment or had difficulty in following directions? Can you easily give directions when someone asks you how to get somewhere? If you are following a map, do you turn it as you turn, or hold it in a fixed orientation? All of these processes involve relating your own spatial location to objects and landmarks in the external world. This seminar in spatial cognition will examine how we accomplish this, focusing on such issues as following directions, giving directions, using maps, mentally representing environments, and way finding.

### **PSY 43451. Attention Deficit Hyperactivity Disorder**

(3-0-3) Gibson

Attention deficit disorder (also known as attention deficit hyperactivity disorder) is a diagnosis applied to children and adults who have experienced a handicap in their school, home, work, and/or social settings due to abnormal levels of distractibility, impulsivity, and/or hyperactivity. According to epidemiological data, approximately 4 to 6 percent of the US population has ADD, which makes it one of the most prevalent psychological disorders in contemporary society. Furthermore, it is currently believed that 66 percent of those diagnosed with ADD as children will continue to exhibit symptoms as adults. Over the past decade, there has been heated debate over both the cause and treatment of ADD. For instance, ADD has been attributed to a variety of causes, including minor brain damage, poor diet, and poor parenting. Likewise, a variety of different treatment options have been recommended including medication, behavior therapy, and

cognitive therapy; and recently, there has been concern expressed by the FDA that several medications used to treat ADD might be harmful to children. This seminar will provide a comprehensive survey of current research into the cause and treatment of ADD. In addition, the seminar will focus on the effects of this disorder from the perspective of both afflicted individuals and their families as well.

### **PSY 43455. Seminar: Psycholinguistics**

(3-0-3) Eberhard

An interdisciplinary seminar with emphasis on student participation, covering topics such as linguistics, memory, and perception for language stimuli, child language, bilingualism, and social psychology of language.

### **PSY 43458. Doing Things with Words**

(3-0-3)

Flattery, cheating, self-expression, prayer, superiority, solidarity, distancing, and play: all these and many more things may be done with language. This course looks at some of the ways humans do things with words. Topics include religious language; silence; politeness and sincerity; truth, deception, lying, and cheating; linguistic variety, identity, and stereotypes; moral evaluations made of language; and language used for power and solidarity.

### **PSY 43510. Behavioral Genetics**

(3-0-3)

An introduction to the principles necessary to understand genetic and environmental influences on development, with an overview of the methods and research.

### **PSY 43511. Behavioral Neurobiology**

(3-0-3)

This class will examine the effects of neurological (e.g., focal lesions and degenerative disease) and psychiatric (e.g., schizophrenia) disorders on affect and cognition. Topics considered include disorders of memory, attention, and emotion regulation. The format of the course will be primarily small group presentations and discussions. Reading will be taken from primary empirical sources, review articles, and book chapters. Requirements include short papers, class presentations, a term paper, and final exam.

### **PSY 43520. Cognitive/Affective Neuropsychology**

(3-0-3)

This course will survey the biological bases of cognition and emotion. The primary objective of this course will be to understand how human cognitive and affective behaviors are mediated in cortical and subcortical foci in the brain. Particular attention will be paid to cognitive and affective deficits that result from brain trauma and disease.

### **PSY 43526. Developmental Cognitive Neuroscience**

(3-0-3) Passarotti

This class will focus on both the cognitive and neural aspects of cognition. It will examine brain organization and brain development, with emphasis on attention, memory, emotion and language processes. Brain plasticity, genetic and environmental influences, abnormal brain development and developmental syndromes (e.g., ADHD, Autism) will also be addressed.

### **PSY 43531. Psychology and Medicine**

(3-0-3) White

This course has two basic objectives. First, it examines from a life-span and psychological perspective the factors that place individuals at different stages of life at risk for illness and assist them in maintaining their health. In addition, it addresses a variety of challenging psychological and social issues that physicians and other health care professionals must face in the practice of medicine. The course covers a range of topics dealing with health issues related to different stages of human development (childhood, adolescence, and adulthood), disabled populations, culture and gender, stress, physician-patient interactions, death and dying, professional ethics, and social policies relating to health care. The course is primarily intended for students intending to enter medical school. Most classes will involve brief formal presentations by the instructors and invited guests, followed by discus-

sion of assigned readings pertinent to the day's topic. In addition, students will be exposed, via a limited practicum, to a variety of medical settings.

### **PSY 43532. Stress: Medicine and Management**

(3-0-3)

This course is concerned with stress, its effect, and coping mechanisms from a biological as well as a psychological viewpoint. (1) We explore the nature of stress itself. What exactly is stress? How do issues of control and personality enter into the perception of stress? Can we have physiological stress without the perception of stress? We examine some special types of stress such as long-term or serious illness and work-related stress. (2) We cover the stress response and the effect of this response on the level of the whole organism (fatigue, irritability, insomnia, cognitive difficulties, etc.). (3) We examine the link between stress and disease on the level of organ systems such as the cardiovascular system, the immune system, the gastrointestinal system, and the endocrine system. (4) We examine the biological and psychological basis of common coping mechanisms such as cognitive therapy, social support, drug therapy (self-prescribed and physician-prescribed), alcohol, exercise, meditation, and sleep. The major aim is to understand the mechanism, evaluate the efficacy in alleviating the stress response, and any potentially harmful effects. (5) We examine theory and practices of mobilizing support in stressful circumstances. Class performance will be based on two examinations, one term paper (approximately 15–20 pages), and classroom participation. Students also will keep a stress and health diary.

### **PSY 43535. Cultural Aspects of Clinical Medicine**

(4-0-4) Wolosin

The course examines popular medical concepts and expectations patients bring with them to the clinical or hospital setting, as well as the attitudes, organization and goals of the clinical medical care. Students divide their time between classroom and service as patient/family liaisons in an area emergency room. Student access to transportation is necessary.

### **PSY 43536. Philosophy and Psychiatry**

(3-0-3)

A course dealing with (1) the intellectual history of psychiatry from the time of Freud and Kraepelin to the present; (2) the social history of the care of the mentally ill since World War II; and (3) the interpretation and critique of Freud and psychiatry.

### **PSY 43571. Psychology of Coaching**

(3-0-3)

This course is ideal for anyone who might serve as a coach at any time in the future. Topics include coaching strategies, substitution strategies, designing practices, dealing with parents, and the like. Conducting actual practice sessions and discussing relevant movies are scheduled throughout the course. There are no tests as a final portfolio is the sole grading method. Books include Phil Jackson's *Sacred Hoops* and Andy Hill and John Wooden's *Be Quick but Don't Hurry*.

### **PSY 43576. Sport and Exercise Psychology**

(3-0-3)

This course will cover the foundations of sport and exercise psychology, which examines people and their behaviors within sport and physical activity contexts from group and individual perspectives. This class will be taught using a variety of lecture methodologies (75 percent), group discussion and activities, as well as utilizing an occasional guest speaker. Students will be expected to attend and participate in class and complete writing, applied projects, and exams.

### **PSY 43610. Seminar in Spatial Cognition**

(3-0-3)

Have you ever gotten lost trying to navigate through a new environment or had difficulty in following directions? Can you easily give directions when someone asks you how to get somewhere? If you are following a map, do you turn it as you turn, or hold it in a fixed orientation? All of these processes involve relating your own spatial location to objects and landmarks in the external world. This seminar in spatial cognition will examine how we accomplish this, focusing on such issues

as following directions, giving directions, using maps, mentally representing environments, and way finding.

### **PSY 43625. Self: A Philosophical and Psychological Perspective**

(3-0-3) Venter

Who are you? What are you? What is the self? Does it even exist in reality in an absolute sense? What is the nature of social reality and our relationship with it? Social psychology provides some insights into these questions and issues and can inform our thinking and understanding of our selves and our world. Although the broader theoretical and philosophical context for this seminar is social psychological, we will have the opportunity to read about these topics from a variety of sources—psychological, philosophical, and theological.

### **PSY 43640. Educational Psychology**

(3-0-3) Turner

Educational psychology examines questions about development, learning and achievement in schools. In this course, we will explore fundamental questions such as (1) What is intelligence? Is it fixed or changeable? What are the implications of conceptions of intelligence for achievement? (2) How does learning occur? What are the implications of different theories of learning? Is there a "correct" theory of learning? Does learning differ in different subject areas? (3) What motivates student learning? Can instruction be "motivational?" (4) What is "good" instruction? How do theories of learning relate to instructional practices? (5) How do aspects of school context, such as interaction with peers and teachers, and school culture, influence learning, motivation, and achievement?

### **PSY 43641. Motivation and Academic Learning**

(3-0-3) Turner

Traditional studies of learning have focused almost exclusively on cognitive or "cold" processes. Recent research on learning illustrates how "hot" processes also influence thinking and academic learning. In this course, we focus on how social, motivational, and emotional influences interact with cognitive processes to affect academic learning. Social influences will include students' social goals in school, friendships, and family dynamics. Motivational influences are explored through the study of major theories of achievement motivation, including attribution, self-efficacy, intrinsic motivation, "possible selves," and goal theories. Emotional factors such as coping mechanisms, test anxiety, and wellbeing also are discussed. In addition, we explore how development affects students' social, motivational, and emotional responses to learning. Child, adolescent, and adult models are discussed, and applications to educational child settings will be an integral part of the course.

### **PSY 43690. History and Systems of Psychology**

(3-0-3)

Traces the development of contemporary psychology from its early philosophical origins to the present. An emphasis is placed on the era of modern psychology (mid-1800s to the present) with considerable discussion of current issues and movements.

### **PSY 43699. Evolutionary Psychology and Its Critics**

(3-0-3)

Many variants of sociobiological inquiry have appeared over the last three decades, and each of them—from E.O. Wilson's original, through behavioral ecology, to evolutionary psychology (the current headliner)—has been subjected to withering critical scrutiny. We focus on the various strands of evolutionary psychology prominent during the last 15 years, and upon their biological, psychological, anthropological, and philosophical critics.

### **PSY 43702. Concepts in Visual Neuroscience**

(3-0-3)

Cross-listed with PSY 43702. The goal is to familiarize students with concepts, ideas, and hypotheses in neuroscience with a focus on vision. Topics include neuron models, processing image structure (retina-primary visual cortex), object recognition (V2-IT-prefrontal cortex), motion detection, and attention. This seminar will provide an overview of contemporary theories, concepts, and models in neuroscience, with an emphasis on vision. It will outline the different approaches that are used to understand neural information processing in the visual

system. Some time will be spent discussing contemporary trends in neuroscience, along with the contributions from and influences of multiple relevant disciplines, including psychology, biology, and artificial intelligence. A central argument will be that there is still no coherent framework or single concept of neural processing, and the seminar will use this argument as a motivation to ask new questions, model an innovative network structure, or maybe just follow one of the existing approaches. We will occasionally examine studies that have successfully implemented some of the models into analog electronic circuits, allowing so for their real-time emulation. The topics will be introduced by lectures. A manuscript will be handed out containing graphs and texts from various introductory books. Students are asked to give presentations on classic or recent research papers based on the presented material.

### **PSY 43721. Behavioral Pediatrics**

(3-0-3)

This course is directed toward premedical students interested in pediatric medicine and psychology majors interested in health psychology. It exposes areas of psychology, biology, and medicine pertinent to children. Specific emphasis is placed on studying infants who are at risk for developmental problems.

### **PSY 45386. Psychology Externship**

(3-0-3)

This course provides an opportunity for students to gain supervised work experience in a health, school, or social service agency. The student will be expected to find a placement from among those specified by the department where they will be required to spend 8 hours a week. A learning agreement will be required. The classroom component of the course is a weekly two-and-a-half hour seminar where the issues from the externship experience and relevant research materials will be discussed.

### **PSY 45853. Addiction, Science, and Values**

(3-0-3)

Students will be introduced to topics in the ethics of care for the indigent; to alternative therapies for recovery and maintenance; and to current brain models of addiction. They will be placed as volunteers (for 14 weeks) with institutions serving indigent recovering addicts in St. Joseph and Elkhart counties.

### **PSY 47900. Special Studies: Reading and Research**

(V-0-V)

Independent research carried out under supervision of a faculty member. A typewritten report of a research literature or an experimental study is required.

### **PSY 48800. Senior Honors Thesis**

(3-0-3)

These two seminars assist the senior major to propose, execute, and write an honors thesis. The first semester is devoted to the development and presentation of the proposal, and the second to its execution, write-up, and subsequent presentation.

## **Department of Sociology**

### **SOC 10002. Understanding Societies**

(3-0-3) Hachen

*Corequisite:* SOC 12002

This introductory course looks at how people are connected to each other through social relationships, groups, networks, and organizations. With these social connectors, you will see how sociology can help answer such questions as: How are stereotypes determined? Where do our social identities come from? What do people do when they experience role conflict? Why are networks so important in the diffusion of ideas and information? What are bureaucracies, and why are they so prevalent? How can I know what is of value in another culture? How do people and groups gain power over others? Are there social classes, and how important are class divisions? Have race relations changed very much in the United States? When and where are women treated differently from men? How have technological changes, immigration, and social movements altered the ways in which people connect to each other?

### **SOC 10033. Introduction to Social Problems**

(3-0-3) Sobolewski

Today's society is beset by many serious social problems; for example, crime and deviance, drug abuse and addiction, domestic violence, hunger and poverty, and racial/ethnic discrimination. How do we think about these problems in ways that lead to helpful solutions? In what ways do one's own social background and role in society affect his/her views of these problems? In this course, students will learn to take a sociological perspective, not only in examining the causes, consequences, and solutions to some of society's most troubling social problems, but also in taking a critical look at their own perceptions of the problems.

### **SOC 10722. Introduction to Social Psychology**

(3-0-3) Collett

Analysis of important human processes, including perceiving and knowing other people, attitudes and attitude change, conformity and nonconformity, cooperation and competition with others, leadership in groups, attraction and love, aggression and violence, and prejudice. Social psychology studies how individuals and groups are influenced by other individuals and groups. In this broad introduction to social behavior, we will learn about what makes people do the things they do: What decides whom someone will fall in love with? Where do aggressive, violent, and criminal behaviors come from? Why are some people more charitable than others? Why do some people obey authority and conform, while others always have to buck the trend? Why are some people lazier when they work in groups? What is the source of people's stereotypes and prejudices? How can we overcome them? What causes conflict between groups? And finally, what makes us become who we are?

### **SOC 12002. Understanding Societies Tutorial**

(0-0-0)

This tutorial must be taken as a corequisite to SOC 10002, Understanding Societies.

### **SOC 13095. Sociology Honors Seminar**

(3-0-3) Halton

*Prerequisite:* ALHN 13950 OR ALHN 195

Today's consumer societies offer the promises of affluence, of convenience, of "the good life." Yet it is by no means clear that the massive technological advances and material gains in advanced industrial societies have contributed to a better way of life—many would say increased meaningless is the actual result. This course explores the ways in which consumption culture enhances the good life or hinders it through "the goods life."

### **SOC 13181. Social Science University Seminar**

(3-0-3) Collett, Halton, Klein, Spillman

An introduction to the seminar method of instruction, accenting the organization and expression of arguments suggested by readings in sociology. Each of the seminars treats a particular sociological topic such as family life, social problems, the urban crisis, poverty, etc.

**SOC 20002. Understanding Societies**

(3-0-3) Hachen

*Corequisite:* SOC 12002

This introductory course looks at how people are connected to each other through social relationships, groups, networks, and organizations. With these social connectors, you will see how sociology can help you answer such questions as: How are stereotypes developed and undermined? Where do our social identities come from? What do people do when they experience role conflict? Why are networks so important in the diffusion of ideas and information? What are bureaucracies, and why are they so prevalent? How can I know what is of value in another culture? How do people and groups gain more power than others? Are there social classes, and how important are class divisions? Have race relations changed very much in the United States? When and where are women treated differently from men? How have technological changes, immigration, and social movements altered the ways in which people connect to each other?

**SOC 20020. Ireland in Transition: Emigration to Immigration and Beyond**

(3-0-3)

Throughout the 20th century, Ireland was characterized by a relatively high rate of emigration. Over the century, however, the nature, type, and destination of Irish emigrants changed. Whereas Irish emigrants were once drawn almost exclusively from the agricultural and laborer classes, in the closing decades of the 20th century, emigration came to permeate the entire social system. Thus, Irish migrants were to be found not just among the ranks of skilled and semi-skilled labor, but also among the trans-national, professional elite that criss-cross the globe. Current migration trends suggest a radical departure from the pattern that has characterized Irish demography for more than two centuries. Nowadays, more people are entering Ireland than leaving, bringing the country's migratory profile more into line with its European partners. Apart from a high rate of return migration, there has been an enormous increase in the numbers of immigrants coming to Ireland, particularly, after several Eastern European countries entered the EU in 2004. Just over 10 percent of the population is now foreign-born, and up to 200 different languages are spoken on the island. The study of migration, and its meaning in the context of the unprecedented buoyancy of the Irish economy, directs us to new concerns about multiculturalism, immigration policy, and practices; Ireland's position in the global economy; and the relationship between the Irish diaspora and the homeland. This course will focus on four key themes in particular: (1) the socio-historical context of Irish emigration; (2) case studies of the lived experience of Irish emigrants in the late 20th century; (3) the phenomenon of return migration; and (4) immigration into Ireland and the multicultural challenge.

**SOC 20033. Introduction to Social Problems**

(3-0-3) Sobolewski

Today's society is beset by many serious social problems; for example, crime and deviance, drug abuse and addiction, domestic violence, hunger and poverty, and racial/ethnic discrimination. How do we think about these problems in ways that lead to helpful solutions? In what ways do one's own social background and role in society affect his/her views of these problems? In this course, students will learn to take a sociological perspective, not only in examining the causes, consequences, and solutions to some of society's most troubling social problems, but also in taking a critical look at their own perceptions of the problems.

**SOC 20061. Islam: Religion and Culture**

(3-0-3) Afsaruddin

This introductory course will discuss the rise of Islam in the Arabian peninsula in the seventh century of the Common Era and its subsequent establishment as a major world religion and civilization. Lectures and readings will deal with the life of the Prophet Muhammad, the Qur'an and its role in worship and society, early Islamic history, community formation, law and religious practices, theology, mysticism, and literature. Emphasis will be on the core beliefs and institutions of Islam and on its religious and political thought from the Middle Ages until our own time. The latter part of the course will deal with the spread of Islam to the West, resurgent trends within Islam, both in their reformist and extremist forms, and contemporary Muslim engagements with modernity.

**SOC 20228. Social Inequality and American Education**

(3-0-3)

Many have claimed that the American educational system is the "great equalizer among men." In other words, the educational system gives everyone a chance to prosper in American society, regardless of each person's social origins. In this course, we explore the validity of this claim. Do schools help make American society more equal by reducing the importance of class, race, and gender as sources of inequality; or do schools simply reinforce existing inequalities and reproduce pre-existing social relations? Topics covered include unequal resources among schools, sorting practices of students within schools, parents' roles in determining student outcomes, the role of schooling in determining labor market outcomes for individuals, and the use of educational programs as a remedy for poverty.

**SOC 20342. Marriage and the Family**

(3-0-3) Thomas

Changing family patterns, sex roles, sexuality, premarital relationships, marriage and divorce, parenthood, childhood, and family interaction are some of the topics. Singles, dual-career families, alternative marriage forms, and the future of marriage and family are also taken up. This course in the sociology of the family has two primary purposes, one being to introduce the student to the scientific study of the family: theoretical approaches, current research, societal variations in the family through space and time, and current issues in the analysis of the family. However, because the family is a social institution and a set of relationships in which almost everyone participates, a second purpose of the course is to provide a realistic appraisal of marriage and family in American society for the utility this may have to the student in his/her personal life, considering his/her own values, expectations, and goals. Some of the topics to be covered include the American family and social change; gender roles; the development and expression of sexuality; premarital relationships; marriage and divorce; parenthood and childhood; family interaction—the quality and style of relationships within the family; societal, class, and ethnic variations in family life; communes, singles and single parenthood, homosexuality, and alternative forms of marriage; and the future of marriage and the family.

**SOC 20479. Introduction to Latinos in American Society**

(3-0-3) Cárdenas

This course will examine the sociology of the Latino experience in the United States, including the historical, cultural, and political foundations of Latino life. We will approach these topics comparatively; thus, attention will be given to the various experiences of a multiplicity of Latino groups in the US.

**SOC 20502. Today's Organizations**

(3-0-3)

Examines macrosociological topics such as social evolution theories of industrial societies, the historical development of capitalism, hierarchical differentiations within a society (social classes, social status, urbanization), and the bureaucratic structures of organizations. Will enable students to analyze their societal structure in terms of history, present configuration, and dynamic processes.

**SOC 20722. Introduction to Social Psychology**

(3-0-3) Collett

Social psychology studies how individuals and groups are influenced by other individuals and groups. In this broad introduction to social behavior, we will learn about what makes people do the things they do: What decides whom someone will fall in love with? Where do aggressive, violent, and criminal behaviors come from? Why are some people more charitable than others? Why do some people obey authority and conform, while others always have to buck the trend? Why are some people lazier when they work in groups? What is the source of people's stereotypes and prejudices? How can we overcome them? What causes conflict between groups? And finally, what makes us become who we are? This course is not recommended for students who have taken SOC 122 or Soc 220, as the content will overlap.

**SOC 20732. Introduction to Criminology**

(3-0-3) Sobolewski

As an introduction to the topic of criminology, this course examines crime as a social problem within American society. Particular attention is given to the nature and function of law in society, theoretical perspectives on crime, victimology, sources of crime data, the social meaning of criminological data, and the various societal responses to crime. These topics are addressed through specialized readings, discussion, and analysis.

### **SOC 20740. Sociology of Terrorism**

(3-0-3) Sobolewski

The purpose of this course is to provide a broad review of terrorism with a focus on sociological approaches such as social movements theory, network analysis, and ideology. The course will examine profiles of terrorists within a historical and social psychological perspective. Specifically, we will focus on the purpose and difference of terrorists and terrorist groups and frame our discussion around historical factors that continue to influence modern terrorism. Finally, we will discuss the consequences of terrorism in terms of social responses to terrorism, the economic and political costs of these responses, and the possibility of preventing terrorism in the future.

### **SOC 20810. Gender Roles and Violence**

(3-0-3) Sobolewski

Much of the violence in contemporary society—whether it is domestic abuse, school shootings, gang warfare, video games, or inter-ethnic conflict—has something to do with gender. This course explores the connection between gender role socialization and the expression of conflict or aggression. Through readings, discussions, films, and projects, students will be encouraged to examine sex differences in violent behavior as the outcome of complex processes. We will try to understand those processes better and develop the ability to describe the causes and their effects.

### **SOC 20838. Social Inequality: The Social Construction of Difference and Inequality**

(3-0-3)

Many of us are aware of our own experiences of disadvantage (or perhaps privilege), but people are generally not aware of how structural arrangements in society result in systems of difference and inequality. Only occasionally do we question whether or not things are really black and white, right and wrong, true or false and even less often do we contemplate the repercussions of such binary assumptions. This class will challenge taken-for-granted beliefs about race and ethnicity, social class, sex and gender, and sexuality. We will discuss how these socially constructed categories of difference are given significant meaning and how this process subsequently results in “real” differences in experiences, expectations, and achievements between groups of individuals.

### **SOC 30019. Sociology of Sport**

(5-0-3) Welch

As a phenomenal growth industry of postindustrial leisure societies, sports demand critical study. Theories, schools' involvements, professionalization, race and sex inequalities, methods of business control, the use and misuse of talent/skills, and Olympic problems are some aspects of this course's contents.

### **SOC 30043. Migration, Documented**

(1-0-1) Richman

The migration of people from their homelands is as old as humanity. Yet migration is still misunderstood; emigrants are often seen as traitors, and immigrants as dangerous and self-serving invaders. Film is a burgeoning medium for documenting the experience of migration for the migrants themselves, the communities they leave, and the societies in which they settle. Documenting migration compels us to question the meanings of borders, the nature of identity, and the possibility of cultural pluralism and integration. This course showcases documentary films about migration in the Americas.

### **SOC 30109. Sociology of Culture**

(3-0-3)

In this class, we will examine cultural dimensions of important social processes, and we will survey contemporary sociological approaches to analyzing culture.

Examples will include readings on home and work, social hierarchies, political culture, media and the arts, and social change.

### **SOC 30151. Popular Culture**

(3-0-3) Lizardo

The first half of the course will introduce a variety of theoretical perspectives, presented as a historical overview of popular cultural studies, both in the United States and Britain. The theories to be considered include mass culture theory, Marxism, the Frankfurt schools (critical theory), structuralism, semiotics, feminism, and post-modernism. During this first half of the course, students will be required to write a paper in which they analyze an aspect of popular culture, utilizing one or more of the theoretical perspectives. The second half of the course is devoted to a historical analysis, using the perspectives already addressed, of the social impact and meaning systems of rock 'n' roll music. The exegesis will begin with a study of African music, using recordings of chants and celebratory music, and will explore the music of American slaves, chain gangs, and spirituals, toward the goal of identifying elements exhibited by those genres that eventually evolved into rock 'n' roll. Students will be required to write a research paper on some aspect, personality, group, or historical development of rock 'n' roll. This course is not recommended for students who have taken SOC 451, as the content will overlap.

### **SOC 30237. Sociology of Teaching**

(3-0-3) Kelly

This course surveys the sociological foundations of teaching and learning in America's elementary and secondary school classrooms. The class begins with an examination of teaching as a profession. What attracts individuals to the teaching profession, and why do they leave? What constitutes professional success for teachers? Next, we'll examine how local context shapes the work that teachers do, looking at some elements of schools and communities that impact the nature of teachers' work. The course concludes by looking at the teacher's role in producing educational success by considering two enduring educational problems: how to foster student engagement, and how to teach students of differing abilities within the same classroom. In addition to research in the sociology of teaching, students will be exposed to teacher narratives of success and struggle.

### **SOC 30514. Social Movements**

(3-0-3)

How is social change possible? This is one of the central questions for the study of social movements, as well as the organizing theme of this course. In this course, we will consider the ways in which different sociological theories of social movements have asked and answered this question, paying particular attention to theories of identity, emotion, and networks.

### **SOC 30567. Chile in Comparative Perspective**

(3-0-3) Valenzuela

This course provides a detailed analysis of the development of the Chilean economy, society, and policy since independence from Spain in 1818, drawing selected comparisons with other national experiences. It then discusses the validity of theoretical statements on central questions in the social science literature by examining them in light of the Chilean case. The main issues to be examined are the reasons for the successes or failures of Third World development, the origins and breakdowns of democracies, the characteristics of authoritarian regimes, and processes of restoring democracies.

### **SOC 30672. Religion and Social Life**

(3-0-3) Christiano

How does social life influence religion? How does religion influence society? What is religion's social significance in a complex society like ours? Is religion's significance declining? This course will consider these and other questions by exploring the great variety in social expressions of religion. The course examines the social bases of churches, sects, and cults, and it focuses on contemporary religion in the United States.

### **SOC 30743. Sociology of Deviance**

(3-0-3)

This course is concerned primarily with the sociological conceptions and theories of deviance. At the onset, deviance is differentiated from those phenomena designated as social problems and social disorganization and the remainder of the course focuses on deviant acts and deviants. Various responses are explored to such questions as: Who are deviants? What does it mean to be a deviant—to the deviant himself, as well as to others? What common social processes and experiences do most deviants undergo? Various theories or models of delinquency, crime, suicide, sex deviation, and drug use are utilized to aid in constructing a sociological understanding of deviance, the analysis of deviant acts, and the formation of deviant careers or roles.

### **SOC 30806. Race and Ethnicity**

(3-0-3)

This course has three objectives. First, the course will help students think critically about issues related to race and ethnicity in American society. These issues include the meaning of race and ethnicity; the extent of racial and ethnic inequality in the US, the nature of racism, discrimination, and racial stereotyping; the pros and cons of affirmative action; the development of racial identity; differences between assimilation, amalgamation, and multiculturalism; and social and individual change with respect to race relations. The second objective is to foster a dialogue between students about racist and ethnocentric attitudes and actions. The third objective is to encourage exploration of students' own racial and ethnic identity and to understand how this identity reflects and shapes their life experiences.

### **SOC 30846. Today's Gender Roles**

(3-0-3) Aldous

This course is concerned with current changes in male and female roles in the light of social science, primarily sociological evidence. Such issues as the source of male and female role differences, the range of roles open to women and men, and the consequences of changing roles and institutions like paid work and the family are considered. The class format is primarily group discussions supplemented by some lectures presentations from visiting scholars.

### **SOC 30900. Foundations of Sociological Theory**

(3-0-3) Faeges, Fishman

The course explores the content and the method of great written works by sociology's founding theorists. Theorists to be discussed include Durkheim, Weber, Marx, and Tocqueville. An examination of their writings serves as an introduction to the intellectual concerns and the new insights, the theoretical ambitions, and the controversies that provided the foundation for the development of sociology. Through a focus on classic texts, the course will address two main themes: the methodological arguments concerning the appropriate intellectual strategy for fulfilling sociology's scientific ambitions, and the substantive debates over the nature and dynamics of a changing society. Some attention will be directed to the implications of classical sociological theory for contemporary controversies and research.

### **SOC 30902. Methods Sociological Research**

(3-0-3) Williams

*Prerequisite:* (SOC 30900 OR SOC 300)

Begins with discussion of scientific method, conceptualization of research problems, and measurement. The course then explores the dominant modes of social science research: field work and participant observation, survey and interviewing, experimental designs, and evaluation research.

### **SOC 30903. Statistics for Sociological Research**

(3-0-3)

This course is designed to show students how to interpret and critically evaluate statistics commonly used to describe, predict, and evaluate in the social sciences, as well as many areas of the business and/or medical world. The focus is on a conceptual understanding of what the statistic does, means, and what assumptions are made from it. Hands-on experience in using data analysis is part of the course.

### **SOC 33001. Sociology, Self, and Catholic Social Tradition**

(3-0-3) Weigert, Myers

What's Catholic about sociology? What's sociological about Catholic social tradition? What does all this mean for sociology majors, what they study, and how this may affect their careers and lives after graduation? This course is a critical examination of the links between Catholic social thought and sociology as a discipline. We will engage these ideas through an experimental, team-taught seminar format. Readings will include core statements of Catholic social tradition, critiques thereof, and autobiographical essays written by sociologists and others who are dedicated to social justice.

### **SOC 33020. Race, Ethnicity, and Education in the Midwest**

(3-0-3) DePouw

The purpose of this course is to examine the complexities of education within local context, and to highlight the unique histories of how race and ethnicity are lived in Midwestern communities. Because much of the academic literature that addresses race and ethnicity focuses on large urban areas or upon the East or West coasts, the Midwestern context is often overlooked. During this course, students will be asked to examine particular states in the Midwest such as Minnesota, Wisconsin, Illinois, and Michigan. In addition, we will pay particular attention to rural areas in places like Iowa and Nebraska, as well as the urban educational systems of Chicago, Minneapolis/St. Paul, Milwaukee, and Detroit. Through our readings and discussion, we will come to better understand the ways in which geographic location, regional history, shifting ethnic composition, and regional policy decisions impact public education in the Midwest.

### **SOC 33090. Proseminar**

(1-0-1) Power

This course provides an introductory overview of the sociology major and the opportunities students have within the Sociology Department and the College of Arts and Letters, as well as across the University. The course has a practical focus. Some classes are devoted to equipping students with knowledge and skills that will serve them as they progress through the major. Other classes focus on future plans, such as entering the work force, going on to graduate or professional school, and performing service after the baccalaureate. The idea of "career as vocation" is also explored. This course is for one credit, pass-fail, and is required of all sociology majors.

### **SOC 40030. Approaches to Conflict Transformation**

(3-0-3) Fast

This course surveys the various theories that explore the nature and root causes of conflict and existing methods of conflict transformation. Students will learn to apply analytical tools and practical strategies in order to transform conflict at the interpersonal, intergroup, and international levels.

### **SOC 43020. Re-Imagining Ireland: Sociological Perspectives on a Changing Society**

(3-0-3)

*Prerequisite:* SOC 10002 OR SOC 10033 OR SOC 10722 OR SOC 13181 OR SOC 20002 OR SOC 20033 OR SOC 20228 OR SOC 20342 OR SOC 20722 OR SOC 20732 OR SOC 30672 OR SOC 30900

"Continuous discontinuity, constant change, is our shared condition" (Bauman, 2002:19) In recent years, we have witnessed the passing of many of the old orthodoxies in Irish society. The Roman Catholic Church has lurched from one scandal or crisis to another, all the time losing its legitimacy among the body politic. Politics has been exposed as a less than honorable affair, as tribunal after tribunal lay bare the unsavory financial ties between politicians, developers, and leading Irish businessmen. Irish sport, language, music, and culture have gone global, in the process transforming themselves into commodities that ultimately stretch their capacities to remain true to their local qualities. A sustained, if uncertain, economic prosperity engulfs the land. A new cult of individualism promotes the idea of more choice—whether that relates to supermarkets, schools, hospitals, or health care packages. In this course, we employ critical sociological analysis to explore present-day Ireland in relation to class and social mobility, the rise of consumer culture, gender and gender relations, transformations of place and space, and cultural/media innovation and its diffusion.

**SOC 43030. Documentary: Critical Analysis and Method**

(3-1-3) Snively

We see documentaries in many different forms every day via journalism, reality television, the Discovery Channel, and nonfiction film. This course turns a critical, anthropological, and methodological eye toward interpreting, constructing, and contextualizing the documentary.

**SOC 43113. Cultural Sociology**

(3-0-3) Spillman

In this class, we will examine cultural dimensions of important social processes, and we will survey contemporary sociological approaches to analyzing culture. Examples will include readings on home and work, social hierarchies, political culture, media and the arts, and social change.

**SOC 43162. Aesthetics of Latino Cultural Expression**

(3-0-3) Cárdenas

This course will analyze the philosophy and principles underlying the social and political aspects of Latino art. We will approach this by examining a range of topics, including Chicano and Puerto Rican poster art, muralism, Latina aesthetics, and border art. The readings will enable us to survey a number of important exhibitions of Latino art and to explore new possibilities for exhibition and representation. We will examine descriptive material and critical writings concerning issues pertaining to the representation and interpretation of Latino culture and art, as well as how these questions surface in a national museum context.

**SOC 43240. Research on School Effects**

(3-0-3)

It might seem a truism that schools have powerful effects on student achievement. Yet beginning with the landmark Equality of Educational Opportunity study in 1966, social scientists have debated the role that schools play in the production of student achievement. Does it matter much which school a student attends? Why are some schools chronically low performing, and what are the characteristics of more effective schools? Students should have completed coursework in methods and statistics for social research or equivalent coursework before enrolling in this course.

**SOC 43333. Sociology of Divorce and Remarriage**

(3-0-3)

This course describes the adversity and reorganization of family life through marital discord, divorce, nonmarital births, single parenthood, and remarriage, with a particular focus on how these processes affect children. Through weekly lectures, readings, and discussions, students will become familiar with current research and policy related to these topics.

**SOC 43342. Family Development**

(3-0-3)

Family Development is directed to the sociology, psychology, counseling, preprofessional, nursing, social work, and other majors who will necessarily be working with or seeking to understand families in the course of their occupations. The course covers change in families from the time when couples marry until their dissolution due to divorce or death of one of the spouses. Parent-child relations, beginning when children are born until parents' death, and changes in sibling relations as persons age, as well as the development of the marital union will be examined. The family cycles of childless and one-parent families will also be included. Students have the opportunity to apply the course material on family development to their own families within the context of marriage, occupational, and educational plans. They do a case history of a family in order to gain experience in using the family development approach.

**SOC 43345. World Families and Gender**

(3-0-3)

World Families is a course designed to examine families as related to gender across space and through time. How gender is related to power, roles, and responsibilities within families in the various areas and across social class and ethnicity is a focus. The families to be studied come from a number of societies other than the United

States. Also considered will be families in the United States as they existed in earlier periods to give another basis for comparison among families today.

**SOC 43346. Family Problem Solving**

(3-0-3) Klein

*Prerequisite:* Arts and Letters junior or senior with at least one previous course in sociology or psychology.

In-depth analysis of processes families use to solve the problems they face. Material is drawn from the social psychology of small groups, the sociology of formal organizations, and research and theory directly concerned with family problem solving. This course is designed for students who plan on working with families professionally.

**SOC 43377. Families, Employment and Their Interrelations with Gender**

(3-0-3) Aldous

A consideration of the part gender plays in family processes like the couple formation through cohabitation and/or marriage, having and rearing children, division of labor, and the post-children era.

**SOC 43402. Population Dynamics**

(3-0-3)

Demography, the science of population, is concerned with virtually everything that influences, or can be influenced by, population size, distribution, processes, structure, or characteristics. This course pays particular attention to the causes and consequences of population change. Changes in fertility, mortality, migration, technology, lifestyle, and culture have dramatically affected the United States and the other nations of the world. These changes have implications for a number of areas: hunger, the spread of illness and disease, environmental degradation, health services, household formation, the labor force, marriage and divorce, care for the elderly, birth control, poverty, urbanization, business marketing strategies, and political power. An understanding of these is important as business, government, and individuals attempt to deal with the demands of the changing population.

**SOC 43404. International Migration: Mexico and the US**

(2-0-2) Bustamante

This course addresses relations between theory and methods for scientific research on international migration with emphasis on immigration to the US. The objective is to prepare students to design research projects on this subject for theses and dissertations. The course will review basic questions on this subject and the methods through which these questions have been adequately or inadequately answered. The numbers, the impact, the nature, the structure, the process, the human experience, will be discussed in terms of the research methods commonly used to approach them.

**SOC 43479. International Migration and Human Rights**

(3-0-3) Bustamante

This course is an extension from the mini-course to a full term, with a wider coverage of international migration experiences in the world with an emphasis on human rights. It starts with a historical approach to various immigration waves to the United States, from the years of the Industrial Revolution to the present. It focuses on the current debate on the impact of the undocumented immigration from Mexico and Central America, with a discussion of the gap between public perceptions and research findings. Differences between Mexico and the United States' migration policies, and its social and economic implications, are discussed. The recent developments within the context of the United Nations' Commission of Human Rights on the relationship between migration and human rights are also covered.

**SOC 43524. Employment in a Changing Economy**

(3-0-3) Hachen

How is employment changing? What distinguishes the new economy from the old economy? How do people find better jobs? What are employers looking for when the attempt to meet their labor needs? This course will attempt to answer these and other questions by contrasting the new and the old economy. In the old economy, some people worked for the same employer their entire lives. Why did workers

stay with the same firm? Why did employers want to retain their employees? In the new economy, employers seem to want flexibility. Why do they want flexibility, and how do they attempt to achieve it? What consequences does the quest for flexibility have for how people become employed?

### **SOC 43553. Building Democratic Institutions**

(3-0-3) Valenzuela

Elements of democratic regimes emerged long before the regimes as such can be identified as being minimally in place. Beginning with a brief discussion of the essential features of democracies, the course examines how and why such institutions emerged, and the critical moments in which the actual transitions to the new democratic regimes occurred. The course focuses on democratizations that took place before the Second World War, and will examine key European and Latin American cases.

### **SOC 43558. Comparing European Societies**

(3-0-3) Fishman

This course offers students a review of major patterns of difference, along with some similarities, among the 15 member states of the European Union. Despite the larger contrasts with the United States, and the pressures toward convergence generated by the process of European integration, European societies remain remarkably different from one another on a number of dimensions including: the overall level and form taken by employment and unemployment, systems of social protection and welfare state organization, demographic trends ranging from extremely low birth rates in most of southern Europe to significantly higher birth rates further north, the connections between urban and rural life, and the impact of education on inequalities. The role of institutions, cultures, national histories, and policies in accounting for this pattern of difference will be reviewed. The course will also examine the combinations of identities—national, regional, and European—found among citizens of Europe. Students will be encouraged to develop their expertise on at least one country while also doing comparative reading.

### **SOC 43564. Global Sociology**

(3-0-3)

Globalization, or the spread of international communications and exchange, has impacted many aspects of contemporary societies. This course helps students understand the global economic and political forces that shape people's local and national experiences, and it considers the ways that citizens and states help shape the course of global change. We will explore how global economic and political change affect conflicts within and between nations, as well as how global change impacts the practice of democracy worldwide. The course examines some of the core sociological work in the area of global change, focusing on the development of national and global institutions, the expansion of capitalism, and the emergence of transnational networks of popular groups seeking to shape global conflicts and culture.

### **SOC 43590. Sociology of Economic Life**

(3-0-3)

Economic actions like working, buying, selling, saving, and giving are a fundamental part of everyday life, and all spheres of society, from family to religion to politics, are interrelated with economy. Sociologists examine how social relationships from small networks to transnational linkages affect economic actions and their outcomes, and the ways cultural meanings and political strategies shape those social relationships. The goal of this class is to provide students with new perspectives on economic actions by reading recent sociological studies of topics like money, markets, work, businesses, industries, and consumer society.

### **SOC 43662. Religion and American Society**

(3-0-3) Sikkink

This course will explore the role that religion plays in United States society.

### **SOC 43719. Self, Society, and Environment**

(3-0-3) Weigert

This course focuses on social psychological aspects of relationships between humans and the natural environment. Issues include how humans interact with

different environments, symbolic transformations of environments, and competing accounts or claims concerning human-environment relationships. The course is framed in a sociology knowledge perspective and touches on alternative ways of envisioning and valuing individual and institutional perspectives on human-environment relationships with an eye toward implications for social change.

### **SOC 43730. Crime and Deviance in Ideological Perspective**

(3-0-3) Welch

*Prerequisite:* SOC 10002 OR SOC 10033 OR SOC 10722 OR SOC 13181 OR SOC 20002 OR SOC 20033 OR SOC 20228 OR SOC 20342 OR SOC 20722 OR SOC 20732 OR SOC 30672 OR SOC 30900

This seminar course will examine selected issues (e.g., white collar crime, interpersonal violence, victimless crimes, etc.) in the study of crime and deviance (issues will change each time the course is offered) and compare responses made by those representing different schools of thought. We will critique the adequacy of these responses from a sociological viewpoint. *Prerequisite:* any SOC course except that you cannot take this course if you have already taken SOC 43732, Controversies and Crises in Modern Criminology because of overlap between the two courses.

### **SOC 43732. Controversies and Crises in Modern Criminology**

(3-0-3) Welch

This upper-level seminar course is intended for junior and senior sociology majors only. It will focus on important current issues and controversies (e.g., racial profiling, victimless crimes, cyber-crimes, etc.) that are central to the study of crime and deviance in modern society. Students will be required to discuss and analyze these issues from a variety of sociological perspectives. The issues that are studied may change each time the course is offered. Students cannot take this course (even sociology majors), if they have already taken SOC 43730, Crime and Deviance in Ideological Perspective, because of overlap between the two courses.

### **SOC 43839. Unequal America**

(3-0-3)

Although America is world's richest nation, it has the most unequal distribution of wealth and income in the industrialized world. In this course, we will examine why this is so. In particular, we will examine the following questions: What social forces create inequality in society? Is inequality inevitable? Is there such a thing as "social class"? Who gets ahead and why? Why is race/ethnicity and gender still related to social status, wealth, and income? Does America have a "ruling elite"? Who are "the poor," and what explains their poverty? Are there social policies that can create more equality in American society—and is that what Americans really want?

### **SOC 45000. Sociology Internship**

(V-0-V)

This is an "experiential" course designed to give students some practical experience in the area of urban affairs, social welfare, education, health care services, or business, in order to test their interest, complement their academic work, or acquire work experience preparatory for future careers. Students are placed with a community agency in the South Bend area and normally work six hours a week as interns under the supervision of an experienced practitioner. Hours are flexible, usually set to accommodate the intern's availability and the needs of the host agency. Below is a list of agencies that have accepted interns. Students may also find other possible placements on their own (subject to approval by the instructor). Adoption Network, Center for the Homeless, Firefly Festival for the Performing Arts, FIRE Home Home Management Resources, La Casa de Amistad, Neighborhood Development Assoc., Safe Station (Youth Runaway Shelter), Sex Offense Services, Madison Center, South Bend Department of Community and Economic Development, South Bend Heritage Foundation, South Bend (Public) Housing Authority, Alliance for Catholic Education's IEI Office, Early Childhood Development Center, Good Shepherd Montessori School, Northern Indiana Historical Society, Robinson Community Learning Center, Upward Bound, Washington High School, South Bend, Aids Ministry, Hospice of St. Joseph County, St. Joseph Medical Center's Chapin Street Health Center, Adult Probation, Indiana Legal Services, Individual Judges, Juvenile Justice Center (two semesters), St. Joseph County Police Department, and the South Bend Police Department. There are no prerequisites; however, preference is given to sociology majors, ESS minors, and students who have had coursework in a related area.

This is a graded course. In addition to fieldwork, academic work includes reading scholarly works related to the field placement, and a final paper. Contact Dr. Power for more information (631-0803).

#### **SOC 46000. Directed Readings**

(V-0-V)

Students pursue an individual reading program on a topic not available in a regular class, designed with and supervised by a member of the faculty, leading to the production of oral and written reports reflecting deeper theoretical and empirical understanding. This course does not count toward the 40000-level major requirement.

#### **SOC 46096. Directed Readings in Sociology (S/U)**

(V-0-V)

Intensive study on a special topic to produce a scholarly paper, or special investigative experience in the field leading to the production of oral and written reports reflecting deeper theoretical and empirical understanding. This course does not count toward the 40000-level major requirement.

#### **SOC 47000. Special Studies**

(V-0-V)

Special Studies in Sociology SOC 47000, affords students an opportunity to pursue an intensive, special investigative experience that will lead to a scholarly paper or other written/oral reports reflecting deepened methodological skills, empirical knowledge, and theoretical understanding. Departmental policy authorizes a special studies course for projects that do not fit under other rubrics available for individual projects (e.g. internship; directed readings; directed research; community-based research; sociology Honors Capstone Project).

#### **SOC 48000. Directed Research in Sociology**

(V-0-V)

Directed Research in Sociology (SOC 48000) affords students a chance to research sociological questions that are not covered in an established course, outside the formal honors program. Together with a faculty director, the student formulates a research question and a research design to answer that question that will result in a major research report demonstrating deepened methodological skills, empirical knowledge, and theoretic understanding.

#### **SOC 48001. Community-Based Research**

(V-0-V)

*Prerequisite:* SOC 30902

This variable-credit course enhances the students' research skills by applying them to an action research project for a not-for-profit, social services organization in St. Joseph County. Building on skills developed in Methods of Sociological Research (SOC 30902), students work with a Notre Dame faculty member and an on-site supervisor to conduct needs assessment or evaluation research, typically in the form of interviews/surveys, focus groups, or content analysis. The practicum begins with an orientation to the organization's mission and the research project objectives, individual goal setting, and a review of relevant methodological skills. Students then work with the on-site supervisor to develop valid methods for the project, to resolve measurement issues, and to collect appropriate data. Depending on the nature of the project, the student may also be involved in data base construction, data analysis and reporting. In most cases, the student will choose from a list of available projects, but the student may propose a new project as well. The overall objective is the development of the student's knowledge and skills by putting them at the service of the community. *Prerequisite:* SOC 30902 Methods of Sociological Research or equivalent. Permission of instructor required.

#### **SOC 48009. Sociology Honors Capstone Project**

(3-0-3)

A "capstone project" is the principle component of the Honors Program in Sociology. Students who accept an invitation to join the Sociology Honors Program from the director of undergraduate studies ordinarily enroll in two semesters (6 credits) of SOC 48009, Sociology Honors Capstone Project, with a faculty capstone advisor, in order to pursue their individual capstone research. Complete information about the honors program and the Honors Capstone

Project can be found in the Sociology Department booklet, The Honors Program in Sociology at Notre Dame.

#### **SOC 48040. Mexican Immigration: A South Bend Case Study**

(3-0-3)

This course uses experiential learning in the Mexican community of South Bend in order to understand how Mexican migrants conduct their lives across the vast distances separating South Bend and their homeland. The course begins with readings in social science and fiction about transnationalism, Mexican-US migration, and the history and sociology of the local community. Next we learn ethical fieldwork methods in preparation for community research. Students working in two-person teams will gather data on local and transnational households and kin networks, political involvement, employment, consumption practices, cultural activities and religious life, working through contacts with social service agencies, the Mexican consulate, and Mexican or Latino-run media, businesses, food stores, and sports leagues. We will document the innovative adaptations of this migrant community, especially the growth of an ethnic enclave of small businesses that both unite Mexicans as an ethnic group and sustain their ties to their homeland. We intend to compile the research in a volume published by Latino Studies to be given to those who shared their lives with us and to entities that are committed to helping them.

#### **SOC 48501. Analysis of Collective Contention I**

(3-0-3)

This course and SOC 48502, Advanced Analysis of Collective Contention, together form a single, year-long class examining theoretical developments and empirical analysis of collective contention. Students will conduct intensive research projects involving thorough literature review, formal proposal, statistical and interpretive analysis, and the writing of a professional research report. SOC 48501 and 48502 must be taken sequentially in the same academic year.

## Department of Science, Technology, and Values

### STV 20103. Death and Dying

(3-0-3) Neiman

*Corequisite:* STV 27999

This course examines metaphysical and ethical issues associated with bodily death. Metaphysical issues taken up in this course include the following: What is death? Is death a bad thing? Is there any hope for survival of death? Ethical issues to be discussed include suicide, euthanasia, and abortion.

### STV 20109. Knowledge and Mind

(3-0-3) Franks

*Corequisite:* STV 27999

An introductory survey of a number of issues in the theory of knowledge and the philosophy of mind. Issues to be addressed include: What is knowledge? What is consciousness, and what might a satisfactory explanation of consciousness look like? What is the "self," and how do we know it? What is perception and what, exactly, can we come to know by perception? What, if anything, can we know without relying on perception? Could we be wrong about everything we take ourselves to know?

### STV 20114. Introduction to the Philosophy of Biology

(3-0-3)

*Corequisite:* STV 27999

An examination of key concepts and controversies in contemporary biology. The meaning of gene, organism, and environment, and their interrelationships in the context of development, evolutionary theory, and ecology are closely considered.

### STV 20115. Gender, Politics and Evolution

(3-0-3)

An examination of ethical/political models of gender-neutral access to public and domestic requisites for the development of basic human capabilities, and a comparison of these models with current studies of the significance of human sexual dimorphism in evolutionary psychology.

### STV 20116. Human Nature and New Technology

(3-0-3) Mayo

An examination of philosophical and ethical questions associated with the two most revolutionary technologies of the 21st century, the Internet and biotechnology.

### STV 20120. Alcohol and Drugs: Anthropology of Substance Use and Abuse

(3-0-3)

This class will cover biological, cultural, and applied aspects of how anthropology approaches the diversity of substance use practices around the world, as well as resultant social problems and social reactions. The course will draw on both historical and ethnographic analyses to situate alcohol and drug use in the realm of human behavior and experience. Addiction as a concept will be critically analyzed from both biological and cultural perspectives.

### STV 20124. Memoirs of Madness

(3-0-3)

This course has three major dimensions: (1) comparative description and analysis of biomedical and psychodynamic models of psychiatric training; (2) comparative analysis of personal accounts of mental illnesses; and (3) philosophical analysis of psychodynamic models of mental illness and therapy.

### STV 20125. Philosophy and Science Fiction

(3-0-3) Rea

*Corequisite:* STV 27999

The goal of this course is to introduce students to some central philosophical problems via reflection on classic and contemporary works of science fiction in conjunction with classic and contemporary texts in philosophy.

### STV 20134. The Technological American

(3-0-3)

In this course, we will explore the impact new technologies have had on our domestic and economic lives. We also will discuss how new technologies have changed the way we communicate and the kinds of leisure entertainment we enjoy. Though technology is often celebrated for the promise of liberation, we will see how new inventions have also raised fears of alienation and loss of control.

### STV 20139. Minds, Brains, and Persons

(3-0-3) Stubenberg

This course will treat some central issues in the philosophy of mind, such as freedom of the will, personal identity, and the relationship between mind and body.

### STV 20142. Architectural History II

(3-0-3)

*Corequisite:* STV 27999

This course continues the history survey, beginning with Renaissance and Baroque Europe and continuing to the 18th and 19th centuries in Europe and the United States. It extends to the modern movement as it affected countries as far-reaching as Japan and Australia.

### STV 20146. History of Communication Technologies

(3-0-3)

The Internet is revolutionizing the ways we produce, communicate, and organize information. This course seeks to deepen our understanding of current issues about the access to information, the ownership and authority of ideas, and the possibilities for change. We can gain a new perspective by examining the history of previous shifts in the technology of communication in ancient medieval and early modern societies. We will begin by learning about the affects the earliest forms of writing had on ancient societies. Next we will discuss the role of Christianity in the transfer from the scroll of the codex. The third, larger section will explore the development of different kinds of books, from illuminated manuscripts to mass-produced books for university students. We will then examine the shifts following the invention of the printing press in the 15th century. Finally, we will consider some of the 20th-century developments in communications technology, including the revolution of cyberspace.

### STV 20149. Environmental Philosophy

(3-0-3)

A philosophically integrated examination of current environmental issues, drawing on familiar literature from ecology (Leopold), economics (Boulding), and ethics (Singer), as well as recent fiction (Tolkien, Herbert).

### STV 20152. Visual America II

(3-0-3)

An introductory course that explores dimensions of several types of visual expression: popular photography, cartography, genre and historical painting, chromolithography, and the commercial and graphic arts in American cultural history from Louis Daguerre's development of photography in 1839 to the public exhibition of television at the 1939 New York World's Fair.

### STV 20154. Modern Physics and Moral Responsibility

(3-0-3)

This class examines such questions as: What are the moral responsibilities of the scientist? Should the scientist be held accountable for what might be done with the results of his or her scientific research? Does the scientist have any special role to play, as a citizen, in public debate about science policy? Should the scientist sometimes simply refuse to engage in some kinds of research because of moral concern about the consequences of research of that area? No special background in physics will be assumed.

### STV 20163. Science and Religion

(3-0-3)

An examination of the interrelation and tension between contemporary science and traditional religious belief.

### STV 20179. Science and Theology

(3-0-3)

Both science and religion generate assertions that are held to provide true descriptions of the world and our place in it. Both science and theology subject these assertions to disciplined inquiry and testing within specific communities. In societies (like ours) in which both science and religion are vital forces, these processes of enquiry and testing overlap and interrelate in complicated ways, resulting sometimes in conflict and sometimes in mutual enrichment. This course will investigate these interrelations by means three case studies: the Galileo affair, the conflict of evolution and creationism, and the ethical issues that arise from new genetic biotechnologies.

**STV 20216. Biomedical Ethics and Public Health Risk**  
(3-0-3)

Designed for premed, science, and engineering students, the course will survey ethical issues associated with current public health problems, such as pollution-induced cancers, universal health care, occupational injury and death, and inadequate medical attention to prevention, nutrition, and environmental health.

**STV 20221. Biomedical Ethics**  
(3-0-3)

A discussion of ethical problems in the medical profession in light of natural law and Christian moral principles.

**STV 20245. Medical Ethics**  
(3-0-3) Solomon

*Corequisite:* STV 22245, STV 27999

An exploration from the point of view of ethical theory of a number of ethical problems in contemporary biomedicine. Topics discussed will include euthanasia, abortion, the allocation of scarce medical resources, truth telling in the doctor-patient relationship, the right to medical care, and informed consent and human experimentation.

**STV 20247. Environmental Ethics**  
(3-0-3)

*Corequisite:* STV 27999

This course is concerned with the relationship between human beings and the rest of the natural world, and critically examines various proposals that have been made about how we ought to treat plants, animals, ecosystems, future generations, and scarce natural resources.

**STV 20248. Modern Science and Human Values**  
(3-0-3)

The purpose of this course is to introduce students to some of the most important ethical theories in Western philosophical and religious thought and to study the applications of those theories to moral problems that arise in the context of the life sciences.

**STV 20258. Philosophy of Technology**  
(3-0-3)

Topics covered will be early philosophy of technology, recent philosophy of technology, technology and ethics, technology and policy, technology and human nature, and technology and science. Readings will be principally derived from David M. Kaplan (2004) *Readings in the Philosophy of Technology* and Francis Fukuyama (2002) *Our Posthuman Future*.

**STV 20260. Theology, Ethics, and the Environment**  
(3-0-3)

Does our ecological awareness require radically new theologies and moralities? What moral claims, if any, do nonhuman entities make on us? Can current Christian and philosophical moral theories address these claims? This course raises these questions on both theoretical and practical levels. Theoretically, we will examine various theological and philosophical views of the moral status of nonhuman nature. Practically, we will explore the implications of these views for issues such as wilderness conservation/preservation, treatment of animals, agricultural biotechnology, and others. The diversity of positions we will consider will range from those who embrace standard, modern human-centered theologies and moral theories to critics (such as deep ecologists, ecofeminists, and others) who hold

that the very theoretical stance of our dominant theologies and moral theories is incompatible with a genuinely ethical orientation to the environment.

**STV 20282. Health Care Ethics in the Twenty-First Century**  
(3-0-3)

*Corequisite:* STV 27999

This course examines religious and moral questions raised in health care today. Basic concepts in bioethics will be introduced and a range of contemporary issues in bioethics will be treated; e.g., physician-assisted suicide and euthanasia, organ donation, genetic testing and genetic therapies, and decisions in neonatology. Special emphasis will be given to the contribution of the Roman Catholic moral tradition to contemporary debates.

**STV 20304. Energy and Society**  
(3-0-3) Kolata

*Corequisite:* STV 27999

A course developing the basic ideas of energy and power and their applications from a quantitative and qualitative viewpoint. The fossil fuels (coal, oil, natural gas) are studied together with their societal limitations (pollution, global warming, diminishing supply). Nuclear power is similarly studied in the context of the societal concerns that arise (radiation, reactor accidents, nuclear weapons proliferation, high-level waste disposal). The opportunities, as well as the risks presented by alternative energy resources, in particular solar energy, wind, geothermal and hydropower, together with various aspects of energy conservation, are developed and discussed. This course is designed for the nonspecialist.

**STV 20306. Environmental Chemistry**  
(3-0-3) Kamat

*Corequisite:* STV 27999

Discussion of basic chemical processes occurring in the environment, particularly those relating to the impact of humanity's technological enterprise.

**STV 20411. Evolving Science Fictions**  
(3-0-3) Elliott

*Corequisite:* STV 27999

Science is something that our culture has almost complete faith in; we use its technological products almost every day, without thought, from the vehicles we drive to the medical treatment that we accept. But it is also something that we often feel uneasy about as well: science is often the harbinger of catastrophe (global warming) and often causes us to question our identity (cloning, embryonic research). This course is designed to let us examine, among other things, the development of science's impressive cultural authority as well as the attendant cultural anxiety. We will begin in the early 19th-century, and follow the development of science fiction into the early 21st century. However, we will not be limited to the science-fiction genre; we will examine a number of works and genres that incorporate scientific discourse. Our tentative reading list will include: Mary Shelley's *Frankenstein*; selections from the poetry of Alfred Tennyson; *The Strange Case of Dr. Jekyll and Mr. Hyde* by Robert Louis Stevenson; *War of the Worlds* by H.G. Wells; *Foundation* by Isaac Asimov; short stories by Arthur C. Clarke and Ray Bradbury; *Do Androids Dream of Electric Sheep?* by Phillip K. Dick; *The Left Hand of Darkness* by Ursula K. LeGuin; *Oryx and Crake* by Margaret Atwood; and *Never Let Me Go* by Kazuo Ishiguro. We will also read brief selections from scientists and thinkers such as Charles Darwin, Albert Einstein, and Stephen Hawking. Assignments will include two papers, a midterm exam, and a final exam. Short, occasional reading quizzes will also be given.

**STV 20419. Brief History of Time/Space/Motion**  
(3-0-3)

An examination of the historical evolution of the philosophical conceptions of time, space, and motion from Plato to Einstein. Special attention will be paid to the influence of developments in physics on this evolution in philosophical theorizing (and vice versa).

**STV 20421. Writing Speculative Fiction**  
(3-0-3) Mickle

*Corequisite:* STV 27999

A creative-fiction writing course for students interested in writing speculative (historical, fantastical, or scientific) fiction.

### STV 20431. Philosophy and Cosmology: A Revolution

(3-0-3)

*Corequisite:* STV 27999

In the 17th century, there was a revolution in our view of the cosmos and of our own place in it. Most vivid, perhaps, was the change from believing that the Earth is at the center of everything to believing that the Earth is just one planet among many orbiting the sun. This course will consider how and why these changes took place.

### STV 20435. The Ethics of Energy Conservation

(3-0-3)

This is a joint theology and engineering course exploring the ethics of energy conservation by using the method of community-based learning. Students will begin by using the university campus as a "trial laboratory" for measuring energy efficiency and thinking creatively about possible energy-conservation measures. We will then ask them to conduct a limited energy efficiency and conservation study for selected nonprofit organizations in the South Bend community. This course will fulfill a number of civic learning goals, including the cultivation of theological and scientific competence in environmental ethics; the identification of leadership skills necessary to address the concrete concerns facing nonprofit organizations as they strive to meet pressing human needs in an environmentally sound manner; and formation of consciences sensitive to the social responsibility of caring for the environment.

### STV 20441. Environmental Studies

(3-0-3)

This course investigates the relationship between the built environment and the natural environment. Lectures, readings, and exercises explore the ethical and professional responsibilities of the architect relative to ongoing environmental issues. Topics include a survey of the effects of the built environment on natural systems, a survey of evolving environmental studies, and design issues with the focus on in-site planning, landscape design, and passive energy measures for architecture.

### STV 20452. Ethics, Ecology, Economics, and Energy

(3-0-3)

A critical examination of the following hypotheses: (1) that continuing economic growth requires ever-increasing consumption of energy, (2) that increasing energy consumption results in increasing degradation of the biosphere, and (3) that increasing degradation of the biosphere poses an increasing threat to human existence.

### STV 20461. Nuclear Warfare

(3-0-3)

*Corequisite:* STV 27999

Nuclear phenomena; nuclear fission and fusion. Nuclear weapons. Effects of blast, shock, thermal radiation, prompt and delayed nuclear radiation. Fire, fallout, ozone-layer depletion, electromagnetic pulse, "nuclear winter." Medical consequences, physical damage, effects on the individual and on society. Defensive measures and their feasibility. Scenarios for war and peace, proliferation of nuclear weapons material, recent diplomatic history. US Bishops' Pastoral Letter. The course is open to all students and counts for science majors as a general elective credit.

### STV 20555. Science and Technology in Philosophical Perspective

(3-0-3)

This course examines the mutual relations between science and technology and the complex ways they interact. The more abstract philosophical issues will be examined through examples and case studies. Several narratives about scientists and their research will be read and a number of ongoing disputes concerning technological systems such as biotechnology, transportation, and city/town planning.

### STV 20556. Science, Technology, and Society

(3-0-3) Hamlin

*Corequisite:* STV 22556, STV 27999

This course introduces the interdisciplinary field of science and technology studies. Our concern will be with science and technology (including medicine) as social and historical; i.e., as human, phenomena. We shall examine the divergent roots of contemporary science and technology, and the similarities and (sometimes surprising) differences in their methods and goals. The central theme of the course will be the ways in which science and technology interact with other aspects of society, including the effects of technical and theoretical innovation in bringing about social change, and the social shaping of science and technology themselves by cultural, economic, and political forces. Because science/society interactions so frequently lead to public controversy and conflict, we shall also explore what resources are available to mediate such conflicts in an avowedly democratic society.

### STV 22245. Medical Ethics: Discussion

(0-0-0)

*Corequisite:* STV 20245, STV 27999

The corequisite discussion course for STV 20245.

### STV 22556. Science, Technology, and Society Discussion

(0-0-0)

*Corequisite:* STV 27999

This course introduces the interdisciplinary field of science and technology studies. Our concern will be with science and technology (including medicine) as social and historical; i.e., as human, phenomena. We shall examine the divergent roots of contemporary science and technology, and the similarities and (sometimes surprising) differences in their methods and goals. The central theme of the course will be the ways in which science and technology interact with other aspects of society, including the effects of technical and theoretical innovation in bringing about social change, and the social shaping of science and technology themselves by cultural, economic, and political forces. Because science/society interactions so frequently lead to public controversy and conflict, we shall also explore what resources are available to mediate such conflicts in an avowedly democratic society.

### STV 27999. STV Minor Gateway Course

(0-0-0)

This course is used as a corequisite for administrative purposes so that students in the Science, Technology, and Values minor program will be able to Web-register for other STV courses.

### STV 30110. Health, Healing, and Culture

(3-0-3)

This course introduces the field of medical anthropology, which examines beliefs, practices, and experiences of illness, health, and healing from a cross-cultural perspective. This course will consider the ways in which medical anthropology has historically been influenced by debates within the discipline of anthropology, as well as by broader social and political movements. Particular emphasis will be placed on the importance of viewing biomedicine as one among many culturally constructed systems of medicine.

### STV 30113. Classical Origins of Medical Terminology

(3-0-3)

Scientists have long recognized that considerable learning in science is based on education in vocabulary. More than 95 percent of medical technical terminology is drawn from Greek and Latin. This complex terminology satisfies a need for precise words to facilitate the exchange of ideas and arose because people of learning employed the classical languages for their concepts and descriptions well into the 19th century. To the modern student without Greek and Latin, terms like hemiballismus, encephalomalacia, and chistosternia are indecipherable. This course will introduce the student to the elements of Greek and Latin sufficient to dissect and decode even the most unusual terms. It will focus on the basic roots, suffixes, and prefixes, but also place them within the intellectual context of ancient and modern medical theories so that the student will come away from the course with some sense of the history of medicine and its language. Lectures on mythical figures will also illuminate the origin of certain bioscientific terms: the extremely poisonous alkaloid atropine, for example, derives its name from Atropos, one of the three

sisters of fate who measure out a person's life. Anatomic models and charts will be employed as well as slides examining a wide range of pathologies.

### STV 30132. US Environmental History

(3-0-3) Coleman

*Corequisite:* STV 27999

This course is an introduction to the new field of environmental history. While many people think "the environment" suddenly became important with the first "Earth Day" in 1970 (or a few years earlier), environmental issues have, in fact, long been of central importance. In recent decades, historians have begun actively to explore the past sensibilities of various groups toward the quality of their air, water, and land; the passionate discussions of philosophers, theologians, and social and natural scientists about resource use, the safety of the environment, and long-term prospects for humanity; and the customs, laws, and managerial systems that guided use of the environment. Historians have also increasingly paid attention to the ways environmental factors have affected the course of history: the effects of the distribution of water, foodstuffs, wood, minerals, and of changes in climate or endemic disease. This course will range widely—in methodology, from the history of ideas to paleoclimatology; geographically, from the ancient Near East to modern America; and topically, from wood-cutting rights in medieval France to the rise of the organic farming movement and water-allocation laws in the 20th-century American West. Lecture/discussion format.

### STV 30138. Science and Medicine in Ireland: 1600–1900

(3-0-3)

*Corequisite:* STV 27999

This course surveys the history of science and medicine in Ireland from the 17th to the 19th centuries. The course will consider the role of science and medicine in Irish social and political life, and will offer a fresh dimension to the cultural and intellectual history of Ireland. Lectures will situate scientists and doctors within their historical contexts, showing how intellectual history intersects with political history. Topics will include science as an instrument of colonialism in Cromwellian Ireland, the scientific satires of Jonathan Swift, the role of the medical community during the Great Famine, women in Irish science, and the role of science in the Cultural Revival. Note that no scientific knowledge is assumed or required.

### STV 30142. History of Ancient Medicine

(3-0-3) Ladouceur

This course will trace the development of ancient medicine from the Neolithic period down to the second century after Christ. The emphasis will be on three cultures: Egyptian, Greek, and Roman. How historians use the three main categories of evidence (written documents, human remains, and artistic representations) will be clearly illustrated.

### STV 30146. History of Communication Technologies

(3-0-3)

A history of the survival and destruction of books, from Alexandria to the Internet. Our understanding of historical events is based primarily on written evidence. But have you ever stopped to consider how these documents were made, how they were preserved, and how it is that we possess them now? This course questions how we "know" anything about the past by examining the transmission of written sources through time. We will survey the different ways that people have recorded their histories (in stone, on papyrus scrolls, in handwritten and printed books, on websites) and how their choices have affected the way we now understand the past. We will also consider how libraries have helped to create and shape "knowledge" through their accumulation and preservation of these sources.

### STV 30149. Environmental Philosophy

(3-0-3) Sayre

A philosophically integrated examination of current environmental issues drawing on familiar literature from ecology, economics, and ethics, as well as recent fiction.

### STV 30152. History of Western Medicine

(3-0-3)

This course introduces students to the history of Western medicine from the pre-Socratics to penicillin; it concludes by applying that history to modern

medical questions, including professional identities, emerging diseases, and genetic manipulations. Major themes/topics include changing disease concepts, medical education, medical practitioners, "scientific" medicine, therapeutics, hospitals, and the body; sub-themes include women and medicine, race and medicine, and the patient. Class periods will be divided between lectures and seminars, the latter relying largely on discussions of primary source readings. Students will be encouraged to explore their own particular interests in a research paper.

### STV 30153. Madness and Us: A History of Psychiatry from the End of the Eighteenth Century Through the Present

(3-0-3) Merie

*Corequisite:* STV 27999

The course is a thematic overview of the history of psychiatry from its inception at the end of the 18th century to the present day. It raises issues concerning: the nature of the self and its relationship with social compulsion and state power; the connection between body and mind; the nature of disease and illness; the relations between the individual and the expert; and the position of marginal groups (women, colonial subjects, homosexuals, etc.) vis-à-vis social norms and authority.

### STV 30154. Gender and Science

(3-0-3)

An exploration of the ways in which science is gendered, starting with the ways in which women have been excluded from science, and moving through such issues as the invisibility and shabby treatment of women with the products of scientific research; the contributions of women to science, and whether these are different in kind from the contributions of men; and the differential effects of science on men's and women's lives.

### STV 30155. History of Photography from the 1830s to World War I

(3-0-3) Moriarty

*Corequisite:* STV 27999

This class examines the evolution of photography from its earliest days to the birth of modernism. Topics to be considered include the invention of the medium, the evolution of photography in the 1850s in France and in Victorian England, and travel photography. In the United States, attention will be paid to the photography of the Civil War, the Western exploratory expeditions, and the rise of the documentary mode. New acquisitions by the Snite Museum will complement a brief survey of Asian and Latin American 19th-century photographs. Finally, the course will examine the international rise and fall of pictorialism, and the beginnings of the snapshot. Regular visits to view original images from each period will take advantage of the Snite Museum's extensive holdings of photographs from the various periods studied.

### STV 30157. Introduction to the Philosophy of Biology

(3-0-3)

An examination of key concepts and controversies in contemporary biology. The meaning of gene, organism, and environment and their interrelationships in the context of development, evolutionary theory, and ecology are closely considered.

### STV 30175. Environmental History

(3-0-3)

This course is an introduction to the new field of environmental history. In recent decades, historians have begun to actively explore the past sensibilities of various groups toward the quality of their air, water, and land; the passionate discussions of philosophers, theologians, and social and natural scientists about resource use, the safety of the environment, and long-term prospects for humanity; and the customs, laws, and managerial systems that guided use of the environment. Historians have also increasingly paid attention to the ways environmental factors have affected the course of history: the effects of the distribution of water, wood, and minerals, and of changes in climate or endemic disease. This course ranges widely—in methodology, from the history of ideas to paleoclimatology; geographically, from the ancient Near East to modern America; and topically, from wood-cutting rights in medieval France to the rise of the organic farming movement and water-allocation laws in the 20th-century American West.

**STV 30181. Science and Medicine in the Islamic World: 700–1500**  
(3-0-3)

This course traces the major trends in the history of Islamic science and medicine from the rise of Islam to the early modern period. By examining the conceptual developments in the practice of science, and its position within Islamic societies, it seeks to assess the merits of the various accounts for the inception and subsequent fate of the Islamic scientific enterprise. In particular, we will re-evaluate the standard periodization that posits a linear development of Islamic sciences starting with translation and assimilation of the Persian, Indian, and Greek scientific legacies; then, a period of original contributions; and, finally, the transmission of Islamic sciences to Europe.

**STV 30189. Philosophical Issues in Physics**

(3-0-3) Bland

*Corequisite:* STV 27999

This course is intended for non-science students who desire to begin an examination of the origins of the modern laws of physics and for science students who wish to know the actual route to the discovery and the broader implications of the formal theories with which they are already familiar. The historical background to and philosophical questions associated with major laws of physics will be discussed, in large measure, by examining directly relevant excerpts from the writings of some of the creators of seminal concepts and theories in physics. The latter part of the course will concentrate on historical and philosophical issues related to relativity and especially to quantum theory and its interpretation.

**STV 30201. Introduction to Clinical Ethics**

(3-0-3)

The focus of the course will be an examination of the advances in medicine over the last 30 years that have challenged traditional values and ethical norms, and the institutional processes and procedures in place that facilitate decision making in the health care setting. It will include a sketch of the most recent advances in the various fields of medicine, followed by an examination of the clinical and ethical questions they raise and how they have affected the physician-patient relationship. Note: This course counts as a general elective. Fall and spring.

**STV 30311. Introduction to the American Health Care System**

(3-0-3) Navari

*Corequisite:* STV 27999

The course will begin with a short history of the American health care system and will be followed by a discussion of the major components of the system (patients, providers, payers), health insurance coverage, managed care programs, the movement for quality health care, physicians in the changing medical marketplace, health care expenditures, and academic medical centers.

**STV 30382. Technology of War and Peace**

(3-0-3)

This course surveys the impact of military technologies on world history. Topics include the rise of gunpowder weaponry and the fortification revolution in the early modern period, navalism, particularly in the 19th century, the role of military technologies in European colonial expansion, and the science-based military of the 20th century, leading up to the age of nuclear weapons. The course considers also military technologies as deterrents, and issues of war and peace as stimuli to technological development.

**STV 30445. Technologies and Shaping of America**

(3-0-3)

This course assumes a basic knowledge of American history, and offers a social history of the ways Americans have woven technologies into everyday life. Focusing primarily on the 19th and 20th centuries, it will show how shifts in technological systems are inextricably linked to changes in class relations, national identity, patterns of consumption, and definitions of the self, including race and gender. The short survey text will be Carroll Pursell, *The Machine in America* (Johns Hopkins University Press), supplemented by primary sources and case studies, such as David E. Nye, *Electrifying America* (MIT Press). Visual materials will be emphasized in class, including paintings, photography, maps, and film.

**STV 30476. Place, Environment, and Society in Australia and Melanesia**

(3-0-3)

Aboriginal Australian and Melanesian approaches to place have long intrigued and puzzled outsiders, challenging commonly held assumptions about the division between nature and culture or between human societies and their physical environments. This course introduces students to some of these exotic approaches to place and encourages them to see their own environment in a new way. It also considers how indigenous Melanesian and Australian conceptualizations of place are being transformed through engagement with a global capitalist economy and in the context of modern nation-states. How do notions of place change when land becomes a commodity? How are shifting connections to place transformed into legal ownership? What happens when kin networks are divided by national boundaries? Students will read several ethnographic monographs that convey a holistic sense of social life in particular locales. Topics that may be of particular interest include mythic and ritual relationships to the land, connections between language, place, and cultural identity, the ways that modern states enforce geographic boundaries, legal battles for land rights, and the relationship between global environmentalism and indigenous people.

**STV 33195. Technology and Social Change**

(3-0-3)

This class examines how technology has often served as the catalyst for social change for hundreds (indeed, thousands) of years (and vice versa). The course will be divided into several sections, some of which will trace from a historical perspective the social impact of specific technologies. Other course sections will examine technology and social change in specific contexts (e.g., the medical and communication contexts). The first portion of the class will be devoted to some of the basic issues in our collective understanding of technology and social change. Issues such as de-skilling of workers, institutionalization of technology into society, and innovation will be examined, as will various approaches to understanding technology, such as the social construction of technology and technological determinism.

**STV 33370. Economics of Science**

(3-0-3) Mirowski

*Corequisite:* STV 27999

This course describes the changing history of the organization and subsidy of scientific research, then surveys the different methods of economic theories and applied scientific process.

**STV 33401. Animal Welfare and the Human-Animal Bond: Community-Based Learning Seminar**

(1-0-1) Whaley

*Corequisite:* STV 27999

Consider the fact that in six short years, one female dog and her offspring can give birth to 67,000 puppies. In seven years, one cat and her young can produce 420,000 kittens. Three to four million dogs and cats are euthanized each year. It is estimated that there are 60 million feral cats in the US. In a society that considers pets as part of their family, watches *Animal Planet*, and spends millions of dollars on pet products, it is imperative that we acknowledge and educate ourselves on the issues of overpopulation of pet animals in our society. What is our responsibility to these animals, and how can we solve these pressing problems? The focus of this course will be on animal behavior from an evolutionary perspective. The students will learn to recognize both desirable and undesirable behaviors in pet animals. They will learn how to use evolutionary behavior training methods to alter detrimental behaviors and reinforce those that are advantageous. This course will also cover animal welfare issues, and will intimately and meaningfully connect the state of humans to that of animals. The students will carry out community-research projects of their choice and will immerse themselves in an important issue and generate a product that can help the plight of animals (and therefore humans) in our community.

**STV 40113. Computer as Social Phenomenon**

(3-0-3)

This course takes the perspective of “science studies” and applies it to issues that do not fit easily into either computer science or economics. These include: Does the computer have a well-defined existence? How has the computer influenced our theories of human nature? Is the “new information economy” a real phenomenon? It also deals with some emerging issues in Internet commerce.

### **STV 40118. Witchcraft and the Occult**

(3-0-3)

The histories of witches, witchcraft, and the occult sciences fascinate and challenge historians. This course explores these related histories and seeks to develop a historically sensitive understanding of them. Modern science has banished much of the belief in witchcraft, magic, spirits, and the various occult sciences. Historians often trace the triumph of science over the forces of superstition back to the High Renaissance and the scientific revolution of the 16th and 17th centuries. It was, however, precisely this period that witnessed some of the most fervent persecution of witches and eager pursuit of the occult sciences and forms of divination. The numbers of witches executed was not as great as commonly thought, but the notoriety of some cases and the widespread use of the concept “witch” as a derogatory category considerably shaped the definition of womanhood and female. In the sciences, people such as Kepler, Galileo, and Newton were as interested in transmuting metals and casting horoscopes as they were in developing the sciences of astronomy and physics. Moreover, alchemy, astrology, black magic, and natural magic all occupied important places in the political and social world of the 16th and 17th centuries. Although the powers and efficacy attributed to witchcraft, witches, and the occult sciences varied widely, scarcely anyone rejected them. By combining a close reading of primary sources—ranging from texts to trial records to paintings and literature—with secondary sources, we will confront the challenges these activities pose for our understanding of the past and, indeed, the present.

### **STV 40119. Monsters, Cyborgs, and Other Created Bodies**

(3-0-3)

A critical analysis of monsters, cyborgs, and other “created bodies” in literature.

### **STV 40121. Human Diversity**

(3-0-3)

*Corequisite:* STV 27999

Issues concerning the nature of human diversity (race, intelligence, sex, gender, etc.) are a continuing source of social and scientific debate. This course is designed to present the issues and methods used by physical anthropologists to study both the biological basis of human differences, as well as the ongoing process of human adaptation and evolution in response to climate, nutrition, and disease. Integration of the social, biological, and medical sciences will be employed to investigate modern human variation.

### **STV 40122. Methods in Medical Anthropology**

(3-0-3)

*Corequisite:* STV 27999

This class will provide extensive classroom and hands-on training in research methods for medical anthropology. It will place slightly greater emphasis on qualitative methods, such as participant observation and interviewing, but will provide an overview of quantitative methods (including building surveys and some basic statistical analysis). Students will learn by doing, conducting original research on contemporary health issues in the local community (such as HIV/AIDS and substance abuse).

### **STV 40125. Gender and Health**

(3-0-3) Smith

This course looks at the intersection of gender, health policy, and health care organization around the world. Some of the issues to be discussed include: medicalization of the female body; critical medical anthropology; the politics of reproduction; social production of illness and healing; politics, poverty, and health; and national and international health and development policies.

### **STV 40126. Philosophy of Cognitive Science**

(3-0-3)

*Corequisite:* STV 27999

In this course, we will explore three main topics: philosophical foundations of cognitive science, philosophical critiques of contemporary cognitive science, and the implications of cognitive research for traditional philosophical issues. The first part of the course will examine the ways in which certain philosophical theories about the mind provide support for the basic assumptions of cognitive science, while others have challenged these assumptions. In the second part, we will look at specific ways empirical work in psychology is thought to be relevant to issues in philosophy of mind, epistemology, philosophy of science, and other areas of philosophical inquiry. Questions to be addressed will include the following: Is it possible for a computer to be conscious? Are we born with certain kinds of knowledge? To what extent are humans rational creatures? What is the relevance of neuroscience to psychology, and vice versa?

### **STV 40130. Crime, Heredity, Insanity in the US**

(3-0-3)

The 19th century witnessed a transformation in the understanding of the origins of criminal behavior in the United States. For many, a religious emphasis on humankind as sinful gave way to a belief in its inherent goodness. But if humans were naturally good, how could their evil actions be explained? Drawing on studies done here and abroad, American doctors, preachers, and lawyers debated whether environment, heredity, or free will determined the actions of the criminal. By the early 20th century, lawyers and doctors had largely succeeded in medicalizing criminality. Psychiatrists treated criminals as patients; judges invoked hereditary eugenics in sentencing criminals. Science, not sin, had apparently become the preferred mode of explanation for the origins of crime. But was this a better explanation than what had come before? Discussion will be the primary form of instruction.

### **STV 40135. Philosophy of Science**

(3-0-3)

Does science represent a distinct way of knowing, set apart from other forms of knowledge by the security and universality of its claims? What is the basis of scientific knowledge? What are its methods? What are its scope and limits? This course will provide a survey of the major concepts and issues examined in contemporary philosophy of science, including explanation, confirmation, the role of convention in science, and the realism/instrumentalism debate. The emphasis will be on the way these issues have been treated in the mainstream analytic tradition during the 20th century, but we will also look at challenges to that tradition deriving from such sources as Thomas Kuhn’s historicist approach to the philosophy of science, social constructivism, and feminist philosophy of science.

### **STV 40140. Science and Social Values**

(3-0-3)

A consideration of such questions as: Should science be value-free, or should it be shaped by the needs and ideals of the society that supports it? If the former, how can scientists shaped by society contribute to it, and what claim to the resources of the society can scientists legitimately make? If the latter, how can scientists still claim to be objective?

### **STV 40144. Religion and Science**

(3-0-3)

An examination of the nature and limits of both scientific and religious knowledge, and a discussion of several cases in which science and religion seem to either challenge or support one another.

### **STV 40147. History/Design Forms, Values, and Technology**

(3-0-3)

This course will provide a historical perspective on the development of industrial, product, and graphic design in the 19th and 20th centuries. More than the aesthetic styling of products, design mediates the intersection of technology and cultural values in the modern era. The role of the modern designer as both a facilitator and a critic of industrial technology will be examined.

### **STV 40151. Psychology and Medicine**

(3-0-3) White

This course has two basic objectives. First, it examines from a lifespan and psychobiological perspective the factors that place individuals at different stages of life at risk for illness and assist them in maintaining their health. In addition, it addresses a variety of challenging psychological and social issues that physicians and other health care professionals must face in the practice of medicine. The course covers a range of topics dealing with health issues related to different stages of human development (childhood, adolescence, and adulthood), disabled populations, culture and gender, stress, physician-patient interactions, death and dying, professional ethics, and social policies relating to health care. The course is primarily intended for students intending to enter medical school. Most classes will involve brief formal presentations by the instructors and invited guests, followed by discussion of assigned readings pertinent to the day's topic. In addition, students will be exposed, through a limited practicum, to a variety of medical settings.

#### **STV 40152. History of Medicine to 1700**

(3-0-3)

The course surveys the history of Western biomedical ideas, research, and health care practices from its ancient Mediterranean and Middle Eastern foundations to the medical reforms and materialistic theories of the mid-18th century. The canonical approach emphasizes the growth of rational medicine, focusing on the development of medical epistemology and method, but also considers how medicine as it has been practiced in the West reflected classical theory, embraced folk beliefs and treatments, and integrated the therapeutic and doctrinal knowledge of Medieval Islam. Medical thought and practice was shaped by the intellectual, social, and religious changes that shook Europe in the late Middle Ages and early modern period, resulting in a profound transformation of natural philosophy and efforts to reform society during the scientific revolution and nascent Enlightenment. Many of the basic elements of modern medical ethics, research methodology, and the criteria for sound scientific thinking that first emerged in late classical Greek thought were refined during this period, and much of the diversity of healing paradigms in American and European national cultures today, as well as many of the reactions of Western medical authorities to non-Western ideas and practices, can be understood if viewed in the context of antecedent medical principles.

#### **STV 40153. Visits to Bedlam**

(3-0-3) Fox

*Corequisite:* STV 27999

Literary, medical, and social views of madness in the 18th century.

#### **STV 40154. Cultural Aspects of Clinical Medicine**

(3-1-4) Wolosin

*Corequisite:* STV 27999

The course examines popular medical concepts and expectations patients bring with them to the clinical or hospital setting, as well as the attitudes, organization, and goals of the clinical medical care. Students divide their time between classroom and service as patient/family liaisons in an area emergency room. Student access to a car is necessary.

#### **STV 40155. Christ and Prometheus: Evaluation/Technology**

(3-0-3)

The history of technology in Western culture has been influenced in complex ways by religious and theological conceptions. These include understandings of what it means to be created in the image and likeness of God, the value of intra-mundane work in a world marred by sin and thus passing away, and understandings of sin as prideful self-assertion (the sin of Prometheus). For many, technology has represented the primordial temptation, "you shall be like gods." For others, technology has been a privileged way for human beings to fulfill the mandate to flourish and subdue creation, and even to cooperate with the divine work of redeeming humankind by restoring through our technological prowess the broken image and likeness in humanity. This course will examine the diverse historical connections between the rise of technology in Western Christian societies and Christian religious self-understanding, reading from figures such as St. Augustine and Francis Bacon. We will also consider two divergent modern evaluations of the theological significance of our contemporary technological society: that of Pierre Teilhard de Chardin, and that of Jacques Ellul.

#### **STV 40157. Philosophy of Biology**

(3-0-3)

*Corequisite:* STV 27999

An examination of key concepts and controversies in contemporary biology. The meaning of gene, organism, and environment and their interrelationships in the context of development, evolutionary theory, and ecology are closely considered.

#### **STV 40166. History of Modern Astronomy**

(3-0-3)

The course traces the development of astronomy and cosmology from the late 17th century to the 1930s. Attention is given to the interactions of astronomy with other areas of science and with philosophical, religious, and social factors.

#### **STV 40167. Global Food Systems**

(3-0-3)

This is a course on food in society. The role food plays in the life course of a society may seem self-evident or commonplace to some. Yet food is more than the physical substances that sustain life. Food is intertwined with religion and central to many rites and rituals. Food is linked to medicine, which was largely based on dietary principles until well into the 18th century. Technology related to production of food has affected the inequalities found in all societies. The politics of food plays a major role in understanding the "social issues" affecting many nations around the globe. This is a fascinating area of study: that which we take for granted so much of the time is intertwined with economics, politics, psychology, social life, and law.

#### **STV 40172. History of Chinese Medicine**

(3-0-3)

In light of the contemporary currency of certain Chinese practices in the field of alternative medicine, this course will explore the phenomenon of Chinese traditional medicine in both its historical and contemporary settings. The first unit, *Medicine in Ancient China*, will explore the earliest medical ideas of the Chinese and will demonstrate how the state's political unification gave rise to a correlative cosmology that not only included Heaven and Earth, but also human beings as integral elements of an organic cosmos. The second unit will explore the influences and contributions of Taoism (Daoism) and Buddhism to Chinese medicine and will explore what it meant to be both physicians and patients in late imperial China. The third unit will focus on medicine in contemporary China and will feature the experiences of Elisabeth Hsu, a student of Chinese medical anthropology who, as a part of her doctoral research, enrolled as a student in Yunnan Traditional Chinese Medical College between September 1988 and December 1989. We will conclude the course with a brief examination of the influence of Chinese medicine on the contemporary world.

#### **STV 40174. Philosophy and Psychiatry in the Twentieth Century**

(3-0-3)

The course deals with (1) the intellectual history of psychiatry from the time of Freud and Kraepelin to the present, (2) the social history of the care of the mentally ill since World War II, and (3) the interpretation and critique of Freud and psychiatry.

#### **STV 40181. Philosophy of Human Biology**

(3-0-3)

The course examines central issues in the philosophy of science from the perspective of the life sciences with particular emphasis on topics in evolution theory and sociobiology and upon the topic of intertheoretical integration in the life sciences (from organic chemistry to cognitive neuroscience). Topics to be covered include: teleology, reductionism and supervenience, the biological basis of cognition, explanation, scientific realism, theory change, and the critical appraisal of alternate research strategies.

#### **STV 40186. Medicine and Public Health in US History**

(3-0-3)

An exploration of themes in European and American medicine. This course integrates the perspectives and issues of social history—who were the medical practitioners, who were their patients, what relations existed between these groups,

how have the realities of illness and death figured in the lives of ordinary people in different places and times—with the perspectives and issues of the history of medicine as a science: What understandings of the human body and its ills have practitioners had, what tools have they developed and used for intervening in illnesses? Topics include the humoral pathology, epidemics as social crises, the rise of pathological anatomy, the germ theory and public health, the transformation of the hospital, the history of nursing, changing modes of health care, finance and administration, and relations between “regular” doctors and sectarian medical traditions such as homeopathy and osteopathy.

### **STV 40187. Technology in History**

(3-0-3)

A thematic survey of the history of technology, from the Neolithic discovery of agriculture to the information age. Topics include the chemistry and metallurgy of antiquity (high-tech ca. 1000 BC), technology in Christian theology; the power revolution of 1200; arms races from the 15th century onward; the marriage of art and science; the industrial, agricultural, transport, and communications revolutions; the American system of manufactures; the evolution of the engineering profession; and modern efforts to plan the technological future. These topics form the basis for exploring the following themes: How does technology change? How did we get where we are—do we have the technology now that we must have, should have, or need to have? What guides technical creativity? How have social effects of technologies been assessed and dealt with? How have technologies fundamentally changed ordinary life and societal organization?

### **STV 40203. Theology of Medicine**

(3-0-3)

An examination of moral problems in medicine in the context of key theological themes; e.g., creation, providence, the nature of Christian personhood, suffering and redemption, freedom, and grace. Various normative problems will be explored e.g., physician-assisted suicide, artificial reproduction, and access to health care.

### **STV 40216. Biomedical Ethics and Public Health Risk**

(3-0-3) Shrader-Frechette

*Corequisite:* STV 27999

An analysis of the ethical theories provided by contemporary philosophers to guide research and practice in biomedicine. The course will focus on analysis of contemporary public health problems created by environmental/technological pollution, and will address classic cases of biomedical ethics problems. Students who are not premed, engineering, or science majors need the professor's permission to take this course.

### **STV 40275. Ethical and Professional Issues in Computer Science and Engineering**

(3-0-3) Bowyer

*Corequisite:* STV 27999

This course seeks to develop a solid foundation for reasoning about the difficult ethical, professional, and social controversies that arise in the computing field. Emphasis is placed on identifying the appropriate legal and professional context and applying sound critical thinking skills in the analysis of a problem. The course relies heavily on analysis of real-life case studies, both historical and current. Topics covered include professional codes of ethics, privacy issues, freedom-of-speech issues, computer security, safety-critical systems, whistle-blowing scenarios, intellectual property issues in computing technology, and social transformation driven by computing technology.

### **STV 40319. Self, Society, and Environment**

(3-0-3) Weigert

*Corequisite:* STV 27999

This course introduces students to social psychological aspects of the natural environment. Issues considered include interacting with different environments, symbolic transformations of environments, competing accounts, and claims concerning environments. With an overview of basic information, these issues are discussed from the perspectives of individual self and sociocultural institutions. The course touches on alternative ways of envisioning, interacting, and valuing human-environment relations with an eye toward individual and collective change.

### **STV 40357. Computer Ethics and Public Policy**

(3-0-3)

The profound impact computer technology has on society is difficult to overstate; it has changed the nature of our interactions in the social, economic, and political realms, and will continue to do so. These changes often raise important ethical questions about personal and professional responsibility, intellectual property, personal privacy, crime, and security. They also raise questions about the changing relationships between individuals and institutions (i.e., private-sector corporations and public-sector agencies). This course examines these trends and changing relationships, and the ethical issues that are faced by computer professionals, policymakers, and computer users in trying to grapple with them.

### **STV 40360. Science and Environmental Policy in the United States**

(3-0-3) Vande Wall

*Corequisite:* STV 27999

This class will meet in a seminar format. We'll examine the history of US scientific and environmental policy from 1850 to the present day. Particular attention will be paid to what kinds of research are funded by the federal government in each period and how this reflects the changing concerns of the populace. We also examine the role of both the executive and legislative branches of government in supporting science and identify interest groups that have been influential in shaping science policy. Attending a conference on “The Commerce and Politics of Science,” being held at Notre Dame this fall, will be required of students in this course. This will introduce students to two central concerns: First, how do commercial and political interests shape scientific inquiry, knowledge, and practice, both now and in the past? Second, is it possible to say that one or another economic or political context is favorable or unfavorable to science or more likely or less likely to produce “good science”? The final portion of the course will be devoted to case studies in current scientific and environmental policy. Students will be required to research the development of a particular policy—stem cell research, the Clean Air Act, the space station—and present to the class and analysis of both the history of the policy and an evaluation of its impact on public life.

### **STV 40401. The Future of Energy**

(3-0-3)

This three-credit course provides a comprehensive treatment of the role of energy in society and may be taken concurrently by engineering and non-engineering students. It proceeds along two parallel tracks, one dealing with the scientific/technical foundations of energy utilization and the other with its economic, political, environmental, and ethical implications. Scientific/technical issues will be treated at a level that is appropriate for non-engineers and at the same time beneficial to both engineers and non-engineers. The required background in mathematics is largely confined to high school algebra, with occasional use of elementary concepts from differential and integral calculus.

### **STV 40402. Wireless Communications: The Technology and Impact of 24/7 Connectivity**

(3-0-3)

This survey-style course offers an opportunity to gain a basic understanding of the technical, regulatory, and business aspects of the wireless revolution and its impact on society. It is intended for both engineering and non-engineering students. The course will include such topics as the representation, transmission, and reception of information in electrical form, the physical properties of radio signals and other wireless media, the principles and challenges of sharing a common medium, and privacy and security issues, as well as the social and commercial implications of wireless communications.

### **STV 40403. Nanotechnology: Opportunities and Challenges**

(3-0-3)

*Corequisite:* STV 27999

This course will provide a comprehensive introduction to the emerging fields of nano science and nano engineering, with an emphasis on the main ideas and concepts. Through directed readings and discussion, students will study the scientific underpinnings, and explore the societal impact and ethical implications of nanotechnology. They will also explore the potential for nanotechnology to impact a wealth of innovative applications across a vast array of fields including

health care, environment, biotechnology, energy and food production, information technologies, and aerospace.

#### **STV 40420. Information Security**

(3-0-3)

This course provides the students with a working knowledge of information security topics through a focus on best practices, applications and implementation strategies. Students will learn the fundamental principles of information security and explore contemporary topics in the field, including access control methodologies, business continuity/disaster recovery planning, fire walls, network security, operating system security, intrusion detection, cryptography and incident handling.

#### **STV 40424. Technology and Development in History**

(3-0-3)

Technologies are often seen as either the product of human genius and achievement, or as an alienating, inhuman, and sometimes destructive force. Both perspectives argue that technological change has been one of the most important forces shaping world history over recent centuries. This course examines technological developments and theories of technological change in world history. It focuses on the relationship between new technologies, social change, and economic development since 1750, surveying cases from Britain, the United States, China, Japan, and Latin America. We will pay special attention to technology transfers: the movement of new machines and processes and knowledge from one society to another, and the ways that social, cultural, and political forces have shaped technological change in different parts of the world.

#### **STV 40434. Human Diversity**

(3-0-3)

Issues concerning the nature of human diversity (race, intelligence, sex, gender, etc.) are a continuing source of social and scientific debate. This course is designed to present the issues and methods used by physical anthropologists to study both the biological basis of human differences, as well as the ongoing process of human adaptation and evolution in response to climate, nutrition, and disease. Integration of the social, biological, and medical sciences will be employed to investigate modern human variation.

#### **STV 40435. Methods in Medical Anthropology**

(3-0-3)

This class will provide extensive classroom and hands-on training in research methods for medical anthropology. It will place slightly greater emphasis on qualitative methods, such as participant observation and interviewing, but will provide an overview of quantitative methods (including building surveys and some basic statistical analysis). Students will learn by doing, conducting original research on contemporary health issues in the local community (such as HIV/AIDS and substance abuse).

#### **STV 40498. Energy and Climate**

(3-0-3) McCready

*Corequisite:* STV 27999

This course integrates the principles of physical sciences and engineering as they pertain to energy, its sources and uses, and the impact of these on the environment. The great majority of energy used by society comes from fossil fuels. The consequences are that carbon dioxide levels in the atmosphere have been increasing and that readily available sources of oil have been depleted. Prospects for sustainable energy use will be discussed including an engineering cost/benefit analysis of different sources. A question that will be examined in particular detail, is the effect of energy use on climate change both now and in the future. To do this, we will analyze the complex couplings and feedback mechanisms that operate between the geosphere, the biosphere, the atmosphere, and the hydrosphere as related to global climate change.

#### **STV 43131. Philosophy of the Human Sciences**

(3-0-3)

An inquiry into the central forms of explanation employed in the social sciences: rational choice, intentional, functional, structural, and interpretive. One emphasis

will be on understanding the ways in which these approaches conform to or differ from explanatory strategies in the natural sciences. A second emphasis will be on the microfoundations of social theory: What assumptions about human nature and social life are presupposed in adopting a particular explanatory strategy?

#### **STV 43134. Addiction: Science and Values**

(3-0-3)

Students will be introduced to topics in the ethics of care for the indigent; to alternative therapies for recovery and maintenance; and to current brain models of addiction. They will be placed as volunteers (for 14 weeks) with institutions serving indigent recovering addicts in St. Joseph and Elkhart counties.

#### **STV 43136. Nature in America**

(3-0-3)

A seminar designed to explore the concept of nature in the American historical and contemporary experience within an interdisciplinary context of art, history, literature, and ecology. In addition to weekly reading discussions, the seminar will meet, on a number of occasions, at several "nature" sights: Morris Conservatory and Muessel-Ellison Tropical Gardens; Potawatomi Zoo, Elkhart Environmental Center; Shiojiri Niwa Japanese Garden; Fernwood Botanical Garden and Nature Preserve; and the University of Notre Dame Grene-Nieuwland Herbarium. Purpose: To study nature in American art (painting, photography, sculpture), seminar meetings will be held at the Snite Museum of Art, South Bend Regional Museum of Art, South Bend Regional Museum of Art, and the Midwest Museum of American Art.

#### **STV 43169. The Darwinian Revolution**

(3-0-3)

A combined historical and philosophical approach to the revolution created by the work of Charles Darwin. The course deals with the origins of Darwinism; the 19th-century debate over evolution; the subsequent development of mathematical and genetic approaches to natural-selection theory; and the formulation of neosynthetic evolutionary theory. The course will close with consideration of more recent developments connected with developmental genetics, punctuated equilibrium theory, and chaos-theoretical approaches to evolution. Students will be introduced to the historical and philosophical literature of current interest.

#### **STV 43171. History and Conceptual Foundations of Space and Time**

(3-0-3) Bland

*Corequisite:* STV 27999

An introduction to contemporary metaphysics and its relation to the philosophy of science. Three topics to be covered in depth are special relativity, the debate over relative and absolute space, and Kant's views on space.

#### **STV 43172. Autism**

(3-0-3) Whitman

This seminar discusses topics related to developmental disabilities, with a special emphasis on pervasive developmental disorders and autism. Issues regarding their definition, etiology, and treatment are also discussed.

#### **STV 43243. Ethics and Science**

(3-0-3)

Use of four ethical theories and five classical logical/analytical criteria to ethically evaluate case studies in contemporary science. Problems analyzed via contemporary science include practical issues of plagiarism, attribution, peer reviewing, data sharing, data ownership, collaborative science, scientific misconduct, paternalism, whistle blowing, conflicts of interest, secrecy in science, and advocacy in science. Methodological issues to be dealt with include scientists misrepresenting their opinions with confirmed science; cooking and trimming their data; failure to attend to the purposes for which their research may be used or misused; and scientists' use of evaluative presuppositions, questionable inferences and default rules, question-begging validation and benchmarking, and misleading statistics.

#### **STV 43279. Joint Seminar: Philosophy/Theology**

(3-0-3) Howard

*Corequisite:* STV 27999

The topic of the joint seminar is determined each year by the assigned faculty members.

### **STV 43283. Ethics and Risk**

(3-0-3)

An investigation of classical ethical papers, all in contemporary, analytic, normative ethics, that attempt to develop the ethical theory necessary to deal with legitimate imposition of risk of harm.

### **STV 43328. Politics and Science Policy**

(3-0-3)

This class will meet in seminar format. We will examine the general process for science policy making and emphasize the role played by politics in several specific science programs, such as the space program and the Human Genome Project. The first part of the seminar will be devoted to an overview of science policy in the US to provide students with a grounding in how science has generally been undertaken by the federal government up until World War II. We will also examine the role of both the executive and legislative branches of government in supporting science, and identify interest groups that have been influential in shaping science policy. The final portion of the course will require students to undertake an actual exercise in budget allocation, based on budget figures for various science programs in the federal government. The readings for the class will consist of excerpts from several books about science policy and politics, federal budget documents, and, potentially, transcripts of Congressional committee hearings. Students will be evaluated on the basis of one essay exam, one presentation, a group project (the budget exercise), and one research paper. Class participation will also be evaluated toward the final grade.

### **STV 43363. Spy Culture: Surveillance, Privacy, and Society**

(3-0-3)

Whether it be surveillance cameras "watching" us in public places, "spyware" planted on our computers, webcams broadcasting our daily activities, "reality" programs on television, tracking technologies in cars and cell phones, easy availability of spy satellite imagery, or cell-phone cameras surreptitiously taking pictures that are posted on the Web, more and more we are bombarded with the images and realities of surveillance. This course will examine various aspects of surveillance in society (technological, psychological, cultural, and historical) in various contexts (commercial, military, national security, and law enforcement). We will draw on psychology literature to discuss the different feelings involved in our dichotomous roles of purveyor and target of surveillance. Our discussions will also draw on examples from various media, such as television, film, advertising, literature, websites, and music.

### **STV 43364. Technology, Privacy, and Civil Liberties**

(3-0-3)

This seminar will examine the many ways in which technology has had (and is having) an impact on civil liberties in the United States. It will also explore how technology affects privacy in the United States and other countries. We will explore various technologies and applications such as information technology, genetic profiling, radio-frequency identification tags, data mining, thermal imaging, and bio-behavioral technologies (e.g., "functional MRI" of the brain). The course will also examine exactly what we mean by "civil liberties," by focusing on the US Constitution and Supreme Court case law. We will also examine US law and European Union directives on privacy, to compare and contrast the approaches each takes to protecting personal privacy vis-à-vis information technologies, in particular. The course will rely on the Constitution, case law, texts, and newspapers and magazines as its core reading material.

### **STV 43396. Environmental Justice**

(3-0-3) Shrader-Frechette

*Corequisite:* STV 27999

This course will survey environmental impact assessment (EIA), ecological risk assessment (ERA), and human-health risk assessment (HHRA); and ethical and methodological issues related to these techniques; then apply these techniques to contemporary assessments for which state and federal governments are seeking

comments by scientists and citizens. The course is hands-on, will have no tests, but will be project-based, with students working on actual assessments that they choose (about 2,500 are done in the US each year). The goal will be to teach students EIA, ERA, and HHRA, and how to evaluate draft analyses, particularly those used to site facilities or make environment-related decisions in which poor people, minorities, and other stakeholders are themselves unable to provide comments. Course will cover flaws in scientific method and flaws in ethics that typically appear in these assessments. Students who are not premed, engineering, or science majors need the professor's permission to take this course.

### **STV 43409. Evolutionary Psychology and the Sacred**

(3-0-3) Manier

*Corequisite:* STV 27999

Anthropologists and archeologists have long argued that religious rituals and sacrificial ceremonies addressing the most serious aspects of human life are prehistoric and antedate the development of spoken language, perhaps by hundreds of thousands of years. Today, evolutionary psychologists look at evidence suggesting that the concept of the sacred arises naturally from the "functional architecture" of the evolved human mind. We take a critical look at the possibility of integrating those two currents of thought.

### **STV 43414. Abortion, Euthanasia, and Capital Punishment**

(3-0-3)

This course involves an examination of recent philosophical work on abortion, euthanasia, and capital punishment. Though the focus is on the philosophical debates, some attention is given to relevant legal and public policy discussions.

### **STV 43445. The Internet: Interpretations**

(3-0-3)

This is not a "how to" course, nor an explanation of hardware and software. Rather, we will explore the different stories, or narratives, that Americans invented to make sense of the Internet ca. 1990. For the last decade there has been an explosion of writing on this subject, with every conceivable position represented, whether Marxist, liberal, capitalist, feminist, Luddite, etc. On one level, this is an interdisciplinary seminar that combines some literature and film with analytical readings. On another level, we will concern ourselves with historiography (i.e., case studies of the different interpretations of a new technology; the traditions from which these interpretations come; which social groups tend to make what arguments; and examples of similar arguments made in the past about previous new technologies, notably the telegraph, film, radio, and television.) The goal of the seminar is to engage students in the history of technology as a general subject and to show the value of a humanistic approach.

### **STV 43470. Molecular Revolution**

(3-0-3)

*Corequisite:* STV 27999

This course offers a historical and philosophical analysis of the origins and development of the molecular revolution in biology that broke into full public view in the early 1950s with dramatic discoveries of the molecular structure of DNA and the biophysical mechanism of the action potential in the nervous system. The course will approach this with an analysis of the development of the chemistry and physics of living materials from Lavoisier and the German biophysical school (Helmholtz), through the remarkable advances in physiology of the French school (Bernard) and the development of genetics. The course will terminate in the examination of molecular approaches in contemporary work in human genetics (the Human Genome Project).

### **STV 46497. Directed Readings/Research**

(V-0-V)

Independent research or readings taken under the supervision of an STV faculty member. An approved proposal for the research/readings will be filed with the STV office. (In order to receive STV credit, the student's proposal will need to be approved by the faculty member supervising the student's research/readings and by the director of the STV program.)

## Catholic Social Traditions

### CST 20102. Gendering Christianity

(3-0-3) D'Angelo

This course is an introduction to feminist approaches to spiritual and philosophical traditions in the Christian West. Beginning from the pastoral and practical issues raised by gender assignments in the context of religious experience, it addresses major topics of theological thinking (such as sin, salvation, images of God, and Christology) relating historical development and contemporary feminist re-readings. The approach is both critical (i.e., analytical) and constructive; the primary focus is on Christian and post-Christian theological and literary texts, but some attention is given to other religious perspectives.

### CST 20209. Political Theology

(3-0-3)

In this course, we will examine the major themes of the relationship between Christianity and politics by way of the careful examination of major works of political philosophy and political theology, from the Bible and Plato to early American political thought and beyond (including Aristophanes, Augustine, Aquinas, Dante, Marsilius of Padua, Luther, Calvin, Machiavelli, Spinoza, Locke, Madison, Jefferson, Tocqueville, Hegel, and Nietzsche).

Major themes include reason and revelation, the idea of a Christian polity and Christian citizenship (i.e., city of God vs. city of Man); rights, duties, original sin, limitations of government, rebellion, revolution, virtues, humility, magnanimity, friendship, family, prudence, power, justice, war, religion, toleration, truth, theocracy, democracy, liberalism, civil religion, and liberty, among others.

### CST 20223. The Church We Believe In

(3-0-3) Prügl

From the New Testament on, the Christian community has turned repeatedly to the formulation and description of its identity, essence, and constitutional elements. Specifying what is entailed in the claim of the creed—"I believe in the one, holy and catholic church"—has been especially necessary at certain crucial moments in the history of the Christian movement. Providing an introduction to the main themes and problems in ecclesiology (the doctrine about the Church), this course will examine the teachings of leading theologians in the patristic and medieval period (e.g., Augustine, Aquinas, and Luther) and the determinations of the last two Vatican councils, largely concerned with such ecclesiological matters as the constitution of the Church, the role of the papacy, infallibility, and the universal versus local churches.

### CST 20259. From Rome to Wall Street: The Church and Economic Life

(3-0-3)

The primary purpose of this course is to develop a critical understanding, via engagement with key texts and writings in the Christian tradition, of theological interpretations of the relationship between the Church and the economic order. Texts from the Roman Catholic social tradition to be studied include *Rerum Novarum* and *Economic Justice for All* (the US Bishops' Letter on the US Economy). Broad theological and ethical questions to be considered include: How have fundamental Christian understandings of Creation—including teachings regarding human dignity and stewardship—shaped theological interpretations of the relationship between Church and economy? What is the appropriate role of the Church and individual Christians in the economic order? Is economic justice a proper concern for the Church? If so, how ought the Church and individual Christians work to achieve economic justice? Particular questions include attention to the tension between the ideal of poverty and the acquisition of property by the Church and its members and the role of women in economic life. Course requirements include significant participation in class discussion and group work, a community-based learning project, a midsemester paper, and a final exam. The instructor will work with gender studies and Catholic social tradition students to enhance the gender and CST content of the course through discussion and written assignments.

### CST 20302. War, Law, and Ethics

(3-0-3)

This course is designed to explore the ethical and legal considerations related to war and the use of force. Beginning with a historical overview of Christian thinking on war and peace, we will develop an account of various ethical positions on the use of force, including views rooted in the just war tradition and in pacifism. We will also consider the ethical implications of contemporary issues related to the use of force, e.g., sanctions, war crimes, humanitarian intervention, and terrorism. In collaboration with the Center for Social Concerns and La Casa de Amistad, students will have the opportunity to engage in service learning by working with students from Washington High School to collect stories from local war veterans as part of the Library of Congress' "Veterans History Project."

### CST 20303. Catholic Radicalism

(3-0-3)

This course will examine the tradition of Catholic radicalism, including the thought of Paul Hanley Murphy, Dorothy Day, Peter Maurin, and others.

### CST 20304. Vocation and Leadership in Catholic School Tradition

(3-0-3)

This course will invite students to consider the meaning of vocation in relation to the social mission of the church. Beginning with a theological understanding of the significance of vocation and charisms, this course will provide a narrative-based exploration of the vocational journey of prominent figures in the Catholic social tradition such as Francis of Assisi, Dorothy Day, Cesar Chavez, and Oscar Romero. The emergent understanding of vocation will be held in conversation with the witness given by leaders from other religious traditions, e.g., Badshah Khan, Gandhi, and Thich Nhat Hanh. Using the method of service learning, this course will invite students to develop an awareness of their social justice commitments in light of their own sense of vocation. More information about the course format is explained in the Learning Agreement and Application Form, available at the Center for Social Concerns.

### CST 20605. Introduction to Catholic Moral Theology

(3-0-3) Clairmont

This course will be structured into three sections, addressing respectively, biblical foundations, fundamental topics, and selected contemporary ethical questions. The biblical section of the course will study some of the key ethical perspectives and teachings of the Scriptures, primarily the Gospels and the Pauline letters. This section will be followed by an introduction to several fundamental topics in moral theology including (1) the theology of grace; (2) the orientation of ethics toward the achievement of happiness; (3) the development of the moral and theological virtues as capacities that enable us to act well; (4) the relation between moral truth and authentic human freedom; (5) the natural law; and (6) the stages and analysis of moral action. The third section of the course will consider some contemporary ethical questions in the context of this biblical and systematic framework. The course will draw primarily upon the classical Catholic tradition, as represented especially by St. Thomas Aquinas. We will also read selected sections of recent encyclical letters by Pope John Paul II including his *Veritatis Splendor* (*On the Splendor of the Truth*), *Evangelium Vitae* (*The Gospel of Life*), and *Fides et Ratio* (*On Faith and Reason*). Students will be expected to write a summary of a short reading for each class, write one five-page paper for each of the first two sections of the course, write a final 10-page paper applying what has been studied to a particular ethical question, and present a summary of this paper to the class.

### CST 20619. Rich, Poor, and War

(3-0-3) Whitmore

This course examines the interrelationships between economic injustice and violence. It begins by investigating the gap between rich and poor, both in the US and worldwide. We also look at the history of Christian thought on wealth and poverty. We then address the ways in which economic disparity intersects with the problem of violence in both domestic (violence against women) and political realms (war and revolution). Next, we canvass Christian thought on the use of violence. This raises the question of whether Christianity itself contributes more to violence or to peace. Finally, we pose the question of whether forgiveness for violence is advisable or feasible.

**CST 20629. War, Law, and Ethics**

(3-0-3) Baxter

This course is designed to explore the ethical and legal considerations related to war and the use of force. Beginning with a historical overview of Christian thinking on war and peace, we will develop an account of various ethical positions on the use of force, including views rooted in the just war tradition and in pacifism. We will also consider the ethical implications of contemporary issues related to the use of force; e.g., sanctions, war crimes, humanitarian intervention, and terrorism. In collaboration with the Center for Social Concerns and La Casa de Amistad, students will have the opportunity to engage in service learning by working with students from Washington High School to collect stories from local war veterans as part of the Library of Congress' "Veterans History Project."

**CST 20639. Conscience, Calling and Character**

(3-0-3)

This course is intended to be an introduction to Catholic moral theology customized for those discerning a career as a business professional. In the wake of ethics failures at a number of prominent corporations, business leaders have renewed their call for ethical behavior and have begun to establish criteria for hiring morally thoughtful employees and to institute ethics education in the workplace. In the first part of the course, we will examine Catholic theological ideas about conscience and how it functions in the process of making a moral decision. In the second part of the course, we will examine a selection of Catholic writings on the idea of vocation and calling, as well as the nature of human work, the relationship between workers and management, and the norms of justice that ought to govern these relations. Finally we will examine ideas about character and virtue to assess the challenges and opportunities for moral formation in a business context. Class format will combine analysis of theological texts and discussion of business cases. Course requirements include a midterm and final examination and a group project.

**CST 20828. Christianity and World Religions**

(3-0-3) Malkovsky

The purpose of this course is to introduce the student to the basic teachings and spiritualities of Hinduism, Buddhism, and Islam. We will approach these religions both historically and theologically, seeking to determine where they converge and differ from Christianity on such perennial issues as death, meaning, the nature of the ultimate Mystery, the overcoming of suffering, etc. We will also examine some traditional and contemporary Catholic and Protestant approaches to religious pluralism. Our own search to know how the truth and experience of other faiths is related to Christian faith will be guided by the insights of important Catholic contemplatives who have entered deeply into the spirituality of other traditions. By course's end we ought to have a greater understanding of what is essential to Christian faith and practice, as well as a greater appreciation of the spiritual paths of others. Requirements: Short papers, midterm exam, and final exam.

**CST 30150. Collegiate Sports and Catholic Identity**

(1-0-1)

This course assesses the relationship between collegiate sports and Catholic identity. Presenters will include former Notre Dame football players as well as other commentators.

**CST 30308. War, Peace, and Conscience**

(1-0-1)

The Catholic tradition affirms that there are two key traditions to responding to the question of peace and war: the just war tradition and pacifism. Engaging either of these traditions, however, requires the exercise of an informed conscience. This course examines the issue of the formation of conscience against the backdrop of the many questions that arise when a country goes to war.

**CST 30309. Migration and Catholicism**

(1-0-1)

This course examines the international phenomenon of migration, the factors that give rise to it, and its effects on people. We will examine the Catholic documents that address the issue of migration.

**CST 30601. Comparative Religious Social Ethics**

(1-0-1)

This course will examine the social ethics traditions of Judaism, Islam, Hinduism, Buddhism, and Confucianism through comparison with the basic tenets of Catholic social teaching. Focuses will include themes such as human dignity and equality, respect for human life, the common good, an option for the poor, solidarity, and environmental concerns. Guest lectures will be supplemented with classroom discussion. Requirements include an 8-10 page paper and supplementary readings.

**CST 30602. Uganda, War, Religion**

(1-0-1)

Civil war has ravaged the land of northern Uganda for 20 years, pitting the rebel "Lord's Resistance Army" against the Ugandan government. Caught in between are the people of northern Uganda. The LRA has abducted more than 20,000 children to serve in the rebel forces. The Ugandan army has committed its own abuses, including rape and forced labor. The aim of this class is to (1) examine the conflict and how different parties use theological language to rationalize their actions, and (2) address the issue of the obligation of NGOs and the international community to help stop the war.

**CST 33001. Catholic Social Teaching**

(3-0-3) Whitmore

This seminar will introduce students to the key texts that make up Catholic social teaching. Students will read one document each week and ask how the document's ideas relate to our own present lives and planned futures. The course concludes with asking what our anticipated professional vocations would look like if informed by Catholic social teaching. For instance, what would a law firm or health clinic look like if they were formed by ideas such as the common good and the option for the poor?

**CST 33100. Dorothy Day and the Catholic Worker Movement**

(1-0-1) Whitmore

This course examines the life and writings of Dorothy Day, the cofounder and spiritual guide of the Catholic Worker Movement. The course is seminar in style. Readings will include Day's autobiography, *The Long Loneliness*, and selections from her other writings.

**CST 33933. Summer Service Learning: Hispanic**

(3-0-3) McDowell

This is a leadership internship for Hispanic studies working 10 to 12 weeks in a Hispanic/Latino area with organizations dedicated to empowering local communities. Students will complete the requirements of THEO 33931 and work with the Center for Social Concerns to build partnerships with the agencies and people involved.

**CST 33936. Summer Service Learning: Confronting Social Issues**

(3-0-3) Shappell

This three-credit service-learning course takes place before, during, and after student participation in eight-week "Summer Service Projects" sponsored by the Center for Social Concerns. The goals of the course are to reflect on the meaning and dynamics of Christian service, compassion and Catholic social teaching through readings and writing, along with discussion and reflection with site supervisors and alumni, and scheduled group discussions upon return to campus. Writing assignments include a journal, reflection paper of six to eight pages, and responses to study questions related to the course packet. This course is completed during the first five weeks of fall semester and is graded Satisfactory or Unsatisfactory. Acceptance is based on the student's application and interview. Contact the Center for Social Concerns for more information.

**CST 33937. Confronting Social Issues**

(3-0-3) Shappell

This three-credit service-learning course takes place before, during, and after student participation in eight-week "Summer Service Projects" sponsored by the Center for Social Concerns. The goals of the course are to reflect on the meaning and dynamics of Christian service, compassion and Catholic social

teaching through readings and writing, along with discussion and reflection with site supervisors and alumni, and scheduled group discussions upon return to campus. Writing assignments include a journal, reflection paper of six to eight pages, and responses to study questions related to the course packet. This course is completed during the first five weeks of fall semester and is graded Satisfactory or Unsatisfactory. Acceptance is based on the student's application and interview. Contact the Center for Social Concerns for more information.

**CST 33938. Summer Service Learning: International**

(3-0-3) Tomas Morgan

This three-credit course provides students the opportunity to encounter international realities through work with poor and marginalized people. Same academic requirements as THEO 33936 with the addition of area/country specific readings, and meetings.

**CST 33950. Social Concerns Seminar: Appalachia**

(1-0-1) Miller McGraw

This seminar involves experiential learning during the semester break. The course is centered on a service-learning immersion in the region of Appalachia and provides preparation for and follow-up to that experience. Students may focus on particular themes (e.g., rural health care, environmental issues) at various sites while learning about the region and rural issues.

**CST 33951. Social Concerns Seminar: Washington, D.C.**

(1-0-1) Miller McGraw

This course centers on a trip to Washington, D.C., over fall break, during which time students analyze a significant social issue through contact with various agencies, government offices, and church organizations. Students participate in preparation and follow-up sessions. Themes (e.g., educational reform, violence in America) vary each year.

**CST 33953. Social Concerns Seminar: Contemporary Issues**

(1-0-1) Miller McGraw

This seminar allows students to participate in an experiential opportunity designed to examine contemporary social problems. Emphasis will be placed on understanding issues/conflicts from the perspective of the various participants. Preparation and follow-up sessions are tailored to the specific opportunity.

**CST 33954. Social Concerns Seminar: Leadership Issues**

(1-0-1) McDowell

This course is open to student leaders of various campus organizations focused on community service and social action (e.g., student groups affiliated with the Center for Social Concerns, social concerns commissioners of dorms, etc.). This seminar will examine leadership and empowerment issues from a multidisciplinary perspective, focusing on the role of the leader within organizations promoting community service, social awareness, and action for justice and peace.

**CST 33963. Social Concerns Seminar: The Church and Social Action**

(1-0-1) Pettit

This course centers on a 48-hour immersion (colloquially known as the Urban Plunge) in an urban setting during the winter break (prior to return to campus). The course includes a preparation workshop in the fall semester, readings, two reflection papers, and follow-up educational meetings.

**CST 33964. Social Concerns Seminar: Education**

(1-0-1) Purcell

This seminar focuses on the educational and outreach endeavors of St. John Vianney Catholic Parish in Goodyear, Ariz., and builds upon Notre Dame's relationships with the Congregation of Holy Cross. Participants are hosted by parish families and spend several days in the classroom with a mentor teacher. Participants also visit organizations in Phoenix doing outreach to people who are homeless and to pregnant women.

**CST 33965. Social Concerns Seminar: Organizing Power and Hope**

(1-0-1) Brandenberger

This seminar focuses on diverse church, school, leadership, and community-organizing initiatives to improve life in Chicago neighborhoods. Participants will be challenged to examine perceptions of power, service, and social action.

**CST 33966. Social Concerns Seminar: Border Issues**

(1-0-1) Paladino

The seminar examines immigration and related issues that exist between the United States and Mexico. Participants travel to El Paso, Tex., and Ciudad Juárez, Mexico, to meet with refugees, Border Patrol, parish organizations, and families who live in "squatter" villages. Participants also analyze and discuss policy issues. The immersion is in partnership with Annunciation House.

**CST 33967. Social Concerns Seminar: Migrant Experience**

(1-0-1) Miller McGraw

This seminar offers a unique immersion into the lives of migrant farm workers in Florida during the spring harvest. Students pick tomatoes in the fields (donating their wages), live with migrant families, assist church and social agencies that serve migrants, and meet with community leaders, never again to take food for granted.

**CST 33968. Social Concerns Seminar: L'Arche Community**

(1-0-1) Miller McGraw

This seminar centers on travel to a L'Arche community (e.g., Toronto, Canada) to share community life with developmentally challenged persons. Students draw from the philosophy of Jean Vanier, the works of theologian Henri Nouwen, and other spiritual writings to augment this participatory learning experience.

**CST 33969. Social Concerns Seminar: Hispanic Ministry**

(1-0-1) Purcell

This seminar gives participants the opportunity to experience the Church's option for the poor through an immersion into the spirituality, culture, and economy of the rural, Southern California valley community of Coachella. Students work with the members of the Congregation of Holy Cross who are in ministry there.

**CST 33970. Social Concerns Seminar: International Issues**

(1-0-1) Tomas Morgan

This seminar serves as the required orientation course for all THEO 33938 International Service-Learning Program participants. It will provide students with an introduction to international issues in developing countries through the lens of Catholic social tradition, guidance in independent country/area study, preparation and tools for cross-cultural service, opportunities for theological reflection, logistical information necessary for international programs and travel, and general support within the context of a community of colleagues. Other students doing summer internships in developing countries may take the seminar with permission from the instructor.

**CST 40612. Catholic Radicalism**

(3-0-3) Baxter

This course traces the emergence and development of Catholic radicalism in the United States from the early 20th century to the present. Special attention will be placed on the Catholic Worker Movement. Readings will include texts by and about Dorothy Day, Peter Maurin, Virgil Michel, Paul Hanly Furfey, Gordon Zahn, Thomas Merton, and Daniel Berrigan, as well as some recent theologians. Issues to be taken up in the course include the relation between theology and social theory, nature and the supernatural, the nature of the modern state, capitalism and socialism, and the challenges facing Catholic radicalism in the beginning of the 21st century.

**CST 45100. Catholic Social Teaching Internship**

(0-V-V)

This course is set up on an individual basis to provide students the opportunity to reflect upon internship experiences in light of Catholic social teaching. Readings and requirements will be set up on an individual basis.

**CST 46100. Directed Readings**

(3-0-3)

This course will be set up on an individual basis and allows students to pursue individual interests in the Catholic social tradition. Topics might include, for instance, poverty and policy, medical ethics, and so forth.

### **CST 47100. Special Studies**

(0-3-3)

Research and writing on an approved subject under the direction of a faculty member.

### **CST 47200. Uganda—War and Religion II**

(1-0-1)

Civil war has ravaged the land of northern Uganda for 20 years, pitting the rebel "Lord's Resistance Army" against the Ugandan government. Caught in between are the people of northern Uganda. The LRA has abducted more than 20,000 children to serve in the rebel forces. The Ugandan army has committed its own abuses, including rape and forced labor. The aim of this class is to (1) examine the conflict and how different parties use theological language to rationalize their actions, and (2) address the issue of the obligation of NGOs and the international community to help stop the war.

## **Religion and Literature**

### **RLT 20101. Introduction to Art and Catholicism**

(3-0-3)

This undergraduate lecture/discussion course will give students the opportunity to analyze and discuss the history of Catholic doctrine as it pertains to the visual arts. From the Council of Elvira in 306 AD to John Paul II's *Letter to Artists* of 1999, Catholicism has engaged with and debated the role of the arts as a legitimate vehicle for spiritual experience and theological knowledge. In this course, we will examine the changing, complex, and various ideas that have been brought to the question of the function of art in the Church. It will become clear that Catholic attitudes to the arts have been subject to a range of influences that have helped shape a still fluid and potential relationship between Catholicism and art. Among other topics, we'll examine the accommodation of traditional pagan practices in Late Antiquity; the impact of Byzantine and Carolingian theological discourse on the arts; mendicant thought and practice regarding the arts; lay piety in the Later Middle Ages; issues raised by the Reformation; the Council of Trent and the Counter-Reformation; the implications of Modernism; neo-Thomist aesthetics; and the aftermath of Vatican II. In all instances, the course will be shaped by the discussions of primary readings (in translation when necessary) that will set these texts in a context that is social, intellectual, theological, and cultural. Each reading will then lead to an examination of the artistic environment that preceded and succeeded the ideas shaped by these texts. It is expected that students will leave this course with a rich knowledge of the central ideas and works of art that have come to shape the continuing dialogue between Catholicism and art.

### **RLT 20102. Introduction to Islamic Civilization**

(3-0-3)

This course introduces Islamic civilization and Muslim culture and societies through scholarly works, literature, media clips, films, and audio-video material (some made by the instructor during recent trips to the Middle East). The background reading will provide a context for the audio-visual material, giving a general overview of the history of the Islamic world from the advent of Islam to the present day. The ultimate goal of this course is for students to gain a better understanding of the Muslim peoples and their culture and societies within the broader context of Islamic civilization. Focal point: brief overview of the canons and basic tenets of Islam as a world religion, recognition and transcendence of stereotypes, awareness of Western culture and political influence on today's Arab-Islamic world and vice versa, and exposure to Middle Eastern culture.

### **RLT 20204. Political Theory**

(3-0-3)

*Corequisite:* POLS 22600

This course serves as the department's required introductory course in political theory, and as a University elective. It introduces students to key questions in political theory, such as the nature of law, the question of conventional versus natural moral standards, the relationship between individual and community, and the relationship between individualistic- versus community-oriented political theories. Authors studied include Madison, Aristotle, Aquinas, Hobbes, Locke, Scott Momaday, Sophocles, Plato, and Flannery O'Connor. Students will write three one-page papers analyzing specific cases, and then two four-page papers. There is a comprehensive final. In Friday discussion groups, students will critically apply the materials covered in class to specific cases.

### **RLT 20205. Staging the Religious**

(3-0-3)

How the Elizabethan playwrights Christopher Marlowe and William Shakespeare explored religion and religious themes in their works.

### **RLT 20206. Religious Imagination in American Literature**

(3-0-3)

A consideration of the ways in which selected American writers and works are informed and illuminated—formally and in their ideas and preoccupations—by religious traditions, ideas, and concerns. Readings will be selected from the following: Melville, *Billy Budd, Sailor*; or *Moby-Dick*; Stowe, *Uncle Tom's Cabin*; DeVries, *The Blood of the Lamb*; Hemingway, *The Old Man and the Sea*; Dickinson, *Final*

*Harvest*; Hurston, *Their Eyes Were Watching God*; Steinbeck, *The Grapes of Wrath*; Hawthorne, *Selected Tales and Sketches*; O'Connor, *Everything That Rises Must Converge*; Maclean, *A River Runs Through It*; Eliot, *Four Quartets*; Agee, *A Death in the Family*; Updike, *Pigeon Feathers*; Salinger, *Franny and Zooey*.

### RLT 20207. God and Evil in Modern Literature

(3-0-3)

A study of selected modern writers whose concern with God and evil, faith and despair, and the reality and significance of suffering animates their writings.

### RLT 20208. Music of the Catholic Rite

(3-0-3)

A study of the music composed for the Mass, the Office hours (primarily Vespers), and the Requiem Mass from the Middle Ages to the present day. The musical repertoire of each era is examined both from a purely musical standpoint and in light of the reactions of various popes, from John XXIII through Pius X, to the sacred music of their day. Documents on sacred music issued after Vatican II also are examined in relation to postconciliar church music for both the choir and the congregation.

### RLT 20210. Philosophical Reflections on Christian Belief

(3-0-3)

In this course, we will take a careful look at some of the hard philosophical problems raised by several important Christian doctrines. For example, Christians believe that there is exactly one God but three divine Persons (Father, Son, and Holy Spirit). We believe that the second Person of the Trinity became a man, that this man—Jesus of Nazareth—suffered and died for our sins so that we might be restored to fellowship with God; that he was raised from the dead on the third day after his crucifixion; and that all Christians will one day undergo a similar bodily resurrection. Many of us also believe that God is sovereign and that, in some sense nothing, happens apart from his will, but also that we are free creatures who often do things that run directly contrary to the expressed will of God. Each of these doctrines, however, poses serious philosophical difficulties. The goal of this course is to try to get clear about what exactly these problems are and to explore some of the ways in which philosophers and theologians have attempted to solve them.

### RLT 20212. Reading the Qur'an

(3-0-3)

To Muslims, the Qur'an is the uncreated, eternal Word of God. As Jesus Christ is to Christians, the Qur'an to Muslims is the fullest expression of God's mercy and concern for humanity. It is both the source of complete spiritual wisdom and the constitution for a more perfect society. In the present course, we will encounter this revered text with the following goals: to examine the history of the Qur'an's composition and reception; to explore the major themes of the Qur'an; to discuss new theories on and debates over the Qur'an; and, finally, to research the Qur'an's statements on issues of contemporary interest, especially sex, politics, and war.

### RLT 20214. Pilgrimage

(3-0-3)

This course will examine the literary record and lived experience of pilgrimage throughout Christian history by focusing on particular texts, persons, and sites. To enrich our understanding of this phenomenon, we will deliberately adopt a variety of perspectives (archeological, sociological, anthropological, liturgical, and art historical). We will necessarily also consider relics and the cult of the saints.

### RLT 20216. One Jesus and His Many Portraits

(3-0-3)

This course explores the many different faith-portraits of Jesus painted by various books of the New Testament; e.g., from suffering servant abandoned by God through high priest interceding with God to Godself. In each case, the course will ask how this particular portrait did or did not have an impact on subsequent Christian faith, and what it may say to faith in Christ today. The course will combine a lecture format with discussions, readings, and reflections on the readings.

### RLT 30210. Christianity and Modernism

(3-0-3)

A study of Christian writers and how they struggle with the literary and cultural movement labeled "modernism."

### RLT 30212. Faith and Fragmentation in Modernity

(3-0-3)

This class examines how British and American modernist writers responded to an upheaval of traditional religious belief in the first half of the 20th century. In particular, we will explore how their choice of literary forms reflects the loss of stability traditional Christianity had earlier provided. As we will see, many writers produced works that are more fragmentary than coherent, which is symptomatic of their loss of a cohesive worldview. Formal fragmentation, however, rarely yields a simple, lamentable heap of chaos and meaninglessness. Rather, it testifies to the troubles and consolations of living in the modern world. The class will focus on reading a variety of fiction and poetry, which will serve as an introduction to modernist literature. We will read Nietzsche, Faulkner, Woolf, Stein, Hopkins, and Eliot. Requirements: two papers (five to seven pages), short responses, presentations, and a midterm and final exam.

### RLT 30216. C.S. Lewis, Tolkien, and Inklings

(3-0-3)

"Otherworldly" fiction as well as the theological, critical, and philosophical writings of C.S. Lewis, J.R.R. Tolkien, and the Inklings.

### RLT 30222. The Greeks and Their Gods

(3-0-3)

An introduction to the varied and unique religious beliefs and practices of the ancient Greeks. With the aid of anthropological and comparative material on religion from other cultures and societies, the course stresses the intersection of religious conventions with politics, gender, and class in the Greek city-states, and gives special attention to the religious life of the best-documented Greek community of all, ancient Athens.

### RLT 30223. Mysticism and Modern Literature

(3-0-3)

This course examines the persistence of mystical and spiritual traditions in the literary texts of the early 20th century: Underhill, Hopkins, Yeats, Conrad, Joyce, Owen, Eliot, Crane, Hesse, Forster, Mansfield, Woolf, and Waugh.

### RLT 30224. Faith and the African American Experience

(2-0-1)

This course will introduce students to the African American faith experience, with particular attention being given to the historical development of spiritualities of liberation in the American diaspora. Guest lecturers and seminar leaders will offer "perspectives" on this rich and heterogeneous tradition from several vantage points within the humanities, social sciences, and theological disciplines. In addition to a course pack of selected readings, the PBS series, *This Far by Faith: African American Spiritual Journeys*, and its companion volume will constitute the required "texts" for the course. There will be seven class meetings of two hours each. The course will meet on Wednesday evenings from 6:00 p.m. to 8:00 p.m. The course will begin on January 18, 2006, and conclude on March 1, 2006. Attendance at all class sessions, active participation in seminar discussions, completion of six short (i.e., 2-3 pages in length) weekly reflection papers, and a final examination are required.

### RLT 30226. Islam and Modernity

(3-0-3)

Islam and its compatibility with modernity is a much-debated issue in the contemporary period. The course will address this timely topic and discuss the most important "hot-button" issues involved: political Islam, democracy, pluralism, rights of women, and secularism. The historical contexts in which these issues have been debated will also receive attention. What internal resources exist within Islamic thought that are being drawn upon by modernists to make a strong case for an essential compatibility between Islam, modernity, and democracy, for example? Is democracy (or Islam, for that matter) a monolithic concept? Students will be expected to actively take part in discussions centered on such questions, the

assigned readings, and class lectures. Prior exposure to at least one class on Islam or the Middle East is strongly recommended.

### RLT 30228. Russia Confronts the East

(3-0-3)

This course will explore the prominent place the Caucasus and the Islamic East hold in the Russian literary imagination. We will take a broad view of the topic, ranging from medieval epic to modern film, from prose to poetry, and from literature's "greatest hits" to the justly and unjustly forgotten. Throughout, we will seek to understand the uses of the East in Russian culture as a whole and in individual literary works in particular, the role it plays in the formation of a Russian national identity, and the literary resources the East provides to Russian authors. Readings will include works by Pushkin, Lermontov, and Tolstoy, among others, as well as contemporary journalism on the war in Chechnya. Class format will be lecture/discussion, and grades will be based on class participation and regular writing assignments.

### RLT 30232. Pagans/Preachers/Passions

(3-0-3)

How did Christianity go from Mediterranean cult to world religion? How did the scattered tribes of ancient Europe become a world civilization? This course will examine the growth of Christianity in Late Antiquity and the Middle Ages, concentrating particularly on the men and women who actively pursued its expansion—the missionaries. A combination of lectures and discussions of primary sources will consider the conversion of the Roman Empire, the beginnings of missions on the fringes of the Roman world, the growth of an early medieval missionary movement, and the changes in approaches to non-Christians that came with contact with the Islamic and Mongol worlds and the rise of the papacy and new religious orders in the later Middle Ages.

### RLT 30234. Religious and Social Movements in Latin America

(3-0-3)

The purpose of this course is to give students an understanding of the role religion has played in Latin American history from the colonial period to the present. We will focus specifically on how religion mediates relations between culturally distinct peoples during points of encounter and the role it plays in social movements. Religion in Latin America served paradoxically as a means of and justification for "conquest," but also at times as a foundation for "subordinate" people's resistance to domination. We will examine this dynamic as it evolved in successive efforts by outsiders to impose control over people of indigenous and African descent. The course will focus on Spanish proselytization and its results during the colonial period, millenarian movements by people of indigenous and African descent during the 19th century, and American Catholic and Protestant mission endeavors and their outcomes in the 20th century.

### RLT 30301. Ancient and Medieval Political Theory

(3-0-3)

What is the meaning of justice, and why should we care about it? Can politics ever perfectly establish justice? Which forms of government are best for human beings to live under, and why? What is the political relevance of religion and philosophy, family and ethnicity, war and peace, nature and freedom, law and right? What are the qualities of a good citizen and political leader? How should relations among diverse political communities be conducted? This course introduces students to theoretical reflection on these and related questions through the study of some of the great works of ancient and medieval political thought. Readings will include writings of authors such as Thucydides, Plato, Aristotle, Cicero, Augustine, Farabi, Maimonides, and Aquinas.

### RLT 40201. Survey: Greek Art/Architecture

(3-0-3)

Open to all students. This course analyzes and traces the development of Greek architecture, painting, and sculpture in the historical period from the eighth through secondnd century BC, with some consideration of prehistoric Greek forebears of the Mycenaean Age. Particular emphasis is placed upon monumental art, its historical and cultural contexts, and how it reflects changing attitudes

toward the gods, human achievement, and the relationship between the divine and the human.

### RLT 40203. Art into History: Byzantine

(3-0-3)

This undergraduate lecture/discussion course will give students the opportunity to analyze and discuss the history of Catholic doctrine as it pertains to the visual arts. Byzantine art has often been opposed to the traditions of western naturalism, and as such has been an undervalued or little known adjunct to the story of medieval art. In order to develop a more sophisticated understanding of this material we will examine the art produced in Byzantium in the period from the ninth to the 12th century, a period that marks the high point of Byzantine artistic production and influence. Stress will be places on the function of this art within the broader setting of this society. Art theory, the notions of empire and holiness, the burdens of the past and the realities of contemporary praxis will be brought to bear on our various analyses of material from all media. How we, as art historians, can write the history of this rich culture will be a central issue in this course.

### RLT 40205. Sociology of Vocation

(3-0-3)

The unifying theme of this course is the crisis that is created when people's lives and work are divorced from the religious foundation that constitutes them as a vocation in the world. Students will read and engage Karl Marx's analysis of worker alienation in capitalism and Marx Weber's diagnosis of the vocation crisis in the modern West, mid-20th century critiques by C. Wright Mills (*White Collar*) and William Whyte (*The Organization Man*), and more contemporary analyses of the moral dimension of work and economics (e.g., by Robert Bellah and Robert Wuthnow). Through reading, writing, and discussion, students will have the opportunity to develop and apply their sociological imaginations in interpreting their own life and goals through the sociological diagnoses. The class will conclude by considering the possibility of a contemporary reappropriation of an explicitly Christian conception of vocation. NOTE: This course is reading-intensive and discussion-based, and students will be required to write a 20+-page paper.

### RLT 40206. Dante

(3-0-3)

A study of *The Divine Comedy*, in translation with facing Italian text, with special attention to the history of ideas, the nature of mimesis and allegory, and Dante's sacramental vision of life. We will also consider the influence of Augustine's *Confessions* on Dante's imagination and experience and read selections from the *Fioretti*, or *Little Flowers* of St. Francis, and from such later figures as Teresa of Avila as well as modern writers—including T.S. Eliot—for whom Dante constitutes a powerful presence.

### RLT 40209. Religion and Social Life

(3-0-3) Christiano

How does social life influence religion? How does religion influence society? What is religion's social significance in a complex society such as ours? Is religion's significance declining? This course will consider these and other questions by exploring the great variety in social expressions of religion. The course examines the social bases of churches, sects, and cults, and it focuses on contemporary religion in the United States.

### RLT 40211. Islam: Religion and Culture

(3-0-3)

This course will discuss the rise of Islam in the Arabian Peninsula in the seventh century and its subsequent establishment as a major world religion and civilization. Lectures and readings will deal with the core beliefs and institutions of Islam, with particular emphasis on religious and political thought from the Middle Ages through our own time. All readings are in English; no prerequisite.

### RLT 40213. Romans and Christians

(3-0-3)

This course will examine the early development of the Christian religion in its historical Roman context. It will begin with a survey of the political, social, and administrative structures of the Roman Empire in the period from Augustus to

Constantine, move to a study of the complexity and diversity of Roman religious life and culture (with special attention to Mystery Cults, e.g., that of Isis), and then examine the development of the Jesus movement and Rome's reaction to it. Particular topics to be studied will include miracle working and the practice of magic, the problem of the historical Jesus, the sectarian and subversive character of early Christianity, the issue of how persecution and martyrdom are to be historically understood, and the meaning of religious conversion in the polytheistic Roman world. Above all, the course will concentrate on the questions of how and why, in historical terms, a new religious system came to have such appeal that Constantine chose to make himself the first Christian emperor of Rome.

**RLT 40214. American Literature: Varieties of Religious Experience**  
(3-0-3)

Many American authors are skeptical toward religion, yet they are, nonetheless, preoccupied with the religious experience. This course explores the relationship between these attitudes in American literature.

**RLT 40215. Religion, Myth and Magic**  
(3-0-3)

The study of religious beliefs and practices in tribal and peasant societies emphasizing myths, ritual, symbolism, and magic as ways of explaining man's place in the universe. Concepts of purity and pollution, the sacred and the profane, and types of ritual specialists and their relation to social structure will also be examined.

**RLT 40217. Dante and Aquinas**  
(3-0-3)

An introduction to the thought of two great medieval figures, Aquinas and Dante.

**RLT 40218. Chinese Ways of Thought**  
(3-0-3) Jensen

This is a special topics class on religion, philosophy, and the intellectual history of China that introduces the student to the world view and life experience of Chinese as they have been drawn from local traditions, as well as worship and sacrifice to heroes, and the cult of the dead. Through a close reading of primary texts in translation, it also surveys China's grand philosophical legacy of Daoism, Buddhism, "Confucianism," and "Neo-Confucianism," and the later religious accommodation of Christianity and Islam.

**RLT 40219. The Romans and Their Gods**  
(3-0-3) Taylor

An introduction to the way in which the Romans conceived of, worshipped, and communicated with the myriad gods of their pantheon. The course focuses first on conventional religious rituals and their cultural meaning, and secondly on the success of Roman polytheism in adapting to changing historical and social conditions. Particular attention is paid to the so-called "Mystery Religions," including Christianity, and their relationship to conventional forms of Roman religious behavior.

**RLT 40220. Religion and Literature**  
(3-0-3) Werge

An analysis of the reciprocal relations between literature and religion.

**RLT 40221. Literature of Religion**  
(3-0-3)

This course will explore the interface and conflict between fairy and Christian in the medieval and Renaissance tradition by discussing the legend of the holy grail and by reading *Sir Gawain and the Green Knight*, Book 1 of Spenser's *Faerie Queene*, Shakespeare's *A Midsummer Night's Dream*, Milton's *Comus*, and parts of Tennyson's *Idylls of the King*. In the second half of the course, we will turn to a modern mythmaker by reading Tolkien's *Lord of the Rings*.

**RLT 40222. Christianity in the Middle East**  
(3-0-3)

This course will examine the origins and development of Christianity in the Middle East where Semitic language and culture molded the indigenous "Oriental" churches of the region. Topics include: Semitic-Christian spirituality,

Christianity in India and China, the impact of Islam on the Middle East Christianity, the modern diaspora: Europe and the Americas. Drawing on native accounts, and the latest archaeological evidence, we will piece together the largely untold story of Christianity in the Middle East.

**RLT 40224. Revelation and Revolution**  
(3-0-3)

Between the years 100 and 1000 AD, Christianity and Islam were born and struggled for supremacy as world empires. The rivalry that resulted was religious and theological, but it expressed itself in story, art, and imagination. This course follows the early progress of a rivalry that continues to our own day. [Topics include history of religious interaction, politics of empire, Arabic literature, mytho-poetics, art, and architecture.]

**RLT 40225. Parables**  
(3-0-3)

This seminar takes as its primary focus the parables of Jesus, and seeks to examine their literary structure. We will read a broad selection of Jesus' parables, both inside and outside the New Testament canon, and consider how later prose writers and poets have rewritten them.

**RLT 40226. Canon and Literature of Islam**  
(3-0-3)

This course is an introduction to the religious literature of the Arab-Islamic world. Emphasis is on works from the classical and medieval periods of Islam, roughly from the seventh to the 14th century of the Common Era. We will read selections from the Qur'an (the sacred scripture of Islam), the Hadith literature (sayings attributed to the Prophet Muhammed), the biography of the Prophet, commentaries on the Qur'an, historical and philosophical texts, and mystical poetry. All texts will be read in English translation. No prior knowledge of Islam and its civilization is assumed, although helpful.

**RLT 40227. Literary Catholicism**  
(3-0-3)

This course will explore the Catholic theological tradition primarily as it finds expression in six novels by authors whose writing is influenced by that tradition. The novels discussed will be *The End of the Affair* and *The Power and the Glory* by Graham Greene, *The Ball and the Cross* by G.K. Chesterton, *Silence* by Shusaku Endo, *Wise Blood* by Flannery O'Connor, and *Love In the Ruins* by Walker Percy. Among the topics to be treated are Jesus Christ, revelation, the fall of humanity and the problem of evil, the nature of sacraments, and faith as a relationship with a loving God.

**RLT 40228. Romanesque Art**  
(3-0-3)

In this course, we will examine the place of art in an expanding culture. The 11th and 12th centuries witnessed the economic and military expansion of the societies of Western Europe. This growth produced a complex and rich art that can be broadly labeled as Romanesque. We will investigate this phenomenon (or rather these phenomena) through three actual and metaphorical journeys: the pilgrimage to Santiago de Compostela, a journey to the ruins of ancient Rome, and a visit to the Palestine of the Crusades. These journeys, in many ways typical of this period, will provide the means of examining how the art of this period responds to the various new demands of an increasing knowledge provoked by travel.

**RLT 40229. Chinese Mosaic Philosophy, Politics, and Religion**  
(3-0-3)

This special topics class introduces the diverse lifeways constituting the puzzle of the Chinese people. The course will chart this terrain of current Chinese imagination as it has been shaped from the contending, and often contentious, influences of religion, philosophy, and politics, introducing students to the heralded works of the Chinese intellectual tradition while requiring critical engagement with the philosophic and religious traditions animating this culture. Thus, as they learn about China, students also will reflect on how Chinese and Westerners have interpreted it.

**RLT 40230. Survey of Baroque Art**

(3-0-3)

Open to all students. This course will examine the art of Europe during the 17th century. The first third of the semester will be devoted to the work of Counter-Reformation Italy and the work of individual artists such as Caravaggio and Gian Lorenzo Bernini. The second third of the term will focus on Spanish painting, particularly the work of Francisco Zurbaran and Diego Velazquez. The final section of the course will consider painting in the Low Countries looking at the art of Rubens, Rembrandt, Vermeer, and others. Among the issues that will be addressed are art and spirituality, shifting modes of patronage, art and politics, and definitions of gender.

**RLT 40231. Greek Literature and Culture**

(2.5-0-3)

Survey of masterpieces of Greek literature, history, and philosophy, designed as classical background for humanities students. Readings from Homer, Aeschylus, Sophocles, Euripides, Thucydides, Plato, and Aristotle.

**RLT 40232. Religious Poetry: Herbert and Hopkins**

(3-0-3)

This course examines the work of the two strongest religious poets in the English language: George Herbert and Gerard Manley Hopkins. We will read, as closely as possible, the major poems of each writer. Also, we will attend to the religious contexts of each writer's poetry, and the influence of Herbert on Hopkins. Special attention will be given to the themes of "poetry and prayer" and "poetry and sacrament."

**RLT 40233. Seminar: Medieval Profane and Holy Quests**

(3-0-3)

The notion of quest has captivated the human imagination throughout the ages, and held a particularly prominent place in Medieval culture. This course will explore the types, meaning, and purpose of "quest" in the Middle Ages, drawing on both sacred and profane experience, as found in literary, religious, and historical works.

**RLT 40234. Hopkins and the Jesuits**

(3-0-3)

This course has two foci: a close reading of Hopkins's major poems, and careful attention to their literary and religious contexts. Particular attention will be paid to Hopkins as a Jesuit, and to that end, we will refer to the writings of St. Ignatius Loyola. The influence of Duns Scotus on Hopkins will also be considered. Hopkins's debts to his literary forebears, especially George Herbert, will be examined; and particular attention will be given to the themes of poetry as sacrament and poetry as a conductor of mystery.

**RLT 40235. En/Gendering Christianity**

(3-0-3)

This course is an introduction to feminist approaches to spiritual and philosophical traditions in the Christian West. Beginning from the pastoral and practical issues raised by gender assignments in the context of religious experience, it addresses major topics of theological thinking (such as sin, salvation, images of God, and Christology) relating historical development and contemporary feminist re-readings. The approach is both critical (i.e., analytical) and constructive; the primary focus is on Christian and post-Christian theological and literary texts, but some attention is given to other religious perspectives.

**RLT 40236. Poetry and Pragmatism**

(3-0-3)

An exploration of the complex relationships between poetry, philosophy, and science at the end of the 19th century and the beginning of the 20th century. Three American poets studied are Emily Dickinson, Robert Frost, and Wallace Stevens.

**RLT 40238. Religion and Autobiography**

(3-0-3)

A course on the spiritual journey of the individual person, drawing on diaries and autobiographies. The first half is on the story of the life in terms of feeling and

imagination and insight and choice, and the second half is on the story of the person in terms of the life project, the boundary situations of life, and conversion of the mind, of heart, and of soul. Readings: Saint Augustine, *Confessions*; Martin Buber, *The Way of Men*; Carolina Maria de Jesus, *Child of the Dark* John Dunne, *Reasons of the Heart and Search for God in Time and Memory*; Etty Hillesum, *An Interrupted Life*; C.G. Jung, *Memories, Dreams, Reflections*; and Rainer Maria Rilke, *Letters To A Young Poet* and *Reading the Gospel*. Writings: a spiritual diary (not handed in), a term paper, and a midterm take-home and a final take-home exam.

**RLT 40239. Late Antique and Early Christian Art**

(3-0-3) Barber

Art in Late Antiquity has traditionally been characterized as an art in decline, but this judgment is relative, relying on standards formulated for art of other periods. Challenging this assumption, we will examine the distinct and powerful transformations within the visual culture of the period between the third and the eighth centuries AD. This period witnesses the mutation of the institutions of the Roman Empire into those of the Christian Byzantine Empire. The fundamental change in religious identity that was the basis for this development had a direct impact upon the visual material that survives from this period, such that the eighth century witnesses extensive and elaborate debates about the status and value of religious art in Jewish, Moslem, Byzantine, and Carolingian society. This course will examine the underlying conditions that made images so central to cultural identity at this period.

**RLT 40240. Post-Holocaust Literature and Theology**

(3-0-3)

Between 1933 and 1945, the actions of the Nazi government transformed the map of the world politically, aesthetically, and theologically. The ability of the Nazis to gather the cooperation of German citizens and the citizens of other occupied countries to implement their policies against the Jews has raised questions about the claims that European civilization is based on Christianity. How could barbarism flourish in Germany, the land of poets and thinkers? Both Christians and Jews, for common and different reasons, look upon the Holocaust as an abyss, a dark night of the soul. During this semester, we shall attempt to move from horrified silence to insight into the possible frameworks for constructing theology "after the abyss." We shall also read literary works that attempt to describe the indescribable. Both literature and theology written after the Holocaust present the paradox of how to comprehend the incomprehensible. No single theologian or faith community has the answer to the problems raised by the Holocaust. No author writing in German, English, Yiddish, French, or Hebrew can describe the horrors and fully transmit the fullness of the atrocity. However, we shall attempt to read, evaluate, and—for some of us—appropriate what theologians, poets, and storytellers have written.

**RLT 40242. Dante II**

(3-0-3) Moevs

This course will compare and contrast major works of these "classical" Italian Renaissance authors.

**RLT 40243. Dante's COMMEDIA**

(3-0-3)

The course will offer a survey of major themes, scenes, and cantos in Dante's *Inferno*, *Purgatorio*, and *Paradiso*, trying to link their medieval context with our contemporary concerns and underlining the poetic value of the passages. We shall examine the overall structure of the poem and its central images of the voyage and sailing, the way in which Dante deals with shadows, his concern with creation, prophecy, and the future. We shall also analyze contrasting pairs of dramatic scenes and discuss different kinds of sublimity.

**RLT 40246. Age of Rembrandt: North Baroque**

(3-0-3)

Open to all students. This course investigates the century most fully identified with the Early Renaissance in Italy. Individual works by artists such as Brunelleschi, Donatello, Ghiberti, Botticelli, and Alberti are set into their social, political, and religious context. Special attention is paid to topics such as the origins of art

theory, art and audience, portraiture and the definition of self, Medician patronage, and art for the Renaissance courts of northern Italy and Naples.

### **RLT 40248. Religion and Politics in Comparative Perspective**

(3-0-3)

In this course, we examine various hypotheses about the relationship between religion and politics, religious institutions, and political institutions, based on evidence from across time and space (i.e., Africa, Asia, Europe, Middle East, North America and South America). The aim of the course is to think critically about the conventional wisdom concerning the relationship between religion and politics. Special attention will be focused on whether certain types of religious systems (i.e., various types of Christianity and Islam) are more compatible with and conducive to democracy than others. Students will write two short reflection papers that demonstrate familiarity with the readings, one during the first half of the semester and one during the second half of the semester. There will be a "short" midsemester exam and, a final research paper due at the end of the semester.

### **RLT 40250. Milton and Political Theology**

(3-0-3)

Using Milton as a guide, close readings of Hobbes and Spinoza.

### **RLT 40251. Northern Renaissance Art**

(3-0-3)

Open to all students. This course traces the development of painting in Northern Europe (France, Germany, and Flanders) from approximately 1300 to 1500. Special attention is given to the art of Jan Van Eyck, Rogier van der Weyden, Heironymous Bosch, and Albrecht Dürer. Through the consideration of the history of manuscript and oil painting and the graphic media, students will be introduced to the special wedding of nature, art, and spirituality that defines the achievement of the Northern Renaissance.

### **RLT 40254. Theology and the Arts**

(3-0-3)

Christian faith is expressed and shaped by a variety of media: the narratives of sacred scripture, the propositions of ecumenical councils, the moral witness of saints, etc. This course will explore how musical, visual, and literary arts have mediated Christian faith in a variety of cultural contexts. From theological perspectives, we will explore and analyze musical compositions such as the *Odes of Solomon*, Ambrosian hymns, and J.S. Bach's *Magnificat*; visual arts such as catacomb wall paintings, icons, and the Sistine Chapel ceiling; and literary arts such as *The Dream of the Rood*, G.M. Hopkins's poetry, and the short stories of Andre Dubus.

### **RLT 40258. Jesus in America**

(3-0-3)

While many modern Americans share a faith in Jesus as Messiah, Son of God, and Redeemer, they have also portrayed him as everything from a socialist to a Ku Klux Klansman, a polygamist to a black woman, an advertising executive to a Buddha-to-be. In the kaleidoscope of opinions about Jesus, we can find the very essence, character, and vitality not only of American Christianity, but of American values and beliefs, more broadly speaking. In this course, we will study depictions and representations of Jesus in American culture, primarily in the 20th century, using a variety of texts, including canonical sources, films, novels, visual art, music, scholarly criticism, and popular culture. In addition to readings, film viewings, and a group project, this senior seminar will culminate in a major research paper that will be developed throughout the semester, with extensive comments from other students and the professor.

### **RLT 40260. Anthropology of Christianity**

(3-0-3)

This course considers Christianity as a topic of anthropological study. Our goal is to explore the vast diversity of ways Christianity has been articulated and experienced through time and within different cultures, even as we seek out some of the fundamental tenants, themes, and continuities that have characterized its emergence as a global religious system, faith, and practice. Among the variations of Christianity to be studied are first-century churches in the Mediterranean region;

early churches in Africa and South America; contemporary Catholic and mainline Protestant churches; and the rapidly growing evangelical, charismatic, and Pentecostal movements. In addition to the historical and cross-cultural framework embedded within the course, topics to be considered include definitions and theories of religion; the question of conversion in Christianity; Christianity, colonialism, and capitalism; religious syncretism and enculturation; gender and women's experience within Christianity; and contemporary Christianity and the twin trends of fundamentalism and secularization. In addition to reading and participating in our in-class seminar, each student will conduct an ethnographic research project that explores some facet of Christian experience in the Notre Dame area and relates it to broader trends in America and beyond.

### **RLT 40262. Rome, Christians, and Early Europe**

(3-0-3)

The course studies continuity and discontinuity in the Mediterranean world during a formative period, the transition from Roman Empire to early medieval European kingdoms. Christianity played a vital role during this transformation, but not the only one. Beginning with a review of Roman institutions, law, culture, and religion, we will observe the changes they underwent between ca. 150 CE and ca. 750 CE. At this latter point in time, some people were still thinking of themselves as living within the Roman Empire, even though the local potentate was a non-Roman king. Also, Roman law had become Christian law, and Latin was beginning to generate the languages now collectively described as "Romance." On the fringes of Europe, in England and Ireland, meanwhile, missionaries shared with their converts not just Christianity, but also the Latin language and Latin literature, along with certain Roman concepts of culture and political organization.

### **RLT 40264. Historical Jesus**

(3-0-3)

The purpose of this course (a lecture course supplemented by readings and discussion) is to introduce the student to the major historical and exegetical problems involved in the quest for the historical Jesus, especially as pursued today in the so-called Third Quest. The course will move from initial definitions and concepts, through questions of sources and criteria, to consideration of major sayings and deeds of Jesus that may reasonably be considered historical. As time allows, major areas to be treated will include Jesus' relation to John the Baptist, Jesus' proclamation of the kingdom as future yet present, his realization of the kingdom through deeds of power (miracles) and table fellowship, the various levels or circles of followers (the crowds, the disciples, the Twelve), various competing groups (Pharisees, Sadducees), his teaching in relation to the Mosaic Law, the enigma (riddle-speech) of his parables, self-designation, final days, passion, and death. Obviously, it is more desirable that students be allowed time for discussion and questions than that all these topics be covered.

### **RLT 40266. The Monastic Way in the History of Christianity**

(3-0-3)

Although often hidden from view, even hidden from view in the Church, the monastic way is one of the oldest expressions of Christian devotion to God and neighbor, usually pursued alone communally. The purpose of this course is to explore how Christian men and women have lived this life, from earliest Christianity to the present. To that end, we will read the writings of monks of Eastern and Western Christianity, paying close attention to monastic voices from antiquity (such as Anthony, Evagrius, Basil, and Benedict), medieval Christianity (e.g., Ailred of Rievaulx, Bernard of Clairvaux, and Hildegard of Bingen, as well as Gregory Palamas and Theodore the Studite) up to the present day (Seraphim of Sarov, Thomas Merton, and Mother Maria Skobtsova). The primary format of the class will be discussion, aided by the composition of short essays throughout the course.

### **RLT 40268. Mary in the Christian Tradition**

(3-0-3)

The good news of Christianity is, first of all, about Jesus, the risen Lord, and so about us, as his brothers and sisters—about our future, our world, the church we constitute. Still, Christian preaching and art have repeatedly singled out Mary, the mother of Jesus, as an object for contemplation and loving, personal attachment, and Christian theology has repeatedly focused on her as a symbol for speculation

and a subject of debate. So Mariology, although in itself a secondary area in Christian thought, is central to any study Christian religion through the centuries, as well as a rich testing-ground for the implications of Christian belief concerning the person of Christ, the nature and future of the church, the reality of sin and redemption, and the importance of male and female images in our experience of and response to God's love. This course will survey the most important moments in the development of the church's understanding of and feeling for Mary's role in the mystery of our salvation, beginning with the New Testament and ending with our own time.

**RLT 40270. The Book of Genesis**  
(3-0-3)

The book of Genesis is arguably the most commented-upon book in the Old Testament. Nearly all of the theological themes dearest to the Bible are the subject of considerable narrative elaboration: Creation, fall, redemption, and election. This course will consider how the various stories in Genesis raise the profoundest of questions and what sort of answers it has provided the theological reader. The focus of the course will be on a close reading of the entirety of the book with the goal of mastering the whole.

**RLT 40272. Transfiguration in the Fiction of C.S. Lewis**  
(3-0-3)

This course will look at a theme that runs throughout the works of C.S. Lewis: theosis. Christianity's ultimate end is the deification of a person. In Lewis's fiction, there is a strong theme of the transfiguration of matter and the human being, and the moral/ascetical prerequisite leading up to it. This course will first use some secondary theological sources to unpack theosis in light of the Christian doctrines of creation, sin, Trinity, and Christology, and then it will turn to Lewis himself—first to his nonfiction (*Mere Christianity*, *Abolition of Man*, *Weight of Glory* essays), but our main time will be spent in his fiction (*Narnia*, *Screwtape Letters*, *Great Divorce*, *The Pilgrim's Regress*, *Till We Have Faces*).

**RLT 40274. Religion and Autobiography**  
(3-0-3) Dunne

A course on the spiritual journey of the individual person, drawing on diaries and autobiographies. The first half is on the story of the life in terms of feeling and imagination and insight and choice, and the second half is on the story of the person in terms of the life project, the boundary situations of life, and conversion of the mind, of heart, and of soul. Readings: Saint Augustine, *Confessions*; Martin Buber, *The Way of Men*; Carolina Maria de Jesus, *Child of the Dark*; John Dunne, *Reasons of the Heart and Search for God in Time and Memory*; Etty Hillesum, *An Interrupted Life*; C.G. Jung, *Memories, Dreams, Reflections*; and Rainer Maria Rilke, *Letters To A Young Poet and Reading the Gospel*. Writings: a spiritual diary (not handed in), a term paper, and a midterm take-home and a final take-home exam.

**RLT 40276. Theology of Revelation: Parable and Revelation**  
(2.5-0-3)

What do the parables of Jesus reveal? How do they reveal it? This seminar seeks to answer these questions by way of a close reading of several parables of Jesus, aided by theological reflection on the category of revelation.

**RLT 40278. Phenomenology and Theology**  
(2.5-0-3) Hart

In recent years, French phenomenologists have sought to develop new phenomenologies of Christianity. This seminar examines the attempts of three such thinkers: Michel Henry, Jean-Luc Marion, and Jean-Louis Chretien. Can God properly be called "Life?" Of what use is the distinction between the icon and the idol? How far can the model of call and response go in either phenomenology or theology? These are the questions that will mainly interest us.

**RLT 40280. Christian Autobiography**  
(3-0-3)

This course examines three major yet very different attempts at Christian autobiography: St. Augustine's *Confessions*, St. Teresa of Avila's *Life*, and John Henry Newman's *Apologia pro vita sua*. Throughout, we will attend to three demands: a close reading of the texts themselves, including their narrative and

retorical structures; a sense of how the self is imagined by the three writers; and an awareness of the authors' religious contexts.

**RLT 40352. Plato Christianus**  
(3-0-3)

This course is designed as an introduction to the philosophy of Plato, the "Platonism" (i.e., Middle Platonism, Neoplatonism) of antiquity, the transformation of Platonism by the Greek and Latin Church Fathers, and the medieval and Renaissance traditions derived from the above. In the first half of the semester, we shall survey the tradition as a whole and deal with a variety of general questions. However, particular attention will be given to two fundamental hermeneutic criteria employed by the followers of this tradition: namely, "radical selectivity" and "philosophical allegorization." In the second half of the semester, two specific texts that have arguably set the pattern for the Latin and Greek intellectual traditions, respectively, will be studied in more detail: Augustine's *On the City of God* and the works of pseudo-Dionysius the Areopagite. The course is intended to be accessible to students without knowledge of Latin or Greek. Requirement: one final paper of approximately 20 pages

**RLT 40354. Twelfth-Century Poetry and Philosophy**  
(3-0-3)

This course will aim to provide a close reading of Bernard Silvestris's *Cosmographia* and Alan of Lille's *De Planctu Naturae* against the background of early 12th-century philosophical thought and grammatical-rhetorical theory. Although it will be initially necessary to cover the philological and historical ground with some care, the course will also attempt to explore in a more speculative and creative manner the question of the kind of relation between philosophy and literature in general that works like the *Cosmographia* and *De Planctu* suggest. As stimuli to such reflections, we shall pause to examine in some detail such textual phenomena as the philosophical allegory, the hermeneutical and metaphysical implications of number, the notion of self-reflexivity, and the negative symbol. The course is intended to be accessible to students without skill in Latin (although the latter would, obviously, be an advantage). Requirement: one final paper of approximately 20 pages.

**RLT 40400. Religion and Literature**  
(3-0-3)

*Prerequisite:* (THEO 10001 OR THEO 100) OR (THEO 20001 OR THEO 200) OR (THEO 20002 OR THEO 201) OR (THEO 13183 OR THEO 180G)  
This course has as its essential context the crisis of authority of discourse in the modern period subsequent to literature gaining independence from Christianity. It focuses specifically on the three main postures literature strikes vis-a-vis confessional forms of Christianity no longer thought to have cultural capital. (1) The antithetical posture. Here, Christianity is viewed in exclusively negative terms as repressive, authoritarian, and obscurantist, the very opposite of a true humanism that is literature's vocation. Readings include Voltaire and French existentialism. (2) The retrievalist posture. This posture is fundamentally nostalgic. The loss of Christianity's cultural authority is mourned, and literature is seen as an illegitimate substitute. Readings will include Dostoyevsky, T.S. Eliot, and Flannery O'Connor. (3) The parasitic posture. Here Christianity is criticized but not totally dismissed. Portions of it are savable, especially select elements of the New Testament that emphasize human being's creative capacities. Readings include Coleridge, Shelley, and Emerson.

**RLT 40823. Death and Rebirth**  
(3-0-3)

A course on the spiritual journey through the ages: the figure Gilgamesh (the human quest of eternal life); the figure of Socrates (the sense of a deeper life that lives through death); the figure of Jesus (the I and thou with God in Christianity and how this leads to an understanding of death and resurrection, or Incarnation and Trinity); Dante and the spiritual journey (the Christian sense of a life that lives on both sides of death); Kierkegaard and the eternal self (the Christian encounter with the modern sense of selfhood); and a concluding vision (the experience of the presence of God). Requirements include a midterm and a final exam (take-home exams) and a personal essay.

**RLT 43301. Seminar: Topics in Medieval Art**

(3-0-3)

The topic and format of this course will vary from year to year.

**RLT 43345. Seminar: Out of the Purple Chamber**

(3-0-3)

Permission required. The subject of this seminar will vary from year to year.

**RLT 43347. Seminar: Greek Monumental Art**

(3-0-3)

Permission required. Seminar on specific subjects in Greek and/or Roman art.

**RLT 43348. Medieval Art Seminar**

(3-0-3)

Permission required. The subject of this seminar will vary from year to year.

**RLT 43349. Seminar: Courts of Renaissance Italy**

(3-0-3)

Permission required. Seminar on specific subjects in Renaissance art.

**RLT 43350. Seminar**

(1-0-1)

RLT concentrates only. The seminar allows for those students concentrating in religion and literature to attend designated lectures and conferences sponsored by religion and literature for one hour of credit.

**RLT 48500. Religion and Literature Thesis**

(3-0-3)

RLT concentrates only. The thesis is required for all students taking a minor in religion and literature. Students should approach Prof. Kevin Hart to determine a topic and to find an advisor.

**Department of Theology****THEO 13183. Theology University Seminar**

(3-0-3)

This course, a prerequisite to all other courses in the Theology Department, introduces the critical study of Scripture and the theological development of Christian doctrine for the first six centuries.

**THEO 20001. Foundations of Theology: Biblical/Historical**

(3-0-3)

This first course in theology offers a critical study of the Bible and the early Catholic tradition. Following an introduction to the Old and New Testaments, students follow major post-biblical developments in Christian life and worship (e.g., liturgy, theology, doctrine, asceticism), emphasizing the first five centuries. For details on emphases of individual instructors, see the Department of Theology course description booklet or the departmental website:nd.edu/-theo.

**THEO 20002. Honors Foundations of Theology: Biblical/Historical**

(3-0-3) Anderson, Cunningham, Ernst, Krieg

The first course, Foundations of Theology, introduces students to theology as a discipline through an introduction to the Bible and Christian literature of the post-biblical centuries.

**THEO 20101. Re-memembering Jesus**

(3-0-3) D'Angelo

*Prerequisite:* (THEO 10001 OR THEO 100) OR (THEO 13183 OR THEO 180G) OR (THEO 20001 OR THEO 200) OR (THEO 20002 OR THEO 201) This course looks at the traditions about Jesus as they are reconfigured by the lives and hopes of succeeding generations of Christians. It will explore the images of Jesus in the gospels, questions about the Jesus who lies behind and inspires them (the "Quest for the Historical Jesus"), the process by which the Church came to explain and relate divinity and humanity in the person of Jesus, and contemporary reappropriations of the meaning of Jesus in light of post-Holocaust, liberation, and feminist theologies. In addition to the gospels and texts from the early church, and contemporary theological essays, students will review two or more novels and two or more films that re-member Jesus and bring him back alive into a new context.**THEO 20102. Gendering Christianity**

(3-0-3) D'Angelo

*Prerequisite:* (THEO 10001 OR THEO 100) OR (THEO 13183 OR THEO 180G) OR (THEO 20001 OR THEO 200) OR (THEO 20002 OR THEO 201) This course is an introduction to feminist approaches to spiritual and philosophical traditions in the Christian West. Beginning from the pastoral and practical issues raised by gender assignments in the context of religious experience, it addresses major topics of theological thinking (such as sin, salvation, images of God, and Christology) relating historical development and contemporary feminist re-readings. The approach is both critical (i.e., analytical) and constructive; the primary focus is on Christian and post-Christian theological and literary texts, but some attention is given to other religious perspectives.**THEO 20103. The One Jesus and His Many Portraits: The Various Images of Jesus in the New Testament and Beyond**

(3-0-3) Meier

*Prerequisite:* (THEO 10001 OR THEO 100) OR (THEO 13183 OR THEO 180G) OR (THEO 20001 OR THEO 200) OR (THEO 20002 OR THEO 201) This course explores the many different faith-portraits of Jesus painted by various books of the New Testament: e.g., from suffering servant abandoned by God, through high priest interceding with God, to Godself. In each case, the course will ask how this particular portrait did or did not have an impact on subsequent Christian faith and what it may say to faith in Christ today. The course will combine a lecture format with discussions, readings, and reflections on the readings.**THEO 20104. Apocalyptic Visions**

(3-0-3)

*Prerequisite:* (THEO 10001 OR THEO 100) OR (THEO 13183 OR THEO 180G) OR (THEO 20001 OR THEO 200) OR (THEO 20002 OR THEO 201)  
At the heart of the Christian faith lies the conviction that the imminent end of God's ongoing struggle with the powers of darkness in history has been revealed. This revelation shows us that we are all, wittingly or unwittingly, participants in a cosmic drama—a war between God and Satan, Christ and Antichrist, good and evil. This course explores apocalypticism in the biblical canon, as well as the interpretation and appropriation of this literature in the early, medieval, and modern periods of the history of Christianity. It begins and ends by reflecting on the prevalence of apocalypticism in the contemporary world. Throughout we will wrestle with the question of how we should reckon with this phenomenon today.

### THEO 20201. God

(3-0-3) Daley

*Prerequisite:* (THEO 10001 OR THEO 100) OR (THEO 13183 OR THEO 180G) OR (THEO 20001 OR THEO 200) OR (THEO 20002 OR THEO 201)  
The outstanding feature of human dignity, the Second Vatican Council reminds us, is that human beings have been called to communion with God. (*Gaudium et Spes*19) In encountering the divine Mystery through our experience in the world, especially through the teaching and worship of the Church, we are led to center our lives on faith in God, ultimate reality, and to find in that faith a meaning for human life, a cause to hope and an impulse to love. In this course, we will reflect on both the challenges and the blessings of this encounter with God as transcendent Mystery, and on how our experience of God is formed by the Church preaching of the risen Jesus. Beginning with the Bible presentation of the Mystery of God, we will read selections from Church Fathers, St. Anselm, St. Thomas Aquinas, 16th-century mystics, John Henry Newman, and several 20th-century authors; we will reflect on the modern phenomenon of atheism, and on what is actually involved in living faith in a living God.

### THEO 20202. Why God Became Human

(3-0-3) Zachman

*Prerequisite:* (THEO 10001 OR THEO 100) OR (THEO 13183 OR THEO 180G) OR (THEO 20001 OR THEO 200) OR (THEO 20002 OR THEO 201)  
This course will investigate historically and systematically the central Christian confession that God became human in Jesus of Nazareth, especially in light of the death of Jesus on the cross. We will consider theologians from the patristic to modern eras, including Irenaeus, Athanasius, Anselm, Luther, Pascal, Barth, and von Balthasar. Course requirements will include four six-page comparative papers and a longer constructive paper.

### THEO 20203. Sin and Redemption

(3-0-3) O'Regan

*Prerequisite:* (THEO 10001 OR THEO 100) OR (THEO 13183 OR THEO 180G) OR (THEO 20001 OR THEO 200) OR (THEO 20002 OR THEO 201)  
This course explores the biblical and theological accounts of sin and redemption. Focus will be on the variety of perspectives in the biblical and theological accounts with regard to the meaning of sin, its social and individual significance, and on the understanding of redemption, its worldly as well as other-worldly dimensions, and its scale, whether inclusive or relatively exclusive. An attempt will be made to distinguish the biblical and theological views from the views of other religions both past and present, and to engage modern criticism.

### THEO 20205. Christian Hope: Confronting Last Things

(3-0-3) Daley

*Prerequisite:* (THEO 10001 OR THEO 100) OR (THEO 13183 OR THEO 180G) OR (THEO 20001 OR THEO 200) OR (THEO 20002 OR THEO 201)  
As individuals and as a world society, we tend to focus our energies on building a happy and secure future for ourselves; yet, in a real sense, we live surrounded by death, threatened by the impermanence of our relationships and by the fragility of life on our planet. A sense of this threat provides much of the background for human greed and violence, but it is also the context for human hope. The heart of Christian faith is to hope for life in the face of death; it is to see a lasting value in our historical choices and loves, because Jesus is risen, and because he promises us a share in his resurrection and his life. Christian hope can only be expressed in images, since what it refers to still lies in the realm of promise; yet the Christian

believer can live from that hope now, can love in the freedom it affords, because the Holy Spirit has been given us by the risen Lord as "a foretaste of things to come" (Eph. 1. 14). Through faith enlivened by the Spirit, we find in our present reality signs of a life without end that is, in a mysterious way, already ours. This course will study the details of this Christian hope for the future in its origins, development, and implications. It will study "the last things"—death, judgment, purgation, heaven, and hell—in both their individual and their social dimensions, as Christian theology has traditionally conceived them; and it will try to articulate an understanding of these objects of hope as they might best be integrated today into Christian thought and practice. In addition, it will consider the ways that a Christian sense of the finality of salvation colors and influences all the other aspects of the intelligent reflection on faith we call theology.

### THEO 20206. US Latino Spirituality

(3-0-3) Elizondo, Matovina

*Prerequisite:* (THEO 10001 OR THEO 100) OR (THEO 13183 OR THEO 180G) OR (THEO 20001 OR THEO 200) OR (THEO 20002 OR THEO 201)  
US Latino spirituality is one of the youngest spiritualities among the great spiritual traditions of humanity. The course will explore the indigenous, African, and European origins of US Latino spirituality through the devotions, practices, feasts, and rituals of the people.

### THEO 20207. Veneration of the Saints, Especially the Mother of God, in the History of Christianity

(3-0-3) Young

*Prerequisite:* (THEO 10001 OR THEO 100) OR (THEO 13183 OR THEO 180G) OR (THEO 20001 OR THEO 200) OR (THEO 20002 OR THEO 201)  
Debated as to its origins and controversial among some early modern and contemporary Christians, the long and complex tradition of devotion to the saints still flourishes in Catholicism and Orthodoxy. This course considers the beginnings of devotion to the saints in ancient Christianity, the origins of the cult of the Virgin Mary, and local transnational devotions in ancient and medieval Christianity and Byzantium. Shrines, pilgrimages, and relics with their associated commerce will receive attention, as will the reaction against such devotion in the 16th-century West. The course will also examine selected modern scholarly examinations of sainthood and cults, as well as the contemporary ambivalence about traditional devotions (especially to the Mother of God), the relationship of devotion to the saint to the developing theological themes of the person of Christ and the church as communion of saints, and the appearance and canonization of new saints in Western and Eastern Christianity.

### THEO 20208. Spirituality of the Christian East: Experience, Form, Expression

(3-0-3) Alexopoulos

*Prerequisite:* (THEO 10001 OR THEO 100) OR (THEO 13183 OR THEO 180G) OR (THEO 20001 OR THEO 200) OR (THEO 20002 OR THEO 201)  
"Christianity is more than a theory about the universe, more than teachings written down on paper; it is a path along which we journey—in the deepest and richest sense, the way of life" (Kallistos Ware). This course will introduce the student to the Christian East and will focus on its spirituality as the expression of this "journey," this "way of life." The different experiences, forms, and expressions of this spirituality will be examined and discussed during the course, having the writings of the fathers of the Christian East as a basis, a foundation, and a springboard for further reflection.

### THEO 20210. Theology of the Cross

(3-0-3) Martens

*Prerequisite:* (THEO 10001 OR THEO 100) OR (THEO 13183 OR THEO 180G) OR (THEO 20001 OR THEO 200) OR (THEO 20002 OR THEO 201)  
It is a central element of the Christian confession that in the death of Jesus of Nazareth, God has acted decisively in our favor. Jesus was not simply crucified— "he was crucified for us" (Nicene-Constantinopolitan Creed). While it is scarcely doubted that this event is central to our salvation, theologians from the authors of the New Testament through today have understood in various ways how this is so. In this course we will examine a selection of the most significant of these interpretations of the cross.

**THEO 20213. Following Jesus**

(3-0-3) Daley

*Prerequisite:* (THEO 10001 OR THEO 100) OR (THEO 13183 OR THEO 180G) OR (THEO 20001 OR THEO 200) OR (THEO 20002 OR THEO 201) Hearing Jesus' Gospel of the coming Kingdom of God, and receiving it as a word of truth and new life, has meant, since the time of Jesus, not simply accepting a new way of understanding the world, but taking on a new pattern of living, "costing not less than everything." This course will consider how the Christian tradition, since the time of the Gospels, has understood the person and work of Jesus, and will consider the impact this faith in him and in his message have had, and continues to have, on the way his disciples live in the world.

**THEO 20214. Latino Theology and Christian Tradition**

(3-0-3) Matovina

*Prerequisite:* (THEO 10001 OR THEO 100) OR (THEO 13183 OR THEO 180G) OR (THEO 20001 OR THEO 200) OR (THEO 20002 OR THEO 201) This course examines the emergence and development of Latino religion and theology in the United States. In particular, the course will explore how US Latina and Latino theologians have articulated the meaning and implications for Christian living of core theological topics such as Christology, evangelization, social justice, and liturgy.

**THEO 20215. Original Sin**

(3-0-3)

*Prerequisite:* (THEO 10001 OR THEO 100) OR (THEO 13183 OR THEO 180G) OR (THEO 20001 OR THEO 200) OR (THEO 20002 OR THEO 201) The doctrine of original sin has been elaborated in Christian theology as a way of understanding the human experience of alienation from oneself and God: "For I do not do the good that I want, but the evil I do not want is what I do," wrote Paul in his letter to the Romans. But more than just an explanation of why it's hard to be good, original sin has been a metaphor central to Christian thinking on ultimate questions: Why did God become human? What is human nature? How are we saved, and from what? Why do the innocent suffer? This course will examine the biblical and extra-biblical sources of original sin, the elaboration of the concept, and its reception in the Christian West through the Reformation. Because this topic touches on issues of sexuality, embodiment, and gender, as well as the nature and causes of human suffering, we will spend the latter part of the course examining modern perspectives on original sin, especially among liberation and feminist theologians.

**THEO 20216. Elements of Christian Doctrine**

(3-0-3) Cavadini

*Prerequisite:* (THEO 10001 OR THEO 100) OR (THEO 13183 OR THEO 180G) OR (THEO 20001 OR THEO 200) OR (THEO 20002 OR THEO 201) This course will offer a theological synthesis of basic Christian doctrine, using the articles of the Creed as the organizing principle. Readings will be drawn from a large variety of primary sources from the tradition, as well as from contemporary theologians and the first two sections ("pillars") of the catechism of the Catholic Church. This course is for those who desire an overall acquaintance with the fundamental points of what the Church believes, confesses, and teaches, offered in a style which demonstrates the situation and context of these basic doctrines within theological conversation and debate.

**THEO 20217. Christian Theology in the Middle East: Origins to the Present**

(3-0-3) Amar

*Prerequisite:* (THEO 10001 OR THEO 100) OR (THEO 13183 OR THEO 180G) OR (THEO 20001 OR THEO 200) OR (THEO 20002 OR THEO 201) The spread of Christianity from Jerusalem to Asia Minor and Europe, and the development of Christian doctrine that followed upon it, is well documented and well known. Less well known is the movement of Christianity east of Jerusalem, and the developments of Christian doctrine that attended this movement. This course will investigate the development of Christianity and Christian doctrine in the Middle East and Central Asia. This will involve consideration of the central doctrines of the Christian faith (especially the doctrines of Christ, the Church, and the sacraments) from the time they were articulated in the period of the first seven

ecumenical councils, to their development, in both continuity and contrast, in the churches of the East. Students will acquire a sense of the largely untold story of the origins and history of Christianity in the Middle East (a topic especially timely today), as well as a grasp of the fundamental Christian doctrines at stake in this history and still at stake in the present as they bear on the issue of the reunification of the churches. Readings will include documents from the councils, from relevant theologians, from local history, and native accounts, as well as archaeological evidence.

**THEO 20218. Christianity and the Political Order**

(3-0-3)

*Prerequisite:* (THEO 10001 OR THEO 100) OR (THEO 13183 OR THEO 180G) OR (THEO 20001 OR THEO 200) OR (THEO 20002 OR THEO 201) What is the relationship between Christianity and political orders? How do particular understandings of the role of the political order from a Christian perspective bear on the way in which the obligations of citizenship are understood and carried out? Does Christianity necessitate or support an endorsement or rejection of any specific political structures? When Christians participate in the political realm, does this participation have any salvific significance? What sort of participation, if any, is required by Christian faith, and to what extent should the form of participation vary depending upon the particular regimes in which we find ourselves? This course aims to address these and related questions. The first section of the course will focus on key historical moments in the development of Christian reflection on these topics. Theologians treated will include selections from the early church fathers, Augustine, Aquinas, Luther, Calvin, and selections from Radical Reformation writers. The second section of the course will put these resources from the Christian tradition in conversation with modern and contemporary authors. The goal of the course is twofold: (1) For students to know and to understand the thought of key figures in the Christian tradition with regard to these questions, and (2) for students to develop the critical skills necessary to think about the relationship between their faith and their obligations as citizens of a contemporary liberal democracy. Requirements for the course will include midterm, final, and several short essays.

**THEO 20221. In One Body Through the Cross**

(3-0-3) Wells

*Prerequisite:* (THEO 10001 OR THEO 100) OR (THEO 13183 OR THEO 180G) OR (THEO 20001 OR THEO 200) OR (THEO 20002 OR THEO 201) How has historic Christianity understood the relationship between membership in the church and Christian unity? And how have Christians in the West understood the unity of the church and her sacraments in the wake of 16th-century divisions, schisms, and the like? In what relevant sense, for instance, is the church "one," as confessed in the Nicene Creed? This course examines Scripture and the history of Christian thought on the matter of the church as a baptismal and eucharistic community. Special emphasis is placed on the achievements of the ecumenical movement in the 20th century, and on contemporary proposals and problems related to Christian unity and difference, communion, and forgiveness, particularly between and among Roman Catholic and mainline Protestant and other Reformation traditions.

**THEO 20222. Sin and Redemption: Latin Perspective**

(3-0-3)

*Prerequisite:* (THEO 10001 OR THEO 100) OR (THEO 13183 OR THEO 180G) OR (THEO 20001 OR THEO 200) OR (THEO 20002 OR THEO 201) This course will survey the topic of sin and redemption as it evolved from the Scriptures and early Church, through today with special focus on its development in Latin America (especially Mexico). In addition to the New Testament, the first half of the course will consider authors such as Irenaeus, Athanasius, Augustine, Anselm, Abelard, and Luther. For Spain, we will explore how the encounter of the religious world of Spain and pre-Columbian America gave birth to the conception of sin and redemption, expressed in today's Latin American theology, especially through popular religiosity, liberation theology, and episcopal documents like those of the Latin American Episcopal Conferences at Medellin and Puebla.

**THEO 20223. The Church We Believe In**

(3-0-3) Prügl

*Prerequisite:* (THEO 10001 OR THEO 100) OR (THEO 13183 OR THEO 180G) OR (THEO 20001 OR THEO 200) OR (THEO 20002 OR THEO 201)  
From the New Testament on, the Christian community has turned repeatedly to the formulation and description of its identity, essence, and constitutional elements. Specifying what is entailed in the claim of the creed—"I believe in the one, holy and catholic church"—has been especially necessary at certain crucial moments in the history of the Christian movement. Providing an introduction to the main themes and problems in ecclesiology (the doctrine about the Church), this course will examine the teachings of leading theologians in the patristic and medieval period (e.g., Augustine, Aquinas, Luther) and the determinations of the last two Vatican councils, largely concerned with such ecclesiological matters as the constitution of the Church, the role of the papacy, infallibility, and the universal versus local churches.

**THEO 20224. Christ and the Church in the Christian Tradition**  
(3-0-3) Canty

*Prerequisite:* (THEO 10001 OR THEO 100) OR (THEO 13183 OR THEO 180G) OR (THEO 20001 OR THEO 200) OR (THEO 20002 OR THEO 201)  
This course offers students the opportunity to explore and reflect upon the relationship between Christ and the church. The course readings, taken from Scripture, various Christian authors from different theological traditions, and recent official teachings of the Catholic Church, will allow students not only to understand historical developments in the conceptualization of this relationship, but also to learn how contemporary questions and interests shape current reflections on this topic.

**THEO 20225. The Mystery of Christ**  
(3-0-3) Barnes

*Prerequisite:* (THEO 10001 OR THEO 100) OR (THEO 13183 OR THEO 180G) OR (THEO 20001 OR THEO 200) OR (THEO 20002 OR THEO 201)  
Affirmation that Jesus of Nazareth is the Son of God stands at the center of the Christian faith, but what does this mean? A Christology, critical theological reflection on Jesus of Nazareth, attempts to offer a systematic account of Jesus Christ's identity and import. This course will introduce students to Christology, examining theologians representative of diverse historical periods and theological approaches. This chronological order will frame our focus on select Christological topics. The concern throughout will be how Christology seeks to better appreciate the mystery of Jesus Christ.

**THEO 20226. Sin and the Incarnation**  
(3-0-3)

*Prerequisite:* (THEO 10001 OR THEO 100) OR (THEO 13183 OR THEO 180G) OR (THEO 20001 OR THEO 200) OR (THEO 20002 OR THEO 201)  
In this course we will examine how Christians understand Jesus to be the savior. In what manner did he offer salvation and from what? We will first examine in some depth how leading voices in the NT understand Jesus' role in salvation, particularly against the backdrop of the OT. From what was Jesus saving people and how did his healing ministry, his teachings, his death on the cross, the resurrection, and his status as exalted Lord address this problem? Next we will consider what theologians representative of discrete theological traditions have to say about our topic (Orthodox, Protestant, Roman Catholic). Finally, we will examine two contested issues: the redefinition of sin (and thus salvation) in liberation Christology and the claim that Jesus is a savior, and not the Savior.

**THEO 20227. Pilgrimage**  
(3-0-3) Leyerle

*Prerequisite:* (THEO 10001 OR THEO 100) OR (THEO 13183 OR THEO 180G) OR (THEO 20001 OR THEO 200) OR (THEO 20002 OR THEO 201)  
This course will examine the literary record and lived experience of pilgrimage throughout Christian history by focusing on particular texts, persons and sites. To enrich our understanding of this phenomenon, we will deliberately adopt a variety of perspectives (archeological, sociological, anthropological, liturgical, and art historical). We will necessarily also consider relics and the cult of the saints.

**THEO 20229. Christianity and Mission**  
(3-0-3) Kollman

*Prerequisite:* (THEO 10001 OR THEO 100) OR (THEO 13183 OR THEO 180G) OR (THEO 20001 OR THEO 200) OR (THEO 20002 OR THEO 201)  
The coming of Christianity to most of the world has overlapped with the political, economic, and social processes associated with the term colonialism. This course will seek to understand the history of that overlap, as well as the many theological issues raised, especially for Christians in Latin America, Asia, and Africa. Questions to be considered include How has political domination, typified (though certainly not exhausted) by European colonialism, shaped Christian mission? What kinds of theological innovations emerged in the relation to colonialism, both among the colonizers and the colonized? How did colonialism create a context in which Christianity encountered other religious traditions? How does contemporary theology reflect a colonial legacy in this current apparently "post-colonial" moment? How do contemporary global political dynamics, sometimes described with reference to the notion of globalization, compare and contrast with the overt colonialisms of the past? How do contemporary theologians respond to the colonial legacy? Is there such a thing as "post-colonial" theology? Should there be such a thing? Students will write three 5-page papers and there will be a final exam.

**THEO 20230. World Religions in Christian Perspective**  
(3-0-3) Sullivan

*Prerequisite:* (THEO 10001 OR THEO 100) OR (THEO 20001 OR THEO 200) OR (THEO 13183 OR THEO 180G) OR (THEO 20002 OR THEO 201)  
The course examines the foundations of several world religious traditions (e.g., Buddhism, Taoism, Hinduism). Focusing on key religious ideas and practices, it compares and contrasts them with one another and in relation to the Christian design for life worked out in Catholic experience and theological reflection. Students will acquire a sense of what it means to reflect in a disciplined way on world religions from a Christian theological perspective.

**THEO 20231. From the Crucifixion to the Atonement**  
(3-0-3) Martens

*Prerequisite:* (THEO 10001 OR THEO 100) OR (THEO 13183 OR THEO 180G) OR (THEO 20001 OR THEO 200) OR (THEO 20002 OR THEO 201)  
It is a central element of the Christian confession that in the passion and death of Jesus of Nazareth God has acted decisively in humanity's favor. In this course we will investigate this confession. There are three questions we will attempt to answer. First, how is it that the earliest Christians came to see in Jesus' crucifixion, this act of Roman capital punishment, the decisive moment in God's plan of salvation? To help us answer this (hardly straightforward) question we will also attend to how other religious groups (esp. Gnostics and Muslims) offered alternative interpretations of Jesus' crucifixion—that this event is saving has, in fact, been seriously doubted. Second, what are the various ways in which theologians, from the authors of the New Testament through today, have comprehended the saving significance of Jesus' cross, and what are the respective strengths and weaknesses of these theories? And finally, we will enter into two of the major debates surrounding our topic: how do people receive the salvation offered on the cross, and, whether, or to what extent, do the classic Christian accounts of atonement promote violence in our society? Along the way in our readings we will encounter theologians and literary figures that represent discrete theological traditions (Orthodox, Protestant, R. Catholic).

**THEO 20232. On Conversion**  
(3-0-3) Daley

*Prerequisite:* (THEO 10001 OR THEO 100) OR (THEO 20001 OR THEO 200) OR (THEO 13183 OR THEO 180G) OR (THEO 20002 OR THEO 201)  
For all believing people, faith is a journey: a lifelong movement of growth in understanding of the divine Mystery in whose presence we live, and of commitment to serving God. Christian faith begins in Jesus' call to each person to follow him as a disciple; and while the general shape of that journey of companionship is modeled in the Gospels, it takes on very different concrete features in each particular life. In this course, we will reflect on the theological importance of conversion and spiritual growth for the life of faith, and will consider the stories of several well-known Christians (Augustine of Hippo, Francis of Assisi, Ignatius of Loyola, John Woolman, Dorothy Day, C. S. Lewis) that reveal the long-term

implications of conversion to faith. We will also reflect on loss of faith as a kind of anti-conversion peculiar to modern culture.

### THEO 20233. Called to Holiness: Sanctification in the Christian Tradition

(3-0-3) Lucas

*Prerequisite:* (THEO 10001 OR THEO 100) OR (THEO 13183 OR THEO 180G) OR (THEO 20001 OR THEO 200) OR (THEO 20002 OR THEO 201)  
Be holy, as I am holy: God calls human persons, created in the divine image but damaged by sin, to become holy and so to share in the happiness of God's own life. What is holiness, and how does God call and sanctify human beings? What kind of personal transformation is required? And, how have Christians over the ages responded to God's call? This course will explore the Church's understanding of sanctification in its varied expressions from Scripture through patristic, medieval and Reformation periods, to Vatican II and the writings of Popes John Paul II and Benedict XVI. Ways in which Christians have lived out the call to holiness will be examined (e.g., martyrdom, monasticism, ministry), while sanctification itself will be considered in relation to central aspects of Christian doctrine: the Trinity, Christ and his sacraments, theological anthropology, grace and justification, ecclesiology, and eschatology. Students may choose a service-learning component with weekly written assignments in partial fulfillment of course requirements, with a view to integrating the course material into their own experience of God's call to sanctification.

### THEO 20235. The Afterlife and the End of the World

(3-0-3) Hanneken

*Prerequisite:* (THEO 10001 OR THEO 100) OR (THEO 13183 OR THEO 180G) OR (THEO 20001 OR THEO 200) OR (THEO 20002 OR THEO 201)  
We mortals lack experience but seek knowledge of what lies beyond this life and this world. What will happen? When will it happen? What does it demand for the present? In the history of religions and within the Judeo-Christian tradition many answers have been given in many circumstances on many authorities. Tradition provides a broad framework within which claims compete, leaving each thinking recipient to form a hope for the future and a "bird's-eye" view of the present. This course focuses on reading primary texts (in translation) from the ancient world and up through contemporary theology and culture. We will read each text in historical context with a view to significance for today.

### THEO 20236. Mary Through the Ages

(3-0-3) Roy

*Prerequisite:* (THEO 10001 OR THEO 100) OR (THEO 13183 OR THEO 180G) OR (THEO 20001 OR THEO 200) OR (THEO 20002 OR THEO 201)  
A study of the Blessed Virgin Mary, Mother of God, as her figure and role in the history of salvation emerge in Scripture and the Tradition of the church. An examination of the Church's understanding of Mary as expressed in sacred and historical text, theological reflection, liturgical expression, iconographic representation, magisterial pronouncement, and the life of devotion. The course will also consider the relationship of Mariology to other branches of theology, such as protology, Christology, soteriology, ecclesiology, and eschatology, as well as the impact of the cultus of the Virgin Mary on Western art, music, and literature.

### THEO 20401. Church and Worship

(3-0-3) Driscoll

*Prerequisite:* (THEO 10001 OR THEO 100) OR (THEO 13183 OR THEO 180G) OR (THEO 20001 OR THEO 200) OR (THEO 20002 OR THEO 201)  
An analysis of the church as a community of believers and a social institution, and a study of church liturgy and sacraments. This course will center on three key areas, namely: (1) Anthropology: As humans, why do we feel the need to express ourselves and our relationship to God through ritual activity? (2) Theology: What are the Christological and ecclesiological underpinnings for the sacraments? (3) History: What is the historical development of each of the seven sacraments? What has remained constant in spite of the historical mutations?

### THEO 20402. Theology and the Arts

(3-0-3) Joncas

*Prerequisite:* (THEO 10001 OR THEO 100) OR (THEO 13183 OR THEO 180G) OR (THEO 20001 OR THEO 200) OR (THEO 20002 OR THEO 201)  
Christian faith is expressed and shaped by a variety of media: the narratives of sacred Scripture, the propositions of ecumenical councils, the moral witness of saints, etc. This course will explore how musical, visual, and literary arts have mediated Christian faith in a variety of cultural contexts. From theological perspectives we will explore and analyze musical compositions such as the *Odes of Solomon*, Ambrosian hymns, and J. S. Bach's *Magnificat*; visual arts such as catacomb wall-paintings, icons, and the Sistine Chapel ceiling; and literary arts such as *The Dream of the Rood*, G.M. Hopkins's poetry, and the short stories of Andre Dubus.

### THEO 20403. Sacraments of Vocation

(3-0-3)

*Prerequisite:* (THEO 10001 OR THEO 100) OR (THEO 13183 OR THEO 180G) OR (THEO 20001 OR THEO 200) OR (THEO 20002 OR THEO 201)  
In the Roman Catholic tradition, marriage and holy orders have been treated together as "sacraments vocation," while recent theological reflection and church teaching have emphasized how both flow from the call of baptism. This course introduces students to the history, liturgical celebration, and current issues surrounding the sacraments of marriage and holy orders. It presents marriage within the broader context of Christian commitment and holy orders within the context of Christian ministry and discipleship. Questions concerning church (What is the role of community in our relations to God?); sacrament (What are these realities imbued with the hidden presence of God?); and vocation (Who am I in God's plan for me?) are raised throughout the course.

### THEO 20404. Sacrament and Sacramental Theology

(3-0-3)

*Prerequisite:* (THEO 10001 OR THEO 100) OR (THEO 13183 OR THEO 180G) OR (THEO 20001 OR THEO 200) OR (THEO 20002 OR THEO 201)  
The seven sacraments are central to the life of the Church. The purpose of this course is to introduce students to theological understandings of the sacraments in general. However, because the sacraments are given and received in specific contexts, we will explore the theology of each sacrament individually, in its liturgical practice, examining the ways in which the rites express the theology that the Church teaches. We will discuss the historical development of sacramental theology, as well as contemporary perspectives, and students will also have the opportunity to address the sacraments from an ecumenical perspective in written assignments.

### THEO 20405. Music, Worship, and Theology

(3-0-3) Joncas

*Prerequisite:* (THEO 10001 OR THEO 100) OR (THEO 13183 OR THEO 180G) OR (THEO 20001 OR THEO 200) OR (THEO 20002 OR THEO 201)  
Music both expresses and shapes religious experience. This course will explore the practice and theory of music making in Christian worship and devotion. Special emphasis will be given to the study of music in the Bible, Gregorian chant as foundational for Roman Rite worship music; the historical development of other forms of Christian church music; and contemporary issues of music, culture, and spirituality.

### THEO 20406. Christian Liturgy and Music

(3-0-3)

*Prerequisite:* (THEO 10001 OR THEO 100) OR (THEO 13183 OR THEO 180G) OR (THEO 20001 OR THEO 200) OR (THEO 20002 OR THEO 201)  
Music has long played an important role in Christian liturgy as an artistic expression of the church's prayer and theology. Part I of this course will survey the historical development of Christian liturgy and its theological interpretation from the New Testament period forward, focusing in particular on the role of music and theology of music in liturgy. Part II will concentrate on the use of music in liturgy today, studying various official Church documents on music from Vatican II forward (including *Sacrosanctum concilium*, *Musica Sacram*, *Music in Catholic Worship*, and *Liturgical Music Today*), and drawing forth principles for determining theologically and pastorally what are the functions and appropriate uses of music in liturgy today. Assessment: there will be a midterm exam and a

final exam, and students will engage in an exercise in practical theology utilizing participant-observation methods to analyze the use of music in several liturgical events. Students will develop a final report/analysis of their observations, which they will both present in class and submit in written form.

### THEO 20407. Liturgy and Architecture

(3-0-3)

*Prerequisite:* (THEO 10001 OR THEO 100) OR (THEO 13183 OR THEO 180G) OR (THEO 20001 OR THEO 200) OR (THEO 20002 OR THEO 201) Churches are not museums, but places where the people of God come together to worship. As the forms and theologies of worship change so must the buildings where worship takes place. In this course, we will trace the past 500 years of liturgical and architectural changes in the Roman Catholic and Protestant churches.

### THEO 20408. The Sacraments of the Church

(3-0-3)

*Prerequisite:* (THEO 10001 OR THEO 100) OR (THEO 13183 OR THEO 180G) OR (THEO 20001 OR THEO 200) OR (THEO 20002 OR THEO 201) This course will study all seven of the Church's sacraments. Special emphasis will be given to the notion of sacrament, the restored rite of Christian initiation of adults, and the centrality of the Eucharist in the life of the Church.

### THEO 20410. Introduction to Liturgy

(3-0-3)

*Prerequisite:* (THEO 10001 OR THEO 100) OR (THEO 13183 OR THEO 180G) OR (THEO 20001 OR THEO 200) OR (THEO 20002 OR THEO 201) The course will introduce students to liturgy as a sacred science. The course begins with a brief analysis of the present context of liturgical studies in the Church, then proceeds to an examination of the relationship between liturgy and ecclesiology. Attention will be paid to the historical development of Catholic liturgy, culminating in the liturgical movement of the 20th century and the first papal encyclical on the liturgy, *Mediator Dei*, by Pius XII (1947). The course then examines the Constitution on the Sacred Liturgy *Sacrosanctum concilium* (1963) and the post-Vatican II liturgical rites and texts for the celebration of the Eucharist. The course concludes with a consideration of the spiritual, cosmic, and eschatological dimensions of the liturgy. Students are given the opportunity to study primary documents, both liturgical and magisterial, in good English translations, as well as helpful secondary literature. By the conclusion of the course, students will have demonstrated familiarity with the official rites and texts of the current Roman liturgy and the historical development of the Church's central act of worship, as well as its theological and spiritual foundation.

### THEO 20601. Political Theology in the Bible and Christian Tradition

(3-0-3)

*Prerequisite:* (THEO 10001 OR THEO 100) OR (THEO 13183 OR THEO 180G) OR (THEO 20001 OR THEO 200) OR (THEO 20002 OR THEO 201) In this course we will examine the major themes of the relationship between Christianity and politics by way of the careful examination of major works of political philosophy and political theology, from the Bible and Plato to early American political thought and beyond (including: Aristophanes, Augustine, Aquinas, Dante, Marsilius of Padua, Luther, Calvin, Machiavelli, Spinoza, Locke, Madison, Jefferson, Tocqueville, Hegel, Nietzsche).

Major themes include reason and revelation, the idea of a Christian polity and Christian citizenship (i.e., city of God vs. city of man); rights, duties, original sin, limitations of government, rebellion, revolution, virtues, humility, magnanimity, friendship, family, prudence, power, justice, war, religion, toleration, truth, theocracy, democracy, liberalism, civil religion, and liberty, among others.

### THEO 20602. Catholic Morality and the Good Life

(3-0-3)

*Prerequisite:* (THEO 10001 OR THEO 100) OR (THEO 13183 OR THEO 180G) OR (THEO 20001 OR THEO 200) OR (THEO 20002 OR THEO 201) What is the good life? The answer to this question, subject of reflection for millennia, depends on how one understands the world, and the human person's place

in the world. Catholic beliefs about God, creation, the human person, and Jesus Christ are the source of the Catholic vision of the good life. The purpose of this course is to explore different answers to the question of the good life, from both outside and within the Catholic tradition. Students will critically engage Biblical, theological, and philosophical texts, from before time of Christ to the present, which address the question of the good life. Students will be expected describe and charitably evaluate these various responses, with an eye toward enhancing their own response to the question of the good life. After this historical survey, the final third of the course will examine a few contested ethical issues in order to understand how competing visions of the good life play out in varying positions on difficult moral issues.

### THEO 20603. Ecology and the Christian Tradition

(3-0-3)

*Prerequisite:* (THEO 10001 OR THEO 100) OR (THEO 13183 OR THEO 180G) OR (THEO 20001 OR THEO 200) OR (THEO 20002 OR THEO 201) In this course, we will explore different Christian understandings of the relationship between human beings and nonhuman members of creation. We will begin by considering several representations of this relationship in the biblical text—especially those that can supplement our usual dependence on the Genesis creation accounts. Next, we will study a selection of historical texts that exemplify some of the major conceptions of humanity's role on earth and consider how they have influenced how we understand and treat the rest of creation. Finally we will investigate how theologians have addressed challenges to our tradition that have developed with the dawning of contemporary ecological consciousness. For example, is it accurate to claim that we have used tenets of our religious tradition to justify the pillaging of the earth? Have we characterized the world around us as something from which we must escape? Are there elements of the Christian tradition that we can draw upon to counteract these kinds of assumptions and use to construct a vision of sustainable life on earth? One of the main objectives of this class is to both critique and retrieve our biblical and historical traditions in ways that respond to contemporary concerns while avoiding uncritical anachronisms. Requirements include significant participation in class and in group work, two six- to eight-page papers, a creative group service project with an individual reflection paper, and a final exam.

### THEO 20605. Introduction to Catholic Moral Theology

(3-0-3) Clairmont

*Prerequisite:* (THEO 10001 OR THEO 100) OR (THEO 13183 OR THEO 180G) OR (THEO 20001 OR THEO 200) OR (THEO 20002 OR THEO 201) This course will be structured into three sections, addressing respectively, biblical foundations, fundamental topics, and selected contemporary ethical questions. The biblical section of the course will study some of the key ethical perspectives and teachings of the Scriptures, primarily the Gospels and the Pauline letters. This section will be followed by an introduction to several fundamental topics in moral theology, including (1) the theology of grace; (2) the orientation of ethics toward the achievement of happiness; (3) the development of the moral and theological virtues as capacities that enable us to act well; (4) the relation between moral truth and authentic human freedom; (5) the natural law, and (6) the stages and analysis of moral action. The third section of the course will consider some contemporary ethical questions in the context of this biblical and systematic framework. The course will draw primarily upon the classical Catholic tradition, as represented especially by St. Thomas Aquinas. We will also read selected sections of recent encyclical letters by Pope John Paul II including his *Veritatis Splendor (On the Splendor of the Truth)*, *Evangelium Vitae (The Gospel of Life)* and *Fides et Ratio (On Faith and Reason)*. Students will be expected to write a summary of a short reading for each class, write one five-page paper for each of the first two sections of the course, write a final 10-page paper applying what has been studied to a particular ethical question, and present a summary of this paper to the class.

### THEO 20606. Theology of Marriage

(3-0-3) Odozor

*Prerequisite:* (THEO 10001 OR THEO 100) OR (THEO 13183 OR THEO 180G) OR (THEO 20001 OR THEO 200) OR (THEO 20002 OR THEO 201) This course seeks to introduce participants to the principal elements in the Catholic tradition on marriage by examining the sources of this tradition in sacred

Scripture, the work of ancient Christian writers, the official teachings of the Church, and recent theological reflection. The method employed in the course is thus historical, scriptural, and thematic. The readings selected for this course are intended to expose students to contemporary discussion in moral theology apropos of these issues, and provide them with the necessary theological tools to critically evaluate a wide variety of ethical positions dealing with marriage in the Catholic tradition.

### THEO 20609. God, Creation, and the Environment

(3-0-3)

*Prerequisite:* (THEO 10001 OR THEO 100) OR (THEO 13183 OR THEO 180G) OR (THEO 20001 OR THEO 200) OR (THEO 20002 OR THEO 201)  
This course examines the Christian understanding of God, especially as that understanding is related to our valuation of the nonhuman world. Our semester's discussions will be divided into five subtopics. First, we will survey major portrayals of God and the importance of the nonhuman world in the Bible. Second, we will study the doctrine of the Trinity and its implications for the environment as developed in the work of select patristic, medieval, and modern theologians. Third, we will explore the religious significance of the nonhuman world in some important Catholic prayers, rituals, and forms of spirituality. Fourth, we will investigate some contemporary theological reflections on God (and especially on the doctrine of the Trinity) that strive to counteract what is taken to be a theological devaluation of the nonhuman world. Finally, insofar as time permits, we will compare the Christian doctrine of God with the basic views of other world religions and their implications for stewardship of the environment.

### THEO 20611. Relationships, Sexuality, and Christian Tradition

(3-0-3) Poorman

*Prerequisite:* (THEO 10001 OR THEO 100) OR (THEO 13183 OR THEO 180G) OR (THEO 20001 OR THEO 200) OR (THEO 20002 OR THEO 201)  
This course is an introduction to the traditions and methods of Christian ethics and Roman Catholic moral theology, especially as they are applied to human sexuality and sexual ethics. Following a brief introduction to current cultural contexts for considering human sexuality, we will compare several theoretical bases for sexual morality. We will also consider methods and theories of Christian sexual ethics. Finally, we will turn our attention to a number of contemporary issues, including marriage, extramarital sexuality, contraception, assisted reproduction, and homosexuality. The format of the course will be lecture and discussion. We will employ a number of cases and scenarios to prompt discussion and to exemplify methods and theories. Requirements include attendance at all class sessions, careful reading of the assigned texts, significant contributions in discussions, a five-page reflection paper, midterm and final exams, and a 10-page researched essay on an issue related to Christian sexual ethics. There may also be several one-page, ungraded essays assigned to promote thought and discussion on specific topics or questions.

### THEO 20612. Catholic Faith and Practice

(3-0-3)

*Prerequisite:* (THEO 10001 OR THEO 100) OR (THEO 13183 OR THEO 180G) OR (THEO 20001 OR THEO 200) OR (THEO 20002 OR THEO 201)  
This course will explore the fundamental beliefs and characteristic practices of Catholicism. Special attention will be given to the inherent unity of this faith as a sacramental approach to reality, rooted in the central Christian belief in the triune God who is the source and goal of our lives. The distinctively Catholic beliefs and practices will thus be examined in light of the Catholic interpretation of basic Christian beliefs about God, humanity, sin, and redemption. Our emphasis on the unity of Catholic faith and its implications for our lives will provide a basis for further critical and careful thought about the meaning and truth of Catholicism, especially in comparison with alternative approaches to the value and purpose of human life. Students will be encouraged to develop a project in experiential learning as one of their major requirements for this course. Those who have recently completed the Urban Plunge or a similar program will have the opportunity to explore the Catholic tradition in light of and dialogue with the insights and questions their experience may have raised. This course may be of most interest to Roman Catholics, but is open to anyone willing to engage the Christian understanding of reality as developed in the Catholic tradition. Where

practicable, major points of commonality with and difference from non-Catholic Christians will be examined.

### THEO 20614. Nature and Demands of Christian Love

(3-0-3)

*Prerequisite:* (THEO 10001 OR THEO 100) OR (THEO 13183 OR THEO 180G) OR (THEO 20001 OR THEO 200) OR (THEO 20002 OR THEO 201)  
This course will examine the place of love in the Christian life, using the love commandments as the cornerstone of a theology of love. Various aspects of love will be explored so that love for God, love for others, and love for self can be more fully understood and brought into harmony. The material will thus include a broad survey of theological and philosophical writings on love as well as an analysis of relevant biblical texts. Four unit tests will be administered, and students will compose a final paper that will help them to integrate the theoretical facets of love and apply this theory to concrete situations.

### THEO 20615. From Rome to Wall Street: The Church and Economic Life

(3-0-3)

*Prerequisite:* (THEO 10001 OR THEO 100) OR (THEO 13183 OR THEO 180G) OR (THEO 20001 OR THEO 200) OR (THEO 20002 OR THEO 201)  
The primary purpose of this course is to develop a critical understanding, through engagement with key texts and writings in the Christian tradition, of theological interpretations of the relationship between the church and the economic order. Texts from the Roman Catholic social tradition to be studied include *Rerum Novarum* and *Economic Justice for All* (the US Bishops' Letter on the US Economy). Broad theological and ethical questions to be considered include: How have fundamental Christian understandings of Creation—including teachings regarding human dignity and stewardship—shaped theological interpretations of the relationship between church and economy? What is the appropriate role of the church and individual Christians in the economic order? Is economic justice a proper concern for the church? If so, how ought the church and individual Christians work to achieve economic justice? Particular questions include attention to the tension between the ideal of poverty and the acquisition of property by the church and its members, and the role of women in economic life. Course requirements include significant participation in class discussion and group work, a community-based learning project, a midsemester paper, and a final exam. The instructor will work with gender studies and Catholic social tradition students to enhance the gender and CST content of the course through discussion and written assignments.

### THEO 20616. Theology, Ethics, and the Environment

(3-0-3) McKenny

*Prerequisite:* (THEO 10001 OR THEO 100) OR (THEO 13183 OR THEO 180G) OR (THEO 20001 OR THEO 200) OR (THEO 20002 OR THEO 201)  
Does our ecological awareness require radically new theologies and moralities? What moral claims, if any, do nonhuman entities make on us? Can current Christian and philosophical moral theories address these claims? This course raises these questions on both theoretical and practical levels. Theoretically, we will examine various theological and philosophical views of the moral status of nonhuman nature. Practically, we will explore the implications of these views for issues such as wilderness conservation/preservation, treatment of animals, agricultural biotechnology, and others. The diversity of positions we will consider will range from those who embrace standard, modern human-centered theologies and moral theories to critics (such as deep ecologists, ecofeminists, and others) who hold that the very theoretical stance of our dominant theologies and moral theories is incompatible with a genuinely ethical orientation to the environment.

### THEO 20617. Contemporary Issues in Christian Ethics

(3-0-3)

*Prerequisite:* (THEO 10001 OR THEO 100) OR (THEO 13183 OR THEO 180G) OR (THEO 20001 OR THEO 200) OR (THEO 20002 OR THEO 201)  
The purpose of this "second" course in theology is to introduce the student to the tradition and methods of Christian ethics, especially as they are applied to selected contemporary issues and several recurring moral questions in professional life. The course is divided into three sections; first, we will examine the moral

life as it has been articulated in some classical and modern theories of ethics, and we will review particular methods and themes of Christian ethics. Second, we will study contemporary issues and Christian responses in the areas of bioethics, human sexuality, and social justice. In the third section of the course, we will discuss three issues in professional ethics—deception, informed consent, and social responsibility—and evaluate the contribution of the Christian ethical tradition in addressing these issues. Format: lecture and discussion. Requirements include a five-page reflection paper, a midterm examination, a 10-page reflection paper, and a final examination.

### **THEO 20618. Christian Understanding of Human Nature** (3-0-3)

*Prerequisite:* (THEO 10001 OR THEO 100) OR (THEO 13183 OR THEO 180G) OR (THEO 20001 OR THEO 200) OR (THEO 20002 OR THEO 201)  
What does it mean to be human? Christians believe that this question can be adequately answered only in the light of divine revelation. This course will begin with an exploration of the central beliefs that shape the Christian understanding of human nature: creation in the image of God; the fall and original sin; salvation in Christ. From there we will go on to compare and contrast the Christian understanding with those of several non-Christian scientists and philosophers. Finally we will consider the Christian understanding in relation to various contemporary issues, including feminism, the environment, addiction, and the transformation of culture inaugurated by television and the computer. Course content will consist mainly but not exclusively of lectures and readings from the course packet. Requirements: midterm and final examinations; quizzes; either one six-page paper or two shorter papers.

### **THEO 20619. Rich, Poor, and War**

(3-0-3) Whitmore

*Prerequisite:* (THEO 10001 OR THEO 100) OR (THEO 13183 OR THEO 180G) OR (THEO 20001 OR THEO 200) OR (THEO 20002 OR THEO 201)  
This course examines the interrelationships between economic injustice and violence. It begins by investigating the gap between rich and poor both in the US and worldwide. We also look at the history of Christian thought on wealth and poverty. We then address the ways in which economic disparity intersects with the problem of violence in both domestic (violence against women) and political realms (war and revolution). Next, we canvass Christian thought on the use of violence. This raises the question of whether Christianity itself contributes more to violence or to peace. Finally, we pose the question of whether forgiveness for violence is advisable or feasible.

### **THEO 20620. Corporate Conscience**

(3-0-3)

*Prerequisite:* (THEO 10001 OR THEO 100) OR (THEO 13183 OR THEO 180G) OR (THEO 20001 OR THEO 200) OR (THEO 20002 OR THEO 201)  
The development of a corporate conscience involves discernment and judgment by individuals and by the various small and large groups of which individuals are a part. This course will examine how Christian moral thought, especially as it is expressed in Catholic moral theology, impacts the business decisions of individuals and the possibility of applying Christian moral principles in a business environment. The course will alternate between the study of basic values, norms and principles in Catholic theology and the values, norms and principles internal to the business practices of accountancy, finance, marketing, corporate management and governance, and the accumulation and deployment of business information. The goal of the course will be to learn strategies for dealing with situations that ask us to reconcile apparently conflicting goods, potentially diverging professional, social and religious commitments, and to envision how business practices might contribute to advancing the common good. Requirements include a midterm and a final exam and the preparation and presentation of a case.

### **THEO 20621. Medical Ethics**

(3-0-3) Mertensotto

*Prerequisite:* (THEO 10001 OR THEO 100) OR (THEO 13183 OR THEO 180G) OR (THEO 20001 OR THEO 200) OR (THEO 20002 OR THEO 201)  
A discussion of ethical problems in the medical profession in light of natural law and Christian moral principles.

### **THEO 20622. A Faith to Die For**

(3-0-3) Baxter

*Prerequisite:* (THEO 10001 OR THEO 100) OR (THEO 13183 OR THEO 180G) OR (THEO 20001 OR THEO 200) OR (THEO 20002 OR THEO 201)  
An introduction to Catholic moral theology, with an accent on how Catholic belief and practice shape the Church's understanding of the moral life. Aspects of Catholic belief and practice to be covered include baptism, penance, reading Scripture, preaching, prayer, the Eucharist, martyrdom, religious life, marriage, and mission. In the context of these beliefs and practices, several leading themes in Catholic moral theology will be explored (e.g., sanctification, the eternal and natural law, and virtues and vices), and several moral issues will be examined (e.g., abortion, suicide, capital punishment, economic justice, and war and peace). This course explores an understanding of the moral life in terms of participation in the life, death, and resurrection of Christ, but at the same time, it avoids construals of the moral life that rest merely on pious exhortations ("Jesus says"), assertions of ecclesial authority ("the Church says"), or invocations of negative moral prohibitions ("thou shalt not"). Thus, the "faith" will be presented as a set of beliefs and practices that are disturbingly radical, demanding that Christians die to themselves, yet also deeply attractive, in that dying serves as a passageway to true life. As suggested by the title, a leading emphasis in the course is that only a faith worth dying for can forge a moral life that is truly worth living. Readings include selections from Scripture, liturgical texts, theological and moral treatises, encyclicals, and the documents of Vatican II, plus Augustine's *Confessions*, Cantalamessa's *The Eucharist; Our Sanctification*, Graham Greene's *The Power and the Glory*, short stories of Flannery O'Connor, Dorothy Day's *The Long Loneliness*, and Helen Prejean's *Dead Man Walking*. Evaluation is based on a midterm, a final, several short papers, and interactive class participation.

### **THEO 20623. Vocation and Leadership**

(3-0-3) Pfeil

*Prerequisite:* (THEO 10001 OR THEO 100) OR (THEO 13183 OR THEO 180G) OR (THEO 20001 OR THEO 200) OR (THEO 20002 OR THEO 201)  
This course will invite students to consider the meaning of vocation in relation to the social mission of the church. Beginning with a theological understanding of the significance of vocation and charisms, this course will provide a narrative-based exploration of the vocational journey of prominent figures in the Catholic social tradition such as Francis of Assisi, Dorothy Day, Cesar Chavez, and Oscar Romero. The emergent understanding of vocation will be held in conversation with the witness given by leaders from other religious traditions, e.g., Badshah Khan, Gandhi, and Thich Nhat Hanh. Using the method of service learning, this course will invite students to develop an awareness of their social justice commitments in light of their own sense of vocation. More information about the course format is explained in the Learning Agreement and Application Form, available at the Center for Social Concerns.

### **THEO 20625. Discipleship: Loving Action**

(3-0-3) Pfeil

*Prerequisite:* (THEO 10001 OR THEO 100) OR (THEO 13183 OR THEO 180G) OR (THEO 20001 OR THEO 200) OR (THEO 20002 OR THEO 201)  
This course is for students returning from summer service internships or other service experiences who desire an extended opportunity for reflection and analysis. Some of the major themes to be discussed are: Christian compassion, discipleship, and Catholic social teaching. The course culminates with a comprehensive research project on a theological question or issue that emerges from the summer and/or other service experiences and is explored with other academic disciplines. More information about the course format, the experiential learning method and the process of evaluation is explained in the Learning Agreement and Application, available at the Center for Social Concerns.

### **THEO 20626. Science and Theology**

(3-0-3) Ashley

*Prerequisite:* (THEO 10001 OR THEO 100) OR (THEO 13183 OR THEO 180G) OR (THEO 20001 OR THEO 200) OR (THEO 20002 OR THEO 201)  
Both science and religion generate assertions that are held to provide true descriptions of the world and our place in it. Both science and theology subject these assertions to disciplined inquiry and testing within specific communities:

of scientists, in the former, and in a religious community and its historical tradition, in the latter. In societies (like ours) in which both science and religion are strong and pervasive, these processes of enquiry and testing overlap and interrelate in complicated ways, resulting sometimes in conflict and sometimes in mutual enrichment. This course investigates these interrelations. We begin with a consideration of the Galileo affair, move to a study of the conflict of evolution and creationism in the United States, and conclude with a selected topic concerning the ethical issues involved in the use of technology. Requirements: short (one-page) written assignments on the readings, two in-class exams, and a final.

### THEO 20628. War, Law, and Ethics

(3-0-3) Pfeil

*Prerequisite:* (THEO 10001 OR THEO 100) OR (THEO 13183 OR THEO 180G) OR (THEO 20001 OR THEO 200) OR (THEO 20002 OR THEO 201)  
This course is designed to explore the ethical and legal considerations related to war and the use of force. Beginning with a historical overview of Christian thinking on war and peace, we will develop an account of various ethical positions on the use of force, including views rooted in the just war tradition and in pacifism. We will also consider the ethical implications of contemporary issues related to the use of force; e.g., sanctions, war crimes, humanitarian intervention, and terrorism. In collaboration with the Center for Social Concerns and La Casa de Amistad, students will have the opportunity to engage in service learning by working with students from Washington High School to collect stories from local war veterans as part of the Library of Congress, "Veterans History Project."

### THEO 20630. Health Care Ethics for the Twenty-First Century

(3-0-3) Ryan

*Prerequisite:* (THEO 10001 OR THEO 100) OR (THEO 13183 OR THEO 180G) OR (THEO 20001 OR THEO 200) OR (THEO 20002 OR THEO 201)  
This course explores the importance of religious and moral values for the life and death choices we make, individually and as a society. Basic principles and methods of contemporary bioethics will be introduced, and a range of issues considered, e.g., medical research, physician assisted suicide, health care reform, new genetic technologies, responding to AIDS. Especially recommended for students planning on a career in medicine or science. Lecture/discussion format. Requirements: short papers, midterm, final.

### THEO 20633. Introduction to Christian Ethics

(3-0-3)

*Prerequisite:* (THEO 10001 OR THEO 100) OR (THEO 13183 OR THEO 180G) OR (THEO 20001 OR THEO 200) OR (THEO 20002 OR THEO 201)  
What are the moral implications of being a Christian? What responsibilities do Christians have in their personal conduct, family life, and in their relations to the larger world? What should a Christian community look like? This course will examine these questions through a survey of the sources, scope, and decision-making process involved in different approaches to Christian ethics. Equal stress will be placed on ethical theory and practical issues, from sexual ethics to social justice and war, from individual to global ethics. Students will have the opportunity to replace many traditional course requirements with a service-learning placement in one of several local service organizations. All students will engage in a semester-long writing project in which they research and reflect on one ethical issue in depth.

### THEO 20634. Love and the Christian Tradition

(3-0-3) Helmer

*Prerequisite:* (THEO 10001 OR THEO 100) OR (THEO 13183 OR THEO 180G) OR (THEO 20001 OR THEO 200) OR (THEO 20002 OR THEO 201)  
This intermediate theology course explores the rich and diverse history of love in the Christian tradition. It begins with an examination of the biblical terms for love and traces their theological development through the varied writings of Augustine, Julian of Norwich, Abelard and Heloise, Aquinas, Luther, Edwards, Kierkegaard, Reinhold Niebuhr, Martin Luther King, Jr., and others up to the present. Through the lens of love, we will carefully attend to specific, pivotal moments that mark Christianity's historical and contemporary engagements with its own resources, external intellectual currents, and an array of moral, social and cultural demands.

The course generally follows the outline sketched by Bernard Brady's *Christian Love*, and further primary readings will augment Brady's text.

### THEO 20635. The Ethics of Energy Conservation

(3-0-3) Pfeil, Vichit-Vadakan

*Prerequisite:* (THEO 10001 OR THEO 100) OR (THEO 13183 OR THEO 180G) OR (THEO 20001 OR THEO 200) OR (THEO 20002 OR THEO 201)  
This is a joint theology and engineering course exploring the ethics of energy conservation by using the method of community-based learning. Students will begin by using the university campus as a "trial laboratory" for measuring energy efficiency and thinking creatively about possible energy conservation measures. We will then ask them to conduct a limited energy efficiency and conservation study for selected nonprofit organizations in the South Bend community. This course will fulfill a number of civic learning goals, including the cultivation of theological and scientific competence in environmental ethics; the identification of leadership skills necessary to address the concrete concerns facing nonprofit organizations as they strive to meet pressing human needs in an environmentally sound manner; and, formation of consciences sensitive to the social responsibility of caring for the environment. Maximum enrollment: 20 students. By permission only.

### THEO 20636. Catholic Social Thought: Globalization and Human Rights

(3-0-3) Ryan

*Prerequisite:* (THEO 10001 OR THEO 100) OR (THEO 13183 OR THEO 180G) OR (THEO 20001 OR THEO 200) OR (THEO 20002 OR THEO 201)  
The Roman Catholic Church has long been a champion of universal human rights. Today, the Church and all who promote and defend the causes of justice within and between nations, must ask what it means to promote the dignity of all peoples in a global age. Is it possible to work for a global common good in a world of such pronounced religious, cultural, economic, and political differences? This course will test the hope and the challenge of the Catholic social tradition's confidence in human rights by engaging current international debates over access to health care, the use of military force, international economics, and ecological responsibility. Students will be introduced to the core documents and principles of Catholic social thought, will learn the basic theological and philosophical concepts that underlie the defense of human rights, and will acquire the background to critically participate in current debates over the viability of human rights language. Lecture/discussion format; three shorter papers; final exam

### THEO 20637. Biomedical Ethics

(3-0-3) McKenny

*Prerequisite:* (THEO 10001 OR THEO 100) OR (THEO 13183 OR THEO 180G) OR (THEO 20001 OR THEO 200) OR (THEO 20002 OR THEO 201)(THEO 10001

*Corequisite:* THEO 22637

A discussion of ethical problems in the medical profession in light of natural law and Christian moral principles.

### THEO 20639. Conscience, Calling, and Character

(3-0-3) Clairmont

*Prerequisite:* (THEO 10001 OR THEO 100) OR (THEO 13183 OR THEO 180G) OR (THEO 20001 OR THEO 200) OR (THEO 20002 OR THEO 201)  
This course is intended to be an introduction to Catholic moral theology customized for those discerning a career as a business professional. In the wake of ethics failures at a number of prominent corporations, business leaders have renewed their call for ethical behavior and have begun to establish criteria for hiring morally thoughtful employees and to institute ethics education in the workplace. In the first part of the course, we will examine Catholic theological ideas about conscience and how it functions in the process of making a moral decision. In the second part of the course, we will examine a selection of Catholic writings on the idea of vocation and calling, as well as the nature of human work, the relationship between workers and management, and the norms of justice that ought to govern these relations. Finally we will examine ideas about character and virtue to assess the challenges and opportunities for moral formation in a business context. Class format will combine analysis of theological texts and discussion of business cases.

Course requirements include a midterm and final examination and a group project.

### **THEO 20803. God's Grace and Human Action**

(3-0-3) Wawrykow

*Prerequisite:* (THEO 10001 OR THEO 100) OR (THEO 13183 OR THEO 180G) OR (THEO 20001 OR THEO 200) OR (THEO 20002 OR THEO 201) What are the respective roles of God and the human person in salvation? Are ideas of human freedom and of the value of human acts compatible with a belief in God as the source of grace and redemption? Christian theologians throughout the centuries have hotly debated these and other questions about salvation. This course analyzes the positions articulated by such figures as Augustine, Aquinas, Luther, and Calvin, and examines how they shaped the Catholic-Protestant debate about the role of good works, and of God, in salvation.

### **THEO 20805. Vatican II History and Consequences**

(3-0-3)

*Prerequisite:* (THEO 10001 OR THEO 100) OR (THEO 13183 OR THEO 180G) OR (THEO 20001 OR THEO 200) OR (THEO 20002 OR THEO 201) The *Aggiornamento* or "bringing up to date" that occurred at the Second Vatican Council involved a quest for a deeper understanding of how the Gospel of Jesus Christ might speak more effectively to the modern world through the Catholic Church and sought to identify practical and pastoral ways of applying the Gospel not only to society-at-large but to the Church itself as well. This course provides a review of the theological history of the council, an exploration of the work of the theologians and bishops at the council itself, and in its documents, and the consequences of the council in the life of the Church since 1965. There will be an optional service component for this class that attempts to apply some of the principles of the council by working in various forms of ministry in the local church.

### **THEO 20807. Catholicism**

(3-0-3) McBrien

*Prerequisite:* (THEO 10001 OR THEO 100) OR (THEO 13183 OR THEO 180G) OR (THEO 20001 OR THEO 200) OR (THEO 20002 OR THEO 201) A comprehensive exposition of Catholic theology from a historical, doctrinal, and ecumenical perspective. The course addresses the following questions: the inter-relationships among faith, theology, and belief; the meaning of human existence (a multidisciplinary exploration); the problem of God (revelation, religious pluralism, providence, the Trinity, etc.); Jesus Christ (New Testament data, doctrinal development, contemporary views, including a discussion of Jesus' self-consciousness, sexuality, and sinlessness); the Church (New Testament data, history, Vatican II, mission, sacraments, authority, ministry, Mariology, etc.); and Christian existence (ethics, spirituality, eschatology).

### **THEO 20808. Fundamental Theology**

(3-0-3)

*Prerequisite:* (THEO 10001 OR THEO 100) OR (THEO 13183 OR THEO 180G) OR (THEO 20001 OR THEO 200) OR (THEO 20002 OR THEO 201) Contemporary theologians hotly debate the nature, purpose, and possibility of fundamental theology. However individual theologians understand it, fundamental theology includes the method(s) of theology, conceptions of faith, relation, and religious experience, and the critique and defense of the rationality of normative Christian faith. This course will probe these central themes of fundamental theology.

### **THEO 20809. Interpreting Suffering**

(3-0-3)

*Prerequisite:* (THEO 10001 OR THEO 100) OR (THEO 13183 OR THEO 180G) OR (THEO 20001 OR THEO 200) OR (THEO 20002 OR THEO 201) Suffering, as it has been interpreted or experienced by theologians, mystics, martyrs, victims, and survivors, has profoundly shaped Christian theology. Focusing particularly on Christology and Christian discipleship, this course will consist of three parts. Part I will look at how some of the earliest teachings of the church developed out of a need to interpret authoritatively the suffering Christ and the suffering of the early Christian martyrs. Part II will consider the suffering of Christ as it was understood systematically and/or lived spiritually by key medieval and

reformation thinkers. In light of these traditional theological responses to suffering, Part III will consider a variety of modern theological attempts to confront the radical human suffering of the 20th century. This course will have two goals: (1) to reflect on how theology talks about Christ and Christian discipleship in the face of human suffering; and (2) to reflect on how experiences of suffering have shaped (and continue to shape) theological discourse. Requirements: three short papers (with opportunities for experiential learning), class participation, midterm, and final.

### **THEO 20811. Jesus and Salvation**

(3-0-3) Hilkert

*Prerequisite:* (THEO 10001 OR THEO 100) OR (THEO 13183 OR THEO 180G) OR (THEO 20001 OR THEO 200) OR (THEO 20002 OR THEO 201) An exploration of the mystery of Jesus the Christ and the experience of salvation through examination of the life, ministry, death, and resurrection of Jesus (Part I); the development of classic Christian doctrine (Part II); and selected contemporary perspectives and questions (Part III).

### **THEO 20812. Concept of Resurrection/Bible**

(3-0-3)

*Prerequisite:* (THEO 10001 OR THEO 100) OR (THEO 13183 OR THEO 180G) OR (THEO 20001 OR THEO 200) OR (THEO 20002 OR THEO 201) The first half of this course focuses on the interpretation of the New Testament accounts of the empty tomb, the resurrection appearances, and the ascension of Jesus. Selected Old Testament readings throw light on the Jewish and biblical background to these resurrection traditions in the New Testament. The purpose of this study is (1) to provide a historical verdict on the reported Easter events and (2) to assess the theological significance of the New Testament accounts of these events. The second half of this course focuses on ecclesiastical practices and doctrines that are related to belief in the resurrection of Jesus. Attention is given to the rites of baptism, Eucharist, laying on of hands, etc. A brief survey is made of heretical beliefs related to the nature of Jesus' resurrection. The overall purpose of this course is to stimulate theological reflection on the subject of resurrection.

### **THEO 20813. The Problem of Human Suffering**

(3-0-3) Ashley

*Prerequisite:* (THEO 10001 OR THEO 100) OR (THEO 20001 OR THEO 200) OR (THEO 20002 OR THEO 201)

If religion has often been a source of strength and consolation in the face of human suffering, it is also true that the presence of meaningless suffering in human experience has posed one of the greatest challenges to religious practice and thought. We will examine this issue by studying classics in the Christian tradition, including the scriptural locus of later theological reflection, the Book of Job. After considering answers to the problem of suffering as it has traditionally been posed, we will look on the new shape it has assumed in the modern age, the result of historical catastrophes like the Holocaust. Authors considered include Augustine of Hippo, C.S. Lewis, Fyodor Dostoyevsky, Gustavo Gutierrez, Johann Baptist Metz, and Elie Wiesel.

### **THEO 20815. The Catholic Experience**

(3-0-3) Cunningham

*Prerequisite:* (THEO 10001 OR THEO 100) OR (THEO 13183 OR THEO 180G) OR (THEO 20001 OR THEO 200) OR (THEO 20002 OR THEO 201) This course has three quite specific aims: (1) to describe that form of the Christian tradition, both in doctrine and practice, which is called Catholic; (2) to argue that within the Catholic tradition there are different "ways" of being a Catholic; (3) to outline a general way of being a Christian within the Catholic tradition—we will call that "way" a "spirituality." Theology 20815 will meet weekly for a lecture followed by discussion groups. Attendance will be required. Each week a short reflection paper (two pages) will be readied for the discussion section. In addition, there will be an essay-style midterm and final.

### **THEO 20818. Religious Autobiography**

(3-0-3) Dunne

*Prerequisite:* (THEO 10001 OR THEO 100) OR (THEO 13183 OR THEO 180G) OR (THEO 20001 OR THEO 200) OR (THEO 20002 OR THEO 201)

A course on the spiritual journey of the individual person, drawing on diaries and autobiographies. The first half is on the story of the life in terms of feeling and imagination and insight and choice, and the second half is on the story of the person in terms of the life project, the boundary situations of life, and conversion of mind, of heart, and of soul. Readings: Saint Augustine, *Confessions*; Martin Buber, *The Way of Man*; Carolina Maria de Jesus, *Child of the Dark*; John Dunne, *Reasons of the Heart and Search for God in Time and Memory*; Etty Hillesum, *An Interrupted Life*; C.G. Jung, *Memories, Dreams, Reflections*; Rainer Maria Rilke, *Letters to a Young Poet*. Writings: a spiritual diary (not handed in), a personal essay, and a midterm take-home and a final take-home exam.

### THEO 20819. Religion and Psychology

(3-0-3) Burrell

*Prerequisite:* (THEO 10001 OR THEO 100) OR (THEO 13183 OR THEO 180G) OR (THEO 20001 OR THEO 200) OR (THEO 20002 OR THEO 201)  
To show how the quest for psychological explanation can raise issues classically identified as religious, we shall explore how the psychological articulation of these issues addresses the "task" of becoming a Christian. Beginning with Aristotle's *Ethics* to explore the most common idiom for human action, we jump to Kierkegaard's *Sickness Unto Death* and then enter the "psychological revolution" with Sigmund Freud's *Civilization and Its Discontents*, followed by Carl Jung's *Psychology of the Transference*. By that time we will be ready to appreciate Sebastian Moore's *The Crucified Jesus is No Stranger*, testing his work against two diaries: Ruzbihan Baqli's *Unveiling of Secrets: Diary of a Sufi Master*, and Etty Hillesum's *An Interrupted Life*. A series of exercises (one-page papers) are designed to help us learn the language of these authors. A final paper offers a way to link that language with more explicitly theological inquiry. A midterm (in two parts) and a final exam give opportunities for synoptic grasp.

### THEO 20821. The Mystery of Being Human

(3-0-3)

*Prerequisite:* (THEO 10001 OR THEO 100) OR (THEO 13183 OR THEO 180G) OR (THEO 20001 OR THEO 200) OR (THEO 20002 OR THEO 201)  
This course will explore some key questions of human existence in relation to basic Christian beliefs about human life and destiny. What is the meaning of human dignity, personhood, and community in light of the Christian claims that we are created in the image of God and baptized into the image of Christ? How are we to understand the reality of evil in the world and the fundamental ambiguity of human experience in relation to the symbol of "original sin"? What do "graced human existence" and "relationship with God" mean? Do they affect the way we experience and live everyday life? How can Christians live in hope in the face of suffering and death?

### THEO 20822. What Catholics Believe

(3-0-3) Gorski

*Prerequisite:* (THEO 10001 OR THEO 100) OR (THEO 13183 OR THEO 180G) OR (THEO 20001 OR THEO 200) OR (THEO 20002 OR THEO 201)  
A theological exploration of the basic content and practice of the Catholic faith. The focus is on the fundamentals that form the foundation of Catholicism and against which everything else is explained or judged. The aim of this course is not simply to educate students about Catholicism. Rather, it intends to facilitate their personal appropriation of the Catholic tradition: that is, to challenge and help them reason critically for themselves about the meaning and practical implications of their faith. Some of the questions students will ponder concern God, Jesus Christ, the church, Christian spirituality, and moral behavior. But since we raise these questions in an attempt to come to terms with the meaning of our own lives, we begin with the question of our own human existence: Who am I or who are we? The course is based on the conviction that all theological questions start with us as the ones who pose the questions in the first place. While the approach taken will be one that appeals immediately to critical reason rather than to conversion of the mind and heart, the aim ultimately is to help students discern, respond to, and be transformed by the presence of God in their lives, and to work for the continuing renewal of the world in light of this discernment of God.

### THEO 20823. Catholic/Orthodox/Protestant: A Theological Comparison

(3-0-3) Fagerberg

*Prerequisite:* (THEO 10001 OR THEO 100) OR (THEO 13183 OR THEO 180G) OR (THEO 20001 OR THEO 200) OR (THEO 20002 OR THEO 201)  
This course is an introduction to the fundamentals of Catholic doctrine, but it will accomplish this end by examining Catholicism in contrast to Eastern Orthodoxy and Protestantism. The purpose of making such a comparison is twofold: first, to discern what is distinctive to the Roman Catholic tradition through critical comparison and contrast; second, to advance ecumenical understanding by making students aware of the issues that originally separated these Christian bodies, and what progress toward unity has been made. The course will begin with teachings held in common by the three traditions (nature of God, creation, Christology, atonement) and then move on to issues over which divisions have occurred (sin and the nature of human beings, the Trinity, Scripture and tradition, sacraments and worship practices, and the papacy). Since a religious tradition is more than its *confessions* alone, we will also pay some attention to different cultural manifestations, such as art, music, architecture, and ritual.

### THEO 20825. World Religions and Catholicism in Dialogue

(3-0-3) Gorski

*Prerequisite:* (THEO 10001 OR THEO 100) OR (THEO 13183 OR THEO 180G) OR (THEO 20001 OR THEO 200) OR (THEO 20002 OR THEO 201)  
A theological exploration of Hinduism, Buddhism, Taoism, Judaism, Islam, and the relationship of Christianity to those religions. The goal of this exploration is specifically (1) to set forth the essential characteristics of the world's great religions, (2) to disengage the essential differences between Christianity and the other world religions, (3) to identify the distinctiveness of Catholicism within the family of Christian traditions, and (4) to examine historically and systematically the Christian theological appraisal of other world religions. Thus, the course will enable the students to gain a deeper understanding of Christianity by "passing over" into and experiencing as well as appraising the different major religious traditions of the world. To enhance the learning experience, the course will use the BBC film series titled *The Long Search*. Each of these hour-long films focuses on perspectives of the world's major religions.

### THEO 20826. Eschatology

(3-0-3)

*Prerequisite:* (THEO 10001 OR THEO 100) OR (THEO 13183 OR THEO 180G) OR (THEO 20001 OR THEO 200) OR (THEO 20002 OR THEO 201)  
The Heaven's Gate cult and David Koresh's Branch Davidians. The enormous popularity of the "left behind" novels. What people believe about the end time really matters. Eschatology is the study of the "last things." Traditionally, for an individual these "last things" are death, judgment, heaven, and hell. But eschatology also encompasses speculation about the fate of the larger cosmos, both earthly (animal, vegetable, and mineral) and heavenly (the physical universe as well as heavenly creatures, angelic and demonic). This course addresses eschatology chronologically. It begins in the Hebrew and Christian Scriptures, moves to the millenarian controversies of the early church, and explores the eschatological hopes of the Middle Ages. It looks at Luther's opinions of the last things, American apocalyptic movements, and 20th-century systematic theologies of eschatology. It will also examine Islamic eschatology and the contribution of women such as Hildegard of Bingen to the topic. In Judeo-Christian Scriptures and thought, eschatological themes are often articulated in a narrative form with plot and characters. At this point in time, the evangelical/fundamentalist "left behind" novels, based on the Book of Revelation, are extremely popular. This class will not read those books, but it will read two Catholic eschatological novels, *A Canticle for Leibowitz* and *Pierced by a Sword*. *A Canticle for Leibowitz* that narrate Cold-War fears of nuclear destruction. *Pierced by a Sword* places Armageddon, the ultimate showdown between good and evil, on the "God Quad" of the University of Notre Dame! Reading these novels gives the students the opportunity to apply what they have learned about the historical sweep of eschatology to a 20th-century context in an enjoyable way.

### THEO 20827. Christianity and World Religions

(3-0-3)

*Prerequisite:* (THEO 10001 OR THEO 100) OR (THEO 13183 OR THEO 180G) OR (THEO 20001 OR THEO 200) OR (THEO 20002 OR THEO 201)

The purpose of this course is to introduce the student to the basic teachings and spiritualities of Hinduism, Buddhism, and Islam. We will approach these religions both historically and theologically, seeking to determine where they converge and differ from Christianity on such perennial issues as death, meaning, the nature of the ultimate mystery, the overcoming of suffering, etc. We will also examine some traditional and contemporary Catholic and Protestant approaches to religious pluralism. Our own search to know how the truth and experience of other faiths is related to Christian faith will be guided by the insights of important Catholic contemplatives who have entered deeply in the spirituality of other traditions. By course's end we ought to have a greater understanding of what is essential to Christian faith and practice as well as a greater appreciation of the spiritual paths of others. Requirements: Short papers, midterm exam, and final exam.

### **THEO 20829. Jesus: Christianity and Islam**

(3-0-3)

*Prerequisite:* (THEO 10001 OR THEO 100) OR (THEO 13183 OR THEO 180G) OR (THEO 20001 OR THEO 200) OR (THEO 20002 OR THEO 201)

We will examine several bodies of writings: the Qur'anic material on Jesus, corresponding biblical material, and Islamic polemics against Christian doctrine. Through these writings we will seek both to better understand the Islamic and the Christian Jesus, by examining questions of scripture, prophecy, and salvation. Students are expected both to become conversant in these questions and to reflect theologically on their own response to the Islamic challenge of Christian teachings.

### **THEO 20830. Regarding the Islamic Challenge to Christianity**

(3-0-3) Reynolds

*Prerequisite:* (THEO 10001 OR THEO 100) OR (THEO 13183 OR THEO 180G) OR (THEO 20001 OR THEO 200) OR (THEO 20002 OR THEO 201)

While many Christians have described Islam as a Christian heresy, many Muslims consider Christianity to be an Islamic heresy. Jesus, they maintain, was a Muslim prophet. Like Adam and Abraham before him, like Muhammad after him, he was sent to preach Islam. In this view, Islam is the natural religion—eternal, universal, and unchanging. Other religions, including Christianity, arose only when people went astray. Therefore, Muslims have long challenged the legitimacy of Christian doctrines that differ from Islam, including the Trinity, the incarnation, the cross, the new covenant, and the Church. In this course, we will examine Islamic writings, from the Qur'an to contemporary texts, in which these doctrines are challenged. We will then examine the history of Christian responses to these challenges and consider, as theologians, how Christians might approach them today.

### **THEO 20831. Divine Providence and Human Suffering**

(3-0-3) Ernst

*Prerequisite:* (THEO 10001 OR THEO 100) OR (THEO 13183 OR THEO 180G OR THEO 200) OR (THEO 20001 OR THEO 200) OR (THEO 20002 OR THEO 201)

Christians profess belief in a God who, being both all-powerful and all-good, generously provides for human persons and lovingly wills their happiness and fulfillment. But how is this belief compatible with the human suffering observable, in innumerable forms, throughout the world? If such suffering is part of the divine plan, does that mean that it is, in fact, willed by God (which would seem to jeopardize divine benevolence)? Or if it is not included in God's plan for humanity, does that mean that the suffering that nevertheless occurs is somehow beyond the reach of divine power or concern (thus seeming to jeopardize either omnipotence or benevolence)? This course offers a systematic and historical understanding of the doctrine of divine providence, a doctrine that is essential to the Christian perception of the divine/human relationship. The course is systematic in that it will attend to the interconnections between this doctrine and various other aspects of the Christian belief system (e.g., creation, free will, sin, grace, redemption, prayer). It is historical in that it will include consideration of sources from across the full sweep of Christian history. Finally, the exploration of the variety and richness of the theological tradition on this topic will allow for reflection on the experiential and pastoral implications of Christian belief today.

### **THEO 20833. Jesus Christ and Hope**

(3-0-3) Krieg

*Prerequisite:* (THEO 10001 OR THEO 100) OR (THEO 13183 OR THEO 180G) OR (THEO 20001 OR THEO 200) OR (THEO 20002 OR THEO 201)

This course critically elucidates the primary Christian truths concerning Jesus Christ. In particular, it inquires into the meaning of Jesus' proclamation of "God's kingdom" as well as into the significance of Jesus' suffering and death, resurrection, and "second coming." The course draws on pertinent texts from the Bible, Christian tradition, church teachings, and contemporary writings. It requires two in-class tests, quizzes, class participation, and the final examination.

### **THEO 20835. The Church in the World**

(3-0-3)

*Prerequisite:* (THEO 10001 OR THEO 100) OR (THEO 13183 OR THEO 180G) OR (THEO 20001 OR THEO 200) OR (THEO 20002 OR THEO 201)

Does the Church have anything relevant to say in response to the challenges facing the modern world? Given the increasingly technological, scientific and secular orientation of modernity, it appears to some that the Church has nothing substantive to contribute and is thus increasingly relegated to the margins. This course will examine such questions by exploring the nature and mission of the Church with special emphasis on its relationship to the world. The ecclesial community is called to proclaim the good news of Jesus Christ to all the ends of the earth, yet it must discern how to complete this mission in a way that both accurately preserves the Gospel message and communicates it effectively within a variety of cultures and a plurality of world-views. In order to explore the character of the Church's mission in light of the changes and challenges of the world, the semester is divided into three parts. The first section will survey key historical and theological developments that have deepened the Church's self-understanding and informed its way of relating to the world. The second part will examine the documents and theology of Vatican II as a recent and essential expression of the Church's identity and mission. Finally, the course will consider the Church's position on several important issues such as reproductive rights, economic injustice, war, and interreligious dialogue in order to study current ecclesial efforts to proclaim the good news of Jesus Christ while speaking meaningfully to a contemporary audience. Given these aims, the course will undertake a study of the Church that is historical and systematic with an eye toward helping students better understand and critically reflect upon the Christian tradition and the concerns facing the Church today.

### **THEO 20836. God, Human Beings, and Salvation**

(3-0-3)

*Prerequisite:* (THEO 10001 OR THEO 100) OR (THEO 13183 OR THEO 180G) OR (THEO 20001 OR THEO 200) OR (THEO 20002 OR THEO 201)

At the heart of the Christian faith lies the conviction that sinful human beings are redeemed and saved through Jesus Christ, who introduces them into a new and grace-filled relationship with God. While such a belief is universal to all Christians, the specific way in which redemption and salvation are understood has assumed varied expressions throughout the history of Christian thought. This course will explore Christian attempts to understand human salvation with particular focus on the notion of "justification"—the movement of a human person from a state of sin into a state of grace. Central to this exploration will be the study of how God and human beings both occupy meaningful roles in the process of justification and the attainment of eternal life. As they relate to this theme, the course will also engage topics including Christ's role as savior, faith, grace, merit, sin, free will, and predestination. Surveying justification from a historical perspective, the course will offer students the opportunity to compare and evaluate diverse viewpoints using skills and vocabulary acquired during the semester.

### **THEO 20837. Art/Theological Imagination**

(3-0-3) Babka

*Prerequisite:* (THEO 10001 OR THEO 100) OR (THEO 13183 OR THEO 180G) OR (THEO 20001 OR THEO 200) OR (THEO 20002 OR THEO 201)

What role does art and creative expression play in the task of theology, the disciplined reflection on the content of faith? As Fr. Aidan Nichols points out, the Church's tradition is never accessible in itself, in its pure form, but only via some concrete mediation, such as the liturgy, sacraments, and art and iconography. Art maintains our memory of divine revelation and energizes the human imagination

for the divine. In this class, we will first consider the meaning and function of theological aesthetics, then take a historical tour of some of Christendom's most beautiful religious art to examine its relationship to doctrine. Along the way, we'll consider intersections between beauty and justice, between art and devotion, and between classical and modern religious art.

### **THEO 22637. Biomedical Ethics Discussion**

(0-1-0)

*Corequisite:* THEO 20637

A discussion of ethical problems in the medical profession in light of natural law and Christian moral principles.

### **Upper-Level Electives**

*Prerequisites:* Most require six credits in theology, but see Department for details.

### **THEO 30001. Intensive Elementary Hebrew**

(3-0-3)

This six-week intensive language course will be devoted to learning the grammar of biblical Hebrew. Throughout the course, we will focus on developing reading and comprehension skills in biblical Hebrew through the study of biblical texts. In addition, students will learn how to use reference grammars, concordances, and apparatus to the *Biblia Hebraica*. The course encourages students to think about the grammatical forms and their implications for biblical interpretation.

### **THEO 30002. Know Your Catholic Faith: Prayer**

(1-0-1) Cunningham

This course examines the theological underpinnings of the Catholic doctrine of prayer drawing on the fourth section of the *Catechism of the Catholic Church*. In the light of those theological principles, various kinds of prayer (liturgical, devotional, contemplative, etc.) are discussed. Short written exercises done for each class and clear evidence of participation in discussion based on those exercises are the basis for grading. Each class ends with participation in Sunday Vespers at the Basilica.

### **THEO 30003. Elementary Hebrew II**

(3-0-3) Vanderkam, Schweitzer

This is a two-semester, introductory course in biblical Hebrew; under normal circumstances, the student must complete the first to enroll in the second. The fall semester will be devoted to learning the grammar of biblical Hebrew. The spring semester will be divided into two parts. For the first six weeks, we will finish and review the grammar. In the remaining part of the course, we will read and translate texts from the Hebrew Bible, Qumran, and Rabbinic literature. The course will focus on developing reading and comprehension skills in biblical Hebrew through the study of biblical texts. In addition, students will learn how to use reference grammars, concordances, and apparatus to the *Biblia Hebraica*. The course encourages students to think about the grammatical forms and their implications for biblical interpretation.

### **THEO 30004. Introduction to Christian Latin**

(3-0-3) Sheerin

This class has two goals: to improve the student's all-around facility in dealing with Latin texts and to introduce the student to the varieties of Christian Latin texts. Medieval Latin II, a survey of medieval Latin texts, follows this course in the spring term.

### **THEO 30005. Catechist Formation**

(1-0-1)

The one-credit course is offered for students who are enrolled in the catechist program through campus ministry. Students sign up to serve as catechists in local parishes and take this course to prepare them for their ministry. The goals of the class are (1) to offer an overview of catechetical documents and directives in the church; (2) to explore lesson planning and curriculum for religious education; and (3) to share practical applications for creative teaching and classroom management.

### **THEO 30006. Faith and Revelation**

(1-0-1) Elizondo

Preliminary notes: Christianity is basically about the communication of God's message (offer) of salvation to humanity (revelation) and our acceptance (faith) or rejection of this offer. From the time of the Council of Trent (1500s) until the time of the Second Vatican Council (1960s), the emphasis was on the content of this message usually presented as "propositions of faith" to be believed. Revelation was identified as "verbal truths." Vatican II, after much heated debate, shifted the emphasis from the content of revelation to the dynamics of revelation—to revelation as a living act. The understanding of faith also shifted from an emphasis on an acceptance of certain truths and disciplines to a personal encounter and relationship with the living God through Jesus Christ.

### **THEO 30007. Know Your Catholic Faith: Christianity, Life, Morality**

(1-0-1) Malloy

The course will introduce Catholic moral theology with a focus on appropriate scriptural passages, on the historical evaluation of the Catholic moral tradition, and on the resources available for contemporary moral reflection.

### **THEO 30008. Know Your Catholic Faith: Jesus**

(1-0-1)

This course will look at the Christian hope for the resurrection of the body, as that hope is grounded in our confession that Jesus, who was crucified for us, has been raised by the Father. Beginning with a consideration of key passages on death and resurrection in the Old and New Testaments, it will focus then on classic passages in the Christian theological tradition and in contemporary theology, which articulate just what that hope for the full redemption and transformation of our human existence implies, and how it is rooted in our understanding of what has already happened in the Paschal Mystery.

### **THEO 30009. Knowing Your Catholic Faith: Original Sin**

(1-0-1) Ashley

This course begins with the definition and explanation of the doctrine of original sin as it is contained in the *Catechism of the Catholic Church* and selected other Church documents. Then we will examine how the doctrine arose, beginning with scriptural texts, moving through elected patristic documents, and then moving to modern attempts to make sense of the doctrine in the light of developments in our knowledge of human origins and history.

### **THEO 30011. Know Your Catholic Faith: Mary**

(1-0-1) Matovina

This course, which will be given in the form of an intensive, on-campus retreat on a single weekend, will combine readings, lectures, discussions, common prayer, and quiet reflection on the subject of the mystery of God. After considering how God is presented in some major passages of the Old and New Testaments, we will discuss the presentation of God as mystery, and of the ways we come to know and speak of God, in the catechism of the Catholic Church. We will then discuss selected passages from St. Augustine's *Confessions* and from the works of Karl Rahner and C.S. Lewis, to get some sense of how the Christian theological tradition has dealt with God's being, God's knowability, and God's nearness.

### **THEO 30012. Know Your Catholic Faith: Eucharist**

(1-0-1)

The Eucharist is, as the catechism of the Catholic Church stresses, the "source and summit of the Christian life." This course examines Catholic teaching about this central sacrament through the Catholic catechism; papal and other ecclesiastical documents; and the writings of St. Thomas Aquinas. Particular attention will be given to real presence, and, to the ways in which the eucharistic Christ promotes spiritual growth.

### **THEO 30013. Know Your Catholic Faith: Matrimony**

(1-0-1)

This course is an introduction to the core teachings of the Roman Catholic Church on the sacrament of matrimony. The course is based on the *Catechism of the Catholic Church* (1994) and exposes students to both historical and contemporary writings on the theology of marriage.

**THEO 30014. Know Your Catholic Faith: The Mass**

(1-0-1) Fagerberg

Each one-credit course in the Know Your Catholic Faith Series will reflect on a central feature of the Catholic faith, so that students come away with a clear idea of what the Church holds on these topics as well as a basic theological and personal understanding of them. This course focuses on the Catholic Mass, and will begin with a theology derived from the structure of the ritual, then choose additional areas of discussion: e.g., historical origins, ecumenical questions, liturgical symbolism in the Mass, roles of priest and laity, sacrificial and sacramental dimensions, etc.

**THEO 30015. Know Your Catholic Faith: Ignation Spirit**

(1-0-1) Daley

This course, which will be conducted in the intensive "retreat" style on a single weekend, invites students to learn first-hand about the distinctive approach to contemplative prayer aimed at conversion of life and practical decisions for discipleship that is classically embodied in St. Ignatius Loyola's *Spiritual Exercises*. After an introductory lecture on the theology of Christian prayer and the distinctive role of Ignatius in Christian spirituality, students will participate in lectures and presentations on the text and structure of the exercises, and will then be asked to pray through the various meditations and considerations Ignatius offers, in a brief but concentrated way. As background to the course, students will be expected to have read the section on prayer in the *Catechism of the Catholic Church* and Ignatius of Loyola's autobiography.

**THEO 30016. Know Your Catholic Faith: Identity of Jesus**

(1-0-1) Anderson

This course will attempt to answer the question: Just who was Jesus of Nazareth and what are the implications of this person for me? We will try to answer these questions through a careful reading of selected biblical texts and an examination of how the distinctive identity of Jesus has been imitated in the life of the church through the lives of various saints. Throughout the course we will combine historical questions concerning who was Jesus with the pressing issues of our own day: who is Jesus for me.

**THEO 30017. Catechist Formation**

(1-0-1) *Prerequisite:* The one-credit course is offered for students who are enrolled in the catechist program through campus ministry. Students sign up to serve as catechists in local parishes and take this course to prepare them for their ministry. The goals of the class are (1) to offer a overview of catechetical documents and directives in the church; (2) to explore lesson planning and curriculum for religious education; and (3) to share practical applications for creative teaching and classroom management.

**THEO 30018. ND Vocation Initiative**

(3-0-3) Poorman

This course is meant to prepare the undergraduate resident counselors — known as "mentors-in-faith" — of the NDVision high school summer retreat program. This preparation includes developing small-group facilitation skills, acquiring the necessary theological understandings upon which the program is built, and building community. The culminating project of the course is a short Christian witness on one of approximately six themes that incorporates one's own life experience as well as one's faith-based reflections.

**THEO 30019. ND Vocation Initiative Music**

(2-0-2) Warner

The NDVI music class is for the student music leaders for the Notre Dame Vocation Initiative. Training in this choir begins at the start of the spring semester (each January); the choir meets once every week throughout the spring semester. The initial responsibilities lie with learning all the choral music, mass settings, responsorial psalms, canticles, and service music that accompanies the weeklong NDVI gatherings in the summer. Most of this repertoire is written for four-part harmony; each student must be thoroughly competent in his or her respective voice part. Additionally, the choir is the core group for the various (three) scriptural skit presentations that take place weekly. This work is further complemented

by the choir members taking part in small-group discussions with the high school campers, as time allows.

**THEO 30020. A Theological Exploration of Vocation**

(1-0-1)

The purpose of this course is to foster a sense of vocation among our students, inviting them to become more aware of how they can live their whole lives as a response to a call from God. We hope to help young men and women realize, through their own faith experience, that the reality of Christian "vocation" invites each of them in some particular way to live as committed disciples of Christ in a challenging world. Through the decisions that they make every day as young adults they explore their own vocation. In order to achieve these stated goals, we will study the lives of 50 saints, holy men and women who responded to the call to follow Christ in their lives. Encyclical letters, Church doctrine, and other resources on vocation will be used to demonstrate what vocation means in the Catholic tradition.

**THEO 30021. Liturgical Choir**

(1-0-1) Walton

Study, rehearsal, and performance of sacred choral music of high quality from plainchant through music composed in the 21st century. Membership in the 65-voice SATB ensemble is by audition and limited to undergraduate and graduate students. The choir sings each Sunday at the 10:00 a.m. Solemn Mass at the Basilica of the Sacred Heart, for Sunday evening vespers, and at special University liturgies and concerts throughout the year.

**THEO 30022. Women's Liturgical Choir**

(1-0-1) McShane

The University of Notre Dame Women's Liturgical Choir, under the direction of Andrew McShane, is a group of approximately 60 women who lead the liturgical music for the Saturday 5:00 p.m. Vigil Mass in the Basilica of the Sacred Heart. The Women's Liturgical Choir is also heard at Sunday Vespers, weddings, Junior Parent's Weekend, Advent lessons, and carols and other special University liturgies. Each spring semester, the choir tours within the United States, and at the end of the academic year, presents a concert of sacred music at the Basilica of the Sacred Heart. The repertoire of the Women's Liturgical Choir includes chant, Renaissance polyphony, and music from the 18th through 20th centuries. Rehearsals are held on Monday and Wednesday evenings from 5:00 to 6:30 p.m., and on Saturday's from 4:00 to 5:00 p.m. in Room 329 of the Coleman-Morse Center. If you are a female student, staff, or faculty member from the Notre Dame, St. Mary's, or Holy Cross family and are interested in joining the choir, please contact Andrew McShane at 1-7800 or e-mail [mshane.1@nd.edu](mailto:mshane.1@nd.edu).

**THEO 30023. Folk Choir**

(1-0-1) Warner

Work with the folk choir, which continues to build the repertoire for Catholic school use. Class meets for seven weeks. (Second summer elective)

**THEO 30024. Know Your Catholic Faith: Sin and Forgiveness**

(1-0-1) Anderson

This course will examine what the Bible has to teach us about the nature of human sin (original and otherwise) and how God's merciful nature time and again overwhelms it. It should provide a good window into the penitential disciplines of Lent and the joy of Easter. Class sessions will be devoted to a discussion of classic Biblical texts that have dealt with this theme (such as the book of Jonah and the story of the prodigal son) and how the Christian tradition has understood them.

**THEO 30025. Facilitating Growth in Faith**

(0-0-0.5) Poorman

This class serves as a practicum allowing the mentors in faith from the NDVision Summer Program to reflect theologically on their catechetical ministry with high school students during each of four, one-week sessions. As such, this course will complete the educational objectives begun in THEO 30018, 30019, and 30020. As a field education integrative seminar, this course will include interactive lectures, small-group discussion sessions, and case-study work on topics having to do with mentoring others in their personal and communal growth in faith and in

their awareness of how to live their Christian vocations. Related theological topics include Christological and pneumatological perspectives on discipleship, grace, conversion, evil and human suffering, prayer, living the sacramental/liturgical life of the Church, becoming the body of Christ, discerning the presence and action of God in our lives, and giving witness to faith in service and justice.

**THEO 30026. Know Your Catholic Faith: Resurrection**

(1-0-1) Daley

This course offers a brief theological introduction to the doctrine of the resurrection, based on the catechism of the Catholic Church and expanded theologically by readings from traditional and contemporary writers.

**THEO 30027. Know Your Catholic Faith: God**

(1-0-1) Daley

Faith is the sense of God is real—as the most real reality there is, a reality more immediate to us than anything else that confronts us in everyday experience. Yet God is also veiled to faith—not a problem, but a mystery—a reality that is intrinsically beyond our ability to fit into the limited forms of words and ideas. To believe in God is a kind of knowing: a personal knowledge that gradually grows in us, and that involves, at the same time, trust, gratitude, and love. In this brief course, we will reflect together on some texts that have shaped the Church's sense of God: passages from the Old and New Testament; an oration of St. Gregory of Nazianus; St. Anselm's *Proslogion*; two questions from St. Thomas Aquinas' *Summa Theologiae*; a section from C.S. Lewis' *Mere Christianity*; and some writings on God by Pope Benedict XVI. Our purpose will be to develop a deeper sense of the God "in whom we live and move and have our being" (Acts 17.28), to whom we pray, in whose life and blessing we share.

**THEO 30028. Know Your Catholic Faith: God is Love**

(1-0-1) Jenkins, Cunningham

For five Sundays during Lent, we will consider closely the first encyclical *Deus Caritas Est* ("God is Love") by Pope Benedict XVI. The class will meet on the Sunday evenings of Lent from 6:00 to 7:00 followed by participation at Sunday Vespers in the Basilica. Attendance at all sessions and a weekly short reflection paper will be required in order to gain the one credit. Copies of the encyclical are available in the Theology Office (131 Malloy Hall). Prof. Lawrence S. Cunningham and Father John Jenkins, C.S.C., will teach the course.

**THEO 30101. Augustine and Bonaventure**

(3-0-3)

A course devoted to what used to be called philosophical psychology. The goal will be to understand some of the ways the Augustinian tradition in philosophy attempts to make sense of the soul, in terms of mind, spirit, and will, but especially in terms of the heart. To be read are Augustine's *Confessions* and *De Trinitate*, and Bonaventure's *The Mind's Road to God*.

**THEO 30201. Migration and Catholicism**

(1-0-1) Groody

This course examines the international phenomenon of migration, the factors that give rise to it, and its effects on people. We will examine the Catholic documents that address the issue of migration

**THEO 30202. Building Civilization of Love**

(1-0-1) Signer

This course is an experience of service, based on faith, fostering theological reflection on inter-faith dialogue. Students will travel to Camp Brotherhood in Skagit County, Wash., during fall break, and meet and work with Jewish, Muslim, and Protestant and Catholic Christians on a Together We Build, a Habitat For Humanity "build," constructing migrant worker housing. While in the Seattle area, students will also meet with leaders of faith communities and visit places of worship. This weeklong experience will provide a perspective from which to think theologically on inter-faith dialogue. This course aims to foster inter-faith life by providing a basic understanding of Judaism and Islam (with a particular focus on the Catholic understanding of these religions), a side-by-side experience of service with members of other faiths, and an education in learning to think theologically about inter-faith experience and about dialogue. Readings will include *Nostra*

*Aetate* and other church documents pertaining to inter-faith dialogue, as well as contemporary theological treatments. Participation and one reflection paper.

**THEO 30203. Christianity in the Middle East**

(3-0-3) Amar

This course will examine the origins and development of Christianity in the Middle East where Semitic language and culture molded the indigenous "Oriental" churches of the region. Topics include Semitic-Christian spirituality, Christianity in India and China, the impact of Islam on the Middle East Christianity, and the modern diaspora: Europe and the Americas. Drawing on native accounts, and the latest archaeological evidence, we will piece together the largely untold story of Christianity in the Middle East.

**THEO 30204. Augustine and William James**

(3-0-3)

A course devoted, for the most part, to a careful reading of significant parts of Augustine's *Confessions* and James' *The Variety of Religious Experience*. The goal is to come to an understanding of what these two great philosophers and psychologists can teach us about the spiritual quest.

**THEO 30205. Kierkegaard**

(3-0-3)

This course will be devoted to a central theme in Kierkegaard's ethics; i.e., his discussion of the religious commandment to love God and thy neighbor as thyself. We will proceed by way of a slow and careful reading of his *Works of Love*.

**THEO 30206. The Catholic Reformation**

(3-0-3)

This course will examine some of the main historical realities, theological developments, and traditions of spirituality within Roman Catholicism ca. 1450–ca. 1700, the period of Catholic reform both before and after the emergence of the Protestant Reformation. The class format will be two lectures plus one discussion-based tutorial section per week, the latter based on the reading of primary sources in translation. Major topics to be discussed include the character of the late medieval Church and reforming efforts within it (e.g., the Observantine movement, Christian humanism); Roman Catholic response to the Protestant Reformation, including the Roman Inquisition; the revival of existing and emergence of new religious orders (especially the Society of Jesus); the Council of Trent and its implementation among the clergy and laity; Catholic missionary activity in Asia and the Americas; post-Tridentine Catholic art and scholarship; the relationship between the Church and European states in the 16th and 17th centuries; Jansenism; and the flowering of Catholic spirituality in the 17th century.

**THEO 30207. The Romans and Their Gods**

(3-0-3)

An introduction to the way in which the Roman conceived of, worshipped, and communicated with the myriad gods of their pantheon. The course will focus first on conventional religious rituals and their cultural value, and secondly on the success of Roman polytheism in adapting to changing historical and social conditions. Particular attention will be paid to the so-called "mystery religions," including Christianity, and their relationship to conventional forms of religious behavior.

**THEO 30208. The Paschal Mystery in the Latino Community**

(1-0-1) Elizondo

This is an intensive immersion experience in the Latino ritual celebrations of Holy Week, combined with a theological reflection based on the experience and appropriate Scripture. The students are required to write a final reflection paper.

**THEO 30209. Canon and Literature of Islam**

(3-0-3)

This course is an introduction to the religious literature of the Arab-Islamic world. Emphasis is on works from the classical and medieval periods of Islam, roughly from the 7th to the 14th century of the Common Era. We will read selections from the Qur'an (the sacred scripture of Islam), the Hadith literature (sayings attributed to the prophet Muhammed), the biography of the Prophet, commentaries on the Qur'an, historical and philosophical texts, and mystical poetry. All texts

will be read in English translation. No prior knowledge of Islam and its civilization is assumed, although helpful.

### **THEO 30210. Religion and Politics**

(3-0-3)

An examination of the linkage among religious beliefs, world views, group identifications, political attitudes, and behavior, based on literature in political science, sociology, psychology, and theology. Topics include the meaning and measurement of religiosity; religious and anti-religious values embedded in American political institutions; religious world views and political philosophy; cue giving and political mobilization by religious groups, denominational traditions, partisanship, and issue positions; religious movements, social conflict, and political coalitions.

### **THEO 30211. Philosophy of Judaism**

(3-0-3)

An attempt to come to a reasonable understanding of the philosophy of Judaism as presented in Abraham Joshua Heschel's masterwork, *God in Search of Man: A Philosophy of Judaism*.

### **THEO 30212. Women and American Catholicism**

(3-0-3)

This course is a survey of the history of American Catholic women from the colonial period to the present. Through a combination of lectures, reading, and discussion, we will explore the following themes and topics: the role of religious belief and practice in shaping Catholics' understanding of gender differences; the experience of women in religious communities and in family life; women's involvement in education and social reform; ethnic and racial diversity among Catholic women; devotional life; the development of feminist theology, and the emergence of the "new feminism" as articulated by Pope John Paul II. We will seek to understand how Catholic women, both lay and religious, contributed to the development of Church and nation, and examine how encounters with the broader American society have shaped Catholic women's relationship to the institutional Church over the last three centuries.

### **THEO 30213. Women and Religion in US History**

(3-0-3)

The course is a survey of women and religion in America during the 19th and 20th centuries. Among others, we will consider the following themes: how religion shaped women's participation in reform movements such as abolition, temperance, and civil rights; how religious ideology affected women's work, both paid and unpaid; the relationship between religion, race, and ethnicity in women's lives; female religious leaders; and feminist critiques of religion. We will examine women's role within institutional churches in the Protestant, Catholic, and Jewish traditions, as well as raise broader questions about gender and religious belief. How did religious belief affect women both as individuals and in community? How could religion be used to both reinforce and subvert prevailing gender ideology?

### **THEO 30214. Chinese Ways of Thought**

(3-0-3) Jensen

This is a special topics class on religion, philosophy, and the intellectual history of China that introduces the student to the world view and life experience of Chinese as they have been drawn from local traditions, as well as worship and sacrifice to heroes, and the cult of the dead. Through a close reading of primary texts in translation, it also surveys China's grand philosophical legacy of Daoism, Buddhism, "Confucianism," and "Neo-Confucianism" and the later religious accommodation of Christianity and Islam.

### **THEO 30216. Chinese Mosaic: Philosophy, Politics, and Religion**

(3-0-3)

This is a special topics class that introduces the diverse life ways constituting the puzzle of the Chinese people. The course will chart this terrain of current Chinese imagination as it has been shaped from the contending, and often contentious, influences of religion, philosophy, and politics, introducing students to the heralded works of the Chinese intellectual tradition while requiring critical engagement with the philosophic and religious traditions animating this culture. Thus, as

they learn about China, students also will reflect on how Chinese and Westerners have interpreted it.

### **THEO 30217. Reading the Qur'an**

(3-0-3) Reynolds

To Muslims the Qur'an is the uncreated, eternal Word of God. As Jesus Christ is to Christians, the Qur'an to Muslims is the fullest expression of God's mercy and concern for humanity. It is both the source of complete spiritual wisdom and the constitution for a more perfect society. In the present course, we will encounter this revered text with the following goals: to examine the history of the Qur'an's composition and reception; to explore the major themes of the Qur'an; to discuss new theories on and debates over the Qur'an, and, finally, to research the Qur'an's statements on issues of contemporary interest, especially sex, politics, and war.

### **THEO 30218. The Vulgate and Related Texts**

(3-0-3)

Readings and critical discussion of the various layers of text, commentary, and glosses in the Vulgate Bible: (1) Jerome's translation from the Hebrew (Canonical Books of the Hebrew Scriptures) including his introductions and recent secondary scholarship on St. Jerome; (2) Jerome's revised Gospels, with particular attention to St. Luke; (3) a glossed commentary on the Gospel of St. Luke recently purchased by Notre Dame and Newberry Library (Notre Dame-Newberry ms. no. 9); and (4) a transcription and evaluation of the Notre Dame-Newberry glosses. The class will have access to the manuscript itself, as well as photographic reproductions. An elementary knowledge of Latin is prerequisite; students will be expected to translate in class and to read from reproductions of medieval manuscripts.

### **THEO 30220. The Reformation**

(3-0-3) Gregory

*Corequisite:* HIST 32352

A narrative history of Christianity in Western Europe from ca. 1500 to ca. 1650, which takes an international and comparative perspective, including Catholicism, Protestantism, and radical Protestantism. Topics covered include Christianity on the eve of the Reformation, Christian humanism, Luther and the German Reformation, the Peasants' War and Anabaptism, the English Reformation, Calvin and Calvinism, Catholic Reform and the Council of Trent, the French Wars of Religion, confessionalization, the Thirty Years War, and the English Revolution. Major themes include matters of religious content (doctrinal positions and devotional sensibilities), the relationship between different Christian groups and political regimes, the impact of religious changes across the population, and the definitive emergence of Christian pluralism. Lectures plus discussion.

### **THEO 30221. Islam and Muslim/Christian Dialogue**

(3-0-3) Omar

The course is designed to introduce students to medieval Muslim perspectives of the Christian "other" and how these resonate in contemporary relations between Muslims and Christians. It will focus on Muslim-Christian relations in the modern/post-modern period, with particular attention to contexts of conflict and the potential for dialogue, solidarity, and interreligious peace building.

### **THEO 30222. The Worlds of Buddhism**

(3-0-3) Gimello

A thematic introduction to the pan-Asian (i.e., South, Southeast, and Central Asian as well as East Asian) Buddhist tradition exploring the fundamentals of Buddhist doctrine and practice, while also sampling major themes in the religion's social, cultural, and material history. Among the particular topics to be covered are the life of the Buddha (history and hagiography), the "Four Noble Truths" (the essentials of the Buddhist "creed"), the Buddhist canon (the nature and scope of Buddhist scripture), Buddhist cosmology (Buddhist conceptions of the formation and structure of the universe, i.e., of time and space), Buddhist monasticism, meditation and the Buddhist contemplative life, Buddhist ethics, the ritual lives of Buddhists, Buddhism and politics, Buddhist "family values," Buddhism and the arts, etc.

### **THEO 30401. Writing the Rites: Liturgical Books**

(3-0-3)

This is a theology course about liturgical books, their development through history, and their role in ritual practice. The course introduces and maintains a dynamic relationship between three main themes: interdisciplinary study, material culture of the book, and principles of pastoral liturgy. Participants will gain practical skills in manuscript studies and liturgy planning. Background in disciplines outside of theology is welcome. The course may be of special interest to those considering graduate work in the humanities, ministry, library science, and archival studies. Intense participation from students and interaction with the instructor and other experts is required. In the process, students will become familiar with several resources unique to our University: the Department of Special Collections, the Medieval Institute, the Center for Pastoral Liturgy, the Basilica of the Sacred Heart, the Church of the Loretto, and the Schola Musicorum.

### THEO 30601. Christian Love

(6-0-6)

This class explores the Christian understanding of love through close reading of a range of Christian classics on the topic from Tertullian to the early Reformation. The course's goal is to arrive at an understanding of the central themes and technical vocabulary of Christian thought on this question, and to encourage critical engagement with what the tradition claims.

### THEO 30602. Christianity and Ecstatic Life

(3-0-3)

A central aspect of the Christian vision is its articulation of the ecstatic movement of the self and communities away from immanent satisfactions and toward God. This movement itself is complex: It involves, on the one hand, intellectual and moral conversion, and intellectual and moral journey on the other. Importantly, however, both conversion and journey are always plotted against the background of the goal of conversion and journey; that is, real encounter with God. The course focuses on all three dimensions of the ecstatic movement, that is, conversion, journey, and encounter as they are envisaged and variously calibrated throughout the Christian tradition. Included among the leitmotifs of the course are Christian interpretation of the Song of Songs to extract a specific kind of Christian eroticism and the issues of whether a vision of God is possible in this life, and, if so, what are its contours and limits. Authors include Origen, Athanasius, Augustine, Gregory the Great, Hildegard of Bingen, Bernard of Clairvaux, Bonaventure, Dante, Luther, the Anabaptists, and Pascal.

### THEO 30604. Dorothy Day and the Catholic Worker Movement

(1-0-1)

This course will examine the life and writings of Dorothy Day, the "mother" of the Catholic Worker Movement and its ongoing inspiration. We will read her autobiography, *The Long Loneliness*, and other of her writings.

### THEO 30605. Life, Death, and Morality

(1-0-1) Poorman

The purpose of this course is to introduce the student to three contemporary moral issues centered on the beginning and end of human life: assisted reproduction, end-of-life discernment, and abortion. We will study and discuss the contributions of Catholic Church teaching and moral theology to the consideration of these issues. The course will be a lecture-and-discussion format on two consecutive evenings.

### THEO 30801. Holy Fools in Christian Tradition

(3-0-3)

Through the analysis of a variety of texts ranging from the New Testament books to hagiographies and philosophical treatises, we will examine different forms of holy foolishness in spiritual and cultural traditions of Eastern and Western Christianity and establish their cultural bearings. Concepts under discussion will include asceticism; sanctity; heresy; canonization; and hagiography. Among the course readings will be the First Epistle of the Apostle Paul to the Corinthians; Early Christian Paterika; individual vitae of Byzantine holy fools (St. Simeon of Emessa, St. Andrew of Constantinople); controversial lives of Christian saints (*Life of Alexis the Man of God*); *Lives of Eastern Orthodox Saints* (Kieve Cave Monks; St. Basil the Fool of Moscow); *Lives of Western Christian Saints* (St. Francis of Assisi, Margery Kempe), and later elaborations on the subject of folly found

in such works as *In Praise of Folly* by Erasmus of Rotterdam and *Madness and Civilization* by Michel Foucault.

### THEO 30802. God, Philosophy, and Universities: Aquinas, Arnould, Newman

(3-0-3) MacIntyre

Enquiry and teaching in Catholic universities have aimed at understanding how the universe—physical, animal, and human—is ordered to God. One task of philosophy in the Catholic tradition has been to show how the various secular disciplines both contribute to such understanding and remain incomplete without theology. This course examines the question of how this task is to be carried out.

### THEO 30803. Modernism and Mysticism

(3-0-3)

This course examines the persistence of mystical and spiritual traditions in the literary texts of the early 20th century: Underhill, Hopkins, Yeats, Conrad, Joyce, Owen, Eliot, Crane, Hesse, Forster, Mansfield, Woolf, and Waugh.

### THEO 30804. Popular Religion and Philosophy in China

(3-0-3)

This lecture/discussion course will introduce the student to the plural religious traditions of the Chinese as manifested in ancestor worship, sacrifice, exorcism, and spirit possession. From an understanding of these practices, the course will offer insight into the mantic foundations of Chinese philosophy, especially metaphysics. Readings will consist of texts in translation of popular cults, as well as scholarly interpretations of these phenomena.

### THEO 30807. Chinese Ways of Thought

(3-0-3)

This is a special topics class on religion, philosophy, and the intellectual history of China that introduces the student to the world view and life experience of Chinese as they have been drawn from local traditions, as well as worship of and sacrifice to heroes, and the cult of the dead. Through a close reading of primary texts in translation, it also surveys China's grand philosophical legacy of Daoism, Buddhism, "Confucianism," and "Neo-Confucianism" and the later religious accommodation of Christianity and Islam.

### THEO 30808. Islam: Religion and Culture

(3-0-3) Afsaruddin

This course will discuss the rise of Islam in the Arabian Peninsula in the 7th century and its subsequent establishment as a major world religion and civilization. Lectures and readings will deal with the core beliefs and institutions of Islam, with particular emphasis on religious and political thought from the Middle Ages through our own time. All readings are in English; no prerequisite.

### THEO 30809. God, Philosophy, and Universities

(3-0-3) MacIntyre

Enquiry and teaching in Catholic universities have aimed at understanding how the universe—physical, animal, and human—is ordered to God. One task of philosophy in the Catholic tradition has been to show how the various secular disciplines both contribute to such understanding and remain incomplete without theology. This course examines the question of how this task is to be carried out.

### THEO 30811. Learn Our Faith: Sharing Faiths

(1-0-1)

Sharing with persons of other faiths inevitably leads us to fresh understandings of our own faith. This course is designed to include Notre Dame students from diverse faith traditions and to encourage mutual understanding.

### THEO 30812. Vatican II

(3-0-3) Krieg

The Second Vatican Council (aka Vatican II and VC II) initiated the reform and renewal of the Catholic Church. Because it determined the character and direction of contemporary Catholicism, it is the focus of this course. "Vatican II" consists of four units: Catholicism from 1846 to 1958, the unfolding of VC II from 1958 through 1965, the council's teachings on the Church itself, and the council's teachings on the Church in relation to the contemporary world. Along with the

reading of the Council's documents and related literature, the course requires three tests (60 percent), class participation (10 percent), and a final examination (30 percent). It presupposes the "first" and "second" courses in theology; it does not assume that students are theology majors.

### **THEO 30813. Gender, Suffering, and Selfhood**

(3-0-3)

Suffering is one of the most pervasive realities of human experience, and it can be argued that women often suffer in ways that are unique to and informed by their gender and sex. Designed for students of gender studies and theology, this course examines the intersection of gender, suffering, and selfhood with an emphasis on the ways in which suffering has played a role in religious traditions—and in the Christian tradition in particular—in problematizing or promoting the self-understanding and self-formation of women. We will engage authors both "inside" and "outside" the Christian tradition, and while the primary focus will be on contemporary debates and interpretations of the class themes, some attention will be given to earlier periods in history. The challenge of the course will be to learn to assess critically and understand constructively the various means by which the gender- and religion-inflected experiences of asceticism, ritual sacrifice, pain, self-denial, etc., have influenced the selfhood of women.

### **THEO 30814. Ideas That Shape Catholic Education**

(3-0-3) Nuzzi

Catholic elementary and secondary schools contribute to the common good of civic society while advancing the evangelical mission of the Catholic Church. This course focuses on the historical successes of Catholic schools in the United States of America, surveys current research, and analyzes trends in theology, history, and philosophy that have shaped the current structure of the Catholic school system. Requirements include a field-based experience in a local Catholic school.

### **THEO 30815. Faces of the Saints**

(1-0-1)

In this class, you will see a number of films, made across the span of five decades, by filmmakers from four different countries about individuals who live a profoundly spiritual life. Students in this class will be expected to see four of the six films (tickets to be submitted with paper) and write an extended essay (8–10 pages) comparing at least two of them as visualizations of spirituality. Your paper should zero in on how these films try to express in visual terms what is normally thought of as invisible, namely the intensity of spiritual existence. As photographic art, films bring a high degree of realism, but how do they put into images that which transcends everyday reality? Students are to turn in their papers to Cyril O'Regan (130 Malloy Hall) by Wednesday, November 22, 2006, noon. Papers will be graded S/U.

### **THEO 33601. Identity, Social Ethics, and Psychology**

(3-0-3) Montpetit

This course represents a unique opportunity to explore how developmental psychology and Catholic social teaching might engage in a creative dialogue to better understand the potential impact of poverty, injustice, and oppression on human development. The first stages of the course will explore why identity and personhood are central concerns to both psychology and theology, as well as how each arrives at knowledge and understanding of these themes. From this base of understanding, we will explore contemporary social concerns in which identity and personhood are salient issues: migration, aging, and race relations. Course material will include empirical and theoretical documents from both disciplines, guest speakers, and structured "immersion" experiences in which students will be invited to meet, and perhaps share meals and stories with, individuals affected by these issues. Finally, students will be required to choose one of these topics for a community-based learning project in the South Bend area; for example, a student may elect to conduct a "life story interview" to understand how an individual's identity is affected by the experience of migration, racism, or ageism. For more information, please contact: mmontpet@nd.edu, vcarmona@nd.edu, or tbushlac@nd.edu.

### **THEO 33801. From Power to Communion: Toward a New Way of Being Church-Based on the Latin American Experience**

(3-0-3) Pelton

This seminar explores the present and the future of the Catholic Church, placing emphasis on how its future is foreshadowed in the growing ecclesial interdependence that exists between the churches of North and Latin America. Emphasis is placed on the growing involvement of the laity in Latin America and where this may lead the North American church. In a particular way, attention is given to the role of small Christian communities.

### **THEO 33802. Faith and the African American Experience**

(1-0-1) Page

This course will introduce students to the African American faith experience, with particular attention being given to the historical development of spiritualities of liberation in the American diaspora. Guest lecturers and seminar leaders will offer "perspectives" on this rich and heterogeneous tradition from several vantage points within the humanities, social sciences, and theological disciplines. In addition to a course pack of selected readings, the PBS series, *This Far by Faith: African American Spiritual Journey*, and its companion volume will constitute the required "texts" for the course. There will be seven class meetings of two hours each. The course will meet on Wednesday evenings from 6:00 p.m. to 8:00 p.m. The course will begin on January 18, 2006, and conclude on March 1, 2006. Attendance at all class sessions, active participation in seminar discussions, completion of six short (i.e., 2–3 pages in length) weekly reflection papers, and a final examination are required.

### **Social Concerns Seminar**

*The Department of Theology offers a variety of social concerns seminars in collaboration with the Center for Social Concerns. Permission is required for each of these and is obtained through the center. More information is available at the Center for Social Concerns (631-5319). No theology prerequisite, unless stated.*

### **THEO 33858. Social Concerns Seminar: International Issues**

(1-0-1) Tomas Morgan

This course revolves around international experiential learning opportunities, examining the culture, community, and life of the people encountered, including the poor. Students participate in preparation and follow-up sessions.

### **THEO 33931. Summer Service Learning: ACCION**

(1-0-1) Shappell

The ACCION Internships run 10 to 12 weeks in micro-lending offices across the country.

### **THEO 33932. Seminar: Service-Learning Internship: ACCION**

(3-0-3) Shappell

This is a leadership internship for African American students who work 10 to 12 weeks in an African American area with organizations dedicated to empowering local communities. Students will complete the requirements of THEO 33931 and work with the Center for Social Concerns to build partnerships with the agencies and people involved.

### **THEO 33933. Seminar: Service-Learning Internship: Hispanic Studies**

(3-0-3) McDowell

This is a leadership internship for Hispanic studies working 10 to 12 weeks in a Hispanic/Latino area with organizations dedicated to empowering local communities. Students will complete the requirements of THEO 33931 and work with the Center for Social Concerns to build partnerships with the agencies and people involved.

### **THEO 33934. Seminar: Service-Learning Internship: Worker Justice**

(3-0-3)

See Center for Social Concerns.

**THEO 33935. Seminar: Service-Learning Internship: Contemporary Issues**

(3-0-3) Shappell

This internship is for students interested in learning more about how the Catholic social teachings are addressed in the work of a church organization such as the Catholic Campaign for Human Development.

**THEO 33936. Confronting Social Issues: SSPs**

(3-0-3) Shappell

This three-credit service-learning course takes place before, during, and after student participation in eight-week "Summer Service Projects" sponsored by the Center for Social Concerns. The goals of the course are to reflect on the meaning and dynamics of Christian service, compassion, and Catholic social teaching through readings and writing, along with discussion and reflection with site supervisors and alumni, and scheduled group discussions upon return to campus. Writing assignments include a journal, reflection paper of six to eight pages, and responses to study questions related to the course packet. This course is completed during the first five weeks of fall semester and is graded Satisfactory or Unsatisfactory. Acceptance is based on the student's application and interview. Contact the Center for Social Concerns for more information.

**THEO 33937. Confronting Social Issues: THEO**

(3-0-3) Brandenberger

This three-credit service-learning course takes place before, during, and after student participation in eight-week "Summer Service Projects" sponsored by the Center for Social Concerns. The goals of the course are to reflect on the meaning and dynamics of Christian service, compassion, and Catholic social teaching through readings and writing, along with discussion and reflection with site supervisors and alumni, and scheduled group discussions upon return to campus. Writing assignments include a journal, reflection paper of six to eight pages, and responses to study questions related to the course packet. This course is completed during the first five weeks of fall semester. Acceptance is based on the student's application and interview. Contact the Center for Social Concerns for more information.

**THEO 33938. Summer Service Learning: International**

(3-0-3) Tomas Morgan

This three-credit course provides students the opportunity to encounter international realities through work with poor and marginalized people. Same academic requirements as THEO 33936 with the addition of area-/country-specific readings and meetings.

**THEO 33939. Summer Service Learning: NYSP**

(V-0-V) Pettit

The National Youth Sports Program runs for six weeks on the Notre Dame campus. Students work with low-income children from the South Bend area in educational enrichment and recreation. Same requirements as THEO 360.

**THEO 33950. Social Concerns Seminar: Appalachia**

(1-0-1) Miller McGraw

This seminar involves experiential learning during the semester break. The course is centered on a service-learning immersion in the region of Appalachia and provides preparation for and follow-up to that experience. Students may focus on particular themes (e.g., rural health care, environmental issues) at various sites while learning about the region and rural issues.

**THEO 33951. Social Concerns Seminar: Washington, D.C.**

(1-0-1) Miller McGraw

This course centers on a trip to Washington, D.C., over fall break, during which time students analyze a significant social issue through contact with various agencies, government offices, and church organizations. Students participate in preparation and follow-up sessions. Themes (e.g., educational reform, violence in America) vary each year.

**THEO 33952. Social Concerns Seminar: Advanced Studies**

(1-0-1) Miller McGraw

This seminar is designed to enhance the students' study and application of a particular social concern issue. The experiential component of the course will be tailored to the specific interest of the student and requires preparation and orientation, follow-up reflection, and associated readings.

**THEO 33953. Social Concerns Seminar: Contemporary Issues**

(1-0-1) Tomas Morgan

This seminar allows students to participate in an experiential opportunity designed to examine contemporary social problems. Emphasis will be placed on understanding issues/conflicts from the perspective of the various participants. Preparation and follow-up sessions are tailored to the specific opportunity.

**THEO 33954. Social Concerns Seminar: Leadership Issues**

(1-0-1) McDowell

This course is open to student leaders of various campus organizations focused on community service and social action (e.g., student groups affiliated with the Center for Social Concerns, social concerns commissioners of dorms, etc.). This seminar will examine leadership and empowerment issues from a multi-disciplinary perspective, focusing on the role of the leader within organizations promoting community service, social awareness, and action for justice and peace.

**THEO 33955. Social Concerns Seminar: Learning and Leadership**

(1-0-1)

*Prerequisite:* (THEO 10001 OR THEO 100) OR (THEO 13183 OR THEO 180G) OR (THEO 20001 OR THEO 200) OR (THEO 20002 OR THEO 201)  
This seminar examines models of community-based learning and service learning, building on and enhancing student leadership in such educational initiatives. Students will examine related texts and learn means to facilitate faith-based reflection.

**THEO 33956. Social Concerns Seminar: Field Education**

(1-0-1)

A directed field-education experience in theology, augmented by readings and dialogue with faculty and others. Area of focus and placement determined by student interest and initiative, in collaboration with the Center for Social Concerns. Site placements may involve service-learning or related work (at, for example, La Casa De Amistad, the Center for the Homeless, or other site where the center has placed a community-based learning coordinator). A learning agreement will outline specific learning tasks and requirements.

**THEO 33957. Conscience in the Crossfire: Ethics and the Environment**

(1-0-1) Pfeil

This one-credit course—offered during the first six weeks of the semester—will explore the meaning of conscience as it applies in moral decision making. We will focus, in particular, on the formation of conscience, both individual and social, and consider specific applications as capital punishment, environmental justice, workplace ethics, politics, and conscientious objection to war. Students will be required to engage in several experiential learning activities.

**THEO 33959. Social Concerns Seminar: Cultural Diversity**

(1-0-1) Pettit

The purpose of this course is to begin to analyze the positive aspects of ethnic and cultural diversity as well as related tensions, including racism. During break, students will participate in a five-day program at selected sites that provides an orientation to culturally diverse communities and allows students to engage in discussions on relevant issues with local residents and community leaders. Students participate in preparation and follow-up sessions.

**THEO 33960. Social Concerns Seminar: Mexico Service-Learning Project**

(1-0-1) Tomas Morgan

This seminar involves three weeks of service learning in Oaxaca, Mexico. It is designed to expose students to the reality of Latin America through inter-cultural exchange, shared work experience, and faith reflection. Students examine the social, cultural, and international forces operative in the region through discussion, relevant readings, and written reflection.

**THEO 33961. Social Concerns Seminar: Discernment**

(1-0-1) Mackenzie

This seminar focuses on senior students discerning and envisioning the integration of faith/theology and social concerns into their lives beyond Notre Dame. The objective is to provide students the opportunity to integrate their experience with the insights of speakers and authors, emphasizing the Catholic social tradition, in written and oral expression. The seminar will meet for six Wednesdays from 5:00 to 7:00 p.m. at the Center for Social Concerns.

**THEO 33962. Social Concerns Seminar: Gospel of Life**

(1-0-1) Miller McGraw

The Gospel of Life Seminar provides opportunities to read, reflect, and be of service on a variety of life issues through service and experiential learning. Exploration begins in orientation classes where students will become familiar with the issues through reading Church documents such as The Gospel Of Life, and through meeting people of the South Bend and Notre Dame communities that work on pro-life issues. During the week of service and experiential learning in Washington, D.C., over fall break, the seminar participants will learn from Church and government leaders, various agencies, and individuals. The follow-up classes facilitate analysis and synthesis of insights gained during the week in Washington, D.C.

**THEO 33963. Church and Social Action: Urban Plunge**

(1-0-1) Pettit

This course centers on a 48-hour immersion (colloquially known as the Urban Plunge) in an urban setting during the winter break (prior to return to campus). The course includes a preparation workshop in the fall semester, readings, two reflection papers, and follow-up educational meetings.

**THEO 33964. Social Concerns Seminar: Education**

(1-0-1) Purcell

This seminar focuses on the educational and outreach endeavors of St. John Vianney Catholic Parish in Goodyear, Ariz., and builds upon Notre Dame's relationships with the Congregation of Holy Cross. Participants are hosted by parish families and spend several days in the classroom with a mentor teacher. Participants also visit organizations in Phoenix doing outreach to people who are homeless and to pregnant women.

**THEO 33965. Social Concerns Seminar: Organizing Power and Hope**

(1-0-1) Brandenberger

This seminar focuses on diverse church, school, leadership, and community-organizing initiatives to improve life in Chicago neighborhoods. Participants will be challenged to examine perceptions of power, service, and social action.

**THEO 33966. Social Concerns Seminar: Border Issues**

(1-0-1) Paladino

The seminar examines immigration and related issues that exist between the United States and Mexico. Participants travel to El Paso, Tex., and Ciudad Juárez, Mexico to meet with refugees, Border Patrol, parish organizations, and families who live in "squatter" villages. Participants also analyze and discuss policy issues. The immersion is in partnership with Annunciation House.

**THEO 33967. Social Concerns Seminar: Migrant Experiences**

(1-0-1) Miller McGraw

This seminar offers a unique immersion into the lives of migrant farm workers in Florida during the spring harvest. Students pick tomatoes in the fields (donating their wages), live with migrant families, assist church and social agencies that serve migrants, and meet with community leaders, never again to take food for granted.

**THEO 33968. Social Concerns Seminar: L'Arche Communities**

(1-0-1) Miller McGraw

This seminar centers on travel to a L'Arche community (e.g., Toronto, Canada) to share community life with developmentally challenged persons. Students draw from the philosophy of Jean Vanier, the works of theologian Henri Nouwen, and other spiritual writings to augment this participatory learning experience.

**THEO 33969. Social Concerns Seminar: Hispanic Ministry**

(1-0-1) Purcell

This seminar gives participants the opportunity to experience the Church's option for the poor through an immersion into the spirituality, culture, and economy of the rural, Southern California valley community of Coachella. Students work with the members of the Congregation of Holy Cross who are in ministry there.

**THEO 33970. Social Concerns Seminar: International Issues**

(1-0-1) Tomas Morgan

This seminar serves as the required orientation course for all THEO 33938 International Service-learning Program participants. It will provide students with an introduction to international issues in developing countries through the lens of Catholic social tradition, guidance in independent country/area study, preparation and tools for cross-cultural service, opportunities for theological reflection, logistical information necessary for international programs and travel, and general support within the context of a community of colleagues. Other students doing summer internships in developing countries may take the seminar with permission from the instructor.

**THEO 33971. Social Concerns Seminar: Civil Rights and Social Change**

(1-0-1)

The purpose of this seminar is to study key events and leaders that sparked the broad-based movement to secure civil rights in the United States. Students will visit communities (Atlanta, Birmingham) and religious institutions that shaped the ideology and development of movement in the late 1950s and early 1960s. Participants will also be asked to explore the current state of leadership in the civil rights community, assessing its relevance and potential for continued influence on issues of race and discrimination into the new century.

**THEO 33972. Social Concerns Seminar: Children and Poverty**

(3-0-3)

This seminar focuses on concerns that affect the youth of our nation, especially poverty and violence, and examines efforts to foster positive youth development. Immersion in New York City. Participants read Catholic social teaching focused on youth/family issues.

**THEO 33975. Social Concerns Seminar: Poverty and Development in Chile**

(1-0-1) Cahill Kelly

This seminar serves as the required orientation course for all participants in the international study program in Chile. It will provide an introduction to international issues in developing countries through the lens of Catholic social tradition, preparation and tools for cross-cultural service, opportunities for theological reflection, logistical information necessary for international programs and travel, and general support within the context of a community of colleagues. Other students doing summer internships in developing countries may take the seminar with permission from the Instructor.

**THEO 40001. Seminar: Advanced Syriac**

(3-0-3)

Syriac is a form of Aramaic that was the literary language of Jews and pagans in western Asia before becoming the common dialect of Aramaic-speaking Christians in the region. Christianity had its matrix in Judaism, and early literature in Syriac preserves the only surviving sustained evidence of the distinctive character of Aramaic-speaking Christianity that is largely unhellenized and that reflects the linguistic and cultural milieu of first-century Palestine. Because of the shared literary culture of Judaism and early Syriac Christianity, examination of the intertextuality of early Syriac literature reveals a deep acquaintance with the thought and culture of Late Second Temple Judaism and the intertestamental period. A full appreciation for the dependence of Syriac literature on Jewish literary and intellectual models requires an interdisciplinary focus that takes into account a full range of issues; among the most important are hermeneutical questions related to Jewish and Christian interpretations of Scripture. Participants in the seminar will investigate a range of questions based on the following: (1) In what sense may particular texts be called Christian (Jewish, Manichean, Gnostic)? (2)

What evidence is there for intertextuality; i.e., to what extent can texts be shown to occupy "the space between" Judaism and Christianity? (3) From what social and cultural milieu did the texts emerge? (4) What evidence do the texts retain of possible oral or non-literary origins? (5) In what sense are the texts literary? Do peculiarities of language, diction, or genre in any way distinguish the texts? Can the texts be shown to be typical of the time and circumstances from which they emerged? (6) How are the texts to be read? Is it enough to evaluate them as historical documents, relating them to the historical circumstances in which they were generated, and the literary culture to which they originally belonged? These questions will be based on a deep reading of Syriac texts

#### **THEO 40014. Medieval Latin Survey**

(3-0-3)

This survey of Medieval Latin texts emphasizes literary texts, but some attention will be given to more technical writing as well.

#### **THEO 40101. Hebrew Scriptures**

(3-0-3) Ulrich

This course will offer students an introductory-level survey of the books of the Hebrew Bible, with emphasis placed on the holistic (i.e., theological, literary, and social-scientific) study of the history, literature, and religion of ancient Israel. The implications of selected texts in Christian and Jewish theological discourse will also be explored. Required course components include the major divisions of the Hebrew Bible (Pentateuch, Prophets, and Writings), and writing spans the following research-related genres (case studies, article reviews, journal, and critical notes). Fall only.

#### **THEO 40102. Prophets**

(3-0-3)

This course will examine different concepts of prophecy in the Hebrew Bible and in later Second Temple traditions. How did prophets, priests, and scribes claim divine inspiration? How did they connect revelation and heavenly journey to textual authority and the production of Scripture? Throughout the course, we will focus mainly on biblical texts, but we will also look at claims to prophetic authority made in non-biblical wisdom, apocalyptic, and liturgical texts. No prior knowledge of biblical prophecy, biblical studies, or ancient languages is required.

#### **THEO 40103. Redemptive Suffering in Ancient Judea**

(3-0-3)

What were the theologically significant effects of the destruction of the Temple in 586 BCE and in 70 CE? Traditionally scholarship has responded by claiming that the divine revelation eventually withdrew from the Jewish tradition and that prophecy ceased. More nuanced accounts speak of a transformation from prophecy into scribalism, in which divine revelation conveyed by the prophet is replaced by an inherited and inspired text, which is read by an authorized interpreter. While revelation and inspiration persisted, there was a gradual but significant transformation in the role of the divine and of the interpretation of destruction and exile. This course studies how suffering, destruction, and exile come to be recast as part of the salvation history of Judaism. We will study texts from ancient Judaism (Hebrew Bible, Dead Sea Scrolls, *Pseudepigrapha*, *Apocrypha*, Rabbinic Midrash).

#### **THEO 40104. Historical Jesus**

(3-0-3) Meier

The purpose of this course (a lecture course supplemented by readings and discussion) is to introduce the student to the major historical and exegetical problems involved in the quest for the historical Jesus, especially as pursued today in the so-called Third Quest. The course will move from initial definitions and concepts, through questions of sources and criteria, to consideration of major sayings and deeds of Jesus that may reasonably be considered historical. As time allows, major areas to be treated will include Jesus' relation to John the Baptist, Jesus' proclamation of the kingdom as future yet present, his realization of the kingdom through deeds of power (miracles) and table fellowship, the various levels or circles of followers (the crowds, the disciples, the Twelve), various competing groups (Pharisees, Sadducees), his teaching in relation to the Mosaic Law, the enigma (riddle-speech) of his parables, self-designation, final days, passion, and death.

Obviously, it is more desirable that students be allowed time for discussion and questions than that all these topics be covered.

#### **THEO 40105. Women and Christian Origins**

(3-0-3) D'Angelo

The course is a survey of the New Testament and other literature from its context from a feminist perspective. It will delineate patterns of gender in the theology and structure of these works, attempt to retrieve the participation of women in the movements behind them, and consider the impact of the texts and their contexts in gender relations, sexual politics and arrangements of race and class in the 21st century. Participation, three short, or one short and one longer paper.

#### **THEO 40106. Memory and Prophecy**

(3-0-3) Gutierrez

In the last decades, significant theological trends have emerged both from poor countries and from marginalized groups within wealthy countries. Why have they emerged from different Christian churches of our time? This course will explore this question taking the case of Latin American theology. In particular, it will consider the implications of the "preferential option for the poor" for the areas of theological reflection, pastoral work, and spirituality. Special attention will be paid to the biblical foundations of that option as summed up in two crucial concepts: memory and prophecy. The 16th-century Dominican, Bartolome De Las Casas, said, "Of the least and most of forgotten people, God has a very fresh and vivid memory." "The Bible invites us to make God's memory our own, and one component of that memory is the remembrance of the "least ones." The announcement of the Gospel is linked to the advice received by Paul to "remember the poor" (Gal. 2:10). Theologically, poverty is the negation of creation. Poverty means death. Thus, the option for the poor also manifests in the prophetic opposition to that which means death for the poor. The course will examine what memory and prophecy signify for living a Christian life and doing theology in light of some of the major challenges to Christian faith today.

#### **THEO 40107. Introduction to Rabbinic Literature**

(3-0-3)

The course will serve as an introduction to the critical study of Mishna, Tosefta, Midrash, and Talmud and will focus on the place of study within the various Rabbinic approaches. Some comparison will be made with Christian and Greco-Roman thinking on the subject.

#### **THEO 40108. New Testament Introduction**

(3-0-3) Aune

A presentation of all the major approaches important for the understanding and study of the literature of the canonical New Testament in its historical, social, and literary context. Emphasis on the various methodologies that have been applied to the study of the New Testament, including historical criticism, form criticism, redaction criticism, source criticism, narrative criticism, rhetorical criticism, and social science criticism. Recent developments in the quest for the historical Jesus will be discussed, as will recent attempts to reconstruct the life and teachings of Paul. Important church documents on the Bible will be read, including, *De providentissimus Deus* (1893), *Divino Afflante Spiritu* (1943), "Instruction Concerning the Historical Truth of the Gospels" (1964), *Dei Verbum* (1965), and "The Interpretation of the Bible in the Church" (1995).

#### **THEO 40109. Prayer and Worship in the Early Church**

(3-0-3)

Yes, people actually do pray and worship. So all start with some experiential knowledge. But what do we do when we pray? How many types of prayer might we pray? Why pray? Hence, we must necessarily turn to the experts to learn all of this, experts in this case being social scientists who have studied "communication" theory. In addition, students will be reading the great classical prayers in the New Testament and the early church, learning to read them critically and becoming acquainted with the remarkable body of prayers that are our heritage. Next, what is worship? Again, we turn to social sciences for suggestions. Christ worship, of course, was juxtaposed to temple worship in just about every area. Students will examine major New Testament documents where this is demonstrated, such as the

Gospel of John and Hebrews. It is hoped that your worship on Sunday will be that much richer.

### **THEO 40110. Book of Genesis: Literary Artistry and Theological Meaning**

(3-0-3) Anderson

The book of Genesis is arguably the most commented upon book in the Old Testament. Nearly all of the theological themes dearest to the Bible are the subject of considerable narrative elaboration: Creation, fall, redemption, and election. This course will consider how the various stories in Genesis raise the profoundest of questions and what sort of answers it has provided the theological reader. The focus of the course will be on a close reading of the entirety of the book with the goal of mastering the whole.

### **THEO 40111. Fourth Gospel**

(1-0-1) Schneiders

The Gospel of John offers one of the most exciting and beautiful visions of Christian life in the New Testament, not only for its own time but also for disciples of all generations. However, because it is so different from the Synoptic Gospels, it is often a mystery to readers who are intimidated by its highly developed theology and mystical spirituality. This one-week course is intended to introduce students to the Gospel's history, literary characteristics, theology, and spirituality so that they can handle it competently in ministry as well as use it fruitfully to nourish their own spiritual life. We will concentrate on the material in the Gospel on discipleship, community, and mission/ministry using primarily the narratives of encounters between Jesus and disciples.

### **THEO 40112. Wisdom Literature and the Psalms**

(3-0-3) VanderKam

The course offers a survey of the scriptural wisdom books (Proverbs, Job, Ecclesiastes, Sirach, Wisdom) and the Book of Psalms. The wisdom works will be studied in their historical contexts and their central themes will be explored; the major forms of the psalms and their settings will be studied. There will be a midterm and final exam and a paper.

### **THEO 40113. Introduction to Old Testament/Hebrew Bible**

(3-0-3) Anderson

Purpose of this course is to familiarize students with the basic contents of the Old Testament. Though often neglected by contemporary Christians, it is worth noting that the Old Testament was the Bible for the first two centuries of the church's existence. As such, the Old Testament has played a major role in all aspects of theological reflection. As would be expected, this course will address basic questions concerning historical and literary setting. But special emphasis will be placed on (1) the reception of the text as sacred Scripture within the Christian tradition; (2) how the Old Testament is to be understood in light of the New and vice versa; and (3) the relationship between Jewish and Christian readings of this book.

### **THEO 40201. The Christian Theological Tradition I**

(3-0-3) Cunningham, Wawrykow

A survey of Christian theology from the end of the New Testament period to the eve of Reformation. Through the close reading of primary texts, the course focuses on Christology of such influential thinkers such as Origen, Athanasius, Augustine, Anselm, and Aquinas. How do these thinkers understand the person and work of Jesus Christ? What are the Christological problems that they tried to resolve? How do the different Christologies of these thinkers reflect their differing conceptions of the purpose and method of "theology?" Some attention will also be given to non-theological representations of Christ. How does the art of the early and medieval periods manifest changes in the understanding of the significance of Jesus. This course is obligatory for all first and supplementary majors, but is open to others who have completed the University requirements of theology and who wish to gain a greater fluency in the history of Christian thought. Fall only.

### **THEO 40202. The Christian Theological Tradition II**

(3-0-3) Herdt, Zachman

The course will examine the development of the Christian tradition from the time of the Reformation to the present, with special attention to the confessional divi-

sion of the Western Christian tradition during the Reformation, and the responses that post-Reformation Christian traditions make to the secularization of Western culture. The objective of this course is to develop an ecumenical understanding of contemporary Christian traditions. Class time each week will consist of two lectures and one student-led discussion. Evaluation will be based on discussion, four short papers, and a final exam. Spring only.

### **THEO 40205. Medieval Theology: Introduction**

(3-0-3) Prügl

The Middle Ages brought about a broad spectrum of theological thought and literature. Both traditional and innovative medieval theologians eventually made theology a "science." Though exposing the faith to rational inquiry, medieval theology remained a thoroughly biblical endeavor. The Middle Ages also produced a great number of classics of Christian spirituality. The course will focus on single theologians as well as on important controversies and theological ideas. Particular emphasis will be given to the leading figures of the 12th and the 13th century, such as Anselm of Canterbury, Peter Abelard, Bernhard of Clairvaux, Hugh of Saint Victor, Albert the Great, Bonaventure, Thomas Aquinas, and Duns Scotus

### **THEO 40206. Reformation Theology: Topics**

(3-0-3) Zachman

An examination of the development of Christian thought from the Council of Constance in 1415 to the First Vatican Council in 1869-70, with special attention given to the impact of the Reformation and the Enlightenment on the formation of Christian theology.

### **THEO 40207. Christ, Spirit, and Transformation History**

(3-0-3) Young

This course will look at the relationships between embracing an authentic Christian spirituality and working to transform society and history. We start from the observation that while "spirituality" is currently very popular in the United States, it is often extremely individualistic and presented as a haven or oasis in which to escape a harsh world. The thesis of this course is that this is an impoverishment or distortion of authentic Christian spirituality. To investigate, this we will begin by looking at how spirituality is presented in the Bible, with particular attention to its relationship to conversion and evangelization, as expressed in and through people's involvement in their particular cultures and histories. Then we look at certain important figures in the development of a spirituality that is transformative of history, including (among others) Bartolome de las Casas and Henri Nouwen. Finally, we look at recent texts from the magisterium, beginning with texts of Vatican II and proceeding through select papal writings (*Pacem in Terris*, *Evangelii Nuntiandi*), and concluding with an analysis of John Paul II's insistence on the transformation of history as an integral part of a "new evangelization" of culture. Requirements: Two papers and a class presentation.

### **THEO 40208. Monastic Way in the History of Christianity**

(3-0-3) Young

Although often hidden from view, even hidden from view in the Church, the monastic way is one of the oldest expressions of Christian devotion to God and neighbor, usually pursued alone communally. The purpose of this course is to explore how Christian men and women have lived this life, from earliest Christianity to the present. To that end, we will read the writings of monks of Eastern and Western Christianity, paying close attention to monastic voices from antiquity (such as Anthony, Evagrius, Basil, and Benedict), medieval Christianity (e.g., Ailred of Rievaulx, Bernard of Clairvaux, Hildegard of Bingen, as well as Gregory Palamas and Theodore the Studite) up to the present day (Seraphim of Sarov, Thomas Merton, Mother Maria Skobtsova). The primary format of the class will be discussion, aided by the composition of short essays throughout the course.

### **THEO 40209. Topics in Medieval Theology: Sacraments**

(3-0-3) Prügl

An examination of the development of Christian thought from the Council of Constance in 1415 to the First Vatican Council in 1869-70, with special attention given to the impact of the Reformation and the Enlightenment on the formation of Christian theology.

**THEO 40210. Topics in Historical Theology: Medieval Spirituality**  
(3-0-3) Cunningham

This course considers selected texts from the history of Christian spirituality. The cluster of texts changes but some representative topics have included monastic texts, texts from the early Franciscan movement, and texts in hagiography.

**THEO 40211. St. Anselm's Philosophy/Theology**  
(3-0-3)

An examination of the major philosophical and theological writings of St. Anselm. His *Monologian*, *Proslogion*, and *Cur Deus Homo* will be of central concern, but several lesser-known texts will also be read. Topics discussed in these writings include arguments for the existence of God, the divine nature, the Trinity, the Incarnation, freedom (and its compatibility with divine foreknowledge), and truth.

**THEO 40212. Theology and Popular Piety in US Catholicism**  
(3-0-3) Matovina

This course explores the theological insights inherent in the religious practices and spiritual traditions of African American, Latino/a, and European American Catholics. Particular emphasis is given to popular piety as a source for theology and the ways theologians and pastoral ministers can critically engage popular religious traditions.

**THEO 40213. Culture, Religion, and Evangelization**  
(3-0-3) Elizondo

This course will examine the theological basis of enculturation, its historical development, ecclesial documentation, and the implications for ecclesiology, liturgy, catechesis, and the theological elaboration. The course will include lectures, videos, class discussion, and practical exercises.

**THEO 40215. Miracles**  
(3-0-3) Cavadini

What is a miracle? Can miracles happen? What is their significance? The course will approach these questions using a variety of paradigms, including philosophical, theological, and sociological. We will consider a variety of texts and issues, including the Bible, classical exegeses of biblical miracle stories (in Origen, Augustine, and Gregory the Great) as well their counterparts in modern scholarship, philosophical debates about the status of the miraculous, and recent studies of communities where miraculous events are alleged to have occurred. We will also consider the canonical process for the investigation of alleged miracles, as well as literary treatments of the theme. We will ask, finally, what is the religious significance of wonder?

**THEO 40217. Jews and Christians Through History**  
(3-0-3) Signer

In the closing days of the II Vatican Council, *Nostra Aetate (Declaration on Non-Christian Religions)* reversed a negative attitude of the Catholic Church toward Judaism and the Jewish people. This remarkable change promoted "dialogue" with Jews, and positive changes in the ways in which Judaism was presented in liturgy and catechesis. Reactions from the Jewish communities were diverse: from rejection to welcoming. This course will explore a number of issues that emerge from the history of Christian thought and theology: How did a negative image of Judaism develop within Christianity? In what ways did these unfavorable teachings contribute toward violence against the Jews? What is the relationship between Christian anti-Jewish teachings and Anti-Semitism? Is there any correspondence to Christian hostility within Judaism? In what ways have Jewish authors reacted to Christian tradition? We shall also want to construct a more positive theology for the future. How can Jews and Christians develop religious responses to modernity? In what senses can a study of Judaism by Christians, or Christianity by Jews, help either community to understand itself better? How can Christians and Jews develop a theology of "the other" that is not triumphalist, but empathic?

**THEO 40218. Jewish Spirituality**  
(3-0-3)

This course will explore several central themes that have informed the texture of Jewish spirituality through the ages. Topics will include liturgy and iconic visualization of God; sacred space and time on ritual performance; letter medita-

tion and the magical imagination; contemplation and mystic union; textual study and inspired exegesis; divine suffering and messianic redemption. Material will be selected from biblical, apocalyptic, rabbinic, and kabbalistic sources.

**THEO 40219. Mary in the Christian Tradition**  
(3-0-3) Daley

The good news of Christianity is, first of all, about Jesus, the risen Lord, and so about us, as his brothers and sisters—about our future, our world, the church we constitute. Still, Christian preaching and art have repeatedly singled out Mary, the mother of Jesus, as an object for contemplation and loving, personal attachment, and Christian theology has repeatedly focused on her as a symbol for speculation and a subject of debate. So Mariology, although in itself a secondary area in Christian thought, is central to any study of Christian religion through the centuries, as well as a rich testing-ground for the implications of Christian belief concerning the person of Christ, the nature and future of the church, the reality of sin and redemption, and the importance of male and female images in our experience of and response to God's love. This course will survey the most important moments in the development of the church's understanding of and feeling for Mary's role in the mystery of our salvation, beginning with the New Testament and ending with our own time.

**THEO 40220. Missionary Encounters**  
(3-0-3) Kollman

This course will study the missionary activity of the church. After a brief look at mission and evangelization in the New Testament and the early church, we will then explore several important moments of missionary contact in the Americas, Africa, and Asia in the modern (post-Columbian) period. The course will conclude with a look at contemporary missionary practice and theory.

**THEO 40221. Martyrs and Monastic Lives**  
(3-0-3) Leyerle

Early and medieval Christian communities were largely defined by their views, not only of God or the personhood of Jesus, but also of the body; under fierce debate were questions of what, when, or even whether, to eat, drink, or engage in sexual activity. By reading intriguing texts stemming from the experience of martyrdom and monasticism, this course will illustrate how often explicitly theological concerns (for instance, an understanding of the incarnation) have their roots in just such pressing social concerns. Christians were further urged to ponder the relationship of the body to theology, by the experience of sporadic persecution launched against them initially by pagans, but after Constantine, increasingly by other groups of Christians. This course will examine a selection of intriguing texts stemming from the experience of martyrdom and monasticism. We will begin with the earliest portrait of Christians left to us, namely that found in the New Testament, and will end with the Reformation period, which not only saw a reassessment of the goals and goodness of the monastic life but also a resurgence of persecution. Two further and related concerns will also shape this course, namely, the uncovering of the contours of "ordinary" Christian life in these periods, and a growing appreciation of how Christian women, whose stories have often been eclipsed in surveys devoted to intellectual or doctrinal history, have shaped Christian tradition through their ascetic practices, and have been in turn shaped by them. Our perspective will be that of social historians.

**THEO 40222. St. Bonaventure: History, Theology, and Spirituality**  
(3-0-3) Prügl

Along with Thomas Aquinas and Albertus Magnus, St. Bonaventure is considered one of the leading and most influential theologians of the high Scholastic period. Although he had to abandon his promising career as a university teacher in order to lead the fledgling Franciscan Order as its minister general, Bonaventure continued his theological work until the end of his life. Critical of the growing influence of Aristotelian thought within theology, he deliberately chose the tradition of St. Augustine, Ps.-Denis and Hugh of St. Victor as the basis for his theology. The recent emphasis on his spiritual writings notwithstanding, Bonaventure developed a highly speculative and consistent theology, which spans the whole horizon of scholastic theology. Providing an introduction to Bonaventure's life and writings, the course will focus on central aspects of his theology such as the Trinity, creation, Christology, anthropology, and theological epistemology.

**THEO 40223. Church and Society in El Salvador: Transforming Reality**

(3-0-3) Ashley

The premise of this course is that the Central American nation of El Salvador provides a unique opportunity for understanding how one local church tried to heed the call of the Second Vatican Council to read the signs of the times and interpret them in the light of the Gospel (*Gaudium et Spes No. 4*). Consequently, besides theological reflection, this seminar will make use of a number of disciplines in order to "read" the reality of the country. It will begin with a general introduction to social, economic, political, and ecclesial challenges within El Salvador. In consultation with the course instructors, students will pick a specific theme or issue around which to develop a research project. They will work on this project using resources at Notre Dame and then with resource persons in El Salvador, itself, during a trip to that country over spring break. In the final weeks of the course, we will further reflect on our experiences and complete the research projects. Students will present their final projects within the course and in other venues. This course is by instructor's permission only. Interested students should pick up a learning agreement either in the Theology Department offices or at the Center for Social Concerns.

**THEO 40224. Simone Weil: Justice, Grace, and Creativity**

(3-0-3)

Twentieth-century philosopher and educator, militant activist, and mystic, Simone Weil dedicated her life to analyzing and actively combating the malaise that she sensed in modern technological society. Her work in support of equal justice for all human beings and her compassion for the suffering of the poor and oppressed were a prelude to a series of mystical experiences that led her to a deeper appreciation of the role of grace in the transformation of the temporal order. This course will give equal attention to Weil's distinctive contribution to theology, aesthetic theory, and social practice. Working within a study group and seminar format, student participants will be asked to examine texts from which Simone Weil drew inspiration, as well as authors who were influenced by her writing. Required research and reflection papers will be tailored to meet individual student needs according to one's area of specialization; i.e., theology, French studies, or gender studies.

**THEO 40225. Post-Holocaust Literature and Theology**

(3-0-3) Signer

Between 1933 and 1945, the actions of the Nazi government transformed the map of the world politically, aesthetically, and theologically. The ability of the Nazis to gather the cooperation of German citizens and the citizens of other occupied countries to implement their policies against the Jews has raised questions about the claims that European civilization is based on Christianity. How could barbarism flourish in Germany, the land of poets and thinkers? Both Christians and Jews, for common and different reasons, look upon the Holocaust as an abyss, a dark night of the soul. During this semester we shall attempt to move from horrified silence to insight into the possible frameworks for constructing theology "after the abyss." We shall also read literary works that attempt to describe the indescribable. Both literature and theology written after the Holocaust present the paradox of how to comprehend the incomprehensible. No single theologian or faith community has the answer to the problems raised by the Holocaust. No author writing in German, English, Yiddish, French, or Hebrew can describe the horrors and fully transmit the fullness of the atrocity. However, we shall attempt to read, evaluate, and—for some of us—appropriate what theologians, poets, and storytellers have written.

**THEO 40226. Christianity in Africa**

(3-0-3) Kollman

This course will explore the history of Christianity in Africa, beginning with the early church but with heightened attention to the more recent growth of Christianity on the continent. Particular topics to be addressed include the dynamics of missionary activity before, during, and after the colonial period; the rise of African Independent Churches; the interaction between Christianity and Islam in the past and present; and contemporary issues surrounding Christianity and the African nation-state. We will also investigate theological questions surrounding the

relationship between Christianity and culture. In addition to a final exam, students will have the option of one longer research paper or several shorter papers.

**THEO 40229. Theology of Edith Stein**

(3-0-3)

Canonized by John Paul II on October 11, 1998, Edith Stein (1891–1942) is one of the most controversial saints of the Roman Catholic tradition, living as she did at the center of one of the 20th-century's most important philosophical movements—phenomenology—and dying in the midst of its most horrific tragedies—the Holocaust. Last born in a large Jewish family, Stein went on—despite adversity and intellectual restlessness—to study psychology at Breslau and then philosophy with Edmund Husserl at Göttingen and Freiburg, eventually writing a brilliant dissertation on the problem of empathy. Having read the autobiography of Teresa of Avila in one night in 1921, she converted to Catholicism and joined the Carmelite order. Until her martyrdom by the Nazis, Stein lived as a Carmelite nun, writing on spiritual topics and trying to square Husserlian and Thomistic philosophies. It is the purpose of this course to put Edith Stein into dialogue with two other extraordinary Jewish intellectuals of the World War II period—Simone Weil (1901–43) and Hannah Arendt (1906–75)—in order to compare and study common points of biography as well as their literary and non-literary writings, their original theological/philosophical insights, their political entanglements, and struggles with their Jewish identities. Of special value to this dialogue will be Stein's conceptualization of empathy as a tool of interpretation. While the Purdue course is designed to encourage a broader comparison and contrast of Stein, Weil, and Arendt, the University of Notre Dame component has a slightly more narrow inflection. Students enrolled in the University of Notre Dame component of this seminar are expected to focus on the philosophy, theology, and spirituality of Edith Stein.

**THEO 40230. American Religious Imagination**

(3-0-3)

How has Christianity been refigured in America? This course begins by looking at powerful interpretations of the faith by Ralph Waldo Emerson and William James. We then turn our attention to a range of narratives that deal with Christian themes, as treated by Catholics and Protestants, by men and women. Christian Gothic writing and satire of preachers, as well as quest narratives and attempts to determine an authentic American sense of the sacred, will be considered. Authors to be studied include Charles Brockden Brown, Willa Cather, Sinclair Lewis, Cormac McCarthy, Flannery O'Connor, and Walker Percy. We will also consider Harold Bloom on *The American Religion*.

**THEO 40231. Christian Spirituality and Social Justice**

(3-0-3) Groody

This course will explore the challenge of Christian discipleship in the context of our globalized world. Rooting our reflection on the reality of poverty in our national and international context, we will do a faith reality of that reality through a thorough inquiry into pertinent biblical, patristic, liturgical, systematic, and spiritual tradition. We will also look at how this spirit has been embodied in recent decades, as well as how it has emerged both within Catholic social teaching and non-Christian religions.

**THEO 40232. Latino Films: Culture, God, Redemption**

(3-0-3) Elizondo, Matovina

The course will view great films from Latin America and Latino USA and discern what culture is portrayed, the presence or absence of God within the film, and how redemption is expressed in the film. Since some of the films will not have sub-titles, a working knowledge of spoken Spanish will be helpful, but is not a requirement.

**THEO 40234. Thomas Aquinas and the Pursuit of Wisdom**

(3-0-3) Wawrykow

This course offers an orientation to the theology of Thomas Aquinas through his account of "wisdom," which, in Thomas, refers to the contemplation of divine things and the ordering of all else in that light. The theme of "wisdom" threads its way through the entire range of Thomas' theology, and attention to "wisdom" will make clear many of Thomas' most important convictions—about the nature of

the theological enterprise; the interrelated doctrines of God and of Christ; and the specific character of Christian discipleship.

**THEO 40235. Storming Heaven: Christianity in the Reformation Era**

(3-0-3)

A narrative history of Christianity in Western Europe from ca. 1500 to ca. 1650, which takes an international and comparative perspective, including Catholicism, Protestantism, and radical Protestantism. Topics covered include Christianity on the eve of the Reformation, Christian humanism, Luther and the German Reformation, the Peasants' War and Anabaptism, the English Reformation, Calvin and Calvinism, Catholic Reform and the Council of Trent, the French Wars of Religion, confessionalization, the Thirty Years War, and the English Revolution. Major themes include matters of religious content (doctrinal positions and devotional sensibilities), the relationship between different Christian groups and political regimes, the impact of religious changes across the population, and the definitive emergence of Christian pluralism. Lectures plus discussion.

**THEO 40236. Virgin Victorious: Akathistos Hymn**

(3-0-3)

The "Akathistos Hymn" in honor of the Theotokos is the only kontakion still universally sung in its entirety in the Byzantine churches; it is chanted in sections on Wednesdays during Great Lent and then in toto on Akathistos Saturday. Legend attributes it variously to St. Romanos the Melode (fl ca. 540), the Patriarch Sergios (d638), and the Patriarch St. Germanos (d733), but its author remains anonymous. It was composed in the early seventh century and came to be regarded as a victory-offering to the Mother of God for her deliverance of Constantinople from siege in 635. This long (245 lines), hymnodic sermon is the most famous poem in the vast corpus of Marian verse. This one-credit mini-seminar is offered as 5xxxx for those who can read the poem in Greek or in Latin (we have Latin translations from the 9th and the 15th centuries, and a corpus of Latin poems inspired by it; see G.G. Meersseman, *Der Hymnos Akathistos im Abendland*). It is offered as 4xxxx for those who will study the poem in modern-language translations and can contribute to discussion from an historical, musicological, or art historical perspective. Requirements: careful attention to reading assignments, participation in discussion; short research reports on details of the text; a short scholarly note on a feature of the text.

**THEO 40237. Heaven, Hell, and Purgatory**

(3-0-3) Young

If there is a life after death for human beings, what is it like? How does a person get there? Reach one of the eternal destinations envisioned as punishment for sins or reward for good deeds? Are they states of being, or actual places? If the latter, what do they look like, and who are the inhabitants? Early Judaism and the two millennia of Christian tradition have developed a variety of sources to elaborate an answer to these questions. This course will consider how the tradition has proposed answers, and will look at various ways in which the answer has been elaborated. Materials for the course will draw from accounts of visionaries and mystics who ascended to Heaven (or descended to Hell) and reported what they saw, theologians who attempted to give comprehensive and consistent accounts of the paths to these places (or states), and Christian poets who metaphorically evoked Heaven and Hell to express the consequences of contemporary social or political conditions. The course will consider the development, primarily in Roman Catholicism, of the belief in and doctrine of Purgatory and the debates about that belief. The contemporary reconsideration of Heaven, Hell, and Purgatory "and the embarrassment about Hell" will conclude the course.

**THEO 40238. Transfiguration in the Fiction of C.S. Lewis**

(3-0-3) Fagerberg

This course will look at a theme that runs throughout the works of C. S. Lewis: theosis. Christianity's ultimate end is the deification of a person. In Lewis' fiction, there is a strong theme of the transfiguration of matter and the human being, and the moral/ascetical prerequisite leading up to it. This course will first use some secondary theological sources to unpack theosis in light of the Christian doctrines of creation, sin, Trinity, and Christology, and then it will turn to Lewis himself—first to his nonfiction (*Mere Christianity*, *Abolition of Man*, *Weight of Glory* essays), but

our main time will be spent in his fiction (*Narnia*, *Screwtape Letters*, *Great Divorce*, *The Pilgrim's Regress*, *Till We Have Faces*).

**THEO 40239. Globalization, Spirituality and Justice**

(3-0-3)

This course will explore what it means to be Christian in the context of this new era of globalization. It is a time of new opportunities and unprecedented potential, but it brings with it new perils and greater social, political, and economic turmoil than ever before. In particular, we will explore the meaning of Christian discipleship in a time when half the world lives on less than two dollars a day and two thirds live in abject poverty. After grounding our discussion of socio-economic research, we will then do a theological reading of globalization, and then a global reading of theology. In particular, we will explore the meaning of Christian faith today as we draw from the deep wells of Scripture, early Christian sources, Catholic social teaching, major world religions, liturgy, and contemporary theological reflection, icons of justice, mysticism, and spirituality as we explore what it means to be Christian in a time of titanic change.

**THEO 40240. Moses Maimonides**

(3-0-3)

A careful reading of Maimonides's philosophical classic *A Guide for the Perplexed*. Close attention will be paid to its influence on Aquinas.

**THEO 40241. Christianity and Colonialism**

(3-0-3) Kollman

The coming of Christianity to most of the world has overlapped with the political, economic, and social processes associated with the term colonialism. This course will seek to understand the history of that overlap, as well as the many theological issues raised, especially for Christians in Latin America, Asia, and Africa. Questions to be considered include: How has political domination, typified (though certainly not exhausted) by European colonialism, shaped Christian mission? What kinds of theological innovations emerged in the relation to colonialism, both among the colonizers and the colonized? How did colonialism create a context in which Christianity encountered other religious traditions? How does contemporary theology reflect a colonial legacy in this current apparently "post-colonial" moment? How do contemporary global political dynamics, sometimes described with reference to the notion of globalization, compare and contrast with the overt colonialisms of the past? How do contemporary theologians respond to the colonial legacy? Is there such a thing as "post-colonial" theology? Should there be such a thing? Students will write three 5-page papers, and there will be a final exam.

**THEO 40242. The Long Quest II: The Religious Search for Truth from Lao Tzu and the Buddha to Mysteries of Mithra**

(3-0-3) Sullivan

"The Long Quest II: The Religious Search for Truth from Lao Tzu and the Buddha to the Mysteries of Mithra" is Part Two in a sequence, but it is designed to stand alone: Students are not required to take any other part of The Long Quest sequence. This course examines a series of significant religious movements and figures in historical sequence, moving approximately from the time of Confucius (fifth century BCE) and Lao Tzu (100 BCE) to the Mithraism of the fourth century. Cases in Part II of this sequence include the fundamentals of Buddhism and its principle developments up to Nagarjuna, major Indo-European myths and pantheons, Orphism, Hindu classical texts and related ideas and practices, developments in Judaic apocalypticism and eschatology, Hellenistic salvation mysteries, and Iranian Zurvanism, as well Mithraism before and during the early Christian period. Each case will involve primary texts in translation, art and archaeological evidence, historical commentaries, and contemporary interpretations." No one will be required to take Part I as a prerequisite.

**THEO 40244. Jewish/Christian Dialogue: Germany/Holocaust**

(3-0-3) Signer

From the second half of the 19th century to the rise of the Nazi state, there was an intense exchange between Jews and Christians about their relationship. Tolerance and the promise of citizenship led to unprecedented formulations of Jewish identity. The question of "German-ness" and Judaism (Deutschtum und Judentum)

raised issues about the character of German society itself. In this course we shall concentrate on Jewish and Christian authors who addressed these topics. During the final weeks of the course we shall read from Christian authors who wrote after the Holocaust and, in the wake of the II Vatican Council, brought the Catholic Church into conversation with the question of what elements of Christianity could address the horrors that the immediate past. Readings will be in English, but students who have the ability will be encouraged [and assisted] by the instructor to read select essays in German.

#### **THEO 40245. Augustine**

(3-0-3) Daley

Augustine is arguably the single most influential theologian in the West. There is in almost every Western theologian some strain that is Augustinian, and many of the disputes in Western Christendom can be regarded as arguments pitting one strain of Augustinian tradition against another. The study of Augustine, therefore, is essential for an understanding of most subsequent Christian theology. This course attempts to introduce students to the study of Augustine in an attempt to gauge the specific and distinctive character of his theology over a broad range of issues. Special attention will be given to the development of Augustine's thought. The class hopes to be useful to students who approach Augustine from a variety of perspectives and interests, and as such will have a strongly textual, rather than thematic, principle of organization, emphasizing the reading of whole works rather than excerpts topically arranged. Although this is an advanced introduction, the course is suitable for those with little exposure to Augustine.

#### **THEO 40246. Political Theology from Antiquity to Today**

(3-0-3) Nicoletti

This course studies the history of political theology. Starting with the "theology of the state" in the Greek and Roman empires, it examines the thought of Augustine, Dante, Machiavelli, DeMaistre, Rosmini, Maritain, Guardini, Metz, Habermas, and Pope Benedict XVI (Joseph Ratzinger). It gives particular attention to the relationship between church and state in Europe. For example, it considers religious issues related to the Constitution of the European Union (EU) and also to the possible inclusion of Turkey in the EU. The course grade is based on four short summary papers, class participation, a midterm examination, and a final examination. For further information, see Prof. Robert Krieg.

#### **THEO 40247. Medieval Jewish Bible Interpretation**

(3-0-3)

The course will deal with commentaries on the Hebrew Bible composed by five major medieval Jewish exegetes, from two main Jewish cultural entities, Ashkenaz (mostly Germany and France), and Sepharad (mostly Spain):- Solomon ben Isaac (1040-1105), known as Rashi—One of Rashi's grandsons, Samuel ben Meir (ca. 1080-ca. 1170), aka Rashbam Abraham Ibn Ezra (1089-1164)—Moses ben Nahman (1194-1270), known as Nahmanides—Isaac ben Judah Abrabanel (1437-1508). We will read and discuss commentaries of these authors (in English) on selected portions of the Hebrew Bible, chosen following the interests and wishes of the participants. We will delve also into a selection of modern scholarly works about these exegetes.

#### **THEO 40248. The Book of Job through the Ages**

(3-0-3) Prügl

Job—sufferer, saint, rebel, prophet and wise man—is one of the most impressive figures in the entire Bible. Regarding its literary form, its interpretation, and theology, the book of Job is among the most difficult texts within the Hebrew Scriptures. Nevertheless, it inspired a wealth of Christian and Jewish interpretation from the earliest church Fathers to the present time. This course will study famous interpretations of the story and the book of Job from the patristic times to the 20th century. On the one hand, it will look at exegetical commentaries such as Gregory the Great, Thomas Aquinas, Calvin, and Maimonides. On the other hand, it will look at the figure of Job in modern theological writings and literature, from Kierkegaard, to Barth, to Gutierrez. Particular attention will be paid to such important theological topics as divine justice and innocent suffering, providence, and revelation. The course will also look at the method of biblical exegesis in each of these authors.

#### **THEO 40250. Saints in Art and Icons**

(3-0-3) Roy

A diachronic exploration of the lives and legends of the saints as depicted in art and iconography. Students will explore lives of the saints in select vitae as well as the most influential hagiographical collection of the Middle Ages, The Golden Legend of Dominican Bishop James of Voragine. Due attention is paid to the arrangement of the sanctoral cycle, the compilation of calendars and martyrologies, and the theological underpinnings of classic iconography. Primary focus on identifying saints by iconographical attributes and conventions in both Western and Eastern iconography.

#### **THEO 40251. Prayer and Mysticism**

(3-0-3) Daley

Prayer, for religious people, is the central activity in which faith becomes the personal focus of consciousness; mysticism usually means a type of prayer, or prayerful relationship to God, which leads the believer beyond the normal boundaries of consciousness and unites him or her to God in a way that transcends the limits of the self. In this course, we will reflect on representative works on prayer and mysticism from the whole history of Christian thought, from Origen, Gregory of Nyssa, and Dionysius the Areopagite in the early church, through Gregory Palamas, Julian of Norwich, and the Cloud of Unknowing in the Middle Ages, to Teresa of Avila and John of the Cross in the early modern period, and more recently to Therese of Lisieux, Pierre Teilhard de Chardin, and Hans Urs von Balthasar. We will be asking how the discipline and the grace of prayer transforms the human heart and mind, allowing it to experience personally the presence of God who is beyond understanding, but who has experienced our own limitations in Christ and through him has taught us how to pray.

#### **THEO 40307. Sacraments**

(3-0-3) Roy

This course introduces students to the concept and nature of "sacrament" and to the historical, liturgical, and theological development of the seven sacraments. The sacraments are studied "in general" as well as "in particular." Primary emphasis is given to the sacraments of initiation (baptism, confirmation/chrisimation, and Eucharist), with due consideration of the sacraments of healing (penance, anointing of the sick) and of church service/governance (matrimony, holy orders). Attention, likewise, is given to other rites with sacramental dimensions (religious profession, commendation of the dying, funeral and burial ceremonies, various blessings of persons, places, and things).

#### **THEO 40401. Christian Initiation and Eucharist**

(3-0-3)

The Rites of Christian Initiation (baptism, confirmation, and first Eucharist) and the eucharistic liturgy as the primary sacramental celebrations of and in the church: their biblical and anthropological foundations, historical and theological evolution, and contemporary forms and celebration in a variety of churches. Requirements will include short papers and exams.

#### **THEO 40402. Feasts and Seasons**

(3-0-3) Johnson

The Church measures time and lives not by the civic calendar but according to its own cycle of feasts and seasons. This course will explore the origins, evolution, and theological meaning of the central feasts and seasons of what is called the liturgical or Church year: the original Christian feast of Sunday; Advent, Christmas, and Epiphany; Lent, Easter, and Pentecost; and with some attention to the feasts of the saints. What do we celebrate on such occasions and how might we celebrate these feasts and seasons "fully," "consciously," and "actively?" Of special interest to those who work with the liturgical year in a variety of ways and for all who seek to understand the way in which the Church expresses itself theologically by means of a particular calendar, as well as for theology majors and interested graduate students in theology.

#### **THEO 40403. The Catholic Sacraments**

(3-0-3) Fagerberg

*Lumen Gentium* says that in the Church, "the life of Christ is poured into the believers who, through the sacraments, are united in a hidden and real way to

Christ who suffered and was glorified" (7). This course will look at the seven sacraments of the Catholic Church as the means whereby Christians are mystically united to the life of Christ. Although we will use a historical framework to organize our material, the main focus of attention will be on the theological dimensions of each sacrament. This will give us the opportunity both to examine particular questions that conditioned the development of current sacramental theology, and the content of each rite as it exists today. Some attention will be paid to the nature of sacramental symbol in general, but the course's primary focus is on the sacraments as liturgical rites by which Christian life is celebrated.

#### **THEO 40404. Liturgical Theology in the Roman Mass**

(3-0-3) Fagerberg

The principle of *lex orandii statuat lex credendi* means that the law of worship establishes the law of belief. This course will accordingly work from practice to doctrine: in order to do what we do at liturgy, what must we believe theologically? The Church's liturgical reality is unpacked by its teachings, so the course will consider traditional Catholic doctrines (Trinity, Christology, ecclesiology, anthropology, eschatology, sin, salvation) as they break surface in the Mass.

#### **THEO 40405. Mary and the Saints in Liturgy, Doctrine, and Life**

(3-0-3) Johnson

This course explores the evolution and theology of Mary and the saints in their liturgical and doctrinal expressions in an attempt to discern, evaluate, and articulate their proper place within Christian liturgy, doctrine, and life today in relationship to the central mediatorial role of Christ. Issues of popular piety, "models of holiness," and ecumenical division, dialogue, convergence, feminist critique, and liturgical renewal will also be examined. Requirements include several short papers/seminar-style presentations, and a research paper.

#### **THEO 40601. Mercy and Justice**

(3-0-3)

This course will explore the meaning of mercy, particularly in its relationship to justice. It will have four major topics: (1) Mercy in its Relation to Retributive Justice. Here we will look at the role of mercy (i.e., clemency) in the case of criminal sentencing, as well as broader questions of retribution and wrongdoing. Issues arising here include whether there can or should be criteria for the exercise of mercy, whether one can exercise mercy unjustly, and the relationship of forgiveness to mercy. (2) Mercy in its Relation to Distributive Justice. The focus here will be the corporal works of mercy; issues include the relationship between justice and "private charity" (i.e., whether in a truly just distributive scheme there would be no place for some or all of the works of mercy). (3) Mercy in its Relationship to Social Justice. The main focus here will be on the role of solidarity; is it an aspect of social justice or is it the social face of mercy? (4) Divine Mercy. Here the focus will be the various ways theologians have attempted to reconcile divine mercy and divine justice. Readings for the class will be interdisciplinary; they will include materials from legal, philosophical, and theological sources. (A legal background is not a prerequisite). Course requirements will include class presentations and a paper.

#### **THEO 40602. Foundations of Moral Theology**

(3-0-3)

As John Mahoney noted in his *The Making of Moral Theology* the term "moral theology" (*Theologia Moralis*) refers to a distinctive science thematically separate from all of the other branches of theology but of relatively recent vintage. It has only been in use since the Thomist renaissance at the end of the 16th century, in the wake of the Council of Trent. Even so, the systematic consideration of Christian morality or ethics is both much older than this and has a wider scope than this recent Roman Catholic inflection. It is the purpose of this course to investigate the development of Roman Catholic moral theology against its wider historical horizon. This course is an introduction to the study of the basic elements of Roman Catholic moral experience and understanding as well as the criteria of Christian moral judgment and action, including the data of moral knowledge, theories of the ultimate end of human nature, ontic and epistemic aspects of sin, moral agency, the conscience, theories and methods for moral decision making, and the three dominant forms that moral theological thinking has taken in the history of the Roman Catholic Church (aretalogical, deontological, and consequentialist). This

study will be accomplished, historically, through a series of readings from major Roman Catholic moral theologians/ethicists (and their influences) including: pre-Christian philosophical sources, ancient medieval, modern, and contemporary approaches to Christian moral theology/ethics and their philosophical influences. The culmination of this study will be a close reading of John Paul II's *Veritatis Splendor* with the previous readings as its backdrop.

#### **THEO 40603. Theology of Medicine**

(3-0-3) Ryan

An examination of moral problems in medicine in the context of key theological themes; e.g., creation, providence, the nature of Christian personhood, suffering and redemption, freedom and grace. Various normative problems will be explored; e.g., physician-assisted suicide, artificial reproduction, and access to health care.

#### **THEO 40604. Christian Ethics and Contemporary Culture: God and Morality**

(3-0-3) McKenny

This course examines major themes in recent Christian ethics in light of the broad moral context of modern Western societies. The course focuses on themes such as moral order, virtue, and the problem of Christian community in a post-Christian era. Authors include Oliver O'Donovan, Jean Porter, Lisa Cahill, John Howard Yoder, John Courtney Murray, John-Paul II, Richard Rorty, and Charles Taylor. No prior work in Christian ethics is assumed.

#### **THEO 40606. Social Ethics**

(3-0-3)

The aim of this course is to help the student develop the analytic tools to think through problems in contemporary social ethics. We will do this by focusing on three issue areas: war and peace in the post-Cold War era, economic justice after the collapse of communism, and abortion in the Clinton era. In each case we will look at both Roman Catholic documents and the wider debates.

#### **THEO 40607. Catholic Social Teaching**

(3-0-3)

This course will have three components: (1) The close reading of classic texts of the Catholic social tradition, particularly but not exclusively, the papal and conciliar documents from Pope Leo XIII's *Rerum Novarum* to John Paul II's *Centesimus Annus*. Other texts will include source documents (e.g., writings by Thomas Aquinas and Augustine) and contemporary appropriations (e.g., writings by liberation theologians and neo-conservatives). Requirement: Short papers of critical analysis and responses, intensive class participation. (2) Immersion in professional context. Each student will find a placement in a location similar to that student's anticipated profession. The student is to observe, interview, and to the extent possible participate in the life of the setting. For instance, the students can observe a law or architectural firm or a medical practice. The director and the executive committee will develop a list of placements or the student can seek one out on his or her own, which must then be approved by the director. Requirement: keep an ongoing journal as a "pastoral ethnography" of the setting (an interpretation of the practice in the setting in light of the Catholic social tradition). (3) Final project: each student is to articulate or construct a setting in his or her anticipated profession in light of the Catholic social tradition (e.g., imagine and construct what a law firm/health clinic/ad agency would look like if it practiced in light of the Catholic social tradition). The pedagogical goals and means of this course require that it be a seminar (no more than 15 students).

#### **THEO 40608. Introduction to Christian Ethics**

(3-0-3) Odozor

Faith in Jesus Christ as Lord and savior has practical implications for the way believers construe the world, organize their lives, and engage with the world. In this course, students will be introduced to the basic elements in Christian moral thinking and decision making. We will look at nature of ethics, in general, and of Christian ethics, in particular. We will cover questions related to the specificity of Christian ethics, Jesus and moral thinking, the human (Christian) person as moral agent, and the different methods employed in making ethical decisions. This course is, therefore, a foundational course meant to prepare students for further studies in moral theology and ethics or for life as responsible Christian men and

women who are reasonably well-equipped to face up to the implications of their faith for life in the world.

### THEO 40609. Love and Sex in the Christian Tradition

(3-0-3) Porter

Christian reflections on sexuality comprise one of the richest, yet most controversial aspects of the Christian moral tradition. In this course, we will examine Christian sexual ethics from a variety of perspectives through a study of historical and contemporary writings. Topics to be considered include Christian perspectives on marriage and family, the ethics of sex within and outside of marriage, contraception, divorce and remarriage, and homosexuality. Course requirements will include four or five short papers and a final examination.

### THEO 40611. Christian Attitudes toward War, Peace, Revolution

(3-0-3)

This course is a survey of Christian understandings of war, peace, and revolution from the time of Christ and the early church to the present. Emphasis will be placed on the way in which theological convictions in the areas of Christology, pneumatology, eschatology, ecclesiology, and so on, have shaped Christian teaching on the nature of peace and the permissibility of using violence. Cases will be used to examine certain aspects of just-war theory, with the purpose of addressing the question: is just war theory applicable to warfare in the era of the modern nation state? Other issues will be taken up as well, including the military chaplaincy, ROTC in Catholic colleges and universities, the role of Christian churches in mobilizing for war, and the use of violence in revolution.

### THEO 40612. Catholic Radicalism

(3-0-3) Baxter

This course traces the emergence and development of Catholic radicalism in the United States from the early 20th century to the present. Special attention will be placed on the Catholic Worker Movement. Readings will include texts by and about Dorothy Day, Peter Maurin, Virgil Michel, Paul Hanly Furfey, Gordon Zahn, Thomas Merton, and Daniel Berrigan, as well as some recent theologians. Issues to be taken up in the course include the relationship between theology and social theory, nature and the supernatural, the nature of the modern state, capitalism and socialism, and the challenges facing Catholic radicalism in the beginning of the 21st century.

### THEO 40613. Catholic Social Teaching

(3-0-3) Pfeil

The purpose of this course is to familiarize students with the tradition of Catholic social teaching with a view to developing skills for critical reading and appropriation of these documents. We will examine papal, conciliar, and episcopal texts from *Rerum Novarum* (1891) up to the present time, identifying operative principles, tracing central theological, ethical, and ecclesial concerns, and locating each document in its proper historical context.

### THEO 40614. Ethics, Law, and International Conflict

(3-0-3)

The terrorist attacks of 9/11 and the war in Iraq have contributed to a dramatic reexamination of moral and legal norms governing the role of military force in international affairs. This course provides an introduction to legal and moral perspectives on issues of war and peace, with special attention to Catholic social teaching. Topics include the UN framework for collective security, collective enforcement, and peacekeeping; terrorism, aggression and self-defense; intervention on behalf of self-determination and human rights; norms governing the conduct of war; accountability for war crimes; and approaches to arms control and disarmament. These topics are discussed with special attention to their application in combating global terrorism, the interventions in Iraq and Afghanistan, the wars in the Balkans, and other recent conflicts.

### THEO 40616. US Catholic Social Ethics

(3-0-3)

This course will study the emergence and development of the Americanist tradition in Catholic social theory from the late-19th century to the present. The leading emphases will be on the theoretical paradigms that have shaped the discourse

of what has since become the field of "Catholic social ethics," with a focus on Catholic political theory. Texts will be read genealogically in an effort to discover how the central terms and categories in Catholic social theory in the United States have shifted over time and how they have remained the same. Authors to be studied include John A. Ryan, Maritain, Yves Simon, John Courtney Murray, Bryan Hehir, George Weigel, Michael and Kenneth Himes, Robert George and David Hollenbach, and others. By virtue of the topic, special attention will be paid to the writings of John Courtney Murray and the strengths and weaknesses of the so-called "Murray Project." Themes to be examined include nature and grace, faith and reason, church-state relations, the nature of law, the character of the modern state, the problem of religious pluralism and freedom. Requirements include the weekly readings, preparing weekly seminar papers during the first half of the course, and presenting well-researched paper(s) to the seminar during the second half of the course. In addition, students will be asked to produce a final essay that analyzes the strengths and weaknesses of the Americanist tradition in Catholic social ethics.

### THEO 40617. Mysticism and Morality

(3-0-3) Clairmont

Is mysticism (variously described as the presence of God, a direct experience of God, a consciousness of God, or pure love of God) the culmination of the moral life or its true beginning? To what extent should our moral decisions be guided by our personal experiences of the divine? Given the frequent appeals that thoughtful Christians make to the judgments of conscience, how if at all can we distinguish between the true voice of God in the human heart and self-consoling delusion? Are those who claim to have had, and write sweetly about, an "experience" of God real guides to be trusted by the Christian community, or are they dangerous spiritual individualists who threaten the coherent moral witness of the church? How, if at all, are we to reconcile the teachings of Christian mystical writers with the sacramental life of the church and the cultivation of Christian virtue? Is a life of intense asceticism, or even an explicitly Christian faith, necessary for mystical knowledge? We will examine these and other questions in the four parts of the course: (1) Maps of the Soul (through a comparison of Augustine's *Confessions* and Teresa of Avila's *Interior Castle*), (2) Reasons of the Soul (through a comparison of Bonaventure's *Journey of the Mind into God* and Marguerite Porre's *Mirror of Simple Souls*), (3) Loves of the Soul (through a comparison of Catherine of Siena's *Dialogue* and Ignatius of Loyola's *Spiritual Exercises*, and (4) Questions of the Soul (through a comparison of Simone Weil's *Waiting for God* and *The Dark Night of the Soul* by John of the Cross). Course requirements include two class presentations and a final paper comparing two of the authors examined during the semester.

### THEO 40801. Archaeological Foundations of Christianity and Judaism in Antiquity

(3-0-3)

This course surveys ancient Israel/Palestine (the Holy Land) during the biblical period. The class will challenge students to think critically and creatively about the makeup/construction of previous cultures, their life-ways, and how the components of the culture connect and relate to one another. In order to do this, the student will engage and incorporate theory and method from several fields (e.g., archaeology, theology, anthropology, philology, textual studies, history, art, and others). This course encourages the student to use as many available tools as possible to investigate and understand the past and its impact on the present. The class will expose students to the material remains through slides and some physical artifacts that will assist them in better comprehending the theological foundations of Judaism and Christianity.

### THEO 40803. Thomas Aquinas: Theologian

(3-0-3)

The writings and thought of Thomas Aquinas influenced the subsequent course of Catholic theology perhaps more than any other single theologian in the church history. By exploring his career as a Dominican master through a variety of his writings, this course will provide students with a basic introduction to Aquinas theology. To that end, the course will pay particular attention to his masterpiece the *Summa Theologiae* as well as other shorter works in order to highlight the major loci of his theology (e.g., God, Trinity, creation, sin, grace, virtues, Christ, and the

sacraments). Students will be required to write four papers on assigned readings and prepare short class presentations.

### THEO 40804. Christian Autobiography

(3-0-3)

This course examines three major, yet very different attempts at Christian autobiography: St. Augustine's *Confessions*, St. Teresa of Avila's *Life*, and John Henry Newman's *Apologia Pro Vita Sua*. Throughout, we will attend to three demands: a close reading of the texts themselves, including their narrative and rhetorical structures; a sense of how the self is imagined by the three writers; and an awareness of the authors' religious contexts.

### THEO 40805. Christian Anthropology

(3-0-3) Hilkert

This course will explore theological perspectives on how Christians understand human life in light of the life, death, and resurrection of Jesus. Part One will focus on Karl Rahner's theology of the incarnation as the key to understanding the mystery of being human in an evolutionary world. Questions to be considered include: How is human life related to the rest of creation? What does it mean to be a human person? In what sense can human life be called a sacrament? Do we have a vocation and destiny? What is the impact of the sin of the world on human freedom? What does it mean to be called to communion with God and with all of creation? Part Two will turn to the reality of suffering in its personal, interpersonal, social, and global dimensions. In a world of increasing violence, suffering, and ecological devastation, how are Christians called to re-imagine the symbols of creation in the image of God, original sin, grace, and hope for the future? Based on careful reading of required texts, students will develop a series of thesis statements that respond to the reading as well as articulate their own developing theological anthropology. The final paper, based on those thesis statements, will be a constructive paper in which the student articulates her or his theology of the human person or of some dimension of human life (e.g., theology of work, play, suffering, sexuality, death). Midterm and final examinations will be based on the required readings.

### THEO 40807. Christian Spirituality

(3-0-3) Cunningham

This course will first set out some general principles of Christian spirituality using materials from Cunningham and Egan's *Christian Spirituality: Themes From the Tradition*. We will then consider some selected "classics" from the tradition, including the writings of John Cassian, Gregory of Nyssa, Bernard of Clairvaux, Julian of Norwich, Teresa of Avila, Thomas Merton, and Gustavo Gutierrez. Class participation, the timely submission of some short reflection papers, an occasional test, and a final research paper are required.

### THEO 40808. Modern Catholic Theologians

(3-0-3) O'Regan

The course focuses on three of the major contributions made by John Henry Newman to modern religious thought. (1) Newman's contribution to religious epistemology, especially the question whether it is rational or irrational to believe. *A Grammar of Assent* is our central text, although a number of Newman's much early Oxford sermons will also come in for discussion. (2) Newman's contribution to our understanding of the genesis, nature, and function of doctrine. Our main text here is the famous *Essay on Development* that, arguably, is the single-most important text on tradition written in the 19th century. (3) Newman's view of Christ. Unlike his treatment of religious epistemology and his view of the development of doctrine, Newman does not have a single authoritative treatment of Christ. His reflections are scattered throughout, especially in the voluminous sermons and in his historical works. We will read samples of both to discern the main drift of Newman's concerns and his conclusions. As an introduction to Newman, his intellectual development and his period, as well as a classic in its own right the course opens with Newman's celebrated *Apologia Pro Vita Sua*. Other Texts include: *A Grammar of Assent*, *An Essay on the Development of Doctrine*. Also course packet with sections from sermons on the Theory of Religious Belief, the Arians of the Fourth Century, and Plain and Parochial Sermons.

### THEO 40809. Theology after Darwin

(3-0-3) Ashley

Daniel Dennett, a philosopher at Tufts University, has argued that the modern theory of evolution has not only made it intellectually possible and satisfying to be an atheist, but mandatory. What is the history of this anti-theistic use of Darwin, and how have Christian theologians responded? This course offers an advanced survey of attempts by Christian theologians (both Protestant and Catholic) to come to grips with the challenges raised by the Darwinian revolution. We will begin with an overview of the role of the so-called argument from design in 18th- and 19th-century Christian theology. Then we will consider two paradigmatic late 19th-century reactions to Darwin: that of Charles Hodge (*What Is Darwinism?*) and of John Zahm, C.S.C. (*Evolution and Dogma*). From there we will study the largely negative mood of the early 20th century, with particular attention to the rise of creationism. We will conclude by looking at three influential contemporary responses to Darwin: the modified creationist attack on Darwinism represented by the so-called "intelligent design" argument; the use of Darwin to attack the coherence of Christian faith by figures such as Daniel Dennett and Richard Dawsons; and the argument by John Haught and Denis Edwards (building on Teilhard de Chardin) that the Darwinian revolution can in fact support and enrich Christian faith and theology.

### THEO 40810. Feminist and Multicultural Theologies

(3-0-3) Hilkert

An exploration of how the voices of women have helped to reshape theological discourse and to bring to light new dimensions of the living Christian tradition. Like other liberation theologies, feminist theologies take the experience of suffering and missing voices in the tradition as the starting points for theological reflection on the mystery of God and all of reality in relation to God. Using the writings of feminist, womanist, Latina, mujerista, Asian, and Third World theologians, this class will focus on the following questions and areas of theology: the theological task and vocation, the significance of gender and social location in the fields of theological anthropology and Christology, theologies of the cross in the face of contemporary suffering, the mystery of God, and implications of women's spirituality in our day. Students will have the opportunity to join an optional reading group that will focus on classic texts in the development of feminist theologies.

### THEO 40811. Religion and Autobiography

(3-0-3) Dunne

A course on the spiritual journey of the individual person, drawing on diaries and autobiographies. The first half is on the story of the life in terms of feeling and imagination and insight and choice, and the second half is on the story of the person in terms of the life project, the boundary situations of life, and conversion of the mind, of heart, and of soul. Readings: Saint Augustine, *Confessions*; Martin Buber, *The Way of Men*; Carolina Maria de Jesus, *Child of the Dark*; John Dunne, *Reasons of the Heart and Search for God in Time and Memory*; Etty Hillesum, *An Interrupted Life*; C.G. Jung, *Memories, Dreams, Reflections*; Rainer Maria Rilke, *Letters to a Young Poet* and *Reading the Gospel*. Writings: a spiritual diary (not handed in), a term paper, and a midterm take-home and a final take-home exam.

### THEO 40812. Theology of Church and Ministry

(3-0-3)

This course treats four basic areas of the ecclesiology of the Catholic church today: (1) the foundation of the church by Jesus and some of its basic and original characteristics; (2) the forms history has assumed from the time of the 12 Apostles up to today; (3) lay ministry and the ministry of priesthood; (4) authority as a ministry in the church. The calling of disciples and the origins of the church bring charisms and ministries to the baptized. Lay ministry—in parish and diocese—has expanded considerably over the past 25 years, and its variety, identity, and relationship to pastor and bishop are of import. Finally, a pervasive factor of Catholic life is church authority, and this is explored in terms of the bishop of Rome and bishops, of theologians and the faithful.

### THEO 40813. Death and Rebirth

(3-0-3) Dunne

A course on the spiritual journey through the ages: the figure Gilgamesh (the human quest of eternal life), the figure of Socrates (the sense of a deeper life that

lives through death), the figure of Jesus (the I and thou with God in Christianity; how this leads to an understanding of death and resurrection, or Incarnation and Trinity), Dante and the spiritual journey (the Christian sense of a life that lives on both sides of death), Kierkegaard and the eternal self (the Christian encounter with the modern sense of selfhood), and a concluding vision (the experience of the presence of God). Requirements include a midterm and a final exam (take home exams) and a personal essay.

#### **THEO 40814. Christ and Prometheus: Evaluation/Technology**

(3-0-3) Ashley

The history of technology in Western culture and has been intertwined in complex ways with religious and theological conceptions. These include understandings of what it means to be created in the image and likeness of God, the value of intermundane work in a passing world marred by sin, and the danger of prideful self-assertion. For many, technology has represented the primordial temptation, "you shall be like gods." For others, technology was a privileged way for human beings to fulfill the mandate to flourish and subdue creation and thus cooperate with God in the work of restoring the broken image and likeness in humanity. This course will examine both the diverse historical connections between the rise of technology in Western Christian societies and Christian religious self-understanding, and divergent modern theologies.

#### **THEO 40815. Psychology of Religion**

(3-0-3) Pope-Davis

Introduction to the major issues, theories, and research in the psychology of religion through critical analysis of classical and modern literature from Western and Eastern cultures. Topics discussed will help illuminate the role of religion as a powerful meaning system that can affect the lives of individuals in terms of their beliefs, motivations, emotions, and behaviors. A major focus of this course will be in the area of religious identity development where various developmental theories of religion will be utilized to understand how religious identity unfolds across time.

#### **THEO 40816. Philosophy and Theology of the Body**

(3-0-3) Reimers

Pope John Paul II's "theology of the body," presented in his weekly public audiences over the course of five years, constitutes a thorough effort to develop an integrated understanding of the human being as the "image of God." John Paul II finds in human sexuality an important key to the fundamental significance of the body as the person's way of being present in the world and to others. Besides examining the content and structure of John Paul II's thought, the course will relate these to his intellectual predecessors and to alternative conceptions. The first half of the course will focus on key concepts, such as solitude, gift, communion, shame, and nuptial significance, in relation to human sexual being and behavior. The second half will focus on the application of these theological concepts to ethics and vocation (marriage and celibacy), including John Paul's reflections of the encyclical *Humanae Vitae*. Requirements: Course requirements include four tests, two 5- to 7-page papers, and a final exam. Students will be expected to participate actively in class discussions. For one of the papers, an appropriate project may be substituted, with the agreement of the instructor.

#### **THEO 40817. Joint Seminar Philosophy/Theology: Creation and Freedom**

(3-0-3) Burrell

Modern Western notions of freedom equate freedom with choice and exalt "doing what I wanna do"—something already exposed by Socrates as effective bondage to our endless needs. When freedom turns out to be bondage, and demands exploitation of other humans and of the earth to satisfy its demands, something seems wrong! We shall examine classical and modern sources to highlight the contrast, locating the signal difference in the presence (or absence) of a creator.

#### **THEO 40818. Option for the Poor: Bible/Spirituality**

(3-0-3) Gutierrez

The sentence "preferential option for the poor" is well known, but it is not always well understood. It expresses the experience and the reflection of many Christian people from Latin America. It was present in the Latin American Bishops'

conferences of the last decades and today it belongs to the universal *Ecclesial Magisterium*. Pope John Paul II has several times mentioned this perspective in his addresses. This option has numerous consequences in the personal, social and political life of Christians and in the witness of the whole church. We know how difficult, painful, and rich this testimony has been. The purpose of the course is to provide some elements in order to underline the meaning and the scope of the option for the poor. We need to recall that it is, first of all, a way to be Christian, a disciple of Jesus. This is what we call spirituality. From this deep level we can understand that in a second moment it is an inspiration for doing theology. Talk about God comes after the silence of prayer and after the commitment to others. It is a discourse that is rooted into a faith lived in community and thus inserted into a history of the transmission and acceptance of the Christian message. In order to do that this class will explore the biblical foundations of the option for the poor, revisiting several scriptural texts. In addition, we are going to pay attention to the witness of some great Christians like Bartolome de Las Casas (Dominican missionary from the 16th century), Pope John XXIII, and others.

#### **THEO 40819. Islam and Muslim-Christian Dialogue**

(3-0-3) Reynolds

This course has a twofold aim. It not only provides an introduction to the world of Islam but also attempts a comparison and evaluation of Islamic and Christian theological themes from both a systematic and historical perspective. Topics such as the nature of God and the process and content of divine revelation; the person and function of Muhammad and Jesus as exemplars of faith; the role and nature of sacred scripture and tradition; the place and nature of piety and practice in everyday life; the way that each religion sees itself in relation to other faiths; changes that each tradition has undergone in the modern period—these and other topics will be treated with the intention of deeper understanding and appreciation of the other.

#### **THEO 40820. Christianity-Islam, Dialogue and Relations**

(3-0-3) Reynolds

In this course we will analyze the history of the Muslim-Christian conversation. We will begin with the Qur'an and the earliest Christian writings on Islam and continue with medieval polemical and apologetical works (in English) by Arab and European authors. Turning to the contemporary period, we will look, on one hand, at missionary tracts aimed at converting (focusing on material on websites), and, on the other, at efforts to seek mutual understanding through dialogue (including the development of the church's teaching on Islam). Finally, we will consider the contribution to this conversation of more recent religious movements—including Baha'ism, Ahmadism, and the Nation of Islam—and the impact of September 11 on this conversation.

#### **THEO 40822. Educating in Faith: Catechesis in Catholic Schools**

(3-0-3) Poorman

This course is designed to assist prospective teachers of religion/theology at the junior high and high school levels in the catechesis of young adults in Catholic schools. The course is open to theology students at the undergraduate and graduate levels and to Notre Dame undergraduates with a minor in Education, Schooling, and Society. Within class sessions designed to be highly dialogical, interactive, and prayerful, participants explore both theological and practical/pedagogical dimensions of the process of catechesis. Required readings are drawn from the *Catechism of the Catholic Church*, from publications of the United States Catholic Conference (notably the *General Directory for Catechesis*, and the *National Directory for Catechesis*) and from the works of several theologians and educational theorists who have contributed significant responses to the two central questions addressed in this course: "What is Catechesis?" and "How Do We Engage in Catechesis in the Context of Catholic Schools?". During this course, participants explore all of the central tasks that constitute the holistic process of catechesis as delineated in the general and national Catholic catechetical directories and other catechetical documents and as adapted for use in Catholic schools: communicating knowledge of the mystery of God's self-revelation; fostering maturity of faith and moral development; sharing and celebrating faith by forming Christian communities of prayerful people; promoting Christian service and social justice; and witnessing to faith through pedagogy and by the example of authentic spiritual lives. Participants are required to read all assigned selections from the course packet [available

through The Copy Shop of LaFortune Student Center]. Participants also actively contribute to class sessions where they are called upon both to design and practice various catechetical pedagogies. Finally, they synthesize within the following assignments what they have learned from both readings and class sessions: (1) a midterm examination; (2) a personal mission statement for themselves as catechists (2-3 pages); and (3) an integrative essay (10-12 pages) answering the question, "What does it mean to educate in faith?"

### THEO 40823. Religion and Literature

(3-0-3) O'Regan

This course has as its essential context the crisis of authority of discourse in the modern period subsequent to literature gaining independence from Christianity. It focuses specifically on the three main postures literature strikes vis-a-vis confessional forms of Christianity no longer thought to have cultural capital. (1) the antithetical posture. Here, Christianity is viewed in exclusively negative terms as repressive, authoritarian, and obscurantist, the very opposite of a true humanism that is literature's vocation. Readings include Voltaire and French existentialism. (2) The retrievalist posture. This posture is fundamentally nostalgic. The loss of Christianity's cultural authority is mourned, and literature is seen as an illegitimate substitute. Readings will include Dostoyevsky, T.S. Eliot, and Flannery O'Connor. (3) The parasitic posture. Here Christianity is criticized but not totally dismissed. Portions of it are savable, especially select elements of the New Testament that emphasize human being's creative capacities. Readings include Coleridge, Shelley, and Emerson.

### THEO 40824. Hindu and Christian Interaction

(3-0-3) Malkovsky

This course will provide a survey of the main events, human figures, and theological models that have characterized Hindu-Christian interaction, especially since the beginning of the 19th century, a period that marks a turning-point in Hinduism's understanding of itself. We shall attempt to determine how each of the two religions has undergone transformation in its theology and spirituality, either through the enrichment or through the challenge that the other tradition has presented. Theologically we shall examine such issues as revelation and history, divine grace and human freedom, personhood of the deity, Hindu and Christian views of Christ, theistic and non-dualistic metaphysics.

### THEO 40825. God, Philosophy, and Politics

(3-0-3) MacIntyre

This is the capstone seminar for the interdisciplinary minor in Philosophy in the Catholic Tradition. It is normally open only to undergraduates registered for that minor. The central concern is to understand the various ways in which Catholic philosophers have brought theology to bear on the study of politics and vice versa. Authors studied include Augustine, Aquinas, Robert Dahl, and Maritain.

### THEO 40826. Comparative Theology

(3-0-3) Malkovsky

The purpose of this course is to introduce students to some important recent literature in comparative theology. We will attempt to evaluate the possible significance of theological ideas and religious experiences from Hinduism, Buddhism and Islam for Christian thinking on God, Christology, grace and eschatology. Requirements: Class presentations and two research papers.

### THEO 40827. Comparative Spiritualities

(3-0-3) Malkovsky

This course provides a first introduction to some of the more influential spiritualities practiced by Hindus, Buddhists, Muslims, and Eastern Orthodox Christians down through the ages and seeks to determine their significance for contemporary Roman Catholic spiritual praxis and theology. In order to properly understand the practices of Hindu yoga and bhakti, of Buddhist vipassana and Zen, of Muslim salat/namaz and Sufism, of the Eastern Orthodox Jesus Prayer/Hesychasm and the accompanying place of human effort in asceticism and morality, it will be necessary to examine underlying convictions about the nature of the human person and the supreme reality, of divine presence and grace, as well as the declared ultimate goal of spiritual endeavor, whether it be expressed more in terms of a communion of love or of enlightened higher consciousness. During the semester, we will not

only study important spiritual texts of other religions, but we will also practice meditation, visit a local mosque for Friday prayers and sermon, and be instructed by expert guest speakers who represent religious traditions other than our own.

### THEO 40828. Comparative Religious Ethics: Buddhist and Christian

(3-0-3) Clairmont

Is religion necessary to live a moral life? If so, are all religions basically the same when it comes to the moral norms contained in them? If not, how do we account for the differences among religious values, norms, and principles? How do religions justify their distinctive moral claims in the face of alternative proposals? Can we study the ethical thought of a religious tradition that is different from our own in a responsible manner and, if so, how should we proceed? This course will take up these and other related questions through an examination of ancient and contemporary Christian and Buddhist texts in dialogue with recent theoretical options for the comparative study of ethics. We will begin with an assessment of the importance and distinctive quality of religious voices in moral debate and then look at some of the ways that contemporary scholars have approached the investigation and assessment of similarities and differences in moral world views. The course will end with a comparative consideration of certain Buddhist and Christian options in environmental ethics.

### THEO 40829. Spirituality in the Ignatian Tradition

(3-0-3) Goggin

The book of the *Spiritual Exercises* of St. Ignatius of Loyola will be the primary focus of the course. Particular concern will be given to their origin and composition, the division into weeks and dynamics of grace and choice that are at the core of this tradition. Attention will also be given to the rules for discernment and the way that this tradition is especially a path for Christian discipleship in the world.

### THEO 40830. Documents Shaping Catechesis

(3-0-3) Baumbach

This course will consider selected documents of the Catholic Church since the Second Vatican Council and their implications for catechesis. Documents that shape or inform catechesis are foundations for building a dynamic catechetical ministry, elevating our awareness of opportunities for promoting and handing on the Gospel. Our goal will be to explore these documents, noting their essential contribution to the catechetical enterprise along with their ongoing potential for implementation in parish life today. Students will be engaged in formulating and sharing insights within an interactive learning environment, informed by readings, group discussion, and assignments.

### THEO 40831. Chesterton and Catholicism

(3-0-3)

G.K. Chesterton was a man with many sides, but this course will confine itself to only one, and that is his theological front. About his conversion to Catholicism, he wrote to a friend, "As you may possibly guess, I want to consider my position about the biggest thing of all, whether I am to be inside it or outside it." We will consider his position by reading primary works in theology that led up to and followed his decision, among them *Orthodoxy*, *The Everlasting Man*, biographies of St. Thomas and St. Francis, *The Thing*, and *What's Wrong with the World*. In these we will follow his own advice that "to become a Catholic is not to leave off thinking, but to learn how to think. It is so in exactly the same sense in which to recover from palsy is not to leave off moving but to learn how to move."

### THEO 40931. Youth Ministry Weekend Workshop

(1-0-1)

The development and implementation of youth ministry programs. (Fall) THEO

### THEO 41202. Christian Tradition II: German Discussion

(1-0-1)

This is an optional discussion group conducted in German that is associated with THEO 40244 Jewish/Christian Dialogue: Germany/Holocaust.

### THEO 41244. Jewish/Christian Dialogue: Germany/Holocaust

(0-1-0)

This is an optional discussion group conducted in German that is associated with THEO 40244 Jewish/Christian Dialogue: Germany/Holocaust.

**THEO 42202. Christian Tradition II Discussion**

(0-0-0)

Discussion group for Christian Traditions II.

**THEO 43001. Proseminar**

(1-0-1) Fagerberg

This one-credit course will introduce the field of theology, emphasizing its nature and task, its relation to faith and experience, and its various methods of inquiry. Class sessions will have discussion format to promote close interaction among all the participants. The seminar will feature different members of the faculty who will discuss the goals and methods of their respective disciplinary areas. During the course students will gain the necessary background to begin planning their own programs in theology. Required for all majors and supplementary majors, and open to minor, pre-seminarians, and any other interested students. Spring only.

**THEO 43101. New Testament**

(3-0-3)

A critical introduction to the Christian Scriptures for Western readers. In addition to important historical and literary aspects of the New Testament, this course aims to interpret those Scriptures in the light of the cultural world of Jesus. This means that readers will be learning the essential and relevant cultural models for reading Jesus, Paul, Timothy, etc., in their own culture: basic values (honor and shame), institutions (kinship), modal personality (group-oriented) and the like. Spring only.

**THEO 43201. Joint Seminar in Philosophy and Theology: Aquinas and Scotus on God**

(3-0-3)

Is faith threatened by reason? Do conceptions of reason developed in modernity pose a threat to faith? If faith is threatened by reason, can faith be preserved only through irrationalism? Or is it possible to conceive of reason as compatible with—perhaps as involving—faith? We will pursue these questions by exploring three moments in the recent history of theology and philosophy: first, the Spinozism controversy initiated in 1785 by Jacobi, who argued that philosophical conceptions of reason led inevitably to Spinozism, hence to atheism and nihilism; second, the competing responses to Jacobi developed in the early 19th century by German Idealists such as Hegel and by Romantics such as Schleiermacher; and third, the very different responses given in the late 19th and early 20th centuries by post-Hegelian thinkers such as Kierkegaard, Rosenzweig, and Levinas. Special attention will be paid to the various roles played in these developments by the thought of Judaism and its relation to Christianity.

**THEO 43202. Joint Seminar: Revelation**

(3-0-3) Signer, Hart

This seminar seeks to introduce students to philosophical and theological issues pertaining to mysticism. It has two main concerns: to read some major texts of mysticism, in or near the Christian tradition, and to consider some central questions pertaining to them. Texts to be read include passages from Plotinus, Gregory of Nyssa, Augustine, Pseudo-Denys the Areopagite, Meister Eckhart, Julian of Norwich, John of the Cross, and Teresa of Avila. Questions to be considered include the following: Can one experience God? If so, what does "experience" mean here? Is mysticism confined to a discourse of "experience," or does it have a hermeneutical dimension? In what ways, and to what extents, do questions of divine ineffability, divine simplicity, and divine transcendence impinge on the claims of the mystics?

**THEO 46001. Directed Readings**

(V-0-V)

This course consists of research and writing on an approved subject under the direction of a faculty member.

**THEO 46002. Directed Readings**

(V-0-V)

This course consists of research and writing on an approved subject under the direction of a faculty member.

**THEO 48001. Undergraduate Research**

(V-0-V) Varies with instructor.

Variable credit.

**THEO 48002. Thesis Writing**

(V-0-V)

Under the direction of a faculty member, students define a topic, undertake independent research, and write a thesis. This course is largely for the joint THEO-PHIL major who chooses to write the senior thesis in theology. It may be used in other special circumstances.

**THEO 48005. Honors Research**

(1-0-1)

Students who are accepted to the theology honors program research their topics during fall semester under the direction of a faculty advisor.

**THEO 48006. Honors Colloquium**

(1-0-1)

Students who are accepted to the theology honors program meet as a group in colloquium during fall semester, led by a faculty member.

**THEO 48007. Honors Thesis Writing**

(3-0-3)

Students who are accepted to the theology honors program write their thesis during spring semester under the direction of a faculty advisor.

# Mendoza College of Business

## Department of Accountancy

### ACCT 20100. Accountancy I

(3-0-3)

An introduction to the techniques of accounting and the accounting profession, with an emphasis on the decision-usefulness of accounting information. The course stresses the relation of accounting to economic activity, organizing information for decision making, the resource acquisition decision, the uses of cash and noncash resources, the accounting for selling and manufacturing activities, and the information needs of multiple owners, lenders, and equity holders. A prerequisite of all accountancy and finance courses. Also offered to nonbusiness students. Recommended University elective.

### ACCT 20200. Accountancy II

(3-0-3)

*Prerequisite:* (ACCT 20100 OR ACCT 231)

A continuation of the introduction to accounting, with an emphasis on the decision-usefulness of accounting information. An analysis of the tools used for evaluation of financial and operating performance. The use of budgets and accounting systems for centralized decision making, decentralized decision making, participative budgeting, monitoring and control, and intrafirm contracts. Introduction to not-for-profit entities, attestation, and taxation. Also offered to nonbusiness students who have taken the prerequisite.

### ACCT 30100. Corporate Financial Reporting

(3-0-3)

*Prerequisite:* (ACCT 20100 AND ACCT 20200)

This one-semester course is designed for finance majors and others who wish to develop an advanced knowledge of financial reporting in the corporate environment. The course covers financial statement preparation and analyses with a focus on understanding financial accounting information from a user perspective.

### ACCT 30110. Accounting Measurement and Disclosure I

(3-0-3)

*Prerequisites:* (ACCT 20200 OR ACCT 232) AND (FIN 20150 OR FIN 251)

This course deals with the accounting process used to measure and report economic events. The primary goals are to understand the role financial reporting plays in providing decision-useful information, to understand the economics underlying common business transactions, and to learn the Generally Accepted Accounting Principles (GAAP) that set the reporting and disclosure requirements for those transactions, to evaluate the efficacy of GAAP, and to understand the motivations that lead managers to select one accounting principle over another.

### ACCT 30120. Accounting Measurement and Disclosure II

(3-0-3)

*Prerequisite:* (ACCT 30110 OR ACCT 371 OR ACCT 34110)

Continues the study of financial accounting. Topics include accounting for income taxes, forms of compensation, pension plans, and stock investments, including majority-held and foreign operations. Contractual and economic issues, contemporary developments, and financial disclosures are integral parts of each topical discussion. The course is designed to strengthen the analytical, communication, and research skills required to succeed in accounting-related careers.

### ACCT 30210. Accounting for Decision Making and Control

(3-0-3)

*Prerequisite:* (ACCT 20200 OR ACCT 232)

Continues the study of financial accounting. Topics include accounting for income taxes, leases, stock-based compensation, pension plans, and equity investments, including passive investments, equity method investments, and consolidated reporting for majority-owned operations. Contractual and economic issues, contemporary developments, and financial disclosures are integral parts of each topical

discussion. The course is designed to strengthen the technical, communication, and critical thinking skills required to succeed in accounting-related careers.

### ACCT 30280. Decision Processes in Accounting

(3-0-3)

*Prerequisites:* (ACCT 20200 OR ACCT 232) AND (BAMG 20100 OR BA 230 OR BAMG 230)

This course builds on the statistical foundation established in prerequisite courses by examining applications in accounting decision-making settings. Because accountants increasingly use problem-solving skills, this course utilizes an important accounting tool, spreadsheets, to formulate and solve problems. It is intended to enhance students' abilities to identify relevant information and to think systematically about difficult managerial decisions involving issues of uncertainty, risk, and multiple objectives.

### ACCT 30750. Ethics in Accounting

(1-0-1)

*Prerequisite:* BAET 20300 OR BAET 241 OR BA 241 OR BA 241A

This course examines a range of ethical issues associated with the major areas of accounting, including auditing, tax, and managerial / financial accounting. Furthermore, the ethical theories that underpin decision making in accounting are applied, as well as the dimensions of professionalism in the field. A combination of case analyses, issue paper, exam, and classroom discussion are used to evaluate students' learning.

### ACCT 40130. Accounting for Mergers and Acquisitions

(3-0-3)

*Prerequisites:* (ACCT 30110 OR ACCT 371) AND (ACCT 30120 OR ACCT 372)

The course provides a study of accounting principles and problems related to financial reporting for mergers, acquisitions, consolidated enterprises, and foreign operations.

### ACCT 40510. Audit and Assurance Services

(3-0-3)

*Prerequisite:* (ACCT 30110 OR ACCT 371 OR ACCT 34110)

The study of an independent accountant's assurance, attestation, and audit services. Topics include evidence, risk, standards, control, reports, liability, and ethics.

### ACCT 40610. Federal Taxation

(3-0-3)

*Prerequisite:* (ACCT 20200 OR ACCT 232)

The basic federal income tax provisions applicable to individuals, sole proprietorships, corporations, and small business firms are covered in this course, which emphasizes their rationale and significance in business and investment decision making.

### ACCT 40660. Tax Assistance Program

(2-0-2)

*Prerequisite:* (ACCT 40610 OR ACCT 476)

Preparation of federal and state income tax returns for low-income individuals.

### ACCT 40670. Tax Assistance Program

(2-0-2)

*Prerequisite:* (ACCT 40660 (MAY BE TAKEN CONCURRENTLY) OR ACCT 486)

Preparation of federal and state income tax returns for low-income individuals.

### ACCT 40710. Business Law: Property and Negotiable Instruments

(3-0-3)

*Prerequisite:* (BA 20150 OR BA 263) OR (BA 20151 OR BA 363) OR (BALW 20150 OR BALW 263)

This course involves the application of the following to business situations: organization structures, secured transactions, commercial paper, real and personal property, bailment, and the rights of the consumer. Recommended for students desiring to sit for the CPA exam.

### **ACCT 40790. Accounting and Reporting of Not-for-Profit Organizations**

(3-0-3)

*Prerequisite:* (ACCT 20100 OR ACCT 231)

Fund-accounting concepts for nonprofit institutions: current, capital outlay, debt retirement, trust and agency, enterprise, special assessment funds, general fixed asset- and general bond-indebtedness group concepts for governmental units. The application of the fund-accounting concepts as applied to hospitals, colleges, universities, and health care organizations.

### **ACCT 40810. International Accounting**

(3-0-3)

*Prerequisite:* (ACCT 20200 OR ACCT 232)

This course uses a decision-making approach to provide a background for business leadership in a global environment. It provides a fundamental understanding of accounting and reporting in international business and in the global capital markets. The student learns accounting for international business transactions, foreign exchange risk management and hedging mechanisms, comparative international accounting theory and practice, international financial statement translation, consolidation and analysis, social and political accounting concepts, and international taxation. The concepts and techniques are extensions of those learned in Accountancy I and II.

## **Business (Nondepartmental)**

### **BACM 30400. Business Speaking**

(1.5-0-1.5)

More information is being passed orally in business than ever before. This course can help students improve their speaking skills and overcome their fear of giving a speech. The eight-week course explores the communication process and shows how success in business is related to one's ability to integrate speaking skills with communication strategy and theory. Students will learn to research, write, organize, and present business briefings, informative speeches, and persuasive talks using PowerPoint technology. Students will learn to confront and overcome their fears about speaking in public.

### **BACM 30420. Business Writing**

(1.5-0-1.5)

Only a fraction of a manager's communication time and effort is spent on writing, but without question, the most important issues in business end up on paper. This eight-week course will help you to improve your writing, as well as your critical thinking skills. We look at a range of expression issues related to language use, style, tone, grammar, punctuation, and organization. Students will learn to make decisions about document preparation, including format, layout, and design. Students also will develop an understanding of the ethical dimensions of business writing. One cannot become a better writer overnight, but this course can begin the process.

### **BACM 30440. Business Communication**

(3-0-3)

This course focuses on writing and speaking and interpersonal skills that managers will need to solve everyday communication problems. Topics include employment communication, researching business information, business briefings, informative presentations, and persuasive speaking. A case method approach to writing instruction asks students to solve authentic problems within the context of a business by writing for varied audiences, including executives, customers, employees, shareholders, the press, and the public.

### **BACM 30460. Listening and Responding**

(1.5-0-1.5)

One of the most important functions a manager performs is putting together effective teams and creating the conditions for their success. This class will cover the major theories of group formation and group functioning and teach students how to create, lead, and manage teams. Through experiential exercises, students will have the opportunity to deepen their understanding of themselves as team members and leaders and to improve their skills of analyzing group dynamics.

### **BACM 30490. Persuasion**

(1.5-0-1.5)

Explains factors that affect our ability to change the beliefs, attitudes, and behaviors of others. Explores theories of social influence and their application in the modern business environment. Describes the ideal of ethical persuasion and its advantage for organizations.

### **BACM 30500. Conflict Management**

(1.5-0-1.5)

Conflict is a central feature of human behavior on interpersonal, organization, societal, and international levels. In this course, we explore the psychology of disputes, the nature and sources of conflict, and the ways in which conflict and human emotion can disrupt or make business organizations dysfunctional. As we examine the nature of conflict, we'll explore behavioral responses and theoretical approaches to it, and offer a wide range of alternatives to working through conflict. This course is highly practical and will offer students an opportunity to apply current research findings as they interactively participate in conflict resolutions.

### **BAET 20300. Introduction to Business Ethics**

(1-0-1)

This course is designed to give the student an introduction to the central questions and fundamental character of ethics and morality. The course is focused on a

discussion of ethical theories that can help to guide students' problem solving in ethical situations they will encounter in business. Ethical dilemmas faced by business people will be integrated into the class for purposes of discussion and analysis.

### **BAET 30301. Marketing Ethics**

(1-0-1)

*Prerequisite:* BAET 20300 OR BAET 241 OR BA 241 OR BA 241A

This course is built upon concepts learned in Introduction to Business Ethics. Students will use cases to analyze ethical problems in the area of marketing, applying and integrating the knowledge obtained from marketing courses and readings after cases.

### **BAET 40300. Business Ethics Field Project**

(3-0-1)

The senior field project in ethics is designed to give the student practical evidence in a social service setting. The objectives of the course are to (1) introduce the student to service experiences outside the university setting, (2) provide a mechanism for enhancing the spiritual and intellectual awareness of students, (3) provide a mechanism for coordinating existing student social service projects with the student's academic work, and (4) interact with people whose values have led them into full-time work in the not-for-profit sector.

### **BALW 20150. Business Law: Contracts and Agency**

(3-0-3)

This course examines the background of the legal process and the judicial system, torts, contracts and the Uniform Commercial Code and agency law. Required for all BA students.

### **BAMG 20100. Statistics in Business**

(3-0-3)

*Prerequisites:* ((MATH 10250 OR MATH 105) OR (MATH 10350 OR MATH 119A OR MATH 119B OR MATH 119C OR MATH 119E OR MATH 119F) OR (MATH 10450 OR MATH 195) OR (MATH 10550 OR MATH 125 OR MATH 125A OR MATH 125B OR MATH 125C OR MATH 125E OR MATH 125F) OR (MATH 10850 OR MATH 165)) AND ((MATH 10260 OR MATH 108) OR (MATH 10360 OR MATH 120 OR MATH 120A OR MATH 120B OR MATH 120C OR MATH 120E OR MATH 120F OR MATH 120G OR MATH 120H) OR (MATH 10460 OR MATH 196) OR (MATH 10560 OR MATH 126 OR MATH 126A OR MATH 126B OR MATH 126C OR MATH 126E OR MATH 126F) OR (MATH 10860 OR MATH 166))

Descriptive and inferential statistical techniques in analysis of data, statistical inference, and decision making. Study includes central tendency, probability, hypothesis testing, analysis of variance, regression, and correlation.

### **BAMG 30229. Business Perspectives and Economic Development**

(2-0-2)

*Corequisite:* THEO 33931

By permission only; contact Center for Social Concerns. Junior-senior standing. This course is built around a summer internship with an office of ACCI+N USA (an organization making loans to high-risk micro-entrepreneurs). Students will spend 10 weeks in the field. During the following fall semester, each will participate in an academic analysis of their experience. The course is offered in partnership with the Center for Social Concerns, based on the model of experiential learning. The three hours of course credit are divided between business and theology.

### **BAMG 30505. Micro-Venturing**

(3-0-3)

A practical guide for both business and non-business majors, undergraduate and graduate students, to learn the essential elements of micro-venturing. The course will concentrate on defining the role of social entrepreneurship in solving the larger problems of domestic and global poverty. The fundamentals of finance, law, marketing, and management will be introduced and applied to practical projects with the intent of creating viable business solutions in the marketplace.

### **BAMG 30506. Micro-Venturing II**

(2.5-0-3)

A comprehensive review of the fundamentals of finance, law, marketing, and management will be presented. In classroom and workshop formats, students will be teamed up to develop sound business plans with local entrepreneurs and compete for available seed capital to implement their business plans within the surrounding community. Students take their skills, work with business owners, and become mentors.

### **BAMG 30700. Operations and Competitive Enterprise**

(1.5-0-1.5)

*Prerequisite:* (BAMG 20100 OR BA 230 OR BAMG 230)

Business and government leaders increasingly are recognizing the importance of involving the whole organization in making strategic decisions so as to better compete globally. Because an organization usually commits the bulk of its human and financial assets to operations, operations is an important function in meeting global competition. Successful firms have demonstrated that operations can be an effective competitive weapon. In conjunction with well-conceived marketing and financial plans, these firms have made major penetrations into markets worldwide. This course is designed to address key operations issues in manufacturing as well as service organizations. Students will be able to identify and evaluate key factors in the design of effective operating systems for the production of goods or services. The course also covers a range of tools appropriate for the analysis of operating systems and offers an opportunity to discuss and compare various approaches to operations management in an international context.

### **BAMG 30900. Strategic Management**

(1.5-0-1.5)

*Prerequisites:* (MGT 20200 OR MGT 24200 OR MGT 231) AND (MARK 20100 OR MARK 24100 OR MARK 231) AND ((FIN 20100 OR FIN 24100 OR FIN 231) OR (FIN 20150 OR FIN 251))

Strategic management deals with the organization, management, and strategic positioning of the firm so as to gain long-term competitive advantage. Up until this time, most of your business education has emphasized a specialized, functional perspective of business situations (e.g., marketing, human resources, accounting, finance, operations management). In this course, we integrate these acquired skills by taking the perspective of a general manager (or, equivalently, a management consultant). General managers are responsible for setting the goals, objectives, and strategies of the organizations they lead as well as the implementation and execution of such plans. To do this, managers must be capable of understanding and utilizing the knowledge from each of the organization's functional areas to develop a cohesive and effective competitive strategy. In addition, they must be able to analyze competitive situations within industries in order to understand the sources of the firm's competitive advantage. In today's business environment, whether you are a new hire, consultant, or the CEO, you must be capable of thinking strategically.

### **BAMG 40580. Family Business Strategy**

(3-0-3)

This course focuses on the unique challenges of family-owned, family-controlled businesses, which graduates may very likely work in or consult to during their career. Learning how successful family businesses survive generation after generation can give a person an edge in consulting, governing, or managing in a family-owned business, whether or not the business is owned by that person's family. Between 80 to 90 percent of businesses in the United States and Latin America are family-owned and family-controlled. Over 80 percent of businesses in Europe and Asia remain family-owned and family controlled. It is very likely that an individual may work with or consult a family-owned, family-controlled business at some time in his or her career. Approximately 67 percent of family-owned businesses do not survive beyond the founding generation under the control of the founding family, and about 12 percent make it to the third generation. Leadership succession, estate planning, governance, strategy are all major concerns for family-owned businesses.

**BAUG 10000. Introduction to Business**

(1.5-0-1.5)

An introduction to the study of business, including keys and strategies for success, personal development, the benefit of extracurricular activities, professional development, and orientation to the business education system. The course will emphasize personal responsibility for academic success.

**BAUG 20001. Accountancy I**

(3-0-3)

An introduction to the techniques of accounting and the accounting profession, with an emphasis on the decision-usefulness of accounting information. The course stresses the relationship of accounting to economic activity, organizing information for decision making, the resource-acquisition decision, the uses of cash and noncash resources, the accounting for selling and manufacturing activities, and the information needs of multiple owners, lenders, and equity holders. A prerequisite of all accountancy and finance courses. Recommended University elective.

**BAUG 20002. Accountancy II**

(3-0-3)

*Prerequisite:* ACCT 20100

A continuation of the introduction to accounting, with an emphasis on the decision-usefulness of accounting information. An analysis of the tools used for evaluation of financial and operating performance. The use of budgets and accounting systems for centralized decision making, decentralized decision making, participative budgeting, monitoring and control, and intrafirm contracts. Introduction to not-for-profit entities, attestation, and taxation.

**BAUG 20003. Business Law: Contracts and Agency**

(3-0-3)

This course examines the background of the legal process and the judicial system, torts, contracts and the Uniform Commercial Code, and agency law. Required for all BA students.

**BAUG 20004. Statistics in Business**

(3-0-3)

*Prerequisites:* ((MATH 10250 OR MATH 105) OR (MATH 10350 OR MATH 119A OR MATH 119B OR MATH 119C OR MATH 119E OR MATH 119F) OR (MATH 10450 OR MATH 195) OR (MATH 10550 OR MATH 125 OR MATH 125A OR MATH 125B OR MATH 125C OR MATH 125E OR MATH 125F) OR (MATH 10850 OR MATH 165)) AND ((MATH 10260 OR MATH 108) OR (MATH 10360 OR MATH 120 OR MATH 120A OR MATH 120B OR MATH 120C OR MATH 120E OR MATH 120F OR MATH 120G OR MATH 120H) OR (MATH 10460 OR MATH 196) OR (MATH 10560 OR MATH 126 OR MATH 126A OR MATH 126B OR MATH 126C OR MATH 125E OR MATH 126F) OR (MATH 10860 OR MATH 166))

Descriptive and inferential statistical techniques in analysis of data, statistical inference, and decision making. Study includes central tendency, probability, hypothesis testing, analysis of variance, regression, and correlation.

**BAUG 20005. Corporate Finance Essentials**

(3-0-3)

*Prerequisite:* (ACCT 20100 OR ACCT 231)

The course provides a general introduction to finance principles. Students learn financial goals, valuation theory, risk and return concepts, financial statement analysis, and techniques for managing current and fixed assets and capital structure. Personal investing and financial institutions also are discussed.

**BAUG 20006. Principles of Management**

(3-0-3)

A study of the management process, including planning, organizing, staffing, directing, and controlling. Emphasis is placed on executive leadership, organizational behavior, and management theory.

**BAUG 20007. Computer Business Applications**

(3-0-3)

This is a "hands-on" course that develops the students' basic computer skills required for managerial problem solving and decision making. The students learn in this class how to use spreadsheets, database management, and Web development software to solve business problems. An e-commerce website that integrates the use of all these computer tools is the expected deliverable at the end of this course.

**BAUG 20008. Principles of Marketing**

(3-0-3)

*Prerequisite:* (ECON 10010 OR ECON 10011 OR ECON 101A OR ECON 101B OR ECON 101C) OR (ECON 10015 OR ECON 115) OR (ECON 10020 OR ECON 102 OR ECON 102A OR ECON 102B OR ECON 124A OR ECON 124B) OR (ECON 13181 OR ECON 180E) OR (ECON 20010 OR ECON 20011 OR ECON 201A OR ECON 201 OR ECON 201B OR ECON 223 OR ECON 224 OR ECON 224A OR ECON 224B) OR (ECON 20015 OR ECON 225) OR (ECON 20020 OR ECON 123A OR ECON 123B OR ECON 202 OR ECON 202A OR ECON 202B OR ECON 223A OR ECON 223B)

A study of markets, institutions, and the environment in which business firms operate, with attention to the effect these facets, forces, and issues have on the firm's overall marketing strategy.

**BAUG 25000. Internship I**

(1-0-1)

Internship credit for undergraduate students in the Mendoza College of Business who have secured an internship that relates directly to their major area of study. Requirements to receive this credit include submitting an application for credit before the internship begins, then submitting appropriate evaluations immediately following the internship. Per evaluation from the employer, students must complete the internship successfully to receive credit. Credit is granted by permission only and may not be repeated. Note: Credit for BAUG 25000 does not apply toward graduation credits in the Mendoza College of Business.

**BAUG 30000. Career Planning Strategies and Tactics**

(1-0-1)

Career Planning Strategies and Tactics is designed to provide students with the tools to manage their career throughout their working lifetime. It begins with self-assessment and clarifying career goals, continues with implementing job search strategies and tactics, and finally, outlines the transition from student to young professional. Our research at the Career Center has highlighted the need for Notre Dame students to improve in a number of areas critical to job search success. Career Planning Strategies and Tactics is designed not only to address the planning process necessary to start the job search, but also incorporates specific assistance in such areas as resumé writing, interview preparation, interview skills, and other tactics. The course will meet once per week for the entire semester. Students will be evaluated on a Satisfactory/Unsatisfactory basis.

**BAUG 30209. Boardroom Insights: A Senior Executive Speaker Series**

(1-0-1)

Corporate leaders and senior executives reflect on critical issues, concerns, and experiences, sharing their insights in a mix of lecture and discussion sessions designed to stimulate ideas and provide an opportunity for dialogue. Topics will vary from speaker to speaker, ranging across the spectrum of business to expose students to the opportunities and challenges inherent in today's global business environment. Speakers will select ideas they feel are relevant and valuable to students' development as they prepare for a professional career.

**BAUG 30210. Ten Years Hence: Boardroom Insights Lecture Series**

(1-0-1)

This course will explore issues, ideas, and trends likely to affect business and society over the next decade. A series of lectures on selected days throughout the semester will feature a wide range of experts on economic demography, biotechnology, religious fundamentalism, oil and peace, futurism and work, natural resources, and

more. No examinations or graded assignments. Students must attend all lectures; no unexcused absences. Open to any Notre Dame undergraduate student.

### **BAUG 30237. Seminar on European Union**

(30-0-3)

This session will look at the history of how and why the EU came into existence, its structure, and its policy competencies. It will include: Policy Making in the EU, The Single Market in Goods and Services, The Single Market in Capital and Labor, and Competition and Trade Policy.

### **BAUG 35000. Internship II**

(1-0-1)

Internship credit for undergraduate students in the Mendoza College of Business who have already received one academic credit for BAUG 25000. Requirements to receive this credit include submitting an application for credit before the internship begins, then submitting appropriate evaluations immediately following the internship. Per evaluation from the employer, students must complete the internship successfully to receive credit. Credit is granted by permission only and may not be repeated. Note: Credit for BAUG 35000 does not apply towards graduation credits in the Mendoza College of Business.

### **BAUG 40210. Teaching Decision Making**

(2-0-2)

At the essence of business education are two closely related traits, namely, the development of decision-making and leadership skills. The purpose of this course is to provide the theoretical psychological background and related methods of implementation for simultaneously developing both of these key management traits. The GOOD (Goal-Orientated Option Development) Model will be used as the basis for analyzing and communicating the components of critical thinking underlying choice. (lifegoals.net)

## **Department of Finance**

### **FIN 20020. Personal Finance**

(3-0-3)

This course discusses strategies in investing and helps students develop a lifelong financial plan. Topics include investing inside and outside retirement accounts, mutual funds, tax issues, insurance, and real estate. The course emphasizes securing your financial freedom. This course is suggested as a University elective for non-business majors.

### **FIN 20100. Corporate Finance Essentials**

(3-0-3)

*Prerequisite:* (ACCT 20100 OR ACCT 231)

This course is intended for business students who will not major in finance. The course provides a general introduction to finance principles. Students learn financial goals, valuation theory, risk and return concepts, financial statement analysis, and techniques for managing current and fixed assets and capital structure. Personal investing and financial institutions also are discussed.

### **FIN 20110. Investment Concepts**

(3-0-3)

This course provides an introduction to the fundamental economic principles underlying the investment decision and a descriptive overview of financial instruments and markets. The course is designed for non-business students.

### **FIN 20150. Corporate Financial Management**

(3-0-3)

*Prerequisite:* (ACCT 20100 OR ACCT 231)

This course is required for finance majors. A grade of "C" or higher is a prerequisite for continuing in the finance major. The course provides an in-depth and quantitative examination of the principles of financial decision making. Students learn the concept of value maximization, mathematics of finance, valuation of financial securities, capital investment evaluation, the estimation of required rates of return, financial statement analysis, and the theory of capital structure.

### **FIN 30210. Managerial Economics**

(3-0-3)

*Prerequisites:* ((ECON 10010 OR ECON 10011 OR ECON 101 OR ECON 101A OR ECON 101B OR ECON 101C) OR (ECON 124A OR ECON 124B) OR (ECON 20010 OR ECON 20011 OR ECON 201 OR ECON 201A OR ECON 201B OR ECON 224 OR ECON 224A OR ECON 224B)) AND (BAMG 20100 OR BA 230 OR BAMG 230) OR (FIN 30011)

This course provides a coordination of economic theory and managerial practice. Topics covered include consumer demand, production functions, cost behavior, output determination, and pricing within various market structures.

### **FIN 30220. Macroeconomic Analysis**

(3-0-3)

*Prerequisites:* ((ECON 10010 OR ECON 10011 OR ECON 101 OR ECON 101A OR ECON 101B OR ECON 101C) OR (ECON 124A OR ECON 124B) OR (ECON 20010 OR ECON 20011 OR ECON 201 OR ECON 201A OR ECON 201B OR ECON 224 OR ECON 224A OR ECON 224B)) AND (BAMG 20100 OR BA 230 OR BAMG 230) OR (ECON 20011)

The course addresses topics including the goals of economic policy, national income accounting, theory of income determination, and the determination and behavior of economic aggregates, such as total output and the price level.

### **FIN 30400. Advanced Corporate Finance**

(3-0-3)

*Prerequisites:* (FIN 20150 OR FIN 251) AND (BAMG 20100 OR BAMG 230 OR BA 230) AND (BAMG 20100)

This course provides a sound conceptual framework within which a wide variety of corporate financial policy decisions can be evaluated. The course builds upon and extends the topics of FIN 20150. Topics covered include risk and return, capital structure theory, dividend policy, corporate restructuring, leasing, and advanced

capital budgeting. This course combines class lectures and case discussions in order to blend theory and practice.

### **FIN 30600. Investment Theory**

(3-0-3)

*Prerequisites:* (FIN 20150 OR FIN 251) AND (BAMG 20100 OR BA 230 OR BAMG 230)

This is an advanced course covering investment theory, financial markets, and financial instruments. The topics of security analysis, and options and futures are also introduced.

### **FIN 40230. Business Forecasting and Data Mining**

(3-0-3)

*Prerequisite:* OR BA 230 OR BAMG 230) (BAMG 20100

This course develops the tools forecasters use to generate and evaluate forecasting models for both the economy and the firm. The student will make extensive use of the computer in applying these tools to real-world situations.

### **FIN 40240. Strategic Management and Industrial Organization**

(3-0-3)

*Prerequisite:* (FIN 30210 OR FIN 360)

This course seeks to understand the causes and effects of various market structures on pricing and product choices. Students will learn to apply economic theory to analyze various industries in the economy. A deeper understanding of standard economic models will be stressed. The course will cover topics such as market structure, business practices, market dynamics, and antitrust policy.

### **FIN 40310. Money and Banking**

(3-0-3)

*Prerequisites:* (FIN 20150 OR FIN 251) AND (FIN 30220 OR FIN 361 OR FIN 3611)

This course uses the tools developed in intermediate finance courses to analyze the workings of money systems, financial intermediaries, and central banks. Special attention is also paid to current developments in the banking industry, bank regulation, and the interaction of central banks and financial markets.

### **FIN 40320. Management of Financial Institutions**

(3-0-3)

*Prerequisites:* (FIN 20150 OR FIN 251) AND (BAMG 20100 OR BAMG 230 OR BA 230) AND (BAMG 20100

This course examines the theory and practice of financial firms and the markets in which they operate. It analyzes the role of various financial intermediaries in the transfer of funds between economic units. Management issues and problem solving techniques are emphasized through the use of case studies.

### **FIN 40330. Commercial Bank Management**

(3-0-3)

*Prerequisites:* (FIN 20150 OR FIN 251) AND (FIN 30220 OR FIN 361)

This course examines the management issues faced at commercial banks. Topics covered include the structure and regulation of the banking industry, sources of funds, liquidity management, credit standards and lending operations, and investment policies and practices. Student teams participate in the management of a computer simulation bank that requires a broad range of financial decisions.

### **FIN 40410. Mergers and Acquisitions**

(3-0-3)

*Prerequisite:* (FIN 30400 OR FIN 390)

The objective of this course is to understand various aspects of the corporate acquisition market, including sources of acquisition synergies, valuation and pricing of acquisition targets, takeover defenses, the roles of management incentives and compensation, financing methods, the roles of insider and institutional shareholders, and regulations and taxes.

### **FIN 40420. Cases in Financial Management**

(3-0-3)

*Prerequisite:* (FIN 30400 OR FIN 390)

This course provides intensive analysis of the functions performed by the financial executive: financial planning and control, asset management, financial structure management, capital budgeting, dividend policies, and financial strategies for growth. Extensive use is made of cases.

### **FIN 40430. Investment Banking and Private Equity**

(3-0-3)

*Prerequisites:* (FIN 30600 OR FIN 370) AND (FIN 30400 OR FIN 390)

This course will focus primarily on how corporations raise money in various ways to meet their funding needs, both short- and long-term. The first portion will look at domestic, US dollar funding mechanisms, and the second portion will cover funding in foreign currencies. The course will cover private and public debt markets, the Eurobond market, and how multinationals use derivatives to manage their required international financing.

### **FIN 40480. Corporate Governance**

(3-0-3)

*Prerequisite:* (FIN 30400 OR FIN 390)

This course studies the major issues and problems involved in corporate governance from the point of view of an investor. Emphasis is on evaluating proposed solutions to these problems. Topics such as external political and legal influences, and internal executive compensation and monitoring of executive behavior will be discussed.

### **FIN 40500. International Finance**

(3-0-3)

*Prerequisites:* (FIN 20150 OR FIN 251) AND (FIN 30220 OR FIN 34220 OR FIN 361 OR FIN 3611)

The increasing international exchange of goods, services, and financial capital demands increased understanding of international financial markets. The first part of the course addresses the international financial environment, examining institutional, theoretical, and empirical factors influencing exchange rates. The second part of the course addresses derivative security markets for foreign exchange, notable currency forward, futures, and options markets. The third part of the course discusses international debt, equity, loan and money markets, and their interrelationship with foreign exchange markets.

### **FIN 40510. Applied Global Money Management**

(3-0-3)

*Prerequisites:* (FIN 30220 OR FIN 361) AND (FIN 30600 OR FIN 370) AND (FIN 40500 OR FIN 475)

This course combines investment theory and practice from a global perspective. Students manage an actual portfolio composed of domestic and foreign equity, debt, foreign exchange, and derivatives. Guest speakers (e.g., portfolio managers and security analysts) frequently visit the class to share their insight and experience with respect to real-world portfolio management.

### **FIN 40610. Security Analysis**

(3-0-3)

*Prerequisite:* (FIN 30600 OR FIN 370)

This course covers the theory and practice of the valuation of securities—both stocks and bonds. The emphasis is on actual industries and companies. The equity analysis involves aggregate market analysis, industry analysis, and company analysis. The analysis of bonds involves credit analysis related to bond ratings and predicting insolvency and the analysis of interest rates.

### **FIN 40620. Trading and Markets**

(3-0-3)

*Prerequisites:* (FIN 20150 OR FIN 251) AND (BAMG 20100 OR BAMG 230 OR BA 230) AND (FIN 370 OR FIN 30600)

This course examines the general nature of organized trading by examining how bid and offer prices are determined, how market rules evolve, and what markets should be built. While markets for products and services are discussed, the focus

is on the trading of financial securities. Existing centralized equity exchanges face competition from new alternative trading systems made possible by today's information technology. This course also examines the impact and implications of this dynamic.

### **FIN 40630. Options and Futures Markets**

(3-0-3)

*Prerequisite:* (FIN 30600 OR FIN 370)

This course examines various topics involving options and futures, such as pricing fundamentals and models, risk management, trading strategies, and regulatory issues. Computer and mathematical skills are required and used regularly throughout the course.

### **FIN 40640. Applied Investment Management**

(6-0-6)

*Prerequisite:* (FIN 30600 OR FIN 370)

This course will provide an opportunity for students to blend the theory of investments with the practical demands of investment management. The course objectives include an understanding of the process of establishing a portfolio strategy with a real portfolio, gaining knowledge of the mechanics of trading, current theories of market micro structure, principles of equity, and bond valuation and technical analysis, and the role of derivatives. Students will actively manage this portfolio throughout the semester.

### **FIN 40650. Advanced Derivatives**

(3-0-3)

*Prerequisites:* (FIN 30600 OR FIN 370) AND (FIN 40630 OR FIN 478) OR FIN 44630

This course examines several advanced topics involving derivatives, emphasizing the interplay between risk management and financial engineering. Major topics include swaps, interest rate forwards and options, advanced equity and interest rate derivatives, risk management techniques and applications (including Value at Risk), and managing risk in an organization. The required text is *An Introduction to Derivatives & Risk Management*, 6th ed., by Don Chance. This will be supplemented by four cases and various articles. Grades will be based on four case analyses (40 percent), two exams (30 percent), an independent project on a topic chosen by each student individually (20 percent), and class participation (10 percent).

### **FIN 40660. Debt Instruments**

(3-0-3)

*Prerequisite:* (FIN 30600 OR FIN 34600 OR FIN 370)

This course studies the US and global bond markets. The focus is on traditional and evolving bond instruments including those with embedded options. We will consider bond valuation techniques, the term structure of interest rates and the analysis of bonds with embedded options. Bond portfolio management strategies and performance benchmarks are also studied.

### **FIN 40820. Mathematical Methods in Financial Economics**

(3-0-3)

*Prerequisite:* (FIN 34600 OR FIN 30600 OR FIN 370)

An introduction to financial economic problems using mathematical methods, including the portfolio decision of an investor and the determination of the equilibrium price of stocks in both discrete and continuous time, will be discussed. The pricing of derivative securities in continuous time including various stock and interest rate options will also be included. Projects reflecting students' interests and background are an integral part of this course.

### **FIN 40830. Strategic Business Analysis**

(3-0-3)

*Prerequisite:* (FIN 30210 OR FIN 360)

Strategic situations arise when your decisions can affect someone else's profits and when the decisions of others can affect your profits. This course develops the analytical skills needed to understand the strategic interactions between competitors, between suppliers and customers, and between employers and employees.

Possible topics include competition in prices and production levels, short-term and long-term contracting, auctions, and bargaining.

### **FIN 40840. Strategic Corporate Accounting and Finance**

(3-0-3)

*Prerequisite:* (FIN 30600 OR FIN 370)

This course provides an opportunity for students to blend the theory of finance with accounting policies in a real-world setting. The course will cover several strategic financial decisions and the accounting implications thereof. In addition to formal lectures, students will be required to complete a series of group projects using data from a large, multinational corporation. Decisions covered will include capital investments, mergers and acquisitions, benchmarking, pricing decisions, and transfer pricing.

### **FIN 46009. Directed Reading: Readings and Research Fundamentals in Mergers and Acquisitions**

(1-0-1)

The student will meet with the instructor for 1.5 hours per week during the semester to explore developments and current academic research in the field of mergers and acquisitions. The student will prepare readings for discussion, including textbook materials, published research, and working papers (to be assigned by the instructor). The assigned readings will provide background for a research proposal to be developed by the student with the instructor's guidance.

## Management

### MGT 20200. Principles of Management

(3-0-3)

A study of the management process, including planning, organizing, staffing, directing, and controlling. Emphasis is placed on executive leadership, organizational behavior, and management theory.

### MGT 20600. Computer Business Applications

(3-0-3)

Basic programming will be developed to enable the student to use the computer for problem solving and decision making in related areas. Use of TSO, personal computers, and the employment of spreadsheets will be developed. Students may also learn database management software and theories and methods surrounding the Internet. Applies the material covered in MGT 20600. This course is the lab portion of the class and should be taken in the same semester as the lecture component. In this lab course, the students will be asked to develop stand-alone or Web-enabled business applications.

### MGT 30220. Management Communication

(1.5-0-1.5)

This course focuses on writing and speaking and interpersonal skills that managers will need to solve everyday communication problems. Topics include employment communication, researching business information, business briefings, informative presentations, and persuasive speaking. A case-method approach to writing instruction asks students to solve authentic problems within the context of a business by writing for varied audiences, including executives, customers, employees, shareholders, the press, and the public.

### MGT 30660. Strategic IT Applications

(1.5-0-1.5)

This course exposes the students to the current issues faced by IS professionals, managers, and consultants. Students are required to research a specific topic each week and write a brief report. Industry specialists are invited to discuss topics with the students. This course is specifically designed to provide students with the opportunity to interact with IS professionals, to form an appreciation of the complexity of issues facing IS managers, and to develop their analytical and communication skills.

### MGT 40420. Innovation and Design

(3-0-3)

*Prerequisite:* (MGT 20200 OR MGT 231)

This course investigates how organizations can best cope with rapidly changing environments and technologies. A combination of lectures, cases and projects are used to examine problems in determining and implementing changes in organizational structures and processes.

### MGT 40490. Business Problem Solving

(3-0-3)

*Prerequisites:* (MGT 20600 OR MGT 240) AND (MGT 20200 OR MGT 231)

This course prepares students for careers in the area of management consulting. Special emphasis is placed on consulting in technology, operations management, and corporate strategy. The course uses a variety of cases, lectures, and exercises to acquaint students with consulting and to build necessary skills.

### MGT 40700. Project Management

(1.5-0-1.5)

Students will be introduced to concepts regarding project selection techniques, project planning, project scheduling, resource allocation, and project control. Project management software such as Microsoft Project will be used as tools to illustrate the concepts. Optimization and risk management associated with project management will be modeled using Excel Solver and @Risk software.

### MGT 40750. Spreadsheet Decision Modeling

(1.5-0-1.5)

Managers today must increasingly make decisions on issues that are complex and have quantitative aspects. This course explores how spreadsheet-based tools can improve this type of decision making. All tools are studied in the context of real-world applications from several business functions: operations, finance, marketing, and accounting. Specific applications include logistics systems, process improvement, portfolio selection, options pricing, data mining, test-market decisions, and cash balance analysis. General principles that can enhance the choice and application of these tools will be discussed. Only a basic familiarity with spreadsheets is assumed.

### MGTC 30300. Management Competencies

(3-0-3)

*Prerequisite:* (MGT 20200 OR MGT 231)

This course examines the determinants and consequences of human behavior in organizations. Students will develop skills in diagnosing, understanding, and solving problems of organizational administration. Particular emphasis will be placed on developing competencies in areas such as participative management and empowerment, teamwork, leadership, and motivation.

### MGTC 30450. Human Resources

(3-0-3)

*Prerequisites:* (MGT 20200 OR MGT 231) AND (BA 20100 OR BA 230 OR BAMG 230 OR BAMG 20100)

Whether you are working for a Fortune 100 company, a .com startup, or something in between, it has become increasingly clear that "the people make the place." This course is designed to increase your understanding of how organizations acquire, develop, and maintain high-performing employees. We will consider many systems and processes that historically have been considered "HR" topics. Our focus, however, will be managerial in nature and is intended to help you become "informed consumers" of these organizational practices, rather than experts in their design and implementation. This should help you manage your own career and provide useful skills as you progress beyond your initial job placement.

### MGTC 30460. International Management

(3-0-3)

*Prerequisite:* MGT 20200

This course examines the nature of international management methods and the role of American managers in the foreign environment with a primary focus on the influence of cultural variables on the philosophy and practice of management.

### MGTC 40410. Leadership and Motivation

(3-0-3)

*Prerequisite:* (MGT 20200 OR MGT 231)

The role of the leader influencing individual, group, and organizational performance is examined in this course. Characteristics of leaders, followers, situations, and group dynamics are considered as factors that affect the leadership process.

### MGTE 30500. Introduction to Entrepreneurship

(3-0-3)

*Prerequisite:* (MGT 20200 OR MGT 231)

This course introduces students to the basic concepts and skills required to understand the nature of entrepreneurship, recognize opportunity, and assemble the resources to start a new business. Students develop a market feasibility study for a new business concept. The class includes entrepreneur guest speakers, cases, and activities that will help students experience what it is like to be an entrepreneur.

### MGTE 30510. Entrepreneurship: Go to Market

(2.5-0-1.5)

*Prerequisite:* (MGTE 30500 OR MGTE 320) OR (MGTE 40508 OR MGTE 420N)

Go to Market is about launching a new venture. After writing the start-up business plan, the entrepreneur is faced with the daunting challenge of execution. This course explores the theory, principles, tools, and best practices for implementing the new-venture business plan. Growth management, sustaining the new venture's

competitive edge and advantage, crisis management, and human resources are among the concepts that will be explored in this course.

### **MGTE 30520. Funding New Ventures**

(1.5-0-1.5)

*Prerequisite:* (MGTE 30500 OR MGTE 320)

This course examines financing the startup of a new venture. The course includes bootstrapping and the characteristics and merits of financing with equity and debt, venture capital, and angels. Students learn how to prepare a financial plan, including projecting sales and capital expenditures, designing pro-forma income statements, balance sheets, and sources and applications of funds statements.

### **MGTE 30530. New Ventures and the Law**

(1.5-0-1.5)

*Prerequisite:* (MGTE 30500 OR MGTE 320)

This course examines the legal structure options for new ventures, the pros and cons of incorporating, and the requirements, advantages, and disadvantages of subchapter "S" election and forming a 501(c)(3) nonprofit corporation. The importance of laws and regulations on all aspects of a new venture is explored. Patents, copyrights, contracts, and regulations also are discussed.

### **MGTE 40550. Social Entrepreneurship**

(1.5-0-1.5)

Strategic positioning of the new firm; preparing the plans for marketing, operations, people, and finance. This course will also deal with new-venture launch, corporate renewal, and corporate turnaround. Models of the new venture formation process; entrepreneurs, new business ideas, innovation, environmental analysis, supports, and incentives for entrepreneurship. The course will include lectures, case studies, and an individual project.

### **MGTE 40580. Family Business Strategy**

(1.5-0-1.5)

This course will provide opportunity to study and discuss family and business cycle issues that impact family firms. It will also examine the opportunities and unique challenges of family businesses. The course will surface issues from case studies, student experiences, and guest speakers.

### **MGTE 40590. Entrepreneurship, the Business Plan**

(3-0-3)

*Prerequisite:* (MGTE 30500 OR MGTE 34500 OR MGTE 320) OR (MGTE 40508 OR MGTE 420N)

One of the most important skills entrepreneurs need is the ability to write a good business plan for their new venture. A business plan communicates direction, focuses decision making, and is the ticket of admission to the investment process. Students in this course learn how to design a well-written business plan. All course participants are required to write a business plan for their new venture.

### **MGTI 30610. Application Development**

(3-0-3)

*Prerequisite:* (MGT 20600 OR MGT 240)

This course introduces students to the concepts of computer programming. Fundamentals of program development are emphasized, including top-down design; object-oriented, event-driven programming; and debugging, testing, and implementation of computer software. Although this course uses the Visual Basic (VB) language, it also will give particular attention to the development of problem-solving skills using any programming language. The students are expected at the end of this course to have refined their critical thinking skills, be able to determine the types of problems that can be solved most effectively using each type of computer programming methodology, and design and implement computer programs to solve real-life problems.

### **MGTI 30620. Business Intelligence Systems**

(3-0-3)

*Prerequisite:* (MGT 20600 OR MGT 240)

An intensive examination of organizational databases: creation, maintenance, processing, and management. Also addresses security and privacy, information

validity and reliability, resistance to rational systems, and the organizational role of the database administration.

### **MGTI 30630. Systems Analysis and Design**

(3-0-3)

An in-depth study of the analysis and design of information processing systems. Topics include systems survey and selection, technical and economic feasibility studies, information requirements analysis, system design, and program and procedure development.

### **MGTI 30640. Networking and Security**

(3-0-3)

This course introduces the students to the technical and managerial aspects of both local and wide-area business data communications. The technical topics covered include fundamental data transmission concepts, as well as local and wide-area network hardware, topologies, and system software. Students also are exposed to the most frequently used programming languages for Web development, among them Active Server Pages, Java scripts, and XML.

### **MGTI 40612. Advanced Programming**

(3-0-3)

*Prerequisite:* (MGT 30610 OR MGT 350) OR (MGTI 30610 OR MGTI 350)

This course provides the student the opportunity to learn a leading-edge programming language that has helped organizations integrate the Internet seamlessly with their information systems. The course also covers the foundation of object-oriented programming paradigms.

### **MGTI 40660. Web Development**

(3-0-3)

The Internet and World Wide Web have become the most popular platform for business application development. This course provides an in-depth exposure to building Web-based applications. It explains in detail the Internet application development architecture and client/server systems. We will use Active Server Pages (ASP) as a tool to develop database-intensive and Web-based applications. The course also covers HTML, XML, SQL, and JavaScript.

### **MGTI 40670. Technology Risk Management**

(3-0-3)

*Prerequisite:* (MGTI 30610 OR MGTI 350)

According to FBI crime statistics, 85 percent of all companies with networked computer systems suffered measurable losses in 2001. Many in the computer-security industry believe that the other 15 percent were either unaware of their losses, or they were unwilling to reveal such potentially damaging information. The purpose of this course is to examine computer security and privacy to better assess related risks.

### **MGTI 40690. ITM Capstone Project**

(3-0-3)

An MIS elective for those wishing to exercise their technical skills working in teams on systems design and implementation projects. The projects may be based on proposals from the students, from previous design projects for local clients, or from other sources. General topics such as project management and best practices for project development, as well as technical topics as appropriate for the projects, will complement the overall development effort.

## **Marketing**

### **MARK 20100. Principles of Marketing**

(3-0-3)

*Prerequisite:* (ECON 10010 OR ECON 101 OR ECON 101A OR ECON 101B OR ECON 101C) OR (ECON 10020 OR ECON 124A OR ECON 124B) OR (ECON 20010 OR ECON 201) OR (ECON 201A OR ECON 201B OR ECON 224 OR ECON 224A OR ECON 224B) OR (ECON 10015 OR ECON 115) OR (ECON 10011) OR (ECON 20011) OR ECON 10011

A study of markets, institutions, and the environment in which business firms operate with attention to the effect these facets, forces, and issues have on firms' overall marketing strategy.

**MARK 30100. Consumer and Organizational Buyer Behavior**  
(3-0-3)

*Prerequisite:* (MARK 20100 OR MARK 231)

An investigation of the decision-making process of consumer and organizational buyers. The course considers the social, cultural, psychological, and economic dimensions of behavior as they apply to the acquisition of goods and services.

**MARK 30110. Quantitative Analysis for Marketing Decision Making**  
(3-0-3)

*Prerequisites:* (MARK 20100 OR MARK 231) AND (BAMG 20100 OR BA 230 OR BAMG 230) AND (MGT 20600 OR MGT 240)

An introduction to data-based analysis areas such as market segmentation, new product development, positioning, promotion analysis, and database marketing. The course provides hands-on exposure to techniques that assist managers in structuring marketing problems and in applying data in marketing decisions.

**MARK 30120. Marketing Research**

*Prerequisite:* MARK 30110

Required for all marketing majors. A study of the application of scientific method to the definition and solution of marketing problems with attention to research design, sampling theory, methods of data collection and the use of statistical techniques in the data analysis.

**MARK 30350. Marketing and Technology**  
(3-0-3)

*Prerequisites:* (MARK 20100 OR MARK 231) AND (MGT 20600 OR MGT 240)

A study of the ways marketing can be done more efficiently and effectively on the Internet. The role of the Internet in relationship marketing, database marketing, and interactive marketing are explored. Special consideration is given to the impact of the Internet on pricing decisions, marketing research, new product development, electronic retailing, and integrated marketing communications.

**MARK 30500. Integrated Marketing Communications**  
(3-0-3)

*Prerequisite:* (MARK 20100 OR MARK 231)

This course examines the strategic use of various marketing-communication elements to build and maintain brand equity, including advertising, sales promotion, public relations, event sponsorships, and direct marketing. Analysis focuses on topics such as selecting among alternative promotional tools, budgeting and allocation decisions, determining appropriate message strategy, and developing media schedules for a given product/market selection. Particular attention is paid to the effective integration of elements across the promotional mix.

**MARK 30600. Designing Value-Based Solutions for Business Markets**  
(3-0-3)

*Prerequisite:* (MARK 20100 OR MARK 231)

Learning to design value-based marketing plans and strategies for B2B markets. These strategies are based on carefully developed, value-based, highly differentiated, flexible market solutions ("naked solutions" plus highly variable options). Learning to build value-based selling tools for creating the financial visions necessary to counter "more for less" demands from customers and provide convincing financial justification for solution purchase. Includes building sophisticated spreadsheet-based value models to help sort out, quantify and communicate differential values available from value-focused B2B marketing strategies.

**MARK 30650. Professional Selling in Business-to-Business Markets**  
(3-0-3)

*Prerequisite:* (MARK 20100 OR MARK 231)

A study of the role of the salesperson and the function of sales management in creating close and productive buyer-seller relationships in the business-to-business

domain. Emphases in the course are placed on trends affecting the sales person's role, the effects of the internal and external environment on the selling function, and the value of the salesperson to the firm and society.

**MARK 40100. Strategic Marketing**  
(3-0-3)

*Prerequisites:* (MARK 30100 OR MARK 350) AND (MARK 30110 OR MARK 370) AND (MARK 30120 OR MARK 374) OR (MARK 34100) OR (MARK 34100)

The development and implementation of marketing programs, including determining the marketing mission within the context of environmental factors and organizational resources. Working in teams, students develop comprehensive business plans and compete in a computer-based market simulation.

**MARK 40550. Public Relations**  
(3-0-3)

*Prerequisite:* (MARK 20100 OR MARK 231)

This course will provide students with a thorough understanding of the history, role, functions, techniques, and practices of the multi-dimensional field of public relations. Students will gain an understanding of public relations in corporate, trade, nonprofit, education, government, and other organizations; examine and analyze real-world public relations cases; learn the research, planning, communication, and evaluation process of public relations; and prepare news releases, advisories, speeches, and other relevant materials.

**MARK 40600. Communicating Value-Based Solutions for Business Markets**  
(3-0-3)

*Prerequisite:* (MARK 20100 OR MARK 231)

Learning to systematically create operating, transition, and financial visions and to convert those visions into more profitable sales in B-to-B markets. Learning the "solution-selling" process (and sales management) and related, highly operational, value-based professional selling and sales management systems.

**MARK 43500. Advertising Campaigns**  
(3-0-3)

*Prerequisite:* (MARK 30100 OR MARK 350) OR (MARK 34100) OR (MARK 34100)

This course provides students an opportunity to create, produce, and present promotional solutions in support of new or existing products and services. The course focuses on the overall role of the campaign as well as its strategic development and tactical implementation. The reality of the learning opportunity is enhanced by interaction with real clients and interpretation to graphic designers.

**MARK 43700. Product Innovation**  
(3-0-3)

*Prerequisite:* (MARK 30100 OR MARK 350)

Introduces students to some important activities and perspectives that can enhance innovativeness and improve the ability to influence and forecast the adoption and diffusion of innovations. These include the application of techniques for understanding user needs; the use of creative problem-solving techniques in idea generation; the application of scenario analysis; and the selection of appropriate organizational and marketing strategies and tactics in overcoming resistance to innovation.

**MARK 43900. Seminar in Marketing**  
(3-0-3)

These seminars are devoted to selected areas of marketing and related disciplines. Each participant is expected to explore the chosen topic(s) determined by the participants and the teaching staff.

# College of Engineering

## Department of Aerospace and Mechanical Engineering

### AME 20211. Introduction to Aeronautics

(3-0-3)

*Prerequisites:* ((MATH 10560 OR MATH 126 OR MATH 126A OR MATH 126B OR MATH 126C OR MATH 126E OR MATH 126F) OR (MATH 10860 OR MATH 166)) AND (PHYS 10310 OR PHYS 131)

*Corequisite:* AME 20214

An introduction to the fundamental concepts in fluid mechanics, the science of flight, the atmosphere, and airplane aerodynamics. Applications of the principles of mechanics to aircraft flight performance, stability, control, and design. Fall.

### AME 20212. Introduction to Mechanical Engineering

(3-0-3)

*Prerequisites:* (MATH 10560 OR MATH 126 OR MATH 126A OR MATH 126B OR MATH 126C OR MATH 126E OR MATH 126F) AND (PHYS 10310 OR PHYS 131)

*Corequisite:* AME 22212

An introduction to the discipline of mechanical engineering. Application and integration of the varied mechanical engineering subdisciplines to practical case studies. Fall.

### AME 20213. Measurements and Data Analysis

(3-0-3)

*Prerequisite:* (AME 20211 OR AME 240) OR (AME 20212 OR AME 230)

*Corequisite:* AME 21213

Introduction to experimental methods used in aerospace and mechanical engineering, including basic instrumentation, data acquisition, and data analysis techniques. Embedded microprocessors may be used for data acquisition and/or control. Fall and spring.

### AME 20214. Introduction to Engineering Computing

(1-1-1)

*Prerequisite:* EG 10112 OR EG 112

*Corequisite:* AME 20211 or AME 20212

Introduction to the UNIX operating system and the Fortran programming language with applications to engineering computing. Fall.

### AME 20221. Mechanics I

(3-0-3)

*Prerequisites:* ((EG 10111 OR EG 111) OR (EG 10112 OR EG 112)) AND ((MATH 10560 OR MATH 126 OR MATH 126A OR MATH 126B OR MATH 126C OR MATH 126E OR MATH 126F) OR (MATH 10860 OR MATH 166)) AND (PHYS 10310 OR PHYS 131)

Introduction to systems of forces and couples, vector mechanics. Equilibrium of rigid bodies. Internal forces and moments, trusses and beams, distributed loads, and properties of areas. Friction and virtual work. Kinematics and kinetics of particle motion. Systems of particles. Fall.

### AME 20222. Mechanics II

(3-0-3)

*Prerequisites:* (MATH 20550 OR MATH 225A OR MATH 225B OR MATH 225C OR MATH 225E) AND (AME 20221 OR AME 225)

Introduction to Newtonian dynamics. Kinematics and kinetics (energy, linear, and angular momenta) of particles, systems of particles, and rigid bodies. Spring.

### AME 20231. Thermodynamics

(3-0-3)

*Prerequisite:* (MATH 20550 OR MATH 225 OR MATH 225A OR MATH 225B OR MATH 225C OR MATH 225E OR MATH 265)

Basic concepts of thermodynamics. The First Law of Thermodynamics. Work, heat, properties of substances, and state equations. The Second Law of Thermodynamics. Applications to engineering systems. Spring.

### AME 20241. Solid Mechanics

(4-0-4)

*Prerequisite:* (AME 20221 OR AME 225) OR (CE 20150 OR CE 225) OR (MATH 20550 OR MATH 225 OR MATH 225A OR MATH 225B OR MATH 225C OR MATH 225E OR MATH 265) OR (MATH 20550)

*Corequisite:* AME 21241

Introduction to the concepts of stress and strain, material properties, deflections of bars under axial, torsional, and bending loads, statically indeterminate problems, and stress transformations, including related experimental laboratory exercises. Spring.

### AME 30314. Differential Equations, Vibrations, and Control I

(3-0-3)

*Prerequisite:* (MATH 20580 OR MATH 228 OR MATH 228A OR MATH 228B OR MATH 228C)

First of a two-course sequence that introduces methods of differential-equation solution together with common engineering applications in vibration analysis and controls. Includes second-order, linear differential equations, feedback control, single-degree of freedom vibrations, numerical solutions to systems of ordinary differential equations, and partial differential equations. Fall.

### AME 30315. Differential Equations, Vibrations, and Control II

(3-0-3)

*Prerequisite:* (AME 30314 OR AME 34314 OR AME 301)

Systems of nth-order differential equations, multiple-degree of freedom vibrations, linear feedback, s-plane controls analysis, and frequency response analysis. Spring.

### AME 30331. Fluid Mechanics

(3-0-3)

*Prerequisites:* (AME 20222 OR AME 226) AND (AME 20231 OR AME 24231 OR AME 327) AND (MATH 20580 OR MATH 20610 OR MATH 221 OR MATH 226 OR MATH 228 OR MATH 228A OR MATH 228B OR MATH 228C)

A basic course in fluid mechanics. Topics include mathematics of fluids, Euler N.S. Bernoulli's equation, control volumes, differential analysis, dimensional analysis and dynamic similarity, aerodynamics, boundary layers, and turbulence. Fall.

### AME 30332. Compressible Aerodynamics

(3-0-3)

*Prerequisite:* (AME 30031 OR AME 334) OR (AME 30331 OR AME 34331 OR CE 34330 OR AME 330) OR (AME 30033 OR AME 350)

An intermediate course of the study of the dynamics and thermodynamics of compressible flow for both internal and external geometries, including boundary layer effects. Applications of compressible flow principles to propulsive nozzles, flight simulation facilities, and supersonic airfoil problems. Spring.

### AME 30333. Aerodynamics Laboratory

(4-0-4)

*Prerequisites:* (AME 20213 OR AME 250) AND (AME 30331 OR AME 330)

Use and operation of a subsonic wind tunnel, flow velocity, pressure and strain gauge measurements, data acquisition, and analysis, with emphasis on interpretation of aerodynamic flow phenomena. Spring.

### AME 30334. Heat Transfer

(3-0-3)

*Prerequisite:* ((AME 30031 OR AME 334) OR (AME 30331 OR CE 34330 OR AME 34331 OR AME 330) OR (AME 30033 OR AME 350))  
An introductory course covering three modes of heat transfer: steady and unsteady conduction, elementary boundary layer analysis for laminar and turbulent convection, and the basic theory of radiation. Spring.

#### **AME 30341. Aerospace Structures**

(3-0-3)

*Prerequisite:* (AME 20241 OR AME 238)

A study of basic principles and methods for structural analysis of lightweight structures with emphasis on aerospace applications. An introduction to load analysis of aircraft, materials, fatigue, stress/deformation analysis of thin-walled structures, and aeroelasticity. Fall.

#### **AME 30361. Computer-Aided Design and Manufacturing**

(3-0-3)

Principles of engineering-graphic communications: visualization, sketching, orthographic projection, principal and auxiliary projections, 3-D surfaces, and feature-based design. Geometric dimensioning and tolerancing, computer-integrated manufacturing, and rapid prototyping. Fall and spring.

#### **AME 30362. Design Methodology**

(3-0-3)

*Prerequisite:* (AME 20212 OR AME 230)

Modeling and analysis of mechanical systems. Automated design decision process, introduction to statistical methods, material engineering, requirements definition, and product specifications. Fall.

#### **AME 30363. Design of Machine Elements**

(3-0-3)

*Prerequisite:* (AME 20241 OR AME 238)

Static and fatigue failure theories. Theory, design, and selection of gearing, power transmitting shafts, rolling element bearings, journal bearings, fasteners, springs, brakes, and clutches. Spring.

#### **AME 30381. Orbital and Space Dynamics**

(3-0-3)

*Prerequisite:* (AME 20222 OR AME 226)

The one-and two-body problems; geometrical elements and time dependence. Orbital determination. Linear orbits and regularization. Orbital transfer. The n-body problem; various forms of the three-body problem, including the circular restricted case, its "equilibrium" solutions and their stability. Spring.

#### **AME 36099. Directed Readings**

(V-0-V)

Individual or small group study under the direction of a faculty member in an undergraduate subject not currently covered by any University course. As needed.

#### **AME 40423. Mechanisms and Machines**

(3-0-3)

*Prerequisites:* (AME 20222 OR AME 226) AND (MATH 20580 OR MATH 20610 OR MATH 221 OR MATH 226 OR MATH 228 OR MATH 228A OR MATH 228B OR MATH 228C)

*Corequisite:* AME 42423

A course teaching the analysis and synthesis of planar, spherical, and spatial mechanisms. Topics include vectors, complex numbers, and the analysis of planar mechanisms, design of cams, gear tooth geometry, and the analysis of transmissions, synthesis of planar mechanisms, direction cosine matrices, and the analysis of spherical mechanisms, homogeneous transformations, and the analysis of spatial mechanisms. Fall.

#### **AME 40431. Gas Turbines and Propulsion**

(3-0-3)

*Prerequisite:* (AME 30331 OR CE 34200 OR AME 34331 OR AME 330)

The mechanics and thermodynamics of gas turbines and air-breathing propulsion devices. The mechanics of various space propulsion systems are also presented, including an introduction to rocket propulsion. Fall.

#### **AME 40451. Aerospace Dynamics**

(3-0-3)

*Prerequisites:* (AME 20222 OR AME 226) AND (AME 30315 OR AME 302)

Mechanics and equations of motion, aerodynamics forces, airplane motions, longitudinal and lateral. Introduction to autopilot design. Fall.

#### **AME 40461. Flight Mechanics and Introduction to Design**

(3-0-3)

*Prerequisites:* (AME 20211 OR AME 240) AND (AME 30331 OR CE 34330 OR AME 34331 OR AME 330)

The fundamentals of flight performance are developed. Primary emphasis will be on examining how configuration design parameters affect aircraft performance. Students are introduced to aircraft preliminary design methodology. Fall.

#### **AME 40462. Aerospace Design**

(4-0-4)

*Prerequisite:* (AME 40461 OR AME 440)

Team-design project with application to an aerospace system development. Includes topics in all associated technologies, design methodology, standards, and engineering ethics. Spring.

#### **AME 40463. Mechanical Engineering Senior Design Project**

(3-0-4)

*Prerequisites:* (AME 30362 OR AME 344) AND (AME 40423 OR AME 430)

*Corequisite:* AME 41463

A course that provides a comprehensive, team-oriented, project-based design of a selected mechanical system or process. Projects involve design specification development, engineering design, documentation, and prototype fabrication. Projects are assessed by industrial reviewers. Fall.

#### **AME 47099. Special Studies**

(V-0-V)

Individual or small group study under the direction of a faculty member in an undergraduate subject not currently covered by any University course. As needed.

#### **AME 48491. Undergraduate Research**

(V-0-V)

A research project at the undergraduate level under the supervision of a faculty member. Fall and spring.

#### **AME 50521. Intermediate Dynamics**

(3-0-3)

*Prerequisite:* (AME 20222 OR AME 226)

Review of linear algebra, 3-D rigid body dynamics kinematics and kinetics; the gyroscope; analytical dynamics: constraints and Lagrangian dynamics; Hamiltonian dynamics and canonical transformations.

#### **AME 50531. Intermediate Thermodynamics**

(3-0-3)

*Prerequisite:* (AME 20231 OR AME 24231 OR AME 327)

A second course in engineering thermodynamics, including cycle analyses, real gas behavior, psychometrics, gas mixtures, chemical equilibrium and finite-rate chemical reactions, elements of compressible flow.

#### **AME 50532. Computational Fluid Dynamics**

(3-0-3)

*Prerequisite:* (AME 30331 OR AME 34331 OR AME 330) OR (AME 30332 OR AME 360)

An introduction to the fundamentals of computational aerodynamics/fluid mechanics. Numerical techniques are developed and applied to the solution of several practical fluid mechanics and aeronautics problems.

**AME 50541. Finite Element Methods for Structural Analysis**

(3-0-3)

*Prerequisite:* (AME 20241 OR AME 238)

An introduction to the finite element method with applications to problems in structural analysis. Basics of linear and non-linear finite element formulation and programming; applications to bars, beams, and simple continuum problems; and use of commercially available codes with advanced input/output capabilities.

**AME 50542. Engineering Analysis of Manufacturing Processes**

(3-0-3)

*Prerequisites:* (AME 20241 OR AME 238) AND (CBE 34361 OR CBE 30361)

A senior elective course dealing with the application of engineering analysis to casting, forming, machining, and joining processes, as well as other advanced manufacturing processes.

**AME 50551. Introduction to Robotics**

(3-0-3)

*Prerequisite:* (AME 30314 OR AME 34314 OR AME 301)

Kinematics of 2-D and 3-D robots, statics and dynamics, design considerations, actuators, sensors, and control fundamentals. Project assignments are used to demonstrate the fundamentals of robotics.

**AME 50561. Reliability Engineering**

(3-0-3)

An introduction to fundamental concepts in reliability analysis that includes statistical concepts, data and data distributions, reliability analysis of data, quality concepts including Taguchi methods, analysis of maintained systems, human failure interaction, and fault-tree analysis.

**AME 50571. Structural Aspects of Biomaterials**

(3-0-3)

*Prerequisites:* (AME 20241 OR AME 238) AND (CBE 30361 OR CBE 225 OR CBE 34361 OR CHEG 225)

Structure and mechanical functions of load-bearing tissues and their replacements. Natural and synthetic load-bearing biomaterials for clinical applications are reviewed. Biocompatibility and host response to structural implants are examined. Quantitative treatment of biomechanical issues related to design of biomaterial replacements for structural function. Material selection for reconstructive surgery is addressed. Directions in tissue engineering are presented.

**AME 50581. Space Systems Analysis**

(3-0-3)

Missions, spacecraft dynamics, attitude determination and control, space environment, spacecraft power, telecommunications, avionics, data handling/processing, and other topics that may include configuration, load determination and structure, and thermal control.

**AME 57104. Engineering Analysis**

(3-0-3)

*Prerequisite:* (AME 302 OR AME 30315)

The course is designed for undergraduates interested in graduate school in engineering, either directly after graduation or later. Students should have taken the required courses in mathematics. This course will introduce them to modern mathematical techniques that are commonly used in the engineering sciences. Theory will be closely related to applications.

**Department of Chemical and Biomolecular Engineering****CBE 20255. Introduction to Chemical Engineering Analysis**

(3-0-3) McCready

*Prerequisites:* ((MATH 10560 OR MATH 10460 OR MATH 10860 OR MATH 126 OR MATH 126A OR MATH 126B OR MATH 126C OR MATH 126E OR MATH 126F OR MATH 166 OR MATH 196) AND (CHEM 10122 OR CHEM 122) AND (PHYS 10310 OR PHYS 131))*Corequisite:* CBE 22255

This is a foundation course in which the students learn to apply the concepts of material and energy balances to problems involving chemical processes, biological systems, and environmental phenomena. Within this context, they learn problem-solving techniques and acquire a working knowledge of phase equilibria, physical properties, and computer applications.

**CBE 20256. Chemical Engineering Thermodynamics**

(4-0-4) Maginn

*Prerequisite:* (CBE 20255 OR CBE 255 OR CHEG 255)

The course provides an introduction to modern applied thermodynamics, with a focus on aspects relevant to chemical engineers. It begins with a review of the first law energy balance, followed by the development of the second law entropy balance. Thermodynamic constitutive equations for gases and liquids are developed from a molecular-level perspective, followed by applications involving thermodynamic cycles and energy conversion. The second half of the course concerns stability, thermodynamics of mixtures, and phase and chemical equilibrium.

**CBE 20258. Computer Methods in Chemical Engineering**

(3-0-3) Kantor

*Prerequisite:* (CBE 20255 OR CBE 255 OR CHEG 255)

Algorithms for solving algebraic (e.g., Gaussian Elimination, PLU decomposition, etc.) and differential equations (e.g., Runge-Kutta, Shooting methods) are derived and implemented using Matlab. Statistics and error analysis constitute a significant part of the course.

**CBE 20290. Career Choices for Engineers**

(1-1-1) Flynn

A seminar series featuring selected speakers who are employed or consult with high-tech business enterprises of both national and global involvement. The presentations and open symposium format will emphasize business ethics, competitive pressures, people skills, and most importantly, career opportunities for engineering graduates.

**CBE 22255. Introduction to Chemical Engineering Tutorial**

(1-0-0)

*Corequisite:* CBE 20255

Tutorial for Introduction to Chemical Engineering.

**CBE 30327. Thermodynamics**

(3-0-3)

Basic concepts of thermodynamics, temperature, pressure, volume, state equations, and thermodynamic properties of substances. The first law of thermodynamics, kinetic energy, potential energy, internal energy, work heat, and flow volume work balances in steady state and transient processes. The second law of thermodynamics, heat engines, lost work, and entropy balances. Thermodynamic diagrams, corresponding states, residual properties of high-pressure gases, liquid-state correlations, and changes of phase. Applications to the flow of liquids, power production, compressors, motive power engines, refrigeration, and other basic engineering systems

**CBE 30338. Chemical Process Control**

(3-0-3) Strieder

While the idealization of chemical processes is that they are operated at steady-state, they are, in fact, usually dynamic (unsteady state). Process feed compositions may change slightly; ambient conditions may change; pipe leaks may develop; steam pressures may vary, etc. There are any number of such disturbances that

may cause the process to deviate from its desired steady-state. In some cases, such deviations may be catastrophic; in other cases, a severe loss of product quality may be caused. Thus, process control devices are installed that detect deviations from the desired steady-state and attempt to correct them. In this course, students will be introduced to the analysis of chemical process dynamics and to the design and analysis of process control systems.

### **CBE 30343. Chemical Engineering Thermodynamics**

(3-0-3)

The old second thermodynamics course. It contained phase equilibria and chemical equilibria.

### **CBE 30355. Transport Phenomena I**

(3-0-3) Leighton

Basic conservation principles of energy, mass, and momentum are used to derive the integral and differential forms of the transport equations. These equations are used to solve fluid flow problems of both fundamental and practical interest.

### **CBE 30356. Transport Phenomena II**

(3-0-3) Zhu

*Corequisite:* CBE 32356

Integral and differential transport equations are applied to the solution of heat and mass transfer problems of interest to chemical engineers.

### **CBE 30361. Science of Engineering Materials**

(3-0-3)

*Prerequisite:* (CHEM 10114 OR CHEM 114) OR (CHEM 10116 OR CHEM 116) OR (CHEM 10118 OR CHEM 118) OR (CHEM 10121 OR CHEM 121)  
This is an introductory course that examines the relationship between the structure, processing, and properties of engineering materials. Common engineering materials, including steel, concrete, ceramics, and polymers are discussed. Mechanical, chemical, electrical, and magnetic properties of various materials are examined. The process dependence of microstructural development and defects levels is described.

### **CBE 31358. Chemical Engineering Laboratory I**

(1-4-3)

Chemical engineering laboratory courses are comprised of experiments that cover most of the major subject areas of chemical engineering. The rationale for combining all of the topics into two separate courses, as opposed to distributing them into the different lecture courses, is to provide a focused learning experience emphasizing experimental techniques to observe fundamental behavior, understanding of the phenomena in terms of the appropriate theory, and experience at technical report writing. Formal and informal oral presentation skills are also an important part of the courses.

### **CBE 32327. Thermodynamics Tutorial**

(1-0-0)

Tutorial for Thermodynamics.

### **CBE 32338. Chemical Process Control Tutorial**

(1-0-0)

Tutorial for Chemical Process Control.

### **CBE 32355. Transport Phenomena I Tutorial**

(1-0-0)

Tutorial for Transport Phenomena I

### **CBE 32356. Transport Phenomena II Tutorial**

(0-1-0)

*Corequisite:* CBE 30356

Tutorial for Transport Phenomena II.

### **CBE 40439. Simulation and Optimization**

(3-0-3)

This course will provide an overview of the computational methodologies used for chemical process simulation and optimization. Topics will include: (1) how to

formulate process models; (2) how to solve process models (linear and nonlinear equation solving, etc.); and (3) how to optimize using process models (linear and nonlinear programming, global optimization, etc.).

### **CBE 40443. Separation Processes**

(3-0-3) Hill

This course demonstrates the application of the principles of phase equilibria, transport processes, and chemical kinetics to the design and characterization of stagewise and continuous separation processes. Both graphical and rigorous numerical techniques are used, and the general procedures applicable to different specific processes are emphasized. Example problems are drawn from the petroleum, chemical, food, biochemical, and electronic materials processing industries.

### **CBE 40445. Chemical Reaction Engineering**

(3-0-3) Wolf

The basic concepts of chemical rate processes are applied to the theory of the design and operation of the various types of commercial reactors for both noncatalytic and catalytic reactions. Topics covered include mole balances, rate laws and stoichiometry, collection and analysis of rate data, multiple reactions, isothermal and nonisothermal reactor design, catalysis, and catalytic reactors.

### **CBE 40447. Modern Methods in Computational Molecular Thermodynamics and Kinetics**

(3-0-3) Schneider

This course will introduce the basis of modern approaches to computing the thermodynamics and kinetics of gas-phase, condensed-phase, and surface chemical reactions from first principles. Quantum chemical wavefunction and density functional approaches for treating the electronic structure of molecules, solids, and surfaces will be described. Optimization methods and statistical mechanical techniques for determining structures, spectroscopies, and thermodynamic and kinetic properties will be covered. Software for calculating these properties will be introduced and applied in hands-on exercises and a class project.

### **CBE 40448. Chemical Process Design**

(3-0-3) Stadtherr

This course represents a capstone in the chemical engineering curriculum. In this course, students will have the opportunity to apply the basic concepts learned in previous courses to the design and analysis of a chemical processing system. This will be done primarily through the design project. Supporting material to be covered in lectures includes the following: computer-aided design (process simulation), economic analysis, process safety, flowsheet synthesis (conceptual design), and decision-making analysis (optimization).

### **CBE 40456. Polymer Engineering**

(3-0-3) Hill

A course for seniors and graduate students in science and engineering who are interested in applications of engineering to polymer science and technology. Topics include polymerization reactions and the structure, properties, processing, and production of polymers. (Every year)

### **CBE 40461. Structure of Solids**

(3-0-3) McGinn

This class seeks to provide students with an understanding of the structure of solids, primarily as found in metals, alloys, and ceramics applied in technological applications. The structure of crystalline solids on the atomic level as well as the microstructural level will be discussed. Imperfections in the arrangements of atoms will be described, especially as regards their impact on properties. The study of structure through X-ray diffraction will be a recurring theme. A sequence of powder diffraction laboratory experiments (four to five class periods) also will be included.

### **CBE 40464. Principals of Materials Selection**

(3-0-3)

Case-study-based course focuses on systematically selecting the appropriate material (metal, ceramic, polymer, or composite), its method of processing and fabrication, and all associated costs to achieve an optimized choice for a given

shape. The student will learn to use a powerful computer search and database system (Cambridge Engineering Selector) to rapidly achieve an optimized materials selection for a wide variety of mechanical designs.

#### **CBE 40465. Intermolecular Forces**

(3-0-3) Zhu

This course will discuss experimental and theoretical techniques for understanding intermolecular forces.

#### **CBE 40472. Modeling—Ecology and Environment**

(3-0-3) Stadtherr

This course covers various topics pertaining to the Earth's ecological and biogeochemical systems and the effects of disturbances or imbalances, particularly those caused by human/industrial activities. Based on fundamentals incorporated in such subject areas as chemical reaction engineering, process dynamics, and transport phenomena, the principal topics center on population and ecosystem dynamics, and on the Earth's natural and altered environments. Examples and applications are drawn from such subjects as the endangerment or extinction of species, biogeochemical cycles, greenhouse gases and global warming, ozone pollution in the troposphere and depletion in the stratosphere, pollutant dispersion, and acid rain. The course makes extensive use of methods of mathematical modeling, nonlinear dynamics, and computer simulations. In major course assignments, students work in small groups on modeling/simulation projects.

#### **CBE 40474. Environmental Design**

(3-0-3)

*Prerequisites:* (CBE 20256 OR CHEG 256) AND (CBE 30356 OR CHEG 356)

The goals of this course are to explore how to design and operate chemical processes so that we avoid or decrease the amount of pollutants that are released into the environment. Thus, this is essentially a course in pollution prevention. In the course, we identify and apply chemical engineering principles learned in previous classes (thermodynamics, phase equilibria, transport, reaction engineering) to environmental problems. In addition to normal lectures, discussions, and homework, the course is comprised of a series of case studies that compare the design and operation of chemical processes using conventional technology versus new technology that incorporates various principles of pollution prevention.

#### **CBE 40476. Global Climate Change**

(3-0-3)

This course integrates the principles of physical sciences and engineering as they pertain to the environment, with addition discussion of social, political, and theological concerns. We analyze the complex couplings and feedback mechanisms that operate between the geosphere, the biosphere, the atmosphere, and the hydrosphere as related to global climate changes.

#### **CBE 40481. Biomedical Engineering Transport Phenomena**

(3-0-3) Chang

This course brings together fundamental engineering and life-science principles, and provides a focused coverage of key concepts in biomedical engineering transport phenomena. The emphasis is on chemical and physical transport processes with applications toward the development of drug delivery systems, artificial organs, bioartificial organs, and tissue engineering.

#### **CBE 40482. Biomaterials Engineering**

(3-0-3)

Biomaterials engineering is the application of engineering principles to design, develop, and analyze materials that involve biological molecules. These may be materials of biological origin that are used in medical, biological, or chemical applications, and materials of chemical origin that are used with biological systems or their components. In this course, you learn about the basic principles involved in the choice of material properties, the nature of the interaction of biological materials with their surroundings, and modern applications in science, medicine, and engineering. Issues relating to marketing, packaging and storage, regulation, and ethics will also be discussed. Students will have an opportunity to apply mathematical-based engineering analysis of complex biomaterials systems.

#### **CBE 40484. Bioprocess Engineering**

(3-0-3)

Bioprocess engineering is the application of engineering principles to design, develop, and analyze processes that use biocatalysts. These may be in the form of a living cell, its substructures, or their chemical components. In this course, you learn concepts of cellular biology, and be introduced to mathematical-based engineering analysis of complex biological systems. By the end of this course you should be able to understand basic structure and function of cells, homogeneous and heterogeneous enzyme kinetics, the regulation of cell growth, the design and operation of bioreactors, recovery and characterization of products, and methods in genetic engineering and molecular cloning.

#### **CBE 40485. Biological Thermodynamics**

(3-0-3)

This course expands traditional thermodynamics to include biological systems.

#### **CBE 40498. Energy and Climate**

(3-0-3) McCready

This course integrates the principles of physical sciences and engineering as they pertain to energy, its sources and uses, and the impact of these on the environment. The great majority of energy used by society comes from fossil fuels. The consequences are that carbon dioxide levels in the atmosphere have been increasing and that readily available sources of oil have been depleted. Prospects for sustainable energy use will be discussed including an engineering cost/benefit analysis of different sources. A question that will be examined in particular detail is the effect of energy use on climate change both now and in the future. To do this, we will analyze the complex couplings and feedback mechanisms that operate between the geosphere, the biosphere, the atmosphere, and the hydrosphere as related to global climate change.

#### **CBE 40575. Applied Optimization for Process Operations**

(3-0-3) Kantor

The development of important technologies is presented with some explanation of the engineering and science necessary for development and implementation. The resulting impact on society is discussed.

#### **CBE 40901. Corporate Ethics and Values**

(3-0-3)

This seminar examines the role of the individual in the corporate environment. Guidelines for career growth, interpersonal relationships, skilled communications, and ethical responsibility in corporate affairs are analyzed and enforced.

#### **CBE 40911. Fuel Cells Science and Technology**

(3-0-3)

Principles of the conversion of electrochemical energy to electrical power and the engineering requirements of an operating fuel cell.

#### **CBE 40913. Macromolecular Bioengineering**

(3-0-3)

Recent advances in molecular biology have made it possible to study biological macromolecules thoroughly and provide large quantities of samples necessary to find their use in practical applications. Macromolecules are very small, but can perform many important functions, such as information transfer, catalysis, energy acquisition, transport regulation, and even energy generation. In this course, we will study these unique characteristics of macromolecules and seek how they can contribute in the area of engineering, such as developing nanoscale devices, innovative materials, information storage devices, energy capture and storage, and many other applications.

#### **CBE 40916. Biological Dynamics and Diagnostics**

(3-0-3)

This course will examine physiology phenomena such as cardiac rhythms, bacterial detection/diagnostics, neuron signal transmission, blood circulation, pulmonary airflow, and more general biological topics such as ion channels, actin motors, and genomic sequences from the viewpoint of mathematical analysis. Explicit and

implicit patterns and organized dynamic will be elucidated and used to provide insight into the underlying physiology or biology.

**CBE 41362. Laboratory Technology in Materials Science**

(0-3-2)

This course is intended for junior chemical engineering majors who are participating in the materials certificate program. The goal of the course is to introduce students to instrumentation they will likely use in the course of their senior thesis research. Laboratory sequences last from two to four weeks. A laboratory report is written for each lab as per instructions from each professor.

**CBE 41459. Chemical Engineering Laboratory II**

(1-4-3)

Chemical engineering laboratory courses are composed of experiments that cover most of the major subject areas of chemical engineering. The rationale for combining all of the topics into two separate courses, as opposed to distributing them into the different lecture courses, is to provide a focused learning experience emphasizing experimental techniques to observe fundamental behavior, understanding of the phenomena in terms of the appropriate theory, and experience at technical report writing. Formal and informal oral presentation skills are also an important part of the courses.

**CBE 41910. Biomolecular Engineering Lab**

(0-4-3)

In this course, students will be exposed to modern laboratory methods in bioengineering and experimental design. Students will be expected to develop and execute laboratory protocols, write laboratory reports, and present orally their findings.

**CBE 42445. Chemical Reaction Engineering Tutorial**

(1-0-0)

Tutorial for Chemical Reaction Engineering

**CBE 45449. Internship Experience**

(0-0-V)

Intended to facilitate interactions between Notre Dame and Industry by allowing students to get credit for internship experience.

**CBE 45490. Internship Experience**

(0-0-V)

Intended to facilitate interactions between Notre Dame and industry by allowing students to get credit for internship experience.

**CBE 46497. Directed Readings**

(V-0-V)

Course requires the student to explore various readings chosen by the professor.

**CBE 48901. Undergraduate Research**

(V-0-V)

A graded research project at the undergraduate level under the supervision of a faculty member. A substantial written document describing the research project, results, and conclusions is required.

**CBE 48902. Advanced Undergraduate Research**

(0-12-3)

*Prerequisite:* (CBE 48901 OR CBE 499)

This course is intended for students with previous research experience and requires at least one credit of 40901 as a prerequisite. It requires a written final report. This course will count as a technical or engineering elective.

**CBE 48903. Undergraduate Thesis**

(0-12-2)

*Prerequisite:* CBE 48901

This course requires a written thesis document that is defended to a committee of faculty. At least one credit of 48901 research is a prerequisite, although several semesters are recommended. This course will count in place of a chemical engineering elective.

**CBE 48904. Undergraduate Thesis**

(0-12-2)

*Prerequisite:* (CBE 48903 OR CBE 499B)

This course requires a written thesis document that is defended to a committee of faculty. At least one credit of 48901 research is a prerequisite, although several semesters are recommended. This course will count in place of a chemical engineering elective. This course is a continuation of undergraduate thesis.

**CHEG 48901. Undergraduate Research**

(0-0-V)

A graded research project at the undergraduate level under the supervision of a faculty member. A substantial written document describing the research project, results, and conclusions is required. Fall and spring.

## Department of Civil Engineering and Geological Science

### CE 20130. Methods of Civil Engineering Analysis

(4-0-4) Devine

*Corequisite:* CE 21130

A rigorous introduction to the tools used in civil engineering. This will include computer programming, exposure to circuits and sensors, surveying/GPS, and use of commercial software packages. These tools and their use will be introduced through a project-oriented pedagogy and strong hands-on experience. Fall.

### CE 20150. Mechanics I

(3-0-3) Kirkner

*Prerequisites:* ((EG 10111 OR EG 111) OR (EG 10112 OR EG 112)) AND ((MATH 10560 OR MATH 126 OR MATH 126A OR MATH 126B OR MATH 126C OR MATH 126E OR MATH 126F)) AND ((PHYS 10310 OR PHYS 131))

Introduction to systems of forces and couples and vector mechanics. Equilibrium of rigid bodies. Internal forces and moments, trusses, and beams, distributed loads and properties of areas. Friction and virtual work. Kinematics and kinetics of particle motion. Systems of particles. Fall.

### CE 20500. Engineering Geology

(3-0-3) Shafer

A study of physical geology and geologic processes relevant to engineering. Emphasis is on origin and distribution of natural hazards (earthquakes, volcanoes, floods, winds, mass wasting) as they impact built infrastructure, and chemical and physical processes impacting contaminant transport in water. Distribution of natural hazards is considered in the context of plate tectonics theory. Spring.

### CE 21130. Methods/Civil Engineering Analysis Lab

(0-1-0)

*Corequisite:* CE 20130

The concurrent laboratory portion of CE 20130. Fall.

### CE 25600. Civil Engineering Service Projects

(V-0-V) Ketchum

Civil Engineering Service Projects is a course that partners teams of students with local community service organizations. Projects involve strong technical content, significant design, and multidisciplinary effort and a strong communication component. These projects have a civil engineering emphasis, but benefit from enrollment of most other undergraduate majors. Fall and spring.

### CE 30125. Computational Methods

(3-0-3) Westerink

Fundamentals of numerical methods and development of programming techniques to solve problems in civil and environmental engineering. This course requires significant computer use via a scientific program language such as Matlab and/or FORTRAN. Standard topics in numerical linear algebra, interpolation, discrete differentiation, discrete integration, and approximate solutions to ordinary differential equations are treated in a context-based approach. Applications are drawn from hydrology, environmental modeling, geotechnical engineering, modeling of material behavior, and structural analysis. Fall.

### CE 30160. Civil Engineering Materials

(3-0-4) Devine

*Corequisite:* CE 31160

A study of mechanical properties of civil engineering materials and how they relate to the atomic, microscopic, and macroscopic structure. Weekly laboratories are used to study materials such as steel, concrete, wood, and bituminous materials. Spring

### CE 30200. Introduction to Structural Engineering

(3-0-3) Kareem

*Prerequisite:* (AME 20241 OR AME 238)

Introduction to structural engineering; analysis of statically determinate structures; deflection analysis; analysis of indeterminate structures using classical and matrix methods; introduction to analysis software, structural design concepts, and codes and standards. Fall.

### CE 30210. Structural Analysis

(3-0-3) Kirkner

*Prerequisite:* (CE 30200 OR CE 34200 OR CE 336)

The fundamentals of matrix methods of analysis. Application to trusses and rigid frames. Introduction to the use of commercial analysis software. Advanced topics of analysis: plastic analysis, introduction to structural dynamics. The first course in the structures track. Spring.

### CE 30300. Introduction to Environmental Engineering

(3-0-3) Talley

An introduction to the fundamental concepts of material balances and reactions occurring in reactors. These concepts bind together topics in water supply, wastewater treatment, air pollution control, and management of solid and hazardous wastes. The course describes how a holistic approach, not a fragmented single-pollutant or single-medium, is required to solve environmental problems. Decisions made by environmental engineers require a consideration of environmental ethics, a unifying topic of this course. The first course in the environmental track. Fall.

### CE 30320. Water Chemistry and Treatment

(3-0-3) Talley

*Prerequisite:* (CE 30300 OR CE 369)

An introduction to water treatment design, including discussion of basic aquatic chemistry, water quality, environmental policy, and current issues and problems in the industry. The first course in the environmental track. Spring.

### CE 30460. Fluid Mechanics

(3-0-3) Sakimoto

*Prerequisites:* (AME 20241 OR AME 238) AND (MATH 30650 OR MATH 325)

A basic course in fluid mechanics.

### CE 30510. Geotechnical Engineering

(3-0-4) Woods

*Prerequisite:* (AME 20241 OR AME 238 OR CE 20150 OR CE 225)

*Corequisite:* CE 31510

The objective of this course is to introduce and familiarize the student with the fundamentals of soil mechanics, including behavior of soils in compression and shear, and the principles of geotechnical engineering, through lectures and laboratory experiments. Spring.

### CE 31160. Mechanics of Solids/Materials Laboratory

(0-2-0)

*Corequisite:* CE 30160

The concurrent laboratory portion of CE 30130. Fall.

### CE 31510. Geotechnical Engineering Lab

(0-1-0)

*Corequisite:* CE 30510

The concurrent laboratory portion of CE 30500. Spring.

### CE 32160. Civil Engineering Materials Tutorial

(0-1-0)

The concurrent tutorial portion of CE 30-130. Fall.

### CE 35600. Civil Engineering Service Projects

(V-0-V) Ketchum

Civil Engineering Service Projects is a course that partners teams of students with local community service organizations. Projects involve strong technical content, significant design, and multidisciplinary effort and a strong communication component. These projects have a civil engineering emphasis, but benefit from enrollment of most other undergraduate majors. Fall and spring.

**CE 40010. Scientific Manuscript Writing and Editing**

(1-1-1) Fein

In this course, students will learn writing and editing skills needed for successful preparation of scientific manuscripts. Instruction will cover both editing and writing techniques for scientific papers, with particular focus on grammar, layout format options, presentation of logic, scientific content, and referencing approaches. Students will write a series of 3- to 4-page papers, and the first round of editing of each paper will be conducted by a fellow student, with the instructor offering assessment of both the writing and the editing that was done. Class discussions will center on common difficulties faced by students in their writing and editing approaches using examples from the written assignments in the course.

**CE 40120. Numerical Methods in Engineering**

(3-0-3)

*Prerequisite:* (MATH 30650 OR MATH 325)

Finite difference and finite element methods for the solution of ordinary and partial differential equations encountered in engineering. Spring.

**CE 40170. Advanced Mechanics of Solids**

(3-0-3)

*Prerequisite:* (AME 20043 OR AME 236) OR (CE 20170 OR CE 236)

The course covers fundamental principles and techniques in stress analysis of trusses, beams, rigid frames, and thin-walled structures. Emphasis is placed on energy methods associated with calculus of variations. Offered as needed.

**CE 40240. Structural Systems**

(3-0-3) Kareem

*Prerequisite:* (CE 30210 OR CE 356)

Overview of common structural systems used in design, with specific focus on the hierarchy of lateral load-resisting systems. Course will also highlight innovative structural systems for high-rise buildings, collapse mechanisms, and concepts of serviceability and habitability. Codes and commercial software common to practice will be heavily utilized.

**CE 40270. Reinforced Concrete Design**

(3-1-4) Kurama

*Prerequisite:* (CE 30200 OR CE 34200 OR CE 336)

Mechanics and behavior of reinforced concrete members and structures. Design of reinforced concrete members and structures, including continuous beams, slabs, columns, and frames. Strength and serviceability considerations for design. Building codes and specifications for reinforced concrete design. Includes a semester-long project on the design of a five-story, five-bay, reinforced concrete frame building. The second or third course in the structures track. Alternates fall and spring.

**CE 40275. Prestressed Concrete Design**

(3-0-3) Kurama

*Prerequisite:* (CE 40270 OR CE 486)

Mechanics of prestressed concrete structural members. Design of prestressed concrete structural members and simple systems. Strength and serviceability considerations.

**CE 40280. Structural Steel Design**

(3-1-4) Kijewski-Correa

*Prerequisite:* (CE 30200 OR CE 34200 OR CE 336)

Design of structural steel members/systems using basic fundamentals of mechanics, principles of steel behavior at element and system level. Course integrates current codes/standards and commercial software into semester-long project, providing for direct application of concepts to the design of a mid-rise structural steel residential/commercial building. The second or third course in the structures track. Alternates fall and spring.

**CE 40290. Design of Structures to Resist Natural Hazards**

(3-0-3)

Natural hazards and associated load effects on structures. Analysis of damage caused by wind storms, earthquakes, and ocean waves. Design provisions to resist damage resulting from natural hazards.

**CE 40320. Environmental Chemistry**

(3-0-3) Maurice

This course begins with: (a) an overview of the formation and general chemical characteristics of the Earth, and (b) an introduction to the natural global physical and chemical cycles. There will be major sections on the Earth's atmosphere, hydrosphere, and lithosphere. The major chemical processes within each of these compartments and chemical aspects of associated modern-day environmental problems will be reviewed. Special sections on energy and the environment and the chemistry of global climate will be included.

**CE 40340. Waste Treatment**

(3-0-4) Nerenberg

A study of the theory, design, and operation of facilities both for industrial and municipal treatment and disposal. Design of municipal wastewater treatment systems is emphasized. A significant project design component is included with a tutorial section. The third course in the environmental track. Spring.

**CE 40350. Environmental Microbiology**

(3-0-3) Shrouf

Fundamentals of microbiology applied to environmental systems and treatment processes. Emphasis will be placed on kinetics and energetics of microorganisms, fate of environmental pollutants, biotechnology applications, and laboratory techniques used to cultivate organisms and analyze biological systems. Spring.

**CE 40370. Air Pollution Control**

(3-0-3)

Course will draw on previous coursework in chemistry, mathematics, fluids, thermodynamics, and environmental engineering. Types, sources, and effects of air pollutants will be covered, as well as design of existing technologies used to control emissions. Also, the effect of meteorology on air quality and pollution transport will be discussed.

**CE 40385. Hazardous Waste Management and Design**

(3-1-4)

The course addresses traditional and innovative technologies, concepts, and principles applied to hazardous waste management and design to protect human health and the environment. Topics include the regulatory process, fate and transport of contaminants, toxicology, environmental audits, waste minimization, physicochemical processes, bioremediation, stabilization, incineration, land disposal, risk assessment, remedial investigations, remedial technologies, and alternative analysis. Course will include a remediation design project, which may require laboratory analyses.

**CE 40450. Hydraulics**

(3-0-3) Ketchum

*Prerequisite:* (AME 30031 OR AME 334) OR (AME 30331 OR AME 34331 OR CE 34330 OR AME 330) OR (CE 330 OR CE 30460 OR CE 34330) OR (CE 30460

Theory, analysis, and design of pipe flow, sewer flow, open channel flow, and reservoirs and pumping facilities for water distribution and wastewater collection. Student team design of water distribution and sewer collection systems is emphasized. Fall.

**CE 40460. Groundwater Hydrology**

(3-0-4) Silliman

Lectures and laboratory cover the fundamentals of flow and transport in porous media. Methods of analysis for development of groundwater resources. Fall.

**CE 40530. Foundation Analysis and Design**

(3-0-3) Woods

*Prerequisite:* (CE 30510 OR CE 445 OR CE 351)

Application of basic engineering principles of soil mechanics in the design of foundations and earth structures, including deep excavation supports, shallow foundations, deep foundations, and cofferdams.

**CE 40610. Construction Management**

(3-0-3) Schlagel

Engineering aspects of planning, economics, practices, and equipment usage in construction of civil engineering projects. Use of critical path construction schedules. Offered as needed.

**CE 40620. Transportation Engineering**

(3-0-3) Harrison

The planning, design, operation, safety, and economics of transportation systems. Spring.

**CE 40627. Global Climate Change**

(3-0-3)

A study of the global climate change mechanisms.

**CE 41460. Groundwater Hydrology Lab**

(0-1-0)

The concurrent laboratory portion of CE 40460. Fall.

**CE 42340. Waste Treatment Tutorial**

(0-1-0)

The concurrent tutorial portion of CE 40340.

**CE 45600. Civil Engineering Service Projects**

(V-0-V) Ketchum

Civil Engineering Service Projects is a course that partners teams of students with local community service organizations. Projects involve strong technical content, significant design, and multidisciplinary effort and a strong communication component. These projects have a civil engineering emphasis, but benefit from enrollment of most other undergraduate majors. Fall and spring.

**CE 45700. Entrepreneurship and Technology**

(1-0-V)

This community service project involves the development of a community-based computer repair/upgrade/sales operation at St. Casimir's parish on the west side of South Bend. The project will require the students to develop a business plan, marketing plan, and training program for the new business that will collect used computers from area businesses and train local low-income residents to upgrade the computers for donation and/or resale.

**CE 46600. Air Pollution Engineering: An Independent Study**

(0-0-3)

This is an independent study of the types, sources, and effects of air pollutants, and design of existing technologies to control emissions.

**CE 47300. Tunnel Engineering and Underground Construction**

(3-0-3) Woods

Ground conditions affecting tunnel design, fragmentation of hard rock for tunneling, excavation in soft ground, structural design of tunnel linings, construction operations for tunnel excavation.

**CE 47347. Physiochemical Treatment of Organics**

(3-0-3) Talley

An investigation of the physiochemical treatment processes for treatment of organic contaminants,

**CE 47600. Special Studies**

(V-V-V)

Individual or small group study under the direction of a faculty member in an undergraduate subject not concurrently covered by any University course.

**CE 47601. Special Studies: Big Beam Contest**

(1-0-V) Kurama

Students taking this course will compete in the national Big Beam Contest organized by the Precast/Prestressed Concrete Institute. The students will work in teams and together with a local precast/prestressed concrete producer to design and construct a precast concrete test beam. The specimens will be tested in the Structural Systems Laboratory at Notre Dame. Each team will prepare a report to be submitted to the Precast/Prestressed Concrete Institute to enter the competition. The course will emphasize the practical engineering and fabrication aspects of precast concrete, as well as fundamental concepts in structural engineering.

**CE 48600. Undergraduate Research**

(V-0-V)

A research project at the undergraduate level under the supervision of a faculty member.

**ENVG 10100. Environmental Geosciences**

(3-0-3) Neal

*Prerequisite:* (CHEM 10113 OR CHEM 113) OR (CHEM 10115 OR CHEM 115) OR (CHEM 10117 OR CHEM 117) OR (CHEM 10121 OR CHEM 121) OR (CHEM 10125 OR CHEM 125)

This course introduces the student to Earth processes, and focuses on how these processes affect people, and how people affect these processes. The course explores the interactions between Earth's biosphere, geosphere, atmosphere, and hydrosphere, with the objective of demonstrating how our physical environment is controlled by geological, biological, and human forces.

**ENVG 10110. Physical Geology**

(3-2-4) Neal

*Corequisite:* ENVG 11110

An introduction to the Earth, its processes, composition, evolution, and structure. The course introduces the student to mineralogy, petrology, structural geology, oceanography, surficial processes, geophysics, environmental geology, and planetology. Lecture and laboratory meetings.

**ENVG 11110. Physical Geology Laboratory**

(0-1-0)

*Corequisite:* ENVG 10110

This is the laboratory portion of ENVG 10110.

**ENVG 20100. Environmental Geosciences**

(3-0-3) Neal

*Prerequisite:* (CHEM 10113 OR CHEM 113) OR (CHEM 10115 OR CHEM 115) OR (CHEM 10117 OR CHEM 117) OR (CHEM 10121 OR CHEM 121) OR (CHEM 10125 OR CHEM 125)

This course introduces the student to Earth processes, and focuses on how these processes affect people, and how people affect these processes. The course explores the interactions between Earth's biosphere, geosphere, atmosphere, and hydrosphere, with the objective of demonstrating how our physical environment is controlled by geological, biological, and human forces.

**ENVG 20110. Physical Geology**

(3-2-4) Neal

*Corequisite:* ENVG 21110

An introduction to the Earth, its processes, composition, evolution, and structure. The course introduces the student to mineralogy, petrology, structural geology, oceanography, surficial processes, geophysics, environmental geology, and planetology. Lecture and laboratory meetings.

**ENVG 20120. Historical Geology**

(3-2-4) Rigby

*Prerequisite:* ENVG 20110 OR SC 20110 OR SC 10110

*Corequisite:* ENVG 21120

This course introduces the student to the concept of geologic time, absolute and relative age-dating, Earth processes and features through time, and the major features of evolution and distribution of fossils. Lecture and laboratory meetings. One-day field trip is required.

**ENVG 20200. Mineralogy and Optical Mineralogy**

(3-2-4) Burns

*Prerequisite:* CHEM 10122 AND ENVG 20110

Crystallography and mineral optics: physical and chemical mineralogy—its application to mineral identification in hand-specimen and using the petrographic microscope.

**ENVG 20210. Igneous and Metamorphic Petrology**

(3-2-4) Neal

*Prerequisite:* ENVG 20110

Origin and identification of igneous and metamorphic rocks within a plate tectonic framework. Geochemistry and petrography are used to investigate mineral equilibria, magma generation and crystallization, pressure and temperatures of deformation, and the interior of the Earth.

**ENVG 21110. Physical Geology Laboratory**

(0-1-0)

*Corequisite:* ENVG 20110

This is the laboratory portion of ENVG 20110.

**ENVG 21120. Historical Geology Laboratory**

(0-1-0)

*Corequisite:* ENVG 20120

This is the laboratory portion of ENVG 20120.

**ENVG 30230. Sedimentation and Stratigraphy**

(3-2-4) Rigby

*Prerequisite:* (ENVG 20200 OR ENVG 242)

Sedimentary environments from a physical, biological, and tectonic perspective are explored, along with processes such as lithification. Identification of sedimentary rocks and the interpretation of the succession of layered rocks in North America are emphasized.

**ENVG 30300. Surficial Processes and Surficial Hydrology**

(2-3-3) Rigby

*Prerequisite:* (ENVG 20200 OR ENVG 242) OR (GEOS 20201 OR GEOS 242)

A quantitative study of natural chemical and physical processes (e.g., weathering, flooding, wind) that produce both erosional and depositional landforms. Their effects on human structures and developments are explored. A one-day field trip is required.

**ENVG 30400. Structural Geology and Rock Mechanics**

(3-3-4)

*Prerequisite:* ENVG 20110

Shapes and fabric of deformed rocks, physical properties of rocks, processes and mechanisms of deformation with associated stresses and strains, and regional and global structural events. A weekend field trip is required.

**ENVG 40300. Geochemistry**

(3-0-3) Fein

*Prerequisites:* CHEM 10121 AND CHEM 10122 AND MATH 10550 AND MATH 10560

An introduction to the use of chemical thermodynamics and chemical kinetics in modeling geochemical processes. Special emphasis is placed on water-rock interactions of environmental interest.

**ENVG 40310. Environmental Impact of Resource Utilization**

(3-0-3) Neal

*Prerequisites:* ENVG 20110 AND ENVG 40300

The environmental effects of utilizing natural resources are examined from their extraction, refining, to use. Pivotal in this course are environmental impact assessment and rehabilitation/remediation technologies. A number of case studies will be examined to highlight the environmental impact of using the Earth's natural resources and how such impacts can be mitigated.

**ENVG 40340. Water-Rock Interactions**

(3-0-3) Maurice

*Prerequisite:* CE 40320 OR ENVG 40300

Fundamental properties of mineral surfaces and of the mineral-water interface. Methods of surface and interface analysis. The electric double layer. Interface reactions including adsorption, mineral growth and dissolution, photoredox phenomena, and controls on bacterial adhesion.

**ENVG 40360. Geomicrobiology**

(3-0-3) Fein

*Prerequisite:* (ENVG 40300 OR ENVG 403)

This course explores current research involving the interaction between microbes and geologic systems, focusing on the ability of microbes to affect mass transport in fluid-rock systems. Readings concentrate on laboratory, field, and modeling studies of environmental and/or geologic interest.

**ENVG 40380. Paleontology**

(2-2-3) Rigby

*Prerequisite:* (ENVG 20120 OR ENVG 232)

The fossil record—morphology, taxonomy, evolution, statistical population systematics, and paleoecology. A one-day field trip is required.

**ENVG 40410. Geophysics**

(2-2-3) Sakimoto

*Prerequisite:* (PHYS 10320 OR PHYS 132)

Physics of the solid Earth: seismic wave, gravity, resistivity, and electromagnetic methods of probing the structure of the Earth. Applications to environmental concerns as well as to groundwater, mineral, and petroleum exploration are discussed.

**ENVG 45200. Field Trip**

(0-2-1) Burns

Field trip during the fall/spring vacation; emphasis on regional field geology and field relationships. Classic localities are studied in order to demonstrate geological concepts.

**ENVG 47600. Special Studies**

(0-V-V)

This course requires permission of the chair of the Department of Civil Engineering and Geological Sciences and the individual instructor. Research of literature on a specific geoscience topic. Preparation of reports and presentations.

**ENVG 48600. Undergraduate Research**

(0-V-V)

This course requires the permission of the chair of the Department of Civil Engineering and Geological Sciences. Three to 15 hours each week, arranged individually for each student.

**ENVG 57498. Planetary Geology**

(3-0-3) Sakimoto

This course will examine the solar system bodies and solar system formation, and compare and contrast geologic processes and resulting land forms on the terrestrial (solid surface) planets. Typical processes discussed include volcanism, impact cratering, tectonics, hydrology, polar processes, and implications for life. There are no formal prerequisites, but a calculus and an earth sciences course are recommended.

## Department of Computer Science and Engineering

### **CSE 20110. Discrete Mathematics**

(3-0-3) Chaudhary

Introduction to mathematical techniques fundamental to computer engineering and computer science. Topics: mathematical logic, induction, set theory, relations, functions, recursion, recurrence relations, introduction to asymptotic analysis, algebraic structures, graphs, and machine computation.

### **CSE 20211. Fundamentals of Computing I**

(3-1-4) Chawla

*Prerequisite:* (EG 10111 OR EG 111) OR (EG 10112 OR EG 112)

*Corequisite:* CSE 21211

This is the first part of a two-course introduction-to-computing sequence, intended primarily for computer science and computer engineering majors. It introduces fundamental concepts and principles of computer science, from formulating a problem and analyzing it conceptually, to designing, implementing, and testing a program on a computer. Using data and procedural abstractions as basic design principles for programs, students learn to define basic data structures, such as lists and trees, and to apply various algorithms for operating on them. The course also introduces object-oriented and parallel programming methods.

### **CSE 20212. Fundamentals of Computing II**

(3-1-4) Flynn

*Prerequisite:* (CSE 20211 OR CSE 211)

*Corequisite:* CSE 21212

This is the second part of a two-course introduction-to-computing sequence, intended primarily for computer science and computer engineering majors. This course introduces concepts and techniques for developing large software systems. The object-oriented model of design and programming is presented using a modern programming language such as Java or C++. Topics covered include modularity, specification, data abstraction, classes and objects, genericness, inheritance, subtyping, design patterns, testing, concurrency, object persistency, and databases.

### **CSE 20221. Logic Design and Sequential Circuits**

(3-3-4) Brockman

*Corequisite:* CSE 21221

Boolean algebra and switching circuits, Karnaugh maps, design of combinational and of sequential logic networks, and sequential machines.

### **CSE 20232. C/C++ Programming**

(3-0-3) Bualuan

*Prerequisites:* ((EG 10111 OR EG 111) OR (EG 10112 OR EG 112)) AND ((MATH 10550 OR MATH 125 OR MATH 125A OR MATH 125B OR MATH 125C OR MATH 125E OR MATH 125F))

Top-down analysis and structured programming. Basic analysis of algorithms, algorithm development, implementation and debugging and testing of programs will also be emphasized. Students will write several programs in the C++ language to learn the concepts taught and to acquire experience in solving problems using the UNIX operating system.

### **CSE 20600. Computer Science Engineering Service Projects**

(V-0-V) Brenner, Freeland, Madey, Spies

Engineering projects in community service.

### **CSE 21211. Fundamentals of Computing I Lab**

(0-0-0)

*Corequisite:* CSE 20211

Lab for Fundamentals of Computing I.

### **CSE 21212. Fundamentals of Computing II Lab**

(0-2-0)

*Corequisite:* CSE 20212

Lab for Fundamentals of Computing II.

### **CSE 21221. Logic Design Laboratory**

(0-0-0)

*Corequisite:* CSE 20221

Lab for Logic Design.

### **CSE 30151. Theory of Computing**

(3-0-3) Kogge

The theory of automata and formal languages is developed along with applications. Various classes of automata, formal languages, and the relations between these classes are studied. Restricted models of computation; finite automata and pushdown automata; grammars and their relations to automata; parsing; turing machines; limits of computation: undecidable problems, the classes of P and NP.

### **CSE 30246. Database Concepts**

(3-0-3) Bualuan

Effective techniques in managing, retrieving, and updating information from a database system. Focusing primarily on relational databases, the course presents the entity-relationship model, query processing, and normalization. Topics such as relational calculus and algebra, integrity constraints, distributed databases, and data security will also be discussed. A final project will consist of the design and the implementation of a database system with a Web interface.

### **CSE 30254. Systems Programming**

(3-0-3)

The primary aim of this course is introduce students to systems and network programming techniques. The course covers topics such as client server computing techniques, remote procedure calls, streaming protocols, peer-to-peer systems, and resource management. Specific technologies covered will include CORBA, RPC, SOAP, Java RMI, Web servers, sockets, and RTCP/RTSP. Projects will allow students to get hands-on experience and include the development of wide-area distributed systems (e.g., using the Planetlab infrastructure) and router implementations (e.g., using network processors). This course builds on topics covered in Operating Systems (CSE 341) and Computer Networks (CSE 364); the students may co-register with either course. The course has a strong emphasis on programming and requires good knowledge of C, C++, or Java.

### **CSE 30264. Computer Networks**

(3-0-3) Poellabauer, Striegel

This course introduces students to fundamental topics on the principles, design, implementation, and performance of computer networks. Topics include Internet protocols, congestion control, switching and routing, mobile IP and ad-hoc networks, network security, the end-to-end arguments, and peer-to-peer systems.

### **CSE 30321. Computer Architecture I**

(3-3-4) Hu

*Prerequisite:* (CSE 20212 OR CSE 212) OR (CSE 20232 OR CSE 232)

*Corequisite:* CSE 31321

Introduction to basic architectural concepts that are present in current scalar machines, together with an introduction to assembly language programming, computer arithmetic, and performance evaluation. Commercial computer-aided-design software is used to deepen the student's understanding of the top-down processor design methodology. MIPS-based assembly language will be used.

### **CSE 30322. Computer Architecture II**

(3-3-4) Kogge

*Prerequisites:* (CSE 20221 OR CSE 221) AND (CSE 30321 OR CSE 34321 OR CSE 321)

*Corequisite:* CSE 31322

A continuation of the architectural concepts in CSE 30321. Detailed study of processor design, hardwired and microprogrammed control, pipelining, memory organization, I/O and bus protocols, parallel processors. The course makes extensive use of commercial computer-aided-design tools and culminates with a major project of designing and simulating a complete microprocessor.

### **CSE 30331. Data Structures**

(3-0-3) Izaguirre

*Prerequisite:* (CSE 20232 OR CSE 232) OR (CSE 20212 OR CSE 212)

Fundamental techniques in the design and analysis of non-numerical algorithms and their data structures. Elementary data structures such as lists, stacks, queues; more advanced ones such as priority queues and search trees. Design techniques such as divide-and-conquer. Sorting and searching and graph algorithms.

### CSE 30341. Operating System Principles

(3-0-3) Chandra, Thain

*Prerequisite:* (CSE 30321 OR CSE 34321 OR CSE 321)

Introduction to all aspects of modern operating systems. Topics include process structure and synchronization, interprocess communication, memory management, file systems, security, I/O, and distributed files systems.

### CSE 30600. CSE Service Projects

(V-0-V) Brenner, Freeland, Madey, Spies

Engineering projects in community service.

### CSE 31321. Computer Architecture I Lab

(0-0-0)

*Corequisite:* CSE 30321

Lab for Computer Architecture I.

### CSE 31322. Computer Architecture II Lab

(0-0-0)

*Corequisite:* CSE 30322

Lab for Computer Architecture II.

### CSE 40113. Design/Analysis of Algorithms

(3-0-3) Chen

*Prerequisite:* (CSE 30331 OR CSE 34331 OR CSE 331)

Techniques for designing efficient computer algorithms and for analyzing computational costs of algorithms. Common design strategies such as dynamic programming, divide-and-conquer, and Greedy methods. Problem-solving approaches such as sorting, searching, and selection; lower bounds; data structures; algorithms for graph problems; geometric problems; and other selected problems. Computationally intractable problems (NP-completeness).

### CSE 40166. Computer Graphics

(3-0-3) Flynn

Graphics display devices. Two- and three-dimensional geometry: transformations and projections. Raster graphics algorithms; primitive rendering; 3-D modeling; scene description. Graphics software standards. Software projects.

### CSE 40171. Introduction to Artificial Intelligence

(3-0-3) Flynn, Chawla

Evaluation of the areas that make up artificial intelligence today. Development of various representations commonly used. Differences between knowledge bases and databases are explored. A study of several applications, including expert systems.

### CSE 40175. Ethical and Professional Issues

(3-0-3) Bowyer

This course seeks to develop a solid foundation for reasoning about the difficult ethical, professional, and social controversies that arise in the computing field. Emphasis is placed on identifying the appropriate legal and professional context and applying sound critical thinking skills to a problem. Topics covered include relevant professional codes of ethics, encryption/privacy/surveillance, freedom of speech, "cracking" of computer systems, development of safety-critical software, whistleblowing, and intellectual property. This course relies heavily on case study of real incidents, both historical and current.

### CSE 40232. Software Engineering

(3-0-3) Izaguirre

*Prerequisite:* (CSE 30331 OR CSE 34331 OR CSE 331)

Software engineering is an engineering discipline that is concerned with all aspects of producing high-quality, cost-effective, and maintainable software systems. This course provides an introduction to the most important tasks of a software engineer: requirements engineering, software design, implementation and

testing, documentation, and project management. A medium-scale design project combined with individual assignments complement the lectures.

### CSE 40239. Simulation and Modeling

(3-0-3) Madey

*Prerequisite:* (MATH 30530 OR MATH 323)

Computer techniques for simulating the behavior of physical, biological, engineering, and social systems, including both natural and artificial systems. Applications include scientific enquiry, engineering design, manufacturing planning, training, entertainment, and games. Topics include animation, visualization, and graphical analysis of results.

### CSE 40243. Compilers

(3-0-3)

*Prerequisite:* (CSE 30331 OR CSE 34331 OR CSE 331)

An introduction to the fundamental techniques and tools used in compiler construction. Topics include high-level language specification via context-free grammars; lexical analysis; parsing techniques such as top-down, bottom-up, and LR parsing; run-time environments; and code generation.

### CSE 40244. Introduction to Systems Administration

(3-0-3) Freeland

*Prerequisite:* (CSE 30341 OR CSE 341)

An introduction to the concepts and practices of computer system administration, including software management, system device management, system security, management of system services, disaster planning, and disaster recovery.

### CSE 40258. Network Management

(3-0-3) Freeland

An introduction to the concepts and practices of computer network management, including network installation, monitoring, and troubleshooting.

### CSE 40317. Online Algorithms for Computational Finance

(3-0-3) Chaudhary

Online algorithms are for problems that involve an unknown future. For instance, suppose you want to sell off your old computer. You place a classified advertisement and wait for potential buyers to contact you with bids. Design an algorithm that tells you, when you receive a bid, whether you should accept it, or reject it and wait for a higher bid. If the current bid is close to the highest, the algorithm should accept it, but if there is a much higher bid in the future, the algorithm should reject it—which is easier said than done because the algorithm does not know what bids are going to come in the future. Such algorithms, which try to make the best possible decisions without having access to all the input, are called online algorithms. (There are various other interpretations of the word "online"; this is different from all those.) In this course, we study online algorithms and a technique for evaluating them called competitive analysis. We apply these ideas to problems from the exciting world of computational finance; e.g., trading and portfolio selection. This approach to computational finance is very nontraditional; the old, traditional approach is to try to model the unknown future inputs using probability distributions. Since financial markets are unpredictable, it is usually very hard to develop accurate probability models for it. Thus, online algorithms have been receiving increasing attention in the past few years.

### CSE 40373. Multimedia Systems

(3-0-3) Chandra

Advances in hardware technologies are finally allowing widespread multimedia availability. It is becoming increasingly easy to capture videos in high definition, distribute them to friends using broadband networks, and carry them with you in portable iPod, PSP, and other devices. This course will introduce the students to many of the fundamental concepts involved with handling multimedia data and applications. Topics that will be covered in this course include multimedia data types, systems support for multimedia applications, and multimedia applications. We will discuss the value and limitations of current multimedia compression technologies, including JPEG, and MPEG. In addition, we will examine how to support multimedia applications with appropriate operating system, file system,

and architectural features. We will also briefly look into the security and digital-rights management issues.

### **CSE 40422. Computer System Design**

(3-0-3) Brockman

*Prerequisite:* (CSE 30322 OR CSE 322)

Integrated hardware and software development, construction, and testing of digital systems by design teams to meet specifications subject to technical, economic, and environmental constraints.

### **CSE 40431. Programming Languages**

(3-0-3) Kogge

An introduction to modern computing concepts and computational models as embodied in a number of different classes of languages. These include (1) functional-based languages such as Lisp, Scheme, SASL, ML; (2) logic-based languages such as Prolog, Parlog, Strand, OPS; and (3) object-oriented languages such as Smalltalk, C++, Java.

### **CSE 40456. Data Networks**

(3-0-3) Schafer

Introduction of fundamental concepts of data networks in terms of the ISO-layered architecture. Functions that occur at the various levels are explored. Topics include local area networks such as Ethernet and Token Ring networks, proposals for wide and metropolitan-area networks such as FDDI and DQDB, and the eventual integration of data communications into a single network under ISDN (Integrated Digital Services Network) and Broadband ISDN.

### **CSE 40462. VLSI Circuit Design**

(3-0-3) Brockman

*Prerequisite:* (CSE 20221 OR CSE 221)

CMOS devices and circuits, scaling and design rules, floor planning, data and control flow, synchronization, and timing. Individual design projects.

### **CSE 40463. Real-Time Systems**

(3-0-3) Poellabauer

This course introduces students to fundamental topics in the theory and application of real-time systems. Topics covered include basic concepts such as predictability, worst-case execution time analysis, fault tolerance, real-time communication and synchronization, and advanced topics such as real-time operating systems, embedded computing, real-time CORBA and Java, and power management. The course will be project-oriented, and students have the opportunity to analyze the deficiencies of general-purpose operating systems for the use in real-time and embedded systems, and they will implement and experiment with real-time extensions to an operating system kernel.

### **CSE 40484. Networked Sensor Systems**

(3-0-3) Chandra

Wireless sensor networks promise to revolutionize many segments of our life, from environmental monitoring and conservation, to manufacturing and health care, as well in surveillance and national security applications. The design, implementation and operation of a sensor network requires the confluence of many disciplines, including signal processing, networking and protocols, embedded systems, information management, and distributed algorithms. Such networks are often deployed in resource-constrained environments. This course will introduce the students to many of the fundamental challenges exposed by sensors.

### **CSE 40539. Simulation of Complexity**

(3-0-3) Madey

Computer simulation of biosystems.

### **CSE 40547. Computing at the Nanoscale**

(3-0-3) Niemier

The purpose of this course will not just be to teach students how different emerging technologies compute and what applications they are best suited for. Rather, the course will be based in fundamental (yet understandable!) device physics and will work to show students interested in design what roles they can play in helping an emerging technology to evolve (i.e., studies similar to the work proposed

here). However, work in design will only be meaningful if it is grounded in the experimental state of the art. Thus, a discussion of relevant device physics will always precede any work in design.

### **CSE 40567. Computer Security**

(3-0-3) Striegel, Blanton

*Prerequisite:* (CSE 30341 OR CSE 341)

This course is a survey of topics in the realm of computer security. This course will introduce students to many contemporary topics in computer security ranging from PKIs (Public Key Infrastructures) to cyber-warfare to security ethics. Students will learn fundamental concepts of security that can be applied to many traditional aspects of computer programming and computer systems design. The course will culminate in a research project where students will have an opportunity to more fully investigate a topic related to the course.

### **CSE 40600. Computer Science Engineering Service Projects**

(V-0-V) Brenner, Freeland, Madey, Spies

Engineering projects in community service.

### **CSE 40611. Team Software Design and Implementation**

(3-0-3) Bualuan

This course builds on the basic techniques introduced in Fundamentals of Computing I and II, but emphasizes a team approach to the design and implementation of software. A variety of team structures will be considered, including two-person teams for extreme programming and three-person teams as used in the ACM programming contest. Student teams will develop software to solve problems ranging across the computer science curriculum and will present their solutions to the class for critique and analysis. Students will participate in the fall campus programming contest, and selected students will represent the University in the ACM Regional Programming Contest.

### **CSE 40613. Introduction to e-Technology**

(3-0-3) Madey

Introduction to concepts, theories, and techniques of Internet and WWW programming. The goal of this course is to prepare the student to design and develop Web-based applications, e-Commerce applications, e-Science applications, and Internet-based services. Students will be expected to design a large system (course project) requiring integration with other student projects.

### **CSE 40625. Machine Learning**

(3-0-3) Chawla

*Prerequisite:* (CSE 40647 OR CSE 60647 OR CSE 40171 OR CSE 60171 OR CSE 471 OR CSE 671)

This course on machine learning will give an overview of many concepts—learning theory, techniques, and algorithms in machine learning—such as in reinforcement learning, supervised learning, unsupervised and semi-supervised learning, and genetic algorithms, including advanced methods such as sequential learning, active learning, support vector machines, graphical, and relational models. The course will give the student the basic ideas and intuition behind modern machine learning methods, as well as a bit more formal understanding of how, why, and when they work. The course will also include discussions on some of the recent applications and the interface with computer vision, systems, bioinformatics, and architecture. The course will have a strong focus on project and assignments, with emphasis on writing implementations of learning algorithms.

### **CSE 40647. Data Mining and Pattern Recognition**

(3-0-3) Chawla

Data mining uses methods from multiple fields including but not limited to machine learning, pattern recognition, databases, probability and statistics, information theory, and visualization. The focus of this course will primarily be the machine-learning component, with relevant inclusions and references from probability, statistics, pattern recognition, and information theory. The course will give students an opportunity to implement and experiment with some of the concepts, and also apply them to the real-world data sets. It will also touch upon some of the advances in related fields such as Web mining, intrusion detection, bioinformatics, etc. In addition, we will discuss the role of data mining in society.

**CSE 40655. Technical Concepts of Visual Effects**

(3-0-3) Bualuan

This class seeks to introduce students to some basic concepts of computer-generated imagery as it is used in the field of visual effects, and to delve into some of the technical underpinnings of the field. While some focus will rely on artistic critique and evaluation, most of the emphasis of the class will be placed on understanding fundamental concepts of 3-D modeling, texturing, lighting, rendering, and compositing. Those who excel in the visual effects industry are those who have both a strong aesthetic sense, coupled with a solid understanding of what the software being used is doing 'under the hood.' This class, therefore, will seek to stress both aspects of the industry. From a methodology standpoint, the class will consist of lectures, several projects that will be worked on both in class and out of class, an on-site photo shoot, and extensive open discussion. The nature of the material, combined with the fact that this is the first execution of the class, will mean that a significant degree of flexibility will need to be incorporated into the class structure.

**CSE 40656. Advanced Databases**

(3-0-3) Bualuan

*Prerequisite:* (CSE 30246 OR CSE 346)

Advanced topics in databases. DBA techniques.

**CSE 40713. Numerical Methods**

(3-0-3) Izaguirre

Numerical and computational methods.

**CSE 40721. Advanced Architecture**

(3-0-3) Kogge, Niemier, Hu

*Prerequisites:* (CSE 30321 OR CSE 321) AND (CSE 30322 OR CSE 322)

This course discusses the fundamentals of a modern processor architecture. It begins with an abbreviated discussion of pipelining before continuing with topics such as out-of-order execution and register renaming. Case studies of modern processors and the limits of superscalar architectures are considered. How the above fit in with a memory hierarchy (for single and multi-node machines) is also discussed. The class concludes with a study of multi-core architectures, problems associated with interconnect, thread extraction, and other issues that are associated with and will affect state-of-the-art processing.

**CSE 40726. CAD of Digital Systems**

(3-0-3) Hu

This is a senior/entry-graduate-level course intended to expose students to the fundamentals of CAD tools for the design and analysis of digital systems. The course aims at introducing to students the theory and implementation behind commercial CAD tools so that the students will be able to contribute to the development of such tools as well as be productive users of such tools. The main topics include basic algorithms for CAD, digital system modeling, timing and power analysis, logic/architectural synthesis, physical level design, and system-level design.

**CSE 40764. Computer Networks**

(3-0-3) Striegel, Poellabauer, Chandra

This course introduces students to topics on the principles, design, implementation, and performance of computer networks. Topics include Internet protocols and routing, congestion control, switching and routing, mobile IP and ad-hoc networks, network security, the end-to-end arguments, peer-to-peer systems, and other current research topics.

**CSE 40771. Distributed Systems**

(3-0-3) Thain

A distributed system is a collection of independent machines that work together on a common problem. Distributed systems have been both interesting and difficult to build because their components may be autonomous and highly failure-prone. The primary material for this course will be a series of papers describing both working, distributed systems and theoretical results. Topics may include distributed file and storage systems, batch computing, peer-to-peer computing, grid computing, process migration, fault tolerance, security, time and ordering, and distributed agreement. Students will undertake a course project that involves

building and evaluating a distributed system. Grading will be based on discussion, exams, and the course project.

**CSE 40774. Graduate Networks**

(3-0-3) Striegel

This course will survey advanced networking topics, specifically the mechanics regarding scaling, connectivity, and performance in the core of the Internet. Topics to be covered include inter/intra-domain routing, TCP fundamentals, quality of service (QoS), content distribution, and network calculus. Students will be expected to create protocol parsers using the language of their choice, use/modify an appropriate network simulator and/or emulator, and complete a research project over the course of the semester.

**CSE 45605. Internship**

(V-0-V)

Industry-based internship.

**CSE 47900. Special Studies**

(V-0-V)

*Prerequisite:* (CSE 20212 OR CSE 212)

Individual or small-group study under the direction of a CSE faculty member in an undergraduate subject not currently covered by any University course.

**CSE 48100. Capstone Research**

(3-0-3)

A senior design experience incorporating scholarly research and development of systems, tools, and techniques to address a research question. Students will be presented with a problem domain and a research problem description and will be required to perform problem analysis, identify a potential solution, place the solution in the context of existing work, implement a prototype of the solution, test and assess the prototype, document all steps, and present their work.

**CSE 48901. Undergraduate Research**

(V-0-V)

A research project at the undergraduate level under the supervision of a CSE faculty member.

## Department of Electrical Engineering

### EE 20222. Introduction to Electrical Engineering and Embedded Systems

(4-0-V) Schafer

*Prerequisite:* MATH 20580 or permission of instructor

*Corequisites:* EE 21222 and PHYS 10320

An introduction to electrical engineering, featuring microcontroller based C programming of embedded systems. The course includes concepts of electrical circuits and electronic devices, including operational amplifiers and transistors. Labs feature microcontroller C programming for an embedded control environment, with emphasis on interfacing microcontrollers to a variety of sensors and actuators.

### EE 20224. Introduction to Electrical Engineering

(3-3-4) Stevenson

*Prerequisite:* MATH 10560

*Corequisite:* EE 21224

A project-oriented introduction to electrical engineering principles in which long-term projects are used to introduce such topics as node and loop circuit analysis, network theorems, first-order circuits, operational amplifiers, communications, systems theory, microprocessor interfacing techniques, and computer programming. Fall.

### EE 20234. Electric Circuits

(3-0-3) Fuja

*Prerequisite:* EE 20224 OR EE 24224 OR EE 224 OR EE 20222

*Corequisite:* PHYS 10320

Analysis of first-, second-, and higher-order circuits, including natural response, forced response, phasor concepts, AC methods, frequency response, and Laplace transform techniques.

### EE 20242. Electronics I

(3-3-4) Seabaugh

*Prerequisite:* EE 20224 OR EE 24224 OR EE 224 OR EE 20222

*Corequisite:* EE 21242

Introduction to electronic circuits and systems. Basic diode and transistor circuits and the associated DC bias analysis and low-frequency AC small signal analysis. Voltage and feedback amplifiers. Logic and analog circuits utilizing discrete solid-state devices. Spring.

### EE 21222. Introduction to Electrical Engineering and Embedded Systems Lab

(0-2-0)

*Corequisite:* EE 20222

An introduction to electrical engineering, featuring microcontroller based C programming of embedded systems. The course includes basic concepts of electrical circuits and electronic devices, including operational amplifiers and transistors. Labs feature microcontroller C programming for an embedded control environment, with emphasis on interfacing microcontrollers to a variety of sensor and actuators.

### EE 21224. Introduction to Electrical Engineering Lab

(0-0-0)

*Corequisite:* EE 20224

This lab supplements the materials presented in the lecture setting and gives students the opportunity to reinforce their learning through hands-on experiments and through demonstrations in a laboratory environment.

### EE 21242. Electronics I Lab

(0-0-0)

*Corequisite:* EE 20242

This lab supplements the materials presented in the lecture setting and gives students the opportunity to reinforce their learning through hands-on experiments and through demonstrations in a laboratory environment.

### EE 30333. Theology and Engineering

(3-0-3) Sain

A one-semester introduction to the feedback principles involved in making good choices and avoiding bad choices. Topics from feedback system theory are introduced as needed, and used to characterize such decision-making processes, to determine the challenges inherent in them, and to offer engineering experience toward robustly and optimally tracking good goals, while resisting disturbances and negative influences, all in the presence of sensitive or unknown parameters. Application of the ideas to systematic theology provides an interface with the University's theology/philosophy core requirements.

### EE 30342. Electronics II

(3-3-4) Fay

*Prerequisite:* (EE 20242 OR EE 242)

*Corequisite:* EE 31342

Fundamentals of transistor-integrated circuit design, including frequency response, feedback, stability, and frequency compensation with application to operational amplifiers, phase-locked loops, and AM/FM transmission and reception. Includes laboratory. Spring.

### EE 30344. Signals and Systems I

(3-0-3) Bauer

*Prerequisites:* EE 20234 AND MATH 20580

*Corequisite:* EE 32344

Behavior of linear systems in both time- and transform-domain representations; convolution integrals and summations, Fourier series signal expansions, Fourier and Laplace transform analysis of linear systems; discrete time Fourier transforms. Fall.

### EE 30347. Semiconductors I: Fundamentals

(3-0-3) Hall

*Corequisite:* EE 32347

An introduction to solid-state electronic devices, presenting the basis of semiconductor materials, conduction processes in solids, and other physical phenomena fundamental to the understanding of transistors, optoelectronic devices, and silicon-integrated circuit technology. Fall.

### EE 30348. Electromagnetic Fields and Waves I: Fundamentals

(3-0-3) Jena

*Prerequisites:* MATH 20550, PHYS 10320

*Corequisite:* EE 32348

A basic course in electromagnetic field theory, using Maxwell's equations as the central theme. Vector analysis is employed extensively. Fall.

### EE 30354. Signals and Systems II

(3-0-3) Laneman

*Prerequisite:* (EE 34344 OR EE 30344)

*Corequisite:* EE 32354

Linear systems analysis with emphasis on discrete time case; sampling theory, discrete Fourier transform, Z-transform, applications in signal processing, communications, and control. Spring.

### EE 30357. Semiconductors II (Devices)

(3-0-3) Xing

*Prerequisite:* (EE 30347 OR EE 347)

*Corequisite:* EE 32357

Applications of transport phenomena in semiconductors to explain the terminal behavior of a variety of modern electronic devices such as bipolar junction transistors, MOS structures, and field effect transistors. Spring.

### EE 30358. Electromagnetic Fields and Waves II: Applications

(3-0-3) Lent

*Prerequisite:* (EE 30348 OR EE 34348 OR EE 348)

Propagation of traveling waves along transmission lines: transient waves, steady-state sinusoidal time and space variations. Wave equations for unbounded media and in wave guides. Spring.

**EE 30372. Electric Machinery and Power Systems**

(3-0-3) Sauer

*Prerequisite:* (EE 20234 AND PHYS 10320)*Corequisite:* EE 32372

Introduction to electric power systems and electro-mechanical energy conversion, including generators, transformers, three-phase circuits, AC and DC motors, transmission lines, power flow, and fault analysis. Spring.

**EE 31342. Electronics II Lab**

(0-0-0)

*Corequisite:* EE 30342

This lab supplements the materials presented in the lecture setting and gives students the opportunity to reinforce their learning through hands-on experiments and through demonstrations in a laboratory environment.

**EE 32344. Signals and Systems I Recitation**

(0-0-0)

*Corequisite:* EE 30344

Recitation designed to help engineering students with their problem-solving skills in a smaller group setting.

**EE 32347. Semiconductors I: Recitation**

(0-0-0)

*Corequisite:* EE 30347

Recitation designed to help engineering students with their problem-solving skills in a smaller group setting.

**EE 32348. Electromagnetic Fields and Waves I Recitation**

(0-0-0)

*Corequisite:* EE 30348

Recitation designed to help engineering students with their problem-solving skills in a smaller group setting.

**EE 32354. Signals and Systems II Recitation**

(0-0-0)

*Corequisite:* EE 30354

Recitation designed to help engineering students with their problem-solving skills in a smaller group setting.

**EE 32357. Semiconductors II Recitation**

(0-0-0)

*Corequisite:* EE 30357

Recitation designed to help engineering students with their problem-solving skills in a smaller group setting.

**EE 32372. Electric Machinery and Power Systems Recitation**

(0-0-0)

*Corequisite:* EE 30372

Recitation designed to help engineering students with their problem-solving skills in a smaller group setting.

**EE 40434. Circuits and Systems**

(3-0-3) Sain

*Prerequisite:* EE 20234

Study of electrical circuits from the systems point of view. The intrinsic feedback features of electrical circuits. Extensions of the ideas of Thevenin and Norton. Principles of automatically generating circuit models and solutions. Essential electric and magnetic features of circuits. Qualitative features of electrical circuits.

**EE 40446. Integrated Circuit Fabrication Laboratory**

(2-6-4) Snider

*Corequisite:* EE 41446

This course introduces the student to the principles of integrated circuit fabrication. Photolithography, impurity deposition and redistribution, metal deposition and definition, and other topics. Students will fabricate a 5000 transistor CMOS LSI circuit. Fall.

**EE 40453. Communication Systems**

(3-0-3) Fuja

*Prerequisite:* EE 30354

An introduction to the generation, transmission, and detection of information-bearing signals. Analog and digital modulation techniques including AM, FM, PSK, QAM, and PCM. Time- and frequency-division multiplexing. Fall.

**EE 40455. Control Systems**

(3-3-4) Antsaklis

*Prerequisite:* EE 30344 AND (MATH 30650 OR AME 34314)*Corequisite:* EE 41455

Design of linear feedback control systems by state-variable methods and by classical root locus, Nyquist, Bode, and Routh-Hurwitz methods. Fall.

**EE 40456. Data Networks**

(3-0-3) Schafer

Introduction of fundamental concepts of data networks in terms of the ISO-layered architecture. Functions that occur at the various levels are explored. Topics include local area networks such as Ethernet and Token Ring networks, proposals for wide and metropolitan area networks such as FDDI and DQDB, and the eventual integration of data communications into a single network under ISDN (Integrated Services Digital Network) and Broadband ISDN.

**EE 40458. Microwave Circuit Design and Measurements Laboratory**

(2-3-3) Fay

*Prerequisite:* EE 30348 OR EE 34348*Corequisite:* EE 41458

This course is an introduction to microwave circuit design and analysis techniques, with particular emphasis on applications for modern microwave communication and sensing systems. An integrated laboratory experience provides exposure to fundamental measurement techniques for device and circuit characterization at microwave frequencies. Students will develop an enhanced understanding of circuit design and analysis principles as applied to modern microwave circuits, as well as become familiar with design techniques for both hand analysis and computer-aided design. An appreciation for basic measurement techniques for characterization of microwave devices, circuits, and systems through laboratory experiments will also be developed. Fall.

**EE 40462. VLSI Circuit Design**

(3-0-3) Brockman

*Prerequisite:* CSE 20221

CMOS devices and circuits, scaling and design rules, floor planning, data and control flow, synchronization, and timing. Individual design projects.

**EE 40465. Space Systems Analysis**

(3-0-3) Howland

Missions, spacecraft dynamics, attitude determination and control, space environment, spacecraft power, telecommunications, avionics, data handling/processing, and other topics that may include configuration, load determination and structure, and thermal control. Spring.

**EE 40468. Photonics**

(2-3-3) Hall

*Prerequisite:* EE 30347*Corequisite:* EE 41468

A hands-on overview of the important role of photons alongside electrons in modern electrical engineering. Photonics technologies studied include lasers, optical fibers, integrated optics, optical signal processing, holography, optoelectronic devices, and optical modulators. A survey of the properties of light, its interactions with matter, and techniques for generating, guiding, modulating, and detecting coherent laser light. Spring.

**EE 40471. Digital Signal Processing**

(3-0-3) Kliever

*Prerequisites:* (EE 30354 OR EE 354) AND (MATH 30440 OR MATH 30530)

An introduction to the theory and application of digital information processing: analog/digital and digital/analog conversion, transform domain representation of discrete-time signals and systems, Z-transform, signal flow graphs, discrete Fourier transform, fast Fourier transforms, frequency analysis, filter design, filter structures, Wiener filter, finite-precision effects, applications in communications, and the analysis and synthesis of audio and image data. Spring.

**EE 40486. Digital and Analog Integrated Circuits**

(3-0-3)

*Prerequisites:* EE 20242 AND EE 30347

Device-level operation of digital and analog integrated circuits. Covers the elements of silicon bipolar and MOS logic, GaAs logic, and volatile and nonvolatile memory. Topics in analog ICs include the design of transistors optimized for particular applications such as high bandwidth, AC and DC analysis of analog circuits, and subcircuits used in analog ICs. Design issues.

**EE 41430. Senior Design I**

(1-6-3)

The first part of a yearlong senior design project. In this part, students will choose a project, develop the paper design, plan the implementation, and purchase necessary materials. Fall.

**EE 41440. Senior Design II**

(0-9-3)

*Prerequisite:* (EE 41430 OR EE 430)

The second part of a yearlong senior design project. In this part, students implement, test, and document their senior project. Spring.

**EE 41446. Integrated Circuit Fabrication Laboratory**

(0-0-0)

*Corequisite:* EE 40446

This lab supplements the materials presented in the lecture setting and gives students the opportunity to reinforce their learning through hands-on experiments and through demonstrations in a laboratory environment.

**EE 41455. Control Systems Laboratory**

(0-0-0)

*Corequisite:* EE 40455

This lab supplements the materials presented in the lecture setting and gives students the opportunity to reinforce their learning through hands-on experiments and through demonstrations in a laboratory environment.

**EE 41458. Microwave Circuit Design and Measurement Lab**

(0-0-0)

*Corequisite:* EE 40458

This course supplements the materials presented in the lecture setting and gives students the opportunity to reinforce their learning through hands-on experiments and through demonstrations in a laboratory environment.

**EE 41468. Photonics Lab**

(0-0-0)

*Corequisite:* EE 40468

This lab supplements the materials presented in the lecture setting and gives students the opportunity to reinforce their learning through hands-on experiments and through demonstrations in a laboratory environment.

**EE 47007. Electric and Hybrid Vehicles**

(3-0-3)

*Prerequisites:* EE 20234 AND PHYS 10320

The course is an introduction to modern electric and hybrid-electric vehicles. It covers basic aspects of batteries, electric motors, powertrain systems, and the vehicle-road system. Emphasis will be placed on energy and power flows in electric and hybrid-electric vehicle systems. Optimization of energy usage for given driving cycles will also be addressed in some detail. Some of the commercially available power management schemes will be introduced and potential alternatives will be explored.

**EE 47498. Special Studies**

(V-V-V)

Individual or small-group study under the direction of a faculty member in an undergraduate subject not concurrently covered by any University course.

**EE 48499. Undergraduate Research**

(V-V-V)

A research project at the undergraduate level under the supervision of a faculty member.

## Engineering (Nondepartmental)

### EG 00100. Introduction to Engineering

(3-3-0) Bualuan

This course is designed for rising high schools seniors who are interested in exploring engineering as a career. Included are lectures, field trips, and design projects reflecting what engineers do and how they do it. It is offered twice during the summer period. This is period I. Summer.

### EG 00200. Introduction to Engineering

(3-3-0) Bualuan

This course is designed for rising high schools seniors who are interested in exploring engineering as a career. Included are lectures, field trips, and design projects reflecting what engineers do and how they do it. It is offered twice during the summer period. This is period II. Summer.

### EG 10111. Introduction to Engineering Systems I

(3-0-3)

The first of a two-part sequence intended to introduce engineering to first-year intents and to establish a foundation for their studies in any of the engineering disciplines. Team-oriented design projects are used to provide a multidisciplinary view of engineering systems and to present the engineering method. Structured programming is introduced, and computing skills are developed for engineering analysis, synthesis, and technical communication. Fall.

### EG 10112. Introduction to Engineering Systems II

(3-0-3)

*Prerequisites:* (EG 10111 OR EG 111) AND (MATH 10550) (MAY BE TAKEN CONCURRENTLY)

The second of a two-course sequence intended to continue the introduction of first-year intents to the engineering disciplines. Multidisciplinary projects are used to illustrate the application of engineering modeling, analysis, and design principles to solve a variety of practical problems. The projects are intended to span areas of interest in all departments of the College of Engineering. Structured programming and software skills are further developed. Spring.

### EG 20200. Orientation to Engineering Seminar for First-Year Students

(1-1-1) Favila

This course will assist students interested in engineering understand the nature of the engineering major as it relates to the characteristics in the disciplines, academic requirements, and personal commitment required in order to successfully navigate the curriculum. Fall.

### EG 40421. Integrated Engineering and Business Fundamentals

(3-0-3) Dunn

The course is designed to improve the effectiveness of engineers working in corporations by teaching how and why businesses operate. Subjects covered include business financial reporting, business plans, the development processes, project management, the supply chain, and a history of quality topics. Numerous guest speakers are utilized to give the students exposure to successful business executives and reinforce the business processes covered in class. Fall.

### EG 40422. Advanced Integrated Engineering and Business Topics

(3-0-3) Dunn

*Prerequisite:* (EG 40421 OR EG 421) OR EG 44421

The second course in the sequence integrates the elements taught in the fundamentals course. Subjects covered include a team-oriented, Web-based business simulation exercise, management, effective communications, and a review of leading-edge trends in modern corporations. Spring.

### EG 48999. Research Experience for Undergraduates

(0-0-0)

This is a zero-credit course for students engaged in independent research or working with a faculty member or a member of the University staff on a special project. Registration requires a brief description of the research or project to be pursued and the permission of the director of the summer session. This course is

taken as an indication of the student's status on campus and is meant to allow the registered student to use the University facilities as the summer session permits. No coursework is required.

### ESTS 40401. Energy and Society: Options and Challenges

(3-0-3)

This three-credit course provides a comprehensive treatment of the role of energy in society and may be taken concurrently by engineering and non-engineering students. It proceeds along two parallel tracks, one dealing with the scientific/technical foundations of energy utilization and the other with its economic, political, environmental, and ethical implications. Scientific/technical issues will be treated at a level that is appropriate for non-engineers and at the same time beneficial to both engineers and non-engineers. The required background in mathematics is largely confined to high school algebra, with occasional use of elementary concepts from differential and integral calculus.

### ESTS 40402. Wireless Communications: The Technology and Impact of 24/7 Connectivity

(3-0-3)

This survey-style course offers an opportunity to gain a basic understanding of the technical, regulatory, and business aspects of the wireless revolution and its impact on society. It is intended for both engineering and non-engineering students. The course will include such topics as the representation, transmission, and reception of information in electrical form; the physical properties of radio signals and other wireless media; the principles and challenges of sharing a common medium; and privacy and security issues, as well as the social and commercial implications of wireless communications.

### ESTS 40403. Nanotechnology: Opportunities and Challenges

(3-0-3)

This course will provide a comprehensive introduction to the emerging fields of nano science and nano engineering, with an emphasis on the main ideas and concepts. Through directed readings and discussion, students will study the scientific underpinnings, and explore the societal impact and ethical implications of nanotechnology. They will also explore the potential for nanotechnology to impact a wealth of innovative applications across a vast array of fields including healthcare, environment, biotechnology, energy and food production, information technologies, and aerospace.

# College of Science

## Department of Biological Sciences

### BIOS 10098. Introductory Biology

(3-3-4)

Students receiving a 5 on the Biology AP I examination or an IB grade of 7, receive credit fully equivalent to BIOS 10161 and 11161 and BIOS 10162 and 11162, i.e., the first year sequence of Biological Sciences I and II with laboratories designed for science majors. For those students who choose not to waive AP or IB credit, BIOS 10098 and 10099 combined will be accepted as a prerequisite for all upper-level biology courses where BIOS 10161 and/or BIOS 10162 are the prerequisites. Students intending to apply to medical or other professional schools where AP science credit is not accepted, or where two semesters of general biology with laboratories at the college level are required, almost universally waive their AP credit at Notre Dame and take the classes for academic degree credit. In these cases, BIOS 10098/10099 will revert to nondegree credit on their final transcript, when replaced by 8.0 letter-graded degree credits of either BIOS 10161/11161 and 10162/11162 or BIOS 20201/21201 and 20202/21202 as determined by the requirements of their respective majors.

### BIOS 10099. Introductory Biology II

(3-3-4)

Students receiving a 5 on the Biology AP examination or an IB grade of 7, receive credit fully equivalent to BIOS 10161 and 11161 and BIOS 10162 and 11162, i.e., the first year sequence of Biological Sciences I and II with laboratories designed for science majors. For those students who choose not to waive AP or IB credit, BIOS 10098 and 10099 combined will be accepted as a prerequisite for all upper-level biology courses where BIOS 10161 and/or BIOS 10162 are the prerequisites. Students intending to apply to medical or other professional schools where AP science credit is not accepted, or where two semesters of general biology with laboratories at the college level are required, almost universally waive their AP credit at Notre Dame and take the classes for academic degree credit. In these cases, BIOS 10098/10099 will revert to nondegree credit on their final transcript, when replaced by 8.0 letter-graded degree credits of either BIOS 10161/11161 and 10162/11162 or BIOS 20201/21201 and 20202/21202 as determined by the requirements of their respective majors. Please see printed section of this bulletin (page 125) for a general statement pertaining to biology survey courses.

### BIOS 10101. Human Genetics, Evolution, and Society

(3-0-3) Bender

This course will address fundamental biological principles using the two cornerstones of modern biology: genetics and evolution. Elementary chemistry, cell theory, reproduction, and development will also be covered. The emphasis, however, will be on human genetics and will include such topics as the cause and effects of genetic abnormalities, the genetic basis of intelligence and skin color, genes and cancer, and elementary population genetics. The state of "genetic engineering" research, the recombinant DNA controversy (including the implications of this kind of research on society and the individual) will be presented. Fall and spring.

### BIOS 10106. Common Human Diseases

(3-0-3) Streit

The goal of this course is to introduce students to diseases that may afflict them, their parents, and/or their children, as well as other health problems common to the Tropics. It will provide the student with the information necessary to understand the biology of the disease process. Fall.

### BIOS 10107. Ecology and Evolution

(3-0-3) Filchak

Emphasis will be placed on today's ecological and environmental problems and the possible effect they may have on future evolution of life on Earth. Topics will generally include an overview of the theory of evolution and a discussion of

ecological principles as observed at the population, community, and ecosystem levels. The influence of cultural and political factors will also be discussed. Each academic year, one or more sections will be offered; some may be individually subtitled, allowing for one-time presentation of specific topics within the context of "environment and evolution" in addition to multiple-semester presentations of a specific topic (e.g., Evolutionary Ecology, Freshwater and Society, Environmental Issues and Solutions). Fall and spring.

### BIOS 10109. Human Reproduction and Society

(3-0-3)

Basic aspects of human development and reproduction will be covered from conception through sexual senescence. In addition, the science behind many currently debated social issues will be addressed. Selected topics might include causes and treatment of infertility, in vitro fertilization, control of male and female fertility, pregnancy and paternity testing, gene therapy, the effects of legal and illegal drug use on reproductive function and embryonic/fetal development, and the impact of current health-care policy and practice on infant and prenatal health. Fall.

### BIOS 10110. Genetics, Technology, and Society

(5-0-3)

The objective of this course is to give students an overview of human genetics and an appreciation for the relatively new field of molecular biology that is currently being used to study human genetic diseases. Genetic technologies such as cloning and manipulating genes, genetic biotechnology, gene therapy, DNA testing, and so forth will be emphasized. The ethical, social, and legal implications of these technologies will also be covered. In addition, this course will address the role of genetics in human cancer, behavior, obesity, intelligence, and sexual orientation. Generally offered in the summer where there are five lectures per week. When offered during the academic year, there are three lectures per week.

### BIOS 10115. Microbes and Man

(3-0-3)

The course will provide a survey of relationships between man and microorganisms. General information about microbial physiology, biochemistry, and ecology will support more detailed discussions of interesting topics in food, medical, and applied microbial biology. Included will be subjects of general and historical interest, as well as current newsworthy topics. The student should get a better understanding of the role of microorganisms in disease, the production of common foods, relevant environmental issues, and biotechnology.

### BIOS 10116. Biology and Nutrition

(3-0-3)

This course provides a general overview of the field in nutrition. Topics to be presented include an introduction to the field of nutrition, nutrient composition of foods, recommended intakes and health claims, a review of the nutrients, food intake and energy balance, sports nutrition, eating disorders, current issues of food safety, fads, and other aspects encompassing nutrition during all stages of life.

### BIOS 10117. Biodiversity: Its Challenge and Future

(3-0-3)

Today, species of plants and animals are going extinct at an unprecedented rate in the 3.5 billion-year history of life on Earth. Not only are species going extinct, but complete assemblages of species in particular habitats are threatened. The class will survey the reasons why this disappearance of species and habitats concerns biologists, the basic concepts that biologists hope to employ to help prevent the continuance of this trend, and the problems faced in formulating policies that address this problem. This human problem is important locally and globally, since legislation attempting to halt the loss of biological diversity will affect the actions of people at the community, state, national, and international levels. To the majority of people in the US and other developed countries, concern for biodiversity is second only to their economic well-being. Spring.

**BIOS 10118. Ecology and Wildlife Biology**

(3-0-3)

Issues and concepts in ecology, environmental biology, and evolution are examined in the context of wildlife biology, species management, and preservation of endangered species. Spring

**BIOS 10161. Biological Sciences I**

(3-0-3) Tenniswood

*Corequisite:* BIOS 11161

This is a two-semester course with three lectures and one three-hour laboratory a week for first-year students contemplating a career in biology, medicine, or related areas of life science. The first semester presents a description of biologically important molecules and then proceeds to cell structure, energy metabolism, and classical and modern genetics. The topics presented in the second semester in the context of modern evolutionary theory include biological diversity, ecology, and organismal physiology. BIOS 10161 and 10162 are not typical survey courses; they go into greater depth, especially in modern molecular biology. When followed by BIOS 20241 and BIOS 20250, they will provide biology and biochemistry majors, including premedical intents, with a thorough, in-depth overview of basic concepts of modern biology.

**BIOS 10162. Biological Sciences II**

(3-0-3) Tenniswood

*Prerequisite:* BIOS 10161*Corequisite:* BIOS 11162

This is the second semester of a two-semester course for first-year students contemplating a career in biology, medicine, or related areas of life science. The topics presented in the second semester in the context of modern evolutionary theory include biological diversity, ecology, and organismal physiology.

**BIOS 10191. Molecular Genetic Technology**

(3-0-3) Filchak

Open to non-science honors students only. Not available to students who have previously taken BIOS 10101 or BIOS 11110. The objectives of the course are to have students learn the basics of cell division and Mendelian genetics and then explore the relatively new field of DNA technologies such as gene cloning, genetic testing, biotechnology, and cancer genetic analysis. This course also has a service-learning component in which students will work at the Logan Center in South Bend. Fall.

**BIOS 11161. Biological Sciences I—Laboratory**

(0-1-1)

*Corequisite:* BIOS 10161

The laboratory sessions are an integral part of the course, which will complement the lectures. The lab sessions will also offer the student direct experience in using the scientific method and simultaneously introduce numerous biological and analytical techniques. In addition, students learn to present their findings during the course of the two semesters of laboratory as they would for a journal article or a scientific meeting (seminar and poster presentations).

**BIOS 11162. Biological Sciences II—Laboratory**

(1-0-1)

*Corequisite:* BIOS 10162

The laboratory sessions are an integral part of the course, which will complement the lectures. The lab sessions will also offer the student direct experience in using the scientific method and simultaneously introduce numerous biological and analytical techniques. In addition, students learn to present their findings during the course of the two semesters of laboratory as they would for a journal article or a scientific meeting (seminar and poster presentations).

**BIOS 12101. Human Genetics, Evolution, and Society Tutorial**

(1-0-0)

*Corequisite:* BIOS 10101

Tutorial for BIOS 10101.

**BIOS 12107. Ecology and Environmental Issues Tutorial**

(0-0-0)

*Corequisite:* BIOS 10107

Emphasis will be placed on today's ecological and environmental problems and the possible effect they may have on the future evolution of life on Earth. Topics will generally include an overview of the theory of evolution and a discussion of ecological principles as observed at the population, community, and ecosystem levels. The influence of cultural and political factors will also be discussed. Each academic year, one or more sections will be offered; some may be individually subtitled, allowing for one-time presentation of specific topics within the context of "environment and evolution" in addition to multiple-semester presentations of a specific topic (e.g., Evolutionary Ecology, Freshwater and Society, Environmental Issues and Solutions). Fall and spring.

**BIOS 20201. General Biology A**

(3-0-3) O'Tousa

*Prerequisite:* (CHEM 10114 OR CHEM 114) OR (CHEM 10116 OR CHEM 116) OR (CHEM 10118 OR CHEM 118) OR (CHEM 121 OR CHEM 10121) OR (CHEM 10122 OR CHEM 122) OR (CHEM 10126 OR CHEM 126) OR (CHEM 10172 OR CHEM 10182)

Introduction to living organisms with emphasis on biological processes and principles. BIOS 20201 and 20202, along with their concomitant laboratories (BIOS 21201 and 20202), constitute a traditional two-semester introduction to biology. This sequence covers more topics, but in less depth, than the former BIOS 155–156 or BIOS 10161–10162 and is designed to provide students with the necessary background for subsequent advanced biology courses and to help them prepare for MCATS. A prerequisite is a full year of college chemistry. In addition, organic chemistry is to be taken concurrently. The general sequence of topics is reversed compared to BIOS 10155 and 10156. BIOS 20201 introduces biology to the student at the cellular level, covering such topics as important biological molecules, energy metabolism, and classical and modern genetics.

**BIOS 20202. General Biology B**

(3-0-3) Duman

*Prerequisite:* (BIOS 20201 OR BIOS 201)

Introduction to living organisms with emphasis on biological processes and principles. BIOS 20201 and 20202, along with their concomitant laboratories (BIOS 21201 and 21202), constitute a traditional two-semester introduction to biology. This sequence covers more topics, but in less depth, than BIOS 10155 and 10156 or BIOS 10161 and 10162 and is designed to provide students with the necessary background for subsequent advanced biology courses and to help them prepare for MCATS. A prerequisite is a full year of college chemistry. In addition, organic chemistry is to be taken concurrently. The general sequence of topics is reversed compared to BIOS 10155 and 10156. BIOS 20201 introduces biology to the student at the cellular level, covering such topics as important biological molecules, energy metabolism, and classical and modern genetics. BIOS 10202 goes beyond the cellular level, with an emphasis on organismic physiology, evolution, diversity, and ecology. Note: CHEM 10114 or 10118 or 10126 or 10171 or 10181 must be completed before taking BIOS 20201. BIOS 20201, 21201, and 20202, 21202 may be substituted for 10155–10156 or 10161–10162; however, this sequence is quite different from 10155–10156 or 10161–10162 in content and does not provide the depth afforded by 10155–10156 or 10161–10162, nor does 20201–20202 provide the equivalent laboratory experience essential to biology majors intent on taking BIOS 21241 and 21250.

**BIOS 20241. Molecular Cellular Biology**

(3-0-3) Vaughan

*Prerequisite:* (CHEM 20223 OR CHEM 223 OR CHEM 20247 OR CHEM 247 OR CHEM 10172)

This is restricted to biological science and majors only. This course explores the fundamental structural and functional basis of cell biology, with specific emphasis on molecular mechanisms that regulate cellular activities involved in ion and solute transport, organelle biogenesis, protein trafficking and vesicular transport, intracellular communication and signaling, cell cycle growth control regulation, and cytomechanics. The lecture portion of the course is dedicated to exposing students to the protein machinery driving cell functions, while the

laboratory complements lecture by providing a combination of experiments and opportunities for independent, project-based investigation focused on elucidating basic cell function. Spring.

### **BIOS 20250. Classical and Molecular Genetics**

(4-0-4) Hyde

*Prerequisite:* (BIOS 10155 OR BIOS 155) OR (BIOS 10156 OR BIOS 156) OR (BIOS 20201 OR BIOS 201) OR (BIOS 10161 OR BIOS 161) OR (BIOS 10162 OR BIOS 162)

This course is restricted to biological science majors only. The course exposes students to classical and molecular genetics and demonstrates how these two approaches can combine to examine complex problems. The lecture is strongly weighted toward teaching students to solve genetic and molecular biological problems. Classical genetic principles are introduced first. Students are then presented with the techniques to examine underlying genetic principles through problem solving. Basic principles and techniques of molecular biology are next presented, and students learn how to apply these techniques to explore genetic problems. The laboratory gives the students hands-on experience in a number of genetic and molecular techniques and demonstrates how these procedures are combined to produce a cohesive genetic picture. Experiments begin with classical genetic analysis of a mutation, progress to isolating the mutant gene by PCR and standard cloning techniques, followed by DNA sequencing the genomic fragments to determine the nature of the genetic defect. Immunolocalization of the protein in mutant and wild-type flies brings the molecular work back to the organism, providing a full-circle study of the genetic mutation under study. At the end of the lab, students are ready for the independent study projects conducted in the laboratory for BIOS 20241 Molecular Cell Biology. Fall.

### **BIOS 20303. Fundamentals of Genetics**

(3-0-3) Besansky

*Prerequisite:* (BIOS 10156 OR BIOS 156) OR (BIOS 20201 OR BIOS 201) OR (BIOS 10161 OR BIOS 161)

This is an elementary course dealing with the principles of variation and inheritance in plants and animals, with special reference to humans, designed primarily for junior preprofessional students. Spring.

### **BIOS 21201. General Biology A Laboratory**

(0-3-1)

*Corequisite:* BIOS 20201

Students registering for BIOS 20201 must concurrently register for 21201.

### **BIOS 21202. General Biology B Laboratory**

(1-0-1)

*Corequisite:* BIOS 20202

Materials covered in laboratory parallel the lecture material for the most part.

### **BIOS 21241. Molecular Cellular Biology Laboratory**

(0-3-1)

*Corequisite:* BIOS 20241

This cell biology laboratory is a special section only for biology and environmental science majors. It focuses on techniques rather than the investigational experimental approach of BIOS 27241R. Note: Prior to spring 2003, there was a single BIOS 20241 laboratory. See the current description of BIOS 27241 for details of that experimental laboratory.

### **BIOS 21250. Classical and Molecular Genetics Laboratory**

(0-3-1)

*Prerequisites:* (BIOS 10156 OR BIOS 156) OR (BIOS 10161 OR BIOS 161) OR (BIOS 20201 OR BIOS 201) AND (BIOS 20250 (MAY BE TAKEN CONCURRENTLY) OR BIOS 250 (MAY BE TAKEN CONCURRENTLY)) AND BIOS 250 (MAY BE TAKEN CONCURRENTLY)

In this laboratory course, students will characterize mutations that cause retinal degeneration in the fruit fly, *Drosophila Melanogaster*, in a series of related experiments comprising a semester-long study. The labs will be broken into two major sections, starting with the genetic characterization of a mutation, followed by the molecular characterization of the altered gene causing that mutation. This directed

research project will be presented in two drafts of a complex research paper. Some work outside the four-hour lab period will be required. Fall.

### **BIOS 21303. Fundamental Genetics Laboratory**

(0-3-1)

*Prerequisite:* (BIOS 20303 (MAY BE TAKEN CONCURRENTLY) OR BIOS 303)

Laboratory provides experience in genetic experimentation and analysis. Either BIOS 21250 or 31303 is required for biology majors, optional for others. Spring.

### **BIOS 27241. Molecular Cell Biology Laboratory**

(0-V-2)

*Prerequisite:* BIOS 20241 (MAY BE TAKEN CONCURRENTLY)

This cell biology laboratory, reserved exclusively for BIOS majors, is an investigative, project-based laboratory designed to expose students to a bona fide research experience involving the development and application of critical thinking skills to solve complex research problems. Working in groups of four to six, students will devote themselves to tackling self-chosen research projects reviewed and approved by course instructors. The culmination of the laboratory experience ends when students formally prepare and present their findings in a poster-style scientific meeting. Spring.

### **BIOS 28498. Introduction to Undergraduate Research**

(1-0-1)

Introduction to research procedures including basic laboratory methods, design of effective experiments, use of controls and statistics to generate valid data, ethical concerns relevant to reporting research data, literature searches, and delivery of effective research presentations.

### **BIOS 30301. Embryology**

(3-0-3) Kolberg

*Prerequisites:* ((BIOS 10155 OR BIOS 155) AND (BIOS 10156 OR BIOS 156)) OR ((BIOS 10161 OR BIOS 161) AND (BIOS 10162 OR BIOS 162)) OR ((BIOS 20201 OR BIOS 201) AND (BIOS 20202 OR BIOS 202))

Overview of the embryology and histology of the developing organism with an emphasis on the clinical aspects. Content very similar to BIOS 40342.

### **BIOS 30304. General Botany**

(4-0-4)

*Prerequisite:* (BIOS 10156 OR BIOS 156) OR (BIOS 20202 OR BIOS 202)

*Corequisite:* BIOS 31304

A broad survey of the plant kingdom, emphasizing morphology and anatomy, with attention given to major plant functions of growth and development in chiefly angiospermous ("higher") plants. Laboratory instruction includes a semester project involving photomicrography or seed germination and cloning.

### **BIOS 30305. Evolution**

(3-0-3) Hollocher

*Prerequisite:* (BIOS 10155 OR BIOS 155) OR (BIOS 10162 OR BIOS 162) OR (BIOS 20202 OR BIOS 202)

The mechanisms and processes involved in the production of life as we know it today, as well as a discussion on the impact current events may have upon life in the future. Spring.

### **BIOS 30310. The History of Life**

(3-0-3) Feder

*Prerequisites:* ((BIOS 10155 OR BIOS 155) AND (BIOS 10156 OR BIOS 156)) OR ((BIOS 10161 OR BIOS 161) AND (BIOS 10162 OR BIOS 162)) OR ((BIOS 20201 OR BIOS 201) AND (BIOS 20202 OR BIOS 202))

This course explores the origin, history, and systematics of life on Earth, starting from hypotheses examining life's origin(s) and including current thinking concerning the systematic relationships of organisms and the evolution of humans. The class will be taught primarily from a macroevolutionary perspective. BIOS 30310, therefore, represents the complement to BIOS 30305 Evolution, which concentrates on processes generating gene frequency changes within populations (i.e., microevolution). Fall.

**BIOS 30312. General Ecology**

(3-0-3) Tank

*Prerequisites:* ((BIOS 10155 OR BIOS 155) AND (BIOS 10156 OR BIOS 156)) OR ((BIOS 10161 OR BIOS 161) AND (BIOS 10162 OR BIOS 162)) OR ((BIOS 20201 OR BIOS 201) AND (BIOS 20202 OR BIOS 202))

The study of populations and communities of organisms and their interrelations with the environment. Fall and spring.

**BIOS 30325. Plant Science**

(3-0-3) Romero-Severson

*Prerequisites:* ((BIOS 10155 OR BIOS 155) AND (BIOS 10156 OR BIOS 156)) OR ((BIOS 10161 OR BIOS 161) AND (BIOS 10162 OR BIOS 162)) OR ((BIOS 20201 OR BIOS 201) AND (BIOS 20202 OR BIOS 202)) AND ((BIOS 20241 OR BIOS 241) OR (BIOS 30341 (MAY BE TAKEN CONCURRENTLY) OR BIOS 341)) AND ((BIOS 20250 (MAY BE TAKEN CONCURRENTLY) OR BIOS 250) OR (BIOS 20303 OR BIOS 303))

This course for biology majors provides a more detailed examination of plant development, biochemistry, genetics, and ecology than presented in the general and cell biology courses. Specific topics include energy capture and biosynthesis strategies, plant biochemistry, nitrogen fixation, defense mechanisms, plant diversity, plant reproductive strategies, plant genetics, grassland and forest ecology, plant domestication, the ecological impact of plant domestication, and forest management policy. Fall.

**BIOS 30326. Human Genetics**

(3-0-3)

*Prerequisites:* (BIOS 10155 OR BIOS 155) OR (BIOS 10156 OR BIOS 156) OR (BIOS 20201 OR BIOS 201) OR (BIOS 10161 OR BIOS 161) OR (BIOS 10162 OR BIOS 162) AND ((BIOS 20250 OR BIOS 250) OR (BIOS 20303 OR BIOS 303))

Evaluation of human genetics in the light of modern genetic research.

**BIOS 30338. Neurobiology**

(3-0-3) Li

*Prerequisites:* ((BIOS 10155 OR BIOS 155) OR (BIOS 10156 OR BIOS 156) OR (BIOS 20201 OR BIOS 201) OR (BIOS 10161 OR BIOS 161) OR (BIOS 10162 OR BIOS 162)) AND ((BIOS 20241 OR BIOS 241) OR (BIOS 30341 OR BIOS 341) OR (BIOS 30344 OR BIOS 344))

Neuroscience is a relatively new field. It consists of several quite separate disciplines: for example, neuroanatomy, which studies the structure of neural tissue; neurophysiology, which investigates individual nerve cell properties; neurochemistry, which is concerned with the substances found in brain tissue; and cognitive neuroscience, which deals with higher brain function. This course will discuss all of these issues. Topics will include nerve cell function (i.e., electric and chemical synapses, neurotransmitters, and neural control of locomotion) and cognition (i.e., perception, learning, and memory). By the end of the course, students will be expected to understand our current knowledge of how the brain controls our actions and behaviors.

**BIOS 30341. Cellular Biology**

(3-0-3) Hager

*Prerequisites:* ((BIOS 10155 OR BIOS 155) AND (BIOS 10156 OR BIOS 156)) OR ((BIOS 10161 OR BIOS 161) AND (BIOS 10162 OR BIOS 162)) OR ((BIOS 20201 OR BIOS 201) AND (BIOS 20202 OR BIOS 202)) AND ((CHEM 20223 OR CHEM 223) OR (CHEM 20235 OR CHEM 235) OR (CHEM 20247 OR CHEM 247) OR (CHEM 10172))

Designed primarily for junior preprofessional students. Structural and functional aspects of the biology of cells are addressed. Fall and spring.

**BIOS 30342. Developmental Biology**

(3-0-3) Tenniswood

*Prerequisite:* (BIOS 10155 OR BIOS 155) OR (BIOS 10162 OR BIOS 162) OR (BIOS 20202 OR BIOS 202)

Development of plants, animals, and microorganisms studied at the molecular, cellular, and organismic levels.

**BIOS 30344. Vertebrate (Human) Physiology**

(3-0-3) Boyd

*Prerequisites:* BIOS 10155 OR BIOS 155 OR BIOS 10161 OR BIOS 161 OR BIOS 20201 OR BIOS 201) AND (BIOS 10156 OR BIOS 156 OR BIOS 10162 OR BIOS 162 OR BIOS 20202 OR BIOS 202) AND (CHEM 20223 OR CHEM 223 OR CHEM 20235 OR CHEM 235 OR CHEM 20247 OR CHEM 247 OR CHEM 10172)

Physiological functions and processes at the level of organs and organ systems, oriented primarily toward humans. Designed primarily for junior preprofessional students. Fall.

**BIOS 30401. Principles of Microbiology**

(3-0-3) Kulpa

*Prerequisites:* ((BIOS 10155 OR BIOS 155) AND (BIOS 10156 OR BIOS 156)) OR ((BIOS 10161 OR BIOS 161) AND (BIOS 10162 OR BIOS 162)) OR ((BIOS 20201 OR BIOS 201) AND (BIOS 20202 OR BIOS 202)) AND ((CHEM 20224 OR CHEM 224 OR CHEM 224A) OR (CHEM 20248 OR CHEM 248 OR CHEM 20273))

An introduction to microbial life, including structure and function of bacteria. Characterization and classification of microorganisms are considered and include their ecology, growth and death, metabolism, physiology, genetics and antigenic analysis. The impact of microorganisms on human health is discussed through representative pathogenic bacteria. Fall.

**BIOS 30404. Vertebrate Biology**

(3-0-3) Johnson

*Prerequisite:* (BIOS 10156 OR BIOS 156) OR (BIOS 10162 OR BIOS 162) OR (BIOS 20202 OR BIOS 202)

A study of systematic relationships, evolution, and life histories of living and extinct vertebrates, and the physiology and behavior of living vertebrates. Fall.

**BIOS 30406. General Entomology**

(3-0-3)

*Prerequisite:* (BIOS 10155 OR BIOS 155) OR (BIOS 10156 OR BIOS 156) OR (BIOS 20201 OR BIOS 201) OR (BIOS 10161 OR BIOS 161) OR (BIOS 10162 OR BIOS 162)

A study of the morphology, life histories, and systematic relationships of insects, with emphasis on medical and agricultural aspects. Alternating fall semesters.

**BIOS 30407. Animal Behavior**

(3-0-3) Esch

*Prerequisite:* (BIOS 10155 OR BIOS 155) OR (BIOS 10162 OR BIOS 162) OR (BIOS 20202 OR BIOS 202)

A consideration of individual and social behavior patterns, with emphasis on organization and adaptive significance. Neural, endocrine, genetic, and environmental factors modifying behavior will be examined. Spring.

**BIOS 30408. Arthropods and Human Disease**

(3-0-3) Collins

*Prerequisites:* (BIOS 10155 OR BIOS 155 OR BIOS 10161 OR BIOS 161 OR BIOS 20201 OR BIOS 201) AND (BIOS 10156 OR BIOS 156 OR BIOS 10162 OR BIOS 162 OR BIOS 20202 OR BIOS 202)

Emphasis on physiology, genetics, and relationships of arthropods as agents and vectors of disease. Alternating spring semesters.

**BIOS 30418. Molecular Genetics**

(3-0-3)

*Prerequisites:* ((BIOS 10155 OR BIOS 155) OR (BIOS 10156 OR BIOS 156) OR (BIOS 20201 OR BIOS 201) OR (BIOS 10161 OR BIOS 161) OR (BIOS 10162 OR BIOS 162)) AND ((BIOS 20250 OR BIOS 250) OR (BIOS 20303 OR BIOS 303)) AND ((CHEM 20248 OR CHEM 248 OR CHEM 20273) OR (CHEM 40420 OR CHEM 420))

The course will introduce the tools of modern molecular biology and explore their applications at the frontiers of biological research. Advanced topics may include molecular medicine, biotechnology, development, evolution, and neurobiology. Fall.

**BIOS 30420. Aquatic Ecology**

(3-0-4) Hellenthal

*Prerequisites:* ((BIOS 10155 OR BIOS 155) AND (BIOS 10156 OR BIOS 156)) OR ((BIOS 10161 OR BIOS 161) AND (BIOS 10162 OR BIOS 162)) OR ((BIOS 20201 OR BIOS 201) AND (BIOS 20202 OR BIOS 202))

*Corequisite:* BIOS 31420

A study of the structure and function of aquatic systems with emphasis on the behavioral, physiological, and morphological adaptations generated by the physical and chemical characteristics of various aquatic habitats. Fall.

**BIOS 30421. Integrative Comparative Physiology**

(4-0-4) Duman

*Prerequisites:* (BIOS 20241 OR BIOS 241) AND (BIOS 20250 OR BIOS 250)  
Designed primarily for students in the biology or biochemistry majors sequences. This course is designed to be taken either as an introductory animal physiology course for students without formal training in physiology beyond general biology, or as a second physiology course for students who have already taken BIOS 30344. General physiological principles are introduced, and the course is designed around the classical organ/system approach to physiology but with stress on comparative and evolutionary relationships. Emphasis is placed on the integrated nature of the various physiological systems and on the relationships of the physiology of the organism to its environment (physiological ecology) as well as to the lower levels of biological hierarchy (biochemistry, cell, and molecular biology). Special emphasis is placed on adaptations to environmental extremes. This course has four lectures per week. Spring.

**BIOS 30423. Genomics: Sequence to Organism**

(3-0-3) Ferdig

*Prerequisites:* (BIOS 10155 OR BIOS 155) OR (BIOS 10156 OR BIOS 156) OR (BIOS 20201 OR BIOS 201) OR (BIOS 10161 OR BIOS 161) OR (BIOS 10162 OR BIOS 162)) AND ((BIOS 20250 OR BIOS 250) OR (BIOS 20303 OR BIOS 303))

This course will introduce the methods of genome science and explore their applications in biological research and their impact on biological thinking. Topics will include how genomes are studied, how they function, and how they evolve. The importance of comparative and functional genomics in identifying mechanisms of human diseases will be highlighted. Spring.

**BIOS 30475. Laboratory Animal Science**

(2-0-2) Stewart

*Prerequisite:* (BIOS 10155 OR BIOS 155) OR (BIOS 10156 OR BIOS 156) OR (BIOS 20201 OR BIOS 201) OR (BIOS 10161 OR BIOS 161) OR (BIOS 10162 OR BIOS 162)

An introduction to laboratory animal science, focusing on federally mandated regulations, animal rights/animal welfare controversies, general care and use of animals in a full-compliance program, and common methodologies used in animal-based research. Enrollment is by consent of instructor only and limited to junior or senior undergraduate pre-veterinary students, or biology majors whose graduate career program will require animal use, or graduate students whose research requires animal use at Notre Dame. Spring.

**BIOS 30568. Introduction to UNDERC**

(1-0-1)

Open only to students previously accepted into the UNDERC program. Spring

**BIOS 31304. Botany Laboratory**

(0-3-0)

*Prerequisite:* (BIOS 10156 OR BIOS 156) OR (BIOS 20202 OR BIOS 202)

*Corequisite:* BIOS 30304

General botany laboratory is to be taken concurrently with the general botany lecture. Students may not take lecture alone or laboratory alone.

**BIOS 31312. General Ecology Laboratory**

(0-1-1)

*Prerequisite:* (BIOS 30312 (MAY BE TAKEN CONCURRENTLY) OR BIOS 312 (MAY BE TAKEN CONCURRENTLY))

General ecology laboratory is to be taken concurrently with the general ecology lecture. Students may not take lecture alone or laboratory alone.

**BIOS 31341. Cell Biology Laboratory**

(0-3-1)

*Prerequisites:* ((BIOS 10156 OR BIOS 156) OR (BIOS 20202 OR BIOS 202)) AND ((BIOS 20241 (MAY BE TAKEN CONCURRENTLY) OR BIOS 241 (MAY BE TAKEN CONCURRENTLY)) OR (BIOS 30341 (MAY BE TAKEN CONCURRENTLY) OR BIOS 341 (MAY BE TAKEN CONCURRENTLY)))

This laboratory course exposes students to a variety of techniques in modern cell biology. Students will get hands-on experience in working with cultured cell lines, including sterile technique, media preparation, and passaging of cells. Individual experiments will include assessment of cell growth and apoptosis, examination of subcellular structure using fluorescent microscopy, separation and analysis of nucleic acids and proteins, enzyme assays, and measurement of cell cycle by flow cytometry. It provides an excellent introduction to the approaches routinely used in analysis of cells and their functions. Fall.

**BIOS 31401. Principles of Microbiology Laboratory**

(0-3-1)

*Prerequisites:* (BIOS 10156 OR BIOS 156) OR BIOS 10162 OR (BIOS 20202 OR BIOS 202) AND (BIOS 30401 (MAY BE TAKEN CONCURRENTLY) OR BIOS 401 (MAY BE TAKEN CONCURRENTLY))

Laboratory exercises consider basic techniques in microbiology, such as sterile procedures and microbial metabolism. Fall.

**BIOS 31406. General Entomology Laboratory**

(0-3-1)

*Prerequisites:* ((BIOS 10155 OR BIOS 155) OR (BIOS 10156 OR BIOS 156) OR (BIOS 20201 OR BIOS 201) OR (BIOS 10161 OR BIOS 161) OR (BIOS 10162 OR BIOS 162)) AND ((BIOS 30406 (MAY BE TAKEN CONCURRENTLY) OR BIOS 406))

The laboratory introduces students to insect morphology, systematics, and techniques used in the study of insects. Offered concurrently with lecture.

**BIOS 31408. Medical and Veterinary Entomology Laboratory**

(0-3-1)

*Prerequisite:* (BIOS 30408 (MAY BE TAKEN CONCURRENTLY) OR BIOS 408)

The laboratory introduces students to the variety of arthropods that vector disease agents or otherwise affect the lives of humans and other vertebrate animals. Offered concurrently with lecture.

**BIOS 31420. Aquatic Ecology Laboratory**

(0-3-0)

*Prerequisite:* (BIOS 10156 OR BIOS 156) OR BIOS 10162 OR (BIOS 20202 OR BIOS 202)

*Corequisite:* BIOS 30420

Aquatic ecology laboratory is to be taken concurrently with the aquatic ecology lecture. Students may not take lecture alone or laboratory alone.

**BIOS 31421. Integrative Comparative Physiology Laboratory**

(0-3-1)

*Prerequisite:* BIOS 30421 (MAY BE TAKEN CONCURRENTLY) OR BIOS 421) OR (BIOS 30344 (MAY BE TAKEN CONCURRENTLY) OR BIOS 344)

Laboratory provides experience with experimentation and analysis of physiological concepts at the organismal, cellular, and molecular levels. Spring.

**BIOS 35501. Introduction to UNDERC**

(1-0-1)

Open only to students previously accepted into the UNDERC program.

**BIOS 35502. Practicum in Environmental Field Biology**

(3-3-6)

Practical training in aquatic and environmental biology through lecture and field experience at the University's environmental research facility located in northern

Wisconsin and the upper peninsula of Michigan. Course includes an independent research project. Summer

### **BIOS 35503. Practicum in Environmental Biology II**

(V-V-6)

*Prerequisite:* BIOS 35502

This course is designed to give the student advanced practical laboratory experience in ecological studies in the grasslands and mountains of western Montana on the Flathead Indian Reservation. The nine-week learning experience consists of one week modules on grassland ecology, montane ecology, wildlife ecology, and human ecology focusing on ancestral Native American lifeways, and each student conducts an independent research project over the remaining five weeks. Each student is provided with a \$2,500 stipend, tuition, and expenses. For further information, write Dr. Gary Belovsky, Department of Biological Sciences, Notre Dame, IN 46556.

### **BIOS 35504. Practicum in Environmental Field Biology III**

(3-0-6)

Opportunity to take field classes and conduct an independent research project in University of Puerto Rico programs at the El Verde (rain forest) or Mayaquez (marine) field stations. Participation in this program requires students to have first taken the Practicum in Environmental Field Biology I at "UNDERC East" (BIOS 35502).

### **BIOS 35568. UNDERC Field Studies—Academic Year**

(V-V-V)

BIOS 35568 and the companion summer course, BIOS 35569, provide students with the opportunity for extended field studies in the UNDERC environment.

### **BIOS 37491. Teaching Practicum in the Life Sciences**

(0-0-0)

Same as BIOS 37495, except that students who are registered for this section are paid as undergraduate teaching assistants; this section is not graded, and no academic credit is given.

### **BIOS 37492. Teaching Practicum in the Life Sciences**

(0—0)

Same as BIOS 37495, except that this is a S/U-graded variable credit section; 2.0 maximum credits allowed.

### **BIOS 37493. Teaching Practicum in the Life Sciences**

(V-0-V)

Same as BIOS 37495, except that this is a letter-graded variable credit section; 2.0 maximum credits allowed.

### **BIOS 37494. Teaching Practicum in the Life Sciences**

(2-0-2)

Same as BIOS 37495, except that this is a letter-graded variable credit section; 2.0 maximum credits allowed.

### **BIOS 37495. Teaching Practicum in the Life Sciences**

(2-0-2)

This course gives the advanced student an opportunity to gain direct experience in teaching. Students are assigned regular teaching duties in certain laboratory courses and must be prepared to accept responsibility. Note: Most states will not accept this in lieu of practice teaching in an education department. Students must clear lab assignments with each section's practicum coordinator. Fall and spring.

### **BIOS 40320. Aquatic Conservation: Global Freshwaters, Science, and Policy**

(3-0-3) Lodge

*Prerequisites:* ((BIOS 10155 OR BIOS 155) OR (BIOS 10156 OR BIOS 156) OR (BIOS 20201 OR BIOS 201) OR (BIOS 10161 OR BIOS 161) OR (BIOS 10162 OR BIOS 162)) AND ((BIOS 30312 OR BIOS 312) OR (BIOS 30420 OR BIOS 420))

This course is designed for advanced undergraduates with a background in ecology and/or environmental science. The first primary goal will be to read, discuss, and

write about the main ongoing global environmental changes that affect the global water cycle, including regional water quality and water availability. The second primary goal will be to have students examine how the current scientific understanding of these issues has or has not been incorporated into regional, national, and international policy, including policies on water rights. Guest lecturers will be broadly drawn from the research, legal, and NGO fields. There will be a textbook, supplemented by readings from the primary literature and other sources.

### **BIOS 40342. Advanced Developmental Biology**

(3-0-3) Hinchcliffe

*Prerequisites:* (BIOS 10155 OR BIOS 155 OR BIOS 10162 OR BIOS 162 OR BIOS 20202 OR BIOS 202) AND (BIOS 20250 OR BIOS 250 OR BIOS 20303 OR BIOS 303) AND (BIOS 20241 OR BIOS 241 OR BIOS 30341 OR BIOS 341)

Development of plants, animals, and microorganisms studied at the molecular, cellular, and organismic levels. BIOS 40342 is taught at a higher level with genetics and cell biology as prerequisites in contrast to BIOS 30342. Spring.

### **BIOS 40411. Biostatistics**

(V-0-V) Lamberti

*Prerequisites:* ((BIOS 10156 OR BIOS 156) OR (BIOS 10162 OR BIOS 162) OR (BIOS 20202 OR BIOS 202 OR BIOS 155)) AND ((MATH 10360 OR MATH 120 OR MATH 120A OR MATH 120B OR MATH 120C OR MATH 120E OR MATH 120F OR MATH 120G OR MATH 120H) OR (MATH 10560 OR MATH 126 OR MATH 126A OR MATH 126B OR MATH 126C OR MATH 126E OR MATH 126F) OR (MATH 10860 OR MATH 166) OR (MATH 10460 OR MATH 196))

*Corequisite:* BIOS 42411

Basic principles of statistical analysis and their application to biological problems, including statistical inference, analysis of variance, regression, non-parametric approaches, and introduction to statistical computing. This course's "lab" is a tutorial; it does not fulfill the laboratory elective requirement (after 1993). Students may not take both BIOS 40411 and MATH 20340. Spring.

### **BIOS 40415. Medical and Veterinary Parasitology**

(3-0-3) Adams

*Prerequisite:* (BIOS 10156 OR BIOS 156) OR (BIOS 10162 OR BIOS 162) OR (BIOS 20202 OR BIOS 202)

The animal parasites of humans and related hosts are reviewed. The pathology caused by these parasites, epidemiology, life cycles, and prophylactic and therapeutic control are considered. Spring.

### **BIOS 40416. Virology**

(3-0-3) Fraser

*Prerequisites:* (BIOS 20250 OR BIOS 250 OR BIOS 20303 OR BIOS 303) AND (BIOS 20241 OR BIOS 241 OR BIOS 30341 OR BIOS 341) AND (BIOS 21250 OR BIOS 250L) AND (BIOS 31341 OR BIOS 341 OR BIOS 27241 OR BIOS 241R)

A study of viruses as primitive biological entities and as disease-inducing agents in humans and other animals: characteristics of viruses and virus infections; molecular aspects of virus replication; methods for diagnosis and prevention of infections; artificial use of viruses. Spring.

### **BIOS 40417. Human Musculoskeletal Anatomy**

(3-0-3) O'Malley

*Prerequisites:* ((BIOS 10155 OR BIOS 155) AND (BIOS 10156 OR BIOS 156)) OR ((BIOS 10161 OR BIOS 161) AND (BIOS 10162 OR BIOS 162)) OR (BIOS 20201 OR BIOS 201) AND (BIOS 20202 OR BIOS 202))

An introduction to basic anatomical principles relating to bones and muscles and to the normal anatomical and biochemical aspects of the human musculoskeletal system. Fall.

### **BIOS 40419. Immunology**

(3-0-3) McDowell

*Prerequisites:* (BIOS 10155 OR BIOS 155 OR BIOS 10161 OR BIOS 161 OR BIOS 20201 OR BIOS 201) AND (BIOS 10156 OR BIOS 156 OR BIOS

10162 OR BIOS 162 OR BIOS 20202 OR BIOS 202) AND (BIOS 20250 OR BIOS 250 OR BIOS 20303 OR BIOS 30303 OR BIOS 303) AND (BIOS 20241 OR BIOS 241 OR BIOS 30341 OR BIOS 341)

An introductory course emphasizing the cells and tissues of the immune system and the nature and function of antigens and antibodies. A survey is presented of immune capabilities of humans and animals, immune diseases, immunodeficiency states, transplantation of organs, and the influence of nutrition on the immune system. Fall.

#### **BIOS 40424. Tumor Cell Biology**

(3-0-3)

*Prerequisites:* ((BIOS 10155 OR BIOS 155) OR (BIOS 10156 OR BIOS 156) OR (BIOS 20201 OR BIOS 201) OR (BIOS 10161 OR BIOS 161) OR (BIOS 10162 OR BIOS 162)) AND ((BIOS 20250 OR BIOS 250) OR (BIOS 20303 OR BIOS 303)) AND ((BIOS 20241 OR BIOS 241) OR (BIOS 30341 OR BIOS 341))

Overview of the cancer development process at the cellular and molecular level, including regulatory networks involved in growth control and tissue organization and an introduction to animal, cell, and molecular techniques for studying progression, treatment, and prevention of cancer. Spring.

#### **BIOS 40435. Cellular and Molecular Basis of Human Disease**

(3-0-3) Schorey

*Prerequisites:* ((BIOS 10155 OR BIOS 155) OR (BIOS 10156 OR BIOS 156) OR (BIOS 20201 OR BIOS 201) OR (BIOS 10161 OR BIOS 161) OR (BIOS 10162 OR BIOS 162)) AND ((BIOS 20241 OR BIOS 241) OR (BIOS 30341 OR BIOS 341))

This course will explore the cellular and molecular mechanisms underlying various human diseases. Following an introduction to principles of disease, lectures will focus on recent advances in cellular and molecular aspects of immune responses and inflammation, pathogenic mechanisms, and tumor cell biology (including abnormal growth regulation, invasion, and metastasis). Specific examples of human diseases will be utilized to illustrate the concepts of disease-related gene products, the use of experimental animal models, and the development of novel therapeutic strategies.

#### **BIOS 40440. AIDS**

(3-0-3) Fraser

*Prerequisites:* ((BIOS 10155 OR BIOS 155) AND (BIOS 10156 OR BIOS 156)) OR ((BIOS 10161 OR BIOS 161) AND (BIOS 10162 OR BIOS 162)) OR ((BIOS 20201 OR BIOS 201) AND (BIOS 20202 OR BIOS 202)) AND ((BIOS 20241 OR BIOS 241) AND (BIOS 27241 OR BIOS 241R)) OR ((BIOS 30341 OR BIOS 341) AND (BIOS 31341 OR BIOS 341L)) AND ((BIOS 20250 OR BIOS 250) AND (BIOS 21250 OR BIOS 250L)) OR ((BIOS 20303 OR BIOS 303) AND (BIOS 21303 OR BIOS 303L))

This course will explore the phenomenon of AIDS, including characteristics of the worldwide AIDS pandemic; the virus (HIV) itself; the immune system and HIV; and methods of diagnosis, prevention, treatment, and basic epidemiology as it relates to AIDS. This is an advanced course in infectious diseases designed for preprofessional and other interested students. Fall.

#### **BIOS 40460. Plant Ecology**

(3-0-3)

*Prerequisite:* (BIOS 30312 OR BIOS 312)

An overview of ecological principles as they relate to botanical ecosystems.

#### **BIOS 40522. GLOBES: Humans and the Global Environment—Coevolution or Mutual Destruction**

(3-0-3) Hellmann, Hollocher

The GLOBES series of courses offered each semester reflect various areas of life science relevant to multiple disciplines. Students should expect to have a different topic offered every semester under the GLOBES heading. The course is repeatable since potentially every semester the topics vary.

#### **BIOS 40562. Aquatic Insects**

(3-3-4) Hellenthal

*Prerequisite:* (BIOS 30312 OR BIOS 312) OR (BIOS 30420 OR BIOS 420)

*Corequisite:* BIOS 41562

The taxonomy and ecology of insects having aquatic stages in their life cycles.

#### **BIOS 40573. Topics in Ecology: Ecosystem Ecology**

(3-0-3) Tank

Subject matter changes depending on students' needs. Prospective subjects include systems analysis in ecology or biogeography. (On demand).

#### **BIOS 41342. Developmental Biology Laboratory**

(0-3-1)

*Corequisite:* BIOS 40342

Laboratory exercises will examine the basic developmental mechanisms of animals and plants. Students may not take both BIOS 30342 and 40342 and/or 40414 because the lecture materials are very similar in the three developmental biology courses. Offered on an irregular basis.

#### **BIOS 41344. Vertebrate (Human) Physiology Laboratory**

(0-3-1)

*Prerequisites:* ((BIOS 10155 OR BIOS 155) OR (BIOS 10156 OR BIOS 156) OR (BIOS 20201 OR BIOS 201) OR (BIOS 10161 OR BIOS 161) OR (BIOS 10162 OR BIOS 162)) AND ((BIOS 30344 (MAY BE TAKEN CONCURRENTLY) OR BIOS 344))

Laboratory experience in physiology. Ideally, this laboratory is taken after students have completed the BIOS 30344 lecture. Fall.

#### **BIOS 41415. Medical and Veterinary Parasitology Laboratory**

(0-3-1)

*Corequisite:* BIOS 40415

The laboratory introduces students to the microscopic world of parasites. Extensive microscope work is needed. Spring, on demand.

#### **BIOS 41417. Anatomy Laboratory**

(0-3-1)

*Prerequisite:* (BIOS 10156 OR BIOS 156) OR (BIOS 20202 OR BIOS 202)

*Corequisite:* BIOS 40417

This lab is available by special arrangement with the instructor and is designed primarily for physical therapy intents. The focus is on musculoskeletal anatomy and should NOT be considered a substitute for a general anatomy laboratory.

#### **BIOS 41475. Laboratory Animal Science Laboratory**

(2-0-2)

*Prerequisites:* ((BIOS 10155 OR BIOS 155) OR (BIOS 10156 OR BIOS 156) OR (BIOS 20201 OR BIOS 201) OR (BIOS 10161 OR BIOS 161) OR (BIOS 10162 OR BIOS 162)) AND ((BIOS 30475 OR BIOS 475))

This course focuses on experimental techniques and methodologies in both laboratory and clinical settings. Students will divide their laboratory time between hands-on work in the animal facility and clinical experience in area veterinary clinics when possible. Enrollment is by consent of instructor only and limited to senior undergraduate pre-veterinary students, or senior biology majors whose graduate research program will require animal use at Notre Dame. Every student will be required to keep a complete notebook and develop a semester journal project or case study. Fall.

#### **BIOS 41562. Aquatic Insects Laboratory**

(0-3-0)

*Corequisite:* BIOS 40562

The taxonomy and ecology of insects having aquatic stages in their life cycles. (Spring, on demand)

#### **BIOS 42411. Biostatistics Tutorial**

(0-1-0)

*Corequisite:* BIOS 40411

The biostatistics tutorial is to be taken concurrently with the lecture. Students may not take lecture alone or the tutorial alone.

**BIOS 46497. Directed Readings**

(0-0-V)

This course provides the opportunity for independent study through readings on specific topics in biological science. Readings are chosen with the advice of the supervising instructor. Students may not register for more than three credits per semester. Only two credits per semester may be counted as BIOS elective credits by majors. Offered all semesters.

**BIOS 48498. Undergraduate Research**

(0-0-V)

Research in collaboration with members of the faculty. Evaluation of performance will be accomplished through regular discussions with the faculty member in charge of the course. Enrollment must be completed before the end of the first week each semester. Students may not register for more than three credits per semester. Only two credits per semester may be counted as BIOS elective credits by majors. Offered all semesters.

**BIOS 50543. Ethics and Science**

(3-0-3)

Use of four ethical theories and five classical logical/analytical criteria to ethically evaluate case studies in contemporary science. Problems analyzed via contemporary science include practical issues of plagiarism, attribution, peer reviewing, data sharing, data ownership, collaborative science, scientific misconduct, paternalism, whistleblowing, conflicts of interest, secrecy in science, and advocacy in science. Methodological issues to be dealt with include scientists misrepresenting their opinions with confirmed science, cooking and trimming their data, failure to attend to the purposes for which their research may be used or misused, and scientists' use of evaluative presuppositions, questionable inferences and default rules, question-begging validation and benchmarking, and misleading statistics. On demand.

**BIOS 50544. Environmental Justice**

(3-0-3) Shrader-Frechette

This course will survey environmental impact assessment (EIA), ecological risk assessment (ERA), and human-health risk assessment (HHRA); ethical and methodological issues related to these techniques; then apply these techniques to contemporary assessments for which state and federal governments are seeking comments by scientists and citizens.

**BIOS 50545. Bio-Medical Ethics and Public Health Risk**

(3-0-3) Shrader-Frechette

The course will survey ethical and scientific issues associated with current public health problems such as pollution-induced cancers, occupational injury and death, and inadequate emphasis on disease prevention, nutrition, and environmental health. This course does not count as science credit for College of Science undergraduate majors. Cross-listed with PHIL 43708.

**Department of Chemistry and Biochemistry****CHEM 10101. Foundations of Chemistry**

(3-0-3)

This course covers forms, properties, and separation of matter; atomic structure, and periodicity; nuclear chemistry; chemical bonding and structure; reactivity with applications to acid-base and oxidation-reduction reactions; and chemistry of carbon and living systems. This course is not open to students who have taken 10115, 10113, 10117, 10171, or 10181.

**CHEM 10102. Chemistry, Environment, and Energy**

(3-0-3)

Chemistry of the atmosphere, hydrosphere, and lithosphere; agricultural chemistry and pesticides; food and drugs; hazardous and solid wastes; and recycling. Fossil fuels; nuclear, solar, geothermal, and other types of energy. This course is not open to students who have taken CHEM 10114, 10116, 10118, 10171, or 10181.

**CHEM 10122. General Chemistry: Fundamental Principles and Biological Processes**

(3-0-3)

*Prerequisite:* (CHEM 10121 OR CHEM 121)

This one-semester course (taught in spring semester) completes the year-long general chemistry sequence for most engineering students. Fundamental principles of chemistry are woven into key themes of modern biology, including protein structure and function, gene structure and manipulation, and the basics of biotechnology. Emphasis is placed on common themes rather than biological details, and examples are drawn from biological systems of interest to engineers.

**CHEM 10171. Introduction to Chemical Principles**

(4-0-4)

This one-semester course, offered in the fall, provides a thorough grounding in the fundamental principles governing chemical structure and reactivity. It is accompanied by laboratory work and by a tutorial section. Topics to be discussed include the quantum mechanical structure of atoms, models of chemical bonding, chemical equilibrium, acidity and basicity, and thermochemistry and thermodynamics. Recommended for students in the College of Engineering, College of Science, and for all preprofessional students.

**CHEM 10172. Organic Structure and Reactivity**

(4-0-4)

This class, taught in spring, is the first semester of a two-semester organic chemistry sequence intended for students in biological sciences, chemical engineering, and preprofessional studies. It is accompanied by laboratory work and by a tutorial section. The course provides a solid foundation in organic structure and bonding, spectroscopy, and Lewis acid/base reactions. These concepts are then applied to understand substitution and elimination reactions, with a focus on mechanism and factors governing selectivity.

**CHEM 10181. Introduction to Chemical Principles**

(4-0-4)

*Corequisite:* CHEM 11181. CHEM 12181. MATH 10550

This course provides a thorough grounding in the fundamental principles governing chemical structure and reactivity. Topics to be discussed include the quantum mechanical structure of atoms, models of chemical bonding, chemical equilibrium, acidity and basicity, and thermochemistry and thermodynamics. Recommended for students with a special interest in the subject, especially those intending to major in chemistry or biochemistry. Lectures will be supplemented with a weekly tutorial session. In the weekly tutorials, students work in small groups at solving problems collaboratively.

**CHEM 10182. Organic Structure and Mechanism**

(3-0-3)

*Prerequisite:* CHEM 10181*Corequisite:* CHEM 11182. CHEM 12182

Basic principles of organic chemistry, including fundamental aspects of organic and biological structures and bonding, stereochemistry, the effect of structure

on physical and chemical properties, and applications of spectroscopic methods to assign structures. A detailed analysis of organic chemical reactivity, including reactive intermediates and mechanistic principles. Introductory applications of reactions in synthesis. Intended primarily for chemistry and biochemistry majors. Lectures will be supplemented with a weekly tutorial session. In the weekly tutorials, students work in small groups at solving problems collaboratively.

**CHEM 11121. General Chemistry I Laboratory**  
(0-0-0)

*Corequisite:* CHEM 10121, CHEM 12121

This lab accompanies CHEM 10121 lecture course.

**CHEM 11171. Chemical Principles Laboratory**  
(0-0-0)

Experimental work to accompany CHEM 10171.

**CHEM 11172. Structure and Reactivity Laboratory**  
(0-0-0)

Experimental work to accompany CHEM 10172.

**CHEM 11181. Introduction to Chemical Principles Laboratory**  
(0-0-0)

*Corequisite:* CHEM 10181, CHEM 12181

A laboratory to accompany CHEM 10181 that will stress quantitative measurements.

**CHEM 11182. Organic Structure and Mechanism Laboratory**  
(0-3-1)

*Corequisite:* CHEM 10182

A laboratory to accompany CHEM 10182 that will emphasize fundamental organic techniques.

**CHEM 12171. Introduction to Chemical Principles Tutorial**  
(0-0-0)

Tutorial section to accompany CHEM 10171. Focuses on problem solving in small groups.

**CHEM 12172. Structure and Reactivity Tutorial**  
(0-0-0)

Tutorial section to accompany CHEM 10172. Focuses on problem solving in small groups.

**CHEM 12181. Introduction to Chemical Principles Tutorial**  
(0-0-0)

*Corequisite:* CHEM 10181, CHEM 11181

Tutorial course that accompanies CHEM 10181.

**CHEM 12182. Organic Structure and Mechanism Tutorial**  
(0-0-0)

*Corequisite:* CHEM 10182

Tutorial that accompanies CHEM 10182.

**CHEM 20204. Environmental Chemistry**  
(3-0-3)

Discussion of basic chemical processes occurring in the environment, particularly those relating to the impact of humanity's technological enterprise.

**CHEM 20223. Elementary Organic Chemistry I**  
(3-0-3)

*Prerequisite:* (CHEM 10114 OR CHEM 114) OR (CHEM 10116 OR CHEM 116) OR (CHEM 10118 OR CHEM 118) OR (CHEM 10126 OR CHEM 126) OR (CHEM 10121 OR CHEM 121)

*Corequisite:* CHEM 21223

Elements and principles of organic chemistry, with emphasis on structure-reactivity relationships. This is the first semester of a two-semester course in organic chemistry intended for all students in the College of Science, chemical engineering students, and preprofessional students. Coverage begins with basic principles of

physical organic chemistry, including organic bonding and structure, stereochemistry, conformational analysis, and spectroscopy. A survey of organic chemical reactivity follows with a focus on reactive intermediates and reaction mechanisms; substitution, elimination, and addition reactions are the focus.

**CHEM 20273. Organic Reactions and Applications**  
(3-0-3)

*Prerequisite:* CHEM 10171 OR CHEM 10181

*Corequisite:* CHEM 21273

A second semester covering the basic principles of organic chemistry, including structures, bonding, physical and chemical properties, reactive intermediates, and reaction mechanisms. Additional emphasis on applications of reactions in synthesis and relationships to biochemical systems and other associated areas of current interest. Intended primarily for chemistry and biochemistry majors. Intended for students in BIOS, CHEG, and PHYS studies.

**CHEM 20274. Advanced General Chemistry: Chemistry Across the Periodic Table**  
(3-0-3)

*Prerequisite:* CHEM 20273 OR CHEM 20283

*Corequisite:* CHEM 21274

Advanced general chemistry course which completes the 2-year chemistry sequence for students in the College of Science, Chemical Engineers, and preprofessional students. Extends principles of chemistry with an in-depth look at the periodic table and an emphasis on bioinorganic chemistry. Topics include bonding across the periodic table, chemistry of the s- and p-block elements, d-block elements and coordination chemistry, and kinetics, catalysis, and redox/electrochemistry with applications to biological systems.

**CHEM 20283. Organic Reactions and Applications**  
(3-0-3)

*Prerequisite:* (CHEM 10182) OR (CHEM 20223 OR CHEM 223) OR (CHEM 20235 OR CHEM 235) OR (CHEM 20247 OR CHEM 247)

*Corequisite:* CHEM 21283

A second semester covering the basic principles of organic chemistry, including structures, bonding, physical and chemical properties, reactive intermediates, and reaction mechanisms. Additional emphasis on applications of reactions in synthesis and relationships to biochemical systems and other associated areas of current interest. Intended primarily for chemistry and biochemistry majors.

**CHEM 20284. Chemistry Across the Periodic Table**  
(3-0-3)

*Prerequisite:* CHEM 20283

*Corequisite:* CHEM 21284

This course will extend general principles with an in-depth view of the rest of the periodic table. Topics covered include bonding across the periodic table, chemistry of the s- and p-blocks, d-block, and coordination chemistry, as well as chemical reactivity, kinetics, catalysis, and redox/electrochemistry.

**CHEM 21223. Elementary Organic Chemistry Laboratory I**  
(0-3-1)

*Corequisite:* CHEM 20223

Introduction to organic laboratory techniques and reactions.

**CHEM 21273. Reactions and Applications Laboratory**  
(0-0-0)

*Corequisite:* CHEM 20273

Experiments to accompany CHEM 20273

**CHEM 21274. Across the Periodic Table Laboratory**  
(0-0-0)

*Corequisite:* CHEM 20274

Experiments to accompany CHEM 20274.

**CHEM 21283. Organic Reactions and Applications Laboratory**  
(0-3-1)

*Corequisite:* CHEM 20283

A laboratory to accompany CHEM 20283 that will emphasize organic techniques and synthesis.

**CHEM 21284. Chemistry Across the Periodic Table Laboratory**

(0-6-2)

*Corequisite:* CHEM 20284

Advanced integration of several techniques, including multi-step organic and inorganic synthesis, measurement of properties of inorganic compounds, and studies of chemical reactivity using methods discussed in lecture.

**CHEM 23201. Chemistry Seminar**

(1-0-1)

To be taken either semester of the sophomore through senior years. Introduction to the communication of scientific knowledge.

**CHEM 23202. Chemistry Seminar**

(1-0-1)

To be taken either semester of the sophomore through senior years. Introduction to the communication of scientific knowledge.

**CHEM 23212. Biochemistry Seminar**

(1-0-0)

A zero-credit seminar course offered in the fall term for sophomore biochemistry majors only. The seminar seeks to acquaint the biochemistry majors with (1) the biochemistry faculty members; (2) the types of research programs in biochemistry that are being carried out in the department; and (3) some general biochemistry concepts. Each meeting will be conducted by a different member of the biochemistry faculty.

**CHEM 30321. Physical Chemistry I**

(3-0-3)

*Prerequisites:* ((MATH 10560 OR MATH 126 OR MATH 126A OR MATH 126B OR MATH 126C OR MATH 126E OR MATH 126F) OR (MATH 10850 OR MATH 165 OR MATH 20550)) AND ((PHYS 30220 OR PHYS 222 OR PHYS 10320) OR (PHYS 20330 OR PHYS 231 OR CHEM 20262))

A rigorous course in the fundamentals of physical chemistry, including chemical thermodynamics, kinetics, quantum mechanics, and the elements of atomic and molecular structure.

**CHEM 30322. Physical Chemistry II**

(3-0-3)

*Prerequisite:* (CHEM 30321 OR CHEM 321)

For science majors only. Second semester of Physical Chemistry. A rigorous course in the fundamentals of physical chemistry, including chemical thermodynamics, kinetics, quantum mechanics, and the elements of atomic and molecular structure.

**CHEM 30324. Physical Chemistry for Engineers**

(3-0-3)

*Prerequisite:* ((CHEM 10114 OR CHEM 114) OR (CHEM 10116 OR CHEM 116 OR CHEM 10121 OR CHEM 10171 OR CHEM 10181) OR (CHEM 10118 OR CHEM 118) OR (CHEM 10122 OR CHEM 122) OR (CHEM 10126 OR CHEM 126)) AND ((PHYS 10320 OR PHYS 132))

A course in the fundamentals of physical chemistry, emphasizing theoretical and experimental aspects of reaction kinetics, an introduction to quantum theory, and a critical appreciation of the nature of the chemical bond. The course also explores how spectroscopic techniques allow us to gain insight into the structure and properties of molecules.

**CHEM 30331. Chemistry in Service of the Community**

(1-0-1)

*Prerequisite:* CHEM 30333 (MAY BE TAKEN CONCURRENTLY) OR CHEM 333)

Addressing the problem of lead contamination in the community, students will visit area homes and collect paint, dust, and soil samples. After analyzing these samples in CHEM 31333, students will help homeowners reduce the health risks associated with exposing young children to lead.

**CHEM 30333. Analytical Chemistry I**

(3-0-3)

*Prerequisite:* (CHEM 20223 OR CHEM 20247 OR CHEM 10182 OR CHEM 10172)

*Corequisite:* CHEM 31333

Introduction to the principles, theory, and applications of analytical chemistry. Course covers modern methods for separation of mixtures, quantitative and qualitative analysis, and trace analysis.

**CHEM 30337. Physical Chemistry for the Life Sciences**

(3-0-3)

Introduction to the fundamental principles of physical chemistry with application to modern biological problems. Emphases will include classical and statistical thermodynamics and a survey of biological spectroscopy.

**CHEM 30341. Fundamentals of Biochemistry**

(3-0-3)

*Prerequisite:* (CHEM 20236 OR CHEM 236) OR (CHEM 20248 OR CHEM 248) OR (CHEM 20283 OR CHEM 20273)

*Corequisite:* CHEM 31341

This course is offered for undergraduate biochemistry majors and is generally taken in the junior year. The course covers the basic chemical and physical principles of the primary biomolecules: protein, carbohydrates, lipids, and nucleic acids. The structures and properties of these molecules and their relevance to biological processes will be integrated.

**CHEM 30342. Intermediary Metabolism**

(3-0-3)

*Prerequisite:* (CHEM 30341 OR CHEM 341)

This course is offered for undergraduate biochemistry majors. The course is a study of the major metabolic processes involving energy storage and utilization, emphasizing the relationships between biomolecular structure and metabolic function. Throughput, regulation, and integration of pathways are presented.

**CHEM 31321. Physical Chemistry Laboratory I**

(0-3-1)

*Prerequisite:* (PHYS 30220 OR PHYS 222) OR (PHYS 20330 OR PHYS 231)

*Corequisite:* CHEM 30321

A course in the experimental aspects of physical chemistry using modern techniques of measurement. The first semester emphasizes thermodynamic and kinetic measurements. The second semester emphasizes spectroscopic measurements, including electronic, infrared, Raman and nuclear magnetic resonance spectroscopies, and measurements in reaction dynamics.

**CHEM 31322. Physical Chemistry Laboratory II**

(0-3-1)

*Prerequisite:* (CHEM 31321 OR CHEM 321L)

*Corequisite:* CHEM 30322

A course in the experimental aspects of physical chemistry, using modern techniques of measurement. The first semester emphasizes thermodynamic and kinetic measurements. The second semester emphasizes spectroscopic measurements, including electronic, infrared, Raman and nuclear magnetic resonance spectroscopies, and measurements in reaction dynamics.

**CHEM 31333. Analytical Chemistry Laboratory**

(1-0-1)

*Corequisite:* CHEM 30333

A laboratory course in the techniques of analytical chemistry.

**CHEM 31341. Fundamentals of Biochemistry Laboratory**

(0-6-2)

*Corequisite:* CHEM 30341

This course is designed to let students explore some of the many techniques that are utilized in characterizing proteins, lipids, carbohydrates, and nucleic acids. It exposes students to many modern biochemical and instrumental methods for

elucidating the structural and functional properties of these important types of molecules. Biochemistry majors only.

### **CHEM 40420. Principles of Biochemistry**

(3-0-3)

*Prerequisite:* (CHEM 20224 OR CHEM 20283 OR CHEM 20273 OR CHEM 224) OR (CHEM 20236 OR CHEM 236) OR (CHEM 20248 OR CHEM 248) A general treatment of the various areas of modern biochemistry including protein structure and function, bioenergetics, molecular basis of genetic and developmental processes, cellular mechanisms, and intermediary metabolism. Fall and spring.

### **CHEM 40434. Physical Methods of Chemistry**

(3-0-3)

*Prerequisite:* (CHEM 20236 OR CHEM 236) OR (CHEM 20248 OR CHEM 248) OR (CHEM 224 OR CHEM 20224 OR CHEM 20283 OR CHEM 283) A course in molecular structure examined through the theory and interpretation of spectra. The focus is on infrared spectroscopy, mass spectrometry, nuclear magnetic resonance spectroscopy, and X-ray crystallography, with exposure to other techniques such as two-dimensional NMR, Raman spectroscopy, optical spectroscopy, and electron spin resonance. Spring.

### **CHEM 40443. Inorganic Chemistry**

(3-0-3)

*Prerequisites:* (CHEM 20243 OR CHEM 20284 OR CHEM 20274 OR CHEM 243) AND (CHEM 30322 OR CHEM 322)

Group Theory, Molecular Orbital Theory, structure, and spectroscopy are used as vehicles for the introduction of molecules from inorganic, organometallic, solid state, and organic chemistry. Fall.

### **CHEM 41443. Advanced Inorganic Chemistry Laboratory**

(0-6-2)

*Prerequisite:* (CHEM 40443 OR CHEM 443)

The preparation of main group inorganic, coordination, and organometallic compounds, including air-sensitive manipulations and the use of vacuum-line techniques. Characterization of inorganic compounds by spectroscopic and electrochemical methods. Fall.

### **CHEM 46497. Directed Readings**

(V-0-V)

In-depth study of topics not covered or only briefly covered in other courses. Readings, problems, and reports.

### **CHEM 48498. Undergraduate Research**

(0-V-V)

Research in collaboration with members of the faculty. A written progress report must be submitted each semester, and all participating students must make an oral presentation of their work in the spring semester of senior year.

### **CHEM 50531. Molecular Biology I**

(3-0-3)

The first of a two-semester sequence that provides an introduction to molecular biology, molecular genetics, and nucleic acid biochemistry. Topics include physical chemistry of nucleic acids, bacterial genetics, principles of cloning, DNA replication and recombination, prokaryotic and eukaryotic transcription, and RNA processing and translation. Listed also as BIOS 60531. Fall.

### **CHEM 50532. Molecular Biology II**

(3-0-3)

*Prerequisite:* (BIOS 60531 OR BIOS 531) OR (CHEM 50531 OR CHEM 531)

The second semester of the sequence. Lecture topics include yeast genetics and molecular biology; retroviruses and transposable elements; transgenic mice; and special topics covering cell cycle regulation, oncogenes, development in *Drosophila*, signal transduction, and cloning of human disease genes. Listed also as BIOS 60532. Spring.

## **Department of Mathematics**

### **MATH 10005. Processes of Mathematical Thought**

(3-0-3)

For students in arts and letters or business administration. A study of mathematical thought as an analytical tool to solve real-life problems. The class is divided into teams, each analyzing a topic from such areas as commercial games, consensus within diversity, governmental economic planning, and chaos theory. Teams will present their findings in a seminar format.

### **MATH 10015. Mathematical Way of Thinking**

(3-1-3)

Topics in undergraduate mathematics.

### **MATH 10110. Principles of Finite Mathematics**

(3-0-3) Hoehn

For students in arts and letters. For first-year students who lack the necessary background for MATH 10120. Students who take this course cannot also take MATH 10120. Topics include the fundamental principles of counting systematically, probability, statistics, linear programming, optimization problems, game theory and mathematical finance, population problems, and coding information. There is a wealth of applications of these topics to contemporary social, economic, and political issues appealing to liberal arts students. Also, these topics broaden a student's mathematical horizon in an interesting direction not covered by calculus, which deals mostly with continuous models.

### **MATH 10120. Finite Mathematics**

(3-0-3) Pilkington

For students in arts and letters or as an elective for students in business administration. Topics include the fundamental principles of counting systematically, probability, statistics, linear programming, optimization problems, game theory, and mathematical finance. Other topics that may be covered include population problems, difference equations and modeling, and coding information. There is a wealth of applications of these topics to contemporary social, economic, and political issues appealing to liberal arts students. Also, these topics broaden a student's mathematical horizon in an interesting direction not covered by calculus, which deals mostly with continuous models.

### **MATH 10130. Beginning Logic**

(3-0-3) Porter

For students in arts and letters. Provides the students with some formal tools for analyzing arguments. By writing proofs in a formal system, students see the importance of stating the basic premises in an argument and giving intermediate steps that lead to the conclusion. They learn strategies for thinking up proofs. They see that proof checking is, in principle, something that a machine could do. Students learn truth tables and see an effective procedure that they could apply to any argument stated in propositional logic, to determine whether the conclusion follows logically from the premises. There is nothing like truth tables for predicate logic. Students get to experience doing what mathematicians do, trying to determine whether a particular conclusion follows from some premises by searching simultaneously for a proof or a counterexample. Writing papers gives students an opportunity to explore other topics in logic of their interest.

### **MATH 10140. Elements of Statistics**

(3-0-3) Pilkington

This course is aimed to those students who may or may not plan to use statistics in their chosen careers, but wish nevertheless to become informed and astute consumers. Topics include statistical decision making, sampling, data representation, random variables, least-square regression lines, elementary probability theory, conditional probabilities, independence, and Bayes' rule. The methodology will focus on a "hands-on" approach, with use of computer simulation and representation. Concepts and terminology will be introduced only after thorough exposure to situations that necessitate the concepts and terms. Care will be exercised to select a variety of situations from the many fields where statistics are used in modern society. Examples will be taken from biology and medicine (e.g., drug testing, wild animal counts), the social sciences, psychology, and economics.

**MATH 10240. Principles of Calculus**

(3-0-3)

For students in arts and letters. Note: Credit is not given for both this course and any other calculus course. A terminal course introducing the principles of calculus. Topics include basic properties of functions, derivatives, and integrals, with interesting real-life applications throughout. This course is not intended to prepare students for more advanced work in calculus.

**MATH 10250. Elements of Calculus I**

(3-0-3) Migliore

For students in arts and letters, architecture, or business. A study of basic calculus as part of a liberal education. It emphasizes conceptual learning and stresses the connections between mathematics and modern society. Topics include functions, limits, derivatives, and an introduction to integral, with interesting real-life applications throughout. Students are familiarized with the many different interpretations of the derivative as a rate of change, and the integral as a total rate of change. This enables them to learn and practice modeling in a variety of situations, from economics to the social and the life sciences.

**MATH 10260. Elements of Calculus II for Business**

(3-0-3) Lim

*Prerequisite:* (MATH 10250 OR MATH 105) OR (MATH 10350 OR MATH 119 OR MATH 119A OR MATH 119B OR MATH 119C OR MATH 119E OR MATH 119F OR MATH 119G) OR (MATH 10550 OR MATH 125 OR MATH 125A OR MATH 125B OR MATH 125C OR MATH 125E OR MATH 125F) OR (MATH 10850 OR MATH 165)

Credit is not given for both MATH 10280 and either of the following courses: MATH 10260 or MATH 10360. For students in business. An introduction to mathematical concepts, techniques, and ideas that are useful in understanding and solving problems that arise in economics and business. Most mathematical concepts are introduced through interesting business problems. Furthermore, by using available computer technology, real-life problems that may lead to non-trivial computations and graphics, are considered. Topics include integration, differential equations, Taylor polynomial approximations, unconstrained and constrained optimization for functions of several variables, probability, and statistics, with interesting real-life applications throughout.

**MATH 10270. Mathematics in Architecture and Art**

(3-0-3) Pilkington

*Prerequisite:* (MATH 10250 OR MATH 105) OR (MATH 10550 OR MATH 125 OR MATH 125A OR MATH 125B OR MATH 125C OR MATH 125E OR MATH 125F) OR (MATH 10850 OR MATH 165)

A second mathematics course for arts and letters and architecture students. The course shows typical mathematical strategies in action in the following topics: Greek geometry, from Fibonacci to Phi to the golden spiral; symmetry and proportion in architecture (from Vitruvius to Le Corbusier); review of calculus (from derivatives to the fundamental theorem); elementary calculus of bridges (suspension bridge and Calatrava's Alamillo bridge); linear algebra and geometry in the plane; the complex plane; fractals in mathematics; and architecture.

**MATH 10350. Calculus A**

(3-1-4) Hu

*Corequisite:* MATH 12350

Primarily for students in science whose programs require a one-year terminal course in calculus of one variable but also open to students in arts and letters. Topics include sets, functions, limits, continuity, derivatives, integrals, and applications.

**MATH 10360. Calculus B**

(3-1-4) Dyer

*Prerequisite:* (MATH 10350 OR MATH 119 OR MATH 119A OR MATH 119B OR MATH 119C OR MATH 119E OR MATH 119F OR MATH 119G) OR (MATH 10550 OR MATH 125 OR MATH 125A OR MATH 125B OR MATH 125C OR MATH 125E OR MATH 125F) OR (MATH 10850 OR MATH 165)  
*Corequisite:* MATH 12360

Primarily for students in science whose programs require a one-year terminal course in calculus of one variable but also open to students in arts and letters. Topics include sets, functions, limits, continuity, derivatives, integrals, and applications.

**MATH 10450. Honors Mathematics I**

(4-0-4) Nicolaescu,

*Corequisite:* MATH 12450

A survey of several mathematical topics, emphasizing the relevance of mathematics to many diverse areas of study. Calculus is also studied at the level of MATH 10350–10360.

**MATH 10460. Honors Mathematics II**

(4-0-4) Hahn

*Prerequisite:* (MATH 10450 OR MATH 195)*Corequisite:* MATH 12460

A survey of several mathematical topics, emphasizing the relevance of mathematics to many diverse areas of study. Calculus is also studied at the level of MATH 10350–10360.

**MATH 10550. Calculus I**

(3-1-4) Han

*Corequisite:* MATH 12550

For students in science and engineering. Topics include sets, functions, limits, continuity, derivatives, integrals, and applications. Also covered are transcendental functions and their inverses, infinite sequences and series, parameterized curves in the plane, and polar coordinates.

**MATH 10560. Calculus II**

(3-1-4) Snow

*Prerequisite:* (MATH 10550 OR MATH 125 OR MATH 125A OR MATH 125B OR MATH 125C OR MATH 125E OR MATH 125F) OR (MATH 10850 OR MATH 165)

*Corequisite:* MATH 12560

For students in science and engineering. Topics include sets, functions, limits, continuity, derivatives, integrals, and applications. Also covered are transcendental functions and their inverses, infinite sequences and series, parameterized curves in the plane, and polar coordinates.

**MATH 10850. Honors Calculus I**

(4-0-4) Polini

*Corequisite:* MATH 12850

Required of honors mathematics majors. A rigorous course in differential and integral calculus of one variable. Topics include an axiomatic formulation of the real numbers, mathematical induction, infima and suprema, functions, continuity, derivatives, integrals, infinite sequences and series, transcendental functions and their inverses, and applications. The course stresses careful mathematical definitions and emphasizes the proofs of the standard theorems of the subject.

**MATH 10860. Honors Calculus II**

(4-0-4) Ponto

*Prerequisite:* (MATH 10850 OR MATH 165)*Corequisite:* MATH 12860

Required of honors mathematics majors. A rigorous course in differential and integral calculus of one variable. Topics include an axiomatic formulation of the real numbers, mathematical induction, infima and suprema, functions, continuity, derivatives, integrals, infinite sequences and series, transcendental functions and their inverses, and applications. The course stresses careful mathematical definitions and emphasizes the proofs of the standard theorems of the subject.

**MATH 12350. Calculus A Tutorial**

(0-1-0)

*Corequisite:* MATH 10350

Perfecting problem-solving skills in smaller group settings.

**MATH 12360. Calculus B Tutorial**

(0-1-0)

*Corequisite:* MATH 10360

Perfecting problem-solving skills in smaller group settings.

**MATH 12450. Honors Mathematics Tutorial**

(0-1-0)

*Corequisite:* MATH 10450

Perfecting problem-solving skills in smaller group settings.

**MATH 12460. Honors Mathematics II Tutorial**

(0-1-0)

*Corequisite:* MATH 10460

Perfecting problem-solving skills in smaller group settings.

**MATH 12550. Calculus I Tutorial**

(0-1-0)

*Corequisite:* MATH 10550

Perfecting problem-solving skills in smaller group settings.

**MATH 12560. Calculus II Tutorial**

(0-1-0)

*Corequisite:* MATH 10560

Perfecting problem-solving skills in smaller group settings.

**MATH 12850. Honors Calculus I Tutorial**

(0-1-0)

*Corequisite:* MATH 10850

Perfecting problem-solving skills in smaller group settings.

**MATH 12860. Honors Calculus II Tutorial**

(0-1-0)

*Corequisite:* MATH 10860

Perfecting problem-solving skills in smaller group settings.

**MATH 13150. First-Year Math Seminar**

(3-0-3) Evens

The goal of this new course is to give students a panoramic view of mathematics by considering a variety of topics displaying its enormous power and beauty. It aspires to present the first-year students with an opportunity to participate in the excitement of discovering ideas of their own by practicing the mathematical way of thinking. This topical course will be rich in content and context. It will stress the connections between mathematics and modern society by considering a wide variety of problems ranging from environmental and economic issues to social and political situations that can be modeled and solved by mathematical means. Also, by giving appropriate assignments and projects, it will allow students to make contributions in areas of their interest and expertise. "The Magic of Numbers" is the first theme of this seminar course.

**MATH 20210. Computer Programming and Problem Solving**

(3-0-3) Taylor

*Prerequisite:* (MATH 20610 OR MATH 221) OR (MATH 20580 OR MATH 228)

An introduction to solving mathematical problems using computer programming in high-level languages such as C

**MATH 20340. Statistics for the Life Sciences**

(3-0-3) Margolin

*Prerequisite:* (MATH 10360 OR MATH 120 OR MATH 120A OR MATH 120B OR MATH 120C OR MATH 120E OR MATH 120F OR MATH 120G OR MATH 120H) OR (MATH 10560 OR MATH 126 OR MATH 126A OR MATH 126B OR MATH 126C OR MATH 126E OR MATH 126F)

An introduction to the principles of statistical inference following a brief introduction to probability theory. This course does not count as a science or mathematics elective for mathematics majors. NOTE: Students may not take both BIOS 40411

(411) and MATH 20340 (214). Not open to students who have taken MATH 30540 (324).

**MATH 20550. Calculus III**

(3-1-3.5) Cao

*Prerequisite:* (MATH 10560 OR MATH 126 OR MATH 126A OR MATH 126B OR MATH 126C OR MATH 126E OR MATH 126F) OR (MATH 10860 OR MATH 166)*Corequisite:* MATH 22550

A comprehensive treatment of differential and integral calculus of several variables. Topics include space curves, surfaces, functions of several variables, partial derivatives, multiple integrals, line integrals, surface integrals, Stokes theorem, and applications.

**MATH 20570. Mathematical Methods in Physics I**

(3-0-3.5)

*Prerequisite:* (MATH 10560 OR MATH 10860 OR MATH 126 OR MATH 126A OR MATH 126B OR MATH 126C OR MATH 126E OR MATH 126F)*Corequisite:* MATH 22570

A study of methods of mathematical physics. Topics include matrices, linear algebra (including matrices and determinants), vector and tensor analysis, vector calculus, curvilinear coordinates, series, ordinary differential equations, partial differential equations, orthogonal functions and vector spaces, special functions (including Bessel, Legendre, and Hermite), calculus of variations, Fourier series, and group theory. Weekly tutorial sessions. Cross-listed with PHYS 20451 (271).

**MATH 20580. Introduction to Linear Algebra and Differential Equations**

(3-1-3.5) Williams

*Prerequisite:* (MATH 20550 OR MATH 225 OR MATH 225A OR MATH 225B OR MATH 225C OR MATH 225E)*Corequisite:* MATH 22580

An introduction to linear algebra and to first- and second-order differential equations. Topics include elementary matrices, LU factorization, QR factorization, the matrix of a linear transformation, change of basis, eigenvalues and eigenvectors, solving first-order differential equations and second-order linear differential equations, and initial value problems. This course is part of a two-course sequence that continues with MATH 30650 (325). Credit is not given for both MATH 20580 (228) and MATH 20610 (221).

**MATH 20610. Linear Algebra**

(3-0-3) Xavier

Open to all students. An introduction to vector spaces, matrices, linear transformations, inner products, determinants and eigenvalues. Emphasis is given to careful mathematical definitions and understanding the basic theorems of the subject. Credit is not given for both MATH 20610 (221) and MATH 20580 (228).

**MATH 20630. Introduction to Mathematical Reasoning**

(3-0-3) Hall

This course serves as a transition to upper-level math courses. The general subject is numbers of all sorts—integers, rationals, reals, etc. The main point will be to treat everything the way a mathematician would. That is, we will give precise definitions of the objects we consider and careful statements of the assertions we make about them. And, most importantly, we will justify our assertions by giving mathematical proofs. Topics covered include basic language of sets, common methods of proof, integers, factorization, modular arithmetic, rational numbers, completeness, real numbers, cardinality, limits, and continuity.

**MATH 20670. Mathematical Methods in Physics II**

(3-0-3.5) Mach

A study of methods of mathematical physics. Topics include linear algebra (including matrices and determinants), vector and tensor analysis, vector calculus, curvilinear coordinates, series, ordinary differential equations, partial differential equations, orthogonal functions and vector spaces, special functions (including Bessel, Legendre, and Hermite), calculus of variations, Fourier series, and group theory. Weekly tutorial sessions.

**MATH 20750. Ordinary Differential Equations**

(3-1-3.5) Liu

*Corequisite:* MATH 22750

An introduction to differential equations. Topics include first-order equations,  $n$ -th order linear equations, power series methods, systems of first order linear equations, nonlinear systems, and stability. Credit is not given for both MATH 20750 (230) and MATH 30650 (325).

**MATH 20810. Honors Algebra I**

(3-0-3) Diller

A comprehensive treatment of vector spaces, linear transformations, inner products, determinants, eigenvalues, tensor and exterior algebras, spectral decompositions of finite-dimensional symmetric operators, and canonical forms of matrices. The course stresses careful mathematical definitions and emphasizes the proofs of the standard theorems of the subject.

**MATH 20820. Honors Algebra II**

(3-0-3) Diller

*Prerequisite:* (MATH 20810 OR MATH 261)

A comprehensive treatment of vector spaces, linear transformations, inner products, determinants, eigenvalues, tensor and exterior algebras, spectral decompositions of finite-dimensional symmetric operators, and canonical forms of matrices. The course stresses careful mathematical definitions and emphasizes the proofs of the standard theorems of the subject.

**MATH 20850. Honors Calculus III**

(4-0-4) Connolly

*Prerequisite:* (MATH 10860 OR MATH 166)*Corequisite:* MATH 22850

Required of honors mathematics majors. A rigorous course in differential and integral calculus of several variables. Topics include functions of several variables, the inverse function theorem, partial derivatives, multiple integrals, line integrals, surface integrals, Stokes' theorem, an introduction to ordinary differential equations, and applications. The course stresses careful mathematical definitions and emphasizes the proofs of the standard theorems of the subject.

**MATH 20860. Honors Calculus IV**

(4-0-4) Connolly

*Prerequisite:* (MATH 20850 OR MATH 265)*Corequisite:* MATH 22860

Required of honors mathematics majors. A rigorous course in differential and integral calculus of several variables. Topics include functions of several variables, the inverse function theorem, partial derivatives, multiple integrals, line integrals, surface integrals, Stokes' theorem, an introduction to ordinary differential equations, and applications. The course stresses careful mathematical definitions and emphasizes the proofs of the standard theorems of the subject.

**MATH 22550. Calculus III Tutorial**

(0-3-0)

*Corequisite:* MATH 20550

Perfecting problem-solving skills in smaller group settings.

**MATH 22570. Mathematical Methods in Physics I**

(0-1-0)

*Corequisite:* MATH 20570

Perfecting problem-solving skills in smaller group settings.

**MATH 22580. Linear Algebra and Differential Equations Tutorial**

(0-1-0)

*Corequisite:* MATH 20580

Perfecting problem-solving skills in smaller group settings.

**MATH 22670. Mathematical Methods in Physics II Tutorial**

(0-0-0)

A study of methods of mathematical physics. Topics include linear algebra (including matrices and determinants), vector and tensor analysis, vector calculus,

curvilinear coordinates, series, ordinary differential equations, partial differential equations, orthogonal functions and vector spaces, special functions (including Bessel, Legendre, and Hermite), calculus of variations, Fourier series, and group theory. Weekly tutorial sessions.

**MATH 22750. Ordinary Differential Equations Tutorial**

(0-1-0)

*Corequisite:* MATH 20750

Perfecting problem-solving skills in smaller group settings.

**MATH 22850. Honor Calculus III Tutorial**

(0-1-0)

*Corequisite:* MATH 20850

Perfecting problem-solving skills in smaller group settings.

**MATH 22860. Honors Calculus IV Tutorial**

(0-1-0)

*Corequisite:* MATH 20860

Perfecting problem-solving skills in smaller group settings.

**MATH 30210. Introduction to Operations Research**

(3-0-3)

*Prerequisite:* (MATH 20580 OR MATH 228 OR MATH 228A OR MATH 228B OR MATH 228C) OR (MATH 20610 OR MATH 221) OR (MATH 20750 OR MATH 230) OR (MATH 20810 OR MATH 261)

An introduction to linear programming, duality theory, simplex algorithm, the transportation problem, network analysis, dynamic programming, and game theory.

**MATH 30390. Introduction to Numerical Methods**

(3-0-3)

*Prerequisite:* (MATH 20210 OR MATH 211) OR (CSE 20232 OR CSE 232)

An introduction to numerical methods for solving algebraic and differential equations. Topics include numerical solution of systems of linear equations, approximating functions with polynomials and splines, solutions of nonlinear equations, numerical integration, numerical solution of ordinary differential equations, and eigenvalue problems. Some computer programming is required. Credit is not given for both MATH 30390 (318) and MATH 40390 (423).

**MATH 30440. Probability and Statistics**

(3-0-3) Gekhtman

An introduction to the theory of probability and statistics, with applications to the computer sciences and engineering. Topics include discrete and continuous random variables, joint probability distributions, the central limit theorem, point and interval estimation, and hypothesis testing.

**MATH 30530. Introduction to Probability**

(3-0-3) Hind, Stanton

*Prerequisite:* (MATH 20850 OR MATH 265) OR (MATH 20550 OR MATH 225 OR MATH 225A OR MATH 225B OR MATH 225C OR MATH 225E)

An introduction to the theory of probability, with applications to the physical sciences and engineering. Topics include discrete and continuous random variables, conditional probability and independent events, generating functions, special discrete and continuous random variables, laws of large numbers, and the central limit theorem. The course emphasizes computations with the standard distributions of probability theory and classical applications of them.

**MATH 30540. Mathematical Statistics**

(3-0-3) Williams

*Prerequisite:* (MATH 30530 OR MATH 323)

An introduction to mathematical statistics. Topics include distributions involved in random sampling, estimators and their properties, confidence intervals, hypothesis testing (including the goodness-of-fit test and contingency tables), the general linear model, and analysis of variance.

**MATH 30650. Differential Equations**

(3-0-3) Tinaglia

*Prerequisite:* (MATH 20580 OR MATH 228 OR MATH 228A OR MATH 228B OR MATH 228C)

A second course in differential equations. Topics include higher order linear equations, numerical methods, Laplace transforms, linear systems, nonlinear systems and stability, and an introduction to partial differential equations and Fourier series. Credit is not given for both MATH 20750 (230) and MATH 30650 (325).

### **MATH 30710. Algebra**

(3-0-3) Migliore

*Prerequisite:* (MATH 20630 OR MATH 223) OR (MATH 20610 OR MATH 221)

An introduction to groups, rings, and fields. Topics include permutations, divisibility, modular arithmetic, cryptography, cyclic and dihedral groups, Lagrange's theorem, homomorphisms, ideals, integral and Euclidean domains, and extension fields.

### **MATH 30745. Real Analysis I**

(3-0-3)

*Prerequisites:* (MATH 20850 OR MATH 265) AND (MATH 30705 OR MATH 222)

A precise treatment of fundamentals of differential and integral calculus. Topics include sequences, limits, continuity, differentiability, convergence of sequences of functions, infinite series, and the Riemann-Stieltjes integral. Emphasis is given to careful mathematical definitions and understanding the basic theorems of the subject.

### **MATH 30750. Real Analysis**

(3-0-3) Groves

*Prerequisite:* (MATH 20630 OR MATH 223)

A rigorous treatment of differential and integral calculus. Topics include a review of sequences and continuity, differentiability, Taylor's theorem, integration, the fundamental theorem of Calculus, pointwise and uniform convergence, and power series. Additional topics are likely and will depend on the instructor. Emphasis throughout will be on careful mathematical definitions and thorough understanding of basic results.

### **MATH 30755. Real Analysis II**

(3-0-3)

*Prerequisite:* (MATH 30745 OR MATH 335)

A precise treatment of fundamentals of differential and integral calculus. Topics include sequences, limits, continuity, differentiability, convergence of sequences of functions, infinite series, and the Riemann-Stieltjes integral. Emphasis is given to careful mathematical definitions and understanding the basic theorems of the subject.

### **MATH 30810. Honors Algebra III**

(3-0-3) Taylor

*Prerequisite:* (MATH 20820 OR MATH 262)

A comprehensive treatment of groups, polynomials, rings, homomorphisms, isomorphism theorems, field theory, and Galois theory. The course stresses careful mathematical definitions and emphasizes the proofs of the standard theorems of the subject.

### **MATH 30820. Honors Algebra IV**

(3-0-3) Taylor

*Prerequisite:* (MATH 30810 OR MATH 361)

Required of honors mathematics majors. A comprehensive treatment of groups, polynomials, rings, homomorphisms, isomorphism theorems, field theory, and Galois theory. The course stresses careful mathematical definitions and emphasizes the proofs of the standard theorems of the subject.

### **MATH 30850. Honors Analysis I**

(3-0-3) Ledrappier

*Prerequisite:* (MATH 20860 OR MATH 266)

Required of honors mathematics majors. An advanced course in mathematical analysis in one and several variables. Topics include an axiomatic formulation of

the real and complex number systems, compactness, connectedness, metric spaces, limits, continuity, infinite sequences and series, differentiation, the Riemann-Stieltjes integral, the Stone-Weierstrass theorem, the implicit function theorem, differential forms, partitions of unity, simplexes and chains, and Stokes' theorem.

### **MATH 30860. Honors Analysis II**

(3-0-3) Ledrappier

*Prerequisite:* (MATH 30850 OR MATH 365)

Required of honors mathematics majors. An advanced course in mathematical analysis in one and several variables. Topics include an axiomatic formulation of the real and complex number systems, compactness, connectedness, metric spaces, limits, continuity, infinite sequences and series, differentiation, the Riemann-Stieltjes integral, the Stone-Weierstrass theorem, the implicit function theorem, differential forms, partitions of unity, simplexes and chains, and Stokes' theorem.

### **MATH 40210. Basic Combinatorics**

(3-0-3) Wong

An introduction to the theory of combinatorics. Topics include permutations, multinomial coefficients, the theory of enumerative combinatorics, pairing problems, recurrence relations, the inclusion-exclusion principle, graph theory, algebraic coding theory, and symbolic dynamics.

### **MATH 40390. Numerical Analysis**

(3-0-3) Akai

*Prerequisite:* (MATH 20750 OR MATH 230) OR (MATH 20860 OR MATH 266) OR (MATH 30650 OR MATH 325)

An introduction to the numerical solution of ordinary and partial differential equations. Topics include the finite difference method, projection methods, cubic splines, interpolation, numerical integration methods, analysis of numerical errors, numerical linear algebra and eigenvalue problems, and continuation methods.

### **MATH 40480. Complex Variables**

(3-0-3) Snow

*Prerequisite:* (MATH 20550 OR MATH 20850 OR MATH 225 OR MATH 225A OR MATH 225B OR MATH 225C OR MATH 225D OR MATH 225E OR MATH 265)

An introduction to the theory of functions of one complex variable. Topics include analytic functions, Cauchy integral theorems, power series, Laurent series, poles and residues, applications of conformal mapping, and Schwarz-Christoffel transformations.

### **MATH 40510. Introduction to Algebraic Geometry**

(3-0-3)

*Prerequisite:* (MATH 20630 OR MATH 10860)

Algebraic geometry is the study of systems of polynomial equations and their vanishing loci. It has important components that lie in the realm of geometry, of algebra, and of computation (among others) and countless applications. This course tries to give a flavor of these different aspects of the field and how they fit together. Indeed, much of the fascination of this subject comes from the myriad ways in which arguments squarely in one realm give surprising consequences that fall squarely in a different realm.

### **MATH 40520. Number Theory**

(3-0-3) Evens

*Prerequisite:* (MATH 30705 OR MATH 222) OR (MATH 20820 OR MATH 262)

An introduction to elementary number theory. Topics include the Euclidean algorithm, congruencies, primitive roots and indices, quadratic residues, quadratic reciprocity, distribution of primes, and Waring's problem.

### **MATH 40570. Mathematical Methods in Financial Economics**

(3-0-3) Cosimano, Himonas

*Prerequisites:* ((MATH 30530 OR MATH 323) AND (MATH 20750 OR MATH 30650 OR MATH 226 OR MATH 230 OR MATH 325) AND (MATH 30750 OR MATH 30850 OR MATH 338 OR MATH 365)) OR (FIN 30700) OR (FIN 70670)

An introduction to financial economic problems using mathematical methods, including the portfolio decision of an investor and the determination of the equilibrium price of stocks in both discrete and continuous time, will be discussed. The pricing of derivative securities in continuous time including various stock and interest rate options will also be included. Projects reflecting students' interests and background are an integral part of this course.

### **MATH 40710. Computability and Logic**

(3-0-3)

*Prerequisite:* (MATH 10560 OR MATH 126 OR MATH 126A OR MATH 126B OR MATH 126C OR MATH 126D OR MATH 126E OR MATH 126F OR MATH 10860 OR MATH 166)

An introduction to formal notions of computability. Topics include finite automata, regular languages and expressions, pushdown automata, context-free grammars and languages, Turing machines, primitive recursive and  $\lambda$ -recursive functions, Church's Thesis, and absolutely unsolvable problems.

### **MATH 40720. Topics in Algebra**

(3-0-3)

*Prerequisite:* (MATH 30710 OR MATH 337) OR (MATH 30820 OR MATH 362)

Topics in algebra, number theory, and algebraic geometry.

### **MATH 40730. Mathematical Modeling**

(3-0-3) Alber

*Prerequisites:* ((MATH 20210 OR MATH 211) OR (CSE 20232 OR CSE 232)) AND ((MATH 30650 OR MATH 325) OR (MATH 20750 OR MATH 230))

Introductory course on applied mathematics methods with emphasis on modeling of physical, mechanical and biological problems in terms of differential equations and stochastic dynamical systems. Students will be working in groups on several projects and will present them in class at the end of the course.

### **MATH 40740. Topology**

(3-0-3) Stolz

*Prerequisite:* (MATH 20630 OR MATH 223)

An introduction to topology. Topics include the theory of surfaces, knot theory, and the theory of metric spaces.

### **MATH 40750. Partial Differential Equations**

(3-0-3) Han

*Prerequisite:* (MATH 20750 OR MATH 230) OR (MATH 30650 OR MATH 325) OR (MATH 30850 OR MATH 365)

An introduction to partial differential equations. Topics include Fourier series, solutions of boundary value problems for the heat equation, wave equation and Laplace's equation, Fourier transforms, and applications to solving heat, wave and Laplace's equations in unbounded domains.

### **MATH 40760. Differential Geometry**

(3-0-3) Liu

*Prerequisite:* (MATH 20750 OR MATH 230) OR (MATH 20860 OR MATH 266) OR (MATH 30650 OR MATH 325)

An introduction to differential geometry. Topics include analysis of curves and surfaces in space, the first and second fundamental forms of surfaces, torsion, curvature, and the Gauss-Bonnet theorem.

### **MATH 40960. Topics in Geometry**

(3-0-3)

*Prerequisite:* MATH 20630 OR MATH 10860

Topics in geometry or topology.

### **MATH 43900. Problem Solving in Mathematics**

(0-0-1)

The main goal of this course is to develop problem-solving strategies in mathematics.

### **MATH 46800. Directed Readings**

(V-0-V)

*Prerequisite:* Consent of director of undergraduate studies in mathematics.

### **MATH 48800. Undergraduate Research**

(V-0-V)

This course offers students the opportunity to study and do research on a topic of their interest with faculty members of Mathematics Department. It is a variable-credit-hour course, with a maximum of 4 credits per semester, arranged individually for each student. This course may be repeated for credit.

### **MATH 48844. Special Topics**

(V-0-V)

This topical course is intended for students attending international study programs. It is a variable-credit-hour course, with a maximum of 4 credits per semester, arranged individually for each student. This course may be repeated for credit.

### **MATH 48900. Thesis**

(V-0-V)

Seniors in the mathematics program have the option of writing a senior thesis on a more advanced subject than is provided in the normal undergraduate courses. A program of readings on the topic must be begun with a faculty advisor by the spring semester of the junior year.

### **MATH 50510. Computer Programming/Problem Solving**

(3-0-3) Snow

An introduction to solving mathematical problems using computer programming in high-level languages such as C.

### **MATH 50570. Mathematical Methods in Financial Economics**

(3-0-3) Cosimano

An introduction to financial economic problems using mathematical methods, including the portfolio decision of an investor and the determination of the equilibrium price of stocks in both discrete and continuous time, will be discussed. The pricing of derivative securities in continuous time including various stock and interest rate options will also be included. Projects reflecting students' interests and background are an integral part of this course.

### **MATH 50590. Foundations of Computational Mathematics**

(3-0-3)

The course is a solid theoretical introduction to numerical analysis. Topics covered include polynomial interpolation, least squares, numerical integration, numerical linear algebra, and an introduction to numerical solutions of ordinary and partial differential equations.

### **MATH 50730. Mathematical Modeling**

(3-0-3) Alber

Introductory course on applied mathematics methods with emphasis on modeling of physical, mechanical, and biological problems in terms of differential equations and stochastic dynamical systems. Students will be working in groups on several projects and will present them in class at the end of the course.

### **MATH 50780. Special Topics—Riemannian Geometry**

(3-0-3) Connolly

Differentiable Manifolds; Tangent Space; Vector Fields; Lie Bracket; One Parameter Groups; Riemannian Manifolds; Affine Connections; the Levi-Civita Connection; Lie Groups and Lie Algebras; Geodesics; the Geodesic Flow; the Curvature Tensor; Sectional Curvature; Ricci Curvature Tensor; Manifolds of Constant Curvature; Jacobi fields. The text of this course is: M. DoCarmo, *Riemannian Geometry* (Birkhauser, 1992).

### **MATH 56800. Directed Readings**

(V-0-V)

Readings not covered in the curriculum that relate to the student's area of interest.

### **MATH 58900. Thesis Direction**

(V-0-V)

Students in the Applied Mathematics Masters Program have the option of writing a thesis on an advanced subject under the direction of a faculty advisor.

## Department of Physics

### **PHYS 08699. Directed Research: Particle Physics**

(V-0-V)

Directed research course for high school students combining coverage of topics in particle physics with participation in experimental research in ongoing experiments conducted by particle physics faculty. Students maintain a research logbook and submit a written research summary at the conclusion of the research period.

### **PHYS 08798. Directed Research in Nuclear Astrophysics**

(V-0-V)

Directed research course for high school students combining coverage of topics in nuclear astrophysics with participation in experimental research in ongoing experiments conducted by nuclear astrophysics faculty. Students maintain a research logbook and submit a written research summary at the conclusion of the research period.

### **PHYS 10052. Concepts of Energy and the Environment**

(3-0-3) Garnavich

A course developing the basic ideas of energy and power and their applications. The fossil fuels are considered, together with their limitations, particularly as related to global warming, pollution, and their nonrenewable character. The advantages and disadvantages of nuclear power are studied and compared with alternative energy sources such as solar energy, wind, and geothermal and hydroelectric power. Various aspects of energy storage and energy conservation are also considered. This course is designed for the nonspecialist. It is open to first-year students only.

### **PHYS 10062. Science Literacy**

(3-0-3) Sakimoto

A course that provides the tools for a basic understanding of scientific developments and their potential consequences. Developments in many areas of science will be discussed, including biology, chemistry, physics, astronomy, engineering, and computer science, with basic physical laws serving as a common thread among them. Topics covered include the mechanisms of scientific discovery, the impact of scientific discoveries on society, science and ethics, and the tools of contemporary science. The course focuses on concepts rather than formulas and concentrates primarily on examples taken from current scientific developments. If taken by science or engineering students, this course counts as a general elective.

### **PHYS 10111. Principles of Physics I**

(3-0-3) Livingston

PHYS 10111 is a prerequisite to PHYS 10122. A course intended for students who desire a grounding in all the major principles of physics, but who plan to major in some area other than science or engineering. The ability to apply these principles to the solution of problems is a major goal of the course. The following topics are normally included: kinematics and dynamics of a particle, work, energy, momentum, harmonic motion, gravitation, and circular orbits; wave motion, interference, standing waves, the Doppler effect; and temperature, heat, first law of thermodynamics, and kinetic theory of gases. Additional material will be at the discretion of the instructor. The division between PHYS 10111 and 10122 will depend on the order of presentation.

### **PHYS 10122. Principles of Physics II**

(3-0-3) Livingston

*Prerequisite:* (PHYS 10111 OR PHYS 115)

PHYS 10111 is a prerequisite to PHYS 10122. A course intended for students who desire a grounding in all the major principles of physics but who plan to major in some area other than science or engineering. The ability to apply these principles to the solution of problems is a major goal of the course. The following topics are normally included: electric charge, Coulomb's law, electric field and potential, current, resistance, and DC circuits; magnetic force, and electromagnetic induction; the nature of light, the spectrum; photons, photoelectric effect, Compton scattering, deBroglie waves, energy levels, X-rays; nuclei and radioactivity; and special relativity. Additional material will be at the discretion of

the instructor. The division between PHYS 10111 and 10122 will depend on the order of presentation.

### PHYS 10140. Descriptive Astronomy

(3-0-3) Garnavich, Rettig

A description of the motions and structure of the earth, moon, and planets; an exposition of the modern theories of solar and stellar structure, nebulae, and galaxies; basics of stellar evolution, black holes, quasars, and other recent developments; an introduction to cosmology. This course includes elementary observational projects.

### PHYS 10240. Elementary Cosmology

(3-0-3) Jessop

An elective course for students planning to major in the arts and letters or business. It is designed to acquaint the non-mathematically inclined student with the most important discoveries in physics of the last few decades and how they have altered our perceptions of the origin and structure of the universe. This course examines such questions as: "Where did the universe come from?" "Why do scientists feel sure that it was born in a cosmic fireball called the Big Bang?" and "Where did the Big Bang itself come from?" This is a reading-intensive course based on popularizations of science written for the curious and intelligent layperson. The emphasis will be on class discussion of the readings. One book report and a term paper are required in addition to examinations. If taken by College of Science students, this course counts as general elective credit.

### PHYS 10310. General Physics I

(4-0-4) Hildreth, Ruchti

*Prerequisite:* ((MATH 10550 (MAY BE TAKEN CONCURRENTLY) OR MATH 125 (MAY BE TAKEN CONCURRENTLY) OR MATH 125A (MAY BE TAKEN CONCURRENTLY) OR MATH 125B (MAY BE TAKEN CONCURRENTLY) OR MATH 125C (MAY BE TAKEN CONCURRENTLY) OR MATH 125E (MAY BE TAKEN CONCURRENTLY) OR MATH 125F (MAY BE TAKEN CONCURRENTLY)) OR (MATH 10850 (MAY BE TAKEN CONCURRENTLY) OR MATH 165 (MAY BE TAKEN CONCURRENTLY))

*Corequisite:* PHYS 11310, PHYS 12310

The first course in a two-semester sequence in general physics. Topics include the kinematics and mechanics of a particle; work, energy and momentum, and associated conservation laws; rotation, torque and angular momentum; oscillations and wave motions. A course designed for students of science and engineering. Laboratory meetings in alternating weeks only. Weekly tutorial sessions.

### PHYS 10320. General Physics II

(4-0-4) Eskildsen, Tang

*Prerequisites:* ((PHYS 10310 OR PHYS 131) OR (PHYS 10411 OR PHYS 151)) AND ((MATH 10550 OR MATH 125 OR MATH 125A OR MATH 125B OR MATH 125C OR MATH 125E OR MATH 125F) OR (MATH 10850 OR MATH 165)) AND ((MATH 10560 (MAY BE TAKEN CONCURRENTLY) OR MATH 126 (MAY BE TAKEN CONCURRENTLY) OR MATH 126A (MAY BE TAKEN CONCURRENTLY) OR MATH 126B (MAY BE TAKEN CONCURRENTLY) OR MATH 126C (MAY BE TAKEN CONCURRENTLY) OR MATH 126E (MAY BE TAKEN CONCURRENTLY) OR MATH 126F (MAY BE TAKEN CONCURRENTLY)) OR (MATH 10860 (MAY BE TAKEN CONCURRENTLY) OR MATH 166 (MAY BE TAKEN CONCURRENTLY)))

*Corequisite:* PHYS 11320 PHYS 12320

The second course in a two-semester sequence in general physics. Topics include electrostatics, electric current, and circuits; magnetism, electromagnetic induction, and waves; and geometrical optics. A course designed for students of science and engineering. Laboratory meetings in alternating weeks only. Weekly tutorial sessions.

### PHYS 10342. Modern Physics from Quarks to Quasars

(3-0-3) Kolda

*Prerequisite:* (ALHN 13950 OR ALHN 195)

Restricted to first-year arts and letters intents in the honors program. This course emphasizes themes of modern physics and will be organized around the concepts of symmetry and physical laws. For example, how do symmetries observed in

nature lead to fundamental laws of conservation of energy and momentum?

Examples from areas of modern physics such as cosmology and astrophysics are used to bring these topics to life. We consider questions such as: "What happens if one travels alongside a beam of light?" (which leads us into special relativity); "Why is the night sky so dark?" (the Big Bang); "What is matter?"; "What is mass"; "What are forces?" The course is a mix of lecture, discussions, and lab/demonstrations.

### PHYS 10411. General Physics A-M/Mechanics

(4-0-4) Garg

*Prerequisite:* ((MATH 10550 (MAY BE TAKEN CONCURRENTLY) OR MATH 125 (MAY BE TAKEN CONCURRENTLY) OR MATH 125A (MAY BE TAKEN CONCURRENTLY) OR MATH 125B (MAY BE TAKEN CONCURRENTLY) OR MATH 125C (MAY BE TAKEN CONCURRENTLY) OR MATH 125E (MAY BE TAKEN CONCURRENTLY) OR MATH 125F (MAY BE TAKEN CONCURRENTLY)) OR (MATH 10850 (MAY BE TAKEN CONCURRENTLY) OR MATH 165 (MAY BE TAKEN CONCURRENTLY))

*Corequisite:* PHYS 11411

The first semester of a three-semester sequence in general physics. Topics include the kinematics and mechanics of a particle; work, energy, and momentum, and associated conservation laws; rotation, torque, and angular momentum; oscillations and wave motions. A course designed for students intending to enter the Department of Physics. Laboratory meetings each week.

### PHYS 10424. General Physics B-M/Waves, Thermodynamics, Special Relativity

(4-0-4) Garg

*Prerequisites:* ((PHYS 10310 OR PHYS 131) OR (PHYS 10411 OR PHYS 151)) AND ((MATH 10550 OR MATH 125 OR MATH 125A OR MATH 125B OR MATH 125C OR MATH 125E OR MATH 125F) OR (MATH 10850 OR MATH 165)) AND ((MATH 10560 (MAY BE TAKEN CONCURRENTLY) OR MATH 126 (MAY BE TAKEN CONCURRENTLY) OR MATH 126A (MAY BE TAKEN CONCURRENTLY) OR MATH 126B (MAY BE TAKEN CONCURRENTLY) OR MATH 126C (MAY BE TAKEN CONCURRENTLY) OR MATH 126E (MAY BE TAKEN CONCURRENTLY) OR MATH 126F (MAY BE TAKEN CONCURRENTLY)) OR (MATH 10860 (MAY BE TAKEN CONCURRENTLY) OR MATH 166 (MAY BE TAKEN CONCURRENTLY)))

*Corequisite:* PHYS 11424

The second semester of the a three-semester course in general physics. Topics include classical thermodynamics, fluids, and acoustics; wave motions, geometric and physical optics; special relativity. The course is intended primarily for physics majors but is open to other qualified students.

### PHYS 11310. General Physics I Laboratory

(0-1-0)

*Corequisite:* PHYS 10310, PHYS 12310

The laboratory is a corequisite for PHYS 10310

### PHYS 11411. General Physics A-M/Mechanics Laboratory

(0-2-0)

*Corequisite:* PHYS 10411

The laboratory is a corequisite for PHYS 10411

### PHYS 11424. General Physics B-M Laboratory

(0-2-0)

The laboratory is a corequisite for PHYS 10424.

### PHYS 12310. General Physics I Tutorial

(0-1-0)

*Corequisite:* PHYS 10310, PHYS 11310

The tutorial is a corequisite for PHYS 10310.

### PHYS 12320. General Physics II Tutorial

(0-1-0)

*Corequisite:* PHYS 10320, PHYS 11320

The tutorial is a corequisite for PHYS 10320.

**PHYS 20051. Energy and Society**

(3-0-3) Kolata

A course developing the basic ideas of energy and power and their applications from a quantitative and qualitative viewpoint. The fossil fuels (coal, oil, natural gas) are studied, together with their societal limitations (pollution, global warming, diminishing supply). Nuclear power is similarly studied in the context of the societal concerns that arise (radiation, reactor accidents, nuclear weapons proliferation, high-level waste disposal). The opportunities as well as the risks presented by alternative energy resources, in particular solar energy, wind, geothermal, and hydropower, together with various aspects of energy conservation, are developed and discussed. This course is designed for the nonspecialist.

**PHYS 20061. Nuclear Warfare**

(3-0-3) Mathews

Nuclear phenomena, nuclear fission and fusion. Nuclear weapons. Effects of blast, shock, thermal radiation, prompt and delayed nuclear radiation. Fire, fallout, ozone-layer depletion, electromagnetic pulse, "nuclear winter." Medical consequences, physical damage, effects on the individual and on society. Defensive measures and their feasibility. Scenarios for war and peace, proliferation of nuclear weapons material, recent diplomatic history. US Bishops' Pastoral Letter. The course counts for science majors as a general elective credit.

**PHYS 20140. Descriptive Astronomy**

(3-0-3) Garnavich, Rettig

A description of the motions and structure of the Earth, moon, and planets. An exposition of the modern theories of solar and stellar structure, nebulae, and galaxies. Basics of stellar evolution, black holes, quasars, and other recent developments. An introduction to cosmology. This course includes elementary observational projects.

**PHYS 20330. General Physics III**

(3.5-0-3.5) Berry

*Prerequisites:* ((PHYS 10320 OR PHYS 132) OR (PHYS 10422 OR PHYS 152) OR (PHYS 20435)) AND ((MATH 10560 OR MATH 126 OR MATH 126A OR MATH 126B OR MATH 126C OR MATH 126E OR MATH 126F) OR (MATH 10860 OR MATH 166)) AND ((MATH 20850 (MAY BE TAKEN CONCURRENTLY) OR MATH 265 (MAY BE TAKEN CONCURRENTLY)) OR (MATH 20550 (MAY BE TAKEN CONCURRENTLY) OR MATH 225A (MAY BE TAKEN CONCURRENTLY) OR MATH 225B (MAY BE TAKEN CONCURRENTLY) OR MATH 225C (MAY BE TAKEN CONCURRENTLY) OR MATH 225E (MAY BE TAKEN CONCURRENTLY))) OR MATH 20550 (MAY BE TAKEN CONCURRENTLY))

*Corequisite:* PHYS 21330

A third semester in general physics. Topics include (1) interference and diffraction; (2) quanta and the wave-particle duality; (3) introduction to quantum mechanics; (4) atomic, nuclear, and particle physics; (5) physics of the solid state; and (6) astrophysics and cosmology. A course designed for students of science and engineering. Laboratory meetings in alternating weeks only.

**PHYS 20435. General Physics C-M/Electricity and Magnetism**

(3-0-4) Collon

*Prerequisites:* ((PHYS 10310 OR PHYS 131 OR PHYS 151 OR PHYS 10411) AND ((MATH 10560 OR MATH 126 OR MATH 126A OR MATH 126B OR MATH 126C OR MATH 126E OR MATH 126F) OR (MATH 10860 OR MATH 166))

*Corequisite:* PHYS 21435

The third semester of a three-semester sequence in general physics. Topics include electrostatics, electric current and circuits, magnetism, electromagnetic induction and waves. A course designed for students majoring in the physics. Laboratory meetings each week.

**PHYS 20451. Mathematical Methods in Physics I**

(3-0-3.5) Jankó

*Prerequisite:* (MATH 10560 OR MATH 10860 OR MATH 126 OR MATH 126A OR MATH 126B OR MATH 126C OR MATH 126E OR MATH 126F)

*Corequisite:* PHYS 22451

A two-semester course in the study of methods of mathematical physics. Topics include linear algebra (including matrices and determinants), vector and tensor analysis, vector calculus, curvilinear coordinates, series, ordinary differential equations, partial differential equations, orthogonal functions and vector spaces, special functions (including Bessel, Legendre, and Hermite), calculus of variations, Fourier series, and group theory. The division between PHYS 20451 and 20452 will depend on the order of presentation. Weekly tutorial sessions.

**PHYS 20452. Mathematical Methods in Physics II**

(3-0-3.5) Mach

*Prerequisite:* PHYS 20451*Corequisite:* PHYS 22452

A two-semester course in the study of methods of mathematical physics. Topics include linear algebra (including matrices and determinants), vector and tensor analysis, vector calculus, curvilinear coordinates, series, ordinary differential equations, partial differential equations, orthogonal functions and vector spaces, special functions (including Bessel, Legendre, and Hermite), calculus of variations, Fourier series, and group theory. The division between PHYS 20451 and 20452 will depend on the order of presentation. Weekly tutorial sessions.

**PHYS 20454. Intermediate Classical Mechanics**

(3-0-3) Bunker

*Prerequisites:* ((PHYS 20451 AND PHYS 20452 (MAY BE TAKEN CONCURRENTLY))

Newtonian mechanics of particles in one, two, and three dimensions; oscillations; noninertial reference frames; gravitation, central forces; systems of particles; kinetics and dynamics of rigid body motion; Lagrangians; Hamilton's equations.

**PHYS 20464. Modern Physics I**

(4-0-4) Furdyna

*Prerequisite:* (PHYS 20431 OR PHYS 253) OR PHYS 10424

Special relativity, foundations of quantum concepts. Properties of atoms. Interactions of electromagnetic fields with atoms. Wave mechanics and the Schrodinger equation. Atomic structure and atomic spectra. Atomic wave functions. Fine structure and Zeeman effect. Multiplet analysis. Exclusion principle, periodic table and spectra of multi-electron atoms. Introduction to the statistical physics of quantum mechanical systems.

**PHYS 20481. Introduction to Astronomy and Astrophysics for Majors**

(3-0-3)

*Prerequisite:* (PHYS 10411 OR PHYS 151) OR (PHYS 10310 OR PHYS 131)

This one-semester course uses basic physical principals of mechanics, optics, and radiation to provide an introduction to modern astronomy and astrophysics. Topics include the solar system, stars, interstellar matter, galaxies, and cosmology. The underlying observations (from radio to gamma rays) are used to provide a fundamental understanding topics and their historical background. Several observing projects will be completed at the observatory in the Jordan Hall of Science. (This course is offer in the fall of even years.)

**PHYS 21330. General Physics III Laboratory**

(0-1-0)

*Corequisite:* PHYS 20330

The laboratory is a corequisite for PHYS 20330

**PHYS 21431. General Physics C-M/Electricity and Magnetism Laboratory**

(0-2-0)

*Corequisite:* PHYS 20431

The laboratory is a corequisite for PHYS 20431

**PHYS 21435. General Physics C-M/E&M Laboratory**

(0-2-0)

*Corequisite:* PHYS 20435

The laboratory is a corequisite for PHYS 20435.

**PHYS 22451. Mathematical Methods in Physics I**

(0-1-0)

*Corequisite:* PHYS 20451

The tutorial is a corequisite for PHYS 20451.

**PHYS 22452. Mathematical Methods in Physics II**

(0-1-0)

*Corequisite:* PHYS 20452

The tutorial is a corequisite for PHYS 20452.

**PHYS 23411. Sophomore Seminar**

(1-0-1) Kolda

A discussion of current topics in physics by staff members.

**PHYS 30210. Physics I**

(3-0-4) Dobrowolska-Furdyna, Hyder

*Prerequisite:* (MATH 10360 OR MATH 120 OR MATH 120A OR MATH 120B OR MATH 120C OR MATH 120E OR MATH 120F OR MATH 120G OR MATH 120H) OR (MATH 10560 OR MATH 126 OR MATH 126A OR MATH 126B OR MATH 126C OR MATH 126E OR MATH 126F) OR (MATH 10860 OR MATH 166) OR (MATH 10460 OR MATH 196)*Corequisite:* PHYS 31210

The basic principles of mechanics, fluid mechanics, thermal physics, wave motion, and sound. Primarily for students in the life sciences. Laboratory meetings each week.

**PHYS 30220. Physics II**

(3-0-4) Ruggiero

*Prerequisite:* (MATH 10360 OR MATH 120 OR MATH 120A OR MATH 120B OR MATH 120C OR MATH 120E OR MATH 120F OR MATH 120G OR MATH 120H) OR (MATH 10560 OR MATH 126 OR MATH 126A OR MATH 126B OR MATH 126C OR MATH 126E OR MATH 126F) OR (MATH 10860 OR MATH 166) OR (MATH 10460 OR MATH 196)*Corequisite:* PHYS 31220

The basic principles of electricity, magnetism, optics, and modern physics. Primarily for students in the life sciences. Laboratory meetings each week.

**PHYS 30389. Philosophical Issues in Physics**

(3-0-3) Bland

*Prerequisite:* (PHYS 10122 OR PHYS 116) OR (PHYS 10320 OR PHYS 132) OR (PHYS 30220 OR PHYS 222)

This course is intended for non-science students who desire to begin an examination of the origins of the modern laws of physics and for science students who wish to know the actual route to the discovery and the broader implications of the formal theories with which they are already familiar. The historical background to and philosophical questions associated with major laws of physics will be discussed, in large measure by examining directly relevant excerpts from the writings of some of the creators of seminal concepts and theories in physics. The latter part of the course will concentrate on historical and philosophical issues related to relativity and especially to quantum theory and its interpretation. This course is accepted as a science elective in the College of Science.

**PHYS 30432. Lasers and Modern Optics**

(3-0-3) Tanner

*Prerequisites:* (PHYS 20330 OR PHYS 20431) OR (PHYS 10424 AND PHYS 20435)*Corequisite:* PHYS 31432

Principles and practical aspects of laser operation and applications in modern optics. Propagation of plane electromagnetic waves. Diffraction and interference of light. Gaussian beam propagation and optical resonators. Theory of laser oscillation. Gas, solid, semiconductor, and dye lasers. Detectors of optical radiation. Nonlinear optics. Applications in research and industry. Laboratory exercises include polarization, interference, Fourier optics, holography, gas, diode and turnable lasers, and harmonic generation. A course primarily intended for physics majors.

**PHYS 30461. Thermal Physics**

(3-0-3) Bunker

*Prerequisite:* (PHYS 20454 OR PHYS 252)

Physical thermodynamics, kinetic theory, and an introduction to statistical mechanics.

**PHYS 30465. Topics in Modern Physics II**

(3-0-3) Bigi

*Prerequisite:* (PHYS 20464 OR PHYS 260)

A continuation of Modern Physics I. Topics in quantum physics. Molecular bonding and spin valence. Molecular spectra. Bonding, energy levels and band structure in solids. Ionic crystals, metals and semiconductors. Thermal, electric, magnetic and optical properties of solids. Quantum numbers of particles, basic forces, the particle zoo. Stable nuclei, nuclear structure and models, nuclear decay and reactions, energy levels, fission, fusion. Particle scattering. Production, detection, and properties of elementary particles.

**PHYS 30471. Electricity and Magnetism**

(3-0-3) Caprio

*Prerequisite:* (PHYS 20454 OR PHYS 252)

Electro- and magnetostatics. Laplace's and Poisson's equations. Boundary value problems. Multipole fields. Dielectric and magnetic phenomena. Maxwell's equations.

**PHYS 30472. Electromagnetic Waves**

(3-0-3) Frauendorf

*Prerequisites:* (PHYS 20464 OR PHYS 260) AND (PHYS 30471 OR PHYS 356)

Study of electromagnetic waves, physical optics, radiation from accelerating charges, and some topics from the special theory of relativity.

**PHYS 30481. Modern Observational Techniques**

(3-2-3) Howk

*Prerequisite:* (PHYS 10411 OR PHYS 151) OR (PHYS 10310 OR PHYS 131)

This one-semester, modern-astronomy laboratory course emphasizes new advances in telescopes, astronomical imaging and spectroscopies as well as photoelectric observations. Data processing and analysis techniques are taught. Extensive use will be made of the new observatory in the Jordan Hall of Science. There is a possibility of field trips to the VATT, LBT, or other major research telescopes. (This course is offered in the fall of odd years.)

**PHYS 31210. Physics I Laboratory**

(0-2-0)

*Corequisite:* PHYS 30210

The laboratory is a corequisite for PHYS 30210.

**PHYS 31220. Physics II Laboratory**

(0-2-0)

*Corequisite:* PHYS 30220

The laboratory is a corequisite for PHYS 30220.

**PHYS 31432. Lasers and Modern Optics Laboratory**

(0-2-0)

*Corequisite:* PHYS 30432

Accompanying lab for PHYS 30432.

**PHYS 33411. Junior Seminar**

(1-0-1) Jankó

A discussion of current topics in physics by staff members.

**PHYS 40371. Medical Physics**

(3-0-3) Mach

*Prerequisite:* (PHYS 30220 OR PHYS 222) OR (PHYS 132 OR PHYS 10320 OR PHYS 152 OR PHYS 10432 OR PHYS 20435)

Topics involving the applications of physics in medicine and biology are selected from the following: external and internal forces on the body; heat and temperature equilibrium; physics of hearing; physics of vision; nerve conduction;

muscle contraction; electric potentials of the brain; physics of cardiovascular and pulmonary systems; ionizing radiations and their effects; nuclear medicine; radiotherapy; physics of some biological instruments. A science elective course for preprofessional students, but open to other students.

**PHYS 40432. Biological Physics**

(3-0-3) Ruggiero

*Prerequisite:* (PHYS 20435 OR PHYS 152) OR (PHYS 10320 OR PHYS 132) OR (PHYS 30220 OR PHYS 222)

The functioning of cells at the molecular level will be discussed on the basis of basic physics principles including Newtonian mechanics, thermodynamics, statistical mechanics, and electrical transport. The course covers diverse topics including cell energy balance, molecular machines, nerve impulse propagation, self-assembly, and electrical properties of molecules. This is an approved science elective.

**PHYS 40441. Modern Physics Laboratory I**

(0-2-3) Tanner

*Prerequisites:* (PHYS 20464 OR PHYS 260) AND (PHYS 30471 OR PHYS 356)

*Corequisite:* PHYS 41441

A two-semester laboratory course stressing experiments in atomic, nuclear, and solid-state physics. The course is designed to introduce the student to experiments and methods closely related to modern-day research. Students will be introduced to the fundamentals of semiconductor devices and the construction and use of such devices.

**PHYS 40442. Modern Physics Laboratory II**

(0-3-3) Collon

*Prerequisite:* (PHYS 40441 OR PHYS 442)

*Corequisite:* PHYS 41442

A two-semester laboratory course stressing experiments in atomic, nuclear, and solid-state physics. The course is designed to introduce the student to experiments and methods closely related to modern-day research. Students will be introduced to the fundamentals of semiconductor devices and the construction and use of such devices.

**PHYS 40453. Introduction to Quantum Mechanics I**

(3-0-3) Kolda

*Prerequisites:* (PHYS 20464 OR PHYS 260) OR PHYS 272) AND (PHYS 20452)

A two-semester course on the experimental basis for the wave picture of matter and the fundamental ideas of quantum mechanics.

**PHYS 40454. Introduction to Quantum Mechanics II**

(3-0-3) Bigi

*Prerequisite:* (PHYS 40453 OR PHYS 453)

A two-semester course on the experimental basis for the wave picture of matter and the fundamental ideas of quantum mechanics.

**PHYS 41441. Modern Physics I Laboratory**

(0-4-0)

*Prerequisite:*

*Corequisite:* PHYS 40441

The laboratory is a corequisite for PHYS 40441

**PHYS 41442. Modern Physics II Laboratory**

(0-4-0)

*Corequisite:* PHYS 40442

The laboratory is a corequisite for PHYS 40442.

**PHYS 43411. Senior Seminar**

(1-0-1) Wayne

A discussion of current topics in physics by students and staff members.

**PHYS 46490. Directed Readings**

(V-0-V)

Study of topics not covered or only briefly covered in other courses. Readings, problems, and reports.

**PHYS 48480. Undergraduate Research**

(V-0-V)

Research in collaboration with members of the faculty. Three to nine hours each week, arranged individually for each student. One to three credits.

**PHYS 50445. Astrophysics**

(3-0-3) Balsara

*Prerequisites:* (PHYS 30471 OR PHYS 356) AND (PHYS 20464 OR PHYS 260)

A study of the physical problems associated with stellar motions; energy generation and radiation; astronomical distances; celestial mechanics; galactic dynamics; cosmic rays; interstellar matter; thermodynamics; and equations of state of various stellar models. Observational techniques and methods of computation will be discussed. An elective course for senior physics majors and other qualified students.

**PHYS 50472. Relativity: Special and General**

(3-0-3) Arnold

*Prerequisite:* (PHYS 30471 OR PHYS 356)

An introduction to relativity, both special and general. Special relativity: Lorentz transformations of events, geometry of space-time, relativistic kinetics (energy-momentum), Lorentz transformations of electromagnetic fields. General relativity: gravity and light, principle of general covariance, Einstein's field equations, Schwarzschild solution, precession of perihelions of planets, deflection of light, black holes. An elective course for senior physics majors.

## Department of Preprofessional Studies

### SCPP 30300. Introduction to Clinical Ethics

(3-0-3) Foster

The focus of the course will be an examination of the advances in medicine over the last 30 years that have challenged traditional values and ethical norms, and the institutional processes and procedures in place that facilitate decision-making in the health care setting. It will include a sketch of the most recent advances in the various fields of medicine, followed by an examination of the clinical and ethical questions they raise and how they have affected the physician-patient relationship. Note: This course counts as a general elective. Fall and spring.

### SCPP 30311. Introduction to the American Health Care System

(3-0-3) Navari

The course will begin with a short history of the American health care system and will be followed by a discussion of the major components of the system (patients, providers, payers), health insurance coverage, managed care programs, the movement for quality health care, physicians in the changing medical marketplace, health care expenditures, and academic medical centers. This course counts as a general elective. Fall.

### SCPP 46397. Directed Readings—The Doctor

(V-0-V)

Permission required. Readings focus on learning how patients, families, and health care professionals experience illness and healing, how the stories that patients tell become the basis for diagnosis and therapeutic response, what it's like to go through medical training and grow in identity as a physician, and the nature of the doctor-patient relationship and how it is changing. Fall and spring. Note: This course counts as a general elective.

## Department of Science (Nondepartmental)

### SC 10100. Environmental Geosciences

(3-0-3) Kreller

*Prerequisite:* (CHEM 10113 OR CHEM 113) OR (CHEM 10115 OR CHEM 115) OR (CHEM 10117 OR CHEM 117) OR (CHEM 10121 OR CHEM 121) OR (CHEM 10125 OR CHEM 125) OR (CHEM 10126 OR CHEM 126)  
This course introduces the student to earth processes and focuses on how these processes affect people, and how people affect these processes. The course explores the interactions between Earth's biosphere, geosphere, atmosphere, and hydrosphere, with the objective of demonstrating how our physical environment is controlled by geological, biological, and human forces. SC 10100 and SC 20100 are the same course.

### SC 10101. The Cosmos, the Earth, and the Genome

(3-0-3) Burns

An introduction to the evolution of our universe, from the Big Bang to the human genome. The course will cover major concepts of cosmology, earth science, and evolutionary biology. Emphasis will be placed on not only our current understanding of those fields, but also on how our understanding itself has evolved over time. If taken by science or engineering students, this course counts as general elective credit.

### SC 10190. Seminar on Interdisciplinary Biological Research: Mathematical and Computational Modeling in Biology

(3-0-3)

The goal of this course is to introduce students to the mathematical and computational methods in the field of qualitative and system biology and demonstrate to them the breadths of interdisciplinary activities in this field on the Notre Dame campus. The course will be taught by Mark Alber with assistance from the members of the Center for the Study of Biocomplexity. Students will be divided into small groups. Each group will be given a project and will be working with senior undergraduates already participating in one of the REU projects and graduate students (mentors). Each group will present its results in the end of the semester. This approach has been already tested in the courses taught by the members of the Center. Lectures and visits to biological and computational labs will be complemented by meetings with undergraduate students participating in a variety of research projects on the Notre Dame campus. Students will also participate in an Indiana Biocomplexity Symposium held each April and attend seminars and public lectures organized by the center. Meetings with distinguished speakers visiting Notre Dame will be also arranged.

### SC 13190. Seminar on Interdisciplinary Biological Research: Mathematical and Computational Modeling in Biology

(3-0-3)

The goal of this course is to introduce students to the mathematical and computational methods in the field of qualitative and system biology and demonstrate to them the breadths of interdisciplinary activities in this field on the Notre Dame campus. The course will be taught by Mark Alber with assistance from the members of the Center for the Study of Biocomplexity. Students will be divided into small groups. Each group will be given a project and will be working with senior undergraduates already participating in one of the REU projects and graduate students (mentors). Each group will present its results in the end of the semester. This approach has been already tested in the courses taught by the members of the Center. Lectures and visits to biological and computational labs will be complemented by meetings with undergraduate students participating in a variety of research projects on the Notre Dame campus. Students will also participate in an Indiana Biocomplexity Symposium held each April and attend seminars and public lectures organized by the center. Meetings with distinguished speakers visiting Notre Dame will be also arranged.

### SC 20100. Environmental Geosciences

(3-0-3) Kreller

*Prerequisite:* (CHEM 10113 OR CHEM 113) OR (CHEM 10115 OR CHEM 115) OR (CHEM 10117 OR CHEM 117) OR (CHEM 10125 OR CHEM 125) OR (CHEM 10126 OR CHEM 126)

This course introduces the student to earth processes and focuses on how these processes affect people, and how people affect these processes. The course explores the interactions between Earth's biosphere, geosphere, atmosphere, and hydrosphere, with the objective of demonstrating how our physical environment is controlled by geological, biological, and human forces.

**SC 20110. Physical Geology (Lecture and Laboratory)**

(3-0-4) Neal

*Corequisite:* SC 21110

An introduction to the Earth and its processes, composition, evolution, and structure. The course introduces the student to mineralogy, petrology, structural geology, oceanography, surficial processes, and environmental geology. Lecture and laboratory meetings.

**SC 20120. Historical Geology (Lecture and Laboratory)**

(3-0-4) Rigby

*Prerequisite:* (GEOS 20110 OR GEOS 231) OR (SC 20110 OR SC 231)

*Corequisite:* SC 21120

This course introduces the student to the concept of geologic time, absolute and relative age-dating, Earth processes and features through time, and the major features of evolution and distribution of fossils. Lecture and laboratory meetings. A one-day field trip is required.

**SC 20200. Mineralogy and Optical Mineralogy**

(4-0-4) Burns

*Prerequisite:* (CHEM 10118 OR CHEM 118) OR (SC 20110 OR SC 231) OR (ENVG 10110 OR ENVG 131)

Crystallography and mineral optics: physical and chemical mineralogy-its application to mineral identification in hand-specimen and using the petrographic microscope.

**SC 21110. Physical Geology Laboratory**

(0-2-0)

*Corequisite:* SC 20110

The laboratory portion of ENVG/SC 20110.

**SC 21120. Historical Geology Laboratory**

(0-2-0)

*Corequisite:* SC 20120

This is the laboratory portion of ENVG/SC 20120.

**SC 21200. Mineralogy and Optical Mineralogy Laboratory**

(0-2.5-0)

This is the laboratory portion of ENVG 20201.

**SC 30001. Introduction to the Fundamentals of Bioinformatics**

(1-0-1) Sepeta

Bioinformatics is the study of the biological and health sciences with the aid of computers. In particular bioinformatics refers to the analysis of genomes—animal, plant, bacterial, and viral—using software and the internet. A main impetus for bioinformatics is the recently completed human genome project. Additionally the sequencing of the genome of the mosquito *Anopheles gambiae* by Notre Dame researchers is also a significant event for bioinformatics. Bioinformatics is quickly becoming fundamentally important for understanding diseases and drug development. In this one credit hour basic introduction to bioinformatics, students will search biological databases, compare nucleotide and amino acid sequences, look at protein structure, and more generally ask biological questions with computers.

**SC 30230. Sedimentation and Stratigraphy**

(4-0-4) Rigby

*Prerequisite:* (ENVG 20200 OR ENVG 242) OR (SC 20200 OR SC 242)

Sedimentary environments from a physical, biological, and tectonic perspective are explored, along with processes such as lithification. Identification of sedimentary rocks and interpretation of the succession of layered rocks in North America are emphasized.

**SC 40300. Geochemistry**

(3-0-3) Fein

An introduction to the use of chemical thermodynamics and chemical kinetics in modeling geochemical processes. Special emphasis is placed on water-rock interactions of environmental interest.

**SC 40350. Paleontology**

(3-0-3)

*Prerequisite:* (GEOS 20120 OR GEOS 232) OR (SC 20120 OR SC 232)

The fossil record—morphology, taxonomy, evolution, statistical population systematics, and paleoecology. A one-day field trip is required.

**SC 40491. Current Topics in Environmental Science**

(3-0-3) Grimstad

Taught by the director of the ES major. Environmental sciences first and second majors only. The course will be divided into various modules taught by experts on campus. The modules will include environmental law, risk assessment, environmental ethics, advancements in environmental and ecological science, current topics of national interest in environmental science, and others. This course is required of all first majors and recommended of all second majors. Fall.

**SC 43100. Senior Honors Colloquium**

(1-0-1)

This is a one-credit seminar consisting of presentations of ongoing thesis research as a spur to the successful completion of the senior thesis or research project.

**SC 48100. Research Experience for Undergraduates**

(V-V-V)

Times and inclusive dates variable, depending on specific program elected by the student. Permission required.

**SC 48101. Undergraduate Research**

(V-0-V)

Times and inclusive dates variable, depending on specific program elected by the student. Permission required.

**SC 48999. Research Experience for Undergraduates**

(0-0-0)

This is a zero-credit course for students engaged in independent research or working with a faculty member or a member of the University staff on a special project. Registration requires a brief description of the research or project to be pursued and the permission of the director of the summer session. This course is taken as an indication of the student's status on campus and is meant to allow the registered student to use the University facilities as the summer session permits. No coursework is required.

# The University

## Department of Aerospace Studies (ROTC-Air Force)

### AS 10101. The Foundations of the United States Air Force

(1-0-1) Powell

A survey course designed to introduce students to the United States Air Force and Air Force ROTC. Featured topics include: mission of the Air Force, officership and professionalism, military customs and courtesies, Air Force officer opportunities, and an introduction to communication skills.

### AS 10102. The Foundations of the United States Air Force

(1-0-1) Powell

*Corequisite:* AS 11102

Additional study of the organizational structure of the Air Force, with emphasis on leadership and communication skills.

### AS 11101. Leadership Laboratory

(0-2-0) Powell

A study of Air Force customs and courtesies, drill and ceremonies, and military commands. Also includes studying the environment of an Air Force officer and learning about areas of opportunity available to commissioned officers.

### AS 11102. Leadership Laboratory

(0-2-0) Powell

*Corequisite:* AS 10102

A study of Air Force customs and courtesies, drill and ceremonies, and military commands. Also includes studying the environment of an Air Force officer and learning about areas of opportunity available to commissioned officers.

### AS 20101. The Evolution of USAF Air and Space Power

(1-0-1) Powell

A course designed to examine general aspects of air and space power through a historical perspective. Utilizing this perspective, the course covers a time period from the first balloons and dirigibles through the Korean War and into the Cold War era.

### AS 20102. The Evolution of USAF Air and Space Power

(1-0-1) Powell

Further study from the Vietnam War to the space-age global positioning systems of the Persian Gulf War. Effective communication techniques are also emphasized.

### AS 21101. Leadership Laboratory

(0-2-0) Powell

Further study of Air Force customs and courtesies, drill and ceremonies, and military commands. Also includes studying the environment of an Air Force officer and learning about areas of opportunity available to commissioned officers.

### AS 21102. Leadership Laboratory

(0-2-0) Powell

Further study of Air Force customs and courtesies, drill and ceremonies, and military commands. Also includes additional emphasis on the environment of an Air Force officer and learning about areas of opportunity available to commissioned officers.

### AS 30101. Air Force Leadership Studies

(3-0-3)

A study of leadership, management fundamentals, professional knowledge, and communication skills required of an Air Force junior officer. Case studies are used to examine Air Force leadership and management situations as a means of demonstrating and exercising practical application of the concepts being studied.

### AS 30102. Air Force Leadership Studies

(3-0-3)

Further study of the Air Force personnel and evaluation systems, leadership ethics, and additional communication skills.

### AS 31101. Leadership Laboratory

(0-2-0) Powell

Activities classified as leadership and management experiences involving the planning and controlling of military activities of the cadet corps, and the preparation and presentation of briefings and other oral and written communications. Also includes interviews, guidance, and information that will increase the understanding, motivation, and performance of other cadets.

### AS 31102. Leadership Laboratory

(0-0-0) Powell

Activities classified as leadership and management experiences involving the planning and controlling of military activities of the cadet corps, and the preparation and presentation of briefings and other oral and written communications. Also includes interviews, guidance, and information that will increase the understanding, motivation, and performance of other cadets.

### AS 40098. Directed Readings

(3-0-3)

Directed readings of selected classic and current military/leadership literature.

### AS 40101. National Security Affairs/Preparation for Active Duty

(3-0-3) Mitchell

An examination of the national security process, regional studies, advanced leadership ethics, and Air Force doctrine.

### AS 40102. National Security Affairs/Preparation for Active Duty

(3-0-3) Mitchell

Further focus on the military as a profession, officership, military justice, civilian control of the military, preparation for active duty, and current issues affecting military professionalism.

### AS 41101. Leadership Laboratory

(0-2-0) Powell

Further activities classified as leadership and management experiences. They involve the planning and controlling of military activities of the cadet corps, and the preparation and presentation of briefings and other oral and written communications. Also includes interviews, guidance, and information that will increase the understanding, motivation, and performance of other cadets.

### AS 41102. Leadership Laboratory

(0-2-0) Powell

Further activities classified as leadership and management experiences. They involve the planning and controlling of military activities of the cadet corps, and the preparation and presentation of briefings and other oral and written communications. Also includes interviews, guidance, and information that will increase the understanding, motivation, and performance of other cadets.

## Institute for Educational Initiatives

### ESS 20200. Sociology of Race and Ethnicity

(3-0-3)

This course has three objectives. First, the course will help you to think critically about issues related to race and ethnicity in American society. These issues include the meaning of race and ethnicity; the extent of racial and ethnic inequality in the US, the nature of racism, discrimination, and racial stereotyping; the pros and cons of affirmative action; the development of racial identity; differences between assimilation, amalgamation, and multiculturalism; and social and individual change with respect to race relations. The second objective is to foster a dialogue between you and other students about racist and ethnocentric attitudes and actions. The third objective is to encourage you to explore your own racial and ethnic identity and to understand how this identity reflects and shapes your life experiences.

### ESS 20201. Social Psychology

(3-0-3)

An analysis of important human processes, including perceiving and knowing other people, attitudes and attitude change, conformity and nonconformity, cooperation and competition with others, leadership in groups, attraction and love, aggression and violence, and prejudice. Specifically designed for sociology and other liberal arts majors and will emphasize theory and research. As a result, it is not recommended for students having had SOC 10722, as the content may overlap. This is an education-general course.

### ESS 20202. Social Inequality and American Education

(3-0-3)

*Corequisite:* ESS 27999

Many have claimed that the American educational system is the "great equalizer among men." In other words, the educational system gives everyone a chance to prosper in American society regardless of each person's social origins. In this course, we explore the validity of this claim. Do schools help make American society more equal by reducing the importance of class, race, and gender as sources of inequality, or do schools simply reinforce existing inequalities and reproduce pre-existing social relations? Topics covered include unequal resources among schools, sorting practices of students within schools, parents' roles in determining student outcomes, the role of schooling in determining labor market outcomes for individuals, and the use of educational programs as a remedy for poverty. This is an education-focused course.

### ESS 20203. Introduction to Social Problems

(3-0-3) Sobolewski

*Corequisite:* ESS 27999

Analysis of selected problems in American society such as crime, narcotic addiction, alcoholism, delinquency, racial and ethnic conflict, prostitution, and others. Discussions, debates, films, tapes, and readings. This is an education-general course.

### ESS 20204. Marriage and the Family

(3-0-3) Thomas

*Corequisite:* ESS 27999

Changing family patterns, sex roles, sexuality, premarital relationships, marriage and divorce, parenthood, childhood, and family interaction are some of the topics. Singles, dual-career families, alternative marriage forms, and the future of marriage and family are also taken up. This is an education-general course.

### ESS 20205. Social Inequality: The Social Construction of Difference and Inequality

(3-0-3)

*Corequisite:* ESS 27999

Many of us are aware of our own experiences of disadvantage (or perhaps privilege), but people are generally not aware of how structural arrangements in society result in systems of difference and inequality. Only occasionally do we question whether or not things are really black and white, right and wrong, true or false, and even less often do we contemplate the repercussions of such binary

assumptions. This class will challenge taken-for-granted beliefs about race and ethnicity, social class, sex and gender, and sexuality. We will discuss how these socially constructed categories of difference are given significant meaning and how this process subsequently results in real differences in experiences, expectations, and achievements between groups of individuals.

### ESS 20300. Latinos in the US

(3-0-3)

This course will examine the history of Latinos/as in the US. Readings and discussions will trace the founding and development of early Mexican-American communities in the present-day Southwest. We will then topically and chronologically cover the post-1900 urban and regional experiences of Latin American-origin immigrants, migrants, and exiles throughout the US. The focus will be on those people coming from Mexico and the Hispanic Caribbean, but immigrants from Central and South America are also included. Some of the areas of emphasis are the Chicano Movement and civil rights; Latino music and culture; race, ethnicity, and the family; education; and contemporary trends in transnational migration. The instructor will necessarily adopt a comparative approach, and students will study and critique a variety of interpretations and ideologies. Lectures and discussions will be supplemented with visual material. Grading will be based primarily on two midterm essay exams and a final research paper (10 pages). This is an education-general course.

### ESS 20301. American Catholic Experience

(3-0-3)

*Corequisite:* HIST 22612

A survey of the history of Roman Catholicism in the United States from colonial times to the present, with emphasis on the 20th-century experience. The first half of the course covers the Catholic missions and settlements in the New World, Republican-era Catholicism's experiment with democracy, and the immigrant church from 1820 to 1950. The second half of the course focuses on the preparations for, and impact of, the Second Vatican Council (1962-65). Assigned reading includes a packet of articles and primary sources about the liturgical renewal, Catholic action, social justice movements, and other preconciliar developments. This is an education-general course.

### ESS 30205. Race and Ethnicity

(3-0-3)

This course focuses on race and ethnic relations in the United States. Current cases involving racial and ethnic issues will be presented and discussed in class. Readings and materials will present three approaches to the study of majority-minority group relations, the emergence and maintenance of group dominance and minority-group adaptations to modes of dominance, including separation, accommodation, acculturation, and assimilation. Class participation and students' experiences will be emphasized. This is an education-general course.

### ESS 30207. Sociology of Education

(3-0-3)

This course focuses on the relationship between education and society. In the course, a variety of theoretical approaches and contemporary issues in the field of education will be discussed. Topics to be addressed include, but are not limited to, gender and race inequalities in education, the role of schools as agents of selection and socialization, and the nature of educational reform movements. Class participation and the experiences of students will be emphasized. This is an education-focused course.

### ESS 30208. Poverty, Inequality, and Social Stratification

(3-0-3)

Social inequality is a prominent and persistent feature of modern society. Social stratification theory attempts to explain the causes of inequality and the reasons for its persistence. This course will address such questions as: Why are some people rich and some people poor? Why does inequality persist? Who gets ahead? Can men and women get the same jobs? Do different races have the same opportunities? Is inequality necessary? Potential topics include inner-city and rural poverty, welfare dependency, homelessness, status attainment and occupational mobility,

racial and ethnic stratification, gender stratification and class theory. This is an education-general course.

### ESS 30210. Today's Gender Roles

(3-0-3) Aldous

*Corequisite:* ESS 27999

Current changes in male and female roles and the reasons for these changes are examined. Existing gender differences, various explanations for them, and proposals for change are discussed and evaluated. This is an education-general course.

### ESS 30211. Sociology of Teaching

(3-0-3) Kelly

*Corequisite:* ESS 27999

This course surveys the sociological foundations of teaching and learning in America's elementary and secondary school classrooms. The class begins with an examination of teaching as a profession. What attracts individuals to the teaching profession, and why do they leave? What constitutes professional success for teachers? Next, we'll examine how local context shapes the work that teachers do, looking at some elements of schools and communities that impact the nature of teachers' work. The course concludes by looking at the teacher's role in producing educational success by considering two enduring educational problems: how to foster student engagement, and how to teach students of differing abilities within the same classroom. In addition to research in the sociology of teaching, students will be exposed to teacher narratives of success and struggle. This is an education-focused course.

### ESS 30212. Sociology of Culture: Culture and Society, Sociological Approaches

(3-0-3)

*Corequisite:* ESS 27999

In this class, we will examine cultural dimensions of important social processes, and we will survey contemporary sociological approaches to analyzing culture. Examples will include readings on home and work, social hierarchies, political culture, media and the arts, and social change.

### ESS 30213. Gender Roles and Violence in Society

(3-0-3) Sobolewski

*Corequisite:* ESS 27999

Much of the violence in contemporary society—whether it is domestic abuse, school shootings, gang warfare, video games, or inter-ethnic conflict—has something to do with gender. This course explores the connection between gender role socialization and the expression of conflict or aggression. Through readings, discussions, films, and projects, students will be encouraged to examine sex differences in violent behavior as the outcome of complex processes. We will try to understand those processes better and develop the ability to describe the causes and their effects.

### ESS 30302. Latino/a History

(3-0-3)

This is an interdisciplinary history course examining the Latino experience in the United States after 1848. We will examine the major demographic, social, economic, and political trends of the past 150 years with an eye to understanding Latino/a America. Necessarily a large portion of the subject matter will focus on the history of Mexican Americans, and Mexican immigrants in the Southwest, and Midwestern United States, but we will also explore the histories of Puerto Ricans, Cubans, and Latin Americans within the larger Latino/a community. Latinos are US citizens and, as such, the course will spend significant time on the status of these groups before the law, and their relations with the state, at the federal, local, and community level. To explore these issues within the various Latino communities of the United States we will explore the following key topics: historical roots of Latinos/as in the US; the evolution of a Latino/a ethnicity and identity within the US; immigration, transmigration, and the shaping of Latino/a communities; Latino/a labor history; segregation; civil rights; nationalism and transnationalism; the Chicano Civil Rights Movement; Latinos in film; and post-1965 changes in Latino/a life. This is an education-general course.

### ESS 30304. Women and Religion in US History

(3-0-3)

The course is a survey of women and religion in America during the 19th and 20th centuries. Among others, we will consider the following themes: how religion shaped women's participation in reform movements such as abolition, temperance, and civil rights; how religious ideology affected women's work, both paid and unpaid; the relationship between religion, race, and ethnicity in women's lives; female religious leaders; and feminist critiques of religion. We will examine women's role within institutional churches in the Protestant, Catholic, and Jewish traditions, as well as raise broader questions about gender and religious belief. How did religious belief affect women, both as individuals and in community? How could religion be used to both reinforce and subvert prevailing gender ideology? This is an education-general course.

### ESS 30305. Women and American Catholicism

(3-0-3)

*Corequisite:* ESS 27999

This course is a survey of the history of American Catholic women from the colonial period to the present. Through a combination of lectures, reading, and discussion, we will explore the following themes and topics: the role of religious belief and practice in shaping Catholics' understanding of gender differences; the experience of women in religious communities and in family life; women's involvement in education and social reform; ethnic and racial diversity among Catholic women; devotional life; the development of feminist theology, and the emergence of the "new feminism" as articulated by Pope John Paul II. We will seek to understand how Catholic women, both lay and religious, contributed to the development of Church and nation, and examine how encounters with the broader American society have shaped Catholic women's relationship to the institutional church over the last three centuries.

### ESS 30306. African American History to 1877

(3-0-3)

*Corequisite:* ESS 27999, HIST 32800

This African American history survey begins with an examination of West African origins and ends with the Civil War era. We will discuss the Atlantic slave trade, slavery in colonial America, the beginnings of African American cultures in the North and South during and after the revolutionary era, slave resistance and rebellions, and the political economy of slavery and resulting sectional disputes. Particular attention will be paid to northern free blacks.

### ESS 30370. Fundamentals of Social and Cultural Anthropology

(3-0-3)

This course introduces students to the field of social-cultural anthropology. Cultural anthropologists are primarily interested in exploring issues of human cultural diversity across cultures and through time. This course will explore key theoretical, topical, and ethical issues of interest to cultural anthropologists. We will examine diverse ways in which people around the globe have constructed social organizations (such as kinship, and political and economic systems) and cultural identities (such as gender, ethnicity, nationality, race, and class) and we will consider the impact of increasing globalization on such processes. Throughout the course, we will consider how different anthropologists go about their work as they engage in research and as they represent others through the writing of ethnographies. This is an education-general course.

### ESS 30371. The Anthropology of Gender

(3-0-3)

This course introduces students to the main issues and debates characterizing the anthropology of gender and explores how anthropologists have attempted to understand changing roles, sexual asymmetry, and stratification. This is an education-general course.

### ESS 30400. Introduction to African American Literature

(3-0-3)

A survey of three hundred years of African American literature. This is an education-general course.

**ESS 30470. Race, Ethnicity, and American Democracy**

(3-0-3) Pinderhughes

*Corequisite:* ESS 27999

This course introduces students to the dynamics of the social and historical construction of race and ethnicity in American political life. The course explores the following core questions: What are race and ethnicity? What are the best ways to think about the impact of race and ethnicity on American citizens? What is the history of racial and ethnic formation in American political life? How do race and ethnicity link up with other identities animating political actions like gender and class? What roles do American political institutions—the Congress, presidency, judiciary, state and local governments, etc.—play in constructing and maintaining these identity categories? Can these institutions ever be used to overcome the points of division in American society? This is an education-general course.

**ESS 30471. Schools and Democracy**

(3-0-3)

Education sits high on the public policy agenda. We are living in an era of innovations in education policy, with heated discussion surrounding issues such as vouchers, charter schools, and the No Child Left Behind Act. This course introduces students to the arguments for and against these and other educational innovations, and does so through the lens of how schools affect the civic health of the nation. Often forgotten amidst debates over school choice and standardized testing is the fact that America's schools have a civic mandate to teach young people how to be engaged citizens. Students in this course will grapple with the civic implications of America's educational landscape, and have an opportunity to propose ways to improve the civic education provided to young people.

**ESS 30500. Economics of Poverty**

(3-0-3) Warlick

An examination of the extent and causes of poverty in the United States. The current system of government programs to combat poverty is analyzed. Reforms of this system are also considered. This is an education-general course.

**ESS 30501. Addressing US Poverty at the Local Level**

(3-0-3)

This course focuses on four arenas where poverty manifests itself: homelessness, education, health care, and jobs. This is an education-general course.

**ESS 30502. Economics and Education**

(3-0-3)

This course introduces students to the dynamics of the social and historical construction of race and ethnicity in American political life. The course explores the following core questions: What are race and ethnicity? What are the best ways to think about the impact of race and ethnicity on American citizens? What is the history of racial and ethnic formation in American political life? How do race and ethnicity link up with other identities animating political actions like gender and class? What roles do American political institutions—the Congress, presidency, judiciary, state and local governments, etc.—play in constructing and maintaining these identity categories? Can these institutions ever be used to overcome the points of division in American society? This is an education-focused course.

**ESS 30611. Tutoring in the Community**

(1-0-1) Masters

ESS 30611 is a one-credit seminar for students who are tutoring in the South Bend community. This seminar will provide tutors with an opportunity to explore the social, economic, and cultural forces that influence the lives of their students. Tutoring in the Community will give tutors the tools they need to analyze beliefs and pedagogy, improve instruction, and foster development in South Bend school children in need.

**ESS 30612. History of American Education**

(3-0-3)

The purpose of this course is to examine the history of education in America from around 1800 to the present in order to better understand the varied meanings Americans have attached to education during that period. Consequently, the course seeks to treat American educational history within the context of American

intellectual, political, religious, and ethnic history. The course will be conducted as a seminar, which means that the course will be heavily geared toward reading and discussion of both primary and secondary source materials.

**ESS 30613. Creativity in the Classroom**

(3-0-3)

Creativity is traditionally considered a valuable classroom commodity in teachers and students—but how is it fostered? Why is creativity associated with gifted students? Is it possible for creativity to flourish in an era of mandated curriculum and an emphasis on proficiency testing? What academic experiences inspire your creativity? To investigate these questions, we will examine theories of creativity and apply them to examples of learning and instruction. The course content will also include articles on integrating work and play in classroom environments as well as the development of talent. This is an education-focused course.

**ESS 30614. Educational Psychology**

(3-0-3) Turner

Educational Psychology examines questions about development, learning and achievement in schools. In this course, we will explore fundamental questions such as: (1) What is intelligence? Is it fixed or changeable? What are the implications of conceptions of intelligence for achievement? (2) How does learning occur? What are the implications of different theories of learning? Is there a “correct” theory of learning? Does learning differ in different subject areas? (3) What motivates student learning? Can instruction be “motivational”? (4) What is “good” instruction? How do theories of learning relate to instructional practices? and (5) How do aspects of school context, such as interaction with peers and teachers, and school culture, influence learning, motivation, and achievement?

**ESS 30615. Ideas That Shape Catholic Education**

(3-0-3) Nuzzi

*Corequisite:* ESS 27999

Catholic elementary and secondary schools contribute to the common good of civic society while advancing the evangelical mission of the Catholic Church. This course focuses on the historical successes of Catholic schools in the USA, surveys current research, and analyzes trends in theology, history, and philosophy that have shaped the current structure of the K-12 Catholic school system. Requirements include a field-based experience in a local Catholic school.

**ESS 30616. The Politics of Educational Policy**

(3-0-3) DePouw

*Corequisite:* ESS 27999

This course will provide an overview of the major political processes, structures, and issues in education. We will analyze the nature of policy making in education and discuss the roles of the various participants in the decision-making process. In addition, we will critically analyze the language of educational policies and the impact that these policies have on various stakeholders. Finally, we will examine the roles that legislation and courts have in shaping education policy.

**ESS 30617. Education and Social Change**

(3-0-3) Barrett

We live in an age when there is great optimism about the power of education to influence the well-being of individuals, communities, and nations. Parents see education as a way for their children to improve their lives by building an understanding of their own place in the world. It is also the principal means by which young people can establish a competitive advantage in the labor market. While it might appear that little has changed in education—students still walk through school gates and university lecturers still speak to rooms of undergraduates—economic, political, and social shifts over the past 30 years have fundamentally altered the nature and prospects for education. This course seeks to assess critically these fundamental shifts in our society. Students will develop a broad understanding of the global context of both the causes and effects of these changes. Also, students will develop the capacity to assess the extent to which, as Basil Bernstein famously asked, education can compensate for society.

**ESS 30618. Mathematical Cognition, Learning, and Development**

(3-0-3)

This course explores how humans acquire an understanding of mathematics. It will cover key questions such as: (1) Are infants born with an understanding of number? (2) Is the brain specialized for learning mathematics? (3) Which aspects of mathematics are most difficult for children to learn? (4) How does the environment in which we grow up influence our learning of mathematics? and (5) Does research on children's understanding of mathematics have implications for how math is taught in our schools? Students will be expected to synthesize and evaluate material presented in lectures, readings, and class discussions.

### ESS 30619. Cognitive Development

(3-0-3) McNeil

This course provides an introduction to the central issues in the field of cognitive development. It will cover (1) general frameworks for studying cognitive development, (2) key questions in the field, and (3) specific topics such as conceptual development, memory development, language development, and the development of mathematical understanding. The primary focus will be on cognitive development from infancy to adolescence. Students will be expected to synthesize and evaluate material presented in lectures, readings, and class discussions.

### ESS 33360. Social Concerns Seminar: Education

(0-0-1)

This seminar focuses on the educational and outreach endeavors of St. John Vianney Catholic Parish in Goodyear, Ariz., and builds upon Notre Dame's relationships with the Congregation of Holy Cross. Students also collaborate with those in ministry with Holy Cross in Phoenix. The immersion takes place over winter break. Apply at the Center for Social Concerns in the fall.

### ESS 33600. Education, Schooling, and Society

(3-0-3) Turner

*Corequisite:* ESS 27999

The aim of the introductory course is to introduce some basic questions about the nature and goals of education, its history, and theoretical explanations of influences on learning, teaching, and schooling. We will incorporate both classic and current texts. The core course will incorporate several disciplinary perspectives.

### ESS 33601. Exploring Authentic Ways of Learning Amidst a Myriad of Educational Challenges

(1-0-1) Burish

This course will focus on various aspects that affect a school setting that is undergoing reflections of its teaching and learning practices. After a discussion of current trends and practices in education, students will explore the reality gap between current curriculum and its preparation of future students to thrive in a global economy. Throughout the course, students will be challenged to think about new ways to enhance student learning in the following areas: literacy, creativity, critical thinking, and problem solving. Students will be presented issues through research and guest speakers that impact educational settings; e.g., cultural diversity, gender equity, special student populations such as children with autism, health-related concerns such as childhood obesity, and poverty. After understanding the culture of a local school and weaving together the educational challenges and innovations presented at seminar, students will create, implement, and evaluate an authentic learning experience that could be used by other mentors or volunteers in K–8 schools. Requirements include approximately two hours per week of community service at St. Adalbert's School.

### ESS 33610. Race, Ethnicity, and Education in the Midwest

(3-0-3) DePouw

*Corequisite:* ESS 27999

The purpose of this course is to examine the complexities of education within local context, and to highlight the unique histories of how race and ethnicity are lived in Midwestern communities. Because much of the academic literature that addresses race and ethnicity focuses on large urban areas or on the East or West coasts, the Midwestern context is often overlooked. During this course, students will be asked to examine particular states in the Midwest such as Minnesota, Wisconsin, Illinois, and Michigan. In addition, we will pay particular attention to rural areas in places like Iowa and Nebraska, as well as the urban educational systems of Chicago, Minneapolis/St. Paul, Milwaukee, and Detroit. Through our readings and discus-

sion, we will come to better understand the ways in which geographic location, regional history, shifting ethnic composition, and regional policy decisions impact public education in the Midwest.

### ESS 33616. Race, Ethnicity and Education in the Midwest

(3-0-3)

The purpose of this course is to examine the complexities of education within local context, and to highlight the unique histories of how race and ethnicity are lived in Midwestern communities. Because much of the academic literature that addresses race and ethnicity focuses on large urban areas or on the East or West coasts, the Midwestern context is often overlooked. During this course, students will be asked to examine particular states in the Midwest such as Minnesota, Wisconsin, Illinois, and Michigan. In addition, we will pay particular attention to rural areas in places like Iowa and Nebraska, as well as the urban educational systems of Chicago, Minneapolis/St. Paul, Milwaukee, and Detroit. Through our readings and discussion, we will come to better understand the ways in which geographic location, regional history, shifting ethnic composition and regional policy decisions impact public education in the Midwest.

### ESS 33620. Race and Ethnicity in Public Education, 1848–2004

(3-0-3)

This course is motivated by two key questions: “Does the prevailing distribution of literacy conform to standards of social justice?” and “What social and educational policies might promote such standards?” These questions will guide our study of urban schooling since the landmark case *Brown v. Board of Education* (1954,1955) initiated a move toward the desegregation of schools in the US. We will examine the contemporary scene of urban schooling, particularly the intersections of poverty, race, and culture. This is an education-focused course.

### ESS 33650. Toward Equity and Excellence in Education: A Review of Pedagogical Approaches from 1950 to Present

(3-0-3)

Students will examine issues of educational equity and achievement in the United States from 1950 to the present. The course begins by framing these issues in terms of social and cultural processes, using an anthropological perspective. Students then will examine issues of educational equity in relation to long-established patterns of social stratification by race, ethnicity, and class at the dawn of the civil rights era. Studies evaluating these efforts will be reviewed and contemporary efforts to promote equity and excellence will be examined in relation to what has been learned from past efforts. This is an education-focused course.

### ESS 35372. Anthropology of Childhood and Education

(3-1-3)

*Corequisite:* ESS 27999

Concepts of human growth vary extraordinarily across time and space. When children become full-fledged persons, when they can reason, when or whether they should be independent from their parents, and how all this happens are variable and illuminating. Education—either formal or informal—reflects and also constitutes a society's view of childhood. This course provides a (selective) cross-cultural survey of childhood and education, looking at stages from pregnancy and infancy to late adolescence. Students will devise and conduct projects of their own.

### ESS 36615. Directed Readings

(V-0-V)

*Corequisite:* ESS 27999

Student and Instructor will design readings relevant to a special interest in education.

### ESS 40209. Ethnicity in America

(3-0-3)

*Corequisite:* ESS 27999

A study of the dynamic process of formation and development of the society of the United States and its cultural, religious, and racial pluralism; a review of the history and theory of interethnic relations, and their manifestation in the basic institutions of family, education, religion, economics, and government.

**ESS 40210. Unequal America**

(3-0-3)

*Corequisite:* ESS 27999

Although America is the world's richest nation, it has the most unequal distribution of wealth and income in the industrialized world. In this course, we will examine why this is so. In particular, we will examine the following questions: What social forces create inequality in society? Is inequality inevitable? Is there such a thing as "social class"? Who gets ahead, and why? Why is race/ethnicity and gender still related to social status, wealth, and income? Does America have a "ruling elite"? Who are "the poor," and what explains their poverty? Are there social policies that can create more equality in American society—and is that what Americans really want?

**ESS 40212. Latinos in Education**

(3-0-3)

This course examines the educational experiences and struggles of Latinos in US public schools. Students will study these experiences through legal, political, historical, social, and economic perspectives, regarding educational policies and practices. Additionally, this course focuses on the potential of education as an agent for social justice and change for linguistically and culturally diverse groups, and thus its important role in the Latino experience. The goal of this course is to develop a reflective individual who is able to understand the educational context of Latinos in the United States. This is an education-focused course.

**ESS 40213. The Schooled Society**

(3-0-3)

This seminar focuses on the structure and organization of schooling in American society, and the societal forces that influence decisions about schools and student learning. These forces include legislation governing schooling, and cultural and religious norms that impact schools. The course will cover the role of schools in society, the political, economic, and social dimensions of schooling, education reform and its underpinnings, and the transformation of higher education. This is an education-focused course.

**ESS 40214. Society and Identity**

(3-0-3)

This course looks at sources, dynamics, and consequences of identity in contemporary society. Identity is conceived as definitions of an individual that self and others use as a basis for interacting with one another. Significant outcomes of the way we are defined are the life chances, evaluations, and emotional meanings we experience. The course format is a discussion seminar. This is an education-general course.

**ESS 40215. Great Books in Sociology of Education**

(3-0-3)

This course focuses on classic works in the sociology of education that not only shaped the direction of the education subfield, but also were landmarks in the field of sociology as a whole and often greatly influenced public policy. Discussion of the works will focus not only on an evaluation of the contribution of each work to sociology of education but also on the question of how these works contributed to sociological theory. One important goal of the course is to use careful evaluation of classic works to develop good research questions and/or to use concepts and arguments from the works to inform current research projects. This is an education-focused course.

**ESS 40250. Children and Poverty: Developmental Implications**

(3-0-3) Brandenberger

Examines the impact of rising levels of child poverty and related concerns from the perspective of developmental and social psychology. This is an education-focused course.

**ESS 40251. Cross-Cultural Psychology**

(3-0-3)

The general purpose of this course is to examine and learn to talk about issues of culture and race in the United States from a psychosocial perspective. Culture and race are not synonyms. So, we will be examining some of the ways that each affects

the quality of our psychological functioning. The goals of this course are to learn to recognize and appreciate culture in ourselves and others; to examine the different ways that cultural and racial socialization influence behavior; to consider how culture and race relate to various psychological constructs, and to understand the ways in which racism and ethnocentrism operate in everyday life. To accomplish these goals, we will use readings, group discussions, lectures, films, and each other to expanding our awareness of how culture and race operates in our everyday life. As a student in this class, you will be encouraged to share your ideas and life experiences. This is an education-general course.

**ESS 40252. Psychological Perspectives on Asian Americans**

(3-0-3)

This course examines major psychological topics relevant to Asian Americans.

Broad areas to be covered include Asian American personality, identity, and mental health, as well as sociocultural influences that shape personality and mental health. Specific topics include cultural values and behavioral norms, the acculturation process, ethnic identity development, family processes, stressors and social support systems within Asian communities, psychopathology, academic achievement, and culturally competent mental health treatment and service delivery. This is an education-general course.

**ESS 40253. Latino Psychology**

(3-0-3)

The purpose of this course is to examine the psychosocial research and literature about Latino/a individuals and communities within the United States. Students will be actively involved in discussing issues relevant to Latino/a well-being, including immigration and acculturation, ethnic identity, religiosity, family life, prejudice and discrimination, and multiracial identity. Economic, educational and social opportunities for Latinos also will be studied, and efforts towards social advocacy and the delivery of psychological interventions for Latino communities will be critically examined. This is an education-general course.

**ESS 40255. Moral Development and Character Education**

(3-0-3) Howard

*Corequisite:* ESS 27999

This course is ideal for anyone who might serve as a coach at any time in the future. Topics include coaching strategies, substitution strategies, designing practices, dealing with parents, and the like. Conducting actual practice sessions and discussing relevant movies are scheduled throughout the course. There are no tests as a final portfolio is the sole grading method. Books include Phil Jackson's *Sacred Hoops* and Andy Hill and John Wooden's *Be Quick But Don't Hurry*.

**ESS 40256. Theories of Moral Development/Identity**

(3-0-3)

*Corequisite:* ESS 27999

Readings will cover diverse perspectives on the nature of moral development and identity, with a special emphasis on Catholic moral identity. Theories include perspectives within psychology, major religious traditions, and classic and modern theories. Students will compare and contrast theories, formulate a personal theory, design a research study, and implement a spiritual practice for their own identity development. This is an education-general course.

**ESS 40257. Character Formation: Theory, Research, and Pedagogy**

(3-0-3)

Students read research, study theory, and learn pedagogical approaches in the area of character education and moral development. They apply course material in a real-world setting of their choice. Students develop creative, analytical, and practical intelligences as well as leadership skills. This is an education-focused course.

**ESS 40259. Psychology of Personality**

(3-0-3) Kelly

*Corequisite:* ESS 27999

Major theories and research findings on social, emotional, and cognitive development are covered. Although emphasis is on the time from birth to early adulthood, some research on adulthood and the elderly is included. Attention is given to how different environments enhance or hinder healthy development.

**ESS 40260. Abnormal Psychology**

(3-0-3) Monroe

*Corequisite:* ESS 27999

Defines the concept of abnormal or maladaptive behavior; reviews the principles involved in human development and adjustment and describes the common clinical syndromes, their causes, and treatments.

**ESS 40261. Developmental Psychology**

(3-0-3) Farris

*Corequisite:* ESS 27999

Major theories and research findings on social, emotional, and cognitive development are covered. Although emphasis is on the time from birth to early adulthood, some research on pervasive developmental disorders and the elderly is included. Attention is given to how different environments enhance or hinder healthy development.

**ESS 40262. Cognitive Psychology**

(3-0-3)

*Corequisite:* ESS 27999

A lecture course presenting a cognitive approach to higher processes such as memory, problem solving, learning, concept formation, and language.

**ESS 40263. Autism**

(3-0-3) Whitman

*Corequisite:* ESS 27999

This seminar discusses topics related to developmental disabilities, with a special emphasis on pervasive developmental disorders and autism. Issues regarding their definition, etiology, and treatment are also discussed.

**ESS 40264. Sign Language**

(3-0-3) Stillson

*Corequisite:* ESS 27999

The American Sign Language class is designed to introduce basic vocabulary and simple sentence structure for conversational use. A cultural view is presented to examine traditions and values. A linguistic view is presented to introduce structure, syntax, and manual alphabet. Experiential activities, receptive and expressive exercises, and fluency opportunities are incorporated into the format. This is an introductory class for students with no prior knowledge of American Sign Language.

**ESS 40402. The Teaching of Writing**

(3-0-3)

*Corequisite:* ESS 27999

This course is designed to acquaint students seeking professional training in English with the methods, theories, and pedagogies appropriate for teaching English language arts and composition based on National Council of Teachers of English (NCTE) and International Reading Association (IRA) standards. Throughout the semester students will engage in an array of writing tasks, including lesson planning, research writing, and other formal and informal writing activities. Most of the writing projects serve as models for the kinds of assignments you might develop and implement in future classrooms.

**ESS 40403. The Literature of Disability**

(3-0-3) Duffy

A review of literature about "disability", how the "disabled" experience literature, and how to teach literature to the "disabled."

**ESS 40530. Educating in Faith: Catechesis in Catholic Schools**

(3-0-3) Poorman

This course is designed to assist prospective teachers of religion/theology at the junior high and high school levels in the catechesis of young adults in Catholic schools. The course is open to theology students at the undergraduate and graduate levels and to Notre Dame undergraduates with a minor in education, schooling, and society. Within class sessions designed to be highly dialogical, interactive, and prayerful, participants explore both theological and practical/pedagogical dimensions of the process of catechesis. Required readings are drawn from *The Catechism of the Catholic Church*, from publications of the United States Catholic Conference

(notably the *General Directory for Catechesis*, and the *National Directory for Catholics*) and from the works of several theologians and educational theorists who have contributed significant responses to the two central questions addressed in this course: "What is Catechesis?" and "How Do We Engage in Catechesis in the Context of Catholic Schools?" During this course, participants explore all of the central tasks that constitute the holistic process of catechesis as delineated in the general and national Catholic catechetical directories and other catechetical documents and as adapted for use in Catholic schools: communicating knowledge of the mystery of God's self-revelation; fostering maturity of faith and moral development; sharing and celebrating faith by forming Christian communities of prayerful people; promoting Christian service and social justice; and witnessing to faith through pedagogy and by the example of authentic spiritual lives. Participants are required to read all assigned selections from the course packet [available through the copy shop in LaFortune Student Center]. Participants also actively contribute to class sessions where they are called upon both to design and practice various catechetical pedagogies. Finally, they synthesize within the following assignments what they have learned from both readings and class sessions: (1) a midterm examination; (2) a personal mission statement for themselves as catechists (2-3 pages); and (3) an integrative essay (10-12 pages) answering the question: "What does it mean to educate in faith?"

**ESS 43200. Research on School Effects**

(3-0-3)

*Corequisite:* ESS 27999

It might seem a truism that schools have powerful effects on student achievement. Yet beginning with the landmark Equality of Educational Opportunity study in 1966, social scientists have debated the role that schools play in the production of student achievement. Does it matter much, which school a student attends? Why are some schools chronically low performing, and what are the characteristics of more effective schools? Students should have completed coursework in methods and statistics for social research or equivalent coursework before enrolling in this course.

**ESS 43201. Population Dynamics**

(3-0-3) Williams

Demography, the science of population, is concerned with virtually everything that influences, or can be influenced by, population size, distribution, processes, structure, or characteristics. This course pays particular attention to the causes and consequences of population change. Changes in fertility, mortality, migration, technology, lifestyle, and culture have dramatically affected the United States and the other nations of the world. These changes have implications for a number of areas: hunger, the spread of illness and disease, environmental degradation, health services, household formation, the labor force, marriage and divorce, care for the elderly, birth control, poverty, urbanization, business marketing strategies, and political power. An understanding of these is important as business, government, and individuals attempt to deal with the demands of the changing population.

**ESS 43258. Motivation and Academic Learning**

(3-0-3) Turner

Traditional studies of learning have focused almost exclusively on cognitive or "cold" processes. Recent research on learning illustrates how "hot" processes also influence thinking and academic learning. In this course, we focus on how social, motivational, and emotional influences interact with cognitive processes to affect academic learning. Social influences will include students' social goals in school, friendships, and family dynamics. Motivational influences are explored through the study of major theories of achievement motivation, including attribution, self-efficacy, intrinsic motivation, "possible selves," and goal theories. Emotional factors such as coping mechanisms, test anxiety, and well-being also are discussed. In addition, we explore how development affects students' social, motivational, and emotional responses to learning. Child, adolescent, and adult models are discussed, and applications to educational settings will be an integral part of the course. This is an education-focused course.

**ESS 43640. Seminar: Educational Research**

(3-0-3) Greene, Turner

*Corequisite:* ESS 27999

Students will learn about both methods and topics in educational research. Students will design and execute an original research study.

usually set to accommodate the intern's availability and the needs of the host agency. Spring semester.

### **ESS 43641. Seminar: Literacy in the Inner City**

(3-0-3)

For students minoring in education, schooling, and society, this course is designed as an advanced introduction to conducting research in the area of literacy. In designing this course as an "advanced" introduction, it was assumed that those enrolled in the course have developed a research project for at least one other course. In turn, students are expected to either build on a previous study or develop a new project for this class. As students work on their own research, they will read a number of different studies that will enable them to examine a wide range of research methods: life histories, linguistic analyses, ethnographic studies of both home and school, case studies, and the like. The class will address the following in analyzing the research design of a given piece of research: What questions motivate the study? Are these questions that relate to educational policy? To teaching? To developing theory? What is the theoretical frame out of which these questions develop? What's at stake in asking these questions? What are the most effective methods for answering these questions? What are the strengths and weaknesses of different research methods? What are the consequences of what we find for those we study and for ourselves?

### **ESS 43642. Seminar: New Directions in Educational Research**

(3-0-1)

Seminar for seniors in the ESS minor. Students will study new approaches to educational research.

### **ESS 45096. Sociology Internships**

(V-0-V)

*Corequisite:* ESS 27999

This is an "experiential" course designed to give students some practical experience in the area of urban affairs, social welfare, education, health care services, or business, in order to test their interest, complement their academic work, or acquire work experience preparatory for future careers. Students are placed with a community agency in the South Bend area, and normally work six hours a week as interns under the supervision of an experienced practitioner. Hours are flexible, usually set to accommodate the intern's availability and the needs of the host agency. Below is a list of agencies that have accepted interns. Students may also find other possible placements on their own (subject to approval by the instructor). Adoption Network, Center for the Homeless, Firefly Festival for the Performing Arts, FIRE Home Management Resources, La Casa de Amistad, Neighborhood Development Assoc., Safe Station (Youth Runaway Shelter), Sex Offense Services, Madison Center, South Bend Department of Community and Economic Development, South Bend Heritage Foundation, South Bend (Public) Housing Authority, Alliance for Catholic Education's IEI Office, Early Childhood Development Center, Good Shepherd Montessori School, Northern Indiana Historical Society, Robinson Community Learning Center, Upward Bound, Washington High School, South Bend, Aids Ministry, Hospice of St. Joseph County, St. Joseph Medical Center's Chapin Street Health Center, Adult Probation, Indiana Legal Services, Individual Judges, Juvenile Justice Center (two semesters), St. Joseph County Police Department, and South Bend Police Department. There are no prerequisites; however, preference is given to sociology majors, ESS minors, and students who have had coursework in a related area. This is a graded course. In addition to fieldwork, academic work includes reading scholarly works related to the field placement, and a final paper. Contact Dr. Power for more information (631-0803).

### **ESS 45097. Sociology Internships**

(0-0-3)

This is an "experiential" course designed to give students some practical experience in the area of urban affairs, social welfare, education, health care services, or business, in order to test their interest, complement their academic work, or acquire work experience preparatory for future careers. Students are placed with a community agency in the South Bend area and normally work six hours a week as interns under the supervision of an experienced practitioner. Hours are flexible,

## Institute for International Peace Studies

### IIPS 20501. International Relations

(3-0-3) Lieber

*Corequisite:* IIPS 27999

This course provides students with an understanding of guiding concepts and current events in world politics. As such, the course has these central objectives: to introduce various theoretical frameworks for analyzing international relations, and to supply a basic understanding of how citizens might be effective actors and observers of global politics. We explore substantive issues such as cooperation and conflict in international relations, the cause of war, terrorism, nuclear proliferation, regional free trade agreements, the causes and effects of economic globalization, and the role of international law and institutions. Discussion sections use current events and policy dilemmas to illustrate concepts introduced in lectures.

### IIPS 20502. Responding to World Crisis

(5-0-3) Valenzuela

This course focuses on current issues in international affairs and what the US policy response to them should be. The participants will be divided into groups specializing in events and issues in each continent in the world, with an additional group focusing on the international economy. Each session of the seminar will hear the reports prepared by students in two of such (i.e., the Africa and the Asia groups, or the Europe and World Issues groups). The reports must be individually written, with the crisp style of policy briefs, on different countries or issues, and must include an assessment of the origins and nature of the problem or problems at hand, as well as recommendations regarding what the US should do. The required reading for the seminar will be the *New York Times* (the printed version) on a daily basis. Students may go to Internet news services of the *New York Times* or of other sources such as the *Economist* for additional background information on the situation they wish to write about.

### IIPS 20701. Rich, Poor, and War

(3-0-3) Whitmore

*Corequisite:* IIPS 27999

This course examines the interrelationships between economic injustice and violence. It begins by investigating the gap between rich and poor both in the US and worldwide. We also look at the history of Christian thought on wealth and poverty. We then address the ways in which economic disparity intersects with the problem of violence in both domestic (violence against women) and political realms (war and revolution). Next, we canvass Christian thought on the use of violence. This raises the question of whether Christianity itself contributes more to violence or to peace. Finally, we pose the question of whether forgiveness for violence is advisable or feasible.

### IIPS 20702. War, Poverty, Genocide, and Justice

(3-0-3) Walsh

This course examines theories of distributive justice applied to political and economic systems that contribute to violence and suffering. Specifically, we will use the theories of distributive justice of Plato, John Rawls, and Michael Walzer to understand the ongoing injustices of global poverty, genocide, and war. Their theories are about the just distribution of rights, privileges, obligations, opportunities, and goods; in other words, they are theories of what a just structure is. Where there is abject poverty, genocide, or war, there is also structural injustice. This basic idea is in the following quote from Jeremy Hobbs, Executive Director of Oxfam International: "Oxfam believes that poverty and injustice are inseparable .. and that both are structural and avoidable. "Many people believe that such injustices are either inevitable (e.g., poverty is a result of natural selection, genocide and war are unavoidable results of human nature) or the results of individual decisions (e.g., Hitler and Stalin are the individuals responsible for certain wars and genocides, and individuals live in abject poverty because each is either stupid or lazy). This course consists of theory-driven arguments against such fatalistic or individualistic explanations of injustices.

### IIPS 20703. War, Law, and Ethics

(3-0-3) Baxter

*Corequisite:* IIPS 27999

This course is designed to explore the ethical and legal considerations related to war and the use of force. Beginning with a historical overview of Christian thinking on war and peace, we will develop an account of various ethical positions on the use of force, including views rooted in the just war tradition and in pacifism. We will also consider the ethical implications of contemporary issues related to the use of force, e.g., sanctions, war crimes, humanitarian intervention, and terrorism.

### IIPS 20704. Christianity and World Religions

(3-0-3) Malkovsky

*Corequisite:* IIPS 27999

The purpose of this course is to introduce the student to the basic teachings and spiritualities of Hinduism, Buddhism, and Islam. We will approach these religions both historically and theologically, seeking to determine where they converge and differ from Christianity on such perennial issues as death, meaning, the nature of the ultimate mystery, the overcoming of suffering, etc. We will also examine some traditional and contemporary Catholic and Protestant approaches to religious pluralism. Our own search to know how the truth and experience of other faiths is related to Christian faith will be guided by the insights of important Catholic contemplatives who have entered deeply in the spirituality of other traditions. By course's end we ought to have a greater understanding of what is essential to Christian faith and practice as well as a greater appreciation of the spiritual paths of others. Requirements: Short papers, midterm exam, and final exam.

### IIPS 20705. Ways/Peacemaking: Gandhi/King

(3-0-3) Neiman

An intensive study of the philosophy and spirituality of two of the greatest activists and peace educators of our century, M. Gandhi and M. Luther King. We will be especially concerned with the way each of these human beings came to construct new, yet quite ancient, images or controlling myths that they hoped would lead us to think and act in revolutionary ways.

### IIPS 20707. A Faith to Die For

(3-0-3) Baxter

*Corequisite:* IIPS 27999

An introduction to Catholic moral theology, with an accent on how Catholic belief and practice shape the Church's understanding of the moral life. Aspects of Catholic belief and practice to be covered include baptism, penance, reading scripture, preaching, prayer, the Eucharist, martyrdom, religious life, marriage, and mission. In the context of these beliefs and practices, several leading themes in Catholic moral theology will be explored (e.g., sanctification, the eternal and natural law, and virtues and vices), and several moral issues will be examined (e.g., abortion, suicide, capital punishment, economic justice, and war and peace). This course explores an understanding of the moral life in terms of participation in the life, death, and resurrection of Christ, but at the same time it avoids construals of the moral life that rest merely on pious exhortations ("Jesus says"), assertions of ecclesial authority ("the Church says"), or invocations of negative moral prohibitions ("thou shalt not"). Thus, the "faith" will be presented as a set of beliefs and practices that are disturbingly radical, demanding that Christians die to themselves, yet also deeply attractive, in that dying serves as a passageway to true life. As suggested by the title, a leading emphasis in the course is that only a faith worth dying for can forge a moral life that is truly worth living. Readings include selections from Scripture, liturgical texts, theological and moral treatises, encyclicals, and the documents of Vatican II, plus Augustine's *Confessions*, Cantalamessa's *The Eucharist: Our Sanctification*, Graham Greene's *The Power and the Glory*, short stories of Flannery O'Connor, Dorothy Day's *The Long Loneliness*, and Helen Prejean's *Dead Man Walking*. Evaluation is based on a midterm, a final, several short papers, and interactive class participation.

### IIPS 20710. Women in Islamic Societies

(3-0-3) Afsaruddin

This course is a broad survey of women's and gender issues in various Islamic societies, with a focus on the Arab Middle East. The first half of the semester will concentrate on the historical position of women in Islamic societies, defined by the normative values of Islam and by cultural traditions and norms. We will discuss how the interpretations of these values in diverse circumstances and who gets to do the interpreting have had an important impact on women's societal roles. The

second half of the course will privilege women's voices and agency in articulating their gendered identities and roles in a number of pre-modern and modern Islamic societies. Our sources for discovering these voices are women's memoirs, fiction, magazine articles, and public speeches. We will also focus on how historical phenomena such as Western colonialism, nationalist liberation movements, and civil and other forms of war have given rise to women's organized movements and a feminist socio-political consciousness in many cases.

### IIPS 20713. Culture and Politics in Northern Ireland

(3-0-3) Smyth

Using a broad range of texts—drama, fiction, poetry, film, painting, and documentary material—an examination of the politics of culture, and the cultures of politics, in the North of Ireland during the 20th century.

### IIPS 20714. Islamic Societies of the Middle East and North Africa: Religion, History, and Culture

(3-0-3) Afsaruddin

This course is an introductory survey of the Islamic societies of the Middle East and North Africa from their origins to the present day. It will deal with the history and expansion of Islam, both as a world religion and civilization, from its birth in the Arabian Peninsula in the seventh century to its subsequent spread to other parts of western Asia and North Africa. Issues of religious and social ethics, political governance, gender, social relations and cultural practices will be explored in relation to a number of Muslim societies in the region, such as in Egypt, Morocco, and Iran. The course foregrounds the diversity and complexities present in a critical area of what we call the Islamic world today.

### IIPS 20715. World Religion and Catholics in Dialogue

(3-0-3) Gorski

*Corequisite:* IIPS 27999

A theological exploration of Hinduism, Buddhism, Taoism, Judaism, Islam and the relationship of Christianity to those religions. The goal of this exploration is specifically (1) to set forth the essential characteristics of the world's great religions; (2) to disengage the essential differences between Christianity and the other world religions; (3) to identify the distinctiveness of Catholicism within the family of Christian traditions; and (4) to examine historically and systematically the Christian theological appraisal of other world religions. The ultimate goal of this course is to enable the students to gain a deeper understanding of Christianity by "passing over" into and experiencing, as well as appraising, the different major religious traditions of the world. To enhance the learning experience, the course will make abundant use of films. The students are required to attend class regularly and punctually. Indeed, strong emphasis is placed on the requirement to attend class faithfully. Students are allowed but one single absence during the semester.

### IIPS 20716. Introduction to Islamic Civilization

(3-0-3)

This course is designed to introduce students to Islamic civilization and Muslim culture and societies. The course will cover the foundations of Islamic belief, worship, and institutions, along with the evolution of sacred law (*al-shari'a*) and theology, as well as various aspects of intellectual activities. The Koran and the life of the Prophet Muhammad will be examined in detail. Both Sunni and Shi'i perspectives will be considered. Major Sufi personalities will be discussed to illuminate the mystical, and popular, tradition in Islam. Topics on arts, architecture, literary culture, and sciences will be covered. Although the course is concerned more with the history of ideas than with modern Islam as such, it has great relevance for understanding contemporary Muslim attitudes and political, social, and cultural trends in the Muslim world today.

### IIPS 20727. Moral Problems

(3-0-3) Sterba

In this course, we will critically evaluate alternative solutions to a number of contemporary moral problems. We will begin with the problems of the distribution of income and wealth and our obligations to distant peoples and future generations. We will then turn to the problem of sexual equality and to a particular challenge to feminism that maintains that men themselves suffer from a "second sexism" that benefits women. Finally, we will take up the problem of affirmative action and

examine the legal and moral issues raised by affirmative action as it again makes its way to a decision before the US Supreme Court.

### IIPS 20901. Gender Roles and Violence in Society

(6-0-3) Sobolewski

*Corequisite:* IIPS 27999

Much of the violence in contemporary society—whether it is domestic abuse, school shootings, gang warfare, video games, or inter-ethnic conflict—has something to do with gender. This course explores the connection between gender role socialization and the expression of conflict or aggression. Through readings, discussions, films, and projects, students will be encouraged to examine sex differences in violent behavior as the outcome of complex processes. We will try to understand those processes better and develop the ability to describe the causes and their effects.

### IIPS 20902. Environmental Ethics

(3-0-3)

The course will be an attempt to come to grips critically with the moral significance of contemporary concern for ecology and the environment.

### IIPS 20903. Environment and Development in Global Perspective

(3-0-3)

In this course, we will examine contemporary struggles over natural resources in the context of globalization. We will begin by analyzing the model of development that is dominant in the USA, and seek to understand how it has emerged as a "favored" model in different parts of the world. Who benefits from this model of development? Who suffers? What forms of power are deployed to maintain this model? To challenge it? Next we will turn our attention to the global consequences of particular patterns of production and consumption. We will take a close look at two natural resources, petroleum and water, and examine the political and social contexts that have given rise to collective struggles over their control and distribution. Finally, we will step into the realm of futurist sociology and ask what the future might look like if current development patterns continue. Classes include lectures, discussions, and films. There are no exams in this course, but students should be prepared to participate in class discussions, to write several short papers, to submit bimonthly evaluations of current news reports, and to lead one class discussion on the readings.

### IIPS 20904. The Ethics of Energy Conservation

(3-0-3)

This is a joint theology and engineering course exploring the ethics of energy conservation by using the method of community-based learning. Students will begin by using the university campus as a "trial laboratory" for measuring energy efficiency and thinking creatively about possible energy conservation measures. We will then ask them to conduct a limited energy efficiency and conservation study for selected non-profit organizations in the South Bend community. This course will fulfill a number of civic learning goals, including the cultivation of theological and scientific competence in environmental ethics; the identification of leadership skills necessary to address the concrete concerns facing nonprofit organizations as they strive to meet pressing human needs in an environmentally sound manner; and formation of consciences sensitive to the social responsibility of caring for the environment.

### IIPS 20905. Sociology of Terrorism

(3-0-3) Sobolewski

*Corequisite:* IIPS 27999

The purpose of this course is to provide a broad review of terrorism with a focus on sociological approaches such as social movements theory, network analysis, and ideology. The course will examine profiles of terrorists within a historical and social psychological perspective. Specifically, we will focus on the purpose and difference of terrorists and terrorist groups and frame our discussion around historical factors that continue to influence modern terrorism. Finally, we will discuss the consequences of terrorism in terms of social responses to terrorism, the economic and political costs of these responses, and the possibility of preventing terrorism in the future.

**IIPS 20906. Energy and Society**

(3-0-3) Kolata

*Corequisite:* IIPS 27999

A course developing the basic ideas of energy and power and their applications from a quantitative and qualitative viewpoint. The fossil fuels (coal, oil, natural gas) are studied together with their societal limitations (pollution, global warming, and diminishing supply). Nuclear power is similarly studied in the context of the societal concerns that arise (radiation, reactor accidents, nuclear weapons proliferation, and high-level waste disposal). The opportunities, as well as the risks, presented by alternative energy resources, in particular solar energy, wind, geothermal, and hydropower, together with various aspects of energy conservation, are developed and discussed. This course is designed for the nonspecialist.

**IIPS 27999. IIPS Gateway Course**

(0-0-0)

This course is used as a corequisite for administrative purposes so that students in the Peace Studies program will be able to Web-register for other IIPS courses.

**IIPS 30101. Introduction to Peace Studies**

(3-0-3) Myers, Philpott

This course surveys (1) the major causes of deadly conflict around the world; (2) various definitions of "peace" and the conditions under which it occurs and is sustained; and (3) the style and comparative success of various strategies such as building peace movements and nonviolent social change as ways to achieve peace. (Open to all undergraduates—required for peace studies minors and majors)

**IIPS 30301. How to Do Political Research**

(3-0-3) Coppedge

This is a course primarily intended for juniors or seniors who are writing, or are planning to write, a senior essay, although it is open to all majors. It helps students acquire the practical skills that are essential for completing a substantial empirical research project: posing a research question, finding out what is already known, staking out an original argument, identifying counterarguments, deciding what kind of evidence is required to figure out who is right, clarifying concepts and boundary conditions, gathering the evidence, analyzing the evidence, and interpreting the analysis. The course encourages students to consider a variety of approaches and helps them decide whether to use quantitative methods, qualitative methods, or both. Students will do independent research to compile a bibliography, gather and analyze evidence, and write an outline, but will not write a paper. Instead, they will present and defend their findings orally and visually. All students are expected to participate vigorously in evaluations of their peers' research.

**IIPS 30401. Terrorism, Peace, and Other Inconsistencies**

(3-0-3) Lopez

This course examines the roots and sustaining conditions of contemporary terrorism, as well as diverse counter-terrorism measures and policy prescriptions for the US and for the international community. We then address what challenges both the causes and the cures for terror pose to those who take seriously the creation of a world with less war and violence and greater cooperation among rivals. The course will require a heavy dose of reading each week, from 200–250 pages, and participants will be required to write four persuasive and/or policy papers, based on course readings, of about seven pages each in length.

**IIPS 30402. Global Issues and the United Nations**

(3-0-3) Smith

*Corequisite:* IIPS 27999

This course introduces students to the operations of the United Nations and its potential for contributing to a more peaceful, equitable, and sustainable world. We take up the world's most pressing issues—such as peace and security, nuclear disarmament, poverty, economic and gender inequalities, and environmental degradation—to explore how the world's governments have attempted to address global problems. Has the UN been an effective place for managing these issues? How might it be improved? What unique roles do civil society groups, or nongovernmental organizations (NGOs), play in the pursuit of the United Nations' mission and goals? To help us consider these questions, we will meet via videoconference with United Nations ambassadors, UN officials, and

representatives from civil society groups. Students will have opportunities to ask questions of distinguished guest speakers, who will be joining us from the United Nations headquarters in New York. In addition to gaining an understanding of contemporary global issues, students will learn about the practical, day-to-day operations of this important world body. They will also have a chance to offer their own proposals for improving the ability of the world community to address major problems.

**IIPS 30403. Borders, Boundaries, and Frontiers**

(3-0-3) Kaufman

*Corequisite:* IIPS 27999

This course explores political borders, boundaries, and frontiers and their changing meaning and dynamics from the beginning of the colonial era (ca. 1500) until the present. Through the analysis of these three terms we will explore the formation of political borders, life along borders, and border conflicts and their resolutions (or lack thereof). Geographically, we will look at areas including the Middle East, Africa, Southeast Asia, and the US-Mexican border in order to analyze this theme through both global and regional perspectives.

**IIPS 30404. The United Nations and Global Security: Where Politics, Law, and Ethics Contend**

(3-0-3) Johansen

In this course, students explore how to increase peace and security for all people on earth. The course emphasizes human security as much as national security in addressing questions such as: What are the reasons for the United Nations' successes and failures in maintaining international peace and security? What are the impacts of United States security policies toward the United Nations? What is the international legal basis for humanitarian intervention and for preventing crimes against the peace, war crimes, genocide, crimes against humanity, and acts of terrorism? How can those who want to be good citizens, both of their nation and of the world, meet the ethical challenges posed by security problems in an age of globalization and weapons of mass destruction? Students evaluate ways to strengthen the role of international law and organization in preventing armed conflict while addressing major issues of international peacebuilding.

**IIPS 30405. Politics of Humanitarianism**

(3-0-3) Fast

*Corequisite:* IIPS 27999

The principles of impartiality, neutrality, and independence have traditionally guided humanitarian actors working to provide life-saving assistance to those affected by violent conflict and war. However, in the wake of the end of the Cold War and the more recent wars in Iraq and Afghanistan, the politicization of humanitarian aid and the changing nature of violence have forced humanitarians to reevaluate some of the central assumptions of humanitarian action. Using a series of case studies, this course will examine the central debates and dilemmas of humanitarian action, especially in relation to the "relief-to-development" continuum, military-civilian interactions, safety and security issues, and the protection of war-affected populations. The course requires a substantial amount of reading and will be conducted in a seminar format. Students will be required write a series of papers as well as an exam.

**IIPS 30502. Diplomacy of US Foreign Policy**

(3-0-3)

The United States emerged from World War II in a new peacetime role as a superpower. We had to discover for ourselves how to combine diplomacy and military power in a manner consistent with our democratic principles. While the policy choices were stark in the days of the Cold War, they have become more complex in recent years. Presented by a career diplomat who headed US overseas missions in four countries, the course emphasizes case studies and the practical problems that have confronted US leaders from the end of World War II to the present. The issues treated will illustrate the height of tensions in the Cold War, the emergence of détente and deterrence, and the challenges of the global agenda after the end of the Cold War. The course aims to help the student understand current foreign policy issues, which will be discussed briefly in class. A research paper (10 pages), a midterm exam, and a final exam are required.

**IIPS 30503. Politics of Southern Africa**

(3-0-3) Walshe

*Prerequisite:* (POLS 20400 OR POLS 242 OR POLS 242A) OR (GOVT 20400 OR GOVT 242 OR GOVT 242A)

This course focuses on the key state of the region—the Republic of South Africa. After outlining the political history of apartheid, the phenomenon of Afrikaner nationalism, and the rise of African nationalism and the liberation movements, attention turns to the country's escalating turmoil of the 1980s and resulting political transition in the 1990s. South Africa's political and economic prospects are also examined. The semester concludes with a survey of the transitions that brought South Africa's neighboring territories to independence, the destabilization strategies of the apartheid regime, and United States policy in that region.

**IIPS 30504. International Law**

(3-0-3) Reydams

*Corequisite:* IIPS 27999

International law and institutions are increasingly important for understanding the nature of world politics. This course investigates the interaction between international law and international politics. We examine how international institutions operate, the significance of international law to state behavior, and the connections between international norms and domestic law. The substantive issues addressed in this course include trade, human rights, and environmental protection.

**IIPS 30505. International Organizations**

(3-0-3)

Examination of governance in international relations, including both formal and informal institutions. The functioning of organizations such as the United Nations, International Monetary Fund, World Trade Organization, European Union, and multilateral development banks. Research papers on topics including peacekeeping and humanitarian intervention, political conflicts surrounding trade liberalization, and assessment of economic development programs.

**IIPS 30508. UN and Global Security**

(3-0-3) Johansen

This course explores the United Nations' responsibility for maintaining international peace and security; the reasons for its successes and failures in peacekeeping, enforcement, and peacebuilding in recent cases; the international legal basis for humanitarian intervention and for preventing crimes against the peace, war crimes, crimes against humanity, and other gross violations of human rights; and the ethical challenges posed for people seeking to be good citizens, both of their nation and of the world. Students evaluate ways to strengthen the role of international law and organization in preventing war and terrorism while addressing ethical issues related to international peace and security.

**IIPS 30509. Latin American International Relations**

(3-0-3)

This course examines the international relations of Latin America with an emphasis on what determines US policy toward Latin America, and the policies of Latin American states toward the United States, other regions of the world, and each other. It analyzes recurring themes in US-Latin American relations, including the response of the United States to dictatorships, expropriations of US-owned property, and revolution. It also studies new directions and issues in Latin America's international relations, e.g., trade policy, the environment, migration, and drugs in a post-Cold War world.

**IIPS 30510. War and the Nation-State**

(3-0-3)

*Prerequisite:* (POLS 10200 OR POLS 141 OR POLS 141A) OR (POLS 20200 OR POLS 241 OR POLS 241A) OR (GOVT 10200 OR GOVT 141 OR GOVT 141A) OR (GOVT 20200 OR GOVT 241 OR GOVT 241A)

This course will examine the phenomenon of war in its broader political, social, and economic context since the emergence of the modern nation-state. The general themes of the course include the impact of nationalism, democratization, industrialization, military professionalization, the nuclear revolution, and the information and communication revolution on the development of warfare and

the state. Particular historical emphasis will be placed on exploring the causes and conduct of World War I and World War II.

**IIPS 30511. Politics of Tropical Africa**

(3-0-3) Walshe

Following an introduction to traditional political institutions, the colonial inheritance, and the rise of African nationalism, the course concentrates on the current economic and political problems of tropical Africa. This includes case studies of political organizations, ideologies, and government institutions in Ghana, Nigeria, and Tanzania.

**IIPS 30512. International Political Economy**

(3-0-3) Mukherjee

*Prerequisite:* (POLS 10200 OR POLS 141 OR POLS 141A) OR (POLS 20200 OR POLS 241 OR POLS 241A) OR (GOVT 10200 OR GOVT 141 OR GOVT 141A) OR (GOVT 20200 OR GOVT 241 OR GOVT 241A)*Corequisite:* IIPS 27999

This course examines the interactions between international politics and international economics. We begin with a brief exploration of the economic rationale for trade and financial relations, and then examine the recent political history of global trade and finance. Topics include global and regional trade liberalization; coordination and cooperation in monetary policy (including the advent of the single currency in Europe); causes and implications of financial crises; and the linkages among economic globalization, environmental regulation, and human rights.

**IIPS 30514. US Foreign Policy**

(3-0-3)

The United States is the most powerful state in the world today. US foreign policy is important not just for US citizens, but it also affects whether others go to war and whether they will win, whether states receive economic aid, what kind of aid starving people will receive, and the extent of global efforts to cope with environmental problems. With these issues at stake, this course addresses the following questions: What determines US foreign policy? What is the national interest? When do we go to war? Would you send US soldiers into war? If so, into which wars, and for what reasons? How do our economic policies affect others? Does trade help or hurt the US economy and its citizens? To answer these questions, we first study several theories about foreign policy. We then examine the US foreign policy process, including the President, Congress, the bureaucracy, the media, and public opinion. To see how this all works in practice, we turn to the history of US foreign policy, from Washington's farewell address through the World Wars and the Cold War to the Gulf War. We then study several major current issue areas, including weapons of mass destruction, terrorism, trade and economics, and the environment. Finally, we develop and debate forecasts and strategies for the future.

**IIPS 30517. International Relations in East Asia**

(3-0-3) Moody

*Corequisite:* IIPS 27999

This course explores the interactions of the states and societies in the East Asian region, focusing mainly on the relationships of China and Japan, their interactions with each other and with the outside "Asian" powers, the United States, and Russia (Soviet Union). The first set of class discussions examines the China-centered system in East Asia prior to the intrusion of the new world system carried by Western imperialism. The course then turns to a discussion of this western impact: the colonization of most of the Southeast Asian societies, the reduction of China to a "semi-colony" and the subsequent process of revolution, both nationalist and communist, in that country, Japan's turn to "defensive modernization" and its own imperialism to ward off the West and claim status as a great power on a par with the Western countries.

**IIPS 30518. Latin American Politics**

(3-0-3) Mainwaring

*Prerequisite:* (GOVT 10400 OR GOVT 142 OR GOVT 142A) OR (GOVT 20400 OR GOVT 242 OR GOVT 242A)

How and why are Latin American politics distinct? What are the major challenges facing Latin America as it enters the new millennium? We will address these and

other questions by exploring several themes in the first half of the course. These topics include culture, the role of the Catholic Church, democracy, economic development, and the environment. With the concepts used to examine these themes, we will spend the latter part of the course examining the cases of three Latin American countries in comparative perspective. We will focus on Chile, Brazil, and Mexico.

### **IIPS 30519. Diplomacy and US Foreign Policy**

(3-0-3)

The United States emerged from World War II in a new peacetime role as a superpower. We had to discover for ourselves how to combine diplomacy and military power in a manner consistent with our democratic principles. While the policy choices were stark in the days of the Cold War, they have become more complex in recent years. Presented by a career diplomat who headed US overseas missions in four countries, the course emphasizes case studies and the practical problems that have confronted US leaders from the end of World War II to the present. The issues treated will illustrate the height of tensions in the Cold War, the emergence of detente and deterrence, and the challenges of the global agenda after the end of the Cold War. The course aims to help the student understand current foreign policy issues, which will be discussed briefly in class.

### **IIPS 30522. Twentieth-Century American Military Experience**

(3-0-3)

Is America, as historian Geoffrey Perret contends, a "country made by war"? Regardless of one's opinion, a systematic study of America's wars is essential to either confirm or refute the above statement and obtain a more complete understanding of the nation. There have certainly been ample historical occurrences to support Perret's assertion over the last century, and this course will investigate the validity of the question by examining the modern American military experience from after the Franco-Prussian War of 1871 to the present. We will explore the causes, conduct, and consequences of the major military conflicts of the 20th century in which the US was involved or that had a significant impact on the US, using traditional historical materials. We will also read several battlefield memoirs to further examine the conflicts at the tactical level and also explore the human dimension of war. Using a fundamental thesis to address war at the political, strategic, operational, and tactical levels, the goal of the course will be to gain a better understanding of the relationship among the different levels as well as the importance of each. As a part of their discovery process, students will take three essay exams and write a research paper assessing the combat effectiveness of a particular unit that existed during this period to assist them in determining, developing, and delivering a response to Perret's statement.

### **IIPS 30523. Indigenous and Colonial Mexico**

(3-0-3) Beatty

This course investigates the history of Mesoamerica from the Olmec, Mayan, and Aztec societies to Mexico's independence from Spain after 1800. We will examine the nature of several indigenous societies, their conquest and domination by Europeans, post-conquest debates concerning Indians' nature and colonial Indian policy, the structure of colonial society, including relations between Indians, Africans, and Europeans, Catholic conversions and the role of the Church, and finally the causes of independence. We will use readings, lectures, discussions, archeological evidence, film, and literature throughout the course. Students need not have any background in Latin American history.

### **IIPS 30525. Latin American Development and Politics**

(3-0-3)

Latin American countries face many challenges, some inherited from Spanish and Portuguese colonial rule, some created by today's globalization, and some common to all developing countries. This course examines how several Latin American countries have responded to the most important of these challenges: how to build a state that can maintain order at home and stay at peace with its neighbors; how to form legitimate governments that can pass needed laws; how to ensure that citizens have political rights and a say in the political process; how to promote industrialization and economic growth; and how to achieve a more equal distribution of wealth and ensure that basic human needs are met.

### **IIPS 30526. Political Movements in Asia**

(3-0-3) Hui

This course analyzes a wide range of political movements including nationalist and revolutionary movements, guerrilla insurgencies, terrorist organizations, democracy movements, and peace movements. The Asian region encompasses China (including Taiwan, Tibet, Xinjiang, Hong Kong), Mongolia, North and South Korea, Japan, the Philippines, Vietnam, Thailand, Cambodia, Burma, Malaysia, Indonesia, India, Pakistan, Nepal, Afghanistan, and so on. To understand various movements, we will study global trends, human rights values, cultural differences, religious doctrines, historical legacies, state-society relations, leadership skills, mobilization strategies, and violent vs. nonviolent trajectories. In addition to analytical readings, we will also watch a series of documentaries and read a number of prominent autobiographies.

### **IIPS 30527. Chile in Comparative Perspective**

(3-0-3) Valenzuela

*Corequisite:* IIPS 27999

Students will learn about the Chilean political process since the 1930s, with a special emphasis on the period from 1964 to 2002. Students will analyze and discuss institutional, economic, social, and cultural changes that occurred during that period. Chilean politics, economics, and sociology will be addressed from a historical perspective.

### **IIPS 30528. US Foreign Policy Since 1945**

(3-0-3) Miscamble

This course covers the main developments in American foreign relations from the Spanish-American War in 1898 through World War II. It traces the emergence of the United States as a major world power and examines in some detail how the United States became involved in the two world wars. A recurring theme will be the major traditions in America foreign policy and the ways in which these traditions influenced policy makers in the early years of the "American Century."

### **IIPS 30529. Global Politics in the Post-Cold War Era**

(3-0-3) Hui

This course analyzes US foreign policy in the post-Cold War and post-September 11 world. We first examine a number of underlying causes for global problems in the post-Cold War world, including civilizational differences, state failure, poverty, and political domination. We then discuss the vexing problems of religious violence, ethnic cleansing, and genocide. Humanitarian crises present the challenges of humanitarian intervention, peace making, post-conflict reconstruction, democracy building, and bringing justice for crimes against humanity. We will also explore a wide range of foreign policy issues in the post- Sep. 11 world, including international terrorism, rogue states, weapons of mass destruction, American primacy, anti-Americanism, unilateralism and multilateralism, and the war in Iraq.

### **IIPS 30530. Israeli-Palestinian Conflict**

(3-0-3) Kaufman

This class discusses the roots, evolution, current situation, and prospects of resolution of the Israeli-Palestinian conflict. In order to better understand this theme, the class will also locate this conflict in larger regional and global perspectives. Thus, issues such as nationalism in the Middle East, colonial impact in the region, the Arab states and their involvement in the conflict, Cold War and post-Cold War dynamics, will all be an integral part of the class discussions. We will also juxtapose the competing narratives of Israelis and Palestinians toward this conflict. Finally, we will engage in an un-historical practice by looking at the future and thinking about possible avenues for concluding this protracted conflict

### **IIPS 30531. Technology of War and Peace**

(3-0-3)

This course surveys the impact of military technologies on world history from the 16th century onward. Topics include the rise of gunpowder weaponry and the fortification revolution in the early modern period, navalism, particularly in the 19th century, the role of military technologies in European colonial expansion, and the science-based military of the 20th century, and chemical and biological (and so-called "soft-kill") weapons, leading up to the age of nuclear weapons. The course considers also military technologies as deterrents, military technologies

as expressions of culture, and the issue of warfare as a stimulus to technological development.

### IIPS 30532. Modern Middle East

(3-0-3)

This course surveys Middle Eastern history from 1500 to the present. The primary themes to be covered include the emergence and demise of the last Muslim unitary states; European colonial and imperial penetration of the Middle East in the 19th century; the social and cultural impact of imperialism; state-building in the 20th century; new ideologies/nationalisms; and contemporary problems of political and economic development. We will also consider the most important movements of Islamic reform and revival over the past two centuries.

### IIPS 30533. The Transatlantic Relationship

(3-0-3) Thompson

*Corequisite:* IIPS 27999

Since the end of the Cold War, there have been two notable ideas developed by scholars of international relations. The first idea, first developed by Francis Fukuyama, is that Western civilization has triumphed globally over other civilizations, while the second idea, developed by Samuel Huntington, is that Western civilization is about to enter a period of greater weakness, vis-à-vis other civilizations. In order to understand which argument is correct, we must first understand the current strength of Western civilization, and in particular, the relationship between its two halves, Western Europe and North America. In this course, therefore, we will undertake a study of the history and current state of that relationship, focusing primarily on the post-WWII period, and particularly on the security arrangements that have developed between the two regions. In this light, special attention will be applied to the NATO alliance and to the developing security capabilities of the European Union. Having considered the objective facts of the transatlantic security situation, we will then be able to return to the Fukuyama-Huntington debate in order to determine what the future of intercivilizational relations does, indeed, portend.

### IIPS 30534. Human Rights in an "Age of Terrorism": View from South Asia

(3-0-3) Qazilbash

This course will look at human rights and its continued relevance in the age of terrorism. Recent developments have shown the need for states to protect themselves and their populations from acts of terror, while at the same time maintaining respect for human rights and the rule of law. This course examines how to uphold that balance and draws from the experience of Pakistan's involvement in the global fight against terror. It examines both the misuse of prevention of terrorism laws as well as the minimum safeguards and remedies that must be guaranteed and provided if human rights are not to become the first casualty in the war on terror. There is no exam. Grades based 75 percent on research paper; 25 percent on class participation. Students are expected to have done readings before the class.

### IIPS 30535. Politics and Development in Central America

(3-0-3) Cosenza-Jimenez

This course will explore the impact that politics and politicians have had on development in Central America. It will begin with a discussion of the concept of development and how we attempt to measure it. It will then proceed to review the different approaches used to spur development and what conventional wisdom holds today to be the determinants of growth. After this, it will review the socio-economic indicators of Central America and how they have evolved with time. It will subsequently study how politics and politicians, through current Constitutions, laws, institutions, political culture and practice have affected the determinants of growth. It will close with a discussion of the changes needed to foster high, sustainable, and equitable growth in the region.

### IIPS 30536. Middle East and the West

(3-0-3)

*Corequisite:* IIPS 27999

This course examines the relationship between what could roughly be defined as the "West" (Europe and the United States) and Middle Eastern societies from the Napoleonic invasion of Egypt in 1798 until the American invasion of Iraq

in 2003. We shall start by trying to make sense of the terms the "West" and the "Middle East." We shall then explore different and eclectic themes such as European colonial penetration into the Middle East, reciprocal stereotypes of the Middle East and the West, cultural exchanges between these regions, and the relationship between contemporary Europe and its growing Muslim population. We shall also examine American involvement in the region by focusing on themes such as oil interests, the Arab-Israeli conflict, and the Iraqi imbroglio. Finally, we shall discuss contemporary Middle Eastern perceptions of the West in light of American hegemonic power around the globe in general, and in the Middle East in particular.

### IIPS 30537. Modern South Asia

(3-0-3)

*Corequisite:* IIPS 27999

Home to over a billion people, just over 23 percent of humanity, the South Asian subcontinent is a fascinating laboratory in which to analyze the unfolding of such themes in modern history as colonialism, nationalism, partition, decolonization, post-colonial democracies, the modern state, economic development, center-region problems and relations between Asia and the West. The course will consider critical themes in social, political, economic, and cultural history, which will include imperialism, capitalism, nationalism, religious politics, regionalism, ethnicity, globalization, diaspora, ecology, social inequality, and gender, development, and democracy. It will not only provide a lively historical narrative told through lectures based on scholarly research and primary texts, but will also seek to embellish this narrative with the perception and articulation of vision and sound, as well as with readings from representative genres of South Asian literature.

### IIPS 30538. American Foreign Policy Toward the Middle East

(3-0-3)

This course provides an in-depth analysis of the causes, conduct, and consequences of American foreign policy toward the Middle East since World War II. We will look at the origins of the American foreign policy, and explore the domestic and international factors that shape the policymaking process toward this region, including the roles of several American policy institutions such as the Departments of State and Defense and the Central Intelligence Agency. We will specifically focus on the evolution of American policy toward a number of major countries in the region, including Israel, Iran, Turkey, Saudi Arabia, Egypt, and Lebanon.

### IIPS 30539. The Logics and Politics of International Migration

(3-0-3) Messina

*Corequisite:* IIPS 27999

This course investigates the primary economic, humanitarian, and political forces that are driving and sustaining the complex phenomenon of contemporary transnational migration. Within this context, three core questions are addressed. First, have the forces of globalization and the entanglements of international commitments and treaty obligations significantly diminished the policymaking autonomy of the traditional nation state? Second, what are the significant benefits and costs of transnational migration for the immigration-receiving countries? Finally, is a liberal immigration regime desirable? And if so, can it be politically sustained? This is a course with a methodological component.

### IIPS 30540. War, Violence, and Politics in Europe Since World War I

(3-0-3) Orr

*Corequisite:* IIPS 27999

This class examines the management and effects of domestic, colonial, and interstate armed conflicts on European societies and democracy since the First World War, in order to probe the relationship between violence and politics. The overriding question of the course is, "How has politically motivated violence affected European democracy?" Course themes include the effect of war on regimes, the effect of domestic violence on democratic institutions, and the attempts to come to terms with terror as a political weapon. The course studies the World Wars, the role of violence in effecting political and social change, including changing gender norms, and terrorist violence in both Western Europe and in the colonial context.

**IIPS 30601. Islamic Ethics**

(3-0-3) Omar

*Corequisite:* IIPS 27999

Since September 11, 2001, topics related to Islam have inundated the airwaves, aroused the curiosity of many, and troubled the minds of some. In order to better understand current events, it is important to have a greater understanding of the worldview of Islam. This course on "Islamic Ethics" will provide students with such an opportunity. It examines the major principles of Islamic ethics and the key theories of classical and contemporary Muslim ethicists. These principles and theories will be applied to case studies representing major global concerns, such as weapons of mass destruction, the ecological crisis, abortion and stem-cell research. Cognizant of the various contexts within which ethical questions are debated, students will be encouraged to explore the impact of modernity, post-modernity, globalization and liberalism on Muslim ethical discourses. Students will also be required to compare the ethical principles and theories of Islam with that of other philosophical and religious theories to discover points of difference as well as convergence.

**IIPS 30703. Islam: Religion and Culture**

(3-0-3) Afsaruddin

*Corequisite:* IIPS 27999

This course will discuss the rise of Islam in the Arabian Peninsula in the seventh century and its subsequent establishment as a major world religion and civilization. Lectures and readings will deal with the core beliefs and institutions of Islam, with particular emphasis on religious and political thought from the Middle Ages through our own time. All readings are in English; no prerequisite.

**IIPS 30705. Chinese Society and Culture**

(3-0-3)

This course introduces students to the complexities of contemporary Chinese society in the context of the past. Topics covered include food, family and gender, political activity, ethnicity and identity, urban and rural life, work and unemployment, economic complexity, multilingualism, arts, religion, medicine and the body, and literature.

**IIPS 30708. Canon and Literature of Islam**

(3-0-3) Afsaruddin

This course is an introduction to the religious literature of the Arab-Islamic world. Emphasis is on works from the classical and medieval periods of Islam, roughly from the seventh to the 14th century of the Common Era. We will read selections from the Qur'an (the sacred scripture of Islam), the Hadith literature (sayings attributed to the Prophet Muhammed), the biography of the Prophet, commentaries on the Qur'an, historical and philosophical texts, and mystical poetry. All texts will be read in English translation. No prior knowledge of Islam and its civilization is assumed, although helpful.

**IIPS 30710. Religion, Myth, and Magic**

(3-0-3) Gaffney

The study of religious beliefs and practices in tribal and peasant societies emphasizing myths, ritual, symbolism, and magic as ways of explaining man's place in the universe. Concepts of purity and pollution, the sacred and the profane, and types of ritual specialists and their relation to social structure will also be examined.

**IIPS 30713. Societies/Cultures Latin America**

(3-0-3)

This course introduces students to the diverse cultures and societies of Latin America through historical, ethnographic, and literary study. Contemporary issues of globalization, violence, and migration will preoccupy the discussion of Central and South America and the Caribbean today.

**IIPS 30714. The Living Wage**

(1-0-1) Whitmore

The aim of this course is to look at wealth, poverty, and the gap between them both nationally and globally from a variety of disciplinary perspectives including theology, philosophy, economics, history, and sociology. We will also examine

the idea of a living wage as a remedy for that gap. The course will include both seminars and visits from visiting scholars and activists.

**IIPS 30715. The Living Wage**

(3-0-3) Whitmore

The aim of this course is to look at wealth, poverty, and the gap between them both nationally and globally from a variety of disciplinary perspectives including theology, philosophy, economics, history, and sociology. We will also examine the idea of a living wage as a remedy for that gap. The course will include both seminars and visits from visiting scholars and activists.

**IIPS 30719. Islam and Modernity**

(3-0-3) Afsaruddin

Islam and its compatibility with modernity is a much-debated issue in the contemporary period. The course will engage this timely topic and discuss the most important "hot-button" issues involved in these debates: political Islam, democracy, pluralism, rights of women, and secularism. The historical contexts which provide the backdrop for the range of responses to the phenomenon of modernity and its attendant issues will also receive attention. What internal resources exist within Islamic thought that are being drawn upon by modernists to make a strong case for an essential compatibility between Islam and democracy, for example? Is democracy (or Islam, for that matter) a monolithic concept? Students will be expected to actively take part in discussions centered around such questions, the assigned readings, and class lectures. Prior exposure to at least one class on Islam or the Middle East is strongly recommended.

**IIPS 30721. Russian Realms: Societies/Cultures of Eastern Europe and Beyond**

(3-0-3) Gaffney

*Corequisite:* IIPS 27999

This course explores the social structures, the historical contexts, and the symbolic universes of the peoples who either identify themselves as Russian or whose way of life has come to be deeply affected by the Russian tradition. It concentrates on those territories that were formerly incorporated into the tsarist empire and subsequently formed parts the Soviet Union. It will include an examination of the extensive efforts by Russian thinkers to characterize their own national spirit, reflecting, for example, on classic and contemporary attempts to define *dusha* or a distinctively Russian "soul," as well as some of the consequences of these formulations, looking at this famous "civilization" question through art, literature, and film as well as social science works. However, the chief approach of the course will be through reading of anthropological studies that have addressed the larger questions from numerous specific local venues. A strong emphasis will also be placed on the so-called current "transition period," as a new Russia in the neighborhood of the "Commonwealth of Independent States" seeks to reshape its heritage amid complex problems arising from social, economic, political, and cultural, not to mention old ghosts of global rivalry, terrorism, and disputed legitimacy.

**IIPS 30723. Religion and Social Movements In Latin American History**

(3-0-3)

The purpose of this course is to give students an understanding of the role religion has played in Latin American history from the colonial period to the present. We will focus specifically on how religion mediates relations between culturally distinct peoples during points of encounter and the role it plays in social movements. Religion in Latin America served paradoxically as a means of and justification for conquest, but also at times as a foundation for subordinate people's resistance to domination. We will examine this dynamic as it evolved in successive efforts by outsiders to impose control over people of indigenous and African descent. The course will focus on Spanish proselytization and its results during the colonial period, millenarian movements by people of indigenous and African descent during the 19th century, and American Catholic and Protestant mission endeavors and their outcomes in the 20th century.

**IIPS 30724. Russia Confronts the East**

(3-0-3) Hope

This course will explore the prominent place the Caucasus and the Islamic East hold in the Russian literary imagination. We will take a broad view of the topic, ranging from medieval epic to modern film, from prose to poetry, and from literature's "greatest hits" to the justly and unjustly forgotten. Throughout, we will seek to understand the uses of the East in Russian culture as a whole and in individual literary works in particular, the role it plays in the formation of a Russian national identity, and the literary resources the East provides to Russian authors. Readings will include works by Pushkin, Lermontov, and Tolstoy, among others, as well as contemporary journalism on the war in Chechnya. Class format will be lecture/discussion, and grades will be based on class participation and regular writing assignments.

### **IIPS 30726. The Worlds of Buddhism**

(3-0-3) Gimello

*Corequisite:* IIPS 27999

A thematic introduction to the pan-Asian (i.e., South, Southeast, and Central Asian as well as East Asian) Buddhist tradition exploring the fundamentals of Buddhist doctrine and practice while also sampling major themes in the religion's social, cultural, and material history. Among the particular topics to be covered are the life of the Buddha (history and hagiography), the "Four Noble Truths" (the essentials of the Buddhist "creed"), the Buddhist canon (the nature and scope of Buddhist scripture), Buddhist cosmology (Buddhist conceptions of the formation and structure of the universe, i.e., of time and space), Buddhist monasticism, meditation and the Buddhist contemplative life, Buddhist ethics, the ritual lives of Buddhists, Buddhism and politics, Buddhist "family values," Buddhism and the arts, etc.

### **IIPS 30727. Religion and Politics in Comparative Perspective**

(3-0-3) Dowd

*Corequisite:* IIPS 27999

In this course, we examine various hypotheses about the relationship between religion and politics, religious institutions and political institutions, and based on evidence from across time and space (i.e., Africa, Asia, Europe, Middle East, North America and South America) discuss the robustness of such hypotheses. The aim of the course is to think critically about the conventional wisdom concerning the relationship between religion and politics. Special attention will be focused on the effects of modernization and globalization on the political salience of religion and whether certain types of religious systems (i.e., various types of Christianity and Islam) are more compatible with and conducive to democracy than others.

### **IIPS 30802. Peacemaking in Divided Societies**

(3-0-3) Darby

*Corequisite:* IIPS 27999

This course examines the transition from civil war to peace in divided societies. The process of moving from violence to settlement is complex and presents a new set of problems for the communities involved: the management of negotiations; the continuing threat of violence; acknowledging human rights and other abuses from the war years; and the post-war construction of a just and stable society. This course will analyze how these and other problems have been approached, with varying degrees of success, in different peace processes including those in Northern Ireland, Israel-Palestine, and Sri Lanka.

### **IIPS 30901. Home Fronts During War**

(3-0-3) Ardzzone

How have Americans responded at home to war and threats of war throughout the 20th century and into the 21st? What internal divisions and shared identities has war inspired or revealed? We will examine not the battles and factors that determined the military outcomes, but the domestic struggles that have defined our national experience and informed many of our responses to current events. Topics will include: critiques of democracy and civil rights inclusion during WWI; treatment of Japanese Americans during WWII; development of peace movements, anti-nuclear movements; Cold War politics and fears of American communism; debates over the draft, just-war, racism at home, and US policies abroad in the wake of Vietnam. The final unit will focus on the Gulf War, terrorism, and developments since September 11.

### **IIPS 30902. Social Movements**

(3-0-3)

How is social change possible? This is one of the central questions for the study of social movements, as well as the organizing theme of this course. In this course we will consider the ways in which difference sociological theories of social movements have asked and answered this question, playing particular attention to theories of identity, emotion, and networks.

### **IIPS 30903. Peace and Development in Africa**

(3-0-3)

This course addresses two questions: "Why is there so much conflict in Africa?" and "Why is Africa still so poor?" A variety of different explanations are considered, including pre-colonial and colonial legacies, ethnic heterogeneity, poor leadership, the character of African institutions, and international factors. Students will consider the nature of Africa's challenges, what conditions distinguish Africa's successes from its failures, and what can be realistically accomplished in the future.

### **IIPS 30906. Development Economics**

(3-0-3)

The current problems of Third World countries are analyzed in a historical context, with attention given to competing theoretical explanations and policy prescriptions. The course will combine the study of the experiences of Latin American, African, and Asian countries with the use of the analytical tools of economics.

### **IIPS 30907. Restoring Economic Vitality to the Inner City: What Works, What Doesn't, and Why**

(3-0-3) Beckman

This community-based learning and research course examines the political economy of US inner-city revitalization, with South Bend as a case study. Community-Based Learning (CBL) requires that students both learn and apply what they are learning within a setting outside the classroom. In addition to in-class seminar sessions, CBL activities will include meetings with local organizations that link public agencies and private enterprise, visits to varied businesses in urban South Bend, and meetings with area government representatives and relevant church and neighborhood organizations. During the first third of the semester, students will learn about the central problems of the US city and their roots, viewing the issues firsthand locally. In the second third, they will study how inner-city problems are being addressed in selected areas of the country as well as in South Bend. The South Bend Heritage Foundation (SBHF) will act as a client organization for this course by posing research questions for students to investigate during the last third of the semester. The SBHF is a private, not-for-profit service and community development corporation dedicated to the stabilization, enhancement, and empowerment of South Bend's inner-city neighborhoods.

### **IIPS 30908. Human Rights and Migrants**

(3-0-3) Bustamante

This course is an extension from the mini-course to a full term offered by Prof. Bustamante, with a wider coverage of international migration experiences in the world with an emphasis on human rights. It starts with a historical approach to various immigration waves to the United States, from the years of the Industrial Revolution to the present. It focuses on the current debate on the impact of the undocumented immigration from Mexico and Central America, with a discussion of the gap between public perceptions and research findings. Differences between Mexico and the United States's migration policies, and its social and economic implications, are discussed. The recent developments within the context of the United Nations' Commission of Human Rights on the relationship between migration and human rights are also covered.

### **IIPS 30909. Economics, Ethics, and Public Policy**

(3-0-3) Wilber

This course will investigate the interactions of economics and ethics in economic theory and policy. Cases will focus on poverty in the US. Philosophical and theological ethics will be drawn upon, with special emphasis on the Roman Catholic contribution to the debates. This will be a community-based learning course in which students will make on-site visits to nonprofit and governmental entities addressing poverty locally, such as the South Bend Heritage Foundation

and the Center for the Homeless. Representatives of selected organizations will participate with economists and other social scientists to discuss with students ethical considerations involved in addressing poverty.

### **IIPS 30912. Human Rights Environment and Development in South Asia**

(3-0-3) Qasilbash

The course, with the help of real world cases, will identify that the issues of development, human rights, and the protection of the environment are of great importance to all of human society. They assume critical importance in South Asian countries where the issues are intricately linked to complex socio-political and economic factors. At first glance, development would appear to be instrumental, the prime vehicle for promoting the realization of human rights, in particular economic rights such as the right to an adequate standard of living, the right to work, the right to social security, right to education, the right to food, and the right to housing. Environmental preservation and rehabilitation also should be achieved through development. It is a sad fact, however, that the development projects in the South Asian countries have overtaken poverty as the single-largest cause of human rights violations and environmental degradation. Many development projects that should have brought well-being to local populations have, in fact, brought violations of human rights and environmental degradation.

### **IIPS 30913. US Foreign Policy to 1945**

(3-0-3)

This course covers the main developments in American foreign relations from the Spanish-American War in 1898 through World War II. It traces the emergence of the United States as a major world power and examines in some detail how the United States became involved in the two world wars. A recurring theme will be the major traditions in America foreign policy and the ways in which these traditions influenced policy makers in the early years of the "American Century."

### **IIPS 30914. International Environmental Politics**

(3-0-3) Connolly

*Corequisite:* IIPS 27999

This course surveys the major actors (states, NGOs, scientists, IOs, consumers, and corporations) and issues relating to global and regional environmental problems. We consider issues such as ozone depletion, deforestation, climate change, biodiversity, acid rain, water supply, nuclear power safety, and more. We study the range of political mechanisms that have been used to foster international environmental cooperation and ask how existing political solutions have fared in response to some of the major international environmental problems. We will develop a sense of what works for international environmental protection, and what does not, in order to assess how policymakers might devise effective responses to current and future environmental problems.

### **IIPS 30915. Democracy, Development, and Conflict in Africa**

(3-0-3)

This course surveys African politics through the lens of the "big themes" in comparative politics— democratization, economic development, and internal conflict. Each theme is approached through both broad theories and specific case studies, so that students will learn about Africa in general and concrete ways. Students will consider the nature of Africa's challenges, what conditions distinguish Africa's successes from its failures, and what can be realistically accomplished in the future.

### **IIPS 30916. US Labor History**

(3-0-3) Graff

This course will examine the history of paid and unpaid labor in the United States from the American Revolution to the near present. We will seek to understand how working people both shaped—and were shaped by—the American Revolution, early industrialization, the debates over slavery and free labor culminating in the Civil War and Reconstruction, the rise of big business, the creation of a national welfare state, the Cold War-era repression of the Left, and continuing debates over the meanings of work, citizenship, and democracy. Throughout the course, we will devote considerable time to the organizations workers themselves created to advance their own interests, namely the unions and affiliated institutions that have made up the labor movement. We will also pay special attention to the

crucial connections between work and identities of class, race, and gender as they evolved over the past two centuries.

### **IIPS 30918. US Environmental History**

(3-0-3) Coleman

This course is an introduction to the new field of environmental history. While many people think "the Environment" suddenly became important with the first "Earth Day" in 1970 (or a few years earlier), environmental issues have in fact long been of central importance. In recent decades, historians have begun actively to explore the past sensibilities of various groups toward the quality of their air, water, and land; the passionate discussions of philosophers, theologians, and social and natural scientists about resource use, the safety of the environment, and long-term prospects for humanity; and the customs, laws, and managerial systems that guided use of the environment. Historians have also increasingly paid attention to the ways environmental factors have affected the course of history: the effects of the distribution of water, foodstuffs, wood, minerals, and of changes in climate or endemic disease. This course will range widely—in methodology, from the history of ideas to paleoclimatology; geographically, from the ancient Near East to modern America; topically, from wood-cutting rights in medieval France to the rise of the organic farming movement and water-allocation laws in the 20th-century American West. Lecture/discussion format.

### **IIPS 30919. Economics of Poverty**

(3-0-3) Warlick

An examination of the extent and causes of poverty in the United States. The current system of government programs to combat poverty is analyzed. Reforms of this system are also considered.

### **IIPS 30920. Global Economic History**

(3-0-3) Glave

The course presents a comparative economic history emphasizing the sources of long term economic growth. The comparative analysis is used to explore different development strategies around the world over the past two centuries, from the British Industrial Revolution to the contemporary developing countries, focusing on examples from Europe, Latin America, and North America. Subjects include population change, migration, technological change, industrialization, market integration, education, inequality, and government expenditure. Each topic is discussed through a current economic policy concern. Special attention will be placed on the role played by the natural resources endowments and institutional change. The last section of the course centers on the debates on globalization and inclusive development. Does going global foster growth? Who gains, and who loses?

### **IIPS 30921. Holocaust**

(3-0-3)

*Corequisite:* HIST 32408, IIPS 27999

In this lecture/discussion class, we will study the Nazi German program of mass killings that has come to be known as the Holocaust. We will explore the ideas, decisions, and actions that culminated in the murder of an estimated hundred thousand people deemed handicapped, half a million Roma (Gypsies), and six million European Jews. The role of historical prejudices, the impact of National Socialist ideology and leadership, and the crucial factor of the war itself will all be considered. We will address the experiences of those targeted for annihilation, as well as the actions of perpetrators and the role of others: bystanders, witnesses, and rescuers. At the same time, we will examine how attacks on other groups—for example, homosexuals, Polish intellectuals, Soviet prisoners of war, Jehovah's Witnesses, and Afro-Germans—fit into the overall Nazi scheme for a "new world order." The legacy of the Holocaust after 1945 will be discussed, as well. Course requirements include short papers in response to weekly readings, a comparative book review, and a cumulative final exam.

### **IIPS 30922. Labor and America Since 1945**

(3-0-3)

This course explores the relationship between workers and the labor movement to American politics and culture since 1945. The United States emerged from World War II as the strongest global power, and its citizens subsequently enjoyed a long postwar economic boom that created what we might call the first truly

middle-class society in world history. At the heart of that new society was the American labor movement, those unions like the United Auto Workers and the United Steel Workers who ensured that at least some of the postwar profits made it into the wallets of workers and their families. Today, however, unions represent only 8 percent of workers in the private sector. What accounts for the decline of organized labor since the 1950s? What has the decline of the labor movement meant for workers specifically, and the American economy and politics more broadly? How and why have popular perceptions of unions changed over time? What has been the relationship of organized labor to the civil rights movement, feminism, and modern conservatism? What is "globalization" and what has been its impact upon American workers and their unions? Through an exploration of historical scholarship, memoirs, polemical writings, and Hollywood films, this course will try to answer these questions. Students interested in politics, economic development, international relations, social justice, human rights, peace studies, or mass culture are particularly welcome.

### **IIPS 30923. Africa Since 1800**

(3-0-3)

This course will focus on African history from 1800 to the independence movements of the 1960s. In the 19th century, new states, economies, and societies emerged in Africa as African peoples developed new relations among themselves and with the rest of the world. With the "scramble for Africa" of the 1880s, European powers colonized Africa and suppressed many of these processes. In the 1960s, however, self-rule resurged as Africans helped throw off the yoke of colonial rule and form independent nation-states. This course will consider the social, economic, and political history of Africa by using case studies from the Democratic Republic of Congo (Congo-Zaire), Nigeria, Sierra Leone, and South Africa.

### **IIPS 30924. Micro-Venturing I**

(3-0-3) Davis

A practical guide for both business and non-business majors, undergraduate and graduate students, to learn the essential elements of micro-venturing. The course will concentrate on defining the role of social entrepreneurship in solving the larger problems of domestic and global poverty. The fundamentals of finance, law, marketing, and management will be introduced and applied to practical projects with the intent of creating viable business solutions in the marketplace.

### **IIPS 30926. Environmental Philosophy**

(3-0-3) Sayre

*Corequisite:* IIPS 27999

A philosophically integrated examination of current environmental issues drawing on familiar literature from ecology, economics, and ethics, as well as recent fiction.

### **IIPS 33201. Dorothy Day and the Catholic Worker**

(1-0-1) Whitmore

This course examines the life and writings of Dorothy Day, the cofounder and spiritual guide of the Catholic Worker Movement. The course is seminar in style. Readings will include Day's autobiography, *The Long Loneliness*, and selections from her other writings.

### **IIPS 40201. The Vocation of Peacebuilding: The Art and Soul of Peace Practice**

(3-0-3) Lederach

This course proposes an inquiry into the life vocation of peacebuilding. The challenge of exploring life vocation requires of students something that the academic setting, with its primary focus on intellectual and professional development, has not always found easy to provide: the nurturing of voice, sense of place, creativity, and calling. We will engage this vocational challenge through two broad themes, referred to here as the "art" and the "soul" of peacebuilding. Art will provide a lens to explore peacebuilding as an artistic process and an avenue to encourage creativity. Soul will provide inquiries into voice and the sense of place and disciplines to sustain the peacebuilder. Students should be prepared for more informal, experimental, inductive hands-on, and dialogical approaches to learning. The course is restricted to junior/senior peace studies majors.

### **IIPS 40505. UN and Counterterrorism**

(3-0-3)

Our attention will be focused on the scope and meaning of the work of the UN Counter-Terrorism Committee (CTC), which was established by the Security Council Resolution 1373 on September 28, 2001. Working under the direction of the project research director, each participant will engage in an intense investigation of one of the numerous topics or queries relevant to the study.

### **IIPS 40506. Latin American Politics**

(3-0-3)

This course is an introduction to Latin American politics. Thematically, we will focus on two of the great issues facing this region of the world at the end of the 20th century: democratization and strategies for promoting economic development. After spending the first part of the course examining these two issues in a broad way, we will then analyze these same issues, but focused on Brazil, Chile, and Mexico.

### **IIPS 40510. Game Theory and Strategic Analysis**

(3-0-3)

*Corequisite:* IIPS 27999

The objective of this course is to help students develop a good understanding of the basic concepts in game theory and learn how to employ these concepts to better understand strategic interactions. Topics covered will include normal form games, extensive form games, pure and mixed strategies, Nash Equilibrium, subgame perfect equilibrium, repeated games, and introduction to games of incomplete information. Selected applications will include competition and collusion in oligopoly, entry deterrence, political competition and rent seeking, and social norms and strategic interaction.

### **IIPS 40513. US and the Vietnam War**

(3-0-3) Brady

This course examines the participation of the United States in its "longest war"—the conflict in Vietnam. The course is taught primarily from an "American" as opposed to a "Vietnamese" perspective. Broad topics to be covered include Vietnamese background (land, people, history, culture); American political and diplomatic decision making; 1950-75: how the war was fought; debating the war; the war at home; the aftermath of war; and lessons of the war. This is a lecture AND a discussion course. Attendance at BOTH is required. Approximately six books will be assigned.

### **IIPS 40514. Politics of Globalization**

(3-0-3) Hui

This course analyzes the emerging world order and US foreign policy at the end of the Cold War. We first examine a number of underlying causes for global problems in the post-Cold War world, including civilizational differences, state failure, poverty, and political domination. We then discuss the vexing problems of religious violence, ethnic cleansing, and genocide. Humanitarian crises present the challenges of humanitarian intervention, peacemaking, post-conflict reconstruction, democracy-building, and bringing justice for crimes against humanity. In the last few weeks, we address some difficult foreign policy questions that have become amplified in the war on Iraq, including international terrorism, rogue states, weapons of mass destruction, American primacy, anti-Americanism, unilateralism and multilateralism, and state-building and democracy building.

### **IIPS 40515. Diplomacy of US Foreign Policy**

(3-0-3)

The United States emerged from World War II in a new peacetime role as a superpower. We had to discover for ourselves how to combine diplomacy and military power in a manner consistent with our democratic principles. While the policy choices were stark in the days of the Cold War, they have become more complex in recent years. Presented by a career diplomat who headed US overseas missions in four countries, the course emphasizes case studies and the practical problems that have confronted US leaders from the end of World War II to the present. The issues treated will illustrate the height of tensions in the Cold War, the emergence of detente and deterrence, and the challenges of the global agenda after the end of the Cold War. The course aims to help the student understand current foreign

policy issues, which will be discussed briefly in class. A research paper (10 pages), a midterm exam, and a final exam are required.

### **IIPS 40516. The Politics of International Trade**

(3-0-3)

If global free trade is theoretically optimal for the economy, why does free trade foster so much concern politically? Spanning events from the 1700s to the present day, this lecture course will discuss the politics of free trade in four different issue areas: (1) global trade and national security; (2) winners, losers, and the domestic politics of trade policy; (3) global trade and the development of democracy; and (4) the rise of international institutions and the decline of sovereignty. The syllabus will draw on classic readings in international relations and comparative politics, and students will be exposed to the variety of methods used by political scientists to analyze these questions: qualitative descriptions, quantitative analysis, formal models, etc. While the course does not require any background in economics, basic economic models of trade will be covered in the introductory sections. Students will be evaluated through both examinations and short papers.

### **IIPS 40601. Islamic Ethics of War and Peace**

(3-0-3) Omar

Since September 11, 2001, topics related to Islam have inundated the airwaves, aroused the curiosity of many and troubled the minds of some. In order to better understand current events, it is important to have a greater understanding of the world view of Islam. This course on "Islamic Ethics of War and Peace" will provide students with such an opportunity. It examines the major principles of Islamic ethics of war and peace and the key theories of classical and contemporary Muslim ethicists. These principles and theories will be applied to case studies representing major global concerns. Cognizant of the various contexts within which ethical questions are debated, students will be encouraged to explore the impact of modernity, post-modernity, globalization, and liberalism on Muslim ethical discourses. Students will also be required to compare the ethical principles and theories of Islam with that of other philosophical and religious theories to discover points of difference as well as convergence.

### **IIPS 40602. Ethics, Law, and International Conflict**

(3-0-3) Powers

The terrorist attacks of 9/11 and the war in Iraq have contributed to a dramatic reexamination of moral and legal norms governing the role of military force in international affairs. This course provides an introduction to legal and moral perspectives on issues of war and peace, with special attention to Catholic social teaching. Topics include the UN framework for collective security, collective enforcement, and peacekeeping; terrorism, aggression and self-defense; intervention on behalf of self-determination and human rights; norms governing the conduct of war; accountability for war crimes; and approaches to arms control and disarmament. These topics are discussed with special attention to their application in combating global terrorism, the interventions in Iraq and Afghanistan, the wars in the Balkans, and other recent conflicts. Introductory course in ethics and/or international law helpful but not necessary to succeed in this course.

### **IIPS 40603. Islam and Muslim/Christian Dialogue**

(3-0-3) Omar

The course is designed to introduce students to medieval Muslim perspectives of the Christian "other" and how these resonate in contemporary relations between Muslims and Christians. It will focus on Muslim-Christian relations in the modern/post-modern period, with particular attention to contexts of conflict and the potential for dialogue, solidarity and interreligious peacebuilding.

### **IIPS 40701. Advanced Moral Problems**

(3-0-3)

An in-depth discussion of three very important moral problems of our time: affirmative action, animal rights, and sexual harassment.

### **IIPS 40703. Culture and Politics in Northern Ireland**

(3-0-3) Smyth

What the literature of Northern Ireland reveals about the culture and politics of Northern Ireland.

### **IIPS 40705. Understanding Story: Conflict, Culture, and Identity**

(3-0-3) Johansen

During the last decade, interest in narratives has increased dramatically. Feminist studies, cultural studies, and anthropology have broadened our appreciation for the role story plays not simply in personal psychology but also in constructing and mediating our social life. The purpose of this seminar-style course is to investigate the shape, purposes, and multiple meanings of narratives both in the lives of individuals and within institutions and cultures. In order to understand how story influences personal identity; contributes to or ameliorates conflict; constructs, deconstructs, and reconstructs history; and advances political agendas, we will examine how story is used by (1) journalists in reporting news as story; (2) medical professionals in collecting case histories; (3) ethnographers in describing unfamiliar cultural practices or investigating inter-group or inter-state conflict situations; (4) historians in interpreting the past; (5) political leaders in establishing public policy and political power; and (6) advertising and marketing interests.

### **IIPS 40706. Multiculturalism**

(3-0-3)

The course explores the economic, state, and national conditions of multiculturalism as a social relation and semiotic form. Seminal questions include the issues of difference deployed in debates over multiculturalism and anthropology's location in them as a study of human diversity.

### **IIPS 40707. Topics in Social/Cultural Anthropology**

(3-0-3)

This course explores the latest developments in social-cultural anthropology including, but not limited to, nationalism and transnationalism; colonialism and post-colonialism; political-economy; gender; religion; ethnicity; language; and medicine and the body. Emphasis will be on social and cultural transformations in specific historical contexts.

### **IIPS 40708. Anthropology of War and Peace**

(3-0-3) Nordstrom

This class will explore the human capacity for war and peace, from tribal conflicts through guerilla warfare to conventional and nuclear war. It will also study societies without war and populations with innovative ideas about peace.

### **IIPS 40709. Subversive Culture/Social Protest**

(3-0-3)

The course will explore anti-structures of society using anthropological perspectives and analyze forms of creative resistance and social protest in art, performance, literature, and popular culture, using case studies from various cultures around the world.

### **IIPS 40710. Conversion to Christianity and Modernity**

(3-0-3)

This course will examine the expansion of Christianity in the modern period, attending both to various historical encounters of Christianity with cultures and peoples in the past five centuries, as well as the theological innovations that accompanied such encounters. Building on a study of several well-documented cases from various places and times, an analysis will be made of the dynamics of conversion from theological as well as other perspectives. The larger historical and social consequences of conversion to Christianity will also be examined.

### **IIPS 40712. Religion and Women's Rights**

(3-0-3)

This course focuses on religious aspects of the women's rights movement and women's movements within religious communities. Focusing primarily on the Protestant, Catholic, and Jewish traditions, we will examine how women have understood the relationship between their religious beliefs and their interest in expanding women's roles. From this beginning, we will explore several historical and contemporary examples of the influence of religion on the women's rights movement and, by the 20th century, the influence of the women's movement in American religion.

**IIPS 40713. Gender and Power in Asian Cultures**

(3-0-3)

The class studies the representations of women and men in different Asian societies and in different political, social, and economic contexts, and their effect on kinship, family, work, religion, and the state. Ethnographic studies will cover Japan, Korea, China, Malaysia, Indonesia, and India, with a special emphasis on contemporary Japan.

**IIPS 40714. Religion and Power in Latin America**

(3-0-3)

The cultural dimension of religion and the institutional building abilities present in religious communities are building new power sources for religions in the present Latin American context. Taking the experience of Peru, we will look at Latin American recent processes in the religious domain. The course will describe the changing conditions of the Catholic Church in Latin America and the new situation of religious pluralism produced by the growing presence of evangelical groups and Pentecostalism. We will look at the impact of religion in the empowerment of people from below, and its relation to new social movements as well as to the institutionalization of power at the state level in the new context of globalization.

**IIPS 40715. Comparative Cultural Studies**

(3-0-3)

The purpose of this seminar is to introduce students to comparative dimensions of American studies. International perspectives will be explored and approaches that compare American culture with another national culture will be encouraged. Intra-national comparative topics will also be welcome (example: Asian-American studies). Concepts, methods, and materials related to comparative studies will be examined. Students will work on selecting appropriate comparative topics, organizing information and ideas, developing themes, and designing an interdisciplinary framework for their projects.

**IIPS 40716. Images of War and Peace in Literature**

(3-0-3) Johansen

Using English language novels and poetry of the 20th century, this course will (1) examine the metaphors and themes which unmask the realities of war and disclose the aspirations and struggles for peace; and (2) explore the ways literary works themselves—through language, rhythms, and images—become battlegrounds on which the human imagination creates an individual's sense of self and constructs and deconstructs cultural ideologies. Literature translated into English from other languages may be the focus of independent research projects within the course.

**IIPS 40717. Power and Culture in Mexico**

(3-0-3)

This course provides an overview of the power structure and culture of Mexican society with special attention to the various ways power has been displayed and exercised.

**IIPS 40719. Catholic Social Teaching**

(3-0-3)

The purpose of this course is to familiarize students with the tradition of Catholic social teaching with a view to developing skills for critical reading and appropriation of these documents. We will examine papal, conciliar, and episcopal texts from *Rerum novarum* (1891) up to the present time, identifying operative principles, tracing central theological, ethical, and ecclesial concerns, and locating each document in its proper historical context.

**IIPS 40720. Christianity in Africa**

(3-0-3) Kollman

This course will explore the history of Christianity in Africa, beginning with the early church but with heightened attention to the more recent growth of Christianity on the continent. Particular topics to be addressed include: the dynamics of missionary activity before, during, and after the colonial period; the rise of African Independent Churches; the interaction between Christianity and Islam in the past and present; and contemporary issues surrounding Christianity and the African nation-state. We will also investigate theological questions surrounding the relationship between Christianity and culture. In addition to a final

exam, students will have the option of one longer research paper or several shorter papers.

**IIPS 40721. Humanism and Responsibility**

(3-0-3) Toumayan

An interdisciplinary investigation of the idea of the responsibility of both individuals and sovereign states to respond to social injustice, political persecution or conflict, natural disasters, and humanitarian crises. The course will focus on points of convergence between Emmanuel Levinas's concept of responsibility and *The Responsibility to Protect* by Gareth Evans and Mohammed Sahnoun. Readings include works by Voltaire, Hugo, Zola, Camus, Sartre, Wiesel, Levinas, and Evans and Sahnoun. Paintings by Delacroix and Millet. Course to be taught in French.

**IIPS 40722. Religion and Politics in Comparative Perspective**

(3-0-3) Dowd

In this course, we examine various hypotheses about the relationship between religion and politics, religious institutions and political institutions, and based on evidence from across time and space (i.e., Africa, Asia, Europe, Middle East, North America and South America). The aim of the course is to think critically about the conventional wisdom concerning the relationship between religion and politics. Special attention will be focused on whether certain types of religious systems (i.e., various types of Christianity and Islam) are more compatible with and conducive to democracy than others. Students will write two short reflection papers that demonstrate familiarity with the readings, one during the first half of the semester and one during the second half of the semester. There will be a "short" midsemester exam and, a final research paper due at the end of the semester.

**IIPS 40723. Post-Holocaust Literature and Theology**

(3-0-3) Signer

Between 1933 and 1945, the actions of the Nazi Government transformed the map of the world politically, aesthetically, and theologically. The ability of the Nazis to gather the cooperation of German citizens and the citizens of other occupied countries to implement their policies against the Jews has raised questions about the claims that European civilization is based on Christianity. How could barbarism flourish in Germany, the land of poets and thinkers? Both Christians and Jews, for common and different reasons, look upon the Holocaust as an abyss, a dark night of the soul. During this semester, we shall attempt to move from horrified silence to insight into the possible frameworks for constructing theology "after the abyss." We shall also read literary works that attempt to describe the indescribable. Both literature and the theology written after the Holocaust present the paradox of how to comprehend the incomprehensible. No single theologian or faith community has the answer to the problems raised by the Holocaust. No author writing in German, English, Yiddish, French or Hebrew can describe the horrors and fully transmit the fullness of the atrocity. However, we shall attempt to read, evaluate, and—for some of us—appropriate what theologians, poets, and storytellers have written.

**IIPS 40724. Globalization, Spirituality, and Justice**

(3-0-3)

This course will explore what it means to be Christian in the context of this new era of globalization. It is a time of new opportunities and unprecedented potential, but it brings with it new perils and greater social, political, and economic turmoil than ever before. In particular, we will explore the meaning of Christian discipleship in a time when half the world lives on less than two dollars a day and two-thirds live in abject poverty. After grounding our discussion of socio-economic research, we will then do a theological reading of globalization, and then a global reading of theology. In particular, we will explore the meaning of Christian faith today as we draw from the deep wells of Scripture, early Christian sources. Catholic social teaching, major world religions, liturgy, and contemporary theological reflection, icons of justice, mysticism, and spirituality as we explore what it means to be Christian in a time of titanic change.

**IIPS 40725. Christianity and Colonialism**

(3-0-3)

The coming of Christianity to most of the world has overlapped with the political, economic, and social processes associated with the term colonialism.

This course will seek to understand the history of that overlap, as well as the many theological issues raised, especially for Christians in Latin America, Asia, and Africa. Questions to be considered include: How has political domination, typified (though certainly not exhausted) by European colonialism, shaped Christian mission? What kinds of theological innovations emerged in the relation to colonialism, both among the colonizers and the colonized? How did colonialism create a context in which Christianity encountered other religious traditions? How does contemporary theology reflect a colonial legacy in this current apparently "post-colonial" moment? How do contemporary global political dynamics, sometimes described with reference to the notion of globalization, compare and contrast with the overt colonialisms of the past? How do contemporary theologians respond to the colonial legacy? Is there such a thing as "post-colonial" theology? Should there be such a thing? Students will write three 5-page papers, and there will be a final exam.

**IIPS 40801. Conflict Resolution: Theory and Practice**  
(3-0-3)

This course is designed to introduce students to the broad array of conflict theory that exists in the social sciences as it relates to our ability to manage and transform conflict, ranging from the interpersonal to international arenas, and to teach students a range of basic skills in conflict analysis and resolution. We will survey the literature focusing on the nature and dynamics of conflict, explaining the root causes of conflict and violence, as well as various strategies for peacefully resolving conflict. This course involves a combination of mini-lectures, seminar-style discussions, and interactive class exercises to promote student learning.

**IIPS 40901. Leadership and Social Responsibility**  
(3-0-3) Brandenberger

This course examines leadership and empowerment issues from multidisciplinary perspectives, focusing on the role of the leader within organizations that promote service, social action or other forms of social responsibility. Alternative models of leadership are explored, with attention to value and moral implications.

**IIPS 40902. Self, Society, and Environment**  
(3-0-3) Weigert

*Corequisite:* IIPS 27999

This course focuses on social psychological aspects of relationships between humans and the natural environment. Issues include how humans interact with different environments, symbolic transformations of environments, and competing accounts or claims concerning human-environment relationships. The course is framed in a sociology-of-knowledge perspective and touches on alternative ways of envisioning and valuing individual and institutional perspectives on human-environment relationships with an eye toward implications for social change.

**IIPS 40903. International Migration and Human Rights**  
(3-0-3) Bustamante

*Corequisite:* IIPS 27999

This course is an extension from the mini-course to a full term offered by Prof. Bustamante, with a wider coverage of international migration experiences in the world with an emphasis on human rights. It starts with a historical approach to various immigration waves to the United States, from the years of the Industrial Revolution to the present. It focuses on the current debate on the impact of the undocumented immigration from Mexico and Central America, with a discussion of the gap between public perceptions and research findings. Differences between Mexico and the United States' migration policies, and its social and economic implications, are discussed. The recent developments within the context of the United Nations' Commission of Human Rights on the relationship between migration and human rights are also covered.

**IIPS 40904. Labor Movements in Twentieth-Century US**  
(3-0-3) Graff

This course explores American workers' collective efforts as workers in their search for economic security, political power, and social and cultural autonomy from the 1890s to the near present. For the most part, this course will focus on the unions and related organizations forged by workers throughout the past century—from major umbrella groups like the American Federation of Labor, the

Industrial Workers of the World, and the Congress of Industrial Organizations, to important sectoral actors like the Brotherhood of Sleeping Car Porters, the United Automobile Workers, the American Federation of Teachers, and the United Farm Workers. The central questions of the course will be when, where, and why have US workers organized collectively in the 20th century—and how successful have they been? What has been the response of employers, the government, and the public at large to these collective efforts of workers, and how and why have those responses changed over time? What has been the relationship between organized labor and racial and gender discrimination, as well as the causes of racial and gender equality? And how have Americans generally, and workers in particular, understood the labor movement in relation to capitalism, freedom, and democracy? Students will be expected to write several short papers, engage in regular classroom discussion, and screen several films outside of class.

**IIPS 40905. International Migration: Mexico and the United States II**

(2-0-2) Bustamante

A three-week course that refers to a review of basic questions on international migration, with emphasis on immigration to the United States and the methods through which these questions have been adequately or inadequately answered. The numbers, impact, nature, structure, process, and human experience will be discussed in terms of the research methods commonly used to approach them. Spring.

**IIPS 40906. Gender and Violence**  
(3-0-3)

This upper-level anthropology course focuses on the problematic intersection between gender and violence. The question of male aggression and female pacifism is explored, with attention to female fighters and male practitioners of nonviolence. Women in circumstances of war, trauma, and healing are studied for the insight such study may provide for peacebuilding initiatives. Gender in the military, gender and violence ritual cross-culturally, and rape as a sociopolitical phenomenon are among the other topics considered. Primary source readings complement intensive class discussion; substantial writing and speaking buttress academic skills.

**IIPS 40907. Child Development and Family Conflict**  
(3-0-3)

Current trends and findings pertaining to constructive and destructive conflict within families, and the effects of conflicts within families on children, will be considered. A focus will be on interrelations between family systems (marital, parent-child, and sibling), and methodologies for studying these questions. A particular concern will be how positive and negative conflict processes in the marital relationship affects families, marriages and children. The role of interparental conflict in various family contexts (divorce, parental depression, violence and abuse, custody, physical illness or disability), and relations between family and community conflict and violence, will be examined. The positive side of family conflict will be considered, including the elements of constructive marital and family conflict, and psycho-educational strategies for promoting for constructive conflict processes within families. Theories and models for conceptualizing the effects from a family-wide perspective will also be considered. Requirements: Class attendance, active participation in class discussions and activities, including leading discussions on articles in small groups, participation and report of the results of small-scale field studies in small groups, completion of a review paper on a topic in this area, and completion of midterm and final in-class exams.

**IIPS 40908. International Economics**  
(3-0-3)

*Prerequisite:* (ECON 10101 OR ECON 101) OR (ECON 10015 OR ECON 115) OR (ECON 12101 OR ECON 201) OR (ECON 20015 OR ECON 225)  
A study of the general theory of international trade; the pattern of trade, gains from trade, tariffs, trade and special interest groups, trade and growth, foreign exchange markets, balance-of-payment problems, and plans for monetary reform.

**IIPS 40910. Race, Ethnicity, and Power**  
(3-0-3)

Presents a review and discussion of social scientific research concerning the nature of race and ethnicity and their expression as social and cultural forces in the organization of multiethnic societies. The focus is multidisciplinary.

**IIPS 40913. Global Development in Historical Perspective**  
(3-0-3)

*Corequisite:* IIPS 27999

The difference between rich and poor nations is not, as Ernest Hemingway once said, that the rich have more money than the poor, but is in part because the rich produce more goods and services. Industrialization, in other words, has often brought wealth (as well as social dislocation and protest) to some countries, but not to others. This course examines the process of industrialization from a comparative perspective and integrates the history of industrialization and its social consequences, possibly including Western Europe (Britain and Germany), the United States, Latin America (Mexico and Brazil), and East Asia (Japan and South Korea). We will concentrate on these countries' transition from agriculturally-based societies to industrial societies. We will analyze the process of industrialization on two levels: from above (the role of political authority), and from below (a view of factory life, industrial relations, and protest from the perspective of workers). No specific prerequisites in history or economics are necessary.

**IIPS 40914. Prophets and Protest in African History**  
(3-0-3)

This dialogue-intensive seminar focuses on men and women who led political, religious, and social movements in Africa in the 19th and 20th centuries. The Islamic Murride brotherhood in Senegal, the Women's Wars of Nigeria, and the Mau Mau uprising in colonial Kenya will introduce students to important episodes in African history and to the intellectual debates of the field. Students are expected to read a variety of texts, participate vigorously in class discussion, make oral presentations, and complete written assignments.

**IIPS 43101. Peace Studies Senior Seminar**  
(3-0-3)

The peace studies senior seminar is a writing-intensive capstone course for both the supplemental major and the minor in peace studies. The centerpiece of the course is a seminar paper that students research and write on a subject of their choice. The course also consists of readings and discussions that explore familiar topics in peace studies in greater depth as well as introduce research methods to the students. Required course for all peace studies majors and minors.

**IIPS 43901. Ethics of Gender**  
(3-0-3)

We observe gender differences between men and women, but these differences vary over time and place, depending on the customs and practices of different societies and depending on the choices individuals make. To the degree that gender differences are a product of social and individual choice, we can raise the question, as we will in this course, of what, if any, gender differences, we should have in society. This question is of particular ethical significance in light of our commitment to the equality of men and women.

**IIPS 43902. Population Dynamics**  
(3-0-3) Williams

Demography, the science of population, is concerned with virtually everything that influences, or can be influenced by, population size, distribution, processes, structure, or characteristics. This course pays particular attention to the causes and consequences of population change. Changes in fertility, mortality, migration, technology, lifestyle and culture have dramatically affected the United States and the other nations of the world. These changes have implications for a number of areas: hunger, the spread of illness and disease, environmental degradation, health services, household formation, the labor force, marriage and divorce, care for the elderly, birth control, poverty, urbanization, business marketing strategies, and political power. An understanding of these is important as business, government, and individuals attempt to deal with the demands of the changing population.

**IIPS 43903. Confronting Homelessness**  
(3-0-3) Giamo

*Corequisite:* IIPS 27999

The purpose of this seminar is to examine the conditions of extreme poverty and homelessness within the broader context of American culture and society. In order to confront the nature of these conditions, this seminar will draw upon insights from history, literature, documentary film and photography, and the social sciences. We will focus on the degree of permanence and change in our approach to both traditional and modern forms of the social problem. There will be an experiential component to the seminar as well.

**IIPS 45501. Global Crime and Corruption**  
(3-0-3) Nordstrom

As the world of the 21st century globalizes, so, too, does crime. Millions of people and trillions of dollars circulate in illicit economies worldwide. This represents power blocks larger and more powerful than many of the world's countries. This class will look at what constitutes the illegal today; who is engaged in crime and corruption; and what kinds of economic, political, and social powers they wield. It will also look at the societies and cultures of "out-laws". For example, internationalization has influenced crime in much the same ways that it has multinationals and nongovernmental organizations: criminal networks now span continents, forge trade agreements, and hone foreign policies with other criminal organizations, and set up sophisticated systems of information, exchange, and control. Anthropology, with its studies of cultures, provides a dynamic approach to the illegal: What customs inform law abiders and criminals? What values guide their actions? What behaviors shape their worlds? The course will explore the many kinds and levels of criminality and corruption: How do we consider the differences (or similarities) among, for example, drug and arms smugglers, white-collar corruption, gem runners or modern-day slavers, and governmental or multinational corporate crime? What impact does each have on our world, and in our lives? What solutions exist? Class is interactive in nature, and in addition to the normal reading and writing, students will do an anthropological class project on a topic of their choice concerning global crime and corruption.

**IIPS 45901. Terrorism**  
(3-0-3) Mahmood

Looking at terrorism through the anthropological lens means studying violent actors close-up and face-to-face. It also means exploring the culture of counter-terrorism, with its own discourse, belief system, and rituals. This course questions basic assumptions of the "war on terror," using ethnographic literature to challenge conceptions and policies on terrorism today. Is "terrorism," in fact, a definable term? How can we use the experience-near methods of anthropology to study people cognitively and politically placed as irretrievably distant? Differences among terrorism, crime, and revolution are explored through examination of specific cases. Building peace in a climate of violence is the ultimate aim of our study.

**IIPS 47901. Cultural Differences and Social Change**  
(3-0-3)

This course is designed especially for students returning from summer service projects or study-abroad programs in the developing world. Students can only enroll with the permission of the instructor or the director of the ISSLP at the Center for Social Concerns. In the class, students will conduct research to better understand the sites that they visited during their overseas projects, orienting them in relation to broader global, regional, and national patterns.

**IIPS 50201. Designs and Methods in Peace Research**  
(3-0-3) Smith

This course provides an overview of social science research methods, with special attention to the application of research principles and practices to research projects in the areas of peace and conflict resolution. The aim of the course is to provide students with the basic tools needed to develop their own research project and to strengthen their skills in reading published research articles. Students will gain familiarity with commonly used research methods such as ethnography, survey research, interviews, document/content analysis, and basic statistical analysis. Students who are developing their final MA projects will have opportunities to present and discuss their work throughout the semester. Also, we will devote some time to considering the processes of writing grant proposals to fund research and publishing research results. [Section 02 reserved for graduate students.]

**IIPS 50501. Building Democratic Institutions in First-Wave Democracies**

(3-0-3) Valenzuela

Elements of democratic regimes emerged long before the regimes as such can be identified as being minimally in place. Beginning with a brief discussion of the essential features of democracies, the course examines how and why such institutions emerged, and the critical moments in which the actual transitions to the new democratic regimes occurred. Course focuses on democratizations that took place before the Second World War, and will examine key European and Latin American cases.

**IIPS 50601. Catholic Peacebuilding**

(3-0-3) Philpott

The tradition of Catholic thinking on war and peace has reached an exciting new point in its development, best captured in the term "peacebuilding." Though it draws on traditional conceptions of the justice (or injustice) of war, its focus is on the ethics and practice of repairing the wounds of war and unjust regimes in Bosnia, Rwanda, El Salvador, East Timor, and Northern Ireland and elsewhere. Students will examine—and, indeed, develop—the concept of peacebuilding through both theology and actual cases, both historical and contemporary. Seniors only—with permission of instructor.

**IIPS 50605. War, Peace, and the Literary Imagination**

(3-0-3)

In this seminar-style course, we will investigate the nature of war and peace through literature, principally 20th-century fiction and poetry. Through texts drawn from various regions of the world, we will (1) examine the metaphors and themes which unmask the realities of war and present struggles for peace; (2) explore the ways the literary works themselves, through language, rhythms, and images, become battlegrounds, as it were, on which the human imagination creates individual identities, links individuals to communities, constructs, deconstructs, and reconstructs cultural ideologies; and (3) consider the role human imagination plays in moral and civic life. In addition to the literary works, participants in the class become a rich resource for our investigation.

**IIPS 50701. Genocide, Witness, and Memory**

(3-0-3) Mahmood

How are episodes of mass killing experienced, survived, and remembered? In this course, we consider political, social, and cultural trauma as expressed in memoir, documentary, fiction, and academic text. Witness as an ethical stance is examined; the role of memory in shaping morality is questioned. (Does "Never Again" actually work?) We also look at the perpetrators of genocidal killing: Who are they? What prompts their actions? Moreover, are any of us incapable of this kind of violence?

**IIPS 50702. Terrorism and Political Philosophy**

(3-0-3)

An exploration of various ethical questions raised by terrorism through an evaluation of competing conceptions of justice. Some questions to be considered include: How should we understand the terrorism that the United States opposes? Is it something only our enemies have engaged in, or have we, ourselves, and our allies also engaged in terrorist acts? Is terrorism always wrong, or are there morally justified acts of terrorism?

**IIPS 50704. History from Below: Colonialism, Nationalism, and Subalterns**

(3-0-3) Rawat

This course introduces advanced undergraduates and graduate students to methods of doing and writing history that intervene within dominant historical narratives and frameworks by redefining historians' relationships with sources and the questions asked of them. The Subaltern Studies collective that emerged from South Asia in the 1980s and 1990s is now recognized as one of the more important historical interventions in recent years. Subaltern Studies' historiographic writing has questioned dominant nationalist narratives by arguing that they represent only the history of elites. The objective of the course is to draw attention to differing understandings of colonialism and nationalism by laying out the perspectives

of "subalterns"—untouchables, tribals, peasants, workers, women and other marginalized groups. In addition "subaltern" perspective would also be extended to studying themes like democracy, politics, modernity, development, cities, environment, films and television in South Asia. The interventions by the Subaltern Studies collective will be situated in relationship to developments in European historiography, with special attention to the unique departures of this new school. Debates within and critiques of the collective's approach will also be examined. A background in South Asian history or culture is not a prerequisite.

**IIPS 50705. Feminist and Multicultural Theologies**

(3-0-3) Hilkert

An exploration of how the voices of women have helped to reshape theological discourse and to bring to light new dimensions of the living Christian tradition. Like other liberation theologies, feminist theologies take the experience of suffering and missing voices in the tradition as the starting points for theological reflection on the mystery of God and all of reality in relation to God. Using the writings of feminist, womanist, Latina, *mujerista*, Asian, and Third World theologians, this class will focus on the following questions and areas of theology: the theological task and vocation, the significance of gender and social location in the fields of theological anthropology and Christology, theologies of the cross in the face of contemporary suffering, the mystery of God, and implications of women's spirituality in our day. Students will have the opportunity to join an optional reading group that will focus on classic texts in the development of feminist theologies.

**IIPS 50801. Nonviolent Social Change**

(3-0-3) Cortright

This course will examine strategies of nonviolent social change as reflected in the writings of Dr. Martin Luther King Jr., Mohandas K. Gandhi, Gene Sharp, and Latin American advocates of liberation theology. These will be contrasted and compared with very different traditions of social change advocacy in the work of Saul Alinsky and Malcolm X. The course will also look at historical examples of nonviolent social change and explore the factors accounting for the success or failure of various social change movements, including: the US civil rights movement, the 1989 democratic revolutions in Central and Eastern Europe, and the US peace movement. The main part of the course will be an examination of the practical methods of nonviolent social change. The techniques of nonviolent action will be thoroughly assessed. Specific methods to be studied include power analysis, coalition building, media communications, fundraising, grassroots organizing, and lobbying. Classroom activities will be developed for each of these areas of activity. Students will divide up into teams and will work with each other and the instructor to gain practical experience in the various techniques of nonviolent action.

**IIPS 50802. International NGO Management**

(3-0-3) Culbertson

This course will provide an introduction to concepts and skills needed to effectively manage projects in international nongovernmental organizations (NGOs). Through simulations, case studies, and discussion, the class will critically examine the logframe approach to project planning, which is widely used by NGOs and often required by donor agencies. As a primary assignment in the class, each student will develop a grant proposal and budget for a project he or she has designed using methods discussed in class. The class will also explore several issues related to project evaluation, including how to design a project monitoring and evaluation system, approaches to "scaling up" project impact, stakeholder perspectives on evaluation, and the unique challenges that arise in evaluating peacebuilding projects. (Every spring)

**IIPS 50803. Approaches to Conflict Transformation**

(3-0-3) Fast

This course surveys the various theories that explore the nature and root causes of conflict and existing methods of conflict transformation. Students will learn to apply analytical tools and practical strategies in order to transform conflict at the interpersonal, intergroup, and international levels.

**IIPS 50901. Environmental Justice**

(3-0-3) Shrader-Frechette

*Corequisite:* IIPS 27999

This course will meet once a week on Wednesdays, from 4:00–6:30 p.m. It features outside speakers, including African Americans from East Chicago and South Chicago. The course will examine the way poor people and minorities, because of their political powerlessness, face environmental and health threats that are hundreds of times greater than those faced by the average person. There are no tests, and all student work will be on a self-chosen project. These student projects can deal with any of the current 2,500 environmental justice problems in the US/world. The goal will be for students (1) to learn specific tools for assessing environmental justice threats; (2) to use these tools to empower and assist vulnerable communities; (3) to actually correct environmental justice problems on the basis of material learned in the course; (4) to work with governmental justice problems on the basis of material learned in the course; and (5) to work with government agencies and local communities, both to correct environmental justice problems, and to publish reports of the students' analyses.

### **IIPS 50904. Political Economy of Development**

(3-0-3) Kim

The course is divided into two parts. The first part provides an overview of the institutional and empirical features of the developing world, followed by a survey and critical evaluation of the conventional development theories. The second part looks into the selected topics evoking the critical, controversial stakes in Third World development debates today. The topics include: rent-seeking activities, land tenure and peasantry, micro-financing, corporate governance, failed state and market failure, market and democracy, income-distribution and poverty, feminism in development, ethnic conflicts in resource use, and population pressures. The approach taken in this course is a political-economy perspective with references to the historical, cross-cultural, and empirical materials. The course aims at providing the students with intellectual spaces for alternative development paradigms and strategies. Where appropriate, the tools used in economic analysis will be reviewed at an elementary and accessible level.

### **IIPS 50905. Global Sociology**

(3-0-3) Smith

*Corequisite:* IIPS 67999

The course is designed as a broad overview of sociological analysis that extends beyond traditionally accepted national and local boundaries. It provides a perspective on the discipline as one that seeks to understand human society as a nested collection of interdependent societies. In particular, the course draws from world systems theory and institutional approaches—as well as from related disciplines such as anthropology—to consider how the development project of the 20th century evolved over time. The impacts of global economic integration on cultural and institutional change, inequality, and on changing identities and forms of collective action (including social movements) are phenomena we explore in the course. The course is designed for students who simply want to learn how the World Bank, IMF, and United Nations are impacting the experiences of people around the world, as well as for those who expect to do further research in the field.

### **IIPS 50906. Problems in Political Economy**

(1.5-0-1.5)

A seminar course on the political economy of globalization. Topics include neoliberalism, corporate strategies, capital mobility, outsourcing, free-trade agreements, international financial crises, the IMF, immigration, race and gender, plant closures, labor solidarity, and union strategies. The course will compare and contrast orthodox views of globalization with perspectives drawn from the writings of Marx, Keynes, Veblen, Polanyi, and other economists in the political economy tradition.

### **IIPS 50907. Unequal America**

(3-0-3)

Although America is the world's richest nation, it has the most unequal distribution of wealth and income in the industrialized world. In this course, we will examine why this is so. In particular, we will examine the following questions: What social forces create inequality in society? Is inequality inevitable? Is there such a thing as "social class"? Who gets ahead and why? Why is race/ethnicity and gender still related to social status, wealth, and income? Does America have

a "ruling elite?" Who are "the poor" and what explains their poverty? Are there social policies that can create more equality in American society—and is that what Americans really want?

### **IIPS 53801. Social Movements and Global Change**

(3-0-3)

This seminar explores how increasing global integration affects political participation and the prospects for democracy. We will briefly review the broader research literature on the sociology of social movements within nations as a first step in our consideration of the relationships between "globalization" and social movements. Seminar discussions will explore how transnational movements compare with those operating at local and national levels. Readings will reflect a range of cases and analytical perspectives. We will explore relationships between movements and political institutions, the factors affecting the abilities of relatively powerless groups to mobilize resources and build coalitions, and the ideological and cultural dimensions of transnational mobilization. Considerable attention will be placed on the contemporary global justice movement as we explore these questions, and methodological issues relevant to this field of study will be addressed throughout the course.

### **IIPS 53901. Social Movements in Global Perspective**

(3-0-3) Smith

This seminar explores how increasing global integration affects political participation and the prospects for democracy. We will briefly review the broader research literature on the sociology of social movements within nations as a first step in our consideration of the relationships between "globalization" and social movements. Seminar discussions will explore how transnational movements compare with those operating at local and national levels. Readings will reflect a range of cases and analytical perspectives. We will explore relationships between movements and political institutions, the factors affecting the abilities of relatively powerless groups to mobilize resources and build coalitions, and the ideological and cultural dimensions of transnational mobilization. Considerable attention will be placed on the contemporary global justice movement as we explore these questions, and methodological issues relevant to this field of study will be addressed throughout the course.

### **IIPS 55701. Ethnographic Method and Writing for Change**

(3-0-3) Mahmood

The notion that a written text can, itself, be a "site of resistance," a location where political commitment and rigorous scholarship intersect, undergirds this course on ethnographic method. We study the construction and interpretation of field notes, subjectivity and objectivity in research, ethical issues in fieldwork, feminist and postcolonial critiques of ethnographic practice, "voice" and oral history, and aspects of ethnographic inquiry that impact on change processes. Students engage in field projects in the local community and produce experimental ethnographic text as a central part of course work. We also examine the writing process, rhetorical style, the responsibilities of the author, and polyvocality and inclusivity. Ethnography as a nexus of theory and practice, of scholarship and action, emerges from our work in the course.

## Institute for Latino Studies

### ILS 20000. Chicano Art Survey

(2-0-2)

The student will investigate the social turmoil and conditions of Chicano people that gave rise to the Chicano art movement. The course will illuminate the fundamental concerns to the artist and why the mural and the poster were chosen to confront these conditions. The original intentions of the artists and the direction of their work has taken will be examined and analyzed within this social context.

### ILS 20100. CINE DE LA RAZA: Latino Film

(3-0-3)

This mini-course will explore the Latino experience from the perspective of contemporary Latino filmmakers. Ranging from cross-border organizing to economic globalization, transnational communities, American society, and the impact of gentrification, Latino filmmakers are giving voice to the complexity of *La Raza* in the United States. This course will examine these themes through documentary, independent film, and lectures and discussion with the filmmakers themselves.

### ILS 20300. Introduction to Creative Writing

(3-0-3)

An introduction to writing fiction and poetry, with outside readings and coverage of basic critical terms. In-class discussion of student work.

### ILS 20301. Stories of New America

(3-0-3)

The Latino populations of the United States increasingly influence many sectors of American society. Despite this ongoing demographic shift, mainstream American society often views these populations within the severely restricted fields of view of undocumented immigration, drugs and crime. In response, this course asks two large questions: What can be said about the complexities of these American populations? And how might the America of the future differ from today's version? Course readings will include Norma Cantus's *Canicula*; Cristina Garcia's *Dreaming in Cuban*; Nuyorican poetry by Tato Laviera; Rudolfo Anaya's *Bless Me, Ultima*; Richard Rodriguez's *An Argument with My Mexican Father*, and various selections by Gloria Anzaldua, Julia Alvarez, Tino Villanueva, Pedro Pietri, and others. Our films will include *Come and Take It Day* and the film version of Tomas Rivera's classic work *...And the Earth Did Not Devour Him*. We will augment our primary fiction and poetry with critical, scholarly articles to illuminate our materials and broaden our discussions. Students will write four essays, and take a midterm and final exam.

### ILS 20400. Latinos in the US

(3-0-3)

This course will examine the history of Latinos in the United States. Readings and discussions will begin by introducing students to early Mexican-American communities in the present-day Southwest and proceed topically and chronologically to cover the various urban and regional experiences of immigrants, migrants, and exiles. Other areas include the Chicano movement, civil rights (broadly construed), Latino music and culture, and trends in transnational migration. Students will necessarily adopt a comparative framework, studying and critiquing a variety of interpretations, approaches, and ideologies.

### ILS 20700. Social Problems

(3-0-3)

Analysis of selected problems in American society such as crime, narcotic addiction, alcoholism, delinquency, racial and ethnic conflict, prostitution, and others. Discussions, debates, films, tapes, and readings.

### ILS 20701. Introduction to Latinos in American Society

(3-0-3) Cardenas

Cannot take if previously taken SOC 473 or SOC 43473. This course will examine the sociology of the Latino experience in the United States, including the historical, cultural, and political foundations of Latino life. We will approach these topics comparatively, thus attention will be given to the various experiences of a multiplicity of Latino groups in the United States.

### ILS 20800. US Latino Spirituality

(3-0-3) Elizondo

US Latino spirituality is one of the youngest spiritualities among the great spiritual traditions of humanity. The course will explore the indigenous, African, and European origins of US Latino spirituality through the devotions, practices, feasts, and rituals of the people.

### ILS 20801. Latin American and US Latino Theologies

(3-0-3) Matovina

This course examines the emergence and development of Latino religion and theology in the United States. In particular, the course will explore how US Latina and Latino theologians have articulated the meaning and implications for Christian living of core theological topics such as Christology, evangelization, social justice, and liturgy.

### ILS 20803. Theology and Social Ministry

(3-0-3)

This course is for students returning from summer service internships or other service experiences who desire an extended opportunity for reflection and analysis. Some of the major themes to be discussed are Christian compassion, discipleship, and Catholic social teaching. The course culminates with a comprehensive research project on a theological question or issue that emerges from the summer and/or other service experiences and is explored with other academic disciplines. More information about the course format, the experiential learning method, and the process of evaluation is explained in the learning agreement and application form available at the Center for Social Concerns.

### ILS 20804. Migration and Catholicism

(1-0-3)

This course examines the international phenomenon of migration, the factors that give rise to it and its effects on people. We will examine the Catholic documents that address the issue of migration.

### ILS 20900. Spanish for Heritage Speakers

(3-0-3) Coloma

This course of intensive grammar study, reading, and writing is designed for those who may speak Spanish with some fluency but need additional work on their grammar and writing skills. It is most appropriate for students who speak some Spanish in the home but whose primary language is English. The goal is to work toward becoming fully bilingual and to strengthen the command of written Spanish and the mechanics of composition and style.

### ILS 20901. LA TELENVELA: history-culture-production

(3-0-3) Barry

*Prerequisite:* (ROSP 20202 OR ROSP 201 OR ROSP 202E)

In this course you will explore the genre of the telenovela (a major social, cultural, political, and economic force in Latin America and, more recently, in the United States) by reading about the genre (in Spanish) and watching two condensed telenovelas (also in Spanish). You will demonstrate your understanding of the telenovela and its importance in Hispanic culture through writing and discussion and through application of these ideas as you write, produce, direct, act in, record and edit a mini-telenovela as a class. During this process you will learn and apply basic production (videography) and post-production (computer based video and audio editing) techniques.

### ILS 30000. Topics in Latino Art

(3-0-3)

Chicanas in the Visual Arts. This course examines the visual production of Chicana artists. Mastizaje as a feminist paradigm has provided these artists with a powerful venue of expression. Gender, racial, class, and ethnic issues involved in the art created by Chicanas and the important contributions this art has had in Mexican-American spirituality will be discussed. The diverse artistic strategies created by these artists, such as altar installations will be addressed, as well as the relevance of this art in the contemporary art scene. The course draws heavily on the visual production of Chicana women artists from the Southwest, but not exclusively from that geographical area.

**ILS 30001. Mexican Photography**

(3-0-3)

This course examines Mexican photography from the 19th century on to contemporary works. Theoretical issues pertaining to the histories of photography, with emphasis in documentary photography, photography as an art form, photojournalism and photo manipulation are part of this course. Key films, such as *Mala Hierba* from 1940 and “Canoa” (1970), will be discussed in the context of the relation they have with still images. Photography and film will be situated to particular photographic moments and specific socio-cultural and political developments in Mexico. Critical questions on the role of photography in the formation of national narratives and the role of photographers in the life of art and culture will be addressed. Works by Romuladó García, Agustín Casasola, Manuel Álvarez Bravo, Nacho López, Lola Álvarez Bravo, Tina Modotti, Lourdes Grobet, Graciela Iturbide and other artists will be discussed.

**ILS 30100. Societies/Cultures Latin America**

(3-0-3)

This course introduces students to the diverse cultures and societies of Latin America through historical, ethnographic, and literary study. Contemporary issues of globalization, violence, and migration will preoccupy the discussion of Central and South America and the Caribbean today.

**ILS 30101. Caribbean Diasporas**

(3-0-3)

This course explores the transnational orientations and the multidimensional consequences of movement from the Caribbean as it affects sites in Miami, London, Paris, or Brooklyn as well as Havana, Jamaica, Haiti, or Belize. Reading works of ethnography, fiction, and history; questions about the construction and reconstruction of family bonds, community identity, religion, political power, and economic relations will be treated in the domestic and the global context.

**ILS 30102. Creole Language and Culture**

(1.5-0-1.5) Richman

This course introduces students to the vivid, sonorous language of Kreyòl, or Creole, and to the fascinating culture of its speakers. This intensive, beginning-level course is intended for students with no knowledge of Creole. In small-group teaching sessions, students will be prepared for conversational fluency with basic reading and writing skills, emphasizing communicative competence as well as grammatical and phonetic techniques. Our study of Kreyòl is closely linked to our anthropological exploration of how the language is tied to Caribbean society and culture. The course takes a holistic, anthropological approach to the history, political economy, and religion of Haiti. In addition to class work, audiotapes, music and film enhance the study of the Haitian language and culture.

**ILS 30201. Latinos in US: Wealth, Inequality, and Asset Building Policies**

(3-0-3)

This course introduces students to the public policy making process in an interdisciplinary context. Many disciplines (such as sociology, political science, anthropology, cultural studies, communications, business, economics, education, psychology, social work, computer science, engineering, and the natural sciences) touch upon public policy issues that affect Latino communities in the United States. The course will focus on how particular policy debates are enriched and bring new solutions to old problems when an interdisciplinary approach is used. The policy issues that will be covered and discussed in class include: demographic changes in the Latino population and how this impacts the wealth position of Latinos in the US, educational issues, cultural and socio-psychological issues in Latino communities, media and journalistic portrayals and images of Latinos, rapid technology changes and its effect on Latino communities, and most importantly asset building and capacity building in Latino communities in the US.

**ILS 30300. Latino/a History**

(3-0-3)

This course will examine the history of Latinos in the United States. Readings and discussions will begin by introducing students to early Mexican-American

communities in the Southwest and proceed topically and chronologically to cover the diverse Latino population.

**ILS 30301. Latin American Images of US**

(3-0-3)

Drawing upon a wide variety of sources—novels, essays, poems, travel literature, social science texts, film, art, etc.—a survey of Latin American views of North American society, customs, politics, and individual character, with a particular emphasis on United States interventionism.

**ILS 30302. Latino/a American Literature**

(3-0-3)

Studies of Latino and Latina authors, including Chicano, Caribbean, or South American.

**ILS 30303. West Indian Poetry**

(3-0-3)

Poems from the many languages and cultures of the Caribbean region.

**ILS 30304. Border Crossings: Mexican and Canadian Literature**

(3-0-3)

Mexican and Canadian literature emphasizing cultural interaction between the USA and its southern and northern neighbors.

**ILS 30305. Introduction to. Post-Colonial Literature**

(3-0-3)

Traces the development of literature from the former colonies of various empires, but principally the British and the French.

**ILS 30306. Women in the Americas**

(3-0-3) Delgadillo

This introductory course will survey a wide variety of literature (fiction, poetry, testimonios, personal essays, autobiographies, critical essays, and oral histories) and film written by and about women in the Americas from the time of the conquest/encounter to the present. We will focus on literature and film produced by women of color in the Americas (South, Central, and North, as well as the Caribbean). Issues to be explored include: colonization and resistance; slavery; intercultural contact, exchange, and transformation; the place of womanhood in the development of nation; woman of color feminism; and religion and spirituality. We will read materials from previous historical periods, but we will primarily focus on 20th-century representations and interpretations of these issues.

**ILS 30307. Icons and Action Figures in Latino/Latina Literature**

(3-0-3)

Understanding US Latino/Latina literature, art, and film through its many allusions to and re-interpretations of traditional icons and historic figures as well as legends, myths, popular figures, and action heroes/heroines of the Americas (including those with origins in Native American, Latino/Latina, African, Asian and European cultures).

**ILS 30308. Latino/a Poetry**

(3-0-3) Menes

This course will focus on several prominent contemporary Latino poets whose work has enriched and diversified the canon of American poetry in the last 20 years. Among them are such established and acclaimed authors as Gary Soto, Lorna Dee Cervantes, Pat Mora, Martín Espada, and Victor Hernández Cruz. Because Latinos are not homogeneous, emphasis will be given to these poets' diverse ethnic and cultural origins. In this regard, one important component of the course is the various ways in which Latino poets respond to the spiritual and the sacred. Other topics to be discussed include social justice, the family, identity (in its multiple forms), and, of course, poetics. Readings will be assigned in individual poetry collections and in one anthology.

**ILS 30309. Latino Literatures**

(3-0-3)

A survey of Latino fiction, poetry, and other literary works.

**ILS 30310. Tropical Heat Waves: Contemporary Latino/a and Caribbean Literature**

(3-0-3)

A review of selected contemporary Latino/a and Caribbean novels.

**ILS 30400. Modern Mexico**

(3-0-3)

This course examines the complex nation that is Mexico in the 20th century, its challenges, and its prospects. Focusing primarily on the period since 1870, we will study the social, economic, political, and cultural forces that have shaped the history of the United States's southern neighbor.

**ILS 30401. Mexican-American History**

(3-0-3)

This course is an introductory survey of Mexican American history in the United States. Primarily focused on events after the Texas Revolution, and annexation of the American Southwest we will consider the problems the Spanish and Mexican settlers faced in their new homeland, as well as the mass migration of Anglo-Americans into the region following the annexation. Throughout the course, we will explore the changing nature of Mexican American US citizenship. Other themes and topics examined will include immigration, the growth of agriculture in Texas and California, internal migration, urbanization, discrimination, segregation, language and cultural maintenance, and the development of a US based Mexican American politics and culture. Although primarily focused on the American Southwest and California, this course also highlights the long history of Mexican American life and work in the Great Lakes and Midwestern United States. We will conclude with the recent history of Mexican and Latin-American migration to the United States after 1965, and the changing nature of Mexican American identity and citizenship within this context.

**ILS 30402. Modern Latin America**

(3-0-3) Beatty

A survey of Modern Latin American History.

**ILS 30500. Latino Politics**

(3-0-3)

This course provides a careful and "critical" analysis of the political status, conditions, and the political activities of the major Latino (or "Hispanic") groups in the United States—Mexican Americans, Puerto Ricans, and Cuban Americans. To provide a context and grounding, various theoretical perspectives are first considered, followed by discussions of the historical experiences and contemporary socioeconomic situations of the several Latino groups. Attention then turns to a number of issues concerning political attitudes, behaviors, and activities. Assessments of Latino influence upon major local, state, and national institutions of the political system—and vice versa. Policy areas particularly significant for Latinos are also examined. Finally, the major issues, questions, and themes considered throughout the semester are "revisited" and reconsidered.

**ILS 30501. Latin American Politics**

(3-0-3)

This course is an introduction to Latin American politics. Thematically, we will focus on two of the great issues facing this region of the world at the end of the 20th century: democratization and strategies for promoting economic development. After spending the first part of the course examining these two issues, we will then analyze these same issues, focused on Brazil, Chile, and Mexico.

**ILS 30502. Race/Ethnicity and American Politics**

(3-0-3)

This course introduces students to the dynamics of the social and historical construction of race and ethnicity in American political life. The course explores the following core questions: What are race and ethnicity? What are the best ways to think about the impact of race and ethnicity on American citizens? What is the history of racial and ethnic formation in American political life? How do race and ethnicity link up with other identities animating political actions like gender and class? What role do American political institutions—the Congress, presidency, judiciary, state and local governments, etc.—play in constructing and maintaining

these identity categories? Can these institutions ever be used to overcome the points of division in American society?

**ILS 30505. Latin American Politics**

(3-0-3) Mainwaring

Latin America is vital for the United States because of the region's importance in trade, migration, the environment, and security issues. This course is an introduction to the politics of this important region of the world. What are the major challenges facing Latin America in the early 21st century? How are different countries facing these challenges? What are the origins of the current dilemmas and opportunities facing Latin America? The main objective of the course is to provide understanding of some of the major political challenges facing Latin America today. The final section will provide an overview of some of the outstanding issues in US/Latin American relations.

**ILS 30700. Problems in Latin American Society**

(3-0-3)

Since the fall of dictatorships in the 1980s, a multitude of new organizations has emerged in Latin America. At the same time, globalization has presented new challenges to social groups struggling to retain their livelihoods and their communities. This course examines traditional and new social movements, organizations, and institutions in contemporary Latin America.

**ILS 30701. Human Rights and Migrants**

(3-0-3)

This course is an extension from the "mini-course" to a full term offered by Prof. Bustamante, with a wider coverage of international migration experiences in the world with an emphasis on human rights. It starts with a historical approach to various immigration waves to the United States, from the years of the Industrial Revolution to the present. It focuses on the current debate on the impact of the undocumented immigration from Mexico and Central America, with a discussion of the gap between public perceptions and research findings. Differences between Mexico and the United States' migration policies, and its social and economic implications, are discussed. The recent developments within the context of the United Nations' Commission of Human Rights on the relationship between migration and human rights are also covered.

**ILS 30702. Historical Memories and the Developments Bridging Latino and Latin American Cultures**

(3-0-3)

This course introduces students to the political processes affecting the development and transformation of Latin identities in the Americas. The length and arduous path to the development of Latin America and the Hispanic Caribbean identities began with the conquest of the New World. It began with the miscegenation of races and cultures and continued with the multiple and never ending attempts of establishing democratic national states from south of the Rio Grande to the Patagonia. The political dynamics in Latin America have maintained a constant movement of people and cultures. Civil wars, dictatorships, social exclusion, hunger, but also the dreams of a better life constantly rupture the ties that link the people from their homeland. The United States is the magnet and recipient of thousands of Latin Americans who entered legally or illegally into the country. Their process of assimilation and acculturation has transformed their original identities while at the same time has transformed Latinidad in American society. This course should be of interest to both Latino and Latin-American students.

**ILS 30703. Migration, Race, and Ethnicity in 21st-Century America**

(3-0-3)

Migration from Latin America and Asia over 1970–2000 brings a new heterogeneity for the United States that mirrors the global population. Now, the consequences of this migration are reflected in federal statistical policy to expand official population categories of five categories on race and two on ethnicity. This course is an introduction to these US populations of whites, blacks or African Americans, American Indians or Alaskan Natives, Native Hawaiians or Other Pacific Islanders, and Latinos or Hispanics as to historical context, social and economic characteristics, and current research and policy issues. Migration in the

post-1965 era of Asians and Latinos created new racial and ethnic communities geographically concentrated in California, Texas, Florida, New York, Illinois, and Arizona. Conceptualization and quantification involve new challenges increasingly relevant for governmental and private sectors, nationally and for communities. Scholars are more attentive to changing identities and population heterogeneity for social institutions of family, education, and government. The 2000 Census and population projections show the future population as considerably different from that of the past. These topics hold relevance in contemporary discussions of world population growth, immigration policy, social change, globalization, and environment.

#### **ILS 30704. Race and Ethnicity**

(3-0-3)

This course focuses on race and ethnic relations in the United States. Current cases involving racial and ethnic issues will be presented and discussed in class. Readings and materials will present three approaches to the study of majority-minority group relations, the emergence and maintenance of group dominance and minority-group adaptations to modes of dominance, including separation, accommodation, acculturation, and assimilation. Class participation and students' experiences will be emphasized.

#### **ILS 30705. Toward Equity and Excellence in Education: A Review of Pedagogical Approaches From 1950 to Now**

(3-0-3)

Students will examine issues of educational equity and achievement in the United States from 1950 to the present. The course begins by framing these issues in terms of social and cultural processes, using an anthropological perspective. Students then will examine issues of educational equity in relation to long-established patterns of social stratification by race, ethnicity and class. The course will conclude with a discussion of equity in light of the nation's rapidly changing demographics.

#### **ILS 30706. Toward Equity and Excellence in Education: A review of pedagogical approaches from 1950 - now**

(3-0-3)

Students will examine issues of educational equity and achievement in the United States from 1950 to the present. The course begins by framing these issues in terms of social and cultural processes, using an anthropological perspective. Students then will examine issues of educational equity in relation to long-established patterns of social stratification by race, ethnicity and class at the dawn of the Civil Rights era. Studies evaluating these efforts will be reviewed, and contemporary efforts to promote equity and excellence will be examined in relation to what has been learned from past efforts. The course will conclude with a discussion of emerging challenges in promoting educational excellence and equity in light of the nation's rapidly changing demographics, especially those related to immigration and the growth of the Latino population.

#### **ILS 30707. Migration, Documented**

(1-0-1) Richman

The migration of people from their homelands is as old as humanity. Yet migration is still misunderstood; emigrants are often seen as traitors and immigrants as dangerous and self-serving invaders. Film is a burgeoning medium for documenting experience of migration for the migrants themselves, the communities they leave and the societies in which they settle. Documenting migration compels us to question the meanings of borders, the nature of identity, and the possibility of cultural pluralism and integration. This course showcases documentary films about migration in the Americas.

#### **ILS 30709. Undocumented Immigrants in the American Imagery**

(3-0-2)

This course examines the social realities of undocumented immigration to the United States. Special attention will be given to the historical presence and current dynamics of migration in the contemporary era drawing on the visual record of migration from the western hemisphere. A film series will accompany this course and attendance is required.

#### **ILS 30800. Pascal Mystery/Latino Community**

(1-0-1)

A one-credit travel course to San Antonio, Texas to take part in all the Holy Week rituals, including a theological reflection; tour of the missions; a reflection paper on the experience/insights.

#### **ILS 30802. From Power to Communion: Toward a New Way of Being Church-Based on the Latin American Experience**

(3-0-3)

This seminar explores the present and the future of the Catholic Church, placing emphasis on how its future is foreshadowed in the growing ecclesial interdependence that exists between the churches of North and Latin America. Emphasis is placed on the growing involvement of the laity in Latin America and where this may lead the North American church. In a particular way, attention is given to the role of small Christian communities.

#### **ILS 30803. Social Concerns Seminar: Hispanic Ministry**

(0-1-1) Purcell

The Center for Social Concerns and the Hispanic Ministry jointly offer a pilgrimage based in the Parish of Nuestra Senora de Soledad in Coachella, California. Participants will have the opportunity to experience the Church's option for the poor through an immersion into the spirituality, culture, and economy of the rural southern California community of Coachella. Students will meet with resource people making a difference in the lives of valley residents by helping them with immigration issues, housing, access to education and health programs, and overcoming addiction.

#### **ILS 30804. Social Concerns Seminar: Border Issues**

(0-1-1) Paladino

This seminar examines immigration and related issues that surface between the United States and Mexico. Participants travel to El Paso, and Ciudad Juarez, Mexico to meet refugees, work with parish organizations, and discuss policy issues.

#### **ILS 30805. Latino Theology and Christian Traditions**

(3-0-3)

This course examines the emergence and development of Latino Religion and theology in the United States. In particular, the course will explore how US Latino and Latina theologians have articulated the meaning and implications for Christian living of core theological topics such as Christology, evangelization, social justice, and liturgy.

#### **ILS 30900. Nations in Motion: Latino/Latina Literature in the United States**

(3-0-3)

This course focuses on the analysis of literary works by Mexican-American, Cuban-American, Puerto Rican, and Dominican-American authors. Some reading knowledge of Spanish recommended.

#### **ILS 30901. Survey of Spanish-American Literature II**

(3-0-3)

A survey of literary trends and major figures in modern Spanish-American literature from 1880 to the present. Readings of selected texts in prose, poetry, and theatre.

#### **ILS 30902. Hispanic Caribbean Encounters**

(1-0-1)

This mini-course explores the intersection of history, culture, and literature in the context of Puerto Rican, Cuban, and Dominican cultural representations both in the islands and in the United States. The class is designed to complement the Spring 2006 lecture series titled "Encuentro caribeno: Puerto Rico isla frontera, Cuba y Republica Dominicana, islas peregrinas." Students will be introduced to key literary texts by representative authors from each island. Issues of transnationalism, displacement, and migration between the islands and to the US will be central to class discussions. Attendance to the series is mandatory and will be a factor in the final grade. Students will be expected to write reaction papers

and a final essay. Although discussions will be conducted in English, knowledge of Spanish is recommended.

### **ILS 35801. Summer Service Learning Internship: Hispanic**

(3-0-3)

This is a leadership internship for Hispanic studies working 10-12 weeks in a Hispanic/Latino area with organizations dedicated to empowering local communities. Students will complete the requirements of THEO 33931 and work with the Center for Social Concerns to build partnerships with the agencies and people involved. Application and interview necessary for participation.

### **ILS 40100. Applied Anthropology: Immigrant Labor Rights**

(4-0-4)

In conjunction with local organizations and social science researchers, students will work within Elkhart, collecting ethnographic data from immigrant community members. They will also learn how to apply the data they have collected to models for serving the community to find ways to better serve the local community and meet its needs.

### **ILS 40103. Mexican Immigration: A South Bend Case Study**

(3-0-3)

This course uses experiential learning in the Mexican community of South Bend in order to understand how Mexican migrants conduct their lives across the vast distances separating South Bend and their homeland. The course begins with readings in social science and fiction about transnationalism, Mexican-US migration and the history and sociology of the local community. Next we learn ethical fieldwork methods in preparation for community research. Students working in two-person teams will gather data on local and transnational households and kin networks, political involvement, employment, consumption practices, cultural activities and religious life, working through contacts with social service agencies, the Mexican consulate, and Mexican- or Latino-run media, businesses, food stores, and sports leagues. We will document the innovative adaptations of this migrant community, especially the growth of an ethnic enclave of small businesses that both unite Mexicans as an ethnic group and sustain their ties to their homeland. We intend to compile the research in a volume published by Latino Studies to be given to those who shared their lives with us and to entities that are committed to helping them.

### **ILS 40300. Growing Up Latino: Narrative and Literature**

(3-0-3)

This course will explore the ways in which narratives/stories, specifically autobiographical and biographical ones, tell an individual as well as a total story. What do the Latino/a writers say about their own identities and cultures as Chicanos/Mexicanos, as Cubanos, Puertoriquenos, and as women? How and in what ways are ethnic identities within a Latino diaspora constructed, and what issues cut across ethnic and racial lines. How do Latinos construct race/ethnicity vis-à-vis whiteness? In other words, how do we frame ourselves and how are we framed in relation to the dominant constructions of race in this country? How is gender constructed, and how do we construct gender? What emerges as counter-hegemonic for us and these writers?

### **ILS 40301. Memory in Latino/a Literature**

(3-0-3)

What is memory? Do we have national or communal memories and, if so, how are these formed? Does the present affect the memory of the past? What is the relationship among memory, history and fiction? In this course we will consider these questions as we study Latino/a novels, short stories, autobiographies, memoirs, poetry, film and performance. Our selected texts frequently address or invoke memory, linking it to an exploration of belonging and to individual and communal identities (national, ethnic, racial, gendered, sexual). Some of the questions we might ask ourselves as we read include: What is remembered in Latino/a literatures? How and why do these literatures invoke and create individual and collective memories? How does memory intersect with the "stance of resistance" that Ramon Saldívar suggests is a central to Chicano/a literature? Who does the remembering? How do acts of memory expand the parameters of what constitutes "Latino/a" or map multiple Latino/a nations? Requirements for this research seminar include: weekly one-page critiques, regular participation in discussion,

one oral presentation, and an original research paper of 15 pages length (including bibliography and first draft for review. This small group research seminar affords students the opportunity for more in-depth work with professor and peers.

### **ILS 40302. Crossing Color Lines**

(3-0-3)

An exploration of the conflicted and contradictory ways in which racial and ethnic identities have been constructed and mediated in American culture.

### **ILS 40303. American War Literature**

(3-0-3)

Beginning with Mary Rowlandson's captivity narrative and ending with Tim O'Brien's *The Thing They Carried*, an exploration of the aesthetic, historical, and theoretical functions and values of war writing in the United States.

### **ILS 40304. Icons and Action Figures in Latino/a Literature**

(3-0-3) Delgado

Understanding US Latino/a literature, art, and film through its many allusions to and representations of traditional icons and historic figures as well as legends, myths, popular figures, and action heroes/heroines of the Americas (including those with origins in Native American, Latino/a, African, Asian, and European cultures).

### **ILS 40305. Literature Across the Americas**

(3-0-3)

National borders mark our Americas today, but for the first European explorers the landscapes of their "new world" were uncharted and unbounded. The newly encountered land seemed to invite utopian dreams even as it became the arena for genocidal violence. It also invited the act of writing as one mode of inscribing narratives of order and cultural continuity, texts that today retain their power to convey scenes of intense emotional and existential crisis. To reconsider these moments of violence and possibility, we will approach early American literature intra-hemispherically, primarily in English and English translation, although bilingual students participating in the Language Across the Curriculum Program will read selected texts in Spanish. We will read comparatively in order to ask trans-American questions. For example, what do we learn when we juxtapose Cortés' invasion of the Mexican empire to King Philip's War in the New England colonies? What comparisons arise between the poetry of Anne Bradstreet and Sor Juana Inés de La Cruz; between the captivity adventures of Cabeza de Vaca and Mary Rowlandson? How have Native Nations across the Americas written or spoken the loss of worlds? How have revolutionaries imagined new ones in Latin America and in the United States? At what point do separate histories and literatures reveal commonality and when and how do they point to distinctions? Perhaps most crucially, how might such cross-cultural readings intimate a new dissolution, or re-alignment, of national boundaries in the American hemisphere? The authors and subjects noted above will serve as key markers, but we will also read primary works by William Bradford, Gaspar Pérez de Villagrà, El Inca Garcilaso de la Vega, Sarah Kemble Knight, William Apess, and others as we reconsider the literatures and histories of the Americas in a cross-national paradigm. Students will be expected to write three short papers, take a mid-term and final exam, develop group projects, and participate actively in class. Students participating in the LAC program will meet separately for weekly discussions in Spanish.

### **ILS 40307. Literatures of Immigration**

(3-0-3) Rodríguez

Closed reading of recent literature that explores the immigration between Mexico, Latin America, and the United States

### **ILS 40402. History of Cubans in the US**

(3-0-3)

This course will examine the Cuban experience in the United States, especially through the concept of exile. We will examine the history of Cuban immigration, community formation, socioeconomic integration, political development, expressions of exile and national identity, the emergence of Cuban-American identity, and impact of Cuban exiles on US foreign policy toward Cuba. The course will also explore those aspects of Cuban history that have contributed historically to

the creation of exile communities in the United States, including Cuba's 19th-century wars of independence against Spain, early 20th century efforts at political stability, and the Cuban Revolution of 1959.

#### **ILS 40403. Survey of Latin American History**

(3-0-3)

This course provides an introduction to the major themes of Latin American colonial history, including the discovery, conquest, and settlement of the New World, the institutional framework established by the Iberian countries to advance their economic, political, and religious interests in the region, and various aspects of Latin American society and culture until independence in the early 19th century.

#### **ILS 40404. Hispanic Origins in the US**

(3-0-3)

The Hispanic presence in territories that are today part of the United States date from the foundation of communities like San Agustín, La Florida (1565), Santa Fe, San Antonio, Texas (1718), and Los Angeles, California (1781). This course will examine the foundation and historical development of these and other communities within the context of Spanish and Mexican civilization, tracing their trajectory toward their eventual conquest and incorporation into the United States during the first half of the 19th century. Placing this story within the larger picture of US Latino history, the course will examine the political, socioeconomic, religious, and cultural dimensions of early US Hispanic history.

#### **ILS 40406. Latinos and Christianity**

(3-0-3)

This course examines the unique religious history of US Latinas/os, starting with the Spanish and Latin American colonial origins and outlining the rise of parishes and congregations north of Mexico. Readings and lectures will present historical, sociological, and theological methods for examining contemporary issues facing Latino Catholics and Protestants, such as social justice movements, religion in the thought of prominent Latina/o writers and commentators, and ecumenical trends in Latin America and US Latino Christianity. Other important themes include the changing role of Latinos in the US immigrant church, the impact of Latin American liberation theology on US Latinos, and the linkages between religion and cultural identity among peoples with roots in Mexico, the Hispanic Caribbean, and Central and South America presently living in the US. Lectures and discussions will be supplemented with visual material.

#### **ILS 40407. Latinos in Modern America**

(5-0-3)

This is an interdisciplinary history course examining the Latino experience in the United States after 1848. We will examine the major demographic, social, economic, and political trends of the past 150 years with an eye to understanding Latino/a America. Necessarily a large portion of the subject matter will focus on the history of Mexican Americans, and Mexican immigrants in the Southwest and Midwestern United States, but we will also explore the histories of Puerto Ricans, Cubans, and Latin Americans within the larger Latino/a community. Latinos are US citizens, so the course will spend significant time on the status of these groups before the law, and their relations with the state, at the federal, local, and community level. To explore these issues within the various Latino communities of the US, we will explore the following key topics covered: historical roots of "Latinos/as" in the US; the evolution of a Latino/a ethnicity and identity within the US; immigration, transmigration, and the shaping of Latino/a communities; Latino/a labor history; segregation; civil rights; nationalism and transnationalism; the Chicano civil rights movement; Latinos in film; and post-1965 changes in Latino/a life.

#### **ILS 40500. Human Rights in Latin America**

(3-0-3)

This course takes the concept of international human rights as the framework to explore contemporary cultural, economic, and political debates about identity, culture, and society in Latin America. We will review the civil and political rights, the social and economic rights, and the indigenous people's rights of the International Declaration of Human Rights through ethnographic case studies. For example, we will explore (1) freedom of speech in Chile and review the report of the findings

of the Truth Commission; (2) indigenous people's rights in Colombia and learn about the Afro-Colombian movements for ancestral lands; and (3) social and economic rights in Guatemala and current efforts to implement socio-economic recommendations of the Commission for Historical Clarification. In each area, we will specifically address the role of anthropology, the American Anthropological Association's human rights declaration, and the unique contribution anthropologists can make to international efforts to understanding human rights.

#### **ILS 40600. Latino Psychology**

(3-0-3)

The purpose of this course is to examine the psychosocial research and literature about Latino/a individuals and communities within the United States. Students will be actively involved in discussing issues relevant to Latino/a well-being, including immigration and acculturation, ethnic identity, religiosity, family life, prejudice and discrimination, and multiracial identity. Economic, educational, and social opportunities for Latinos also will be studied, and efforts towards social advocacy and the delivery of psychological interventions for Latino communities will be critically examined.

#### **ILS 40601. Psychology of Race: Examining Racial and Ethnic Identity Development**

(3-0-3)

The purpose of this course is to examine the psychological aspects of racial and ethnic identity development in the United States. This course will look at the general ideas of identity development from a psychological basis as well as the personal identities of American groups. The main course objectives are to increase students' cultural awareness of their own and others' racial and ethnic identities; to develop relevant knowledge of about identity constructs in understanding different populations; and to develop critical thinking skills in studying and evaluating research on the role of racial and ethnic identity development in psychological processes and human behavior.

#### **ILS 40700. International Migration and Human Rights**

(2-0-2) Bustamante

A three-week course that refers to a review of basic questions on international migration, with emphasis on immigration to the United States and the methods through which these questions have been adequately or inadequately answered. The numbers, impact, nature, structure, process, and human experience will be discussed in terms of the research methods commonly used to approach them. Spring.

#### **ILS 40702. Qualitative Methodology**

(3-0-3)

The seminar will cover the general topic, with particular attention to ethnography and fieldwork, visual methods, archival research, and related strategies. Heavy emphasis will be placed on cross-cultural research in minority communities in the United States.

#### **ILS 40703. Latino Image in American Films**

(3-0-3)

This course traces the historical depiction of Chicanos, Mexicanos, Puerto Ricans, Cubans, and other Latinos in Hollywood-made movies. Cinematic plots, roles, and motifs—from the earliest of silent films through the onset of the 1980s—are examined to explore the changing physical, social, and cultural definitions of Latinos in the United States. All films and filmmakers are considered within their historical context. Though the main object of study is the Latino image, the course also surveys corresponding images for other ethnic minority groups.

#### **ILS 40705. Religion and Power in Latin America**

(3-0-3)

The cultural dimension of religion and the institutional building abilities present in religious communities are building new power sources for religious in present Latin American context. Taking the experience of Peru, we will look at Latin American recent processes in the religious domain. The course will describe the changing conditions of the Catholic church in Latin America and the new situation of religious pluralism produced by the growing presence of evangelical groups

and Pentecostalism. We will look at the impact of religion in the empowerment of people from below, and its relation to new social movements as well as to the institutionalization of power at the state level in the new context of globalization.

#### **ILS 40706. Latinos in American Society**

(3-0-3)

This seminar will focus on the breakdown of the Spanish empire in Latin America and the emergence of new nation-states in the region in the first quarter of the 19th century. Contrary to common expectations, the former colonies did not form a united nation, but rather split into 10 different republics that developed their own unique histories, only to split further apart during the course of the century. This seminar will examine the origins and actors of the independence movements, the development of an ideology of emancipation, and the variegated causes of fragmentation.

#### **ILS 40707. International Migration and Human Rights**

(3-0-3) Bustamante

This course is an extension from the mini-course to a full term offered by Prof. Bustamante, with a wider coverage of international migration experiences in the world with an emphasis on human rights. It starts with a historical approach to various immigration waves to the United States, from the years of the Industrial Revolution to the present. It focuses on the current debate on the impact of the undocumented immigration from Mexico and Central America, with a discussion of the gap between public perceptions and research findings. Differences between Mexico's and the United States's migration policies, and its social and economic implications, are discussed. The recent developments within the context of the United Nations' Commission of Human Rights on the relationship between migration and human rights are also covered.

#### **ILS 40708. Social Demography of US Minorities**

(3-0-3)

The intent of this demography course is to familiarize students with basic statistical methods and techniques that are applied to the study of population data. The course will offer students an opportunity to gain "hands-on" experience with manipulating quantitative data and generating results. The backdrop for the class is ethnic status. Because we will have access to social data for major ethnic categories (e.g., white, African American, Hispanic, Asian, and American Indian), one of the byproducts of learning the methods and techniques of demographic analysis will be a comparative study of ethnic groups across several social dimensions.

#### **ILS 40709. Ideology and Politics/Latin America**

(3-0-3)

Ideological discourse shapes political action in Latin America. Thinkers such as Martí, Mari, Cardoso, and others and their discourses—nationalism, revolutionary nationalism, Latin American Marxism, developmentalism, modernization theory, dependency theory, and democratization—acted within specific historical contexts and contributed actively to the conformation of political action. It is our purpose to present the main ideological positions and their impact upon political action in the continent. Their constituent elements conform a unity we will discuss on the basis of lectures, reading of the texts, and debates presented by teams of students.

#### **ILS 40710. Aesthetics of Latino Cultural Expression**

(3-0-3) Cardenas

This course analyzes the philosophy and principles underlying the social and political aspects of Latino art.

#### **ILS 40713. Latino Economic Development: Research and Policy**

(2-0-2)

This course examines the Latino experiences in the United States and the underlying conditions of Latino workers, businesses, and communities. It begins with a profile of Latino workers by age, gender, education, immigrant makeup, and occupation in the labor market. Students will learn how to use federal and state data to examine Latino workers' income and occupation status. Students will learn about the industrial and occupational classification systems used by the federal government to study workers and working conditions. They will also study related

public policies of the federal government that govern over the human rights, economic status, and economic well-being of all US workers.

#### **ILS 40714. Social Demography of the US Latino Population**

(2-0-2)

This course is an introduction to the social demography of Latino or Hispanic populations in the United States as to historical background, sociological fields, and current statistics and studies. First, in exploring the demographic perspective on the Latino population, a strikingly young and increasing segment of the US population, the processes of fertility, mortality, and migration are presented. Next to be addressed is the literature on conceptualizing and quantifying the US Latino population, legal frameworks for residence status of migrants, and Latinos in the context of social institutions of family, education, and government. In the future, the changing Latino population is expected to contribute to a US population profile different from the US population of the past century. Thus, the course is relevant in contemporary discussions of immigration policy, globalization, and environment.

#### **ILS 40715. Latinos in Education**

(3-0-3)

This course examines the educational experiences and struggles of Latinos in US public schools. Students will study these experiences through legal, political, historical, social, and economic perspectives regarding educational policies and practices. Additionally, this course focuses on the potential of education as an agent for social justice and change for linguistically and culturally diverse groups, and thus its important role in the Latino experience. The goal of this course is to develop a reflective individual who is able to understand the educational context of Latinos in the United States.

#### **ILS 40717. Race Relations in the United States**

(3-0-3)

This course focuses on racism and race relations in the United States. Current cases involving racial issues will be presented and discussed in class. Readings, discussion and lectures will examine the background and current status of the dominant ethnic minority groups in the United States today. The issue of race will also be viewed in relationship to police practices, housing patterns, economic opportunities, gender relations and politics. Class participation and student experiences will be emphasized.

#### **ILS 40801. Theology and Popular Piety in US Catholicism**

(3-0-3)

This course explores the theological insights inherent in the religious practices and spiritual traditions of African American, Latino/a, and European American Catholics. Particular emphasis is given to popular piety as a source for theology and the ways theologians and pastoral ministers can critically engage popular religious traditions.

#### **ILS 40802. Culture, Religion, and Evangelization**

(3-0-3)

This course will examine the theological basis of inculturation, its historical development, ecclesial documentation, and the implications for ecclesiology, liturgy, catechesis, and the theological elaboration. The course will include lectures, videos, class discussion, and practical exercises.

#### **ILS 40803. Memory and Prophecy**

(3-0-3)

In the last decades, significant theological trends have emerged, both from poor countries and from marginalized groups within wealthy countries. Why have they emerged from different Christian churches of our time? This course will explore this question taking the case of Latin American theology. In particular, it will consider the implications of the "preferential option for the poor" for the areas of theological reflection, pastoral work, and spirituality. Special attention will be paid to the biblical foundations of that option as summed up in two crucial concepts: memory and prophecy. The 16th-century Dominican, Bartolome De Las Casas, said, "Of the least and most of forgotten people, God has a very fresh and vivid memory." The Bible invites us to make God's memory our own, and one

component of that memory is the remembrance of the “least ones.” The announcement of the Gospel is linked to the advice received by Paul to “remember the poor” (Gal. 2:10). Theologically, poverty is the negation of creation. Poverty means death. Thus, the option for the poor also manifests in the prophetic opposition to that which means death for the poor. The course will examine what memory and prophecy signify for living a Christian life and doing theology in light of some of the major challenges to Christian faith today.

**ILS 40804. Latino Film: Culture, God, and Redemption**  
(3-0-3)

The course will view great films from Latin America and the Latino United States and discern what culture is portrayed, the presence or absence of God within the film, and how redemption is expressed in the film. Since some of the films will not have subtitles, a working knowledge of Spanish is helpful.

**ILS 40900. From EL BARRIO to CALLE OCHO: Urban Experience in US Latino/a Literature**  
(3-0-3)

In this course students will examine Latino/a texts of various ethnic backgrounds that offer representations of the urban landscape and experience. Issues of migration, discrimination, social mobility, gender, class, race, and transnationalism will be central to our discussions of the cultural politics of urban space. Knowledge of Spanish required.

**ILS 40901. Cuban Literature**  
(3-0-3)

An in-depth study of a particular theme, author, or genre in Cuban literature.

**ILS 40902. Mexican Literature**  
(3-0-3)

Combines an overview of the historical development of prose, poetry, and theatre in Mexico, with a close look at special problems and issues in Mexican literature.

**ILS 40905. Beyond the Islands: Latino/a Caribbean Literature and Culture**  
(3-0-3)

This course examines the literary and cultural production of Latinas/as from the Spanish-speaking Caribbean. Issues of migration, transnationalism, and transculturation will be explored through the analysis of texts by Puerto Rican, Cuban American, and Dominican American authors.

**ILS 40908. Self, Family, Nation: Insular and US Hispanic Caribbean Women Authors**  
(3-0-3) Moreno

This course focuses on the literature of Hispanic Caribbean women authors in the islands and in the US. By contrasting the works of recent and more established authors from Puerto Rico, Cuba, the Dominican Republic, and their counterparts in the US, we'll explore the construction of gender and sexuality from a Caribbean feminist perspective. Some of the texts that this course will examine include *In the Time of the Butterflies* by Julia Alvarez, *Papi* by Rita Indiana, *When I was Puerto Rican* by Esmeralda Santiago, *Maldito amor* by Rosario Ferré, and *Dreaming in Cuban* by Cristina García.

**ILS 45103. Mexican Immigration: A South Bend Case Study**  
(3-1-4)

This course uses experiential learning in the Mexican community of South Bend in order to understand how Mexican migrants conduct their lives across the vast distances separating South Bend and their homeland. The course begins with readings in social science and fiction about transnationalism, Mexican-US migration and the history and sociology of the local community. Next we learn ethical fieldwork methods in preparation for community research. Students working in two-person teams will gather data on local and transnational households and kin networks, political involvement, employment, consumption practices, cultural activities, and religious life, working through contacts with social service agencies, the Mexican consulate, and Mexican- or Latino-run media, businesses, food stores, and sports leagues. We will document the innovative adaptations of this migrant community, especially the growth of an ethnic enclave of small businesses that both unite

Mexicans as an ethnic group and sustain their ties to their homeland. We intend to compile the research in a volume published by Latino Studies to be given to those who shared their lives with us and to entities that are committed to helping them.

**ILS 46711. Directed Readings: Latino Studies**  
(V-0-V)  
Independent faculty-supervised readings.\* Credits 1-6

**ILS 46713. Directed Readings**  
(V-0-V)  
Independent faculty-supervised readings.\* Credits 1-3

## Department of Military Science (ROTC-Army)

### MSL 10101. Introduction to Military Leadership I

(1-2-1) Wood

A study of the organization of the Army with emphasis on understanding and implementing officership, leadership, and the Army values. Military courtesy, discipline, customs, and traditions of the service, fitness, and communication are taught and demonstrated through practical exercise. Includes a 48-hour field training exercise and a weekly two-hour laboratory emphasizing basic soldier skills such as land navigation and marksmanship.

### MSL 10102. Introduction to Military Leadership II

(1-2-1) Wood

A study of functions, duties, and responsibilities of junior leaders. Emphasizes operations of the basic military team to include an introduction to the Army's problem-solving process as well as the fundamentals of time and resource management. Includes a 48-hour field training exercise and a weekly two-hour laboratory emphasizing basic soldier skills such as first aid, US weapons, and military communication.

### MSL 20201. Foundations of Military Leadership I

(2-2-2) Osborne

Study and application of map-reading skills, military communications, and development of individual leadership techniques by learning the fundamentals of small unit tactical operations. Emphasis on individual physical fitness and conducting self-evaluations to facilitate growth. Includes a 48-hour field training exercise and a weekly two-hour laboratory that offers the opportunity to demonstrate learned leadership techniques along with instruction on basic military skills of land navigation and rifle marksmanship.

### MSL 20202. Foundations of Military Leadership II

(2-2-2) Osborne

Study and application of mission planning and orders with an emphasis on small unit leadership in tactical settings. Land navigation, map reading, marksmanship, and communication skills will be evaluated. Students are expected to demonstrate that they have mastered basic soldier skills and leadership fundamentals. Includes a 48-hour field training exercise and a weekly two-hour laboratory that offers the opportunity to demonstrate learned leadership techniques along with advanced instruction on military skills.

### MSL 30301. Tactical Military Leadership

(2-2-2) Anderson

Military decision making, problem analysis, and integrated planning of platoon operations. Analysis of the components of leadership through practical exercises and historical examples. Includes one 48-hour field training exercise.

### MSL 30302. Applied Military Leadership

(2-2-2) Anderson

Advanced military decision making, problem analysis, and integrated planning with synchronization of multiple assets. This is conducted on the basis of platoon operations and tactics. Includes two 48-hour field exercises.

### MSL 40401. The Professional Officer and Developmental Military Leadership

(2-2-2) Wawrzyniak

Advanced study of the military profession and of the concept of officership. Addresses training management, along with staff organization, functions, and processes, the components of officership, which include requirements to be a leader of character, a warfighter, a member of the profession of arms, and a servant of the nation, and the just war tradition.

### MSL 40402. Adaptive Military Leadership and Military Ethics

(2-2-2) Wawrzyniak

Advanced study of military leadership, military ethics, and a variety of issues relevant to junior military officers. Addresses the Army's leadership doctrine in depth, paying particular attention to the Army's leadership requirements model, along with military ethics and ethical decision making in professional situations.

Additional topics include the law of war, cultural awareness, Army organization, and Army administration.

### MSL 40414. American Military History I

(1-0-1) Dukeman

This course is the first part of a two-semester survey course with an analysis of American military history from the early American colonial period through the current global war on terrorism. The MSL 40414 course is designed to be an exploration into the evolution of modern warfare with special emphasis on the technological developments, organization adaptations, and doctrinal innovations that have shaped the American military from its first conception in 1607 through the 1900. The successful completion of MSL 40414 and 40415 meets the military history pre-commissioning requirement for US Army ROTC cadets.

### MSL 40415. American Military History II

(1-0-1) Dukeman

This military history course is the second part of a two-semester survey course with an analysis of American military history from the Revolutionary War through the current global war on terrorism. The MSL 40415 course is designed to be an exploration into the evolution of modern warfare; with special emphasis on the technological developments, organization adaptations, and doctrinal innovations that have shaped the American military from 1900 through the modern day war on terrorism. Part of this course includes a field trip to the nearby First Division Museum at Cantigny in Wheaton, Illinois. The successful completion of MSL 40414 and 40415 meets the military history pre-commissioning requirement for US Army ROTC cadets.

### MSL 40498. Topics in Military History

(2-0-2) Jordan

This course is a study of military tactics, leadership, doctrine, technologies, techniques, and procedures as they relate to historical military campaigns.

### MSL 47498. Topics in Military Studies

(2-0-2) Wawrzyniak

This is an independent study course that will allow contracted ROTC cadets to design a course of study to investigate selected topics in military science more completely.

## Department of Naval Science (ROTC—Navy)

### NSCI 10101. Introduction to Naval Science

(2-0-2) Karnowski

*Corequisite:* NSCI 41000

An introductory study of the US Naval customs and traditions, military courtesies, organizational structure, officer career paths, and the role of the Naval service in supporting national policies. Required for all NROTC freshmen. Fall.

### NSCI 10102. Maritime Affairs

(2-0-2) Lipke

*Corequisite:* NSCI 41000

A comprehensive study of the development of seapower throughout history, focusing on the important role played by the American Navy in the formation of an independent United States. Includes analysis of the Roman and Greek Navies, but focuses on the American Navy from the Revolutionary War through the global war on terrorism. Spring.

### NSCI 20201. Leadership and Management I

(3-0-3) Lipke

*Corequisite:* NSCI 41000

A comprehensive study of organizational leadership. Emphasis on motivation, planning, communication, feedback, and subordinate needs. Introduction to moral leadership. Fall.

### NSCI 20202. Navigation

(3-0-3) Lipke

*Corequisite:* NSCI 41000

A study of the theory and principles of navigation. The course covers dead reckoning, piloting, and navigation tools. Electronic, inertial, and celestial navigation systems are discussed. Nautical rules of the road and laws regarding vessel operation are also included.

### NSCI 30301. Naval Ships Systems I

(3-0-3) Karnowski

*Corequisite:* NSCI 41000

A detailed study of ship propulsion and auxiliary systems. Emphasis on fossil fuel, nuclear, and gas turbine systems. Introduction to ship design and damage control. Fall.

### NSCI 30302. Naval Ships Systems II

(3-0-3) Karnowski

*Corequisite:* NSCI 41000

An overview of basic theory and principles of modern naval ordnance, weapon systems, and their interaction with the physical constraints of the environment from initial target detection to final target engagement. Course contains an overview of types of weapon systems, including a study of target identification, detection, acquisition, tracking, and engagement. Spring.

### NSCI 40401. Naval Operations and Seamanship

(3-0-3) Lipke

*Corequisite:* NSCI 41000

A study of ship handling and employment, including communications, and sonar and radar searches. Tactical formations, dispositions, and basic seamanship are taught. Relative motion and the maneuvering board are introduced. Naval command and control issues are also discussed. Fall.

### NSCI 40402. Leadership and Ethics

(3-0-3) Seager

*Prerequisite:* (CSE 30264 OR CSE 364)

*Corequisite:* NSCI 41000

A study of practical leadership skills for any manager focusing on the specific leadership and management responsibilities of a Naval officer. Teaches skills needed to transition from student to manager. Explores Naval ethical issues, Naval law, and Navy policies and programs. Spring.

### NSCI 40413. Amphibious Warfare I

(3-0-3) Theriot

*Corequisite:* NSCI 41000

A study of the origin and development of amphibious warfare with emphasis on leadership, tactics, the principles of war, and application to the modern battlefield. This course is required for Marine options and alternates every other fall semester with Evolution of Warfare.

### NSCI 40415. Evolution of Warfare I

(3-0-3) Theriot

*Corequisite:* NSCI 41000

An exploration of warfare as an instrument of foreign policy throughout history. An analysis of the great captains, military organizations, and military theorists of history. This course is required for Marine options and alternates every other fall semester with Amphibious Warfare.

### NSCI 41000. Drill/Leadership Laboratory

(0-1-0)

Practical exercises in leadership, including close order drill and professional development classes.

## Department of Physical Education and Wellness Instruction

### PE 11001. Contemporary Topics I

(0-0-0)

*Corequisite:* PE 10001

This is the first component of the Contemporary Topics course that is designed to aid the student in transition from high school to university life issues. The class will address the unique demands on the student and will be directed toward the different dimensions of wellness. Emphasis is on decision-making skills and positive life choices in areas of personal, academic, and professional success. Opportunities will be presented to enable the student to increase awareness of self-responsibility, enhanced self-understanding, exposure to campus resources, and strategies for improved behavior change.

### PE 11002. Contemporary Topics II

(0-0-0)

*Corequisite:* PE 10001

This is the second component of the Contemporary Topics course that is designed to aid the student in transition from high school to university life issues. The class will address the unique demands on the student and will be directed toward the different dimensions of wellness. Emphasis is on decision-making skills and positive life choices in areas of personal, academic, and professional success. Opportunities will be presented to enable the student to increase awareness of self-responsibility, enhanced self-understanding, exposure to campus resources, and strategies for improved behavior change.

### PE 11003. Contemporary Topics and II

(0-0-0)

*Corequisite:* PE 10001

This is the full Contemporary Topics course, which is designed to aid the student in transition from high school to university life issues. The class will address the unique demands on the student and will be directed toward the different dimensions of wellness. Emphasis is on decision-making skills and positive life choices in areas of personal, academic, and professional success. Opportunities will be presented to enable the student to increase awareness of self-responsibility, enhanced self-understanding, exposure to campus resources, and strategies for improved behavior change.

### PE 11004. Athlete

(0-0-0)

This course is for student-athletes.

### PE 11005. American Dance—Female

(0-0-0)

*Corequisite:* PE 10001

These activities are among the departments most popular. The basics of ballroom dance, along with proper etiquette, are presented. American Dance includes the Waltz, Foxtrot, Two-Step, Jitterbug, Swing, and Polka. Latin Dance includes the Cha Cha, Merengue, Mambo, Tango, and Salsa.

### PE 11006. American Dance—Male

(0-0-0)

*Corequisite:* PE 10001

These activities are among the departments most popular. The basics of ballroom dance, along with proper etiquette, are presented. American Dance includes the Waltz, Foxtrot, Two-Step, Jitterbug, Swing, and Polka. Latin Dance includes the Cha Cha, Merengue, Mambo, Tango, and Salsa.

### PE 11007. Latin Dance—Female

(0-0-0)

*Corequisite:* PE 10001

These activities are among the departments most popular. The basics of ballroom dance, along with proper etiquette, are presented. American Dance includes the Waltz, Foxtrot, Two-Step, Jitterbug, Swing, and Polka. Latin Dance includes the Cha Cha, Merengue, Mambo, Tango, and Salsa.

### PE 11008. Latin Dance—Male

(0-0-0)

*Corequisite:* PE 10001

These activities are among the departments most popular. The basics of ballroom dance, along with proper etiquette, are presented. American Dance includes the Waltz, Foxtrot, Two-Step, Jitterbug, Swing, and Polka. Latin Dance includes the Cha Cha, Merengue, Mambo, Tango, and Salsa.

### PE 11009. Fencing

(0-0-0)

*Corequisite:* PE 10001

Fencing is the art and sport of swordsmanship using a blunt weapon. Fencers use one of three types of weapons—the foil, the epee, or the sabre. Students will learn fencing moves such as On Guard, Lunge, Attack and Parry, and Touch, as well as an understanding of the basic rules of competition.

### PE 11010. First Aid / CPR (AED)

(0-0-0)

*Corequisite:* PE 10001

The principle objective in this course, through knowledge and skill development, is to be prepared and meet the needs of most situations where emergency action is required. In this course, adult CPR and first aid sections are certified separately. Automated external defibrillation is included if time allows.

### PE 11011. Fitness for Life

(0-0-0)

*Corequisite:* PE 10001

These activities focus on several methods of achieving and maintaining a healthy level of fitness. Emphasis will be on aerobic conditioning and cardiorespiratory endurance, but flexibility, agility, coordination, and balance will be addressed. Many activities are group-oriented, such as soccer, team handball, circuit training, jump rope, rabbit runs, interval training, and ultimate Frisbee football.

### PE 11012. Fundamentals of Physical Activity

(0-0-0)

*Corequisite:* PE 10001

This course is offered for students who would like exposure to a variety of physical education activities. From the knowledge and understanding gained, the student can then pursue in greater depth activities of interest. Examples include wall climbing, golf, racquetball, handball, volleyball, tennis, and weight training.

### PE 11013. Golf

(0-0-0)

*Corequisite:* PE 10001

Rules, regulations, and golf etiquette will be introduced via videos and books. Using irons and woods, three areas will be addressed: the basics of grip, techniques of a sound swing, and elements of the game. Descriptions and practice of putting, chipping, pitching, and the full swing are included in this course.

### PE 11014. Handball

(0-0-0)

*Corequisite:* PE 10001

This is an excellent activity to develop several elements of fitness: cardiovascular endurance, muscular fitness, coordination, and flexibility. Students will have access to 10 courts in the Rockne Memorial Building. Emphasis is on eyes-to-hand-to-ball coordination, developing the weak hand and side, as well as handball skills for play. Rules, regulations, safety, and principles for strategy will be covered.

### PE 11015. Hiking

(0-0-0)

*Corequisite:* PE 10001

Learn how to prepare for and enjoy a day of hiking in a variety of urban and natural settings. Learn compass techniques, pacing, safety, survival skills, and the climbing wall.

**PE 11016. Ice Skating**

(0-0-0)

*Corequisite:* PE 10001

Ice skating is an important competitive sport as well as a popular form of recreation. This class will teach skating safety, use of the right equipment, and basic skating moves and techniques. Class may include games, relays, and broomball.

**PE 11017. Independent Study**

(0-0-0)

*Corequisite:* PE 10001

This course permits individual curriculum design between the student and the PE department.

**PE 11018. Lifeguard Training**

(0-0-0)

*Corequisite:* PE 10001

The purpose of this Red Cross course is to provide students the skills and knowledge needed to prevent and respond to aquatic emergencies. The suggested time for the lifeguard course is approximately 34 hours. It is all-inclusive with First Aid and CPR for the professional rescuer. Modules for oxygen administration, use of an automated external defibrillator, and preventing disease transmission will be included.

**PE 11019. Racquetball**

(0-0-0)

*Corequisite:* PE 10001

Racquetball is a game similar to handball with respect to rules and the physical skill involved. Since only one hand is used, it is more easily learned than handball. This sport has high carry-over potential and can be enjoyed co-recreationally. Emphasis is placed on rules of the game, strokes, footwork, court position, and strategy.

**PE 11020. Self-Defense**

(0-0-0)

*Corequisite:* PE 10001

This course will provide knowledge, understanding, and appreciation of the psychological and philosophical fundamentals required to participate in the art of self-defense. Through practice and different example scenarios, students will develop a degree of proficiency in a variety of techniques.

**PE 11022. Skiing—Cross-Country**

(0-0-0)

*Corequisite:* PE 10001

Learn one of the fastest growing sports in the country. This course will introduce the student to equipment and basic skills necessary for participation. Equipment is provided and classes are taught on the Notre Dame Golf Course. A fee is charged.

**PE 11023. Skiing—Downhill/Snowboarding**

(0-0-0)

*Corequisite:* PE 10001

This course is open to both non-skiers and skiers of various abilities. It is designed to help the beginner achieve adequate skill in order to enjoy the sport and to ski under control. It will allow a person who has skied before to. The fee charged includes transportation, lessons, lift tickets, and use of equipment.

**PE 11024. Soccer**

(0-0-0)

*Corequisite:* PE 10001

Soccer maintains its place in the program due to its contribution to fitness and worldwide popularity. The sport is a combination of individual skills and team play. The course objectives are to develop stamina, agility, balance, and coordination, as well as an understanding of the rules and field strategy.

**PE 11026. Sports—Coaching**

(0-0-0)

*Corequisite:* PE 10001

This course explores the art and science of coaching sports at various levels.

**PE 11027. Swimming—Basic**

(0-0-0)

*Corequisite:* PE 10001

It is University policy that all students should be able to protect themselves in the water. Therefore, all students must take a swim test. Our swimming program is designed to equip the student with water safety skills and knowledge in order to be reasonably safe and comfortable in, on, and around the water.

**PE 11028. Team Handball**

(0-0-0)

*Corequisite:* PE 10001

This is a physical and dynamic sport that combines the skills of running, jumping, and throwing into a fast-moving and exciting game. Team handball incorporates facets of various team sports, most closely resembling basketball: dribbling and passing, picks and rolls, and fast breaks. The basic objective of the game is to outmaneuver the opponent by passing the ball quickly and then throw the ball past the defense and goalie to score.

**PE 11029. Tennis**

(0-0-0)

*Corequisite:* PE 10001

Beginning tennis introduces the student with little or no background to a game that can be played throughout one's lifetime. Fundamentals of grip, forehand, backhand, serve, and volley, as well as rules and etiquette of tennis are stressed. Time for supervised practice is provided. Intermediate tennis will review basic skills of the game, as well as introduce net play, volley, overheads, and lob. In addition, court strategy and tactics are taught. The department provides racquets.

**PE 11030. Volleyball**

(0-0-0)

*Corequisite:* PE 10001

An increasingly popular team game that can be played in- or outdoors, either recreationally or competitively. Basic skills include fundamentals of the serve, passing, spiking, and blocking. Rules and court strategy are a part of this course.

**PE 11031. Walking and Jogging**

(0-0-0)

*Corequisite:* PE 10001

Becoming one of the fastest-growing trends for cardiorespiratory endurance, it is used for recreational fitness as well as an Olympic sport. Students will learn about proper shoes, safety, and correct stride techniques, as well as designing and monitoring a successful program.

**PE 11032. Water Safety Instructor Course**

(0-0-0)

*Corequisite:* PE 10001

The WSI course prepares candidates to teach various Red Cross swimming and diving skills, as well as emergency prevention and response. The course length is approximately 34 hours, which includes the fundamentals of instructor training.

**PE 11033. Weight Training**

(0-0-0)

*Corequisite:* PE 10001

The objective of this course is to introduce the student to methods and techniques for improving muscular strength and endurance through program design. Methods of training include machines, free weights, and training without apparatus. Orientation to equipment, safety, and proper technique is emphasized.

**PE 11034. Yoga**

(0-0-0)

*Corequisite:* PE 10001

Yoga has a long history of philosophy and tradition, often referred to as the science of spirituality. Used as a form of exercise and cross-training, it has profound and far-reaching health benefits. Students will receive information on the benefits,

history, and the Eight Limbs of Yoga. Classes will focus on learning different breathing techniques and relaxation to be utilized as stress-management tools for everyday life. Through consistent practice, a student will gain strength, flexibility, balance, and coordination.

**PE 11035. S.C.U.B.A.**

(0-0-0)

*Corequisite:* PE 10001

This course is offered through RecSports each fall and spring semester (six Sundays and one Saturday afternoon), consisting of 28 hours of classroom and pool sessions. Completion of the course results in receiving a YMCA S.C.U.B.A. Open Water Diver Certification, which is a lifetime certification. This will count for a unit of activity in physical education. An informational meeting is held before the start of each course for a question-and-answer session.

**PE 11036. Ultimate Frisbee**

(0-0-0)

*Corequisite:* PE 10001

The course objective is to develop stamina, agility, balance, and coordination, as well as an understanding of the rules and field strategy.

**PE 12001. Physical Education Makeup**

(0-0-0)

This physical education course is designed to accommodate students who have not yet completed their PE requirement for the first year of studies.

**PE 12002. Physical Education Makeup**

(0-0-0)

This physical education course is designed to accommodate students who have not yet completed their PE requirement for the first year of studies.
